CNU ITLE

Strategic Plan Cycle: AY 2019-2020, AY 2020-2021, AY 2021-2022

MISSION, VISION, AND VALUES

Proposal Revision II: **Institute for Teaching and Learning Excellence (ITLE)**

Academic Affairs, California Northstate University

9/17/2018

MISSION

The CNU Institute for Teaching and Learning Excellence (ITLE) seeks to study, develop and implement innovative, evidence-based approaches to teaching, with the goal of maximizing student engagement, critical thinking and information retention.

VISION

ITLE aims to unlock potential and transform the lives of individuals and the communities in which they live. We seek to ensure that CNU graduates are equipped and inspired to shape and respond to the opportunities and challenges of the twenty-first century. The Institute fosters dialogue, scholarship, innovation, and excellence in learner-centered teaching.

We see measurable excellence in the student experience and of student learning as the overall goals that frame our approaches to Learning and Teaching. ITLE is accordingly dedicated to ensuring that teaching and the learning environment are of the highest quality, and are enriched by scholarly research and the fruits of our clinical partnerships. Our approaches promote innovation and use technology that enhances learning and teaching.

VALUES

Our work in teaching and learning directly aligns with the values of the Strategic Plan at California Northstate University – **WE CARE**

- Working as a team
- Embracing diversity and workplace excellence
- Caring about our students, our staff, our faculty, and our profession
- Advancing our university, our goals, and our discipline
- Responding to challenges that may impede Mission
- Enhancing communication and partnership

STRATEGIES

To inspire and empower faculty to innovate and rejuvenate their teaching, the Institute is the platform to forge and nourish teaching relationship by engaging following but not limited to activities:

- Form faculty learning community
- Engage in a scholarly approach to teaching
- Use evidence-based teaching practices
- Engage all students in deep learning
- Effectively assess student learning and teaching innovations
- Reflect and share effective pedagogical practices and experiences with other faculty in the University teaching community
- Develop culturally responsive and evidence-based training for teaching
- Support the cultivation of inclusive curricula and classroom environments, where diverse perspectives are both respected and challenged
- Provide guidance on establishing and sustaining interdisciplinary approaches to education that lead to a convergence of knowledge and training
- Serve as a resource for developing, evaluating, and rewarding teaching excellence

WHO

CNUATLE consists of representative faculty and students from all colleges appointed by CNUATLE. *The CNUATLE assists any person involved with students in an instructional context but primarily faculty at any rank.* We collaborate closely with other units across campus, including Offices of Institutional Research, Quality & Assessment, Instructional Technology Services (IT), Library, Faculty Affairs and the Division of Student Affairs and Curriculum Committees from all colleges.

ATLE also has an Advisory Board with Deans from all colleges.

DELIVERABLES

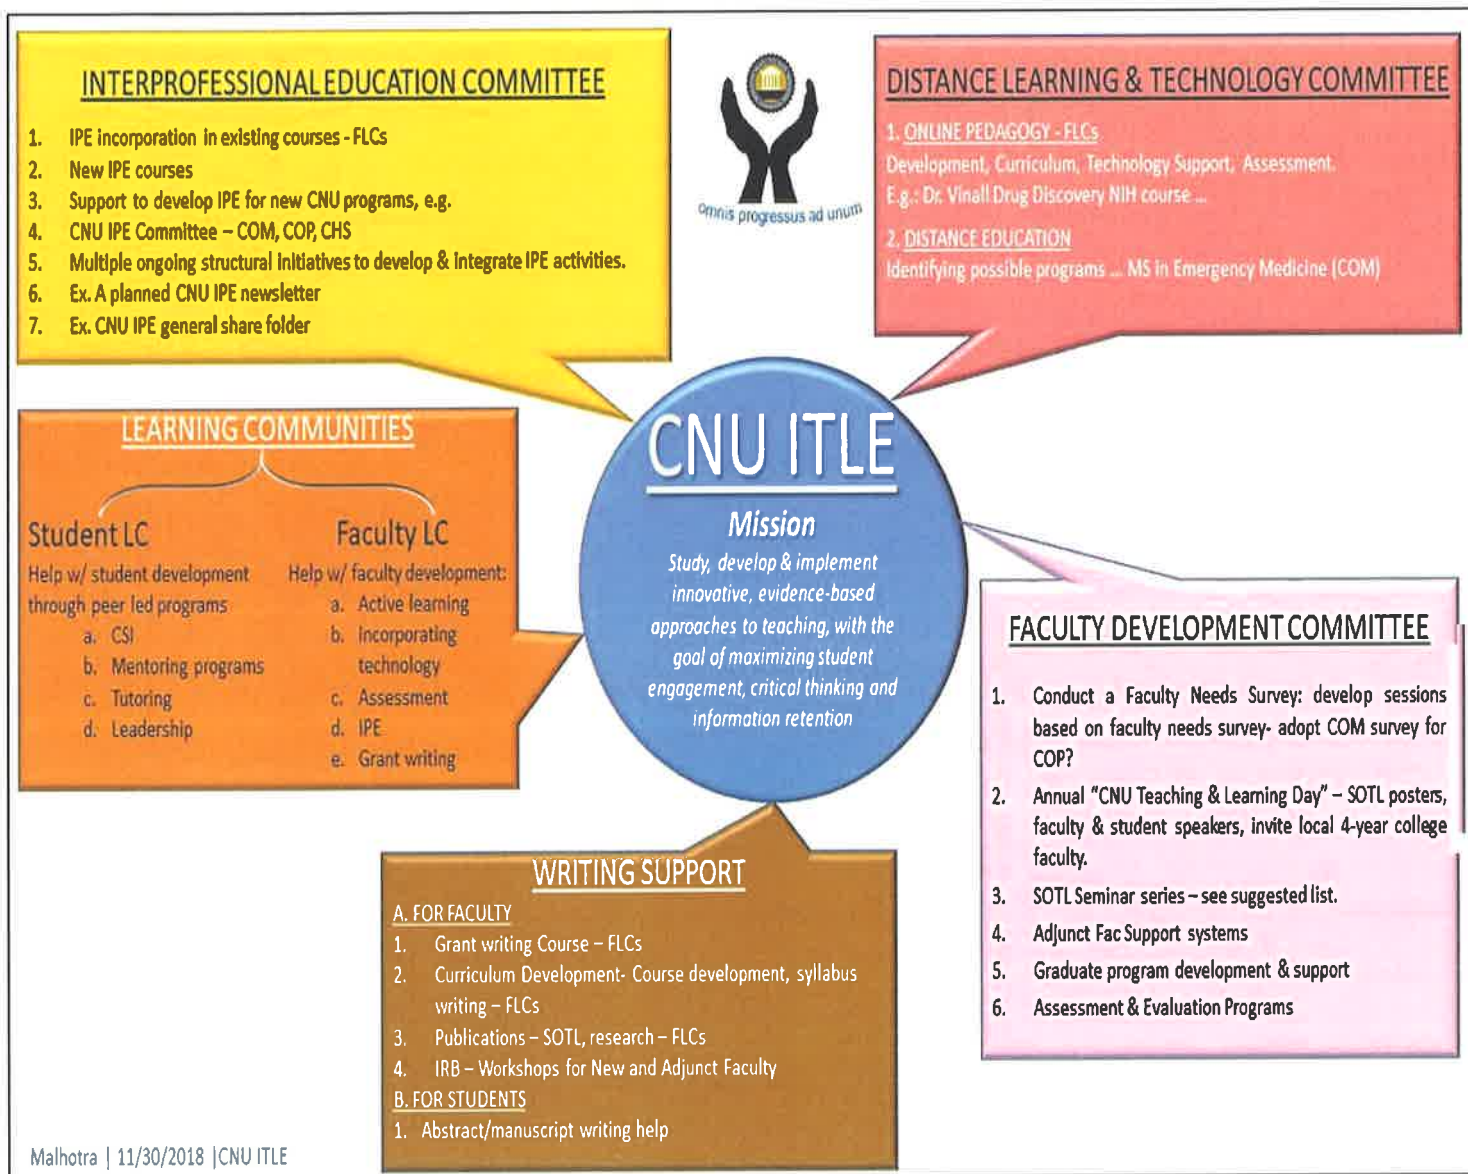

The CNUATLE serves the CNU teaching community in a number of ways, including:

- Teaching Forums
- Pedagogic presentations
- Workshops
- Formal and informal learning communities
- Provide foundational principles of inclusive teaching, learning, and best pedagogical practices through training and resource distribution
- Train and support new faculty as they establish their pedagogical practices
- Provide assistance in establishing college-based plans for advancing teaching
- Consult on college-based teaching development, evaluation, and reward infrastructure and resources

- Train faculty fellows who will facilitate teaching development cohorts within their college
- Mini-grants
- **Host Annual Conference on the research of teaching effectiveness exchanging ideas with peers from other universities**
- Individual consultations
- Online teaching resources
- Collaborations both on- and off-campus
- Teaching Awards

ITLE – AREAS OF FOCUS

Strategic Plan Cycle: AY 2019-2020, AY 2020-2021, AY 2021-2022

ITLE – AREAS OF FOCUS

Strategic Plan Cycle: AY 2019-2020, AY 2020-2021, AY 2021-2022

DESCRIPTION OF THE ITLE STRATEGIC PLAN

A. The need for an Institute of Teaching and Learning Excellence at CNU

Healthcare needs and delivery are changing at a rapid pace both worldwide and in the US. Examples of significant changes in the healthcare industry include transition to a patient-centered model, emphasis on an interprofessional team-based approach, adoption of skills-based curricula in medical, pharmacy and other healthcare education, increasing diversity of the student body with the accompanying need for the inclusion of cultural sensitivity in the classroom, and a transformation in the way cognitive and skills-based learning occurs within the groups of millennial and new generation learners. These factors have precipitated a need for a parallel evolution of the modalities of delivery of healthcare education. However, healthcare education has largely remained unchanged with variations of the Socratic Method dominating elements of didactic pedagogy. Thus, even with medical innovation being a multibillion dollar industry since the past decade per the Harvard Business Review, major challenges exist in the readiness of graduates to implement their learning, which has created an urgent need for interactive, collaborative, peer-based, affordable, equitable, and socially responsible healthcare education.

B. The framework of the CNU ITLE; Mission, Vision, and Values; & Strategic Planning.

The CNU ITLE was established in 2018 under the aegis of the Office of the Vice President of Academic Affairs. The purpose of the ITLE is to provide mechanisms, tools, and programs to develop, enhance, and support teaching and learning at CNU. We are committed to the development and provision of programs that herald a new age in healthcare education by building platforms that augment the learner experience through a university-wide collaborative, collegial, and goal-oriented Institute. An ITLE Mission, Vision, and Values statement was developed by the VP of Academic Affairs that laid the foundation for the structure and Focus Areas for the Institute (pages 3-5 of this document). Faculty from current CNU colleges were nominated as ITLE membership by their respective Deans. Following a national search, ITLE's Founding Director was appointed in October 2018. To communicate the commencement of the Institute, an Inauguration Ceremony was held on October 31, 2018, which was presided by the VP of Academic Affairs, Dr. Catherine Yang, and attended by the CNU President, senior leadership, Deans, faculty, staff, and students. The keynote speaker was Dr. Ronald Carter, Provost of Loma Linda University. In November 2018, the ITLE Director in consultation with the VP, proposed a **five-pronged Focus Areas Plan (FAP)** for the ITLE (please see 6). The FAP was discussed by the ITLE membership, modified, voted on, and adopted as an initial strategic plan, and work commenced in planning the steps needed to develop, operationalize, and implement FAP by the summer of 2019.

C. The ITLE Focused Areas Plan (FAP)

The ITLE is proposing a 3-year Strategic Plan (SP) and has adopted five Focus Areas for initial program development. The Focus Areas Plan (FAP) includes 1) Technology and Distance Learning, 2) Professional Learning Communities including Faculty and Student Learning Communities, 3) Interprofessional Education, 4) Faculty Development, and 5) Writing as the Focus Areas for ITLE in the first SP cycle. A brief description of each Focus Area and examples of initial work to either build or enhance initiatives in these areas follows. The SP on page 12 documents a phasic approach to building and operationalizing each Focus Area, categorized for each year of the 3-year SP cycle. Planned and phasic-implementation strategies for the ITLE Focus Areas are essential to optimize personnel, budgetary, and facility resource utilization to ensure measureable outcomes and success of the ITLE.

1. Technology and Distance Education

VP Yang communicated that the CNU President signaled an area for university wide growth and development was building strength in technology platforms and developing distance learning initiatives in the future. In AY 2018-2019, a faculty needs survey was conducted in the CNUCOM and results from this survey also identified areas where faculty requested support services and program development. The ITLE adopted Technology and Distance Education as a Focus Area in the current Strategic Plan cycle. The emphasis is on building, enhancing and enabling the development of technology

platforms to facilitate the learning and teaching experience at CNU. The ultimate goal is the creation of independent online, hybrid, and mixed-interface courses and programs for small and large volume consumption.

The ITLE will functionalize this objective through 1) the creation of policies and procedures that facilitate online and hybrid course and program development at CNU, 2) supporting and encouraging faculty from all CNU colleges to build and offer online and hybrid courses, 3) identifying content areas that may benefit from the use of this technology and distance education platforms, and 4) consultation with CNU Leadership to build online degree, certification, and competency-training programs in healthcare education. The ITLE has selected Dr. Tuan Tran from the CNUCOP from among its members to lead and coordinate efforts in this direction within the ITLE. Dr. Tran is a data mining expert. Please see page 19 for further information. Examples of initial work in this area include initiating pilot projects in the Focus Area of Technology and Distance Education such as developing and implementing online and hybrid courses at CNU, please see SP. The ITLE will operationalize this Focus Area through various mechanisms such as 1) training CNU faculty in the use of technology to enhance the CNU learner experience through Faculty Learning Communities (FLCs), 2) developing CNU wide programs through the technology-focused ITLE sub-committee described above, and 3) developing and integrating technology solutions in the operationalization and assessment of another key strategic area of Interprofessional Education.

2. Professional Learning Communities

Faculty and students constitute the driving force of a university. Large-sized and research-focused universities have attempted to harness the intellectual and creative power of faculty and students in building centers that support educational and research endeavors and birth innovation and progress. The ITLE seeks to establish Professional Learning Communities at CNU to facilitate growth and development and energize CNU stakeholders by participating in and contributing to the professional growth of their peers, creating an environment where self-directed lifelong learning is cherished, and where this noble objective may be achieved through collaborative and collegial community learning. The ITLE envisions that at CNU, Professional Learning Communities will be operationalized through faculty and student partnership, forming **Faculty Learning Communities (FLCs)** and **Student Learning Communities (SLCs)** respectively.

The goal of FLCs and SLCs will be to create optimum, community-based, peer-led learning platforms to enhance the development of faculty and students in selected areas. The ITLE will operationalize FLCs through faculty citizenship and SLCs through student governance and citizenship at the university. For the current SP cycle (please see SP), the ITLE proposes four FLCs (see Appendix D) to be operationalized over three years. The intent of the FLCs and SLCs will be to invite CNU or external faculty experts for the FLC, and students for the SLC, to lead peer-development activities in two-hour formats to train faculty or student teams in specific areas, for example, for faculty, the use of enhanced technology platforms in their respective areas of teaching. The difference between Professional Learning Communities and the ITLE Focus Area of Faculty Development is structural and operational. While the Faculty Development Focus Area will offer seminars and workshops in the more traditional learning structure and style, the Professional Learning Communities will encompass team-oriented, self-directed learning activities for the incorporation of techniques, ideas, and “how to” strategies being shared by faculty or students. For example, a central structural component of the Professional Learning Communities is integrated session time to actively incorporate the specific topic into the participating faculty’s courses; see Appendix C for an example of the “Technology-focused FLC” being developed for implementation in the spring-summer of 2019.

Examples of initial work priorities in this area include the creation of a “Technology-focused FLC” to be started in the spring and summer of 2019. The planned “Technology-focused FLC” is being led by Dr. Tracy Yarbrough of the CNUCOM and Dr. Ashim Malhotra of the CNUCOP.

For the FLC, the ITLE plans to seek help and guidance from the Advisory Dean’s Council to facilitate and enhance mechanisms for incentivizing faculty participation across the university. The ITLE membership has expended considerable time and effort in discussing ideas to incentivize faculty participation in developing ITLE programs. Support from CNU Colleges and Deans is quintessential for traction and ultimately for the success of the proposed ITLE plans. Specifically, for the FLCs, the ITLE suggests the following mechanisms to be discussed at the first Dean’s Advisory Council meeting scheduled for March 25th, 2019 (please see Process Flow Diagram for SP on page 11). The ITLE will discuss incentivizing faculty participation in FLCs by 1) linking CNU faculty participation in FLCs as recognized faculty development activities

during promotion and annual reviews of all full time, part time or adjunct faculty at CNU, 2) provision of certificates of completion of FLC, recognized during faculty annual and promotion reviews, 3) obtaining Continuing Education (CE) credits for participating faculty, 4) monetary support of faculty attending the FLCs as practiced by some public universities such as California State University at Sacramento, and 5) providing teaching credits for the lead/expert faculty who develop and teach in the FLCs and have CNU colleges agree to the recognition of such credit within their respective departments. At this time, the ITLE is open to additional suggestions from the Advisory Council regarding support for incentivizing CNU faculty participation in the Professional Learning Communities program.

3. Interprofessional Education

In 2010, the World Health Organization defined interprofessional education (IPE) as occurring when students from two or more professions learn about, from and with each other. Since then, the philosophy underlining an interprofessional approach in healthcare education has been widely accepted and expanded. In 2011, the Interprofessional Education Collaborative (IPEC) was formed, which defined IPE and articulated for the first time four IPE competencies desired in the healthcare graduate. Since then, IPEC has updated and further elaborated IPE Core Competencies, most recently in 2016. Additionally, healthcare accreditors responded to the need for consensus IPE definitions. For example, in February of this year, the Health Professions Accreditor's Collaborative (HPAC) adopted IPEC definitions and Core Competencies. It is interesting to note that the planning, development and implementation of an IPE curriculum at the California Northstate University (CNU) occurred in this backdrop, during the birth and incipient evolution of IPE, making CNU an early adopter of the IPE national movement.

Hieu T. Tran, Dean of the CNU College of Pharmacy, and Joseph Silva, Dean of the CNU College of Medicine, with foresight and innovation, developed and implemented IPE at CNU starting in 2015. Since then, the CNUCOP has built a comprehensive, integrated, multi-modal (CIM) IPE program that is vertically and horizontally aligned. For the CNUCOP, the CIM-IPE curriculum commences in the first-professional year with a didactic introduction to the principles of IPE and the IPEC Core Competencies. As Pharm.D. students progress to the second professional year, CNUCOP pharmacy and nursing students from the California State University at Sacramento School of Nursing are assigned to teams and develop interprofessional communication strategies as the teams undergo forming, storming, norming, and performing stages in team development. Over the next two years, our students will participate in a series of longitudinal IPE events that will increase in content and process complexity. The various teaching models employed in our curriculum include didactic IPE, high fidelity simulation with content emphasis, high fidelity simulation with process emphasis, interprofessional case conferences, and an innovative, national IPE-Hotspotting offered as an advanced elective to our third-professional year students. Thus, at CNU we strive to offer a diverse IPE curriculum taught through a variety of approaches to include meaningful, real-life simulations that have a positive impact on learners' growth and skills development.

The ITLE plans to further grow the CNU IPE effort per the SP (please see page 12) to include developing and new programs at CNU such as Psychology and Dental Medicine in establishing an integrated IPE platform for our students. Additional IPE projects include building a community impact initiative that utilizes CNU IP teams in advancing the Patient Care Process in the local communities and the larger Sacramento area. Possible practice areas for IP teams include student-led clinics operationalized through the CNUCOM and affiliated with the CNUCOP. The ITLE IPE Strategic Plan includes milestones for successful NIH, HRSA or private foundation funding for integrating IP teams in community settings for maximizing impact. In summary, expansion, funding development and practice implementation constitute the overall themes of the ITLE's effort in the IPE Focus Area. As programs develop, the ITLE will also commence the phasic implementation of a communication strategy regarding IPE to share IPE news with all stakeholders and the development of an IPE web page within the ITLE web portal.

The ITLE will further collaborate with the CNU IPE Committee, which is the primary university wide IPE Committee served by faculty, staff, students and administration, currently of the CNUOP and CNUCOM. It is planned to expand committee representation as CNU grows and adds more professional or healthcare programs. To ensure adequacy of informational exchange, the ITLE Director also serves as the Co-Chair of the CNU IPE Committee. Please see Appendix E for further information.

4. Faculty Development

Building and providing programs and opportunities for professional development is a traditional cornerstone in the history and mission of a university teaching and learning center. In line with this, the CNU ITLE is committed to providing opportunities to all CNU faculty for professional growth and development. The ITLE will operationalize this Focus Area via traditional seminars and workshops in faculty professional development but with emphasis in the area of Scholarship of Teaching and Learning (SOTL). The ITLE plans collaborative effort in partnership with existing college and university committees and efforts. For example, at the university level, professional healthcare seminars are featured regularly on a near weekly basis. To prevent duplication and faculty seminar fatigue and build on the existing structure, the ITLE proposes to work with the current personnel managing this seminar series (Ms. Michelle Ngo) and the Office of the VP of Academic Affairs to initially add speakers from within and outside the CNU community with expertise in SOTL to the existing seminar structure for SP Year 1. The ITLE also plans to offer workshops for professional development. An annual SOTL and healthcare pedagogy seminar is planned for SP Year 1.

Various mechanisms to incentivize faculty participation are listed in the SP (please see pages 13 and 14). Examples include organizing an annual SOTL Seminar to showcase CNU faculty and student efforts in SOTL and healthcare pedagogy. The ITLE proposes to create recognition processes such as award mechanisms in the form of the "SOTL Poster of the Year" and "SOTL Manuscript of the Year" certificates.

5. Writing

The intent of including a Writer Center within the ITLE is to create and provide programs for faculty and student professional development. The Writing Center will develop and implement faculty-centered and student-centered programs through the academic year. Faculty-centered writing and communication programs include initiatives focusing on 1) grant writing, 2) IRB application development, 3) manuscript development, 4) abstract and poster development, and 5) developing SOTL manuscripts. Typical examples of student-centered writing developmental programs that the ITLE will offer include 1) abstract and poster development, 2) manuscript and review articles development, 3) and other forms of academic writing. The ITLE will collaborate with existing structures such as seminars to functionalize this Focus Area.

The ITLE will use various mechanisms to operationalize the Writing Focus Area. These include the use of student-learning communities and faculty learning communities. The ITLE seeks advice from the Dean's Advisory Council regarding the creation of a half-time Grant Writer position to support the Writing Focus Area, with such hire, if approved, occurring in Year 2 of the Writing Focus Area SP.

Dr. Linda Buckley of the CNUCOP will lead the development of the Writing Focus Area at CNU. In this, she will be aided by Dr. Ashim Malhotra.

D. Closing Comments

In the current SP cycle, greater emphasis is placed on the development and implementation of Focus Areas 1-3. While Focus Areas 4 and 5 will be developed, to optimize resource utilization, the ITLE SP deliberately includes more expansive coverage in Focus Areas 1-3.

In addition to identifying Focus Areas for developing university-wide programs as discussed above, the ITLE has also developed an "Indicators of Success Rubric" to measure ITLE outcomes based on the presented Specific, Measurable, Achievable, Realistic and Time Bound (S.M.A.R.T.) objectives outlined above. This rubric is presented on page 17.

Finally, to ensure timely and adequate university wide communication, the ITLE developed a process flow strategy, presented in Appendix G on page 32.

December 2018

- ❖ ITLE formed; Director appointed in November 2018; discussion of focused work initiated.
- ❖ ITLE membership tasked with the development of specific focus areas (see SP).
- ❖ 3 of 5 focus areas initiated
 - 1) Faculty Learning Communities with focus on technology
 - 2) Interprofessional Education
 - 3) Technology and distance education.
- ❖ ITLE website is created

PHASE 2

November 2018-
April 2019

- ❖ ITLE website redesigned & enhanced as the ITLE focus areas develop.
- ❖ ITLE Director develops a draft ITLE Strategic Plan (SP) and "Indicators of Success" rubric (ISR).
- ❖ SP & ISR shared with the VP of Academic Affairs. Edits to be incorporated.
- ❖ Edited SP & ISR shared with the ITLE Advisory Council of CNU Deans on March 25th, 2019. Edits will be incorporated.
- ❖ Revised SP & ISR presented at the President's Executive Council in mid-late April 2019.

PHASE 3

April 2019

- ❖ ITLE SP and ISR, and Mission, Vision, and Values are discussed at PEC.
- ❖ Following PEC's deliberations, drafts will be modified.
- ❖ Modified plan resent to PEC for final approval by President.
- ❖ Development and implementation phase begins.

PHASE 4

2019 - 2022

- ❖ Assessment starts and data are used to adjust and modify ITLE over the next 3 years.

CNU ITLE: DRAFT STRATEGIC PLAN (March 2019)

Strategic Plan Cycle: AY 2019-2020, AY 2020-2021, AY 2021-2022

GOAL	PROFESSIONAL LEARNING COMMUNITIES	FACULTY DEVELOPMENT	INTERPRPFESSIO NAL EDUCATION (IPE)	TECHNOLOGY AND DISTANCE LEARNING	WRITING
GOAL: Build programs to support attainment and maintenance of EXCELLENCE IN EDUCATION					
S.M.A.R.T objectives <u>SP Cycle</u> (AY 2019-2020, 2020-2021, 2021- 2022) Support faculty and students to achieve excellence in education by enhancing didactic and skills-based teaching through: 1. Development and implementatio n of technology- assisted online and hybrid course design strategies, beginning with piloting online projects in SP Year 1, with the aim to eventually offer university- wide distance education	<u>Faculty Learning Community (FLCs)</u> <u>YEAR 1</u> (AY 2019-2020) A. Develop and implement <i>professional learning communities</i> at CNU that offer opportunities to enhance faculty scholarship and teaching skills, especially in healthcare education through community- learning experiences structured and led by CNU and external faculty experts. <u>Task</u> <u>status:</u> started November 2018, FLCs being developed based on university President and leaderships' vision for CNU and select Faculty Needs Survey data, ex. for COM.	<u>FD YEAR 1</u> (AY 2019-2020) A. Working with college-level Faculty Orientation and Mentoring Committees , develop an "Orientation to CNU" workshop to be offered once in the fall and spring, in collaboratio n with HR resources. B. Develop and implement Introductor y Scholarship of Teaching and Learning (SOTL) workshop series for faculty in partnership with CNU colleges and senior faculty. B1. Can target new and senior faculty in	<u>IPE YEAR 1</u> (AY 2019-2020) A. Develop a comprehensiv e master list of CNU IPE efforts to map the current state of IPE at CNU; <u>Task</u> <u>status:</u> task completed, March 2019. B. Develop IPE Mission, Vision, and Values through the CNU IPE Committee; <u>Task status:</u> task near completion, March 2019. C. Centralize IPE assessment using 2016 IPEC Core Competencies and the 2019 HPAC guidelines; <u>Task status:</u> task accomplished for the COP. Assessment strategies shared at the CNU IPE Committee for possible	<u>TECH. & DE YEAR</u> <u>1</u> (AY 2019-2020) A. Develop a University- wide policy for developing and implementin g online courses. <u>Task</u> <u>status:</u> recently completed under PEC's guidance; policy adopted by ITLE, specifically by the ITLE Technology subcommitte e being led by Dr. Tuan Tran. B. Develop a university- wide protocol for developing hybrid courses. <u>Task</u> <u>status:</u> ongoing, March 2019. In charge personnel: Dr. Tuan Tran, ITLE Technology	<u>YEAR 1</u> A. Develop a university wide Writing Center to provide support to faculty and students in developing and submitting academic projects. B. Collaborate with existing programs and mechanisms to provide support for academic writing projects to faculty and students. C. Create FLCs to help enhance grant development , manuscript writing, IRB application and other academic writing skills for university faculty.

GOAL	PROFESSIONAL LEARNING COMMUNITIES	FACULTY DEVELOPMENT	INTERPROFESSIONAL EDUCATION (IPE)	TECHNOLOGY AND DISTANCE LEARNING	WRITING
courses and programs.	B. VP and ITLE membership selected “Technology-FLC” as launch vehicle for professional learning communities – technology is the President’s emphasis area for university development.	different workshops. B2. Merge efforts with ongoing CNU research presentations to conserve time, money, and effort. Plan to survey similar to the current process used for the faculty development seminars. Plan logistics with Michelle Ngo.	adoption by other CNU programs. Assessment strategies shared with Sac State Nursing.	subcommittee. C. Convene Dean’s Advisory Council and identify areas of need for online courses and/or programs within CNU colleges. Design and implement college-level online and hybrid courses and programs.	D. Create Student Learning Communities to peer-led support in developing writing and communication skills.
2. Development and implementation of Professional Learning Communities such as Faculty Learning Communities (FLCs) and Student Learning Communities (SLCs) at CNU	C. Action plan: targeted launch date for Technology-focused FLC in the summer of 2019. <u>Task status:</u> planning is ongoing, indicators suggest timely launch.	C. Develop an Annual SOTL Seminar to showcase the ongoing SOTL and healthcare pedagogy at CNU.	D. Develop an IPE strategic plan for the next 3-year cycle integrating new and developing CNU programs – Psychology and Dental Medicine. <i>Sub-aim D1:</i> discuss with CNU senior administration and leadership the future goals regarding expansion of the IPE program at CNU.	D. Discuss with senior administration and CNU leadership ideas for constructing a “ CNU Virtual Classroom ” facility equipped with cameras and computers for recording asynchronous course lectures to achieve online course abilities. Also, identify, purchase and implement software for small and large volume online	E. The ITLE plans to develop this Focus Area in Years 2 and 3 to optimize resource utilization.
3. Enhancing CNU Faculty Development programs in SOTL and pedagogy with emphasis on healthcare education – including leveraging existing resources and combining these under the single ITLE umbrella to centralize implementation and	<u>FLCs YEARS 2-3 (AY 2020-2021; 2021-2022)</u> D. Overall FLC plan in current ITLE Strategic Plan cycle (2019-2022): offer 1-2 FLCs in AY 2019-2020 – assess progress, logistics, impact, and the return to university. Use assessment data to plan further FLCs.	C1. Develop relationships with 4-year colleges in the Sacramento region, inviting colleges to participate in the Annual SOTL Seminar. C2. Invite prominent SOTL national experts, at least one each year, as a guest of honor at the Annual SOTL seminar. C3. Incentivize faculty and student participation in	<i>Actionable item:</i> target discussion for summer 2019 for starting one new IPE in Fall 2019; ex: Psychology program and pharmacy. E. Formulate a communication strategy for IPE within the university and with partners – planning		<u>YEARS 2 & 3</u> A. The ITLE will seek Advisory Council’s guidance regarding the creation of a part-time university position in grant writing to assist grant development at the university. B.

GOAL	PROFESSIONAL LEARNING COMMUNITIES	FACULTY DEVELOPMENT	INTERPROFESSIONAL EDUCATION (IPE)	TECHNOLOGY AND DISTANCE LEARNING	WRITING
management of efforts.	E. Scale-up FLCs in AYs 2 and 3. For example, develop and implement up to 2 FLCs in any given year.	the annual SOTL seminar through recognitions such as “SOTL Poster of the Year”, and “SOTL manuscript of the Year”.	started, please see F.	classrooms – Adobe Connect (Ashim has experience), or what else? <u>Task status:</u> Planning discussion and presentation to senior administration and leadership for summer 2019. In charge: Ashim.	
4. Augmenting, building and expanding CNU Interprofessional Education (CNU IPE) programs – for example through:	F. Formulate a 3-year strategic plan cycle for FLCs – seek administrative and leadership input and support – initial planning complete, see possible FLC topics for Years 1-3 for current SP cycle listed in H.		F. Functionalize the above mentioned IPE Communication Strategy – 1. Create an IPE web page detailing IPE curriculum, assessment, impact, and news/events – planned and ongoing. <u>Task status</u> – in development as component of the ITLE web page ; Target launch date – April 2019.	E. Pilot hybrid courses at CNU in Year 1. For ex, 1 hybrid course, ELC 762: Pharmacists in Public Health, enrolling 36 students started at CNUCOP in spring 2019. Uses Active Presenter based video recorded lectures. <u>Task status:</u> Started, awaiting assessment.	
4.1 Enhanced faculty, staff, and student training in IPE	G. Each FLC area should develop its own strategic plan for logistics, resources, outcomes, and assessment, see Technology-FLC appendix as example.		2. Create and implement a faculty citizenship style IPE communication instrument – task started – 1 st issue of the CNU IPE Newsletter , target launch – March 2019.	F. Other CNU examples of hybrid course technology: in the current ITLE SP cycle, the ITLE	
4.2 Establishing a university IPE Strategic Plan with time-bound goals and strategies for integration, communication, and assessment.	H. Consult with Advisory Board regarding faculty incentivizing mechanisms.		<u>IPE Years 2 and 3</u>		
	I. Adapt ITLE SP in years 2 and 3 to reflect university needs and assessment		A. Develop programs that		

GOAL	PROFESSIONAL LEARNING COMMUNITIES	FACULTY DEVELOPMENT	INTERPROFESSIONAL EDUCATION (IPE)	TECHNOLOGY AND DISTANCE LEARNING	WRITING
<p>Overall aims of Goal 1:</p> <p>1. Identify and provide resources</p> <p>2. Develop and implement programs</p> <p>3. Assess and evaluate impact</p>	<p>data from pilot FLCs.</p> <p>J. Possible FLC areas for first Strategic Plan Cycle (based loosely on COM Faculty Needs Survey and Leaderships' Vision for CNU growth)</p> <p>1. Technology & Distance Education – President's priority area for university (Year 1) ... Task status: planning stage, March 2019.</p> <p>2. Active Learning FLC (<u>YEAR 2</u>)</p> <p>3. Assessment Strategies FLC (<u>YEARS 2 AND 3</u>)</p> <p>4. IPE FLC (<u>YEARS 2 AND 3</u>)</p> <p>5. Please see attached Appendix for FLC</p>		<p>employ trained IP teams to improved community impact. For ex. By placement of IP teams of CNU medicine, pharmacy and other professions in real-life settings such as hospital, clinics and nursing homes.</p> <p>B. Pair CNU IP teams with social workers and local community partners to increase the healthcare footprint of CNU in the local communities we serve.</p> <p>C. Develop and apply for NIH, HRSA and private foundation funding, especially with the goal of developing programs to impact local communities through trained IP teams.</p>	<p>Director converted IPE courses at CNUOP to hybrid courses. <u>Task status:</u> completed as of March 2019 for 7 IPE events through first professional year to third professional year of the Doctor of Pharmacy program at CNUOP.</p> <p>G. Pilot online courses at CNU. An online course in Clinical Pharmacology from the NIH started by COP faculty, Dr. Ruth Vinall in spring of 2019. Course operationalized using current LMS, Canvas at CNU. 	descriptio ns.			<p>using Canvas to deliver completely online courses.</p> <p>H. Dr. Vinall will teach other faculty to use and implement Canvas in building online courses in the CNU Technology-focused FLC starting in 2019. Drs. Tran and Malhotra will also train CNU faculty in designing and delivering hybrid courses in the FLC. <u>Task status:</u> ongoing.</p>	

CNU ITLE: DRAFT INDICATORS OF SUCCESS RUBRIC (March 2019)

Strategic Plan Cycle: AY 2019-2020, AY 2020-2021, AY 2021-2022

INDICATORS	INITIAL	DEVELOPING	DEVELOPED	PROFICIENT
TECHNOLOGY AND DISTANCE EDUCATION	<ol style="list-style-type: none"> 1. Develop policy for online and hybrid courses. 2. Develop proposals for asynchronous online teaching. 3. Develop at least one hybrid course. 4. Develop at least one online course. 	<ol style="list-style-type: none"> 1. Develop and offer 2 CNU online courses per academic year. 2. Develop and offer 2 CNU hybrid courses per academic year. 3. Develop and implement technical capabilities for small volume online courses, including assessment. 	<ol style="list-style-type: none"> 1. Regularly offer online and hybrid courses throughout university colleges. 2. Have facilities to record lectures for asynchronous delivery. 3. Have software, LMS, and manpower resources along with policies to assist faculty in developing online courses. 4. Develop and Implement an online degree or certificate program in healthcare education. 	<ol style="list-style-type: none"> 1. Implement two or more online distance education degree and certificate programs. 2. Provide regular Instructional Design services to faculty interested in developing online courses and programs.
PROFESSIONAL LEARNING COMMUNITIES	<ol style="list-style-type: none"> 1. Develop and offer the first FLC in 2019 in the area of technology-focus. 2. Develop and implement one SLC, for example, in Writing Focus Area of the SP. 3. Develop assessment plans and measure the impact of the Learning Communities. 	<ol style="list-style-type: none"> 1. Develop and offer at least 2 FLCs during the AY. 2. Develop and implement at least one SLC regularly at CNU. 3. Survey faculty and students to assess impact, and such survey demonstrates greater than 70% respondent rate requesting continuation of FLCs and SLCs. 	<ol style="list-style-type: none"> 1. Regularly offer FLCs at CNU, at least 2 per AY. 2. Regularly offer SLCs at CNU, at least 2 per AY. 3. Faculty and student surveys show a greater than 80% satisfaction rate with Learning Communities. 	<ol style="list-style-type: none"> 1. CNU faculty and ITLE members provide advice and guidance to other university and at national platforms for developing and implementing Professional Learning Communities. 2. CNU Professional Learning Communities are offered in a wide variety of topics including the ITLE Focus Areas of IPE, Writing, and Technology and Distance Education.

INDICATORS	INITIAL	DEVELOPING	DEVELOPED	PROFICIENT
INTERPROFESSIONAL EDUCATION	<ol style="list-style-type: none"> 1. Develop and implement IPE courses at CNU including Pharmacy and Medicine students. 2. Create IPE student teams and add other professional programs such as nursing (external to CNU). 3. Begin assessment of IPE program and student learning outcomes. 	<ol style="list-style-type: none"> 1. Combine existing CNU IPE courses and programs under a single umbrella, the CNU IPE Committee, and build a continuous IPE educational program at CNU. 2. Begin to offer a central Core Curriculum and an elective courses menu for IPE for pharmacy, nursing and medical students. 3. Use IPEC 2016 guidelines to gauge student outcomes in the defined 4 competency areas. 	<ol style="list-style-type: none"> 1. Offer a core and elective program in IPE, including pharmacy, medical, psychology, and dental medicine students (internal) with nursing students (external). 2. Provide online, technology-supported platforms for asynchronous didactic introduction to IPE and the 2016 IPEC Core Competencies for the first professional year teams of all participating colleges. 3. IPE assessment data regularly collected from all participating programs and mapped to CNU PLOs and ILOs. 	<ol style="list-style-type: none"> 1. CNU IPE faculty regularly build IPE elements into healthcare professions courses. 2. The CNU IP teams practice in an environment where the impact of IPE can be measured. 3. IPE efforts at the university lead to funding from NIH, HRSA or private foundations. 4. CNU faculty are recognized externally by IPE think tanks. 5. Collaboration with the National Center for Interprofessional Education leads to the establishment of a CNU Nexus Hub to measure the impact of CNU IP teams in the general Sacramento region.
FACULTY DEVELOPMENT	<ol style="list-style-type: none"> 1. Develop and implement at least one faculty workshop in grant writing and manuscript development. 2. Start an Annual SOTL Seminar to showcase the SOTL work at CNU. 	<ol style="list-style-type: none"> 1. Implement 2 workshops and 4 seminars per AY regarding grant writing and manuscript development. 	<ol style="list-style-type: none"> 1. Regularly offer workshops in multiple faculty professional development areas. 2. Expand the Annual SOTL Seminar day to invite regional and local college faculty to participate. 	<ol style="list-style-type: none"> 1. Regularly offer a continuous series of workshops and seminars regarding more than 3 areas of faculty professional development. 2. Institute university wide recognition of faculty leaders who help with implementation of the Annual SOTL Seminar.
WRITING	<ol style="list-style-type: none"> 1. Develop and implement at least one faculty and one student learning community in academic writing. 	<ol style="list-style-type: none"> 1. Offer peer-led FLCs and/or SLCs in manuscript development, abstract and grant writing. 	<ol style="list-style-type: none"> 1. Regularly offer both FLCs and SLCs in at least three areas of academic writing. 2. Create a university position to hire a Grant Writer to assist faculty. 	<ol style="list-style-type: none"> 1. CNU faculty offer national programs in any one area of academic writing. 2. SOTL papers & grants increase by over 33% when compared to previous AYs.

APPENDIX C

CNU Institute of Teaching and Learning Excellence *Geared Toward Student Success*

2019 Faculty Learning Community Example

Spring-Summer 2019 FLC: Technology-assisted Teaching and Learning

FLC Facilitators

- Co-Facilitator: Tracy Yarbrough, MD, PhD, MAEd, Director, CNUCOM Center for Teaching and Learning
- Co-Facilitator: Ashim Malhotra, B.Pharm, MS, PhD, Director, Institute for Teaching and Learning Excellence

FLC Long-term Goals: The ITLE, by offering and facilitating faculty learning communities (FLCs) centered around topics relevant to faculty at all Colleges within the University, hopes to develop a community of practice that will engage educational scholars in identifying and implementing best practices across the educational continuum. Faculty enrolling in this and subsequent FLCs will be encouraged to participate in this community and provide feedback to the FLC program and ITLE regarding application and outcomes related to FLC topics.

FLC Focus – Technology-assisted Teaching and Learning

Offered by the CNU ITLE, this spring 2019 Faculty Learning Community will help build expertise in the use and assessment of technology-assisted teaching and/or distance learning techniques in existing courses at CNU. The two-hour FLC sessions will be led by CNU faculty with expertise in these areas and will be held five times spanning the spring and summer semesters. Faculty from different disciplines are encouraged to participate. The sessions are open to all CNU faculty, full time, part time and adjunct. We especially welcome new faculty members.

FLC Outcomes

Each participant will be able to:

1. Identify an area of technology-assisted or distance learning that they would like to incorporate into their teaching toolbox as a part of their courses at CNSU.
2. Examine the design, potential usage and steps to implementation of that technology platform in their teaching at CNSU.
3. Implement assessment strategies to validate student learning experiences and outcomes post-technology enhancement of their respective courses.

FLC Deliverables

1. Contribution to the University Strategic Plan for Area 1. Education through faculty development. At the end of the FLC, participants will evaluate their post-course knowledge and attitudes toward FLCs in general and the current FLC in particular.
2. Develop lesson plan including assessment strategy. Participants will present an example of the incorporation of an aspect of a technology-assisted intervention that will be used to enhance their current course, including an assessment plan to measure at least one defined learning outcome.
3. Develop a sustainability plan. At the time of the final presentation, participants will outline a brief plan to ensure sustainability of the use of the technology in their course.

Technology FLC Meetings Calendar

Date	FLC Session Topic	Faculty and Staff Leading Sessions	Main Learning Objectives
Mon, 4/29/19; 1-2pm	Orientation and introduction to FLCs and technology-assisted teaching and learning	Dr. Tracy Yarbrough (COM) & Dr. Ashim Malhotra (COP)	
Mon, 5/6/19; 1-3pm	Essential elements of hybrid course design	Dr. Ashim Malhotra & Hoa Huynh	
Mon, 5/20/19; 1-3pm	Building hybrid lessons using Active Presenter	Dr. Tuan Tran (COP)	
Mon, 6/10/19; 1-3pm	Lessons from establishing an online course at CNU	Dr. Ruth Vinall (COP)	
Mon, 7/1/19; 1-3pm	Strategies for communication with the online learner	Ms. Frances Wise (CHS)	(tentative date)
Mon, 7/22/19; 1-3pm	Class presentations and course evaluations	All participants and faculty	

Technology FLC Learning Plan

Meeting	Topic	Date	Deliverables/Homework
1	1. Introduction and welcome 2. Objectives of the technology FLC 3. FLC expectations, plan & definition of deliverables	4/29/19	1. <u>Pre-FLC</u> . Arrive to class having read the description of the learning objectives and overall intent of the FLC. Please be ready to suggest at least one way in which the FLC and the ITLE can help with the development/enhancement of your course. 2. <u>During FLC</u> . Discuss overall FLC goals and expectations, as well as currently CNU policies for online and hybrid teaching. 3. <u>Post-FLC</u> . None. See session 2 prep.
2	Essential Elements of hybrid course design	5/6/19	1. <u>Pre-FLC</u> . Arrive to class with at least one and at most two specific ideas about incorporating hybrid technology into your CNU course. 2. <u>During FLC</u> . Working with the facilitator on the day of the FLC to develop a plan to design and incorporate one technology tool into your course. 3. <u>Post-FLC</u> . Within a week after the class, write out a plan for how you will incorporate the technology, how will you assess its impact, and what resources will you need.
3	Building hybrid lessons using Active Presenter	5/20/19	1. <u>Pre-FLC</u> . 2. <u>During FLC</u> . 3. <u>Post-FLC</u> .
4	Lessons from establishing an online course at CNU	6/10/19	1. <u>Pre-FLC</u> . 2. <u>During FLC</u> . 3. <u>Post-FLC</u> .
5	Strategies for communication with the online learner	7/1/19	1. <u>Pre-FLC</u> . 2. <u>During FLC</u> .

			3. <u>Post-FLC</u> . Presentation at FLC Wrap-up event. Plan and construct a model course using your chosen technology tool and prepare for presentation at the end of the FLC. <u>Deliverables 1, 2, and 3 captured</u>
6	Presentations, course wrap-up & evaluation	7/22/19	1. <u>Pre-FLC</u> . 2. <u>During FLC</u> . Presentation and course evaluation. 3. <u>Post-FLC</u> . Provide updates to FLC facilitators regarding implementation of technology-assisted teaching in future courses/curricula.

Technology-Assisted FLC Assessment & Evaluation

Formative Feedback for Students: Faculty enrolled in the course will receive rubric-based formative feedback on their final course presentation by teaching faculty and FLC facilitators.

Course Evaluation: Faculty enrolled in the course and faculty teaching during the course will be asked to provide anonymous evaluations of the course at its conclusion.

APPENDIX D

FOCUS AREA: FACULTY LEARNING COMMUNITIES – OVERVIEW

FACULTY LEARNING COMMUNITIES PROPOSAL

Ashim Malhotra, December 19, 2018

Three to four tracks are proposed for FLCs in current ITLE SP cycle

- | | |
|--------------------------------|---|
| A: Online and Hybrid Courses | – AY 2019-2020 |
| B: Assessment | – AY 2019-2020 or AY 2020-2021 |
| C: Active Learning | – AY 2020-2021 |
| D: Interprofessional Education | – AY 2021-2022 (not tabled in this proposal, under development) |

CNU FLCs Track A: Online and Hybrid Courses

Meetings: Fridays

S19 dates: TBD

Faculty Lead: Tracy Yarbrough, COM and Ashim Malhotra, COP

Offered by the CNU ITLE, this spring 2019 Faculty Learning Community will help build expertise in the use and assessment of technology-assisted teaching and/or distance learning techniques in existing courses at CNU. The two-hour FLC sessions will be led by CNU faculty with expertise in these areas and will be held five times spanning the spring and summer semesters. Faculty from different disciplines are encouraged to participate. The sessions are open to all CNU faculty, full time, part time and adjunct. We especially welcome new faculty members.

Dates	FLC Session Topic	Lead Faculty
TBD	Essentials elements of hybrid course design	Ashim Malhotra & Hoa Hyunh (CNU IT)
	Building hybrid lessons using Active Presenter	Tuan Tran (COP)
	Lessons from establishing an online course at CNU	Ruth Vinall (COP)
	Use of Screen-cast to enhance the online classroom	Frances Wise (CHS)
	Class presentations	All participants

CNU FLCs Track B: Assessment

Meetings: Thursdays

S20 dates: TBD

Faculty Lead:

Offered by the CNU ITLE, this spring 2019 Faculty Learning Community will help build expertise in assessment. The two-hour FLC sessions will be led by CNU faculty with expertise in these areas and will be held five times in the spring semester. Faculty from different disciplines are encouraged to participate. The sessions are open to all CNU faculty, full time, part time and adjunct. We especially welcome new faculty members. Details of the full course can be accessed [here](#).

Date	FLC Session Topic	Lead Faculty
TBD	Item writing & Bloom's Taxonomy	TBD
	Item analysis using Examsoft	Uyen Le (COP)
	Using Examsoft for Skills-based assessment	Eugene Kreys (COP)
	Class presentations	All participants

CNU FLCs Track C: Active Learning

Meetings: Wednesdays

S21 dates: TBD

Faculty Lead: Tracy Yarbrough, College of Medicine

Offered by the CNU ITLE, this spring 2019 Faculty Learning Community will help build expertise in active learning strategies. The two-hour FLC sessions will be led by CNU faculty with expertise in these areas and will be held five times in the spring semester. Faculty from different disciplines are encouraged to participate. The sessions are open to all CNU faculty, full time, part time and adjunct. We especially welcome new faculty members.

Date	FLC Session Topic	Lead Faculty
TBD	TBD	Ruth Vinall (COP)
	TBD	Ashim Malhotra (COP)
	Team-based Learning	Suzanne Clark (COP)
	Student learning communities engagement	Nripendra Dhillon (COM)

APPENDIX E

THE CNU IPE COMMITTEE

Overview of the CNU IPE Committee.

The CNU Interprofessional Education (IPE) Committee has been in continuous function since 2015. Currently, the Committee is advised by the Dean of the COM and the Dean of the COP, the Vice President for Academic Affairs and Associate Dean of the COM, the Vice Chair of Clinical Sciences of the COM, and the Associate Dean of the COP. The Committee comprises faculty and staff from the colleges of Medicine, Pharmacy, and Health Sciences at CNU. Plans are underway to expand membership to the College of Psychology. The mission, vision and value of the CNU IPE Committee are aligned with those of the University, with an emphasis towards the creation of policy and procedures regarding IPE. The Committee oversees and advises the logistics, planning, curricular development, integration and delivery of IPE at the University. The Committee is led by a Co-Chair from the College of Medicine and a Co-Chair from the College of Pharmacy. The current Co-Chair of the College of Pharmacy also serves as the Director of the Institute of Teaching and Learning Excellence for CNU, thus providing continuity and overseeing alignment of IPE within colleges. The Committee disseminates IPE-related information and provides guidance to faculty by various mechanisms, including making available its operational procedures, agenda items, meeting minutes, newsletters and decisions through a folder accessible by all CNU faculty members and staff. The CNU IPE Committee works in tandem with the CNU ITLE. The Director of the CNU ITLE is appointed as the Co-Chair of the ITLE.

CNU IPE Committee Composition for AY 2018-2019.

The next page provides specific details about the composition of the CNU IPE Committee for the AY 2018-2019. Information regarding Committee constitution from previous years is also available by request to Dr. Malhotra.

Mission of IPE at CNU

Our mission is to prepare students to be practice ready who can seamlessly integrate with interprofessional healthcare teams for the provision of patient-centered care.

Vision of IPE at CNU

Our vision is to educate students in the appropriate choice of pharmacotherapy thereby improving patient outcomes by engaging interdisciplinary expertise and working as an integrated member of the healthcare team.

Vision of IPE at CNU (cleaned up)

Our vision is to educate students from various healthcare disciplines to improve patient outcomes by engaging interdisciplinary expertise through appropriate pharmacotherapy and integrated work as a member of the healthcare team.

Values

- Working as a team
- Embracing diversity and workplace excellence
- Caring about our students, our staff, our faculty, and our profession
- Advancing our university, our goals, and our discipline
- Responding to challenges that may impede Mission
- Enhancing communication and partnership

APPENDIX F

Representative Meeting Minutes from ITLE – Technology-based FLC Planning

Meeting Date and Time:	Wednesday 03/06/2019 12:00pm-1:00pm	
Location:	Executive Conference Room, 274 9700 W Taron Drive, CNU Elk Grove Campus, Second Floor	
Scribe: Samantha Carl	ITLE Constitution	
	Faculty	Ashim Malhotra, Director, ITLE CNUCOP: Diana Cao (Chair, CAS, COP), Tuan Tran MPS: Hongbin Wang CNUCOM: Tracy Yarbrough, Director, Center for Teaching and Learning, CNUCOM: Nripendra Dhillon CNU PsyD: Craig Wetterer, CNU CHS: Damon Meyer, Frances Wise
	Advisory Board	Catherine Yang, Vice President of Academic Affairs & Associate Dean, COM; Catherine Yang, Dean Graduate Programs Hieu Tran, Dean, CNUCOP Joseph Silva, Dean, CNUCOM Bret McLaughlin, Dean, CNUCOPsy Heather Brown, Dean, CNUCHS Leon Assael, Dean, CNU Dental Medicine
	Staff	Samantha Langlois
Attendance (03/06/2019)	Present	Catherine Yang, Ashim Malhotra, Diana Cao, Tuan Tran, Hongbin Wang, Tracy Yarbrough, Craig Wetterer, Damon Meyer
	Absent	Nripendra Dhillon, Frances Wise

AGENDA

Time	Facilitator	Topic and Goal	Minutes and Notes
5 min	Dr. Yang	Notes and general commentary	<ol style="list-style-type: none"> 1. COM just finished LCME Limited Survey 2. Dr. Yang mentioned to LCME team that the University has developed several initiatives (e.g. ITLE) 3. LCME team was very interested as it shows CNU is taking the initiative to improve and grow the culture through a cross-collegial institute 4. CNU is unique as it is a 'health-science' focused University and the colleges can work together on various platforms
2 min	Ashim	<ol style="list-style-type: none"> 1. Overview of today's (03/06) meeting 2. Any new introductions? 	<ol style="list-style-type: none"> 1. Getting ready for our Faculty Learning Communities 2. Moving forward with FLC that are focused in the area of 'Technology'

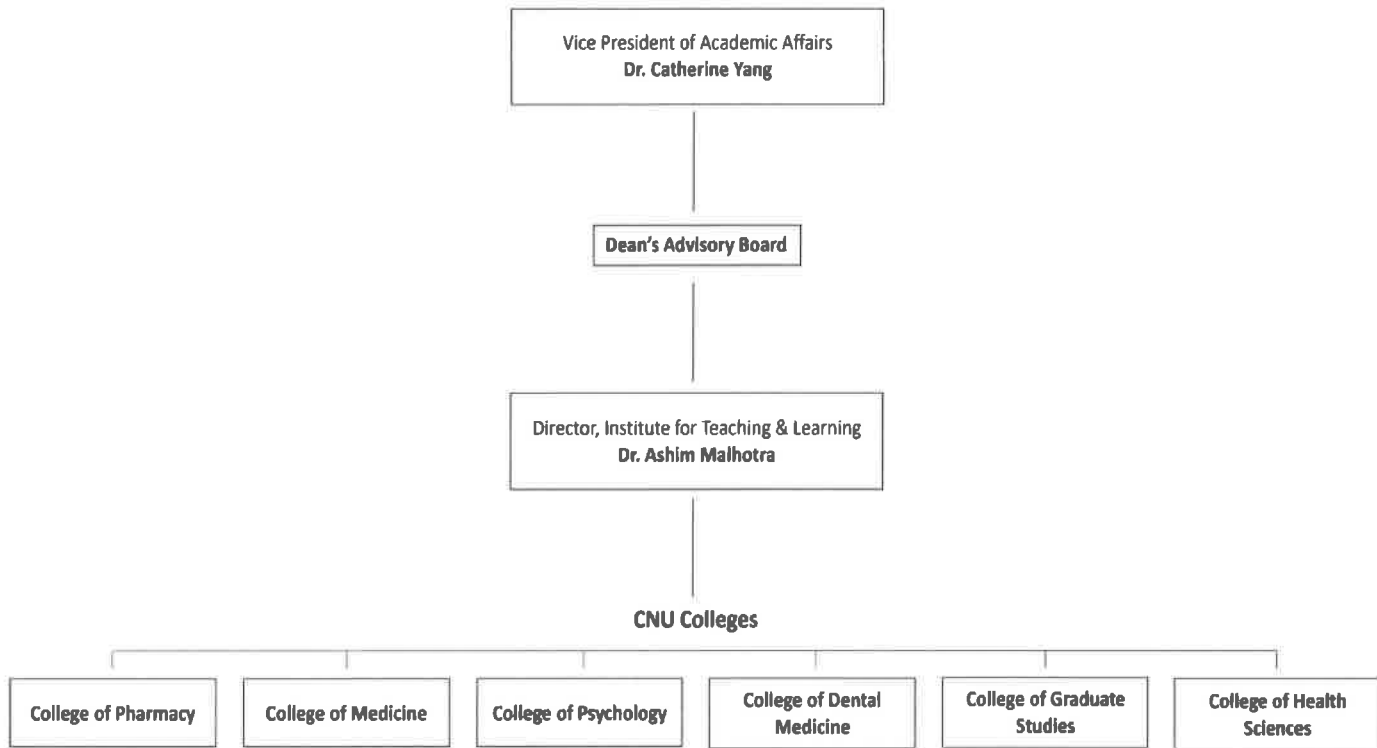

Time	Facilitator	Topic and Goal	Minutes and Notes
			<ol style="list-style-type: none"> 3. Dr. Malhotra spoke with representatives from each college; received positive feedback and support from all 4. Proposing a modified version of the Technology FLC per Dr. Malhotra & Dr. Yarbrough 5. Meeting is to discuss potential obstacles and innovative solutions to address said obstacles 6. ITLE has decided to move forward with the first FLC in April 7. Developing an initial strategic plan that will aid us in strategizing our initiatives and goals. Must go through an approval process before being presented to ITLE members. (Technology FLC results will be built into the strategic plan.) 8. <i>No questions</i>
53 min	Tracy / Ashim	Faculty learning Community in Technology Planning	<ol style="list-style-type: none"> 1. ITLE previously decided to launch with one FLC. This initial FLC will be Technology based. 2. Goal of FLC is to build a community of scholars around topic(s) of shared interest. 3. List of topics have changed slightly from the initial proposal. All involve faculty from 3 of the colleges; topics have been confirmed with presenters. (<i>Refer to document from Dr. Yarbrough</i>) 4. Structure: 1st Hour – Introduction/Instruction, 2nd Hour – Discussion on how to implement learning information 5. Last session of the series will be student-focused (“capstone” session) 6. Task Item: What will the learning objectives be of each session? (Determined by faculty presenters) 7. Task Item: What are the learning outcomes (deliverables)? 8. Task Item: What would you like to learn from the FLCs? 9. Faculty involved in the FLC will receive feedback on their ideas. ITLE will receive feedback from all faculty involved (presenting and learning) regarding their thoughts on the course.

Time	Facilitator	Topic and Goal	Minutes and Notes
	ITLE Members	Q&A	<p>Q: How do we determine the length of time of each session? More people could lead to a longer session.</p> <p>A: Session will have a minimum and maximum number of participants.</p> <p>Q: Will there be a distinction between the hybrid and online course sessions?</p> <p>A: Hybrid course is more about course design; the online course will be about implementation.</p> <p>Q: Meeting Structure:</p> <ul style="list-style-type: none"> -Course plan & content, course structure & instructional design, assessment. For each portion a tool will be discussed, how to implement and how this relates and aligns with the CNU policy. -Would be ideal to discuss policies in initial meeting. <p>Q: Online/Hybrid Courses:</p> <ul style="list-style-type: none"> -Designate a course developer who is responsible for developing the course; other faculty can teach said course. -Unsure of CNU's plan for a 'course designer' for online/hybrid courses. -FLC outline was developed using resources we currently have (e.g. IT department) -CNU currently has Canvas – Hoa can describe how this is used and how it can be implemented. -Interested shown by faculty after FLC will determine what needs to be given more attention to within the University. -Must develop a long-term plan of where we are going. This is a typically a faculty-driven initiative based on faculty interests and needs.

Time	Facilitator	Topic and Goal	Minutes and Notes
			<p>-Other Universities are developing online courses which people are arguing credits should be accepted towards degree.</p> <p>-Initial FLC is a 'pilot' which we can gather information from for what and how much of it we need to be included in our strategic plan.</p> <p>Q: What should be our communication strategy to advertise the FLC and gain excitement in the CNU community?</p> <p>A: Mass email, newsletter, seminar (similar to COM monthly seminars)</p> <p>A: Town Hall meeting in April</p> <p>A: Dean's circulate information within their colleges</p> <p>A: Promote incentives</p> <p>Q: How do we incentivize faculty to be involved?</p> <p>A: CE certification/promotion, teaching credits, pay faculty for participating</p> <p>A: Before we can require faculty to attend we should run the first FLC first to gain more information on how the course is run.</p> <p>Task Item: Propose incentives to dean's advisory meeting (3/25)</p> <p>Q: What is the number of people per FLC?</p> <p>A: 3-4 members per team, 3-5 teams</p> <p>Q: Time may be difficult for CHS as several are teaching and drive time to CNU main campus.</p> <p>A: Should develop online avenue or view course or record sessions.</p> <p>A: Faculty may be required to attend first and last session to receive incentive.</p>

Course Teaching Faculty

Name/Degree	Rank/Title
Shiv Sudhakar, MD	Assistant Professor of Internal Medicine
Ghaith Aleyd MD, MSc, PhD	Associate Professor of Pathology
Scott Braley, MD	Associate Professor of Surgery, Oncology, Anatomy and Clinical Skills
Guy diSibio, MD, PhD	Associate Professor of Pathology, Hematopathology, Surgical Pathology, Molecular Genetics and Clinical Skills
Tim Grennan MD	Professor of Internal Medicine
Susan Ely, PhD	Professor of Molecular Biology, Immunology and Microbiology
Nehad El-Sawi PhD	Professor of Molecular Biology, Immunology and Microbiology.
Xiaodong Feng, PhD, PharmD	Professor of Pharmacology and Oncology
Valerie Gerriets, PhD	Assistant Professor of Pharmacology
Nazila Hejazi, MD	Assistant Professor of Pathology
Rudolph Holguin, MD	Associate Professor of Emergency Medicine
Michael Ibrahim, MD, PhD	Associate Professor of Biochemistry, Pharmacology, Physiology, Radiology/Imaging
Ishwarlal Jialal, MBChB, MD	Professor of Physiology, Metabolism, and Pathology
Kenneth Lee, MD	Professor of Internal Medicine, Infectious Disease, and Clinical Skills
For-Shing Lui, MD	Professor of Clinical Neurology and Neurology Clerkship Director Vice Chairman of Clinical Sciences
Jose Puglisi, PhD	Assistant Professor of Physiology, Biostatistics
Rajendra Ramsamooj, MD	Professor of Pathology, Surgical Pathology and Clinical Skills

Open Door Policy: Course faculty have an open door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time

Volunteer Community Faculty (if applicable)
Name/Degree
Karimireddy Reddy MD
Edward W. Hearn MD
Jesse Adams MD
Christopher J Gresens MD
Jonathan A Hughes MD

Communication with volunteer community faculty must be channeled through the course director.

Course Description:

This unit deals with components of the hematopoietic system – bone marrow, blood, and lymphoid tissues – emphasizing basic structures (of cells, tissues, organs) and functions (from molecular to tissue to whole organ level) in health and disease. 2 microscopy lab sessions provide students with the opportunity to practice their skills at blood film cell identification and interpretation. An interactive classroom session will provide students the opportunity to practice bone marrow cell identification and interpretation. Clinical presentations within the Hematology unit are focused on common situations and presentations that a primary care physician is most likely to experience, such as anemia, polycythemia, abnormal white cells, lymphadenopathy, abnormal bleeding (bleeding diathesis), and hypercoagulable states. Each week consists of 1 to 2 clinical presentations accompanied by algorithms and clinical cases with lists of learning objectives. Clinical faculty will introduce students to the scheme(s) for each clinical presentation, emphasizing critical decision points and setting the framework for integration of the basic and clinical sciences to each topic. Following the clinical presentation, faculty will present fundamental principles from the basic sciences (e.g. biochemistry, cell biology, genetics, immunology, microbiology, nutrition, pathology, pharmacology, physiology) which underlie understanding of the schematic algorithms and provide knowledge and skills required to arrive at a correct diagnosis. Basic science sessions will highlight normal/homeostatic structure and function, followed by examination of relevant disease states, including introduction to care and treatment options. Practice questions will be offered throughout the course, using Turning Point technology. One formative exams will be given. These exams will be composed of 30-50 NBME questions. Towards the middle of the course, a mid course exam of 50 NBME questions will be given and at the course conclusion, a summative exam of 100 NBME questions will be given.

Course Objectives:

By the conclusion of this course, the student will demonstrate the ability to:

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Apply basic knowledge of anatomy (gross and histologic), embryology, biochemistry, cell biology, physiology, microbiology, nutrition, and pathology to understand hematolymphoid function in homeostasis and disease, including expected clinical findings, diagnostic approaches, morphologic changes, and natural history of disease.	PLO-2 (MSK1,MSK2)
2	Apply knowledge of molecular biology and genetics (molecular/chromosomal/population) to understand etiology and pathogenesis of hematolymphoid disorders, patterns of their inheritance, and targeted therapeutic strategies.	PLO-2 (MSK1, MSK2, MSK3)
3	Apply fundamental knowledge of the immune system to understand: normal hematolymphoid function; disease states involving hematopoiesis and lymphoid tissues (lymph nodes, spleen, and extranodal lymphoid tissue); and therapeutic modalities.	PLO-2 (MSK1, MSK2, MSK3)
4	Apply knowledge of pharmacology (pharmacokinetics, pharmacodynamics, mechanism of action), nutrition, and blood components (transfusion medicine) to select optimal therapy for effective and safe treatment of hematopoietic disorders (e.g., treatment of anemias, leukemia, lymphoma, hypercoagulable states).	PLO-2 (MSK1, MSK2, MSK3)
5	Apply principles and approaches of biostatistics and epidemiology to understand the role of ethnic, gender, age, geographic, socioeconomic, behavioral factors, and other significant variables in hematology and hematolymphoid disorders, such as for interpreting laboratory reference ranges, patient's laboratory results, disease incidence, risk factors, etiology, staging, therapeutic effectiveness, and clinical prognosis.	PLO-2 (MSK1, MSK2, MSK3,MSK4)
6	Demonstrate level-appropriate skills in communication, professionalism and medical/procedural related abilities in dealing with patients, and includes environmental, cultural and societal factors in clinical decision making.	PLO-1 (PC1, PC2, PC3, PC4, PC5, PC6, PC7); PLO-3 (C1, C2, C3); PLO-4 (P1, P2, P3)

Please Note: All session objectives listed in the individual sessions (by date and time) are mapped to the course objectives.

Key: PLO = Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations:

Two large lecture halls, each with a seating capacity of 180 students, will be used for the basic science sessions. Eight small classrooms/college rooms, each with a capacity for 25 students and the Simulation Center space are available for small group sessions. Microscopic lab sessions will be held at Interdisciplinary Laboratory (IDL) with a capacity for 50 students

Lecture/Session Duration: All lectures on the calendar as one hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Teaching/Learning Methodology:

- Case-Based instruction/Learning
- Demonstration
- Discussion, Large group (>12)
- Discussion, Small Group (<12)
- Independent Learning
- Laboratory
- Lecture
- Mentorship
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Peer Teaching
- Self-Directed Learning
- Simulation
- Tutorial
- Workshops
- Games
- Peer Teaching
- Self-Directed Learning

Online Materials – Canvas: Canvas is California Northstate University's Learning Management System.) Use your CNU NETID and password.

Turning Point: Every Phase A student was given a Turning Point Clicker during Orientation. **Please bring the Clicker to class at all times.**

Library/Learning Resources

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This program includes an initial 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Required Textbook(s), Material(s) and Equipment:

Subject	Author	Title
http://hematologyoutlines.com	Rashidi et al	Interactive online Atlas
Atlas	Lichtman et al	Lichtman's Atlas of Hematology 2016
Biochemistry	Lieberman	Marks' Basic Medical Biochemistry: A Clinical Approach 4e
Histology	Mescher	Junquiera's Basic Histology Text and Atlas 13e
Immunology	Perham	The Immune System, 4th Edition
Microbiology	Engleberg	Schaechter's Mechanisms of Microbial Disease, 5th Edition
Pathology	Kumar, Abbas and Aster	Robbins and Cotran Pathologic Basis of Disease 9e
Pathology Atlas	Klatt	Robbins and Cotran Atlas of Pathology 3 rd e
Pathology Review Book	Klatt and Kumar	Robbins and Cotran Review of Pathology, 4 th e
Pharmacology	Katzung and Trevor	Basic & Clinical Pharmacology 13e
Pharmacology	Brunton et al	Goodman & Gilman's: The Pharmacological Basis of Therapeutics, 12e
Statistics	Dawson and Trapp	Basic and Clinical Biostatistics, 4 th e
Transfusion Medicine		The Circular of Information for the Use of Human Blood and Blood Components https://www.aabb.org/tm/coi/Documents/coi1113.pdf

Recommended Textbook(s):

Subject	Author	Title
Anatomy	Gilroy, MacPherson and Ross	Atlas of Anatomy 2e
Embryology	Sadler, T.W.	Langman's Medical Embryology. 13 th e
Genetics	Nussbaum, McInnes and Willard	Thompson and Thompson Genetics in Medicine 8e
Pathophysiology of Blood Disorders	Bunn and Aster	<u>Pathophysiology of Blood Disorders</u> 2 nd e
Physiology	Hall	Guyton and Hall Textbook of Medical Physiology 13e

Attendance

Lecture/Learning Activity Attendance

Lecture attendance is highly suggested. Attendance at laboratory activities is mandatory. There are some lectures within the block where attendance is also mandatory. These will be clearly identified in the Course Calendar.

Sign-in sheets or electronic attendance will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets or electronic tracking will be collected 5 minutes after the activity begins. Certain excused absences are allowed (please see Excused Absence Policy).

The following procedure(s) will be employed for breeches of these course requirements.

1. Administrative/Support staff will notify the course director(s) and Assistant Dean of Academic Affairs
2. A note will be placed in the student's file
3. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE.
4. Persistent lapses in attendance will require the student to appear before the Student Promotions Committee.

Exams and Grading/Assessment:

▪ **Formative**

- 1 in-class formative USMLE Step 1 format 30 to 50 questions multiple-choice examinations. This will be held on Monday mornings of week 2. Based on the way this course is designed and structured, attendance is mandatory in order for the student to get the most out of the course.
- Course directors (other than Medical Skills) will choose a pre-scheduled set of times (other than during lectures) during which quiz sessions will be held. The number of sessions and frequency will be at the discretion of the course director. The quiz format, including number of questions, will be at the discretion of the course director. Quizzes will not contribute points toward the overall course grade but will have educational value.

▪ **Summative**

- One mid-course examination USMLE Step 1 format; 50 multiple-choice questions on the 3rd week of the course
- One comprehensive summative exam USMLE Step 1 format 100 multiple-choice questions comprehensive final examination at the end of the course
- Clinical Cases : Clinical Cases : 4~2-hr sessions devoted to presentation and discussion of Clinical Cases will be offered; attendance at these sessions is mandatory. Students will work in group of five and student presentations will be graded using a rubric.
- The successful completion of the course is based on demonstrating high standards of ethical and profession behavior, as well as, passing each of the following components of the course with a grade of 70% or higher,
 - Clinical Cases
 - Comprehensive Summative Exam

Total Course Score:

The total numeric score for the course will be measured as follows, which translates to recording a passing grade if 70 or above, and an honors grade if 90 or above.

#	Components	%	Notes/Explanation
1	Mid-Course Summative NBME Exam	20	
2	End of Course Final Comprehensive NBME Summative Exam	70	Please note that re-take of final summative is offered during exam week (week 5). If students gain more than 70 in their re-take, they would still only be granted 70 for re-take exam.
3	Clinical Case Presentations (CC) Students are expected to successfully complete in order to pass the course.	0	Refer to description below
4	Microscopic Lab Sessions x2 (RBC on 9/26/18 and WBC on 10/2/18) Students are expected to participate and demonstrate professionalism (5%) and knowledge (5%) in both labs in order to gain the complete grading	10	Please submit your worksheets for each lab, directly to Canvas.
5	Nutrition Modules Students are expected to successfully complete assigned Nutrition in Medicine modules in order to pass the course. Students must register for nutrition in medicine via "nutritioninmedicine.org". (A guide to NIM Medical Student registration will be posted to CANVAS). Once registered, enter the access code "cnsu_nutr" in order to access all modules available to CNSU medical students.		For this course, you are expected to complete the following modules: Nutritional anemias part 1, and Nutritional anemias part 2. Provide Course Director with proof of completion with more than 70% score. Note: you need to only successfully complete the specific modules assigned for the course. Do not complete the other modules until told to do so in your other courses. Due date for completion of this assignment will be on 10/7/18. Please submit your certificate directly to Canvas.

Formative and summative NBME exams score reports will be available 3-days after the exam; it is the student responsibility to contact Course Director to obtain their individual score report.

Any additional (retesting) exams will be at the expense of the student.

The successful completion of the course is based on demonstrating high standards of ethical and professional behavior, as well as, passing both the Final Comprehensive Summative Exam **AND** the course with a grade of 70% or higher.

Grading percentages

Passing grade requires a total score of 70% or higher

Honors grade requires a total score of 90% or higher

Remediation

Students failing the course will be referred to the Student Promotion Committee (SPC) and a custom tailored remediation plan will be developed.

Description of Clinical Cases and Clinical Case Based Learning

Clinical Cases (CC's) and Clinical Case Based Learning (CCBL's) are designed to promote the development of teamwork, professionalism, and evidence-based patient management skills that integrate the basic and clinical sciences.

During the M1 year, following a faculty-led Clinical Presentation (CP) lecture, the students will receive a PowerPoint presentation that contains the subjective (including the Chief Complaint, History of Present Illness, and Past Medical History) and objective (including the Physical Examination) findings for a hypothetical patient who presents with a complaint aligned with the CP lecture. As they assimilate basic and clinical science content throughout the week's lectures, students will work in assigned groups to complete a series of template slides included in the PowerPoint presentation. At the end of the week, each student group will submit its final presentation for a grade. One group in each college (on a preassigned, rotating basis) will present the case to their College for discussion. Each group will submit their case presentation for grading using a defined rubric by a rotating faculty member. Grading will be Pass/Needs Improvement/Fail.

During the M2 year, the process will be similar except that during the CP, students will develop learning objectives based the case presented. At the end of the week, each group will present a SOAP note and their Learning Objective to their College. The College Master will be responsible for grading and feedback. Grading will be Pass/Needs Improvement/Fail.

Clinical Case-Based Learning (CCBL) is an integrated, Problem-Based Learning modality that affords student self-directed learning in the context of a clinical case setting. Each week-long case is sequentially revealed over the course of three two-hour sessions. Students work in groups of about nine. For each case, each student will provide at least one teaching presentation to the group – this should be a PowerPoint slide set that includes citations for all images used and an *annotated* list of references from textbooks and the primary literature. Students are expected to offer constructive feedback on these presentations. The group will devise their own session learning objectives on Day 1 of each week; these will be the topics presented orally on Day 2. CCBL group assignment will remain stable for an entire academic year, to allow longitudinal formative feedback from facilitators, and to foster periodic peer- and self-assessment. Case Learning Objectives comprise material that may be tested in NBME course exams. All sessions are mandatory and timely arrival is expected in order for students to earn a grade of PASS for this

component of a course; grading will be Pass/Fail. When feasible, CCBL sessions will occur at least once in each non-experiential course.

Student Evaluations of Course and Faculty

Student Evaluations of the Course and Faculty: Students are required to complete these evaluations during the assigned mandatory session on the course calendar. Course evaluations will be scheduled in the course calendar for the last Friday of instruction. The goal for course evaluations is 100% participation. In the event that there is less than 90% class participation, grades will be withheld, by both the Course Director and the Registrar, for the entire class until the 90% participation level is reached.

Students will be expected to comply with all CNU and COM policies

* Community Faculty

Open Door Policy: Course faculty have an open door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time

Communication with volunteer community faculty must be channeled through the course director.

Course Description:

The unit spans nine weeks and contains eighteen clinical presentations that reflect commonly encountered situations affecting the nervous system. The course is focused on providing students with a detailed understanding of normal structure, function and pathologic dysfunction of the nervous system and special senses. Depending on the week, 1 to 4 clinical presentations will be covered, each one of them accompanied by clinical algorithm and clinical reasoning guide. Clinical faculty will lead the students through the clinical reasoning guide emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Following the clinical presentation, basic science faculty will present the fundamental principles from the traditional basic sciences (e.g., anatomy, histology, embryology, biochemistry, immunology, microbiology, nutrition, pathology, pharmacology, and physiology) to ensure adequate knowledge and skills required to arrive at a correct diagnosis. These basic science lectures will highlight the normal structures and functions of the nervous system as a whole, including special senses, followed by presentations of various disease states including management and treatment options. In addition to the lectures, library resources, and other learning activities that support each clinical presentation, students will attend anatomy labs and perform appropriate cadaver dissection activities and review prosected materials to reinforce learning of structures and relationships described in lecture. Traditional X-rays, CT scans and MRIs will be presented to illustrate normal and abnormal structures related to disease processes

as well to illustrate some management techniques. In addition, students will participate in clinical cases sessions with clinical faculty and take part in a Medical Skills course that runs concurrently and supports content covered, emphasizing the skills that the students need to acquire to diagnose and for the management of different clinical cases.

Course Objectives:

By the conclusion of this course, the student will demonstrate the ability to:

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Apply basic knowledge of anatomy and neuroanatomy, biochemistry, cellular/molecular biology, microbiology, pathology, and physiology to solve clinical problems involving the special senses, neurological and brain functions in homeostasis and disease, including expected clinical findings, diagnostic approaches, morphologic changes, and natural history of disease.	1,2
2	Explain how electrochemical communication and its components (e.g., neurotransmitters, receptors, and ion channels) relate to health and disease states of the nervous system.	2
3	Apply knowledge of molecular genetics to solve clinical problems involving etiology and pathogenesis of neurological disorders, patterns of their inheritance, and targeted therapeutic strategies.	1,2,3,4,5
4	Apply knowledge of pharmacokinetics and pharmacodynamics to select optimal drug therapy for effective and safe treatment of neurological disorders.	1,2,5
5	Apply principles and approaches of biostatistics and epidemiology to define the role of ethnicity, gender, age, geography, socioeconomic status, and behavioral factors, to establish incidence, risk factors, etiology, therapeutic effectiveness, and clinical prognosis of neurological disorders.	1,2,5,6

6	Demonstrate level-appropriate skills in communication, professionalism and medical/procedural related abilities in dealing with patients, and includes environmental, cultural and societal factors in clinical decision making.	3,4,5,6
---	--	---------

Please Note: All session objectives listed in the individual sessions (by date and time) are mapped to the course objectives.

Key: PLO = Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations:

Two large lecture halls, each with a seating capacity of 180 students, will be used for the basic science sessions. Eight small classrooms/college rooms, each with a capacity for 25 students and the Simulation Center space are available for small group sessions. A large gross anatomy laboratory with capacity for cadaver dissections, where a group of students will be assigned to each cadaver, is available for anatomy dissection.

Lecture/Session Duration: All lectures on the calendar as one hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Teaching/Learning Methodology:

- Case-Based instruction/Learning
- Demonstration
- Discussion, Large group (>12)
- Discussion, Small Group (<12)
- Independent Learning
- Laboratory
- Lecture
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Peer Teaching
- Problem-Based Learning (PBL)
- Research
- Self-Directed Learning
- Simulation
- Tutorial

Online Materials – Canvas: Canvas is California Northstate University's Learning Management System.) Use your CNU NETID and password.

Turning Point: Every Phase A student was given a Turning Point Clicker during Orientation. **Please bring the Clicker to class at all times.**

Library/Learning Resources

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This program includes an initial 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Required Textbook(s), Material(s) and Equipment:

Subject	Author	Title
Neurology	Roper, Samuels and Klein	Adams and Victor's Principles of Neurology, 10e
Anatomy	Blumenfeld	Neuroanatomy through Clinical Cases, 2e (OUP)
Interactive Brain Atlas	https://register.dashboard.oup.com/catalog?pagename=sylvius-4	Sylvius 4 Online: An Interactive Brain Atlas (OUP)

20% off of OUP course materials? Visit www.oup.com/us/he and enter discount code McGlew2018 (valid through 1-31-19).

Recommended Textbook(s):

Subject	Author	Title
Pharmacology	Katzung, Masters, and Trevor	Basic & Clinical Pharmacology 13e
Neuroscience	Purves & Augustine et al	Neuroscience, 6e (you get Sylvius 4 Online free)

Physiology	Hall	Guyton and Hall Textbook of Medical Physiology 13e
Immunology	Parham, Peter	The Immune System, 4e
Biochemistry	Lieberman	Marks' Basic Medical Biochemistry: A Clinical Approach 4e
Ethics	Lo	Resolving Ethical Dilemmas 5e

Attendance

Lecture/Learning Activity Attendance

Lecture attendance is highly recommended, and laboratory sessions are mandatory. Sessions labeled as mandatory on the course calendar are required.

Sign-in sheets or electronic attendance will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets or electronic tracking will be collected 5 minutes after the activity begins. Certain excused absences are allowed (please see Excused Absence Policy).

The following procedure(s) will be employed for breeches of these course requirements.

5. Administrative/Support staff will notify the course director(s) and Assistant Dean of Academic Affairs
6. A note will be placed in the student's file
7. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE.
8. Persistent lapses in attendance will require the student to appear before the Student Promotions Committee.

Exams and Grading/Assessment:

▪ Formative

- One mid-course MCQ formative exam (50 questions)

▪ Summative

- One USMLE Step 1 format multiple-choice mid-course examination (50 questions)
- One 2.5-hour long USMLE Step 1 format multiple-choice final examination (100 questions)
- Two 1-hour long laboratory practical exam (identification of tagged structures on cadaver, models and radiographic images)
- **Special Student Assignments:**

- MOCA training and certification: 2 points (due date: Sunday 2/10/2018)

<http://www.mocatest.org/training-certification/>

- NIH Stroke Scale Training: 3 points (due date: Sunday 1/27/2018)

<https://secure.trainingcampus.net/uas/modules/trees/windex.aspx?rx=nihs-english.trainingcampus.net>

Total Course Score and Grading:

The total numeric score for the course will be measured as follows, which translates to recording a passing grade if 70 or above, and an honors grade if 90 or above.

	(A) Components	(B) Percentage	Notes/Explanations
1)	Summative exam: Multiple Choice Questions (MCQ's)	70	NBME Style Questions through NBME-CAS (20% for mid-course and 50% for final summative)
2)	Anatomy Laboratory	25	Two 1-hour long laboratory practical exam (mid-course and end-of-course)
3)	Professionalism (rubric)	P/F	If professionalism is failed (F), whole course is failed.
4)	Attendance	0	In Neuroscience, attendance is not mandatory for passive lectures. However, it is mandatory where active learning activities are developed (e.g., clinical cases and case conferences).
5)	Clinical Cases. Students are expected to successfully complete in order to pass the course.	0	P/F. Attendance is mandatory
6)	Clinical Case Based Learning (CCBL)	0	P/F. Attendance is mandatory

	Students are expected to successfully complete in order to pass the course.		
7)	NIH Stroke Scale Training and Certification on line	3	3 points will be awarded to students who got and submitted their NIHSS Certificate
8)	MoCA Testing	2	2 points will be awarded to students who completed and submitted testing on 2 persons

Formative and summative NBME exams score reports will be available 3-days after the exam; it is the student responsibility to contact Course Director to obtain their individual score report.

Any additional (retesting) exams will be at the expense of the student.

The successful completion of the course is based on demonstrating high standards of ethical and professional behavior, as well as, passing both the Final Comprehensive Summative Exam **AND** the course with a grade of 70% or higher.

Grading percentages

Passing grade requires a total score of 70% or higher

Honors grade requires a total score of 90% or higher

Remediation

- Failure on final summative examination: repeat USMLE Step 1-format multiple choice examination through NBME-CAS with remediation
- Anatomy lab remedial exam if lab exam score <70%

Students failing the course will be referred to the Student Promotion Committee (SPC) and a custom tailored remediation plan will be developed.

Description of Clinical Cases and Clinical Case Based Learning

Clinical Cases (CC's) and Clinical Case Based Learning (CCBL's) are designed to promote the development of teamwork, professionalism, and evidence-based patient management skills that integrate the basic and clinical sciences.

During the M1 year, following a faculty-led Clinical Presentation (CP) lecture, the students will receive a PowerPoint presentation that contains the subjective (including the Chief Complaint, History of Present Illness, and Past Medical History) and objective (including the Physical Examination) findings for a hypothetical patient who presents with a complaint aligned with the CP lecture. As they assimilate basic and clinical science content throughout the week's lectures, students will work in assigned groups to complete a series of template slides included in the PowerPoint presentation. At the end of the week, each student group will submit its final presentation for a grade. One group in each college (on a preassigned, rotating basis) will present the case to their College for discussion. Each group will submit their case presentation for grading using a defined rubric by a rotating faculty member. Grading will be Pass/Needs Improvement/Fail.

During the M2 year, the process will be similar except that during the CP, students will develop learning objectives based the case presented. At the end of the week, each group will present a SOAP note and their Learning Objective to their College. The College Master will be responsible for grading and feedback. Grading will be Pass/Needs Improvement/Fail.

Clinical Case-Based Learning (CCBL) is an integrated, Problem-Based Learning modality that affords student self-directed learning in the context of a clinical case setting. Each week-long case is sequentially revealed over the course of three two-hour sessions. Students work in groups of about nine. For each case, each student will provide at least one teaching presentation to the group – this should be a PowerPoint slide set that includes citations for all images used and an *annotated* list of references from textbooks and the primary literature. Students are expected to offer constructive feedback on these presentations. The group will devise their own session learning objectives on Day 1 of each week; these will be the topics presented orally on Day 2. CCBL group assignment will remain stable for an entire academic year, to allow longitudinal formative feedback from facilitators, and to foster periodic peer- and self-assessment. Case Learning Objectives comprise material that may be tested in NBME course exams. All sessions are mandatory and timely arrival is expected in order for students to earn a grade of PASS for this component of a course; grading will be Pass/Fail. When feasible, CCBL sessions will occur at least once in each non-experiential course.

Anatomy Laboratory Rules

An appreciation of the significance of the anatomical gift is important to ensure our continuing respect for the altruism of our donors. The UC Davis and UC San Francisco willed body programs foster a learning partnership with CNUCOM in creating an educational relationship between the donor, the teacher, and the student. Dissection is a privilege and an incredible gift from the donors who have chosen to give so that we may learn.

Some may feel uneasy and anxious at the prospect of first dealing with cadavers; this is a natural response inasmuch as dealing with death is not always easy. Talk about your feelings with the faculty. Share them with your peers. Generations of students have experienced similar emotions and conversation helps calm our apprehensions.

In compliance with State and Federal regulations, and in the interest of your personal safety, you are required to follow these rules of the anatomy lab:

1. The donors are to be treated with dignity and utmost respect at all times. Crude or inappropriate remarks could result in dismissal from the lab.
2. Similar to medical settings, the discussion of donors or lab practices outside of the lab is inappropriate unless it is for the express purpose of study or learning. The nature of the learning process within the lab can be upsetting to the general public, so always be mindful of who could be listening to conversations.
3. The anatomical materials from a donor are a precious resource, and a protected resource. Under no circumstances shall anatomical material be taken from the laboratory.
4. Each donor is sent with an identification tracking number and device. This number and/or device must remain affixed to the specimen throughout its use until its return to the willed body program. All information regarding the donor is confidential.
5. Fluid Disposal: There are containers in the room for fluid collection. If any are full, let the anatomy lab technician know.
6. Trash: Please dispose of any soiled gloves, paper towels, aprons, or other supplies in the RED trashcans. When you see the trash cans are near to being full, please let the anatomy lab technician know.
7. Dissected Tissue: Any bits of skin, fat or other human tissues must be disposed of in the WHITE buckets at your table. Please do not put any other items in these buckets. If this can is nearing capacity, please let the anatomy lab technician know. Such items from each donor are put in separate plastic bags with the ID# of the donor, kept in cold storage, and returned with other remains of the donor at the time of cremation.
8. The anatomy lab is under video surveillance, and is monitored for entry through identification badge scans. The person using the identification badge is responsible for all people who enter with them. Please request the identity of any person who is unknown to you.
9. All equipment and models within the anatomy lab are identified and monitored. No equipment or models are allowed to leave the anatomy lab without permission.
10. To protect the dignity and privacy of the donor, the face or any other identifying feature of the case shall never be publicly displayed. This includes display to students, staff, visitors and faculty not participating in the intended use of the material.
11. Horseplay within the lab is strictly prohibited.
12. The use of cell phones and photography by students is not allowed.
13. Universal precautions must be followed: Wear protective clothing/lab coat and gloves at all times while dissecting, and protective eyewear when there is a risk of splash.
14. If you use contacts, it is highly recommended that you wear glasses when in lab.

15. If you have a chemical sensitivity let a member of your faculty know; they will assist you in purchasing a respirator and will train you to use it.
16. No food, drink, or chewing gum or applying cosmetics is permitted in the laboratory.
17. No open toed shoes are allowed. Your shoes should protect your feet from accidental chemical drip and injury from falling sharps. Your shoes should provide sufficient traction for use in a lab where the floor has the possibility of being slippery. It is recommended that you have a pair of shoes for lab use only.
18. Shorts or skirts are not permitted (please see the Student Handbook Dress code policy for Anatomy Lab).
19. Students with long hair need to have it pulled back and tied.
20. Sharps Safety: Always use hemostats or a blade-removal tool to remove a scalpel blade from its handle. Used blades must be disposed in the provided sharps containers.
21. Dissection equipment: All the items you should need are provided for you. Please remember to wash and dry the instruments at the end of each session so they do not rust.
22. Prevent desiccation by using wet cheesecloth to cover your donors as needed. Remember to always use wetting solution to moisten dissected parts otherwise it will dry your dissection! Wetting solution contains chemicals that can cause irritation and burns. Use it with care.
23. When leaving the lab, please remember to properly wrap and moisten your cadaver. This is essential! The table covers should be closed, and the lab doors should be locked behind you.

For additional information, please contact:

Nripendra Dhillon, MBBS, MS: (707) 864-6362

Sailabala Vanguri, MD: (916) 686-7965

Student Evaluations of Course and Faculty

Student Evaluations of the Course and Faculty: Students are required to complete these evaluations during the assigned mandatory session on the course calendar. Course evaluations will be scheduled in the course calendar for the last Friday of instruction. The goal for course evaluations is 100% participation. In the event that there is less than 90% class participation, grades will be withheld, by both the Course Director and the Registrar, for the entire class until the 90% participation level is reached.

Students will be expected to comply with all CNU and COM policies

Weekly Course Calendars

Course: Neurosciences
Week 1 - CP: Numbness/Tingling (1/7 - 1/11/2019)

	Monday 1/7	Tuesday 1/8	Wednesday 1/9	Thursday 1/10	Friday 1/11
8:00 AM	Introduction to Neurosciences (Lui)	Somatosensory Physiology I (Frank)	Direct Synaptic Transmission (Puglisi)	Motor Systems Physiology I (Lui)	Cellular Pathology of the CNS (DiSibio)
8:30 AM

2018 – 2019 Academic Year
Integumentary & Musculoskeletal Systems Course Syllabus
Course #: COM 511 and HS 521 (CDM)
Year: I
Semester: Fall

Course Dates: October 29, 2018 – December 21, 2018

Credits Hours: 7

Course Director:

Nripendra Dhillon, MBBS, MS

Associate Professor of Anatomy

CNU COM Department of Basic Sciences

Office: Room 144

Phone: (916) 686-7474

nripendra.dhillon@cnsu.edu

(Quickest response: Please contact through email. Thanks!)

Coordinator:

Samantha Xiong

samantha.xiong@cnsu.edu

Disclaimer about changes in Syllabus and Course Calendar:

Every effort will be made to adhere to the contents of this syllabus. However, this document is subject to change in the event of unforeseen, extenuating circumstances. Students will be notified as soon as possible if changes in the syllabus become necessary.

Course Teaching Faculty

Name/Degree	Rank/Title
Ghaith Al Eyd, MD	Associate Professor, Pathology
Nripendra Dhillon, MBBS, MS	Associate Professor, Anatomy
Guy diSibio, MD, PhD	Associate Professor, Pathology
Nehad El-Sawi, PhD	Professor, Microbiology and Immunology
Susan Ely, PhD	Professor, Microbiology and Immunology
Alan Ernst, PhD	Assistant Professor, Anatomy
Darilyn Falck, MD	Assistant Dean of Student Affairs
Rochelle Frank, MD	Associate Professor, Neurology
Valeri Gerriets, PhD	Assistant Professor, Pharmacology
Nazila Hejazi, MD	Assistant Professor, Pathology
Rudolph Holguin, MD	Associate Professor, Emergency Medicine
Michael Ibrahim, MD, PhD	Associate Professor, Biochemistry and Pharmacology
Kenny Jialal, MBChB, MD	Assistant Dean of Research
Sheryl Krig, PhD	Assistant Professor, Biochemistry
ForShing Lui, MD	Chair, Clinical Sciences
Joseph Puglisi, PhD	Assistant Professor, Biostatistics
Rajendra Ramsamooj, MD	Assistant Dean of Curriculum
Leonard Ranasinghe, MD, PhD	Professor, Emergency Medicine
Joseph Rogers, MD	Assistant Professor, Family Medicine
Joel Talsma, MS	Instructor, Anatomy
Sailabala Vanguri, MBBS, MD	Assistant Professor, Anatomy
Katherine Whitcome, PhD	Assistant Professor, Anatomy
Jason Wong, MD	Assistant Professor, Pharmacology
Tracy Yarbrough, MD, PhD	Associate Professor, Physiology

Open Door Policy: Course faculty have an open-door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time

Volunteer Community Faculty
Name/Degree
Jenny Boakes, MD; Shriners Orthopaedic Surgeon
Jasdeep Sharma, MD; Kaiser Dermatologist
Dana Miller-Blair, MD; Community Rheumatologist

Note: Communication with volunteer community faculty must be channeled through the course director.

Course Description

Each week consists of 1 to 2 clinical presentations that are accompanied by clinical algorithms, clinical reasoning guides, and objectives lists. Clinical faculty will walk the students through the clinical algorithm emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Following the clinical algorithm presentation by the clinical faculty, the basic science faculty will present fundamental principles from the traditional basic sciences (e.g. anatomy, biochemistry, cell biology, genetics, immunology, microbiology, nutrition, pathology, pharmacology, physiology, etc.) to ensure adequate knowledge and skills required to arrive at a correct diagnosis. These basic science lectures will highlight the normal structures and functions of the systems as a whole, followed by an examination of various disease states including care and treatment options. Students will participate in worked case example sessions, dissect in anatomy lab, and take part in a Medical Skills course and Masters Colloquium course that run concurrently.

Course Objectives

By the conclusion of this course, the student will demonstrate the ability to:

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Identify and describe the common and unique molecular and structural components namely cells, tissues and organs that lead to the integrated functions of the integumentary system and musculoskeletal systems.	PLO-2 (MSK1,MSK2)
2	Describe the developmental origin, developmental bases of variations, congenital anomalies and normal and abnormal growth as well as aging of the integumentary and musculoskeletal structures.	PLO-2 (MSK1,MSK2)
3	Explain how genetic variations alter the structural and metabolic properties of the integumentary and musculoskeletal systems, and how this, in turn, influences health.	PLO-2 (MSK1,MSK2)
4	Apply knowledge of the cellular and molecular responses to injury and inflammation to diagnose disorders of the integumentary and musculoskeletal systems and assess therapeutic interventions.	PLO-2 (MSK1,MSK2)
5	Apply the principles of imaging and biomechanics to explain the risks, limitations, and appropriate use of diagnostic and therapeutic interventions.	PLO-1 (PC5); PLO-2 (MSK1,MSK2)
6	Describe factors that affect integumentary and musculoskeletal systems diseases and injury, considering gender, ethnicity, behavior, culture, occupation, and environment.	PLO-2 (MSK1,MSK2)
7	Apply knowledge of pharmacokinetics and pharmacodynamics to guide safe and effective treatments of integumentary and musculoskeletal systems diseases.	PLO-2 (MSK1, MSK2, MSK3)
8	Apply principles of biostatistics and epidemiology to the evaluation of disease prevalence, risk, etiology, diagnosis, management, prognosis, and prevention of diseases.	PLO-2 (MSK1, MSK2, MSK3,MSK4)
9	Demonstrate appropriate levels of skills in communication, professionalism and medical/procedure-related abilities in dealing with patients, and include environmental, cultural and societal factors in clinical decision making.	PLO-1 (PC1, PC2, PC3, PC4, PC5, PC6, PC7); PLO-3 (C1, C2, C3); PLO-4 (P1, P2, P3)

MSK: Medical & Scientific Knowledge; PC; Patient Care; C: Communication; P: Professionalism

Note: All session objectives listed in the individual sessions (by date and time) are mapped to the course objectives.

Key: PLO=Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations

Two large lecture halls, each with a seating capacity of 180 students, will be used for the basic science sessions. Eight small classrooms/college rooms, each with a capacity for 25 students and the Simulation Center space are available for small group sessions. A large gross anatomy laboratory with capacity for cadaver dissections, where a group of students will be assigned to each cadaver, is available for anatomy dissection.

Lecture/Session Duration

All lectures on the calendar as one-hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Teaching/Learning Methodology

- Case-Based instruction/Learning
- Demonstration
- Discussion, Large group (>12)
- Discussion, Small Group (<12)
- Independent Learning
- Laboratory
- Lecture
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Peer Teaching
- Reflection
- Self-Directed Learning
- Team-Based Learning (TBL)

Online Materials – Canvas: Canvas is California Northstate University's Learning Management System.) Use your CNU NETID and password.

Turning Point: Every Phase A student was given a Turning Point Clicker during Orientation. **Please bring the Clicker to class at all times.**

Library/Learning Resources

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This program includes an initial 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Required Textbook(s)

Subject	Author	Title
Biochemistry	Lieberman	Marks' Basic Medical Biochemistry: A Clinical Approach 4e
Genetics	Nussbaum, McInnes & Willard	Thompson & Thompson Genetics in Medicine 8e
Internal Medicine	Kasper, Fauci, Hauser, Longo, Jameson & Loscalzo	Harrison's Internal Medicine
Immunology	Paraham	The Immune System 4e
Microbiology	Engleberg	Schaechter's Mechanisms of Microbial Disease 5e
Pediatrics	Tintinalli, Stapczynski, Ma, Yealy, Meckler & Cline	Tintinalli's Emergency Medicine: A Comprehensive Study Guide, 8e; Chapter 128 "Diarrhea in Infants and Children"
Physiology	Hall	Guyton and Hall Textbook of Medical Physiology 13e

Recommended Textbook(s)

Pharmacology	Bardal	Applied Pharmacology

Attendance

Lecture attendance is highly recommended, and laboratory sessions are mandatory. Sessions labeled as mandatory on the course calendar are required.

Sign-in sheets or electronic attendance will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets or electronic tracking will be collected 5 minutes after the activity begins. Certain excused absences are allowed (please see Excused Absence Policy).

The following procedure(s) will be employed for breaches of these course requirements:

9. Administrative/Support staff will notify the course director(s) and Assistant Dean of Academic Affairs
10. A note will be placed in the student's file
11. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE
12. Persistent lapses in attendance will require the student to appear before the Student Promotions Committee

Exams and Grading/Assessment

▪ Formative Exams

- One formative USMLE Step 1 format multiple-choice examination; 50 questions
- One anatomy lab formative exam to give the students a feel for the nature and content in such a lab-based exam

▪ Summative Exams

- One USMLE Step 1 format mid-course examination; 100 multiple-choice questions
- One USMLE Step 1 format **comprehensive** final examination at the end of the course; 100 multiple-choice questions
- Two anatomy laboratory practical exams

Clinical Cases: Five 2-hour sessions devoted to presentation and discussion of Clinical Cases will be offered; attendance at these sessions is compulsory. Students will work in groups of five and student presentations will be assessed using a rubric

Clinical Case-Based Learning: Three sessions of 2-hours each devoted to self-directed learning following a problem-based learning format

Special Student Assignments:

During the course, there will be 1 special assignment – a reflective writing exercise that is due by 1:00 PM on 11/26/2018, the Monday after Thanksgiving. This is mandatory. It will not be scored but completing it adequately is required to receive a final course grade.

Total Course Score and Grading

The total numeric score for the course will be calculated as follows, which translates to recording a passing grade if 70 or above, and an honors grade if 90 or above.

Components	%	Notes/Explanation
Mid-course Summative Exam	25	NBME CAS 100 questions
End of Course Comprehensive Summative Exam	50	NBME CAS 100 questions
Anatomy Laboratory Practicals	25	2 x High Score + Low Score divided by 3 = 70% or more
Clinical Case Presentations (CC) Students are expected to successfully complete in order to pass the course.	0	Refer to description below
Clinical Case Based Learning (CCBL) Students are expected to successfully complete in order to pass the course.	0	Refer to description below
Reflective writing assignment	0	Completion is required

Formative and summative NBME exams score reports will be available 3-days after the exam; it is the student's responsibility to contact the course director to obtain their individual score report.

Any additional (retesting) exams will be at the expense of the student.

The successful completion of the course is based on demonstrating high standards of ethical and professional behavior, passing both the End-of-Course Comprehensive Summative Exam **AND** the Total Course with a score of 70% or higher, and passing the anatomy practical exams as computed ($2 \times \text{High score} + \text{Low score} / 3$) with a score of 70% or higher.

Grading percentages

Passing grade requires a total score of 70% or higher

Honors grade requires a total score of 90% or higher

Remediation

Students failing the course will be referred to the Student Promotion Committee (SPC) and a custom-tailored remediation plan will be developed.

Description of Clinical Cases and Clinical Case Based Learning

Clinical Cases (CCs) and Clinical Case Based Learning (CCBLs) are designed to promote the development of teamwork, professionalism, and evidence-based patient management skills that integrate the basic and clinical sciences.

During the M1 year, following a faculty-led Clinical Presentation (CP) lecture, the students will receive a PowerPoint presentation that contains the subjective (including the Chief Complaint, History of Present Illness, and Past Medical History) and objective (including the Physical Examination) findings for a hypothetical patient who presents with a complaint aligned with the CP lecture. As they assimilate basic and clinical science content throughout the week's lectures, students will work in assigned groups to complete a series of template slides included in the PowerPoint presentation. At the end of the week, each student group will submit its final presentation for a grade. One group in each college (on a preassigned, rotating basis) will present the case to their College for discussion. Each group will submit their case presentation for grading using a defined rubric by a rotating faculty member. Grading will be Pass/Needs Improvement/Fail.

During the M2 year, the process will be similar except that during the CP, students will develop learning objectives based the case presented. At the end of the week, each group will present a SOAP note and their Learning Objective to their College. The College Master will be responsible for grading and feedback. Grading will be Pass/Needs Improvement/Fail.

Clinical Case-Based Learning (CCBL) is an integrated, Problem-Based Learning modality that affords student self-directed learning in the context of a clinical case setting. Each week-long case is sequentially revealed over the course of three two-hour sessions. Students work in groups of about nine. For each case, each student will provide at least one teaching presentation to the group – this should be a PowerPoint slide set that includes citations for all images used and an *annotated* list of references from textbooks and the primary literature. Students are expected to offer constructive feedback on these presentations. The group will devise their own session learning objectives on Day 1 of each week; these will be the topics presented orally on Day 2. CCBL group assignment will remain stable for an entire academic year, to allow longitudinal formative feedback from facilitators, and to foster periodic peer- and self-assessment. Case Learning Objectives comprise material that may be tested in NBME course exams. All sessions are mandatory and timely arrival is expected in order for students to earn a grade of PASS for this component of a course; grading will be Pass/Fail. When feasible, CCBL sessions will occur at least once in each non-experiential course.

Anatomy Laboratory Rules

An appreciation of the significance of the anatomical gift is important to ensure our continuing respect for the altruism of our donors. The UC Davis and UC San Francisco willied body programs foster a learning partnership with CNUCOM in creating an educational relationship between the donor, the teacher, and the student. Dissection is a privilege and an incredible gift from the donors who have chosen to give so that we may learn.

Some may feel uneasy and anxious at the prospect of first dealing with cadavers; this is a natural response inasmuch as dealing with death is not always easy. Talk about your feelings with the faculty. Share them with your peers. Generations of students have experienced similar emotions and conversation helps calm our apprehensions.

In compliance with State and Federal regulations, and in the interest of your personal safety, you are required to follow these rules of the anatomy lab:

1. The donors are to be treated with dignity and utmost respect at all times. Crude or inappropriate remarks could result in dismissal from the lab.
2. Similar to medical settings, the discussion of donors or lab practices outside of the lab is inappropriate unless it is for the express purpose of study or learning. The nature of the learning process within the lab can be upsetting to the general public, so always be mindful of who could be listening to conversations.
3. The anatomical materials from a donor are a precious resource, and a protected resource. Under no circumstances shall anatomical material be taken from the laboratory.
4. Each donor is sent with an identification tracking number and device. This number and/or device must remain affixed to the specimen throughout its use until its return to the willied body program. All information regarding the donor is confidential.
5. Fluid Disposal: There are containers in the room for fluid collection. If any are full, let the anatomy lab manager know.
6. Trash: Please dispose of any soiled gloves, paper towels, aprons, or other supplies in the trash cans. When you see the trash cans are near to being full, please let the anatomy lab manager know.
7. Dissected Tissue: Any bits of skin, fat or other human tissues must be disposed of in the WHITE buckets at your table. Please do not put any other items in these buckets. If this can is nearing capacity, please let the anatomy lab manager know. Such items from each donor are put in separate plastic bags with the ID# of the donor, kept in cold storage, and returned with other remains of the donor at the time of cremation.

8. The anatomy lab is under video surveillance, and is monitored for entry through identification badge scans. The person using the identification badge is responsible for all people who enter with them. Please request the identity of any person who is unknown to you.
9. All equipment and models within the anatomy lab are identified and monitored. No equipment or models are allowed to leave the anatomy lab without permission.
10. To protect the dignity and privacy of the donor, the face or any other identifying feature of the case shall never be publicly displayed. This includes display to students, staff, visitors and faculty not participating in the intended use of the material.
11. Horseplay within the lab is strictly prohibited.
12. The use of cell phones and photography by students is not allowed.
13. Universal precautions must be followed. Wear protective clothing/lab coat and gloves at all times while dissecting, and protective eyewear when there is a risk of splash.
14. If you use contacts, it is highly recommended that you wear glasses when in lab.
15. If you have a chemical sensitivity let a member of your faculty know; they will assist you in purchasing a respirator and will train you to use it.
16. No food, drink, or chewing gum or applying cosmetics is permitted in the laboratory.
17. No open toed shoes are allowed. Your shoes should protect your feet from accidental chemical drips and injury from falling sharps. Your shoes should provide sufficient traction for use in a lab where the floor has the possibility of being slippery. It is recommended that you have a pair of shoes for lab use only.
18. Shorts or skirts are not permitted (please see the Student Handbook Dress code policy for Anatomy Lab).
19. Students with long hair need to have it pulled back and tied.
20. Sharps Safety: Always use hemostats or a blade-removal tool to remove a scalpel blade from its handle. Used blades must be disposed in the provided sharps containers.
21. Dissection equipment: All the items you should need are provided for you. Please remember to wash and dry the instruments at the end of each session so they do not rust.
22. Prevent desiccation by using wet cheesecloth to cover your donors as needed. Remember to always use wetting solution to moisten dissected parts otherwise it will dry your dissection! Wetting solution contains chemicals that can cause irritation and burns. Use it with care.
23. When leaving the lab, please remember to properly wrap and moisten your cadaver. This is essential! The table covers should be closed, and the lab doors should be locked behind you.

Student Evaluations of Course and Faculty

Students are required to complete these evaluations during the assigned mandatory session on the course calendar. Course evaluations will be scheduled in the course calendar for the last day of instruction. The goal for course evaluations is 100% participation. In the event that there is less than 90% class participation, grades will be withheld, by both the course director and the Registrar, for the entire class until the 90% participation level is reached.

Students will be expected to comply with all CNU and COM policies.

Weekly Course Calendars are on the Following Pages:

Integumentary & Musculoskeletal Systems										
Week 1 - CP: Muscle Weakness

2018 – 2019 Academic Year
Cardiovascular & Pulmonary Systems Course Syllabus
Course #: 531 and HS 522 (CDM)
Year: I
Semester: Spring

Course Dates: March 25, 2019 – May 31, 2019

Credits Hours: 09**Course Co-Director:****Darilyn Campbell Falck, MD FACEP**

Department of Medical Education, Office #124

Office: 916-686-7914; Mobile: 916-202-0213

Email: darilyn.falck@cnsu.edu**Course Co-Director:****Tracy L Yarbrough, PhD MD MAEd**

Department of Basic Science, Office #142

Office: 916-686-7610; Mobile: 703-517-5775

Email: tracy.yarbrough@cnsu.edu**Coordinator:****Samantha Xiong****Disclaimer about changes in Syllabus and Course Calendar:**

Every effort will be made to adhere to the contents of this syllabus. However, this document is subject to changes in the event of unforeseen, extenuating circumstances. Students will be notified as soon as possible if changes in the syllabus become necessary.

Course Teaching Faculty

Name/Degree	Rank/Title
Ghaith Al-Eyd, MBChB (MD), MSc, PhD, MIAC	Assistant Dean of Assessment; Associate Professor of Pathology
Scott Braley, MD	Associate Professor of Surgery, Oncology, Anatomy and Clinical Skills
Nripendra Dhillon, MBBS, MS	Associate Professor of Anatomy
Guy diSibio, MD, PhD	Associate Professor of Pathology, Hematopathology, Surgical Pathology, Molecular Genetics and Clinical Skills
Nehad El-Sawi, PhD	Professor of Molecular Biology, Immunology and Microbiology
Susan Ely, PhD	Professor of Molecular Biology, Immunology and Microbiology
Randall Enstrom, MD	Associate Professor of Radiology
Darilyn Campbell Falck, MD, FACEP	Assistant Dean of Student Affairs; Associate Professor of Emergency Medicine
Xiaodong Feng, PhD, PharmD	Associate Dean of Student Affairs, Admissions and Outreach; Professor of Pharmacology and Oncology
Valerie Gerriets, PhD	Assistant Professor of Pharmacology
Nazir Habib, MD	Associate Professor of Internal Medicine & Critical Care
Nazila Hejazi, MD	Assistant Professor of Pathology
Laura Hoffman, MD	Associate Professor of Endocrinology
Rudolph (Rudy) Holguin, MD	Associate Professor of Emergency Medicine
Michael Ibrahim, MD, PhD	Associate Professor of Biochemistry, Pharmacology, Physiology & Radiology/Imaging
Ishwarlal (Kenny) Jialal, MBChB, MD	Assistant Dean of Research; Professor of Physiology, Metabolism, and Pathology
Sheryl Krig, PhD	Assistant Professor of Biochemistry
Malcolm McHenry, MD	Associate Professor of Internal Medicine, Cardiology & Medical Skills
Jose Puglisi, PhD	Assistant Professor of Physiology & Biostatistics
Raj Ramsamooj, MD	Assistant Dean of Curriculum; Professor of Pathology, Surgical Pathology and Clinical Skills
Mark Sheffield, MD, PhD	Associate Professor of Physiology, Endocrinology, and Clinical Skills
Joseph Silva, MD	Dean; Professor of Internal Medicine and Infectious Diseases
Sailabala Vanguri, MBBS, MD	Assistant Professor of Anatomy
Jean-Claude Veille, MD	Professor of Obstetrics & Gynecology
Tracy Yarbrough, PhD, MD, MAEd	Associate Professor of Physiology
Peter Yip, MD, MPH	Senior Chairman of Clinical Sciences; Associate Professor of Internal Medicine & Occupational Medicine

Open Door Policy: Course faculty have an open door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time

N El-Sawi Course syllabus template approved by Curriculum Committee on August 5, 2016; revised September 27, 2017;
July 30, 2018

Volunteer Community Faculty (if applicable)
Name/Degree
Brian Bellucci, MD
Peter Miles, MD
Peter Murphy, MD, MRCP, FCCP
Vanessa Walker, MD

Communication with volunteer community faculty must be channeled through the course director.

Course Description:

This course covers the components of the cardiovascular and pulmonary systems, including the heart, major vessels, peripheral vascular system, lungs and its vessels and their integrated functions under normal and abnormal conditions. Teaching on the main components of the CVP systems will include content at the molecular, cellular, tissue and organ levels, which includes both healthy and diseased states, treatment and prophylactic strategies.

Course Objectives:

By the conclusion of this course, the student will demonstrate the ability to:

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Describe expected clinical findings, diagnostic approaches, and natural history of cardiovascular and respiratory diseases based on the fundamental knowledge of anatomy (gross and histologic), biochemistry, cellular and molecular biology, and physiology.	PLO-2 (MSK1,MSK2)
2	Explore the roles of genetics and social determinants of health in cardiovascular and respiratory diseases, including epidemiology, risk, and outcomes.	PLO-2 (MSK1, MSK2, MSK3)
3	Describe expected clinical findings, diagnostic approaches, and natural history of cardiovascular and respiratory diseases based on the fundamental knowledge of immunology, microbiology, and pathology.	PLO-2 (MSK1, MSK2)
4	Apply the principles of pharmacology (absorption, distribution, mechanism of action, side effects) to prioritize selection of optimal drug therapy over non pharmacological therapeutics for the management of cardiovascular and respiratory diseases.	PLO-2 (MSK1, MSK2, MSK3)
5	Apply principles of scientific reasoning and biostatistics to the selection of best evidence, as relates to the study of cardiovascular and respiratory diseases.	PLO-2 (MSK1, MSK2, MSK3,MSK4)
6	Demonstrate professionalism and interpersonal and communication skills in the roles of learner, colleague, and healthcare team member.	PLO-1 (PC1, PC2, PC3, PC4, PC6, PC7); PLO-3 (C1, C2, C3); PLO-4 (P1, P2, P3)

Please Note: All session objectives listed in the individual sessions (by date and time) are mapped to the course objectives.

Key: PLO = Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations:

Two large lecture halls, each with a seating capacity of 180 students, will be used for the basic science sessions. Eight small classrooms/college rooms, each with a capacity for 25 students and the Simulation Center space are available for small group sessions. A large gross anatomy laboratory with capacity for cadaver dissections, where a group of students will be assigned to each cadaver, is available for anatomy dissection.

Lecture/Session Duration: All lectures on the calendar as one hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Teaching/Learning Methodology:

- Clinical Case-Based Learning (CCBL)
- Demonstration
- Discussion, Large group (>12)
- Discussion, Small Group (<12)
- Independent Learning
- Laboratory
- Lecture
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Peer Teaching
- Problem-Based Learning (PBL)
- Research
- Self-Directed Learning (SDL)
- Simulation
- Team-Based Learning (TBL)

Online Materials – Canvas: Canvas is California Northstate University's Learning Management System.) Use your CNU NETID and password.

Turning Point: Every Phase A student was given a Turning Point Clicker during Orientation. **Please bring the Clicker to class at all times.**

Library/Learning Resources

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This program includes an initial 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Required Textbook(s), Material(s) and Equipment

Subject	Author	Title
Cardiology	Dale Dubin	Rapid Interpretation of EKG's, 6 th Ed
Clinical Reasoning & Medicine	Dan Longo, et al.	Harrison's Principles of Internal Medicine, 19 th Ed
Medical Skills	Lynn Bickley	Bates' Guide to Physical Examination and History-Taking, 11 th Ed
Physiology	John Hall	Guyton and Hall Textbook of Medical Physiology, 13 th Ed

Recommended Textbook(s)

Subject	Author	Title
Pharmacology	Goodman & Gilman's	Goodman & Gilman's: The Pharmacological Basis of Therapeutics 12ed, 2011
Biochemistry	Thomas M. Devlin	Textbook of Biochemistry with Clinical Correlations, 7 th Ed

Attendance**Lecture/Learning Activity Attendance**

Attendance at all learning sessions is highly recommended, and Clinical Case and CCBL sessions are mandatory. Sessions declared as mandatory on the course calendar or during the introduction to the course are required.

Sign-in sheets or electronic attendance will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets or electronic tracking will be collected 5 minutes after the activity begins. Certain excused absences are allowed (please see Excused Absence Policy).

The following procedure(s) will be employed for breeches of these course requirements.

13. Administrative/Support staff will notify the course director(s) and Assistant Dean of Student Affairs.
14. A note will be placed in the student's file.
15. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE.
16. Persistent/repeated lapses in timely attendance will require the student to appear before the Student Promotions Committee.
17. Any missed CCBL session, regardless of the nature of the absence, will result in a course grade of "Y" and mandatory make-up CCBL session in the summer. Once the CCBL has been completed, the grade will be updated to reflect the student's final course grade (H/P/F).

18. Make-up of any missed Clinical Case session, regardless of the nature of the absence, must be completed as specified by the Course Directors and Clinical Case thread director.

Exams and Grading/Assessment:

▪ Formative

- Course directors will specify pre-scheduled times (other than during lectures) during which quiz sessions will be held. The number of sessions, format and frequency will be at the discretion of the course director. The quiz format, including number of questions, will be at the discretion of the course director. Quizzes will not contribute points toward the overall course grade but will have educational value.
 - This course will have 4 in-class formative quizzes scheduled at 8AM-10AM on Monday 4/1/19, Monday 4/15/19, Monday 5/6/19 and Monday 5/20/19.

▪ Summative

- One hybrid mid-course NBME examination, 50 questions on Monday of week 5 of the course. This may be in the hybrid exam format, meaning an individual exam followed by a team effort on the same exam.
- One NBME comprehensive final examination, 100 questions on **Tuesday** of week 10 of the course (i.e., at the end of the course).
- One mid-course anatomy laboratory practical summative exam on Tuesday of week 4 of the course and one final anatomy laboratory practical summative exam on Wednesday of week 10 of the course.
- Clinical Cases: Eight (8) ~2-hr sessions devoted to presentation and discussion of Clinical Cases will be offered; attendance at these sessions is mandatory. Students will work in groups of five and student presentations will be graded using a rubric.
- Clinical Case-Based Learning: One series (three (3) sessions of 2 hours each) devoted to self-directed learning following the problem-based learning format; attendance at these sessions is mandatory.
- Scientific Method/Biostatistics Laboratory Sessions: Two ~2-hour workshop sessions with submitted assignments for each. Participation in these sessions and successful submission of these assignments will count towards the final course grade.
- Team-based Learning and Self-Directed Learning Sessions: Six ~2-hour sessions with submitted quizzes or assignments for each. Participation in these sessions and successful submission of quizzes and/or assignments will count towards the final course grade.

Total Course Score and Grading:

The total numeric score for the course will be measured as follows, which translates to recording a passing grade if 70 or above, and an honors grade if 90 or above.

#	Components	%	Notes/Explanation
1	Mid-Course (Hybrid) Summative NBME Exam	28	Overall score for this exam will be determined 75% by individual score and 25% by team score
2	End of Course Final Comprehensive Summative NBME Exam	45	---

3	Anatomy Laboratory Practical Summative Exams	13	6.5% each for mid-course and final exams
4	Clinical Cases (CC) -- Students are expected to successfully complete in order to pass the course.	0	Refer to description below
#	Components	%	Notes/Explanation
5	Clinical Case Based Learning (CCBL) -- Students are expected to successfully complete in order to pass the course.	0	Refer to description below
6	Nutrition Modules -- Students are expected to successfully complete assigned Nutrition in Medicine modules in order to pass the course. Students must register for nutrition in medicine via “nutritioninmedicine.org”. (A guide to NIM Medical Student registration will be posted to CANVAS). Once registered, enter the access code “cnsu_nutr” in order to access all modules available to CNSU medical students.	0	For this course, you are expected to complete the following modules: “CVD: Hypertension & Other Risk Factors” and “CVD: Lipoproteins” . Provide Course Director with proof of completion no later than 05:00 PM ET on Friday 4/26/19. <u>Those students submitting completion certificates submissions after this deadline will be required to submit an additional relevant assignment.</u> Note: You need to only successfully complete the specific modules assigned for the course. Do not complete the other modules until told to do so in your other courses.
7	Team-based Learning and Self-Directed Learning Sessions	12	2% for each of six (6) sessions
8	Scientific Method and Biostatistics Laboratory Assignments	2	1% for each of two (2) laboratory sessions

Formative and summative NBME exams score reports will be available ~3-days after the exam; it is the student’s responsibility to contact the Course Director to obtain their individual score report.

Any additional (retesting) exams will be at the expense of the student.

The successful completion of the course is based on demonstrating high standards of ethical and professional behavior, as well as passing both the Final Comprehensive Summative Exam **AND** the course with a grade of 70% or higher.

Grading percentages

Passing grade requires a total score of 70% or higher

Honors grade requires a total score of 90% or higher

Remediation

Students failing the course will be referred to the Student Promotion Committee (SPC) and a custom tailored remediation plan will be developed.

Description of Clinical Cases and Clinical Case Based Learning

Clinical Case (CC's) and Clinical Case Based Learning (CCBL's) sessions are designed to promote the development of teamwork, professionalism, and evidence-based patient management skills that integrate the basic and clinical sciences.

During the M1 year, following a faculty-led Clinical Presentation (CP) lecture, the students will receive a PowerPoint presentation that contains the subjective (including the Chief Complaint, History of Present Illness, and Past Medical History) and objective (including the Physical Examination) findings for a hypothetical patient who presents with a complaint aligned with the CP lecture. As they assimilate basic and clinical science content throughout the week's lectures, students will work in assigned groups to complete a series of template slides included in the PowerPoint presentation. At the end of the week, each student group will submit its final presentation for a grade. One group in each college (on a preassigned, rotating basis) will present the case to their College for discussion. Each group will submit their case presentation for grading using a defined rubric by a rotating faculty member. Grading will be Pass/Needs Improvement/Fail.

Clinical Case-Based Learning (CCBL) is an integrated, Problem-Based Learning modality that affords student self-directed learning in the context of a clinical case setting. Each week-long case is sequentially revealed over the course of three two-hour sessions. Students work in groups of about nine. For each case, each student will provide at least one teaching presentation to the group – this should be a PowerPoint slide set that includes citations for all images used and an *annotated* list of references from textbooks and the primary literature. Students are expected to offer constructive feedback on these presentations. The group will devise their own session learning objectives on Day 1 of each week; these will be the topics presented orally on Day 2. CCBL group assignment will remain stable for an entire academic year, to allow longitudinal formative feedback from facilitators, and to foster periodic peer- and self-assessment. Case Learning Objectives comprise material that may be tested in NBME course exams. All sessions are mandatory and timely arrival is expected in order for students to earn a grade of PASS for this component of a course; grading will be Pass/Fail. When feasible, CCBL sessions will occur at least once in each non-experiential course.

Anatomy Laboratory Rules

An appreciation of the significance of the anatomical gift is important to ensure our continuing respect for the altruism of our donors. The UC Davis and UC San Francisco willed body programs foster a learning partnership with CNUCOM in creating an educational relationship between the donor, the teacher, and the student. Dissection is a privilege and an incredible gift from the donors who have chosen to give so that we may learn.

Some may feel uneasy and anxious at the prospect of first dealing with cadavers; this is a natural response inasmuch as dealing with death is not always easy. Talk about your feelings with the faculty.

Share them with your peers. Generations of students have experienced similar emotions and conversation helps calm our apprehensions.

In compliance with State and Federal regulations, and in the interest of your personal safety, you are required to follow these rules of the anatomy lab:

1. The donors are to be treated with dignity and utmost respect at all times. Crude or inappropriate remarks could result in dismissal from the lab.
2. Similar to medical settings, the discussion of donors or lab practices outside of the lab is inappropriate unless it is for the express purpose of study or learning. The nature of the learning process within the lab can be upsetting to the general public, so always be mindful of who could be listening to conversations.
3. The anatomical materials from a donor are a precious resource, and a protected resource. Under no circumstances shall anatomical material be taken from the laboratory.
4. Each donor is sent with an identification tracking number and device. This number and/or device must remain affixed to the specimen throughout its use until its return to the willed body program. All information regarding the donor is confidential.
5. Fluid Disposal: There are containers in the room for fluid collection. If any are full, let the anatomy lab technician know.
6. Trash: Please dispose of any soiled gloves, paper towels, aprons, or other supplies in the RED trashcans. When you see the trash cans are near to being full, please let the anatomy lab technician know.
7. Dissected Tissue: Any bits of skin, fat or other human tissues must be disposed of in the WHITE buckets at your table. Please do not put any other items in these buckets. If this can is nearing capacity, please let the anatomy lab technician know. Such items from each donor are put in separate plastic bags with the ID# of the donor, kept in cold storage, and returned with other remains of the donor at the time of cremation.
8. The anatomy lab is under video surveillance, and is monitored for entry through identification badge scans. The person using the identification badge is responsible for all people who enter with them. Please request the identity of any person who is unknown to you.
9. All equipment and models within the anatomy lab are identified and monitored. No equipment or models are allowed to leave the anatomy lab without permission.
10. To protect the dignity and privacy of the donor, the face or any other identifying feature of the case shall never be publicly displayed. This includes display to students, staff, visitors and faculty not participating in the intended use of the material.
11. Horseplay within the lab is strictly prohibited.
12. The use of cell phones and photography by students is not allowed.
13. Universal precautions must be followed: Wear protective clothing/lab coat and gloves at all times while dissecting, and protective eyewear when there is a risk of splash.

14. If you use contacts, it is highly recommended that you wear glasses when in lab.
15. If you have a chemical sensitivity let a member of your faculty know; they will assist you in purchasing a respirator and will train you to use it.
16. No food, drink, or chewing gum or applying cosmetics is permitted in the laboratory.
17. No open toed shoes are allowed. Your shoes should protect your feet from accidental chemical drip and injury from falling sharps. Your shoes should provide sufficient traction for use in a lab where the floor has the possibility of being slippery. It is recommended that you have a pair of shoes for lab use only.
18. Shorts or skirts are not permitted (please see the Student Handbook Dress code policy for Anatomy Lab).
19. Students with long hair need to have it pulled back and tied.
20. Sharps Safety: Always use hemostats or a blade-removal tool to remove a scalpel blade from its handle. Used blades must be disposed in the provided sharps containers.
21. Dissection equipment: All the items you should need are provided for you. Please remember to wash and dry the instruments at the end of each session so they do not rust.
22. Prevent desiccation by using wet cheesecloth to cover your donors as needed. Remember to always use wetting solution to moisten dissected parts otherwise it will dry your dissection! Wetting solution contains chemicals that can cause irritation and burns. Use it with care.
23. When leaving the lab, please remember to properly wrap and moisten your cadaver. This is essential! The table covers should be closed, and the lab doors should be locked behind you.

For additional information, please contact:

Nripendra Dhillon, MBBS, MS: (707) 864-6362

Sailabala Vanguri, MD: (916) 686-7965

Student Evaluations of Course and Faculty

Student Evaluations of the Course and Faculty: Students are required to complete these evaluations during this assigned mandatory session on the course calendar. Course evaluations will be scheduled in the course calendar for the last Friday of instruction. The goal for course evaluations is 100% participation. In the event that there is less than 90% class participation, grades will be withheld, by both the Course Director and the Registrar, for the entire class until the 90% participation level is reached.

Students will be expected to comply with all CNU and COM policies.

Weekly Course Calendars

Cardiovascular and Pulmonary System					
Week 1 - CPs: Arrhythmia / Palpitation and Syncope					
	Monday	Tuesday	Wednesday	Thursday	Friday
	3/25/2019	3/26/2019	3/27/2019	3/28/2019	3/29/2019
8:00 AM	CVP Course Introduction Falck & Yarbrough	ECG Part I: Intro to EKG & Vectors McHenry/Falck	Masters Colloquium	Ventricular Arrhythmias Falck	SELF STUDY
8:30 AM	Introduction to Lecturio				
9:00 AM	Anatomy of Thoracic Wall & Heart Vanguri	Anatomy Lab: Thoracic Wall & Heart Group A Anatomy Faculty	Team Based Learning: EKG Interpretations Falck	Pharmacologic Management of Arrhythmias Part I Ibrahim	Pharmacologic Management of Arrhythmias Part II Ibrahim
9:30 AM					
10:00 AM				Medical Skills:	Clinical Cases Debrief: Peter Miles
10:30 AM				Histology Lab Aleyd	
11:00 AM	Clinical Presentation: Syncope & Arrhythmia Falck				
11:30 AM					
12 noon	Lunch and activities	Lunch and activities	Lunch and activities	Lunch and activities	Lunch and activities
12:30 PM					
1:00 PM	Rhythmic Excitation of the Heart Yarbrough/Puglisi	SELF STUDY	ANS Pharmacology Gerriets	Medical Skills:	TA Review Session
1:30 PM				Histology Lab Aleyd	
2:00 PM	Adrenergic & Cholinergic Receptors Physiology Yarbrough	Anatomy Lab: Thoracic Wall & Heart Group B Anatomy Faculty	Atrial Arrhythmias Falck		
2:30 PM					
3:00 PM	Diagnostic Imaging Part I Ibrahim		Overview of Adult Vasculature & Fetal Circulation Dhillon	Medical Skills:	Self Study
3:30 PM				SELF STUDY	
4:00 PM	SELF STUDY		SELF STUDY		
4:30 PM					

Cardiovascular and Pulmonary System						
Week 2 - CPs: Cyanosis & Murmurs / Abnormal Heart Sounds						
	Monday	Tuesday	Wednesday	Thursday	Friday	
	4/1/2019	4/2/2019	4/3/2019	4/4/2019	4/5/2019	
8:00 AM	Quiz 1 (20Q) & Faculty Review	SELF STUDY	Masters Colloquium	Physiology of Hypertension & Regulation of Blood Pressure Yarbrough	Pharmacologic Management of Hypertension Ibrahim	
8:30 AM				Essential Hypertension, Hypertensive Heart & Vascular Disease Hejazi	Application: Pharmacologic Management of Hypertension Yarbrough	
9:00 AM				Medical Skills:	Self Study	
9:30 AM						
10:00 AM	Heart as a Pump & Cardiac Cycle Yarbrough/Puglisi	Anatomy Lab: Group B Anatomy Faculty	Team Based Learning: Cardiac Physiology/Harvi Puglisi & Yarbrough	Medical Skills:	Self Study	
10:30 AM	Clinical Presentation: Murmurs & Abnormal Heart Sounds McHenry					
11:00 AM						
11:30 AM						
12 noon	Lunch and activities	Lunch and activities	Lunch and activities	Lunch and activities	Lunch and activities	
12:30 PM						
1:00 PM	Team Based Learning: Cardiovascular Physiology & Hemodynamics Yarbrough/Falck	Congenital Heart Disease, R to L Shunt, L to R Shunt McHenry	Origin of Heart Sounds and Systolic and Diastolic Murmurs Yip	Medical Skills:	Self Study	
1:30 PM			Congenital Obstructive Lesions, Coarctation of Aorta & Cardiac Tumors Hejazi			
2:00 PM		Anatomy Lab: Group A Anatomy Faculty	SELF STUDY	Medical Skills:	Self Study	
2:30 PM						
3:00 PM	Development of the Cardiovascular System, Part 1 Dhillon					
3:30 PM	Development of the Cardiovascular System, Part II Dhillon					
4:00 PM						
4:30 PM						

Cardiovascular and Pulmonary System							
Week 3 - CP: Chest Pain							
	Monday	Tuesday	Wednesday	Thursday		Friday	
	4/8/2019	4/9/2019	4/10/2019	4/11/2019		4/12/2019	
8:00 AM	Clinical Presentation: Chest Pain Holguin	Pathophysiology of Atherosclerosis & Dyslipidemia Al-Eyd	Masters Colloquium	Manifestations of Ischemia & the EKG McHenry/Falck		SELF STUDY	
8:30 AM						Pharmacologic Management of Dyslipidemia & Atherosclerosis Jialal	
9:00 AM	Anatomy of the Mediastinum Braley	Anatomy Lab: Mediastinum Group A Anatomy Faculty	Peripheral Vascular Disease Jialal	Medical Skills:	Self Study	Clinical Cases	
9:30 AM							
10:00 AM	Mediastinal Masses & Cardiac Tumors Braley		Systemic Arterial Disease, Aortic Aneurysm & Dissection Falck				
10:30 AM							
11:00 AM	Thymus: Gross Anatomy & Histology of the Thymus & Thymomas Hejazi						
11:30 AM							
12 noon	Lunch and activities	Lunch and activities	Lunch and activities	Lunch and activities		Lunch and activities	
12:30 PM							
1:00 PM	Autonomic Nervous System Dhillon	Pathophysiology of Ischemic Heart Disease/ACS McHenry/Ramsamooj	Pharmacological Management of Angina & ACS Gerriets	Medical Skills:	Self Study	TA & Peer Review Session	
1:30 PM							
2:00 PM			Cardiac Rehab/Alternative Medicine Yip				
2:30 PM							
3:00 PM	SELF STUDY	Anatomy Lab: Mediastinum Group B Anatomy Faculty	Self study: Review Dr. Miller-Blair lecture on Vasculitides 12/5 (MSK Course)	Medical Skills:	Self Study	SELF STUDY	
3:30 PM							
4:00 PM			SELF STUDY	SELF STUDY			
4:30 PM							

Cardiovascular and Pulmonary System						
Week: 4 - CP: Edema & Congestive Heart Failure (CHF)						
	Monday	Tuesday	Wednesday	Thursday		Friday
	4/15/2019	4/16/2019	4/17/2019	4/18/2019		4/19/2019
8:00 AM	Quiz 2 (35Q) & Faculty Review	SELF STUDY	Masters Colloquium	Myocarditis, Pericarditis and Pleuritis Ramsamooj		Basics of Heart Transplantation Ramsamooj
8:30 AM				Rheumatic Heart Disease and Endocarditis diSibio		Cardiovascular Adaptations & Disorders in Pregnancy Veille
9:00 AM						
9:30 AM						
10:00 AM	Clinical Presentation: Peripheral Edema & CHF Holguin			Diagnosis & Management of Congestive Heart Failure Jialal	Medical Skills:	Sci Method Lab: Non-Experimental Studies
10:30 AM	Pathophysiology of Cardiomyopathies McHenry	Pathology of Heart Failure Hejazi				
11:00 AM						
11:30 AM						
12 noon	Lunch and activities	Lunch and activities	Lunch and activities	Lunch and activities		Optional CV-Friendly Diets Lunch
12:30 PM						
1:00 PM	Physiology of Heart Failure Jialal	Anatomy Lab Midterm Summative Exam Group A: 1PM-3PM Group B: 3PM-5PM	Peripheral Edema & Venous Diseases diSibio	Medical Skills:	Sci Method Lab: Non-Experimental Studies	TA & Peer Review Session
1:30 PM	SELF STUDY		SELF STUDY

**2018 – 2019 Academic Year Urinary
(Renal) System Course Syllabus Course
#: 541 and HS 611 (CDM)
Year: II
Semester: Fall**

Course Dates: 6 August, 2018 – 14 September, 2018

Credits Hours: 5

Course Director:

Tracy L. Yarbrough, PhD, MD, MAEd

Associate Professor, Department of Basic Science; COM Room 142

916-686-7610; tracy.yarbrough@cnsu.edu

Coordinator:

Samantha Xiong

Disclaimer about changes in Syllabus and Course Calendar:

Every effort will be made to adhere to the contents of this syllabus. However, this document is subject to change in the event of unforeseen, extenuating circumstances. Students will be notified as soon as possible if changes in the syllabus become necessary.

Course Teaching Faculty:

Name/Degree	Rank/Title
Ghaith Aleyd, MD, MSC, PhD	Associate Professor of Pathology
Floyd Culler, MD	Professor of Pediatrics, Endocrinology and Medical Skills
Nripendra Dhillon, MBBS, MS	Associate Professor of Anatomy
Guy diSibio, MD, PhD	Associate Professor of Pathology, Hematopathology, Surgical Pathology, Molecular Genetics, and Medical Skills
Nehad El-Sawi, PhD	Professor of Microbiology, Immunology and Cell Biology
Susan Ely, PhD	Professor of Molecular Biology, Immunology and Microbiology
Darilyn Falck, MD, FACEP	Associate Professor of Emergency Medicine
Xiaodong Feng, PhD, PharmD	Associate Dean of Student Affairs, Admissions and Outreach; Professor of Pharmacology and Oncology
Valerie Gerriets, PhD	Assistant Professor of Pharmacology
Nazila Hejazi, MD	Assistant Professor of Pathology
Rudolph Holguin, MD	Associate Professor of Emergency Medicine
Ishwarlal Jialal, MD, MBChB	Professor of Physiology, Metabolism, and Pathology
ForShing Lui, MD	Professor of Clinical Neurology
Jose Puglisi, PhD	Assistant Professor of Physiology, Biostatistics
Rajendra Ramsamooj, MD	Professor of Pathology, Surgical Pathology and Clinical Skills
Mark Sheffield, MD, PhD	Associate Professor of Physiology, Endocrinology, and Medical Skills
Sailabala Vanguri, MD	Assistant Professor of Anatomy

Open Door Policy—Course faculty have an open door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time.

Volunteer Community Faculty (if applicable)
Name/Degree
Carolina Alvayay, MD
Muralikrishna Golconda, MD, MRCP (UK)
David Pai, MD
Michael Sim, MD

Communication with volunteer community faculty must be channeled through the course director.

Course Description:

The urinary system consists of the kidneys, ureters, bladder and urethra, and, along with responsibility for removing metabolic wastes and metabolites, it is primarily responsible for the regulation of fluid and electrolyte balance in the body. As such, it has a major effect on blood pressure regulation.

This course will cover the normal function of the system at all levels, from the molecular level to the organ level, as well as common and important abnormalities of both form and function. The diagnosis and treatment of urinary system disorders will be discussed as well.

Lastly, we will discuss ways in which the urinary system interacts with other major body systems, and how the environment influences the system.

Clinical presentations selected for their prevalence and their patient impact will frame the course, and include: fluid and electrolyte disturbances, acute kidney injury, flank pain/calculi, hematuria, proteinuria, generalized edema, frequency/dysuria/polyuria, acid-base disturbances, chronic kidney disease, and hypertension.

Course Objectives:

By the conclusion of this course, the student will demonstrate the ability to:

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Relate the development, structure, and function of the urinary system to its fundamental roles in maintaining osmolar, electrolyte, nutrient/waste, acid-base and blood pressure balance; considering also the ways in which pathogens or genetic alterations affect these normal processes.	PLO-2 (MSK1,MSK2)
2	Apply knowledge of normal aging, pathophysiology, pharmacology, diagnostic tool characteristics and scientific reasoning to the development of evidence-based management plans, including the selection of appropriate diagnostic assessments, and safe and effective treatments for diseases of the urinary system.	PLO-1 (PC7, PC8); PLO-2 (MSK1,MSK2, MSK3)
3	Recognize the effects of systems-based factors (healthcare team, organization, and/or environment) and patient-based factors (culture, identity and/or other social determinants) on the care and well-being of patients with urinary system diseases.	PLO-1 (PC6); PLO-5 (HC1, HC2)
4	Illustrate the relationships between the urinary system and other organ systems in maintaining body homeostasis, and the pathophysiologic mechanisms and therapeutic management of disorders that disrupt these normal relationships.	PLO-2 (MSK1,MSK2, MSK3)

5	Demonstrate level-appropriate skills in written and oral communication, and professionalism in dealing with patients and colleagues.	PLO-1 (PC1, PC2, PC3, PC4, PC5, PC6, PC7); PLO-3 (C1, C2, C3); PLO-4 (P1, P2, P3)
---	--	--

Please Note: All session objectives listed in the individual sessions (by date and time) are mapped to the course objectives.

Key: PLO = Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations:

Two large lecture halls, each with a seating capacity of 180 students, will be used for the basic science sessions. Eight small classrooms/college rooms, each with a capacity for 25 students and the Simulation Center space are available for small group sessions. A large gross anatomy laboratory with capacity for cadaver dissections, where a group of students will be assigned to each cadaver, is available for anatomy dissection.

Lecture/Session Duration:

All lectures on the calendar as one hour sessions will be 50 minutes long with a 10-minute break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have at least one 10-minute break every two hours.

Teaching/Learning Methodology:

- Case-Based instruction/Learning
- Concept Mapping
- Discussion, Large group (>12)
- Discussion, Small Group (<12)
- Independent Learning
- Journal Club
- Laboratory
- Lecture
- Mentorship
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Peer Teaching
- Problem-Based Learning (PBL)
- Research
- Self-Directed Learning
- Team-Based Learning (TBL)
- Workshops

Turning Point:

Every Phase A student was given a Turning Point Clicker during Orientation. Please bring the clicker to class at all times.

Online Materials – Canvas:

Canvas is California Northstate University's Learning Management System.) Use your CNU NETID and password.

Library/Learning Resources:

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This resource includes 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Required Textbooks, Materials and/or Equipment:

Subject	Author	Title
Anatomy	Moore	Clinically Oriented Anatomy, 7 th Ed.
Biochemistry	Lieberman	Marks' Basic Medical Biochemistry: A Clinical Approach, 4 th or 5 th Ed.
Biostatistics	Dawson & Trapp	Basic and Clinical Biostatistics, 4 th Ed.
Clinical Medicine (Adult)	Jameson, Fauci, Kasper, Hauser, Longo & Loscalzo	Harrison's Principles of Internal Medicine, 20 th Ed.
Embryology	Moore, Persaud & Torchia	Developing Human: Clinically Oriented Embryology (revised), 10 th Ed.
Ethics/ Professionalism	Lo	Resolving Ethical Dilemmas, 5 th Ed.
Histology	Mescher	Junquiera's Basic Histology, 15 th Ed.
Immunology	Parham	The Immune System, 4 th Ed.
Microbiology & Infectious Diseases	Engleberg	Schaechter's Mechanisms of Microbial Disease, 5 th Ed.
Pathology	Kuman, Abbas & Aster	Robbins & Cotran Pathologic Basis of Disease, 9 th Ed.
Pharmacology	Katzung	Basic & Clinical Pharmacology, 14 th Ed.
Physiology	Hall	Guyton & Hall Textbook of Medical Physiology, 13 th Ed.

Public Health	Schneider	Introduction to Public Health, 4 th Ed.
Physical Examination	Bickley	Bates' Guide to Physical Examination & History Taking, 12 th Ed.
Radiology/ Imaging	Chen, Pope & Ott	Basic Radiology, 2 nd Ed.

Recommended Textbook(s):

Subject	Author	Title
Anatomy	Weir & Abraham	Imaging Atlas of Human Anatomy, 5 th Ed.
Cardiology	Fuster, Harrington, Narula & Eapen	Hurst's The Heart, 14 th Ed.
Cell & Molecular Biology	Alberts, Bray, Hopkin, Johnson, Lewis, Raff, Rober	Essential Cell Biology, 4 th Ed.
Clinical Medicine (Adult)	Papadakis, McPhee & Rabow	Current Medical Diagnosis and Treatment 2018
Clinical Medicine (Pediatrics)	Kliegman & Stanton	Nelson Textbook of Pediatrics, 20 th Ed.
Endocrinology	Feldman, Christensen & Satterfield	Greenspan's Basic & Clinical Endocrinology, 10 th Ed.
Genetics	Thompson & Thompson	Genetics in Medicine, 8 th Ed.
Obstetrics & Gynecology	Hacker, Gambone & Hobel	Essentials of Obstetrics & Gynecology, 6 th Ed.

Online Resources:

For those who prefer online/multimedia resources, the following also frequently provide helpful material--

- UpToDate (available to you via AccessMedicine)
- Ovid (available to you via AccessMedicine)
- Khan Academy Medicine (available on YouTube)

Attendance:

Lecture/Learning Activity Attendance--

Learning session (lectures, large group discussions, etc.) attendance is highly recommended, and laboratory sessions are mandatory. Sessions labeled as mandatory on the course calendar are required.

Sign-in sheets or electronic attendance will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets or electronic tracking will be collected 5 minutes after the activity begins. Certain excused absences are allowed (please see Excused Absence Policy).

The following procedure(s) will be employed for breeches of these course requirements.

1. Administrative/Support staff will notify the course director(s) and Assistant Dean of Academic Affairs.
2. A note will be placed in the student's file.
3. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE.
4. Persistent lapses in attendance will require the student to appear before the Student Promotions Committee.

Exams and Grading/Assessment:

▪ Formative--

- This course will have one (1) in-class 50-item exam on Monday, 20 August, 8-11AM.
- This course will have one (1) individual quiz and one (1) group quiz on Wednesday, 8 August, 8-10AM, as part of the Renal Tubular Function TBL.
- This course will have one (1) quiz on Friday, 17 August, 10AM-noon, as part of the Serum & Urine Evaluations of Renal Function Workshop.

▪ Summative--

- One (1) NBME 50-question mid-course examination on Monday of the fourth week of the course. This will be delivered in a hybrid exam format--an individual exam followed by a team effort on the same exam.
- One NBME 100-question comprehensive final examination on Monday of the final week of the course.
- Clinical Cases : Four (4) ~2-hr sessions devoted to presentation and discussion of Clinical Cases; attendance at these sessions is mandatory. Students will work in groups of five and student presentations will be graded using a provided rubric.
- Clinical Case-Based Learning: Three sessions of 2 hours each, devoted to self-directed learning following a problem-based learning format.
- **Special Student Assignments:**
 - During the course, there will be “special assignments” – assignments and seminars. These are mandatory and score on submitted work will count towards the final course grade.
 - Assignment based on Research Ethics (Big Data) Workshop in Week 2
 - Assignment/quiz based on Hypertension Workshop in Week 4

▪ Total Course Score and Grading--

The total numeric score for the course will be measured as follows, which translates to recording a passing grade if 70 or above, and an honors grade if 90 or above.

#	Components	%	Notes/Explanation
1	Mid-Course Summative NBME Exam; 8/27/18	30	50 Multiple Choice Questions (MCQs) – (<i>hybrid exam, weighted 75:25 individual score : team score</i>)
2	End of Course Final Comprehensive NBME Summative Exam; 9/10/18	62	100 MCQs (individual exam; <u>not</u> a hybrid exam).
3	Clinical Case Submissions (CC): Students are expected to successfully complete in order to pass the course.	0	Refer to description below
4	Clinical Case Based Learning (CCBL): Students are expected to successfully complete in order to pass the course.	0	Refer to description below
5	Nutrition Module: Students are expected to successfully complete assigned nutrition module at NIDDK online. Due 09/12/18 at 5:00PM PT —must be submitted in order to pass the course.	0	For this course, you are expected to review the online module and complete the assigned activities (see material posted to Canvas). You must provide the Course Director with proof of completion by 5:00:00 PM PT on Wednesday, 9/12/18, in order to pass the course.
6	Renal Tubular Function TBL; 08/08/2018	2	5-10 item individual and group quizzes in class
7	Serum & Urine Evaluations of Renal Function Workshop QUIZ; 08/17/2018	2	5-10 item quiz in class
8	Research Ethics (Big Data) Workshop; 08/21/2018	2	Graded assignment to be submitted at end of session
9	Hypertension Workshop; 08/28/2018	2	Graded assignment to be submitted at end of session
10	Think Tank(TT) Sessions; 08/10/18, 08/24/18, 08/31/18	0*	*Up to two (2) bonus points to be added to final grade for attendance and participation in all three (3) TT sessions.
11	Self- and Peer-Evaluations of Teamwork; week 4	0	Must be submitted to pass the course

Formative and summative NBME exams score reports will be available 3-days after the exam; it is the student's responsibility to contact Course Director to obtain their individual score report.

Any additional (retesting) exams will be at the expense of the student.

The successful completion of the course is based on demonstrating high standards of ethical and professional behavior, as well as passing both the Final Comprehensive NBME Summative Exam **AND** the course with a grade of 70% or higher.

- **Grading percentages--**

Passing grade requires a total score of 70% or higher

Honors grade requires a total score of 90% or higher

****If earned, bonus points from Think Tank sessions will be added to the overall course score to determine a final grade and will not be applied to the score on the summative exams or any other specific assessment.**

- **Remediation--**

Students failing the course will be referred to the Student Promotion Committee (SPC) and a custom tailored remediation plan will be developed.

Description of Clinical Cases and Clinical Case Based Learning:

Clinical Cases (CC's) and Clinical Case Based Learning (CCBL's) are designed to promote the development of teamwork, professionalism, and evidence-based patient management skills that integrate the basic and clinical sciences.

- **Clinical Cases--**During the M1 year, following a faculty-led Clinical Presentation (CP) lecture, the students will receive a PowerPoint presentation that contains the subjective (including the Chief Complaint, History of Present Illness, and Past Medical History) and objective (including the Physical Examination) findings for a hypothetical patient who presents with a complaint aligned with the CP lecture. As they assimilate basic and clinical science content throughout the week's lectures, students will work in assigned groups to complete a series of template slides included in the PowerPoint presentation. At the end of the week, each student group will submit its final presentation for a grade. One group in each college (on a preassigned, rotating basis) will present the case to their College for discussion. Each group will submit their case presentation for grading using a defined rubric by a rotating faculty member. Grading will be Pass/Needs Improvement/Fail.

During the M2 year, the process will be similar except that during/immediately after the CP, students will develop learning objectives based on the case presented. At the end of the week, groups will present a SOAP note and their Learning Objective to their College. The College Master will be responsible for grading and feedback. Grading will be Pass/Needs Improvement/Fail.

- **Clinical Case-Based Learning (CCBL)** is an integrated, Problem-Based Learning modality that affords student self-directed learning in the context of a clinical case setting. Each week-long case is sequentially revealed over the course of three two-hour sessions. Students work in groups of about nine. For each case, each student will provide at least one teaching presentation

to the group – this should be a PowerPoint slide set that includes citations for all images used and an *annotated* list of references from textbooks and the primary literature. Students are expected to offer constructive feedback on these presentations. The group will devise their own session learning objectives on Day 1 of each week; these will be the topics presented orally on Day 2. CCBL group assignment will remain stable for an entire academic year, to allow longitudinal formative feedback from facilitators, and to foster periodic peer- and self-assessment. Case Learning Objectives comprise material that may be tested in NBME course exams. All sessions are mandatory and timely arrival is expected in order for students to earn a grade of PASS for this component of a course; grading will be Pass/Fail. When feasible, CCBL sessions will occur at least once in each non-experiential course.

Anatomy Laboratory Rules:

**There are no gross anatomy labs in the 2018 Urinary System Course

Student Evaluations of Course and Faculty:

Students are required to complete these evaluations during the assigned mandatory session on the course calendar. Course evaluations will be scheduled in the course calendar for the last Friday of instruction. The goal for course evaluations is 100% participation. In the event that there is less than 90% class participation, grades will be withheld, by both the Course Director and the Registrar, for the entire class until the 90% participation level is reached.

Students will be expected to comply with all CNU and COM policies.

Weekly Course Calendars

Week 1

Renal (Urinary) System					
Week: 1 - CP(s): FI & Elect Imbalance; AKI, Sim					
	Monday	Tuesday	Wednesday	Thursday	Friday
	8/6/2018	8/7/2018	8/8/2018	8/9/2018	8/10/2018

Disclaimer about changes in Syllabus and Course Calendar

Every effort will be made to adhere to the contents of this syllabus. However, this document is subject to changes in the event of unforeseen, extenuating circumstances. Students will be notified as soon as possible if changes in the syllabus become necessary.

Course Teaching Faculty**Week 5**

Name/Degree	Rank/Title
Ghaith Aleyd, MD, MSC, PhD	Associate Professor of Pathology
*Nripendra Dhillon, MD	Associate Professor of Anatomy
Guy diSibio, MD, PhD	Associate Professor of Pathology, Physiology, Genetics and Genomics
*Nehad El-Sawi, PhD	Professor of Microbiology, Immunology and Cell Biology
Louise Glaser, MD, FAAP	Clinical Associate Professor
Nazila Hejazi, MD	Assistant Professor of Pathology
*Susan Ely, PhD	Professor of Immunology, Microbiology and Molecular Biology
Alan Ernst, PhD	Assistant Professor of Anatomy
Darilyn Falck, MD, FACEP	Associate Professor of Emergency Medicine
*Valerie Gerriets, PhD	Assistant Professor of Pharmacology
Laura Hoffman, MD, PhD	Associate Professor of Endocrinology
Rudolph Holguin, MD	Associate Professor of Emergency Medicine
Ishwarlal Jialal, MD, MBCHB	Professor of Physiology, Metabolism and Pathology
Sheryl Krig, PhD	Assistant Professor of Biochemistry
Forshing Lui, MD	Professor of Clinical Neurology
*Rajendra Ramsamooj, MD	Professor of Pathology, Surgical Pathology and Clinical Skills
Leonard Ranasinghe, MD, PhD	Professor of Medical Education and Emergency Medicine
Joseph Rogers, MD, FAAP, BCCEM	Professor of Medicine
Joseph Silva, MD, MACP	Professor of Internal Medicine and Infectious Diseases
*Tracy L. Yarbrough, PhD, MD, MAED	Associate Professor of Physiology

***Course Committee**

Open Door Policy: Course faculty have an open door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time

Volunteer Community Faculty (if applicable)
Name/Degree
James Lee, MD
George Meyer, MD
Mary Pat Pauly, MD

Communication with volunteer community faculty must be channeled through the course director.

Course Description:

This unit will cover the structures and functions of the organs of the gastrointestinal tract, as well as the auxiliary organs critical for digestive processes including the pancreas and liver. The behavior of this complex system of organs will be considered in normal health and in a variety of GI, hepatic, and metabolic disorders. The clinical presentations (CPs) within the GI Unit will be focused on the following common situations and presentations that a primary care physician will experience:

- Dysphagia, Vomiting & Nausea
- Constipation/Stool Incontinence, Abdominal pain
- Diarrhea
- Abdominal Distension, Abdominal Mass, Abdominal Pain, GI bleeding
- Jaundice
- Abnormal Liver Functions

The clinical presentations are accompanied by a clinical algorithm, a clinical reasoning guide and objectives lists. Clinical faculty members will emphasize critical decision points, setting the framework for the integration of the basic sciences. Following the clinical presentation, basic science faculty members will introduce the foundational concepts in each of the traditional basic sciences. Four of the clinical presentations will conclude with an interactive session on differential diagnosis by a gastroenterologist. Students will participate in worked case example sessions at the end of three of the clinical presentations and one clinical case based learning.

Additionally, students will participate in the longitudinal courses of Medical Skills and Masters Colloquium that run concurrently with Gastrointestinal system course.

Course Objectives:

By the conclusion of this course, the student will demonstrate the ability to:

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Identify the major organs, tissues, and cell types of the GI tract, including auxiliary organs and their basic functions in the process of digestion and absorption.	2
2	Explain the molecular and cellular bases of the physiological processes of motility, secretion, digestion and absorption.	2
3	Explain the endocrine and neural feedback control mechanisms that regulate motility-secretion, digestion and absorption.	2
4	Explain how genetic variations and diseases alter the structural properties of the GI tract.	2
5	Apply knowledge of diagnostic tools, normal and pathologic processes, infections, pharmacokinetics, and pharmacodynamics to guide the safe and effective treatment of GI disorders.	1 & 2
6	Describe the impact of gender, culture, occupation, physiological factors, environment, ethnic, behavioral considerations, systems and society on the treatment and prevention of GI disorders	3 & 5
7	Demonstrate level-appropriate abilities in communication, interpersonal skills and professionalism in clinical decision making.	3 & 4

Please Note: All session objectives listed ~~Week 5~~ individual sessions (by date and time) are mapped to the course objectives.

Key: PLO = Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations:

Two large lecture halls, each with a seating capacity of 180 students, will be used for the basic science sessions. Eight small classrooms/college rooms, each with a capacity for 25 students and the Simulation Center space are available for small group sessions. A large gross anatomy laboratory with capacity for cadaver dissections, where a group of students will be assigned to each cadaver, is available for anatomy dissection.

Lecture/Session Duration: All lectures on the calendar as one hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Teaching/Learning Methodology: Case-Based instruction/Learning

- Case-Based instruction/Learning
- Demonstration
- Discussion, Large group
- Discussion, Small Group
- Independent Learning
- Laboratory
- Lecture
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Self-Directed Learning

Online Materials – Canvas: Canvas is California Northstate University's Learning Management System.) Use your CNU NETID and password.

Turning Point: Every Phase A student was given a Turning Point Clicker during Orientation. **Please bring the Clicker to class at all times.**

Library/Learning Resources

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This program includes an initial 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Required Textbook(s), Material(s) and Equipment:

Subject	Author Week 5	Title
Anatomy	Moore, Dalley & Augur	Clinically Oriented Anatomy 8e
Biochemistry	Lieberman	Marks' Basic Medical Biochemistry: A Clinical Approach 4e
Genetics	Nussbaum, McInnes & Willard	Thompson & Thompson Genetics in Medicine 8e
Internal Medicine	Kasper, Fauci, Hauser, Longo, Jameson & Loscalzo	Harrison's Internal Medicine
Immunology	Paraham	The Immune System 4e
Microbiology	Engleberg	Schaechter's Mechanisms of Microbial Disease 5e
Physiology	Hall	Guyton and Hall Textbook of Medical Physiology 13e

Recommended Textbook(s):

Subject	Author	Title
Anatomy Atlas (Pick any one that suits your learning style)	ISBN-13:978-1455704187	Netter's Atlas of Human Anatomy 6 th e
	ISBN-13:978-1626232525	Gilroy's Atlas of Anatomy 3 rd e

Pathology	Kumar, Vinay, Abul Abbas & Aster	Robins & Cotran Pathologic Basis of Diseases 9e
Pharmacology	Bardal	Applied Pharmacology
	Katzung & Trevor	Basic & Clinical Pharmacology 13e

Attendance

Lecture attendance is highly recommended, and laboratory sessions are mandatory. Sessions labeled as mandatory on the course calendar are required.

Sign-in sheets or electronic attendance will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets or electronic tracking will be collected 5 minutes after the activity begins. Certain excused absences are allowed (please see Excused Absence Policy).

The following procedure(s) will be employed for breeches of these course requirements.

Week 5

1. Administrative/Support staff will notify the course director(s) and Assistant Dean of Student Affairs
2. A note will be placed in the student's file
3. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE.
4. Persistent lapses in attendance will require the student to appear before the Student Promotions Committee.

Exams and Grading/Assessment:

▪ **Formative**

- One in-class formative USMLE Step 1; 50 questions multiple-choice examination. This will be held on Monday morning of week 3. NOTE: This exam will be administered in a *hybrid* format. Namely, students will take a 50-item exam and submit their answers individually first, and will then take a second 50-item exam in teams (only one set of responses will be submitted for each team, and all members of a team will receive the same grade).

▪ **Summative**

- One USMLE Step 1 format, 50 multiple-choice question, mid-course examination on the Monday of the fourth week of the course. NOTE: This exam will be administered in a *hybrid* format. Namely, students will take a 50-item exam and submit their answers individually first, and will then take a second 50-item exam in teams (only one set of responses will be submitted for each team, and all members of a team will receive the same grade).
- One USMLE Step 1 format, 100 multiple-choice question, comprehensive final examination at the end of the course (on Monday of exam week).
- An anatomy laboratory practical exam
- Clinical Cases : Three ~2-hr sessions devoted to presentation and discussion of Clinical Cases will be offered; attendance at these sessions is mandatory. Students will work in group of five and student presentations will be graded using a rubric.
- Clinical Case-Based Learning: Three sessions of 2-hours each devoted to self-directed learning following problem-based learning format.
- **Special Bonus Points Student Assignment:**
 - Completion of Centers for Disease Control and Prevention (CDC), Association of American Medical Colleges (AAMC) module on :Navigating a Foodborne Outbreak: Preparation for Interprofessional Practice

Week 5

Total Course Score and Grading:

The total numeric score for the course will be measured as follows, which translates to recording a passing grade if 70 or above, and an honors grade if 90 or above.

#	Components	%	Notes/Explanation
1	Mid-Course Summative NBME Exam	15	Hybrid exam individual score
		5	Hybrid exam team score
2	End of Course Final Comprehensive NBME Summative Exam	60	This is a traditional individual exam (<u>not</u> a hybrid exam)
3	Anatomy Laboratory Practical	20	
4	Clinical Case Presentations (CC) Students are expected to successfully complete in order to pass the course.	0	Refer to description below
5	Clinical Case Based Learning (CCBL) Students are expected to successfully complete in order to pass the course.	0	Refer to description below
6	CDC/AAMC bonus points online module on “Navigating a Foodborne Outbreak: Preparation for Interprofessional Practice” Log on to the module: a. navigatinganoutbreakmodule.org b. Register by clicking link to bottom of login box. c. Access the learning module by using your registered email address and password.	*0	* Three (3) bonus points to be added to final grade after submission of proof of completion to the Course Director by 5:00:00 PM PT on Wednesday, 10/31/18, in order to receive the bonus points. Refer to module description below

Formative and summative NBME exams score reports will be available 3-days after the exam; it is the student responsibility to contact Course Director to obtain their individual score report.

Any additional (retesting) exams will be at the expense of the student.

The successful completion of the course is based on demonstrating high standards of ethical and professional behavior, as well as, passing both the Final Comprehensive Summative Exam **AND** the course with a grade of 70% or higher.

Grading percentages

Passing grade requires a total score of 70% or higher

Honors grade requires a total score of 90% or higher

**** if earned, bonus points from CDC/AAMC online module will be added to the overall course score to determine a final grade and will not be applied to the score on the summative exams or any other specific assessment.**

Remediation

Students failing the course will be referred to the Student Promotion Committee (SPC) and a custom tailored remediation plan will be developed.

Description of Clinical Cases and Clinical Case Based Learning

Clinical Cases (CC's) and Clinical Case Based Learning (CCBL's) are designed to promote the development of teamwork, professionalism, and evidence-based patient management skills that integrate the basic and clinical sciences.

During the M1 year, following a faculty-led Clinical Presentation (CP) lecture, the students will receive a PowerPoint presentation that contains the subjective (including the Chief Complaint, History of Present Illness, and Past Medical History) and objective (including the Physical Examination) findings for a hypothetical patient who presents with a complaint aligned with the CP lecture. As they assimilate basic and clinical science content throughout the week's lectures, students will work in assigned groups to complete a series of template slides included in the PowerPoint presentation. At the end of the week, each student group will submit its final presentation for a grade. One group in each college (on a preassigned, rotating basis) will present the case to their College for discussion. Each group will submit their case presentation for grading using a defined rubric by a rotating faculty member. Grading will be Pass/Needs Improvement/Fail.

During the M2 year, the process will be similar except that during the CP, students will develop learning objectives based the case presented. At the end of the week, each group will present a SOAP note and their Learning Objective to their College. The College Master will be responsible for grading and feedback. Grading will be Pass/Needs Improvement/Fail.

Clinical Case-Based Learning (CCBL) is an integrated, Problem-Based Learning modality that affords student self-directed learning in the context of a clinical case setting. Each week-long case is sequentially revealed over the course of three two-hour sessions. Students work in groups of about nine. For each case, each student will provide at least one teaching presentation to the group – this should be a PowerPoint slide set that includes citations for all images used and an *annotated* list of references from textbooks and the primary literature. Students are expected to offer constructive feedback on these presentations. The group will devise their own session learning objectives on Day 1 of each week; these will be the topics presented orally on Day 2. CCBL group assignment will remain stable for an entire academic year, to allow longitudinal formative feedback from facilitators, and to foster periodic peer- and self-assessment. Case Learning Objectives comprise material that may be tested in NBME course exams. All sessions are mandatory and timely arrival is expected in order for students to earn a grade of PASS for this component of a course; grading will be Pass/Fail. When feasible, CCBL sessions will occur at least once in each non-experiential course.

Description of Navigating a Foodborne Outbreak: Preparation for Interprofessional Practice on-line module

Week 5

It is a self-paced, interactive learning module that demonstrates the importance of interprofessional practice among health professionals to improve and protect population health in the context of a foodborne outbreak.

The module will take approximately 90 minutes – two hours, depending on the level of previous exposure to the content and your interest in exploring the optional reference resources. You may choose to complete the module in one session or pause and return to the module, completing it in multiple sessions. The module is divided into three chapters – one set in an outpatient clinic, one at a local public health department, and one at a multidisciplinary meeting after the outbreak has resolved. The foodborne illness scenario is based on actual multi-state foodborne outbreak that occurred in 2015-16, but the details of the patients, clinicians, and the local health department are fictional. Any similarities to individuals or settings are coincidental.

You will take a preliminary quiz to assess your knowledge of the content before beginning the module and will complete a quiz after completing the module to evaluate what you have learned. You will receive a digital certificate upon completion of the module.

The module was developed collaboratively by the four national associations that comprise the Centers for Disease Control and Prevention's (CDC) Academic Partnerships to Improve Health (APIH) initiative with expertise, guidance, and funding provided by CDC. The APIH associations are: American Association of Colleges of Nursing; Association for Prevention Teaching and Research; Association of American Medical Colleges; and Association of Schools and Programs of Public Health.

Anatomy Laboratory Rules

An appreciation of the significance of the anatomical gift is important to ensure our continuing respect for the altruism of our donors. The UC Davis and UC San Francisco willed body programs foster a learning partnership with CNUCOM in creating an educational relationship between the donor, the teacher, and the student. Dissection is a privilege and an incredible gift from the donors who have chosen to give so that we may learn.

Some may feel uneasy and anxious at the prospect of first dealing with cadavers; this is a natural response inasmuch as dealing with death is not always easy. Talk about your feelings with the faculty. Share them with your peers. Generations of students have experienced similar emotions and conversation helps calm our apprehensions.

In compliance with State and Federal regulations, and in the interest of your personal safety, you are required to follow these rules of the anatomy lab:

1. The donors are to be treated with dignity and utmost respect at all times. Crude or inappropriate remarks could result in dismissal from the lab.
2. Similar to medical settings, the discussion of donors or lab practices outside of the lab is inappropriate unless it is for the express purpose of study or learning. The nature of the learning

process within the lab can be upsetting to the general public, so always be mindful of who could be listening to conversations.

Week 5

3. The anatomical materials from a donor are a precious resource, and a protected resource. Under no circumstances shall anatomical material be taken from the laboratory.
4. Each donor is sent with an identification tracking number and device. This number and/or device must remain affixed to the specimen throughout its use until its return to the willed body program. All information regarding the donor is confidential.
5. Fluid Disposal: There are containers in the room for fluid collection. If any are full, let the anatomy lab technician know.
6. Trash: Please dispose of any soiled gloves, paper towels, aprons, or other supplies in the RED trashcans. When you see the trash cans are near to being full, please let the anatomy lab technician know.
7. Dissected Tissue: Any bits of skin, fat or other human tissues must be disposed of in the WHITE buckets at your table. Please do not put any other items in these buckets. If this can is nearing capacity, please let the anatomy lab technician know. Such items from each donor are put in separate plastic bags with the ID# of the donor, kept in cold storage, and returned with other remains of the donor at the time of cremation.
8. The anatomy lab is under video surveillance, and is monitored for entry through identification badge scans. The person using the identification badge is responsible for all people who enter with them. Please request the identity of any person who is unknown to you.
9. All equipment and models within the anatomy lab are identified and monitored. No equipment or models are allowed to leave the anatomy lab without permission.
10. To protect the dignity and privacy of the donor, the face or any other identifying feature of the case shall never be publicly displayed. This includes display to students, staff, visitors and faculty not participating in the intended use of the material.
11. Horseplay within the lab is strictly prohibited.
12. The use of cell phones and photography by students is not allowed.
13. Universal precautions must be followed: Wear protective clothing/lab coat and gloves at all times while dissecting, and protective eyewear when there is a risk of splash.
14. If you use contacts, it is highly recommended that you wear glasses when in lab.
15. If you have a chemical sensitivity let a member of your faculty know; they will assist you in purchasing a respirator and will train you to use it.
16. No food, drink, or chewing gum or applying cosmetics is permitted in the laboratory.
17. No open toed shoes are allowed. Your shoes should protect your feet from accidental chemical drip and injury from falling sharps. Your shoes should provide sufficient traction for use in a lab

where the floor has the possibility of being slippery. It is recommended that you have a pair of shoes for lab use only.

Week 5

18. Shorts or skirts are not permitted (please see the Student Handbook Dress code policy for Anatomy Lab).

19. Students with long hair need to have it pulled back and tied.

20. Sharps Safety: Always use hemostats or a blade-removal tool to remove a scalpel blade from its handle. Used blades must be disposed in the provided sharps containers.

21. Dissection equipment: All the items you should need are provided for you. Please remember to wash and dry the instruments at the end of each session so they do not rust.

22. Prevent desiccation by using wet cheesecloth to cover your donors as needed. Remember to always use wetting solution to moisten dissected parts otherwise it will dry your dissection! Wetting solution contains chemicals that can cause irritation and burns. Use it with care.

23. When leaving the lab, please remember to properly wrap and moisten your cadaver. This is essential! The table covers should be closed, and the lab doors should be locked behind you.

For additional information, please contact:

Nripendra Dhillon, MBBS, MS: (707) 864-6362

Sailabala Vanguri, MD: (916) 686-7965

Student Evaluations of Course and Faculty

Student Evaluations of the Course and Faculty: Students are required to complete these evaluations during the assigned mandatory session on the course calendar. Course evaluations will be scheduled in the course calendar for the last Friday of instruction. The goal for course evaluations is 100% participation. In the event that there is less than 90% class participation, grades will be withheld, by both the Course Director and the Registrar, for the entire class until the 90% participation level is reached.

Students will be expected to comply with all CNU and COM policies

Week 5

Week 5

Gastrointestinal System

COM 521 - MS2 Fall 2018-19

9/17/18 - 11/2/18

11/8/2018

Weeks	Date	Time	Title	Faculty
Week 1				
	Monday, 9/17/18	8:00 - 12:00 pm	SELF STUDY	
	Monday, 9/17/18	12:00 - 1:00 pm	LUNCH	
	Monday, 9/17/18	1:00 - 1:30 pm	Introduction to the Gastrointestinal System	El-Sawi
	Monday, 9/17/18	1:30 - 2:30 pm	CP: Dysphagia	Holguin
	Monday, 9/17/18	2:30 - 3:30 pm	CP: Vomiting & Nausea	Holguin
	Monday, 9/17/18	3:30 - 4:30 pm	Mandatory: Clinical Case Development	Glaser
	Monday, 9/17/18	4:30 - 5:00 pm	SELF STUDY	
	Tuesday, 9/18/18	8:00 - 10:00 am	SELF STUDY	
	Tuesday, 9/18/18	10:00 - 12:00 pm	Medical Skills - Group 3	MS
	Tuesday, 9/18/18	12:00 - 1:00 pm	LUNCH

	Monday, 9/24/18	8:00 - 10:00 am	SELF STUDY	
	Monday, 9/24/18	10:00 - 11:00 am	CP: Constipation/Stool Incontinence	Ranasinghe
	Monday, 9/24/18	11:00 - 12:00 pm	Mandatory: CP: Abdominal Pain	James Lee
	Monday, 9/24/18	12:00 - 1:00 pm	LUNCH	
	Monday, 9/24/18	1:00 - 1:30 pm	Mandatory: Clinical Case Development	Glaser
	Monday, 9/24/18	1:30 - 2:30 pm	Small & Large Bowel Motility	Rogers
	Monday, 9/24/18	2:30 - 3:30 pm	GI Hormones, Neurotransmitters & Neuromodulators	Rogers
	Monday, 9/24/18	3:30 - 4:30 pm	Anterior Abdominal Wall	Dhillon
	Monday, 9/24/18	4:30 - 5:00 pm	SELF STUDY	
	Tuesday, 9/25/18	8:00 - 10:00 am	SELF STUDY	
	Tuesday, 9/25/18	10:00 - 12:00 pm	Medical Skills - Group 1 / Mandatory: Histology Lab: Stomach & Intestines	Ramsamooj
	Tuesday, 9/25/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 9/25/18	1:00 - 3:00 pm	Medical Skills - Group 2 / Mandatory: Histology Lab: Stomach & Intestines	Ramsamooj
	Tuesday, 9/25/18	3:00 - 5:00 pm	Medical Skills - Group 3 / Self Study	
	Wednesday, 9/26/18	8:00 - 10:00 am	SELF STUDY	
	Wednesday, 9/26/18	10:00 - 12:00 pm	Masters Colloquium	
	Wednesday, 9/26/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 9/26/18	1:00 - 3:00 pm	Pathology of Stomach including H pylori infection	Ramsamooj
	Wednesday, 9/26/18	3:00 - 4:00 pm	Pharmacologic Management of Peptic Ulcer and Gastritis	Gerriets
	Wednesday, 9/26/18	4:00 - 5:00 pm	Pharmacologic Management of Constipation	Gerriets
	Thursday, 9/27/18	8:00 - 9:00 am	Visceral Sensory Pathways, Referred Pain, Abdominal Pain	Lui
	Thursday, 9/27/18	9:00 - 12:00 pm	Mandatory: Anatomy Lab - Group A / Self Study	
	Thursday, 9/27/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 9/27/18	1:00 - 2:00 pm	Digestion & Absorption	Krig
	Thursday, 9/27/18	2:00 - 5:00 pm	Mandatory: Anatomy Lab - Group B / Self Study	

	Friday, 9/28/18	8:00 - 10:00 am	MANDATORY: Clinical Cases	
	Friday, 9/28/18	10:00 - 11:00 am	Mandatory: Differential Diagnosis Abdominal Pain	Pauly
	Friday, 9/28/18	11:00 - 12:00 pm	SELF STUDY	
	Friday, 9/28/18	12:00 - 1:00 pm	LUNCH	
	Friday, 9/28/18	1:00 - 5:00 pm	SELF STUDY	
Week 3				
	Monday, 10/1/18	8:00 - 11:00 am	Mandatory: Formative MCQ Exam	
	Monday, 10/1/18	11:00 - 12:00 pm	SELF STUDY	
	Monday, 10/1/18	12:00 - 1:00 pm	LUNCH	
	Monday, 10/1/18	1:00 - 2:00 pm	CP: Diarrhea	James Lee
	Monday, 10/1/18	2:00 - 3:00 pm	Abnormalities of digestion or absorption: Malabsorption & Intolerance of Foods	Krig
	Monday, 10/1/18	3:00 - 4:00 pm	Peritoneal Cavity & Vasculature	Dhillon
	Monday, 10/1/18	4:00 - 5:00 pm	SELF STUDY	
	Tuesday, 10/2/18	8:00 - 10:00 am	SELF STUDY	
	Tuesday, 10/2/18	10:00 - 12:00 pm	Medical Skills - Group 2 / Self Study	
	Tuesday, 10/2/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 10/2/18	1:00 - 3:00 pm	Medical Skills - Group 3 / Self Study	
	Tuesday, 10/2/18	3:00 - 5:00 pm	Medical Skills - Group 1 / Self Study	
	Wednesday, 10/3/18	8:00 - 11:00 am	SELF STUDY	
	Wednesday, 10/3/18	11:00 - 12:00 pm	Fluid & Electrolyte Absorption; Secretory Diarrhea; toxins, Osmotic Diarrheas, Steatorrhea	Yarbrough
	Wednesday, 10/3/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 10/3/18	1:00 - 2:00 pm	Mucosal Immunity	Ely
	Wednesday, 10/3/18	2:00 - 4:00 pm	Infectious Causes of Nausea, Vomiting & Diarrhea I & II	El-Sawi
	Wednesday, 10/3/18	4:00 - 5:00 pm	Malabsorption; Irritable Bowel Syndrome	Ramsamooj
	Thursday, 10/4/18	8:00 - 9:00 am	Gastrointestinal Infections	Silva
	Thursday, 10/4/18	9:00 - 12:00 pm	Mandatory: Anatomy Lab - Group B / Self Study	
	Thursday, 10/4/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 10/4/18	1:00 - 2:00 pm	Dysphagia, Xerostomia, Antiemetics & Prokinetics Pharmacology and Principles	Ibrahim
	Thursday, 10/4/18	2:00 - 5:00 pm	Mandatory: Anatomy Lab - Group A / Self Study	
	Friday, 10/5/18	8:00 - 9:00 am	Infectious Causes of Nausea, Vomiting & Diarrhea III	El-Sawi

	Friday, 10/5/18	9:00 - 11:00 am	Pharmacologic Management of Diarrhea: anti-inflammatory, immunosuppressive and antimicrobial & Antiparasitics	Gerriets
	Friday, 10/5/18	11:00 - 12:00 pm	Week 5 Mandatory: Differential Diagnosis of Diarrhea	George Meyer
	Friday, 10/5/18	12:00 - 1:00 pm	LUNCH	
	Friday, 10/5/18	1:00 - 5:00 pm	SELF STUDY	
Week 4				
	Monday, 10/8/18	8:00 - 12:00 pm	Hybrid Mid-Course MCQ Summative Exam	
	Monday, 10/8/18	12:00 - 1:00 pm	LUNCH	
	Monday, 10/8/18	1:00 - 2:00 pm	CP: Abdominal Distension (including abdominal mass)	Falck
	Monday, 10/8/18	2:00 - 3:00 pm	CP: GI Bleeding	Falck
	Monday, 10/8/18	3:00 - 3:30 pm	Mandatory: Clinical Case Development	Glaser
	Monday, 10/8/18	3:30 - 5:00 pm	Bowel Obstruction; Motility Disorders	Holguin
	Tuesday, 10/9/18	8:00 - 10:00 am	SELF STUDY	
	Tuesday, 10/9/18	10:00 - 12:00 pm	Medical Skills - Group 3 / Mandatory: Histology Lab: Liver, Gall Bladder, Clon, Pancrease - Group 1	Ramsamooj
	Tuesday, 10/9/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 10/9/18	1:00 - 3:00 pm	Medical Skills - Group 1 / Mandatory: Histology Lab: Liver, Gall Bladder, Clon, Pancrease - Group 2	Ramsamooj
	Tuesday, 10/9/18	3:00 - 5:00 pm	Medical Skills - Group 2 / Mandatory: Histology Lab: Liver, Gall Bladder, Clon, Pancrease - Group 3	Ramsamooj
	Wednesday, 10/10/18	8:00 - 10:00 am	SELF STUDY	
	Wednesday, 10/10/18	10:00 - 12:00 pm	Masters Colloquium	
	Wednesday, 10/10/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 10/10/18	1:00 - 2:00 pm	Upper GI Bleeding	Holguin
	Wednesday, 10/10/18	2:00 - 3:00 pm	Lower GI Bleeding	Holguin
	Wednesday, 10/10/18	3:00 - 4:00 pm	Molecular Genetics og GI Tract & Neoplasia I	diSibio
	Wednesday, 10/10/18	4:00 - 5:00 pm	Molecular Genetics oo GI Tract & Neoplasia II	diSibio
	Thursday, 10/11/18	8:00 - 9:00 am	SELF STUDY	
	Thursday, 10/11/18	9:00 - 12:00 pm	Mandatory: Anatomy Lab - Group B / Self Study	
	Thursday, 10/11/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 10/11/18	1:00 - 2:00 pm	Venous Drainage & Porto-caval Anastomoses	Dhillon
	Thursday, 10/11/18	2:00 - 5:00 pm	Mandatory: Anatomy Lab - Group A / Self Study	

	Friday, 10/12/18	8:00 - 10:00 am	MANDATORY: Clinical Cases	
	Friday, 10/12/18	10:00 - 12:00 pm	Antineoplastic Therapy for GI Malignancies	Gerriets
	Friday, 10/12/18	12:00 - 1:00 pm	LUNCH	
	Friday, 10/12/18	1:00 - 5:00 pm	SELF STUDY	
Week 5				
	Monday, 10/15/18	8:00 - 10:00 am	SELF STUDY	
	Monday, 10/15/18	10:00 - 12:00 pm	Mandatory: CCBL Session 1	
	Monday, 10/15/18	12:00 - 1:00 pm	LUNCH	
	Monday, 10/15/18	1:00 - 2:00 pm	CP: Jaundice	Jialal
	Monday, 10/15/18	2:00 - 3:00 pm	Jaundice	Krig
	Monday, 10/15/18	3:00 - 4:00 pm	Exocrine Pancrease & Hepatobiliary secretions	Hoffman
	Monday, 10/15/18	4:00 - 5:00 pm	Liver and Posterior Abdominal Wall	Dhillon
	Tuesday, 10/16/18	8:00 - 10:00 am	SELF STUDY	
	Tuesday, 10/16/18	10:00 - 12:00 pm	Medical Skills - Group 3/ Self Study	
	Tuesday, 10/16/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 10/16/18	1:00 - 3:00 pm	Medical Skills - Group 1 / Self Study	
	Tuesday, 10/16/18	3:00 - 5:00 pm	Medical Skills - Group 2 / Self Study	
	Wednesday, 10/17/18	8:00 - 10:00 am	SELF STUDY	
	Wednesday, 10/17/18	10:00 - 12:00 pm	Mandatory: CCBL Session 2	
	Wednesday, 10/17/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 10/17/18	1:00 - 2:00 pm	Liver Metabolism	Krig
	Wednesday, 10/17/18	2:00 - 3:00 pm	Pathology of Pancrease & Pancreatic Disease I	Ramsamooj
	Wednesday, 10/17/18	3:00 - 4:00 pm	Pathology of Pancrease & Pancreatic Disease II	Ramsamooj
	Wednesday, 10/17/18	4:00 - 5:00 pm	SELF STUDY	
	Thursday, 10/18/18	8:00 - 9:00 am	Ascites and GI/Hepatic hemodynamics	Yarbrough
	Thursday, 10/18/18	9:00 - 12:00 pm	Mandatory: Anatomy Lab - Group A / Self Study	
	Thursday, 10/18/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 10/18/18	1:00 - 2:00 pm	Non-Neoplastic Hepatic Pathology I	Aleyd
	Thursday, 10/18/18	2:00 - 5:00 pm	Mandatory: Anatomy Lab - Group B / Self Study	

	Friday, 10/19/18	8:00 - 10:00 am	Mandatory: CCBL Session 3	
	Friday, 10/19/18	10:00 - 12:00 pm	SELF STUDY	
	Friday, 10/19/18	12:00 - 1:00 pm	LUNCH	
	Friday, 10/19/18	1:00 - 5:00 pm	SELF STUDY	
Week 6				
	Monday, 10/22/18	8:00 - 12:00 pm	SELF STUDY	
	Monday, 10/22/18	12:00 - 1:00 pm	LUNCH	
	Monday, 10/22/18	1:00 - 2:00 pm	CP: Abnormal LFT's	Lui
	Monday, 10/22/18	2:00 - 3:00 pm	Non-Neoplastic Hepatic Pathology II	Aleyd
	Monday, 10/22/18	3:00 - 5:00 pm	Gallbladder & Neoplastic Hepatic Pathology	Ramsamooj
	Tuesday, 10/23/18	8:00 - 10:00 am	SELF STUDY	
	Tuesday, 10/23/18	10:00 - 12:00 pm	Medical Skills - Group 2 / Self Study	
	Tuesday, 10/23/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 10/23/18	1:00 - 3:00 pm	Medical Skills - Group 3 / Self Study	
	Tuesday, 10/23/18	3:00 - 5:00 pm	Medical Skills - Group 1 / Self Study	
	Wednesday, 10/24/18	8:00 - 10:00 am	SELF STUDY	
	Wednesday, 10/24/18	10:00 - 12:00 pm	Masters Colloquium	
	Wednesday, 10/24/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 10/24/18	1:00 - 2:00 pm	Toxic Effects of Drugs & Alcohol on liver	Gerriets
	Wednesday, 10/24/18	2:00 - 3:00 pm	Viral Hepatitis: Acute & Chronic	El-Sawi
	Wednesday, 10/24/18	3:00 - 4:00 pm	The Gut and the Microbiome	Ernst
	Wednesday, 10/24/18	4:00 - 5:00 pm	SELF STUDY	
	Thursday, 10/25/18	8:00 - 12:00 pm	SELF STUDY	
	Thursday, 10/25/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 10/25/18	1:00 - 2:00 pm	Pharmacologic Management of Viral Hepatitis	Ibrahim
	Thursday, 10/25/18	2:00 - 3:00 pm	Mandatory: Differential Diagnosis of Abnormal Liver Functions	Pauly
	Thursday, 10/25/18	3:00 - 4:00 pm	Embryology Review	Dhillon
	Thursday, 10/25/18	4:00 - 5:00 pm	SELF STUDY	
	Friday, 10/26/18	8:00 - 10:00 am	SELF STUDY	
	Friday, 10/26/18	10:00 - 11:30 am	GI Course Review	Dhillon, Yarbrough, Ramsamooj, El-Sawi, Gerriets, diSibio

Week 5

Week 7				
	Monday, 10/29/18	8:00 - 12:00 pm	Comprehensive Summative EXAM - NBME - CAS	
	Monday, 10/29/18	12:00 - 1:00 pm	LUNCH	
	Monday, 10/29/18	1:00 - 2:00 pm	EXAM - NBME - CAS	
	Monday, 10/29/18	2:00 - 5:00 pm	SELF STUDY	
	Tuesday, 10/30/18	8:00 - 12:00 pm	Medical Skills Formative OSCE	
	Tuesday, 10/30/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 10/30/18	1:00 - 5:00 pm	Medical Skills Formative OSCE	

Week 5

**2018 – 2019 Academic Year
Endocrine Session Course Syllabus
Course #: 571 and HS 631 (CDM)
Year: II
Semester: Fall**

Course Dates: 11/6/2018 – 12/14/2018

Credits Hours: 4

Course Directors: Mark Sheffield, Jr M.D., PhD
Associate Professor of Clinical Medicine and Physiology
mark.sheffield@cnsu.edu

Floyd Culler, M.D.
Professor of Pediatrics, Endocrinology, and Medical Skills
floyd.culler@cnsu.edu

Every effort will be made to adhere to the contents of this syllabus. However, this document is subject to changes in the event of unforeseen, extenuating circumstances. Students will be notified as soon as possible if changes in the syllabus become necessary.

Course Teaching Faculty

Name/Degree	Rank/Title
Ghaith Al-Eyd, MD	Associate Professor of Pathology
Reem Al Olaby,	Assistant Professor of Biology & Biotechnology
Floyd Culler, MD	Professor of Pediatrics, Endocrinology and Medical Skills
Nripendra Dhillon, MBBS, MS	Associate Professor of Anatomy
Guy diSibio, MD, PhD	Associate Professor of Pathology, Hematopathology, Surgical Pathology, Molecular Genetics, and Medical Skills
Susan Ely, PhD	Professor of Molecular Biology, Immunology and Microbiology
Nazila Hejazi, MD	Assistant Professor of Pathology
Laura Hoffman, MD	Associate Professor of Endocrinology
Sheryl Krig, PhD	Assistant Professor of Biochemistry
Ishwarlal Jialal, MD, MBChB	Professor of Physiology, Metabolism, and Pathology
Rajendra Ramsamooj, MD	Professor of Pathology, Surgical Pathology and Clinical Skills
Mark Sheffield, MD PhD	Associate Professor of Physiology, Endocrinology, and Medical Skills
Sailabala Vanguri, MD	Assistant Professor of Anatomy
Jason Wong, Pharm. D.	Assistant Professor of Pharmacology
Tracy Yarbrough, MD, PhD	Associate Professor of Physiology

Open Door Policy: The course directors have an open door policy and encourages contact from students by e-mail, telephone/voicemail message, and in person, to share impressions, concerns and/or ideas at any time. Course faculty have an open door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time

Lecture/Session Duration: all lectures on the calendar as one hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Communication with volunteer community faculty must be channeled through the course director.

Course Description

The endocrine system acts to coordinate the body's activities using chemical messengers (hormones) that are transported by the circulatory system to influence every cell, organ, and function of our bodies. The foundations of this system are the glands and the hormones they produce. Hormones, as the body's chemical messengers, transfer information and instructions from one set of cells to another and are thereby instrumental in regulating mood, growth and development, cellular and tissue function, metabolism, sexual function and reproductive processes. The course covers the endocrine system and its hormonal products, including (a) the hormone producing cells, (b) synthesis, release and transport of the hormones, (c) the effects of hormones on target cells covering hormone receptors, signal transduction and the mechanisms of hormone action, (d) the intricacies of the hormonal and metabolic feedback regulatory mechanisms, (e) the effects of hormones on physiological processes as well as (f) the diseases caused by inappropriate hormone secretion and function.

The basic science structure of the course (covering anatomy, embryology, histology, biochemistry, genetics, microbiology, immunology, physiology, pathophysiology and pathology) is integrated with clinical correlates through the introduction of Clinical Presentations (CP's) that focus on common presenting clinical situations/complaints that primary care physicians will encounter in their daily practice (see list of CP's below). This format allows introduction of therapeutic principles used in treating endocrine disorders. The course schedule includes five instruction weeks and one week of review and exams. Each instructional week, specific endocrine glandular systems are introduced after a basic science foundation. The use of Clinical Presentations will supply the added context to real medical situations.

In addition, the use of a Clinical Case-Based Learning (CCBL) session will be used to allow further intensive study to a specific endocrine issue. These will consist of student-led small groups with a leader, scribe, and researcher selected. A non-content facilitator will also be present to help guide the session.

Finally, to further enhance student-based learning, some lectures will be presented as "Student Interactive Learning sessions (SILS) emphasizing student-led investigation and communication in place of conventional instructor-led lectures. The students are expected to attend and to take an active role in their small groups. Pre-assigned readings will be provided and a brief quiz will occur at the beginning of each 2 hr. SILS block.

Each week ends with review sessions including NBME-style practice questions. A Midterm exam will be given after two weeks of instruction and will be comprised of 50 NBME questions chosen to relate to material covered in first 2 weeks of the session. At the course conclusion, a comprehensive summative exam of 100 NBME questions will be given.

Course Learning Objectives:

By the conclusion of this course, the student will demonstrate the ability to:

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Identify and describe the macroscopic and microscopic structures of endocrine glands and the embryologic abnormalities leading to disease states.	PLO-2 (MSK1, MSK2)
2	Identify water soluble versus lipid soluble hormones and relate the signaling mechanisms they utilize, especially the feedback control of hormone synthesis and release as well as the crosstalk between the nervous and endocrine systems.	PLO-2 (MSK1, MSK2)
3	Describe the result of over production and underproduction of specific hormones as it relates to health and disease including subtle physical findings.	PLO-2 (MSK1, MSK2, MSK3)
4	Apply knowledge of pharmacokinetics, pharmacodynamics and genetic variability to select optimal hormone and drug therapies for an effective and safe replacement or blockade treatment of hormone-related diseases and conditions.	PLO-2 (MSK1, MSK2, MSK3, MSK4)
5	Explain how gender, ethnic and behavioral considerations may affect risk, etiology, diagnosis, management, prognosis and prevention of endocrine diseases and disorders.	PLO-2 (MSK1, MSK2, MSK3, MSK4)
6	* Demonstrate level-appropriate skills in communication, professionalism and medical/procedural related abilities in dealing with patients, and includes environmental, cultural and societal factors in clinical decision making as it relates to endocrine pathologies.	PLO-1 (PC1, PC2, PC3, PC4, PC5, PC6, PC7); PLO-3 (C1, C2, C3), PLO-4 (P1, P2, P3)

** CLO 6 link to PLO1 will be through Clinical Cases sessions and CCBL sessions*

Please Note: All session objectives listed in the individual sessions (by date and time) are mapped to the course objectives.

Key: PLO = Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations:

Two large lecture halls, each with a seating capacity of 180 students, will be used for the basic science sessions. Eight small classrooms/college rooms, each with a capacity for 25 students and the Simulation Center space are available for small group sessions. A large gross anatomy laboratory with capacity for cadaver dissections, where a group of students will be assigned to each cadaver, is available for anatomy dissection.

Lecture/Session Duration: All lectures on the calendar as one hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Teaching/Learning Methodology:

- Case-Based instruction/Learning
- Concept Mapping
- Conference
- Demonstration
- Discussion, Large group (>12) and Small group (<12)
- Independent Learning
- Laboratory
- Lecture
- Mentorship
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Peer Teaching
- Preceptorship
- Reflection
- Role Play Dramatization
- Self-Directed Learning
- Service Learning Activity
- Simulation
- Team-Based Learning (TBL) and Team Building
- Tutorial
- Workshops

Online Materials – Canvas: Canvas is California Northstate University's Learning Management System.). Use your CNU NETID and password.

Turning Point: Every Phase A student is given a Turning Point Clicker during Orientation.

Please bring the Clicker to class at all times.

Library/Learning Resources

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This program includes an initial 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic

Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Required Textbook(s), Material(s) and Equipment:

Subject	Author	Title
Anatomy	Moore, Dailey, & Agur	Clinically Oriented Anatomy
Biochemistry	Peet, Liebermann, Marks	Mark's Basic Medical Biochemistry
Embryology	Langman	Langman's Medical Embryology
Medicine	Harrison	Harrison's Principles of Internal Medicine
Pathology	Kumar, Abbas, Fausto, & Aster	Robbins and Cotran Pathological Basis of Disease
Pediatrics	Nelson	Nelson Textbook of Pediatrics
Pharmacology	DiPiro, Yee, Wells, Posey	Pharmacotherapy: A Pathophysiological Approach
Physiology	Guyton	Guyton & Hall Textbook of Physiology
Histology	Ross and Pawlina	Junqueira's Basic Histology
Clinical Endocrinology	Gardner and Shoback	Greenspan's Basic & Clinical Endocrinology

Recommended Textbook(s):

Mosby Endocrine and Reproductive Physiology
Kaplan's Med Essentials for USMLE Step 1
Principles of Pharmacology 2012
McGraw Hill's NAPLEX Review Guide 2001
USMLE 1 Physiology Lecture Notes
Kaplan Clinical Pediatric Endocrinology

Attendance

Lecture/Learning Activity Attendance

Lecture attendance is highly suggested; unless otherwise labelled as mandatory on course calendar.

Sign-in sheets or electronic attendance will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets or electronic tracking will be collected 5 minutes after the activity begins. Certain excused absences are allowed (please see Excused Absence Policy).

The following procedure(s) will be employed for breeches of these course requirements.

1. Administrative/Support staff will notify the course director(s) and Assistant Dean of Academic Affairs
2. A note will be placed in the student's file
3. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE.
4. Persistent lapses in attendance will require the student to appear before the Student Promotions Committee.

Exams and Grading/Assessment:

- One mid-course examination NBME; 50 questions on the 3rd week of the course. It will be in a hybrid format where students take the exam individually, followed by the same exam in a small group. The grade distribution will be 75% individual score and 25% group score.
- One NBME 100 questions comprehensive final examination at the end of the course
- Clinical Cases : Three 2-hr sessions devoted to presentation and discussion of Clinical Cases will be offered; attendance at these sessions is mandatory. Students will work in group of five and student presentations will be graded using a rubric.
- Clinical Case-Based Learning: During Week 4, three 2-hr sessions devoted to self-directed learning following problem-based learning format will be presented.
- During the course, there will be special assignments to earn extra credit. This will involve submitting multiple choice Questions and Answers to be used in the weekly review session
- **Summative mid-course exam**
 - The in-class Summative mid-course exam will consist of 50 USMLE Step 1 format multiple choice questions. This exam will be held on the Monday morning of week 3. The exam will consist of information from the first two weeks of the Endocrine Systems course. Attendance is mandatory.
 - The **Summative mid-course exam will count for 20% of the total grade in the class.** Passing this exam is not a requirement for passing the course; therefore, no remediation process is necessary.
- **Clinical Case-Based Learning Sessions (CCBLs):**
 - During Week 4, there will be 3 two hour Student-led learning sessions; attendance at these sessions is compulsory.
 - Students will work in groups of 9. Student performance will be graded using a rubric.
 - **The CCBL grade will be Pass/Not Pass and will be based on: Rubric based on the rubric with the following: Attendance, Leadership, Participation, Organization, Research, and Presentation**

- **Student Interactive Learning Sessions (SILS)**
 - During Weeks 2-5 of the Endocrine course, there will be 1-2 two hour SILS that will replace the conventional lecture format.
 - SILS Methodology:
 - Approximately 2 hours class time to cover 2 related clinical medicine topics – with 1-2 endocrine course teaching faculty present for the entire session (Team Based Learning style)
 - Preassigned learning preparation introduced on CANVAS
 - **There will be pre-assigned reading and each SILS will begin with a quiz that accounts for 5% of the total grade**
- **Review/Formative**
 - The Endocrine System course will have additional Review/Formative sessions at each week's end to summarize key learning points and familiarize students with typical exam questions.
 - Review Sessions
 - End of:
 - Week 1 Practice Questions & Answers
 - Week 2 Practice Questions & Answers
 - Week 3 Practice Questions & Answers
 - Week 4 Practice Questions & Answers
 - Week 5 Practice Questions & Answers
 - All questions covered material of the week
- **Summative Final Examination**
 - One USMLE Step 1 format 100 multiple-choice questions final examination is given at the end of the course. The exam will be comprehensive, but will emphasize material from the last two weeks of the Endocrine Systems course.
 - **The Summative exam will count for 75% of the total grade in the class.**
 - Successful completion of the course is based on passing the different components of the Summative Examination with a grade of **70% or higher**, as well as demonstrating a high standard of ethical and professional behavior. Failure to reach the passing mark in the “summative examination” will result in a remedial examination.
 - **A score of at least 89.5 is necessary to achieve Honors in the overall course.**
- **Special Student Assignments:**
 - **Every week will conclude with a two hour review session of the previous week's material. Student will be able to achieve up to 4% extra credit for submitting multiple choice questions and answers to the review session**

Total Course Score and Grading:

- **Grading percentages**
 - Passing grade requires a total score of 70% or higher
 - Honors grade requires a total score of 90% or higher
 - Students failing the course will be referred to the Student Promotion Committee (SPC) and a custom tailored remediation plan will be developed.
- **Final Summative** **75% (2/3 post Midterm; 1/3 pre Midterm)**
- **Midterm Summative** **20%**
 - **Individual – 75%**
 - **Group/Hybrid – 25%**
- **Pre-SILS quizzes** **5%**
- **Clinical Case** **Pass/Not Pass**
- **CCBL** **Pass/Not Pass**
- **Contribution to Review session – up to 4% Extra Credit**
- **Course Evaluation** **To be completed by all students at final review session.**

Summative NBME exams score reports will be available 3-days after the exam; it is the student responsibility to contact Course Director to obtain their individual score report.

Any additional (retesting) exams will be at the expense of the student.

The successful completion of the course is based on demonstrating high standards of ethical and professional behavior, as well as, passing both the Final Comprehensive Summative Exam **AND** the course with a grade of 70% or higher.

Description of Clinical Cases and Clinical Case Based Learning

Clinical Cases (CCs) and Clinical Case Based Learning (CCBL) sessions are designed to promote the development of teamwork, professionalism, and evidence-based patient management skills that integrate the basic and clinical sciences. The students will be divided into groups within their Master's College and be presented a case at the end of the week. Each group will develop learning objectives and a SOAP note for the case presented. The College Master will be responsible for grading and feedback. Grading will be Pass/Needs Improvement/Fail.

Clinical Case-Based Learning is an integrated, Problem-Based Learning modality that affords student self-directed learning in the context of a clinical case setting. Each week-long case is sequentially revealed over the course of three two-hour sessions. Students work in groups of about nine. For each case, each student will provide at least one teaching presentation to the group – this should be a PowerPoint slide set that includes citations for all images used and an *annotated* list of references from textbooks and the primary literature. Students are expected to offer constructive feedback on these presentations. The group will devise their own session learning

objectives on Day 1 of each week; these will be the topics presented orally on Day 2. CCBL group assignment will remain stable for an entire academic year, to allow longitudinal formative feedback from facilitators, and to foster periodic peer- and self-assessment. Case Learning Objectives comprise material that may be tested in NBME course exams. All sessions are mandatory and timely arrival is expected in order for students to earn a grade of PASS for this component of a course; grading will be Pass/Fail.

Facilitator Rubric for CCBLs

Week 4	0	1	2	3
Attendance: All CCBL sessions are mandatory	Any unexcused absence	N/A	N/A	Attended all sessions on time
Leadership: Organization, barrier identification, feedback skills, enthusiasm, stim. of group progress, inspires involvement and success	Unorganized, does not provide feedback, unenthusiastic group participation	Adequately organized, sometimes assists group decision making, somewhat enthusiastic, provides sporadic feedback	Well organized, usually assists in group decisions, making, usually enthusiastic, usually provides specific feedback	Very well organized, consistently assists group decisions, always enthusiastic, regularly provides constructive feedback
Participation: Frequency of participation, quality of comments and listening skills	Does not initiate contribution, comments uninformative, does not listen, talks while others speak	Minimal contribution, comments not always relevant, occasional insight, but often too general or not useful	Often initiates contribution, comments usually insightful and constructive, rarely too general or irrelevant	Involved in most discussions, comments almost always insightful and constructive, listens attentively, makes comments that build on other's remarks
Critical Thinking: Problem posing, investigating, conceptualizing, empowering learning	Misinterprets evidence or statements, maintains views based on self-interest or preconceptions, does not explain reasons, exhibits closed mindedness	Beginning to use evidence to back ideas, responds to sources at a factual or literal level, thinking is uneven, seldom explains reasons	Basic ability to analyze, interpret and formulate inferences, briefly includes more than one perspective, usually explains reasons	Accurately interprets evidence, identifies salient arguments, generates alternative explanations, explains assumptions and reasons, makes sound judgements

Presentation Skills: Subject knowledge, eye contact, elocution, slides, reference resources, overall effectiveness	No grasp of information, cannot answer questions, no eye contact, mumbles, slides disorganized and hard to read with many mistakes, resources not given, overall poor	Uncomfortable with information, can answer only basic questions, little eye contact, reads report, slides poorly organized with minimal graphics, some mistakes, research resources not respected or of high quality, overall fair	At ease with expected questions, but fails to elaborate, voice is clear, most terms pronounced correctly, slides well organized, easily read and without mistakes, research resources of high quality, overall good	Demonstrates full knowledge by answering all questions skillfully, slides with excellent organization, graphics and readability, mistake free, research resources of excellent quality, overall excellent

Disclaimer about changes in Syllabus and Course Calendar

Every effort will be made to adhere to the contents of this syllabus. However, this document is subject to change in the event of unforeseen, extenuating circumstances. Students will be notified as soon as possible if changes in the syllabus become necessary.

Student Evaluations of Course and Faculty

Student Evaluations of the Course and Faculty: Students are required to complete these evaluations during the assigned mandatory session on the course calendar. Course evaluations will be scheduled in the course calendar for the last Friday of instruction. **It is expected that a minimum of 90% of the class respond. In the event the 90% do not respond, grades for the entire class will not be distributed by the Course Director or Registrar.**

Relevant Policies:

1. Honor Code
2. Attendance Policy
3. Copyright Policy for Students
4. Dress Code Policy
5. Non-discrimination and Anti-Harassment Policy
6. Diversity and Inclusion Policy
7. Family Educational Rights and Privacy Act (FERPA)
8. Holiday Policy for MS1 and MS2 Students
9. Policy against Medical Student Mistreatment
10. Policy on Deficient Grades
11. Policy on Grade Submission
12. Policy on Grading
13. Policy on Stress and Fatigue Management
14. Immunization Policy

These policies are available in the Student Handbook and Online. The students are responsible for reviewing each policy and for knowing content and application (see Policy excerpts below). **Students will be expected to comply with all COM policies, including the policies on Student Progression, Grading and Remediation.**

Policy excerpts:

Honor Code

The Honor Code of California Northstate University College of Medicine (CNUCOM) is a formal code of conduct that emphasizes the four core principles of respect, honesty and integrity, legal and ethical behavior, and professionalism, to which all students, faculty, and staff are held responsible for maintaining. Any and all violations of the Honor Code are processed as appropriate through the Office of Student Affairs and Admissions and Outreach (College of Medicine), or the responsible governing body.

Attendance

- **All exams, medical skills training sessions, laboratory sessions, masters colloquium sessions and case presentation sessions are mandatory**
- **Attendance will be taken for all mandatory sessions**
- **Attendance sheets will be collected 15 minutes after the start of each mandatory session**
- **Late arrivals (after 15 minutes = tardy X3 or more) as well as multiple unexcused absences will be referred to the Office of Student Affairs and are subject to notation in the student's academic record**

Copyright Policy for Students

Students shall not transfer copyrighted material onto a computer for any use other than personal study. Some of the material provided to the student by CNUCOM via electronic means may be "printable" from student's personal computer for student's use only. Any charges of violation of the copyright policy will be brought before the Honor Council.

Dress Code Policy

As representatives of the medical profession, all medical students are expected to maintain an image that conveys credibility, trust, respect, and confidence in one's colleagues and patients. Appropriate dress is also essential to enhance patient safety in the clinical setting. When students are assigned to clinical activities in any of the College of Medicine's clinical settings, they should consider themselves as representatives of the CNU College of Medicine. Attire and behavior should promote a positive impression for the individual student, the specific course, and the institution. In addition, certain courses and some clinical affiliate institutions may require

alternative dress guidelines, which must be followed. These requirements will typically be included in written courses materials, but if any doubt exists, it is the responsibility of the student to inquire.

Non-Discrimination and Anti-Harassment Policy

California Northstate University prohibits discrimination, including harassment and retaliation, by University employees, students, contractors, or agents of the University and by anyone participating in a University sponsored activity against an individual based on a protected classification. Protected classification includes race, skin color, religion, sex, national origin, age, disability, veteran status, sexual orientation, gender identity, marital status or other protected category.

Diversity and Inclusion Policy

California Northstate University (CNU) considers diversity an integral part of the entire academic enterprise. Blending of different life and cultural experiences is of prime importance in the hiring of staff, faculty and administrators and in the selection of students and the education of future healthcare providers. CNU seeks to foster a broad and diverse community of students, faculty, staff, and administrators to enrich the educational environment and expand the knowledge base for our students. The value of this diversity emphasis for CNU educational programs and institutional environment will be realized by the production of culturally competent healthcare providers who can serve our nation's increasing diverse population.

Family Educational Rights and Privacy Act (FERPA)

Student education records are confidential. Records are kept on campus and only certain individuals with status of "right to know" are allowed access to them. California Northstate University, College of Medicine students have the right to inspect and review their own education records maintained by the school. Schools are not required to provide free copies of records, and may charge a fee for copies. Schools may disclose, without consent, "directory" information such as a student's name, address, telephone number, citizenship, honors and awards, and dates of attendance. Release of this "directory" information can be suppressed by the student.

Holiday Policy for Phase A Students

Official Holidays for Phase A include: President's Day, Spring Break, Memorial Day, Independence Day, Labor Day, Thanksgiving Holiday, Winter Break, and Martin Luther King Day

Policy against Medical Student Mistreatment

CNUCOM is committed to assuring a safe and supportive learning environment that reflects the institution's values of professionalism, respect for individual rights, appreciation of diversity and differences, altruism, compassion, and integrity. Mistreatment of medical students is prohibited. Students should use this Policy to address discriminatory, unfair, arbitrary or capricious treatment by faculty or staff. CNUCOM defines mistreatment as behavior that is inconsistent

with the values of the university and that unreasonably interferes with the learning process. Medical students who themselves experience or observe other students experiencing possible mistreatment are encouraged to discuss it with someone in a position to understand the context and address necessary action, and report the occurrence (file a formal report with the CNU Dean of Student Affairs and Admissions or file an anonymous report via the Portal contained on the CNUCOM website. Medical Students requesting complete anonymity should be made aware that doing so may interfere with the university's ability to investigate the concern and their ability to receive information about the follow-up investigation. No Retaliation: CNUCOM does not tolerate retaliation against individuals who report hateful, dishonest, illegal, unethical, unprofessional, or otherwise inappropriate acts that constitute student mistreatment. Individuals who believe they are experiencing retaliation are strongly encouraged to contact the Dean of Student Affairs and Admissions. Alleged retaliation will be subject to investigation and may result in disciplinary action up to and including termination or expulsion.

Policy on Deficient Grades

When a student receives a deficient grade in a course, it is a course director's responsibility to outline what will be expected to remediate the deficiency, as close to the time that the grade is given as possible. If you are on probation, receive, or have received other previous deficient grades, this remediation will require the approval of the Student Promotions Committee in order to proceed. The Student Promotions Committee considers performance across the entire curriculum in making recommendations for promotion or dismissal which may impact course-specific remediation.

Policy on Grade Submission

All required courses and clerkships must submit grades to the registrar's office (using the system specified by the registrar) within 21 days of the last day of the course or clerkship. This includes submission of an (I) Incomplete grade if all course or clerkship requirements have not been completed due to circumstance not under the control of the student (see definition of Incomplete grade). Submission of narratives along with grades is required of all clerkships and of all courses in which assessment of educational activities make this possible (e.g., small group activity, writing assignments, interaction with standardized patients, simulations, etc.)

Policy on Grading

The work of all students in any of the required courses for the MD degree is reported in terms of the following grades: H (Pass with Honors), P (Pass) or F (Fail), or as two provisional marks: I (incomplete but work of passing quality), or Y (provisional, requiring remediation). H is considered for the 20% of the students with the highest achievements. Some courses and electives may be graded P/F only. Students must score an average above 70% on summative examinations as well as pass requirements for written assignments and professionalism according the course specific rubrics. The Course Director must assign the final grade within 21 days of the end of the course or the remediation examination.

Policy on Stress and Fatigue Management

All students will be trained on stress, fatigue, and burnout. Any release from duty assignments due to stress/fatigue that exceeds the requirements for completion of educational objectives must be made up in order to meet curriculum requirements.

Student Handbook

The information in the student handbook serves as a student resource for policies and procedures of California Northstate University College of Medicine and is subject to change. Students should review the handbook at the beginning of each academic year and refer to the online version for the most current information.

Weekly Course Calendars

DESCRIPTION OF CLINICAL PRESENTATIONS

General Description

The clinical presentations (CP's) of the endocrine course are focused on common endocrine situations and presentations that a primary care physician will experience. There will be three (3) Clinical Presentations during the Endocrine Course that are accompanied by clinical algorithms, clinical reasoning guides, and objectives lists. Clinical faculty walk the students through the clinical algorithms emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Basic science principles are offered to ensure adequate knowledge and skills required to arrive at a correct diagnosis. Collectively, these presentations highlight the normal and abnormal structures and functions of the system as a whole. Each clinical presentation is related to various disease states including care and treatment options. Students formally participate in developing Learning Objectives and a SOAP note in worked case example sessions at the end each week. Students also take part in a Medical Skills and Masters Colloquium courses that run concurrently during the Endocrine course.

Clinical Presentations

Week 1 (Homeostasis)

Week 2 (Pituitary)

Week 3 (Hypocalcemia)

Week 4 (Thyroid)

Week 5 (Pancreas)

Foundations of Odontology Course Syllabus

Course #	Course Title	Credits	Year	Term
Odont 511	Foundations of Odontology <i>LAL, LAB and CLIN</i>	6	DS 1	Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
August 12, 2020	First day of Fall term for all DMD 1 students
September 28, 2020	First quiz: patient intake
October 15, 2020	Submission of first Patient Case Study (PCS) performed on patient of record/Team activity
November 28, 2020	Submission of second PCS/Team activity
December 8, 2020	Second quiz: patient assessment
December 14, 2020	Final Clinical Evaluation: Practical
December 20, 2020	Final Examination: Didactic

Time: 3 hours per week

Course Description

This course will introduce students to infection control, the dental office and clinical care site, and provide initial skill in interaction with the patient and the patient's oral cavity. Students will enter the clinical setting with faculty and upper level students to provide limited aspects of oral care and join the oral health care team. Students will gain initial understanding of the clinical encounter including history of present illness, social history, family history, medical history. Students will perform oral examination. Students will gain initial understanding of the electronic health record.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

1. *Bates guide to physical examination and history Taking- 11th edition, Bickley, Lynn, Wolters Kluwer*
2. *Cottone, Practical infection control in dentistry, Molinari J, Hare, J, 3rd edition, Wolters Kluwer*
3. Epic Wisdom dental module training: www.epic.com
4. Maryland Mighty Tooth: School based dental sealant training program
5. https://www.mightytoothcurriculum.com/module4/mod4_0.html
6. Infection Prevention and Control in Dental Settings, Centers for Disease Control and Prevention, Atlanta, GA, 2019 <https://www.cdc.gov/oralhealth/infectioncontrol/index.html>
7. Laheij, A, Kistler, J, Belibasakis G, Valimaa, H, de Soet JJ, Healthcare associated viral and bacterial infections in dentistry, J Oral Microbiol doi 10.3402/jom.v4i0.17659
8. Assael L, nosocomial infection and fomites in oral and maxillofacial surgery, J oral maxillofac surg 63: 889-890, 2005
9. UCSD Practical Guide to clinical medicine, <https://meded.ucsd.edu/clinicalmed/head.htm>

Optional Textbook(s) and Material(s)

- *Sturdevants Art and Science of Operative Dentistry*, Heymann, Swift, Ritter, Elsevier, 6th ed. (as a pre-read prior to DMD2 operative dentistry Odont 621)

Technology

- Computer-assisted instruction (Clickers) and SCANTRON Sheets
- Web-based course management (Canvas) and Examsoft
- Audio/Video recordings where applicable
- PowerPoint
- Epic electronic health record
- PACS, DICOM compatible imaging software
- Dental operatory

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
First quiz	10%
Second Quiz	10%

Final exam	30%
Clinical evaluation practical	30%

Team Components	20%
Group PCS projects	10%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the

Total individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group PCS cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late). Presentation of PCS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing.
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Date	Topics	Readings*	Instructor	Notes
Week 1 didactic	CDC guidelines for infection control	CDC infection control in dentistry	Assael	
Week 1 lab	Barrier technique, dental operatory components	CDC infection control in dentistry	Keating	
Week 1 clinic	Apply clinician infection control protocols		Clinical faculty and staff	
Week 2 didactic	Nosocomial Infection in dental practice	Health care associate viral and bacterial infections Laheij Assael, nosocomial infection	Keating	
Week 2 lab	Demonstration of aerosol and surface contamination, water lines, handpieces		Keating	videos
Week 2 clinic	Performance of equipment infection control in the clinic		Clinic staff	
Week 3 didactic	Introduction to the patient: interviewing	Bates: Chapter 1	Assael	Project 1 PCS assignment to groups
Week 3 lab	OSCE interview		Clinical faculty	
Week 3 clinic	Clinical experience with patient interviews		Clinical faculty	
Week 4 didactic	History of Present Illness Dental history Family and social history, past medical history, review of systems	Bates chapter 3	Assael	
Week 4 lab	Eliciting the history Quiz 1		Clinical faculty	Quiz 1

Week 4 clinic	Clinical experience with patient history		Clinical faculty	
Week 5 didactic	Initial oral and head and neck examination	Bates chapter 2 UCSD practical guide to clinical medicine	Keating	
Week 5 lab	Oral head and neck exam		Clinical faculty	
Week 5 clinic	Clinical experience with patient exam		Clinical faculty	
Week 6 didactic	Project presentations		Keating Assael	PCS 1 presentations
Week 6 lab	Project presentations			
Week 6 clinic	Clinic participation			
Week 7 didactic	Sealants 1	Maryland manual	Chan	
Week 7 lab	Sealant 1 lab	Maryland manual	Clinical faculty)	
Week 7 clinic	Sealant 1 clinic	Maryland manual	Clinical faculty	
Week 8 didactic	Sealants 2		Chan	
Week 8 LAB	Sealant 2 lab		Clinical faculty	
Week 8 Clinic	Sealant 2 clinic		Clinical faculty	
Week 9 didactic	In depth: history of present illness, family history, Social history, PMH, ROS	Bates Ch 1	Assael	PCS 2 ASSIGNMENT
Week 9 lab	Practice Patient interviews in OSCE format		Clinical faculty	
Week 9 clinic	Patient intakes		Clinical faculty	

Week 10 didactic	The electronic health record, introduction	EPIC manual	Assael	
Week 10 lab	Using the electronic health record		Clinical faculty	
Week 10 clinic	Observing the electronic health record in clinic		Clinical faculty	
Week 11 didactic	Dental assisting	PPT only	Keating	
Week 11 lab	Dental assisting lab		Clinical faculty	
Week 11 clinic	Assist in clinic		Clinical faculty	
Week 12 didactic	PCS presentations		Class	Pcs 2 presentations
Week 12 lab	PCS presentations		Class	
Week 12 clinic	Clinical experience		Clinical faculty	
Week 13 didactic	The electronic health record: compliance and business issues	Epic manual	Keating	Quiz 2
Week 13 lab	Clinical billing simulation, case based compliance module		Keating	
Week 13 clinic	Business office		Clinical faculty and staff	
Week 14 didactic	Integrating intake history, exam, electronic record and initial clinical encounters		Assael Keating	
Week 14 lab	Clinical encounter simulations		Clinical faculty	
Week 14 didactic	Participate in team care in clinic		Clinical faculty	
Week 15 didactic	Final exam didactic		Assael Keating	
Week 15 lab	Final exam practical		Clinical faculty	
Week 15 clinic	General clinic experience in team care		Clinical faculty

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. Didactic: lectures, required readings
2. Learning Activities: laboratory practice, OSCE, laboratory assignments/exercises, group project

CLO Rubrics

CLO 1: Develop an initial understanding and capability to participate in the patient encounter as a clinical team member

Indicato	Initial	Developing	Developed	Proficient
Participates with understanding and capability at an initial encounter level in patient care	Unable participate in clinical care effectively.	Demonstrates rudimentary ability be a clinical team member but with evolving demonstration of understanding their own role and the role of others	Demonstrates detailed understanding of their role as a team member and is usually effective in that role	Consistently demonstrates the ability participate at the level of their knowledge and skill as a clinical team member.

CLO 2: Thoroughly implement all infection control measures in the dental setting to meet CDC standards

Indicators	Initial	Developing	Developed	Proficient
Implements all criteria for infection control according to CDC standards	Demonstrates no or limited knowledge of infection control in health care	Begins to exhibit knowledge of infection control and understands general principles of disease transmission and its prevention	Implements barrier, sterilization, clean surgical technique consistently in patient care with uncommon non critical errors	Demonstrates complete knowledge and skill in infection control, able to perform all infection control tasks without error and able to teach and lead the oral health

CLO 3: Demonstrates ability to complete and record a thorough medical and dental medicine patient history

Indicator	Initial	Developing	Developed	Proficient
Performs medical and dental medicine patient history to elicit information essential to completion of safe and effective clinical care.	Does not demonstrate an understanding of the patient history components or their importance.	Demonstrates a developing understanding of the patient history and its utility in guiding patient care	Demonstrates a comprehensive understanding of the role of the patient history and is able to capably elicit the history with few noncritical omissions	Consistently elicits, interprets and synthesizes the patient history as a guide to treatment decisions

CLO 4: Perform initial oral examination, place dental sealants in pediatric patients. Assist in dental care as a member of the care team

Indicators	Initial	Developing	Developed	Proficient
Performs exam for sealant placement and place sealants as a care team member.	Unable to assess the need for sealants, ability to place and skills to complete procedure.	Begins to develop skills in assigned tasks including assessment, isolation and use of materials.	Demonstrates adequate assessment, and placement of dental sealants with uncommon critical errors resulting in repeat	Consistently demonstrates thorough ability to assess and use sealants without error at the time of placement

CLO 5: Demonstrate professionalism/ development of a professional identity as a dentist while participating as a student dentist in the patient care team

Indicators	Initial	Developing	Developed	Proficient
Functions collaboratively & effectively as a member of	Unable to function collaboratively and effectively as a member of	Functions somewhat collaboratively and effectively as a member of the team.	Functions collaboratively and generally effectively as a member of the	Consistently functions collaboratively and effectively as a member of the team.
Understands and exhibits the proper role of the dentist in	Unable to ascertain the role of the dentist in patient care	Demonstrates a developing understanding of the role of the dentist in improving patient	Demonstrates strong understanding of the value of oral health care as led	Thoroughly can demonstrate and teach to the team the role of the dentist in health care
Demonstrates the highest level of ethics, empathy and cultural sensitivity in health care as a member of the team	Does not exhibit empathy, not guided by sound ethical principles and/or is not culturally sensitive	Demonstrates empathy and a developing understanding of the nuances of the ethical relationship between patient and doctor and has developing understanding of the role of culture and its role in improving health outcomes.	Demonstrates strong commitment to ethical patient care and strong motivation driven by empathy toward those afflicted with illness and those who need health care. Has cultural competence	Can consistently demonstrates understanding and exhibits all the features of medical ethics in the care of all patients. Can promote empathy in all team members and has a lifelong learning action plan implemented to address cultural and societal norms and expectations to

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<p>and generally asks questions.</p> <ul style="list-style-type: none"> Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>and asks appropriate questions.</p> <ul style="list-style-type: none"> Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize,	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates

formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to deliver oral healthcare, but 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of how to work with 	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly discuss the

		demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-	<ul style="list-style-type: none"> Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> Demonstrates minimal understanding of population-based care and how it 	<ul style="list-style-type: none"> Demonstrates sufficient understanding of population-based care and how it 	<ul style="list-style-type: none"> Demonstrates superb understanding of population-based care and how it

based care influences patient-centered care and the development of practice guidelines and evidence-based best practices		influences patient-centered care • Does not demonstrate awareness of how these notions influence the development of practice guidelines	influences patient-centered care • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care	influences patient-centered care • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	--	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and linguistic needs 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of diverse patients

		patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	--	--

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> Is not able to correctly identify the problem or issue being considered. Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. Identifies a few, but not all, resources needed for decision making. Demonstrates ability to interpret some information and data but not all. Does not fully or effectively evaluate alternative solutions. Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected 	<ul style="list-style-type: none"> Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. Identifies most of the resources needed. Demonstrates ability to interpret most information and data. Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, 	<ul style="list-style-type: none"> Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. Identifies all appropriate resources. Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action.

		<p>alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.</p>	<p>weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.</p>	<ul style="list-style-type: none"> Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	--	---

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear

	in their documentation	analyze subject under discussion	their documentation	and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients

3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> • Does not acknowledge other viewpoints • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Demonstrates little attempt to recognize other viewpoints • Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> • Recognizes other viewpoints but has difficulty incorporating them into case conceptualization • Adequately answers patient questions 	<ul style="list-style-type: none"> • Listens to questions with a consideration of alternative viewpoints • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed

4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> • Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> • Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> • Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> • Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> • Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> • Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> • Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> • Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> • Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> • Attempts to interpret scientific data 	<ul style="list-style-type: none"> • Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> • Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in	<ul style="list-style-type: none"> • Does not generate conclusions based on current 	<ul style="list-style-type: none"> • Generates conclusions that may be based on 	<ul style="list-style-type: none"> • Generates conclusions using 	<ul style="list-style-type: none"> • Accurately generates conclusions using

generating conclusions	scientific data and statistics	current scientific data and statistics	scientific and statistical data	appropriate scientific and mathematical data
------------------------	--------------------------------	--	---------------------------------	--

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine

Dental Anatomy Course Syllabus

Course #	Course Title	Credits	Year	Term
Odont 521	Dental Anatomy <i>LAL and LAB</i>	6	DS 1	Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
August 12, 2020	First day of term for all DMD 1 students
September 21, 2020	First quiz
October 1, 2020	Submission of first laboratory project
November 15, 2020	Submission of first CMPS (Correlated Medical Problem Solving) project
December 1, 2020	Second quiz
December 12, 2020	Final examination (practical)
December 14, 2020	Final examination (didactic)

Course Coordinator, Instructors and Contact Information

Richard Simonsen DDS (course co-director)

Room:

E-mail:

Office hours:

Leon Assael DMD (Course co-director)

Room:

E-mail: leon.assael@cnsu.edu

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

Holly Jacobson BA (course administrator)

Room:

E-mail: holly.jacobson@cnsu.edu

Classroom and Meeting Times

Room: Classroom xxxx

Time: xxxx 3 hours per week

Laboratory and Meeting times

Room: xxxx type 1 dental laboratory

Time: xxxx 3 hours per week

Course Description

The course is designed to teach student dentists the development, histology, functional anatomy of the primary teeth succedaneous teeth and associated structures. The laboratory will enhance understanding of three dimensional structure of teeth and associated structures that is relevant in understanding oral physiology, pathobiology of oral structures. The course will utilize lecture, small group project, individual psychomotor laboratory exercises, and computer based modeling learning. Malformations and pathology of dental anatomic structures will be used to illustrate structure and function in an active learning project format.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

10. *Wheeler's Dental Anatomy and Occlusion*, 75th anniversary edition, Stanley Nelson, Vital Source, 2019
11. *Woelfel's Dental Anatomy*, Rickne Scheid, Gabriela Weiss, Wolters Kluwer, 9th edition 2018

Optional Textbook(s) and Material(s)

1. The Visible Human Project, the Virtual Microscope, online
2. Primal Pictures online

Web Links

6. <https://bookshelf.vitalsource.com/#/>
7. https://www.nlm.nih.gov/research/visible/visible_human.html
8. <https://primalpictures.com/>

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Three dimensional virtual models from Vital Source and NLM Visible Human project

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
First Quiz	10%
Second Quiz	10%
Final Exam	40%
Laboratory Exercises	20%

Team Components	20%
Group CMPS Project	10%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group CMPS cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late). Presentation of CMPS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing.
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Date	Topics	Readings*	Instructor	Notes
Week 1	Syllabus/Assignment Overview introduction to dental anatomy	Wheeler Chapters 1	Assael	
Week 1 lab	Overview of equipment and learning materials, Histology of dental structures	Visible human project Virtual microscope	Assael	
Week 2 lecture	Development and eruption of the teeth	Wheeler chapter 2	Simonsen	
Week 2 lab	The viscerocranium and dental structures during growth and	Wheeler chapter 5	Kapila (ortho)

Course Learning Outcomes and links to Program Learning Outcomes (Appendix A) and Institutional Learning Outcomes (Appendix B)

No.	Course Learning Outcome	DMD PLO	DMD ILO	Learning Hierarchy ^b	Assessment Method
1	Develop a comprehensive detailed understanding of the morphology of primary and succedaneous teeth	1,2,7,8	1,3,4,6	1,2, 3	Quizzes, final exam
2	Demonstrate an understanding of how individual tooth morphology is incorporated into overall masticatory and maxillofacial function including occlusion airway	1,2,7,8	1,3,4,6	2, 3	Quizzes, final exam, group project
3	Demonstrate how dental anatomy is impacted in health and common disease states.	1,2,3,4,7,8	1,3,4,6	2, 3	Group project, final exam
4	Demonstrate professionalism/ development of a professional identity as a dentist with the detailed knowledge of dental anatomy as a vehicle in case presentations	1,2,3,7,8	4	3	Group project

^a plo's appendix A

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. Didactic: lectures, required readings
2. Learning Activities: laboratory practice, laboratory assignments/exercises, group project

[Type here]

CLO Rubrics

CLO 1: Develop a comprehensive detailed understanding of the morphology of primary and succedaneous teeth

Indicators	Initial	Developing	Developed	Proficient
Recognizes and describes normal morphology of primary and succedaneous teeth	Unable to recognize and describe normal morphology of primary and succedaneous teeth.	Demonstrates rudimentary ability to describe dental anatomy structures including nomenclature and location but not detailed ultrastructure	Demonstrates detailed understanding of normal morphology of primary and succedaneous teeth. Can describe normal structure and recognize it visually	Consistently demonstrates the ability to describe and recognize normal morphology and deviations from normal structure at the ultrastructural level.
Produces structures in analog model and digital environment demonstrating understanding of dental morphology	Unable to demonstrate the ability to produce anatomical models digitally or manually.	Shows the ability to develop elements of normal dental morphology across the primary and succedaneous dentition.	Can produce structures that closely resemble normal dental anatomy with only modest deviations from measureable norms.	Consistently demonstrates the ability to produce clinical normal structures in the digital and analog setting and detect deviations from norms..

[Type here]

CLO 2: Demonstrates understanding of how individual tooth morphology is incorporated into overall masticatory and maxillofacial function including occlusion airway and TMJ function

Indicators	Initial	Developing	Developed	Proficient
Demonstrates understanding of the integration of individual tooth morphology into the masticatory system	Cannot correlate the anatomy of teeth into the associated structures of joint, muscle, bone, airway	Begins to demonstrate how tooth morphology location and association are necessary to understanding the structure and function of the masticatory system	Shows how individual tooth morphology is an essential component linked precisely morphologically to the masticatory system.	Demonstrates an understanding and synthesizes the morphology of the dentition with occlusion, mastication, airway and swallowing.
Creates with their project team a presentation that demonstrates the broad functional aspects of dental anatomy	Unable to demonstrate the ability to deliver a professional presentation to their colleagues.	Shows the team members project components under development and understands project development gaps	Demonstrates the ability to present their component of the group project effectively.	Consistently demonstrates the ability to deliver a professional presentation to their colleagues and integrates it appropriately with the other team members presentations.

[Type here]

CLO 3: Demonstrate how dental anatomy is impacted in health and common disease states.

Indicator	Initial	Developing	Developed	Proficient
Uses developing understanding of pathology of the dental and maxillofacial structures and their impact on the structure and function of the teeth	Does not demonstrate an understanding of the relationship between dental anatomy structure and function and the pathology of maxillofacial structures.	Demonstrates a developing understanding of the reciprocal effects of regional pathology and the structure and function of the teeth	Demonstrates a comprehensive understanding of the role of occlusion, dental structures, airway and supporting structures on the development of and progression of pathology of the region.	Consistently demonstrates ability to hypothesize and synthesize the role that dental anatomy plays in the initiation and progression of oral diseases such as caries, periodontal disease, TMD, movement disorders, and airway disorders

CLO 4: Demonstrate professionalism/ development of a professional identity as a dentist with the detailed knowledge of dental anatomy as a vehicle in case presentations

Indicators	Initial	Developing	Developed	Proficient
Demonstrates purpose, context, and audience awareness.	Unable to demonstrate attention to purpose, context, and audience awareness in the assigned tasks.	Occasionally demonstrates attention to purpose, context, and audience awareness in the assigned tasks.	Often demonstrates adequate consideration of purpose, context, and audience awareness in the assigned tasks.	Consistently demonstrates adequate consideration of purpose, context, and audience awareness in the assigned tasks
Demonstrates logical analysis and clarity of thought	Unable to demonstrate logical analysis and clarity of thought in the assigned tasks.	Occasionally demonstrates logical analysis and clarity of	Often demonstrates logical analysis and clarity of	Consistently demonstrates logical analysis and clarity of

[Type here]

		thought in the assigned tasks.	thought in the assigned tasks.	thought in the assigned tasks.
Demonstrates clear, focused, coherent organization and development of ideas.	Unable to demonstrate clear, focused, coherent organization and development of ideas.	Occasionally demonstrates clear, focused, coherent organization and development of ideas.	Often demonstrates clear, focused, coherent organization and development of ideas.	Consistently demonstrates clear, focused, coherent organization and development of ideas.
Demonstrates appropriate use of sources and evidence.	Unable to demonstrate appropriate use of sources and evidence in assigned tasks.	Occasionally demonstrates an attempt to use credible and/or relevant sources to support ideas that are appropriate for the discipline and genre in assigned tasks.	Often demonstrates an attempt to use credible and/or relevant sources to support ideas that are appropriate for the discipline and genre in assigned tasks.	Consistently demonstrates an attempt to use credible and/or relevant sources to support ideas that are appropriate for the discipline and genre in assigned tasks.
Delivery (when applicable)	Eye contact, body language, and facial expressions are inappropriate and significantly distracting. Vocal delivery is too soft or too fast. Long, unintended silences and/or speech disruptions frequently distract the audience.	Eye contact, body language, and facial expressions neither enhance nor hinder effectiveness significantly. Vocal delivery is audible. Speech rate or volume disruptions occasionally distract from comprehension.	Some, but not all, of the following apply: Eye contact, body language, and facial expressions enhance presentation. Vocal delivery is varied and dynamic. Speech rate, volume, and tone enhance listener interest and facilitate understanding.	Most, or all, of the following apply: Eye contact, body language, and facial expressions enhance the presentation. Vocal delivery is varied and dynamic. Speech rate, volume, and tone enhance listener interest and facilitate understanding.
Functions collaboratively and effectively as a member of the team of DMD 1 learners and faculty.	Unable to function collaboratively and effectively as a member of the team.	Occasionally functions collaboratively and effectively as a member of the team.	Often functions collaboratively and effectively as a member of the team.	Consistently functions collaboratively and effectively as a member of the team.

Appendix A: Program Learning Outcomes (PLOs) CNU College of Dental Medicine

9. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
10. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
11. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
12. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
13. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
14. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
15. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
16. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs)

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. Does not demonstrate the ability to find and utilize appropriate resources and 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for understanding or rephrase when confusion occurs. 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding and generally asks questions. 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding and asks appropriate questions.

[Type here]

	references necessary for providing accurate counseling, consultation and education	<ul style="list-style-type: none"> • Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> • Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> • Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> • Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> • Demonstrates awareness of issues that impact a patient • Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> • Demonstrates sufficient awareness of issues that impact a patient • Demonstrates ability to articulate these issues • Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> • Demonstrates full awareness of the most important issues that impact a patient • Demonstrates ability to clearly and effectively articulate these issues • Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	<ul style="list-style-type: none"> • Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust 	<ul style="list-style-type: none"> • Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities 	<ul style="list-style-type: none"> • Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities) 	<ul style="list-style-type: none"> • Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)

[Type here]

	plans nor document activities.			
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the 	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate

[Type here]

			quality of oral healthcare	appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> Demonstrates minimal understanding of population-based care and how it influences patient-centered care Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> Demonstrates sufficient understanding of population-based care and how it influences patient-centered care Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<ul style="list-style-type: none"> Demonstrates superb understanding of population-based care and how it influences patient-centered care Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care

[Type here]

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and linguistic needs of diverse patients, and adapt behaviors to communicate health information, but 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information

[Type here]

			communication may not be effective	
--	--	--	--	--

[Type here]

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

[Type here]

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. • Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all

[Type here]

		to defend decision or course of action.	solid supporting evidence. Is able to defend decision or course of action at a basic level.	of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	---	---	--

[Type here]

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

[Type here]

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

[Type here]

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs)

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

[Type here]

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> • Does not identify appropriate resources 	<ul style="list-style-type: none"> • Identifies a few resources needed 	<ul style="list-style-type: none"> • Identifies most of the resources needed 	<ul style="list-style-type: none"> • Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> • Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> • Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> • Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> • Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> • Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> • Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> • Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> • Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> • Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> • Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> • Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> • Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> • Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> • Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> • Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> • Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	•Does not demonstrate knowledge or awareness of audience for which the document is intended	•Demonstrates some ability to craft a document appropriate for its audience	•Demonstrates ability to craft a document appropriate for its audience	•Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	•Does not demonstrate clear or logical thought in their documentation	•Writing does not sufficiently conceptualize case variables or analyze subject under discussion	•Demonstrates general clear or logical thought in their documentation	•Research and clinical documentation demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	•Does not explain or develop ideas	•Demonstrates minimal support for ideas	•Writing contains examples that generally support ideas	•Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	•Demonstrates an attempt to use proper citations to support ideas	•Uses credible and relevant sources to support ideas appropriate in the study of psychology	•Consistently uses credible and relevant sources to support ideas	•Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	•Has excessive or severe errors in language usage	•Generally conveys meaning to readers with clarity, though writing may include some errors	•Language conveys meaning to readers and writing contains very few errors	•Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
------------	---------	------------	-----------	------------

[Type here]

3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> • Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> • Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> • Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> • Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> • Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> • Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> • Does not know professional psychological language or uses jargon • Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> • Demonstrates inaccurate use of psychological language or uses jargon in professional communications • Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> • Demonstrates appropriate use of professional language and minimal jargon • Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> • Demonstrates use of appropriate, professional language • Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> • Does not acknowledge other viewpoints • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Demonstrates little attempt to recognize other viewpoints • Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> • Recognizes other viewpoints but has difficulty incorporating them into case conceptualization • Adequately answers patient questions 	<ul style="list-style-type: none"> • Listens to questions with a consideration of alternative viewpoints • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest

[Type here]

	<p>disruptions frequently distract audience</p> <ul style="list-style-type: none"> • Speaker makes no attempt to engage audience 	<p>distract from comprehension</p> <ul style="list-style-type: none"> • Attempts to engage audience 	<p>and facilitate understanding</p> <ul style="list-style-type: none"> • Generally engages audience 	<p>and facilitate understanding</p> <ul style="list-style-type: none"> • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> Does not demonstrate an awareness of patients' customs, beliefs, or perspectives Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates awareness of customs and beliefs Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates awareness of customs, beliefs, or perspectives in patients Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> Appears inattentive and impatient Uses inappropriate body language Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> Appears unfocused and distracted Uses acceptable body language Dresses in attire that is not offensive 	<ul style="list-style-type: none"> Appears composed and focused Uses appropriate body language Dresses in attire that is professional 	<ul style="list-style-type: none"> Uses articulate, tactful, and diplomatic speech Uses professional body language Dresses in attire that is professional, and well-suited for the environment

[Type here]

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
------------	---------	------------	-----------	------------

[Type here]

6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> • Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> • Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> • Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> • Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> • Does not incorporate references 	<ul style="list-style-type: none"> • Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> • Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> • Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> • Does not use citations 	<ul style="list-style-type: none"> • Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> • Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> • Uses properly cited references and includes all necessary information in reference list

**2018 – 2019 Academic Year
Stages of Life Course Syllabus
Course #: COM 591
Year: 2
Semester: Spring**

Course Dates: 3/25/19 to 5/3/19

Credits Hours: 5 credits

Course Director:

Dr. Louise Glaser, MD, Associate Clinical Professor
Louise.Glaser@cnsu.edu

Coordinator:

Ms. Samantha Xiong

Disclaimer about changes in Syllabus and Course Calendar

Every effort will be made to adhere to the contents of this syllabus. However, this document is subject to changes in the event of unforeseen, extenuating circumstances. Students will be notified as soon as possible if changes in the syllabus become necessary.

Course Teaching Faculty

Name/Degree	Rank/Title
Louise Glaser, MD	Associate Clinical Professor
Guy DiSibio, MD	Associate Professor of Pathology and Medical Genetics
Martin Rubin, MD	Associate Professor of Psychiatry
Susan Ely, PhD	Professor of Molecular Biology, Immunology and Microbiology
Valerie Gerriets, PhD	Assistant Professor of Pharmacology
Floyd Culler, MD	Professor of Pediatrics, Endocrinology and Clinical Skills
Nazila Hejazi, MD	Assistant Professor of Pathology
Rudolph Holguin, MD	Associate Professor of Emergency Medicine
Jason Wong	PharmD
Peter Yip, MD	Associate Professor of Internal Medicine & Occupational Medicine
Nehad El-Sawi, PhD	Professor of Molecular Biology, Immunology and Microbiology
Ishwarlal Jialal, MD, PhD	Professor of Physiology, Metabolism and Pathology
Claire Baranov, MD	Assistant Professor of Medical Skills
Thura AlKhayat, MD	Assistant Professor of OBGYN and Medical Skills
Ghaith Aleyd, MD, PhD	Associate Professor Pathology

Open Door Policy: Course faculty have an open door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time

Volunteer Community Faculty Name/Degree
Victoria Akins, MD PhD, Pediatrics
Schery Mitchell, MD, Pediatrics
John Belko, MD, Pediatric Infectious Disease
Billur Moghaddam, MD, Pediatric Genetics
Thomas Russell, MD, Emergency Medicine
Nichole Tyson, MD, Obstetrics and Gynecology, Adolescent
Michael Sim, MD, Nephology
Anne Hsii, MD, Pediatrics, Adolescent fellowship
Howard Slyter, MD, Neurology, Ethics and Medicolegal
Michael Gunther-Maher, MD, Geriatrics, Palliative Care
Jean Struthers, MD, Pediatric Developmental Specialist

Communication with volunteer community faculty must be channeled through the course director.

Course Description:

- This course spans the human life cycle beginning with birth and infancy and concluding with the dying patient and elders. We will discuss normal growth and development at each stage as well as common challenges.
- Course Content is intended to be high yield both for important basic science and medicine of the first two years of medical school as well for entering clerkships and caring for patients. Material will be presented via a variety of formats including but not limited to: Clinical presentations, Clinical cases, CCBLs, faculty – student interactive sessions, and small and large group activities.
- The Stages of Life contains clinical case sessions focused on the most frequently encountered clinical presentations for an emergency room or primary care physician.
 - **Clinical Presentations/Clinical Cases - weeks 2 and 4**
Students will be introduced to the age of the week in the **Clinical Presentation session**. **Clinical Case sessions** on Friday, from 8-10 am, are required. Students will meet in their colleges to go through and discuss the case for the week. Each small group will review the case following the standard format including pertinent history information, labs, differential diagnosis, and case management. Each student will write a Case Summary and several students will be asked to present their summary orally to the group. Each student will email a written summary to their college master. **We will convene together in Classroom 1 B at 920 to review possible differential diagnoses for the case.**
 - **Clinical Case Based Learning CCBLs – weeks 1, 3, and 5**
These cases feature a complex patient, consistent with the age for the week, and will include both clinical and basic science. Students work in small groups, with a facilitator, and go through the case together during the 3 sessions in the week. Students will also have an opportunity to practice their oral presentations of a patient on Wednesdays and Fridays. **All of these sessions are Mandatory.**
 - **Basic scientific concepts** are interwoven within each CCBL/CC and CP providing the necessary basis for understanding relationships and causal entities. Clinical relevance and appropriate application of basic scientific knowledge is reinforced with these case examples.
- **Medical Skills** runs concurrently and will be coordinated as much as possible with the course content. Sessions will be engaging and valuable to students.

Course Objectives: By the conclusion of this course, the student will demonstrate the ability to

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Distinguish normal growth and development throughout the different stages of life, from birth to death, including common challenges, changes and concerns at the physical, emotional, and behavioral levels in each stage.	PLO-2 (MSK1, MSK2)
2	Explain how exogenous (e.g., infections and nutrition) and endogenous (e.g., hormonal and immunological) factors may affect growth as well as pediatric and geriatric diseases, and how early immunization and adequate nutrition may prevent some of these problems.	PLO-2 (MSK1, MSK2)
3	Explain how genetic and teratogenic mechanisms may alter normal growth and produce physical and chemical abnormalities including tumors, dysmorphic features, developmental delay, and neurochemical imbalances.	PLO-2 (MSK1, MSK2)
4	Integrate the etiopathogenesis in the diagnosis and management of growth and developmental diseases and those associated with aging to predict their risks and prognoses, and identify appropriate preventive strategies.	PLO-2 (MSK1, MSK2, MSK3, MSK4)
5	Apply knowledge of non-pharmacological and pharmacological principles to tailor safe and effective treatments for pediatric and geriatric diseases in addition to palliative care of the dying patient	PLO-1 (PC5, PC7, PC8); PLO-2 (MSK1, MSK2, MSK3)
6	Demonstrate level-appropriate skills in communication, professionalism and medical/procedural related abilities in dealing with patients, and includes environmental, cultural and societal factors in clinical decision making.	PLO-1 (PC1, PC2, PC3, PC4, PC5, PC6, PC7); PLO-3 (C1, C2, C3); PLO-4 (P1, P2, P3)

Please Note: All session objectives listed in the individual sessions (by date and time) are mapped to the course objectives.

Key: PLO = Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations:

One large lecture hall with a seating capacity of 100 students, will be used for the most sessions. CCBLs (MWF), Clinical Cases sessions (Fridays), and Group Summative Midterm sessions will be held in colleges rooms.

Lecture/Session Duration: All lectures on the calendar as one hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Course special assignments: Details to follow during the course.

Teaching/Learning Methodology:

- Case-Based instruction/Learning
- Discussion, Large group (>12)
- Discussion, Small Group (<12)
- Independent Learning
- Lecture
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Peer Teaching
- Reflection
- Self-Directed Learning

Online Materials – Canvas: Canvas is California Northstate University's Learning Management System.). Use your CNU NETID and password.

Turning Point: Every Phase A student was given a Turning Point Clicker during Orientation. Please bring the Clicker to class at all times.

Library/Learning Resources

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This program includes an initial 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Recommend Textbook(s), Material(s) and Equipment:

Subject	Author	Title
Geriatric Medicine	Jeffrey B. Halter, Joseph G Ouslander, et al	Hazzard's Geriatric Medicine and Gerontology
Geriatrics Medicine	Robert L. Kane, Joseph G. Ouslander, et al.	Essentials of Clinical Geriatrics
Pediatric Medicine	William W. Hay Jr., Myron J. Levin, Robin R Deterding, Mark J Abzug	Current Diagnosis and Treatment: Pediatrics
Microbiology	Engleberg	Schaechter's Mechanisms of Microbial Disease 5e
Pharmacology	Trevor, Anthony J., et al	Basic & Clinical Pharmacology, 12th Edition
Genetics	Lynn B. Jorde, John C. Carey, Michael J. Bamshad	Medical Genetics: 5th Edition

Lecture/Learning Activity Attendance:

Mandatory sessions include: Course Introduction, CCBL sessions, Clinical Case sessions, Medical Skills/Stat Lab, Masters Colloquium sessions, Exams, and CBSE

NOTE: **Week 1 Masters is split into 2 sessions** (half in week1 and half in week 2)

Week 5 Masters Colloquium Session is on Thursday

All Lectures/Sessions are recommended to attend. We have designed them intentionally to be high yield for your Step1 exam and or for your third year rotations and future practice.

Sign-in sheets will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets will be collected 5 minutes after the activity begins. Only certain excused absences are allowed (please see Student Affairs Absence Policy).

The following procedure(s) will be employed for breeches of these course requirements.

1. Administrative/Support staff will notify the course director(s) and Assistant Dean of Academic Affairs
2. A note will be placed in the student's file
3. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE.

4. Persistent lapses in attendance will require the student to appear before the Student Promotions Committee.

Exams and Grading/Assessment:

The successful completion of the course is based on a total course score of 70% or higher including a final exam score of 70% or higher, successful completion of 2 Nutrition modules and an Elders assignment, full attendance and participation in CC and CCBL sessions as well as demonstrating a high standard of ethical and professional behavior.

Failure to reach the passing mark in the final exam will result in a retake examination on Friday of exam week.

▪ Total Course Score:

The total numeric score for the course will be measured as follows, which translates to recording a **passing grade of 70% or above**, and **an honors grade if 90% or above**.

#	Components	%	Notes/Explanation
1	Midterm Hybrid Summative Exam	30 (75% individual and 25% group)	50 NBME questions
2	Final Summative exam	65	100 NBME questions
3	Clinical-Case-Based Learning	n/a	Full attendance and participation required
4	Clinical Cases	n/a	Full attendance and participation required
5	Nutrition Modules (2)	n/a	Completion required to pass
6	Elder Interview (2)	5 (2.5% each)	Completion required to pass
7	Formative Weekly Quiz or online module	n/a	Formative

- **Hybrid Summative Midterm Exam (mandatory)**
 - One USMLE Step 1 format exam, comprised of 50 multiple-choice questions will be held on **Monday** morning of week 4, **April 15, 2019**.
 - The first two hours will be an individual test in classroom 1B.
 - The second two hours will be a group test in smaller rooms to be announced prior to the exam.
 - The Hybrid exam will comprise 30% of the course grade (75% individual and 25% group score)
- **Summative Final Exam (mandatory)**
 - One USMLE Step 1 format exam, 100 multiple-choice question final examination at the end of the course. This will be held Week 6 on **Monday April 29, 2019**.
 - The Final Exam grade will comprise 65% of the course grade.

- **Clinical Cases:** Week 2 and 4, with review and discussion of the week's Clinical Case. **Attendance, satisfactory individual work and contribution to group work at these Friday sessions is required/mandatory.**
- **Clinical Case Based Learning CCBLs – Weeks 1, 3, and 5**
Full attendance and participation is required/mandatory at all sessions.
- **Elders Interview** (Content related to Week 5 Masters Colloquium Session)
Graded Complete/Incomplete, 2.5% value each, **completion required to pass course**
- **Nutrition Online Modules:**
Students are expected to **successfully complete** 2 assigned Nutrition in Medicine modules in order **to pass the course**. Students must register for nutrition in medicine via "nutritioninmedicine.org".
 1. "Nutrition during infancy"
 2. "Nutrition and aging: chronic disease"
- **Weekly Modules/Quizzes (Formative):** Designed to support students in confirming/expanding knowledge from the week's content. These will be posted in Canvas by 5 pm Wednesday and due Friday at noon.
- **Student Evaluations of Course and Faculty**

I highly value your feedback and take it seriously. Students are required to complete these evaluations during their last Clinical Case Based Learning activity. Your CCBL small group faculty facilitator will monitor compliance. Please provide your thoughtful and constructive comments here. Thank you.

Remediation:

- Failure of the midterm summative exam will be addressed by offering optional individual and/or group review/tutoring sessions
- Failure of the final summative examination will result in a retest, on Friday of exam week.
- Students who miss mandatory sessions are required to make up the session. Make up options/assignments vary by type of session missed. Specifics to be determined by the course director.

Students will be expected to comply with all CNU and COM policies. Please refer to student handbook.

Managing Student Life Course Syllabus

Course #	Course Title	Credits	Year	Term
BSS 501	Managing Student Life	1	DS 1	Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
August 12, 2020	First day of Fall term for all DMD 1 students
September 30, 2020	Group project selection: one for each college of 20 students
December 1, 2020	Group projects, groups 1 and 2
December 8, 2020	Group projects, groups 3 and 4
December 15	Final reflective essay exam

Course Coordinator, Instructors and Contact Information

Richard Simonsen DDS (course co-director)

Room:

E mail

Office hours

Leon Assael DMD (Course co-director)

Room:

E-mail: leon.assael@cnsu.edu

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

Holly Jacobson BA (course administrator)

Room: xxx

E mail: holly.jacobson@cnsu.edu

Classroom LAL and Meeting Times

Room: Classroom xxxx

Time: xxxx 1 hours per week

Course description

Resilience, sustainability as a student and future health professional will be presented. Each session will provide a mix of lecture and small group discussions. Managing student debt, stress management, effects of social media, interpersonal relationships, and ethics in student practice will be discussed. The problems of drug and alcohol abuse will be shown. Respect in the University including cultural, gender, and sexual conduct issues will be presented. Students will be made aware of resources to promote student wellbeing.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

12. *ASDA managing student debt* <https://www.asdanet.org/index/get-involved/advocate/issues-and-legislative-priorities/Dental-Student-Debt>
13. *Dangers and opportunities for social media in medicine*
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3863578/>
14. Assael, L and McCormick, SS, *Ethical Decision Making in Dentistry*
<https://books.google.com/books?id=6dItAwAAQBAJ&pg=PR6&dq=dental+ethics+suzanne+mccormick&hl=en&sa=X&ved=0ahUKEwjflqan2bnhAhWEop4KHbSKBqwQ6AEIKDAA#v=onepage&q=dental%20ethics%20suzanne%20mccormick&f=false>

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software
7. Dental operator

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	50%
Reflective essay exam	50%

Team Components	50%
Group PCS projects X1	40%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such

a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group Projects cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late). Presentation of PCS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing. The teams will each have 30 minutes for presentation which is ample time for participation of each member
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

CLO Rubrics

CLO 1: Develop an initial understanding of the parameters and the capability to succeed in dental school

Indicators	Initial	Developing	Developed	Proficient
Demonstrates an understanding of the parameters and the capability to succeed in dental school	Does not understand managing student debt, stress management, effects of social media, interpersonal relationships, and ethics in student practice drug and alcohol abuse, respect in the University including cultural, gender, and sexual conduct issues or resources to promote student wellbeing.	Demonstrates rudimentary understanding of these domains but with evolving demonstration this knowledge	Has detailed understanding of their role as a successful dental student	Consistently demonstrates the ability participate at the level of their knowledge and skill as a dental student and can assist other students in these domains

CLO 2: Understand the impact of external forces of patient care, faculty inputs, debt and work life balance on individual dental education success

Indicators	Initial	Developing	Developed	Proficient
Understands the impact of external forces of patient care, faculty inputs, debt and work life balance on individual dental education success	Has no or limited knowledge of the effectors of student life and curriculum on success in dental school	Begins to exhibit knowledge of these domains and applies this knowledge in their student life	Is capable of managing the impact of these domains to effectively navigate student life	Is an exemplar and a mentor to others in understanding the external forces that must be adapted to in student life to promote success

Appendix A: Program Learning Outcomes (PLOs) CNU College of Dental Medicine

17. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
18. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
19. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
20. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
21. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
22. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
23. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
24. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for understanding or rephrase when confusion occurs. Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding and generally asks questions. Frequently demonstrates the ability to find and utilize appropriate resources and references 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding and asks appropriate questions. Consistently demonstrates the ability to find and utilize appropriate resources and references for

[Type here]

	consultation and education	for providing accurate counseling, consultation and education	necessary for providing accurate counseling, consultation and education	providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities. 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities) 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial,	<ul style="list-style-type: none"> Does not demonstrate understanding of oral healthcare delivery systems parts Does not demonstrate 	<ul style="list-style-type: none"> Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other 	<ul style="list-style-type: none"> Demonstrates understanding of most major components of oral healthcare systems and their respective relationships 	<ul style="list-style-type: none"> Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions

[Type here]

technological, and physical resources to optimize the safety and efficacy of medication use systems	<p>understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care</p> <ul style="list-style-type: none"> • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<ul style="list-style-type: none"> • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system 	<ul style="list-style-type: none"> • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare 	<p>related to patient care</p> <ul style="list-style-type: none"> • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness.	• Does not demonstrate	• Demonstrates knowledge of some	• Demonstrates sufficient	• Demonstrates thorough

[Type here]

Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	understanding of how the arts can be utilized to optimize patients' well-being	of the ways that the arts can be utilized to optimize patients' well-being	knowledge of multiple ways that the arts can be utilized to optimize patients' well-being	knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> • Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> • Demonstrates minimal understanding of population-based care and how it influences patient-centered care • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> • Demonstrates sufficient understanding of population-based care and how it influences patient-centered care • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<ul style="list-style-type: none"> • Demonstrates superb understanding of population-based care and how it influences patient-centered care • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care

[Type here]

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information

[Type here]

			may not be effective	
--	--	--	-------------------------	--

[Type here]

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

[Type here]

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action. 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. • Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important

[Type here]

			evidence. Is able to defend decision or course of action at a basic level.	and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	--	---

[Type here]

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> • Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) • Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> • Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> • Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession • Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> • Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) • Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> • Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> • Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> • Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

[Type here]

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

Appendix B**California Northstate University Institutional Learning Objectives**

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state
1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources

[Type here]

1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples

[Type here]

2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> • Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> • Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> • Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> • Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> • Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> • Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> • Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> • Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> • Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> • Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> • Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> • Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> • Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> • Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> • Does not know professional psychological language or uses jargon • Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> • Demonstrates inaccurate use of psychological language or uses jargon in professional communications • Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> • Demonstrates appropriate use of professional language and minimal jargon • Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> • Demonstrates use of appropriate, professional language • Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> • Does not acknowledge other viewpoints • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Demonstrates little attempt to recognize other viewpoints • Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> • Recognizes other viewpoints but has difficulty incorporating them into case conceptualization • Adequately answers patient questions 	<ul style="list-style-type: none"> • Listens to questions with a consideration of alternative viewpoints • Answers questions thoughtfully referencing evidence

[Type here]

3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

[Type here]

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

[Type here]

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited references and includes all necessary information in reference list

California Northstate College of Dental Medicine
Ethics in Dental Medicine and Health Care Course Syllabus

Course #	Course Title	Credits	Year	Term
BSS 522	Ethics in Dental Medicine and Health Care	2	DS 1	Spring

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
January 10, 2021	First day of Spring Term all DMD 1 students
March 1, 2021	Assignment of first group case scenario
May 15, 2021	First 4 case scenarios presentation
May 22, 2021	Second 4 case scenarios presentation
May 30, 2021	Ethics Salons
June 8, 2021	Final Exam

Course Coordinator, Instructors and Contact Information

E mail: holly.jacobson@cnsu.edu

Classroom and Meeting Times

Room: Classroom xxxx

Time: xxxx 2 hours per week

Course Description

The fundamentals of dental and medical ethics are presented including beneficence and non- malfeasance. The Helsinki statement and other aspects of human research guidelines are presented including the role of Human Studies committees. The care of animals in biomedical research is discussed as well as the ethical use of human tissue in clinical care, transplant medicine etc. Ethical financial relationships and the underlying law behind them in clinical practice is discussed. The role of the criminal, tort system, the Board of Dentistry of California, and the ADA in dental ethics is presented.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

McCormick, Suzanne Stucki, *Ethical Decision Making in Dentistry*, PMPH USA, 2017 electronic reserve CNU

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software
7. Dental operator

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	70%
Salon presentation	20%
Final exam	50%

[Type here]

Team Components	30%
Group case based	20%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group case-based projects are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).
Presentation of PCS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing.
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

[Type here]

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

EACH SESSION IS 2 HOURS

Date	Topics	Readings*	Instructor	Notes
Week 1	Fundamentals of dental ethics		Simonsen	
Week 2	Ethical Dilemmas in the education of dentists	McCormick, chapter 1	Assael	
Week 3	Ethics in licensure	McCormick, chapter 3	Keating	
Week 4	Ethics in treatment planning		Simonsen	
Week 5	Ethics in informed consent	McCormick, chapter 15	Cadra	videos
Week 6	First case based ethics salon		Clinical faculty	
Week 7	Patient autonomy, justice, veracity, Beneficence and nonmaleficence in dental practice		Simonsen	Project 1 case assignment to groups
Week 8	OSCE ethics patient interview		Clinical faculty	
Week 9	Ethics Cases Group 1		Clinical faculty	
Week 10	The ethical dilemmas of group practice, systems based practice, and individual practice.	McCormick chapter 4 and 6	Assael	
Week 11	Second case based ethics salon		Clinical faculty	
Week 12	Ethical business practices in dental practice		Chang	
Week 13	Ethics cases group 2		Keating	

[Type here]

Week 14	Summative session dental ethics		Simonsen	
Week 15	Final exam		Simonsen

CLO Rubrics

CLO 1: Understand the fundamental of ethics in dental education and practice

Indicators	Initial	Developing	Developed	Proficient
Understand the fundamental of ethics in dental education and practice	Only prior practical knowledge of ethics	Demonstrates rudimentary ability to relate ethical standards	Has detailed understanding of ethical responsibilities and can relate fundamentals	Consistently demonstrates the ability to apply ethical knowledge into practice

CLO 2: Be able to apply didactic knowledge of dental ethics to address clinical problems in dental practice

Indicators	Initial	Developing	Developed	Proficient
Apply didactic knowledge of ethics into clinical practice	Has no or limited knowledge of application of ethics into practice	Begins to exhibit application of didactic knowledge of ethics into practice	Consistently applies didactic knowledge of ethics into dental practice	Complete knowledge and skill in application of ethical standards and is able to reflect on these and augment them through integration and consideration of consequences of actions.

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

25. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
26. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
27. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
28. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
29. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
30. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
31. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
32. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for understanding or rephrase when confusion occurs. Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding and generally asks questions. Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding and asks appropriate questions. Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling,

[Type here]

		counseling, consultation and education	counseling, consultation and education	consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities. 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities) 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to	<ul style="list-style-type: none"> Does not demonstrate understanding of oral healthcare delivery systems parts Does not demonstrate understanding of the forces that 	<ul style="list-style-type: none"> Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other Demonstrates understanding of 	<ul style="list-style-type: none"> Demonstrates understanding of most major components of oral healthcare systems and their respective relationships Demonstrates understanding of the forces that 	<ul style="list-style-type: none"> Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action. 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. • Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important

[Type here]

			evidence. Is able to defend decision or course of action at a basic level.	and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	--	---

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state
1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources

[Type here]

1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples

[Type here]

2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> • Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> • Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> • Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> • Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> • Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> • Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> • Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> • Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> • Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> • Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> • Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> • Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> • Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> • Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> • Does not know professional psychological language or uses jargon • Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> • Demonstrates inaccurate use of psychological language or uses jargon in professional communications • Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> • Demonstrates appropriate use of professional language and minimal jargon • Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> • Demonstrates use of appropriate, professional language • Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> • Does not acknowledge other viewpoints • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Demonstrates little attempt to recognize other viewpoints • Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> • Recognizes other viewpoints but has difficulty incorporating them into case conceptualization • Adequately answers patient questions 	<ul style="list-style-type: none"> • Listens to questions with a consideration of alternative viewpoints • Answers questions thoughtfully referencing evidence

[Type here]

3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

[Type here]

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

[Type here]

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine
Behavioral Medicine Course Syllabus

Course #	Course Title	Credits	Year	Term
BSS 662	Behavioral Medicine (CP Course) <i>LAL, Clin</i>	3	DS 2	Spring

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
	First day of Spring Term for all DMD 2 students

Course Coordinator, Instructors and Contact Information

Bret McLaughlin D. Psych. (course co-director)

Room:

E mail: bret.mccaughlin@cnsu.edu

Office hours

Leon Assael DMD (course co-director)

[Type here]

Room:

E-mail: leon.assael@cnsu.edu

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

Holly Jacobson BA (course administrator)

Room: xxx

E mail: holly.jacobson@cnsu.edu

Classroom and Meeting Times

Room: Classroom xxxx

Time: xxxx 2 hours per week

Clinic and meeting times

Room: Stone Lake Psychology Clinic

Time: 4 hours per week for 3 weeks per student

Course Description

In this course aspects of clinical psychology of importance in dental practice is presented. Cased base learning will include: minor and major psychiatric illnesses impacting on oral health and the provision of oral health care; elder, spousal and child abuse; dental fear; and, dental phobias.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

15. *Bates guide to physical examination and history Taking- 11th edition*, Bickley, Lynn, Wolters Kluwer
16. Yagiela, *Pharmacotherapy and therapeutics for Dentistry*, Elsevier, 2018
17. Casamassimo, *Pediatric Dentistry, infancy through adolescence*, Elsevier 2017
18. Barlow, D. *Clinical Handbook of Psychological disorders*, the Guilford Press, 2014

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record

[Type here]

6. PACS, DICOM compatible imaging software
7. Psychology clinic

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
First quiz	10%
Second Quiz	10%
Final exam	30%
Clinical evaluation practical	30%

Team Components	20%
Group PCS projects X2	10%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

[Type here]

1. Group PCS cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).

Presentation of PCS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing.

2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

Date	Topics	Readings*	Instructor	Notes
Week 1 LAL	Introduction to behavioral sciences		McLaughlin/ Assael	
1: Clinic assignment	Groups 1,2,3,4 (4 students per day mon/tues/wed/thurs)		Clinical faculty and staff	
Week 2	Behavioral issues in dental practice		Assael	
2: Clinic assignment	Groups 5,6,7,8		Clinical faculty and staff	
Week 3 Psychological disorders 1	Panic disorder, phobias, PTSD	Barlow Chapter 1,2,3	McLaughlin	
Week 3: clinic assignment	Groups 9,10,11,12		Clinical faculty and staff	
Week 4: psychological disorders 2	OCD, anxiety disorder, depression	Barlow chapter 4,5,6,7,8	McLaughlin	
Week 4 Clinic assignment	Groups 13,14,15,16		Clinical faculty and staff	
Week 5: Psychological disorders 3	Borderline personality, bipolar disorder, schizophrenia and other psychoses	Barlow chapter 10,11,12,13	McLaughlin	Case assignments X4 to groups

CLO Rubrics

CLO 1: Develop an initial understanding and capability to assess behavioral issues in dental practice

Indicators	Initial	Developing	Developed	Proficient
Has an understanding and capability to assess behavioral issues in dental practice	Begins to apply behavioral sciences knowledge to the attendance of clinical issues in dental practice	Demonstrates ability be a clinical team member but with evolving demonstration of understanding their own role and the role of others in behavioral sciences	Has detailed understanding of behavioral sciences issues in dental practice and has the capability to apply that knowledge in the care of dental patients	Consistently demonstrates the ability participate at the level of their knowledge and skill as a clinical team member.

CLO 2: Communicate with the behavioral science clinical team with regard to interprofessional collaborative practice issues to improve patient care

Indicators	Initial	Developing	Developed	Proficient
Can communicate with the behavioral sciences team with regard to collaborative practice issues to improve patient care	Has no or limited knowledge of behavioral health professionals and their role in oral health care	Begins to exhibit knowledge of the capability of the behavioral health team as a resource in oral health practice	Can implement team approach to care with behavioral health in patient care with uncommon non critical errors	Creates features of a collaborative practice team in oral health and behavioral health

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

33. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
34. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
35. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
36. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
37. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
38. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
39. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
40. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for understanding or rephrase when confusion occurs. Demonstrates the ability to find a one or two resources, yet the resources are not the best or 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding and generally asks questions. Frequently demonstrates the ability to find and utilize appropriate resources and 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding and asks appropriate questions. Consistently demonstrates the ability to find and utilize appropriate resources and

[Type here]

	consultation and education	most appropriate for providing accurate counseling, consultation and education	references necessary for providing accurate counseling, consultation and education	references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities. 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities) 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human,	<ul style="list-style-type: none"> Does not demonstrate understanding of oral healthcare delivery systems parts 	<ul style="list-style-type: none"> Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how 	<ul style="list-style-type: none"> Demonstrates understanding of most major components of oral healthcare systems and their respective relationships 	<ul style="list-style-type: none"> Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and

[Type here]

financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<p>they are related to each other</p> <ul style="list-style-type: none"> • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system 	<ul style="list-style-type: none"> • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare 	<p>their functions related to patient care</p> <ul style="list-style-type: none"> • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
--	---	---	---	--

[Type here]

<p>2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness</p>	<ul style="list-style-type: none"> • Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
<p>2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices</p>	<ul style="list-style-type: none"> • Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> • Demonstrates minimal understanding of population-based care and how it influences patient-centered care • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> • Demonstrates sufficient understanding of population-based care and how it influences patient-centered care • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<ul style="list-style-type: none"> • Demonstrates superb understanding of population-based care and how it influences patient-centered care • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care

[Type here]

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information

			may not be effective	
--	--	--	-------------------------	--

[Type here]

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action. 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. • Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important

[Type here]

			evidence. Is able to defend decision or course of action at a basic level.	and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	--	---

[Type here]

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> • Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) • Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> • Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> • Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession • Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> • Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) • Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> • Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> • Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> • Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

[Type here]

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

[Type here]

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state
1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources

[Type here]

1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples

[Type here]

2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> • Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> • Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> • Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> • Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> • Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> • Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> • Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> • Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> • Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> • Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> • Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> • Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> • Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> • Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> • Does not know professional psychological language or uses jargon • Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> • Demonstrates inaccurate use of psychological language or uses jargon in professional communications • Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> • Demonstrates appropriate use of professional language and minimal jargon • Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> • Demonstrates use of appropriate, professional language • Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> • Does not acknowledge other viewpoints • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Demonstrates little attempt to recognize other viewpoints • Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> • Recognizes other viewpoints but has difficulty incorporating them into case conceptualization • Adequately answers patient questions 	<ul style="list-style-type: none"> • Listens to questions with a consideration of alternative viewpoints • Answers questions thoughtfully referencing evidence

[Type here]

3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

[Type here]

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited references and includes all necessary

California Northstate College of Dental Medicine

Foundations of Dental Medicine Course Syllabus

Course #	Course Title	Credits	Year	Term
OMFS 511	Foundations of Dental Medicine <i>LAL</i>	3	DS 1	Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

This course begins in the summer term and is the major educational component of the first year Summer term.

Date	
August 6, 2020	First day of term for all DMD 1 students
October 10, 2020	Group project selection: one for each college of 20 students
December 1, 2020	Group project groups 1 and 2
December 8, 2020	Group project groups 3 and 4
December 15, 2020	Final Exam

Course Coordinator, Instructors and Contact Information

Michael Cadra DDS MD (course co-director)

Room:

E mail

Office hours

Leon Assael DMD (Course co-director)

Room:

E-mail: leon.assael@cnsu.edu

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

Holly Jacobson BA (course administrator)

Room: xxx

E mail: holly.jacobson@cnsu.edu

Classroom LAL and Meeting Times

Room: Classroom xxxx

Time: xxxx 3 hours per week

Course description

This course will focus on introduction to the patient/doctor relationship, the role of dental medicine in health care, the scientific basis of the molecular basis, pathophysiology, diagnostic methods, and treatment modalities of major oral diseases. These are reviewed to provide the basis for case based learning in Human Studies. Examples will include congenital diseases such as cleft lip and palate, degenerative diseases such as rheumatoid arthritis, neoplastic disease such as oral squamous cancer, traumatic diseases such as facial fracture, and infectious disease such as HPV.

This course includes a review of biochemistry relevant to the medical school first and second year HS courses to match the coursework provided to the MD students in foundations of medicine. It will review the critical thinking, evidence based medicine, research modalities and analysis of scientific literature to apply in clinical education and practice

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

19. *Medical Biochemistry*, Baynes and Dominiczak, 4th Ed, Elsevier 2014
20. *The CONSORT Statement*, www.consort-statement.org
21. *The PRISMA Statement*. www.prisma-statement.org
22. *The STROBE statement*, www.strobe-statement.org

[Type here]

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software
7. Dental operator

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	50%
Final Exam	50%

Group Components	50%
CCBL Participation and Project	20%
Biochemistry Boot Camp	10%
Dental Medical Skills	10%
Final Exam	50%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

[Type here]

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group Projects cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).
Presentation of group cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing. The teams will each have 30 minutes for presentation which is ample time for participation of each member
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

[Type here]

Topics and Schedule*(Subject to change. Updates will be posted to CANVAS and announced by email)*

All readings are in Vital Source, or as assigned and posted to CANVAS

Foundations of Dental Medicine DS1 - CDM 511 – Summer Fall 2020-21				
8/6/2018 - 9/21/2018				
Weeks	Date	Time	Title	Faculty
Week 1				
	Monday, 8/6/18	8:00 - 9:00 am	Introduction to Foundations	Assael
	Monday, 8/6/18	9:00 - 10:00 am	Body & Fluid Compartments	Yarbrough
	Monday, 8/6/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 1	Cadra
	Monday, 8/6/18	12:00 - 1:00 pm	LUNCH	
	Monday, 8/6/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 2	CADRA
	Monday, 8/6/18	3:00 - 5:00 pm	SELF STUDY	
	Tuesday, 8/7/18	8:00 - 10:00 am	Microbiota & Infectious; Agents: Biology & Ways of Life	El-Sawi
	Tuesday, 8/7/18	10:00 - 12:00 pm	Enzyme Function & Kinetics	Krig
	Tuesday, 8/7/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 8/7/18	1:00 - 2:00 pm	Introduction to Histology	Ramsamooj
	Tuesday, 8/7/18	2:00 - 4:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 8/7/18	4:00 - 5:00 pm	SELF STUDY	
	Wednesday, 8/8/18	8:00 - 10:00 am	Masters Colloquium	
	Wednesday, 8/8/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 1	Ely
	Wednesday, 8/8/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 8/8/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 2	Ely
	Wednesday, 8/8/18	3:00 - 5:00 pm	SELF STUDY	
	Thursday, 8/9/18	8:00 - 10:00 am	Cell Growth & Communication	Krig
	Thursday, 8/9/18	10:00 - 12:00 pm	Dental/Medical Skills Group A / Self Study	
	Thursday, 8/9/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 8/9/18	1:00 - 3:00 pm	DentalMedical Skills Group B / Self Study

	Friday, 8/31/18	4:00 - 5:00 pm	Release of CCBL Genetics Learning Objectives & Bradbury slides set(s)	

Week 5				
	Monday, 9/3/17	HOLIDAY - Labor Day		
	Tuesday, 9/4/18	8:00 - 10:00 am	MANDATORY: Mid Exam Part B	
	Tuesday, 9/4/18	10:00 - 12:00 pm	MANDATORY: Team Test Groups 1-5	
	Tuesday, 9/4/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 9/4/18	1:00 - 3:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 9/4/18	3:00 - 5:00 pm	SELF STUDY	
	Wednesday, 9/5/18	8:00 - 9:00 am	Clinical Presentation: Well Visits	Glaser
	Wednesday, 9/5/18	9:00 - 12:00 pm	MANDATORY WORKSHOP: Introduction to the Autonomic Nervous System & Autonomic Pharmacology	Yarbrough & Gerriets
	Wednesday, 9/5/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 9/5/18	1:00 - 2:00 pm	Neoplasia	Hejazi
	Wednesday, 9/5/18	2:00 - 5:00 pm	SELF STUDY	
	Thursday, 9/6/18	8:00 - 9:00 am	Introduction to Vaccines	Ely
	Thursday, 9/6/18	9:00 - 10:00 am	Physiological Control of Temperature	Yarbrough
	Thursday, 9/6/18	10:00 - 12:00 pm	Dental/Medical Skills - Group C / MANDATORY: Biostatistics LAB Group B	Puglisi & Jialal / IDL Lab
	Thursday, 9/6/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 9/6/18	1:00 - 3:00 pm	Dental/Medical Skills - Group A / MANDATORY: Biostatistics LAB Group C	Puglisi & Jialal / IDL Lab
	Thursday, 9/6/18	3:00 - 5:00 pm	Dental/Medical Skills - Group B / MANDATORY: Biostatistics LAB Group A	Puglisi & Jialal / IDL Lab
	Friday, 9/7/18	8:00 - 10:00 am	Introduction to Virology	El-Sawi
	Friday, 9/7/18	10:00 - 12:00 pm	MANDATORY: Clinical Cases	Glaser
	Friday, 9/7/18	12:00 - 1:00 pm	LUNCH	
	Friday, 9/7/18	1:00 - 5:00 pm	SELF STUDY	
Week 6				

[Type here]

	Monday, 9/10/18	8:00 - 10:00 am	Introduction to Mycology & Parasitology	El-Sawi
	Monday, 9/10/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 9	Ely
	Monday, 9/10/18	12:00 - 1:00 pm	LUNCH	
	Monday, 9/10/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 10	Ely
	Monday, 9/10/18	3:00 - 5:00 pm	SELF STUDY	
	Tuesday, 9/11/18	8:00 - 10:00 am	Pharmacokinetics & Pharmacodynamics - Wrap-up & Review	Gerriets
	Tuesday, 9/11/18	10:00 - 11:00 am	Clinical Presentation: Allergy - Hypersensitivity Reactions & Allergy	Ely
	Tuesday, 9/11/18	11:00 - 12:00 pm	Pharmacological Management of Allergic Reactions	Gerriets
	Tuesday, 9/11/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 9/11/18	1:00 - 3:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 9/11/18	3:00 - 5:00 pm	SELF STUDY	
	Wednesday, 9/12/18	8:00 - 10:00 am	MANDATORY: Masters Colloquium	
	Wednesday, 9/12/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 9	Ely
	Wednesday, 9/12/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 9/12/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 10	Ely
	Wednesday, 9/12/18	3:00 - 5:00 pm	SELF STUDY	
	Thursday, 9/13/18	8:00 - 10:00 am	MANDATORY - CCBL WORKSHOP: GROUPS 1-10 Presentations	
	Thursday, 9/13/18	10:00 - 12:00 pm	Dental/Medical Skills - Group B / Self Study	
	Thursday, 9/13/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 9/13/18	1:00 - 3:00 pm	Dental/Medical Skills - Group C / Ask The Expert! Pathology Slam	
	Thursday, 9/13/18	3:00 - 5:00 pm	Dental/Medical Skills - Group A / Ask The Expert! Pathology Slam	
	Friday, 9/14/18	8:00 - 9:30 am	FACULTY-LED COURSE CONTENT REVIEW (excludes Pharm) GUIDANCE ON TEST COMPOSITION	
	Friday, 9/14/18	9:30 - 10:00 am	MANDATORY: COURSE EVALUATION	
	Friday, 9/14/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 9	Ely
	Friday, 9/14/18	12:00 - 1:00 pm	LUNCH	
	Friday, 9/14/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 10	Ely
	Friday, 9/14/18	3:00 - 4:00 pm	SELF STUDY	
	Friday, 9/14/18	4:00 - 5:00 pm	Release of CCBL Genetics Learning Objectives & Bradbury slides set(s)	
Week 7	Monday, 9/17/18	8:00 - 12:00 pm	Comprehensive Summative Exam	
EXAM				

[Type here]

	Tuesday, 9/18/18	1:00 - 5:00 pm	N/A	
	Wednesday, 9/19/18	8:00 - 5:00 pm	N/A	
	Thursday, 9/20/18	8:00 - 5:00 pm	Dental/ MEDICAL SKILLS SUMMATIVE EXAM	
	Friday, 9/21/18	8:00 - 12:00 pm	Biochem review exam	

Biochemistry Bootcamp Sessions

1. Amino Acids/proteins/carbohydrates/lipids
2. Blood plasma/oxygen transport/hemostasis
3. Energy/ membranes/oxidative metabolism
4. DNA/RNA/protein synthesis
5. Absorption/transport and utilization of nutrients
6. Gene expression/proteomics

Clinical Case Based Learning: CCBL sessions (divided into 3 sessions each for 3 groups)

Development of understanding of etiopathogenesis, treatment and outcomes in case-based format in small group learning with clinician educator

- Session 1: Embryology of cleft lip and palate and other craniofacial disorders
- Session 2: Bacterial and Viral diseases of the oral cavity
- Session 3: Tumors of the head and neck

Dental/Medical Skills Lab

1. Vital signs, head and neck exam
2. Specimen collection and parenteral administration: saliva, venipuncture, IM, SC and SM injections
3. Oroscopic mucosal, endoscopic, laryngoscopy, otoscopy, ophthalmoscopy,
4. Clinical photography and digital surface scanning
5. Auscultation of the carotid, trachea heart and lungs
6. Ultrasound of the oral and maxillofacial region

Course Learning Outcomes

1. Review fundamentals of biochemistry
2. Introduce basic science underpinnings of clinical practice in preparation for systems based basic medical science HS curriculum
3. Develop initial clinical skills in oral and maxillofacial studies

[Type here]

4. Apply basic science knowledge in CCBL sessions to clinical cases

Course Learning Outcomes and links to Program Learning Outcomes (Appendix A) and Institutional Learning Outcomes (Appendix B)

No.	Course Learning Outcome	DMD PLO	DMD ILO	Learning Hierarchy ^b	Assessment Method
1	Review fundamentals of biochemistry	2,3,4,7,8	1,3,4,6	1,2, 3	Biochem Exam
2	Introduce basic science underpinnings of clinical practice in preparation for systems based basic medical science HS curriculum	1,2,3,5,6,7,8	1,4,	1,2, 3	Final exam
3	Develop initial clinical skills in oral and maxillofacial studies	1,2,3,5,6,7,	1,4	1,2	Skills formative assessment in lab
4	Apply basic science knowledge in CCBL sessions to clinical cases	1,2,3,5,6,7,	1,4	2,3	Group and peer assessment

^a plo's appendix A

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. LAL: Lecture and active learning **CLO Rubrics**

[Type here]

CLO 1: Review fundamentals of biochemistry

Indicators	Initial	Developing	Developed	Proficient
Demonstrates an understanding of the elements of biochemistry to apply in HS courses	Does not understand the elements of biochemistry to apply in HS courses.	Demonstrates rudimentary understanding of these elements	Has detailed understanding the component of biochemistry applied to human systems	Consistently demonstrates the ability to apply knowledge and skill as a dental student and can assist other students in these domains

CLO 2: Introduce basic science underpinnings of clinical practice in preparation for systems-based basic medical science HS curriculum

Indicators	Initial	Developing	Developed	Proficient
Develop an understanding of the underpinnings of basic science applied to clinical practice	Has no or limited knowledge of the basic science underpinnings of clinical practice	Begins to exhibit knowledge of these underpinnings	Is capable of applying basic science to clinical examples effectively	Consistently applies biomedical science to clinical situations utilizing innovation and analysis

[Type here]

CLO 3: Develop initial clinical skills in oral and maxillofacial studies

Indicators	Initial	Developing	Developed	Proficient
Develop initial clinical skills in oral and maxillofacial studies	Has no or limited knowledge or experience with these skills	Begins to exhibit capability of applying clinical skills in practice	Is capable of applying fundamental skills in oral and maxillofacial studies to clinical diagnostic procedures	Is utilizing these skills in a integrated fashion to begin to address clinical problems

CLO 4: Apply basic science knowledge in CCBL sessions to clinical cases

Indicators	Initial	Developing	Developed	Proficient
Apply basic science knowledge to clinical cases in the CCBL format	Has no or limited ability	Begins to exhibit ability to apply basic science knowledge to a clinical question	Is capable of applying basic science to clinical examples effectively	Consistently applies biomedical science to clinical situations utilizing innovation and analysis

[Type here]

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

41. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
42. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
43. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
44. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
45. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
46. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
47. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
48. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for understanding or rephrase when confusion occurs. Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding and generally asks questions. Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding and asks appropriate questions. Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling,

[Type here]

		consultation and education	consultation and education	consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities. 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities) 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety	<ul style="list-style-type: none"> Does not demonstrate understanding of oral healthcare delivery systems parts Does not demonstrate understanding of the forces that influence 	<ul style="list-style-type: none"> Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other Demonstrates understanding of some forces that 	<ul style="list-style-type: none"> Demonstrates understanding of most major components of oral healthcare systems and their respective relationships Demonstrates understanding of the forces that influence the 	<ul style="list-style-type: none"> Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care

[Type here]

and efficacy of medication use systems	<p>components of the oral healthcare delivery system, including their connection to patient care</p> <ul style="list-style-type: none"> • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<p>influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care</p> <ul style="list-style-type: none"> • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system 	<p>components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care</p> <ul style="list-style-type: none"> • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare 	<ul style="list-style-type: none"> • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and	<ul style="list-style-type: none"> • Does not demonstrate understanding of how the arts can be 	<ul style="list-style-type: none"> • Demonstrates knowledge of some of the ways that the arts can be utilized 	<ul style="list-style-type: none"> • Demonstrates sufficient knowledge of multiple ways that 	<ul style="list-style-type: none"> • Demonstrates thorough knowledge of the ways that the arts

[Type here]

educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	utilized to optimize patients' well-being	to optimize patients' well-being	the arts can be utilized to optimize patients' well-being	can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> • Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> • Demonstrates minimal understanding of population-based care and how it influences patient-centered care • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> • Demonstrates sufficient understanding of population-based care and how it influences patient-centered care • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<ul style="list-style-type: none"> • Demonstrates superb understanding of population-based care and how it influences patient-centered care • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care

[Type here]

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information

			may not be effective	
--	--	--	-------------------------	--

[Type here]

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action. 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. • Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important

[Type here]

			evidence. Is able to defend decision or course of action at a basic level.	and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	--	---

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> • Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) • Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> • Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> • Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession • Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> • Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) • Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> • Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> • Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> • Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

[Type here]

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

[Type here]

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state
1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources

[Type here]

1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples

[Type here]

2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> • Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> • Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> • Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> • Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> • Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> • Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> • Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> • Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> • Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> • Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> • Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> • Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> • Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> • Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> • Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> • Does not know professional psychological language or uses jargon • Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> • Demonstrates inaccurate use of psychological language or uses jargon in professional communications • Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> • Demonstrates appropriate use of professional language and minimal jargon • Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> • Demonstrates use of appropriate, professional language • Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> • Does not acknowledge other viewpoints • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Demonstrates little attempt to recognize other viewpoints • Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> • Recognizes other viewpoints but has difficulty incorporating them into case conceptualization • Adequately answers patient questions 	<ul style="list-style-type: none"> • Listens to questions with a consideration of alternative viewpoints • Answers questions thoughtfully referencing evidence

[Type here]

3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

[Type here]

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

[Type here]

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited references and includes all necessary information in reference list

Clinical Clerkship: Oral and Maxillofacial Surgery

Summative Competency Evaluation in Medically Affected Patient (ASA 2 or 3)

Exodontia for Medically Affected Patient

Course #	Course Title	Credits	Year	Term
OMFS 772	Clinical Clerkship: Oral and Maxillofacial Surgery <i>4 weeks, 30 hours per week plus call</i>	8	DS 3	Spring

Narrative: In this competency evaluation the DMD student will provide a full intake evaluation of a patient requiring exodontia with a medically affecting condition to ASA level 2 or 3. The student will provide a coherent assessment that takes into account basic medical science issues regarding the affecting systemic disease including relevant pathology, pathophysiology, pharmacology, biochemistry, behavioral and social sciences. The student will as well recommend a treatment protocol that takes into account the compromises and interventions required to produce safe care. The student will present the case unaided to the faculty member who will present additional questions relevant to the care of the patient. The student will present the plan to the patient using PARQ (explanation of procedure, alternatives, once a safe plan is presented and accepted by faculty and patient, the student will perform exodontia. Provide postoperative instructions customized to the biomedical conditions and surgical intervention. Ethics and professionalism for all activities is assessed as well.

Competent: Gains competency for the evaluated procedure

Exceptional: Earns EPR (exceptional performance review) for the CE if in 2 or more domains

Scoring Rubric

ASSESSMENT DOMAIN	Not proficient	Developing	Competent	Exceptional
Biomedical Knowledge	Unable to correlate biomedical sciences into treatment decisions	Understands basics of biomedical sciences pertinent but does not apply knowledge completely to case	Understands and applies biomedical knowledge appropriately to this case to guide treatment decisions	Uses thorough knowledge and reflection to determine all necessary aspects of concurrent care decisions and incorporates

[Type here]

				biomedical knowledge into customizing current and future care to patient needs
Patient intake information	Does not contribute necessary information to guide care decisions	Partially appropriately applies intake information to guide care	appropriately applies intake information to guide care	Utilizes information from intake including biomedical aspects, cultural behavioral and social issues to customize care to patient needs
Patient presentation and informed consent	Unable to provide PARQ consent to patient or to present treatment plan and its biomedical basis to faculty	Partially able to provide PARQ consent to patient or to present treatment plan and its biomedical basis to faculty	Able to provide appropriate PARQ consent to patient or to present treatment plan and its biomedical basis to faculty	Provides exceptional humanistic and biomedically knowledgeable presentation. Provides PARQ consent in caring and complete fashion
Procedural management Local anes/ surgical performance	Unable to provide local anesthesia or to perform surgery	Incomplete local anesthesia or surgical performance requiring assistance	Able to provide local anesthesia and perform surgery in caring and competent fashion	Shows facility in psychomotor aspects of anesthesia and surgical care with high level of patient comfort and acceptance
Patient comfort Ethics and professionalism	Exhibits overt lapses in professionalism or ethics	Lack of self-awareness or communication skills give impression of deficit in professionalism or ethics	Able to provide care in a fully ethical and professional manner that achieves patient comfort and acceptance	Manages difficult clinical situation of exceptional nature with humanism and highest level of professionalism
Postoperative instructions and plan	Does not provide coherent POI and plan	Has a critical error in POI and postoperative plan	Provides all POI and plan appropriately for the patient's condition	Provides all POI and plan appropriately for the patient's condition incorporating biomedical knowledge, customized to the nature of the surgical intervention and

**Course Syllabus for:
College of Dental Medicine
California Northstate University**

BSS 862, clinical clerkship, community-based education

Spring DS 4, 4 weeks, 30 hours per week, 8 credits

Course Unit Value: 8 Units

Per the Credit Assignment Policy one unit of credit equals one hour of instruction for didactic courses each week per semester; for classes containing lab work such as simulation or compounding, one unit of credit is equal to two hours each week. Thus, a one unit practicum which includes a mixture of didactic and hands-on activities may range from 15 to 30 hours per semester.

Maximum Enrollment: DS 4 class, 80

Calendar of Important Dates:

May xxxx	Site selection plenary session and submission of request
May xxxx	Completion and publication of site selection match
June 1 xxxx	Beginning of first rotation (each 4 weeks for 48 weeks)
May 1`	Final reflection paper due
May xxxx	Capstone presentations to DS 3 class and faculty by site as teams

Course Coordinator, Instructors and Contact Information

Leon Assael DMD and Wai Chan DDS co-directors

[Type here]

Room: Office of the Dean 9700 West Taron Drive

Phone: 916-686-7871

E-mail: leon.assael@cnsu.edu and wai.chan@cnsu.edu

Office hours: Tuesdays 1pm to 4pm, Wednesdays 8am to 9am (or by appointment)

Classroom and Meeting Times

On site at community facilities, and at 9700 W Taron Drive TBA for orientation, selection and capstone presentations

Course Description

Affiliated health systems based practices will accept CNU students into their care teams where senior students will provide clinical care under the supervision of Volunteer Community Based Faculty in those sites. Suitable transportation and housing will be arranged for where needed. The purpose of the course is to provide community engagement with the constituencies served, to gain experience in community based clinical care and to interact with the interprofessional (primary care medicine and behavioral health) and intraprofessional (dental professionals) care teams.

This course will be at a community based rotation site to elaborate on the activities of the first rotation and engage a new community and a new clinic. In addition to comprehensive care experience, the student will compare and contrast communities and clinical care entities and provide a reflective essay on their community care experience. The reflective essay (of approximately 5000 words) should be in thesis format suitable for publication and address a principle issue identified in the service community of one or more of the community clerkships. The group Capstone presentation will present on each of the clinical sites to the faculty and DS3 (following) class as well as the DS4 BSS862 class and develop the themes of the individual students in reporting in their thesis on the community issues of note.

Prerequisite Courses

Successful completion of Comprehensive Care Dentistry ODONT 761 and ODONT 762, successful completion of oral and maxillofacial surgery clinical clerkship OMFS 761 and clinical clerkship pediatric dentistry OFS 762

Prerequisite Knowledge

Understanding of oral health systems and interprofessional practice from rotations and public health coursework

Required Textbook(s) and Material(s)

Textbook of Public Health Dentistry, 3rd edition, Hiremath SE, Elsevier, 2018

[Type here]

Web Links

The FQHC as described by the CMMS (Center for Medicare and Medicaid Services) of federal government

<https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/downloads/fqhcfactsheet.pdf>

Technology

1. Web conference link to CNU for seminars
2. Web-based course management - CANVAS
3. Computer-assisted assessment - Exam Soft
4. Audio/Video recordings and demonstrations where applicable

Evaluation Components

In keeping with the Team Based Learning (TBL) approach in community health with integration of volunteer community faculty with full time CNU faculty, grades will be determined as follows:

Individual Components	80%
Daily evaluations of VCF faculty	20%
Summative evaluation by clinic director at end of rotation	40%
Reflective essay CAPSTONE THESIS	20%
Team Components	20%
In-class CAPSTONE PRESENTATION	10%
Peer-Evaluation OF CAPSTONE PRESENTATION	5%
Final CAPSTONE Team Project SUBMISSION	5%

All students must demonstrate minimal individual competency. Therefore, students earning less than 70% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 70.0% on individual components may be subject to periodic course content review and may receive an Academic Alert.

GRADING

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

[Type here]

90.0-100%	A
80.0-89.9%	B
75.0-79.9%	C - Pass
60.0-74.9%	D- Requiring remediation
Below 60.0%	F - Fail
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course coordinator may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Grade appeal for any individual assignment (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
2. IRAT should only be taken when the student is physically present in the class.
3. Electronic devices should not be used during TRAT.
4. There will be no rounding of final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

On the Friday before the beginning of each rotation (every 4 weeks) a 1 hour session to review plans and expectations plus a one hours session on ethics and public health (session 1) and on the FQHC model (session 2) will be given.

[Type here]

Clinical rotations are of 4 weeks regardless of academic calendar and include holiday weeks. Normal active clinical time is from 8-12 and 1-5 PM depending upon the site requirements.

Capstone presentations will be plenary in May and of 3 hours duration.

Course Learning Outcomes

No.	Learning Outcome	CNUCDM PLO Links	CNU ILO Links	Learning Hierarchy ^c	Assessment Method ^d		
1	Improve clinical care abilities to a level of proficiency in the comprehensive dental care of dental patients at all stages of life.	1,2,3,4,5,6,7,8	1,2,5,6	2-3	Daily evaluations Summative evaluations		
2	Develop a defined awareness of the health system of the rotation site and how it is a resource to the community it serves.	1,2,3,4,5,6,7,8	1,3,4,6	2, 3	Capstone thesis Capstone presentation		
3	Demonstrate a detailed understanding of the health needs of the community served by the health system entity of the community based rotation	1,2,3,4,5,6,7,8	1,4,5,6	2, 3	<table><tr><td>Daily evaluations Summative evaluations</td></tr><tr><td>Capstone thesis Capstone presentation</td></tr></table>	Daily evaluations Summative evaluations	Capstone thesis Capstone presentation
Daily evaluations Summative evaluations							
Capstone thesis Capstone presentation							
4	Uses the knowledge, skills, abilities, behaviors, and attitudes necessary to demonstrate self-awareness, to improve as a clinician and a healer.	1,2,3,4,5,6,7,8	1,2,3,4,5,6	2, 3	Peer evaluation Capstone thesis and Capstone presentation		

^c Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation

Program Learning Outcomes (PLOs) DMD Program

49. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
50. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
51. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
52. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
53. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
54. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
55. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

56. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

Teaching/ Learning Methodology

1. Clinical orientation
2. Patient care
3. Daily feedback
4. Case conferences
5. Learning Activities:
 - a. Capstone thesis
 - b. Capstone presentations
 - c. Faculty summative evaluation and peer review

CLO Rubrics – BSS 862

1. Improve clinical care abilities to a level of proficiency in the comprehensive dental care of dental patients at all stages of life

Indicators	Initial	Developing	Developed	Proficient
Improves clinical care abilities in a functioning clinical setting	Demonstrates difficulty in providing comprehensive clinical dental care in a functioning clinical setting	Provides comprehensive care in some but not all components of clinical dentistry. Often requires help or referral for comprehensive care components	Demonstrates solid ability to evaluate patients and to provide all uncomplicated care within the scope of general dentistry, accurately, compassionately, in an evidence based manner and in a humanistic and culturally sensitive way	Demonstrates proficiency providing exemplary care and is practice ready in every way including direct provision of care, patient and staff management, community engagement. Has developed a professional identity in dental medicine to be positioned for success as a practicing dentist.
Proficiently delivers care to patients at all stages of life	Unable to assess or treat patients at all stages of life due to lack of experience and applied knowledge	Provides limited care to infants, toddlers and/or elderly with appropriate applied knowledge. Experience is developing	Has substantial applied knowledge and experience to provide services within the scope of general dentistry at all stages of life	Can lead the oral health care team in providing oral health care to infants, toddler, children and the elderly within the scope of general dentistry

2. Develop a defined awareness of the health system of the rotation site and how it is a resource to the community it serves.

Indicators	Initial	Developing	Developed	Proficient
Demonstrates understanding of the role of the health entity in community education and its impact on the community it serves	Does not understand the nature of either the health system, the clinical entity or the community they serve	Demonstrates developing awareness of the health system, the rotation site and the community it engages	Demonstrates understanding of the social economic and business relationships of the clinic, the health system and the community including how care is accessed and what services are available	Demonstrates cultural, sociologic, economic and political understanding of the community, the health entities/systems impacting on the community and the role of the rotation site clinic in that milieu

3. Exhibit a detailed understanding of the health needs of the community served by the health system entity of the community based rotation

Indicators	Initial	Developing	Developed	Proficient
Demonstrates clinically useful sufficient knowledge of the health needs of the community served by the clinical rotation site	Demonstrates cursory understanding of the health needs of communities at large but not specific to the community served by the health system	Demonstrates developing understanding of the community including its cultural dynamics, economic status, epidemiology of disease and relationships with health resources	Demonstrates a working understanding of the disease burden, especially the oral disease burden on the community served by the health system and the community based rotation	Synthesizes the disease status of the community with the health systems and community resources in position to address extant diseases. Demonstrates understanding of how applying resources can impact the health related quality of life in the community.

4. Uses the knowledge, skills, abilities, behaviors, and attitudes necessary to demonstrate self-awareness, to improve as a clinician and a healer.

Indicators	Initial	Developing	Developed	Proficient
------------	---------	------------	-----------	------------

Demonstrates self-knowledge and self-awareness to overcome biases, apply behaviors that improve clinical skills and improve patient outcomes	Does not demonstrate self-awareness of their role as a student dentist, health resource, dental team leader or healer	Demonstrates a developing sense of professional identity as a dentist, demonstrating some elements of being a health educator for patients; a reliable team member, devoted to service in the healing arts	Demonstrates a sense of self efficacy as a new dentist able to be relied upon by patients for their oral health care needs, health education and advocacy, understanding the critical importance of their role.	Demonstrates ability to promulgate their self-awareness of their role to all the members of the oral health care team and to promulgate a preventive and healing model of care to patients and the community
--	---	--	---	--

Appendix 2-1 Methods for Determination of Competency

Human Studies Summative Competency Assessment (HSSCA)

Each of these competencies in HS will include the assessment of the medical condition noted, apply oral health treatment planning in and evidence based way applying clinical reasoning, and demonstrating ethics, professionalism and good communication skills. The following key is used to reflect on the utilization of the requested domains for Standard 2-5 response in the table below

- 1. Clinical Procedures (CP)**
- 2. Problem Solving (PS)**
- 3. Clinical Reasoning (CR)**
- 4. Professionalism (P)**
- 5. Ethical Decision Making (EDM)**
- 6. Communication Skills (CS)**

HS SCA	Course number	Assessment Method Domains	Prerequisites	Comments And Competency Statement Numerical links
Bleeding disorder	HS 526	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Leukemia	HS 526	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Anemia	HS 526	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Arthritis	HS511	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Osteoporosis	HS511	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Stroke	HS551	OSCE PS,CR,CS,EDM	Didactic material HS551	2,3,4,6,7
Parkinson's Disease	HS551	OSCE PS,CR,CS,EDM	Didactic material HS551	2,3,4,6,7

Renal failure	HS 641	OSCE PS,CR,CS	Didactic material HS641	2,3,4,6,7
Acid/base acute infection	HS 641	OSCE PS,CR,CS	Didactic material HS641	2,3,4,6,7
Chronic hepatitis	HS 621	OSCE PS,CR,CS	Didactic material HS 621	2,3,4,6,7
Type 2 diabetes	HS 671	OSCE PS,CR,CS	Didactic material HS 671	2,3,4,6,7
Hyperthyroidism	HS 671	OSCE PS,CR,CS	Didactic material HS 671	2,3,4,6,7
Poly pharmacy	HS 632	OSCE PS,CR,CS, EDM	HS 632 and other HS courses	2,3,4,6,7
Complex medical case assessment: Cardiovascular/pulmonary	HS 721	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from student's existing patients
Complex medical case assessment: Endocrine/oncology/OB/ GI or transplant	HS 722	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from student's existing patients
Complex medical case assessment: Interdisciplinary/ hospital based	HS 821	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from hospital consults while on rotation
Complex medical case assessment: preanesthetic/presurgical consult	HS822	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from preop pool evaluated by student
Complex medical case assessment: Special Needs Patient	HS 821 HS 822	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from preop pool

Odontology Summative and Formative Competency Assessment (OSFCA)

OSFCA	Course number	Assessment method	Prerequisites	Comments
Infection Control	Odont501	Operatory based CP, PS,CR,CS, P, EDM	Didactics and Lab on infection control	1,2,3,4,5,6,7 While comp assessment is in first year each clinical comp continues to assess
Caries risk assessment, app. CAMBRA	Odont 522	Case-based didactic exam PS,CR, P, EDM	didactics Odont 522	1,2,3,4,5,6,7
Operative Dentistry lab FORMATIVE assessment	Odont 621	Laboratory exercise X 4 (class 1,2,3,4) CP, PS, CR	Didactics and lab ODONT 621	2,3,4,5, FORMATIVE
Periodont. Lab SRP formative assessment	Odont 631	Laboratory exercise x 1 CP, PS, CR	Didactics and lab Odon 631	2,3,4,5 FORMATIVE
Periodont. Lab Surgery formative assessment	Odont632	Laboratory exercise x 1 CP, PS, CR	Didactics and lab Odon 632	2,3,4,5 FORMATIVE
Outcomes of periodontal therapy	Odont 752	Patient based CP, PS,CR,CS, P, EDM	Seminar participation	1,2,3,4,5,6,7 Patient selected from students existing patients
Integrated perio care (at least 3) perio/pros/endo/ortho/ oral medicine/ oral surgery assessment	Odont 852	Patient Based CP, PS,CR,CS, P, EDM	Seminar participation	1,2,3,4,5,6,7 Patient selected from students existing patients

Full denture laboratory	Odont 641	Laboratory exercise CP, PS,CR	Lecture and lab Odont 641	2,3,4,5 FORMATIVE
Partial denture laboratory	Odont 641	Laboratory exercise CP, PS,CR	Lecture and lab Odont 641	2,3,4,5 FORMATIVE
Indirect fixed restoration and replacement of teeth)	Odont 741	Laboratory exercise X3 (crown, FPD, CADCAM CP, PS,CR	Lecture and lab Odont 741	2,3,4,5 FORMATIVE
Dental implant placement and restoration	Odont 841	Laboratory exercise CP, PS,CR	Lecture and lab Odont 841	2,3,4,5 FORMATIVE
Endodontic therapy	Odont 532	Laboratory exercise X3 (incisor, premolar, molar) CP, PS,CR	Lecture and lab Odont 532	2,3,4,5 FORMATIVE
Intake odontologic diagnosis and treatment planning	Odont 761	Patient based CP, PS,CR,CS, P, EDM	Daily participation	1,2,3,4,5,6,7
Comprehensive caries treatment	Odont 761	Patient based including comp evaluation of all restorations, application of CAMBRA and disease control CP, PS,CR,CS, P, EDM	Daily participation in clinic and case completion	1,2,3,4,5,6,7
Demonstration of phase 1 therapy	Odont 762	Patient based CP, PS,CR,CS, P, EDM	Phase 1 therapy completed in at least 3 cases	1,2,3,4,5,6,7
Leading the dental team	Odont 861	Team based	Odont 861 for at least 8 weeks	1,2,3,4,5,6,7

		CP, PS,CR,CS, P, EDM		
Completion of phase 1 and 2 therapy	Odont 861 Or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	Odont 862 for at least 8 weeks	1,2,3,4,5,6,7
Operative dentistry: class 2	Odont 861 Or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7
Operative dentistry: crown	Odont 861 or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7
Endodontic therapy	Odont 861 or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7
Scaling and root planing	Odont 861 or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7
Full denture	Odont 861 or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7
Partial Denture	Odont 861 or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7
Fixed partial denture (either implant or tooth supported)	Odont 861 or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7
Dental implant restoration	Odont 861 or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7
Dental emergencies	Odont 861 or Odont 862	Patient Based CP, PS,CR,CS, P, EDM	When ready per group leader assessment	1,2,3,4,5,6,7

2018-2019 General Catalog

JUNE 2018 Volume 1

THE PROVISIONS OF THIS CATALOG REFLECT
INFORMATION AS OF THE DATE OF PUBLICATION.

NOTICE:

This University General Catalog is not a contract nor an offer to enter into a contract and is updated on an annual basis. While every effort is made to ensure the accuracy of the information provided in this University General Catalog, it must be understood that all courses, course descriptions, designations of instructors, curricular and degree requirements and other academic information described herein are subject to change or elimination at any time without notice or published amendment to this catalog. In addition, California Northstate University reserves the right to make changes at any time, without prior notice, to programs, policies, procedures and information, which are described in this University General Catalog only as a convenience to its readers. Fees and all other charges are subject to change at any time without notice. Students should consult the appropriate academic or administrative department, college, or other service provider for currently accurate information on any matters described in this University General Catalog; contact information is available at <http://www.cnsu.edu/>

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

IT IS THE RESPONSIBILITY OF THE INDIVIDUAL STUDENT TO BECOME FAMILIAR WITH THE ANNOUNCEMENTS AND REGULATIONS OF THE UNIVERSITY PRINTED IN THIS GENERAL CATALOG.

California Northstate University will provide assistance to the visually impaired regarding the information contained in this catalog. Questions should be directed to the office or department concerned.

The 2018-2019 University General Catalog covers the academic year from June 1, 2018 to May 31, 2019.

CNU GENERAL INFORMATION

Name, Address, and Website

California Northstate University
9700 West Taron Drive
Elk Grove, CA 95757
Main Campus Telephone: 916-686-7400
Website: <http://www.cnsu.edu>

Telephone numbers for CNU colleges, offices, and departments are provided in DIRECTORY, page 177, of this catalog.

Catalog and School Performance Fact Sheet

The University General Catalog (hereinafter referred to as "Catalog") provides important information on CNU's educational programs, policies, procedures, and student services. As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment.

This institution is required to have you sign and date the information included in the School Performance Fact Sheet relating to completion rates, placement rates, license examination passage rates, salaries or wages, and the most recent three-year cohort default rate, if applicable, prior to signing the Student Enrollment Agreement. By signing the Enrollment Agreement, the student is acknowledging that the catalog, disclosures, and information located on the website have been made available to the student to read and review.

Catalog Availability and Modification Policy

The University General Catalog is available to members of CNU community and prospective students on each College's website at www.cnsu.edu. A link to the Catalog is provided under the "About" heading near the top of the homepage. The Catalog is updated annually during the summer break and more often if necessary due to a significant change in law or University or College policy. The Catalog is subject to change without notice as CNU deems necessary and appropriate. Changes to the publication be reflected in the annual publication of the Catalog. Significant changes that occur between Catalog publications will be published in a supplement. The supplement is available on the CNU website.

Catalog Questions

Students with questions related to this catalog should contact CNU Office of the Registrar. Any questions a student may

have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at:

2535 Capitol Oaks Drive, Suite 400
Sacramento, CA 95833
or
P.O. Box 980818
West Sacramento, CA 95798-0818

Website: www.bppe.ca.gov; Tel: 888 370-7589; Fax: 916-263-1897.

Notice Concerning Transferability of Credits and Credentials Earned at our Institution

The transferability of credits you earn at California Northstate University is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree and diploma you earn in your program is also at the complete discretion of the institution to which you may seek to transfer. If the credits, degree, or diploma that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending California Northstate University to determine if your credits, degree, and diploma will transfer.

Solvency Statement

In accordance with the requirements of California Education Code Section 94909(a)(12),

California Northstate University (CNU) confirms that:

- CNU does not have a pending petition in bankruptcy;
- CNU is not operating as a debtor in possession;
- CNU has not filed a petition in bankruptcy within the preceding five years or beforehand;
- CNU has not had a petition in bankruptcy filed against it within the preceding five years or beforehand that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C. Sec. 1101 et seq.).

ABOUT THE UNIVERSITY

California Northstate University (CNU) is a new institution dedicated to educating, developing, and training individuals to provide competent, patient-centered care. The University was developed after the successful launch of the College of Pharmacy. The founders of the College of Pharmacy built a progressive program that includes active learning, direct patient experiences, and research.

As a result of several recent publications and studies which indicated the need for an increase in the number of primary care physicians trained in California, senior operations staff at the College of Pharmacy began discussions for a new medical school in the greater Sacramento area early in the spring of 2010. With recent federal health care initiatives in combination with the needs of the aging baby-boomer population, primary care physicians are seeing ever-increasing patient loads. It was also recognized that as a result of the financial crisis facing California, the State has been unable to increase the number of medical students trained within the State. CNU College of Medicine (CNUCOM) will directly help the primary care physician shortage in California.

It is the goal of the University to create life-long learners that are trained to serve the community as leaders in health care science, education, and research. With this goal in mind, senior University officials have developed a strategic plan that addresses education, partnership, and scholarship.

Much of the preliminary design of the structure of the College of Medicine and its curriculum was in place by June/July 2011. As part of this process, community leaders in medicine within the Sacramento Valley were engaged in a series of meetings to plan the outlines and address the key issues to be covered within the medical school curriculum. This core group established broad outlines of the curriculum and structure of the College of Medicine and also served as members of the Institutional Self-Study Task Force. They were visionary and demanded that this new school stress areas of training frequently ignored or understated by many medical schools. Many members brought 20-30 years of experience in direct medical practice in the highly competitive Sacramento region to provide insight on how to best train future physicians. They noted that our nation is poised to institute new schemes for providing universal health care to its citizens and, at the same time, provide care that is high quality, cost-effective, and evidence-based.

Given disparities in access to healthcare services in the U.S. and the entry of more patients into the healthcare system with the recent introduction of the Affordable Care Act, there is a widely recognized need for more healthcare workers and biomedical professionals. Likewise, strong local demand for undergraduate education in health sciences by California high school graduates necessitates the creation of additional programs in this area. These factors have combined to support the creation of a third college at CNU that will educate students qualified for admission to post-baccalaureate schools seeking to pursue health sciences careers. Thus, the creation of the College of Health Sciences' Bachelor of Science degree program aligns with CNU's mission, purpose and strategic intent, "To advance the science and art of healthcare."

Mission & Vision

University Mission: To Advance the Science and Art of Healthcare.

Our Vision: To provide innovative education and healthcare delivery systems.

Our Values:

- **Working** as a team
- **Embracing** diversity and workplace excellence
- **Caring** about our students, our staff, our faculty, and our profession
- **Advancing** our university, our goals, and our discipline
- **Responding** to challenges that may impede Mission
- **Enhancing** communication and partnership

Institutional Learning Outcomes (ILOs)

Students are expected to master the Institutional Learning Outcomes (ILOs; learning outcomes expected of every student at California Northstate University). While the approach and specific outcomes vary in each program, all program and course learning outcomes are derived from these six fundamental institutional outcomes. At graduation, the student will have mastered:

1. Critical thinking. Exercise reasoned judgement to assess technical information and make well-informed decisions using evidence-based approaches.
2. Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose.
3. Oral communication. Demonstrates oral communication skills.
4. Professionalism. Interact with respect, empathy, diplomacy, and cultural competence.
5. Quantitative reasoning. Demonstrate ability to use mathematics and statistics in problem solving.
6. Information literacy. Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations.

Accreditation Information

WSCUC WASC Senior College and University Commission (WSCUC)

California Northstate University is accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, #100, Alameda, CA 94501, Tel: 510-748-9001.

Complaints Related to Accreditation Standards (WSCUC)

Accreditation by the Accrediting Commission for Senior Colleges and Universities represents the Commission's

judgment that an institution is satisfactorily achieving its mission and educational purposes and that it meets or exceeds the Commission's standards of quality, integrity, and effectiveness.

The Commission values information provided by students, employees, and others in determining whether an institution's performance is consistent with the Standards of Accreditation and Commission policies and procedures.

The Commission has two established means for receiving comments from students, employees and members of the public about its member institutions:

1. complaints
2. third-party comments

As a general rule, complaints are written by employees and students who have grievances that draw into question the member institution's adherence to one or more Commission Accreditation Standards or Policies. Third-party comments are usually more general comments of a substantive nature about a member institution.

Individuals should review the Policy on Complaints and Third-Party Comments Policy at the WASC website to ascertain the appropriate means to communicate comments and complaints. <https://www.wascsenior.org/content/complaints-and-third-party-comment-policy>.

California Northstate University encourages students to seek internal resolution to any conflict.

Bureau for Private Postsecondary Education (BPPE)

Approval to operate as a degree-granting college in California was obtained from the Bureau for Private Postsecondary Education (BPPE) on April 15, 2007. Approval to operate means compliance with state standards as set forth in the California Education Code.

Complaints Related to BPPE Licensing Standards

A complaint may be filed by completing the BPPE Complaint Form available from the BPPE website, <https://www.bppe.ca.gov/enforcement/complaint.shtml>, or calling the Bureau's Enforcement Section at the following address and telephone number: Bureau for Private Postsecondary Education, 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, Tel: 916-431-6959, FAX: 916-263-1897.

California Northstate University encourages students to seek internal resolution to any conflict.

Accreditation Council for Pharmacy Education (ACPE)

California Northstate University's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 135 South LaSalle Street, Suite 4100, Chicago, IL 60503, Tel: 312-664-3575; FAX 312-664-4652, website www.acpe-accredit.org.

Complaints Related to ACPE Accreditation Standards

ACPE accredited colleges of pharmacy have an obligation to respond to any written complaints by students lodged against the University, or the pharmacy program that are related to the standards and the policies and procedures of ACPE.

CNUCOP encourages students to seek internal resolution to any conflict. Complaints may also be made directly to the Associate Dean for Student Affairs and Admissions. The written complaints will be kept on file and made available for inspection at onsite ACPE evaluations. Any student who wishes to file a complaint related to ACPE standards and policies should first visit the ACPE website at <http://www.acpe.org> to access the accreditation standards and policies. If the complaint is found to be related to one or more of the ACPE standards or policies listed and has not been resolved by the College/University the student may file a complaint directly to ACPE, <http://www.acpe-accredit.org/complaints/>

Liaison Committee on Medical Education (LCME)

The U.S. Department of Education recognizes the LCME for accreditation of medical education programs leading to the M.D. degree in the United States. CNUCOM has currently reached Step 3 (preliminary accreditation) of a five (5) step accreditation process.

For more information about our accreditation progress please visit <http://medicine.cnsu.edu/about/accreditation-licensing>.

For further information on LCME: Liaison Committee on Medical Education (LCME), Association of American Medical Colleges, 2450 N Street, N.W., Washington, DC 20037 Tel: 202-828-0596, <http://www.lcme.org/>

Complaints Related to LCME Accreditation Standards

The Liaison Committee on Medical Education (LCME) is required by the U.S. Secretary of Education to require its medical programs to record and handle student complaints regarding a school's adherence to the LCME Standards. LCME must demonstrate a link between its review of complaints and its evaluation of a program in the accreditation process. Therefore, in order to demonstrate compliance with the U.S. Department of Education Criteria for Recognition, and with the prior review and advice of Department of Education personnel, LCME requires medical schools to provide an opportunity for medical students to provide comments and/or complaints about the school's adherence to LCME's Standards.

The colleges and schools of medicine accredited by LCME have an obligation to respond to any written complaints by students lodged against the college or school of medicine, or the medical program that are related to the standards and the policies and procedures of LCME.

Any student who wishes to file a complaint may visit the LCME website (www.lcme.org) to access the standards and the procedures for filing a complaint directly to LCME. Complaints may also be made directly to the Associate Dean of Student Affairs, Admissions and Outreach. The written complaints are kept on file and made available for inspection at onsite evaluations.

California Northstate University College of Medicine encourages students to seek internal resolution to any conflict.

American Psychological Association (APA)

The College of Psychology will be pursuing American Psychological Association accreditation. This takes place in three phases. The first is "Intent to Apply" status. This step can now be initiated in Summer 2018. It involves the submission of a self-study report reviewed by the APA to determine whether or not the program is on track to meeting requirements for accreditation.

Within three years after the PsyD program is granted "Intent to Apply" status and no sooner than when two classes are

enrolled in the program and one has completed a term of practicum service may the program submit for "Accredited, on contingency" status. This requires a second self-study and a site visit by APA.

Within three years after receiving "Accredited, on contingency" status and after the inaugural class has completed internship, the College of Psychology can apply for full accreditation from APA. This requires a third self-study with proximal and distal data and a second site visit.

Complaints Related to APA Accreditation Standards

Complaints are to be directed to the Commission on Accreditation (CoA). The CoA can only review complaints against programs that are currently accredited. Please visit the APA website for information related to filing a complaint: <http://www.apa.org/ed/accreditation/about/other-questions.aspx>.

California Northstate University College of Psychology encourages students to seek internal resolution to any conflict.

COLLEGE OF MEDICINE

Mission, Vision, and Values

Mission: To advance the art and science of medicine through education, service, scholarship, and social accountability.

Education: To provide the environment for its graduates to become life-long learners in the field of medicine.

Scholarship: To identify leaders in basic science, translational, clinical, and educational research, development of educational materials and processes, and thought leadership in science and education to foster a scholarly environment for the medical school.

Service: To assist in serving the underserved in the community as a critical function of the medical school.

Social Accountability: To stress community service, community health, access to health care, global health, global health education, health care policy and advocacy, and diversity as essential elements of the medical school.

Vision: To develop a community-based medical school that delivers innovative programs in education, research, and patient care.

Values: The core values of California Northstate University College of Medicine are:

1. Excellence in Medical Care
2. Professionalism
3. Ethics
4. Compassion
5. Social Accountability
6. Innovation

Educational Philosophy

The California Northstate University College of Medicine (CNUCOM) curriculum is designed to help students become physicians who are self-directed and lifelong learners. The four (4) year curriculum is designed to facilitate and optimize student learning in a progressive and integrated manner both in didactic and experiential courses. CNUCOM recognizes the need to implement varied educational styles in order for students to become competent self-directed, life-long learners. Therefore, there will be a variety of formats for instruction ranging from lecture to completely self-directed.

The curriculum is a completely clinical presentation-based, integrated curriculum. Clinical presentations frame the introductory material in the Foundations of Clinical Medicine. All subsequent courses in the pre-clerkship Phase A curriculum (Year 1 and Year 2) integrate biochemistry, cell biology, embryology, genetics, anatomy, histology, immunology, microbiology, nutrition, pathology, pharmacology, and physiology with the clinical presentations. The Medical Skills course runs concurrently with the systems-based courses and is designed to integrate doctoring skills each week in order to reinforce and enhance the information

being taught in the rest of the curriculum. Masters Colloquium is a biweekly course designed to foster professionalism, ethics, and global health knowledge and behaviors throughout the Phase A curriculum.

The required clerkships and electives in Phases B and C carry our clinical presentation curriculum through completion of the medical education program. CNUCOM has aligned many of our Phase A clinical presentations with nationally recognized “must see” cases during the clerkships years, Phases B and C. Students will have the opportunity to master the basic sciences and foundational clinical skills associated with the clinical presentations in Phase A. Students will then see these clinical presentations again as live patients in Phases B and C and hone their clinical skills and develop a deeper understanding of therapeutics and treatment.

Learning Outcomes

Program Learning Outcomes

Upon successful completion of CNUCOM Doctor of Medicine program, students will be able to demonstrate the following learning program learning outcomes:

1. **Patient Care.** Demonstrate ability to provide evidence-based care that is compassionate, respectful of patients' differences, values, and preferences. Demonstrate the ability to listen, clearly inform, communicate and educate patients for the promotion of health and the treatment of illness; advocate for disease prevention, wellness and the promotion of healthy lifestyles including a focus on population health. Demonstrate ability to accurately evaluate relevant social and clinical information in the context of the patient's visit.
2. **Medical and Scientific Knowledge.** Demonstrate knowledge about established and evolving biomedical and clinical sciences. Demonstrate ability to apply this knowledge to the practice of medicine. Demonstrate ability to appraise and assimilate scientific evidence into their own ongoing learning, research, and patient care.
3. **Communication and Interpersonal Skills.** Demonstrate compassionate and effective interpersonal communication skills toward patients and families. Demonstrate ability to articulate information (written and oral) in an organized and clear manner in order to educate and inform patients, families, and colleagues.
4. **Professionalism.** Demonstrate a commitment to the highest standards of professional responsibility and adhere to ethical principles. Students should display the personal attributes of compassion, honesty, integrity, and cultural empathy in all interactions with patients, families, and the medical community.
5. **Healthcare Systems.** Demonstrate knowledge of and responsibility to the larger context of health care (social, behavioral, economic factors). Demonstrate the ability

to effectively call on system resources to provide optimal care.

6. **Reflective Practice and Personal Development.**

Demonstrate ability to reflect upon their experiences with the goal of continual improvement. Demonstrate habits of analyzing experiences that affect their well-being and their relationships with groups and individuals. Demonstrate self-motivation and awareness of and responsiveness to their own limitations.

Co-Curricular Learning Outcomes

Upon successful completion of CNUCOM Doctor of Medicine program, students will be able to demonstrate the following co-curricular learning outcomes:

1. **Social Awareness and Cultural Sensitivity.** Demonstrate awareness of and responsiveness to social and cultural differences by adapting behaviors appropriately and using effective interpersonal skills.
2. **Professionalism and Advocacy.** Demonstrate professional behavior and effective interactions with other healthcare professionals, community members, and/or patients and advocate for initiatives to improve patient care, health outcomes, and the profession of pharmacy.
3. **Self-Awareness and Learning.** Demonstrate self-awareness through reflection and the development of appropriate plans for self-directed learning and development.
4. **Innovation and Entrepreneurship.** Demonstrate innovation and creativity to develop novel strategies to accomplish professional goals, or students demonstrate an understanding for how innovation and creativity influence the development of novel strategies to accomplish professional goals.
5. **Public Health and Education.** Apply skills learned in the classroom to create and effectively deliver public health initiatives and health-related education to the community.
6. **Service and Leadership.** Demonstrate the ability to lead and work collaboratively with others to accomplish a shared goal that improves healthcare.

Program Competencies and Learning Outcomes Mapping

CNUCOM has adapted the six ACGME competencies to the vision and mission of the school and have adopted those as expected program learning objectives (PLO's). These six general competencies reflect the knowledge, skills, behaviors, and attitudes that medical students will be expected to exhibit as evidence of their achievement. Medical students will demonstrate competency in these six areas as a requirement for graduation. For each of the six general competencies, there are a series of educational learning objectives (learning outcomes) which define the competency.

Map of CNUCOM Competencies to ACGME Competencies

ACGME CNUCOM	Patient Care	Med/Sci Knowledge	Communication/ Interpersonal Skills	Professionalism	Health Care Systems	Reflective Practice/ Personal Development
Patient Care						
Medical/Science Knowledge						
Communication/ Interpersonal Skills						
Professionalism						
Practice-Based Learning & Improvement						
System-Based Practice						

CNUCOM Program Learning Objectives

The Curriculum Committee has developed and approved specific expectations about students' advancement towards achievement (mastery) of the PLOs for each academic phase of our curriculum.

1) Patient Care [PC]

Scope: Students must provide evidence-based care that is compassionate, appropriate, and effective for the promotion of health and the treatment of illness. Students should be able to evaluate relevant diagnostic information.

Spectrum of assessment methods to evaluate the achievement of the "Patient Care" competency:

- Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills courses.
- Faculty and resident direct observation and evaluations during clinical clerkships.
- Patient case logs.
- Standardized Patient Examination (SPE).
- Medical Skills Lab: Standardized patient, simulation exercises
- Objective Structured Clinical Examination (OSCE)
- Self-assessment and Peer assessment.
- USMLE Step 2 Clinical Knowledge Exam and Clinical Skills Exam.

Sub-Competency Category	Educational Program Objective(s) Mapped & Hyperlinked to PCRS	Outcome Measure(s)
PC1: Clinical History Taking	Gather essential and accurate information about patients and their conditions through history-taking and demonstrates the ability to organize all relevant clinical history in a timely manner (1.2)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions and Medical Skills courses • Faculty and resident direct observation and evaluations during clinical clerkships • OSCE
	Able to identify alternative sources and or intuitively fill in the history gaps (1.2)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions and Medical Skills courses • Faculty and resident direct observation and evaluations during clinical clerkships • OSCE • USMLE Step 2 Clinical knowledge Exam and Clinical Skills Exam
	Shares knowledge in topics of disease prevention with patient (1.7,1.9)	
	Documents how psychological/social/cultural situations have impacted the health, disease, care-seeking, care compliance, and barriers to and attitudes toward care (1.2, 2.5)	
	Demonstrates ability to inquire (non-judgmentally) about alternative medical practices being utilized by the patient at the time of presentation (1.2)	
PC2: Patient Examination	Perform a full or focused physical exam on an adult patient in a logical sequence appropriate for the scheduled visit in a timely manner for pediatric, adolescent, adult and elderly patients (1.1, 1.2)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions and Medical Skills courses • Faculty and resident direct observation and evaluations during clinical clerkships • OSCE • USMLE Step 2 Clinical knowledge Exam and Clinical Skills Exam
	Can perform a complete, full mental and functional assessment of an elderly patient (1.1, 1.2)	
	Can fully assess a pediatric patient for developmental delay and genetic abnormalities (1.2)	
	Can identify pertinent positives and negatives in the exam to accurately determine stage of medical condition (1.2)	
	Can utilize clinical findings to prioritize additional anatomic or physiologic testing (1.3, 1.5)	
PC3: Medical Notes	Can accurately complete a written H&P in a timely fashion with a well-developed differential diagnosis using the CP clinical algorithms to develop a differential diagnosis (1.2, 4.5)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions and Medical Skills courses • Faculty and resident direct observation and evaluations during clinical clerkships • OSCE
	Can complete a SOAP note using CP clinical algorithms to assist in developing a problem list (1.2, 4.2)	

	<p>Can utilize the problem list to develop a well thought out plan for ongoing treatment. (1.6)</p> <p>Integrates periodic evaluation of the care plan to re-evaluate the efficacy of the plan to ensure treatment success (1.2, 1.3, 1.5, 1.6, 2.1)</p>	<ul style="list-style-type: none"> • USMLE Step 2 Clinical knowledge Exam and Clinical Skills Exam
PC4: Oral Presentations	<p>Can accurately and professionally present a H&P or SOAP note to an attending in a timely fashion indicating when to use "not relevant" or "no pertinent positives" (1.2, 4.2)</p> <p>Includes a differential or problem list with treatment updates (1.2, 1.5, 1.6)</p> <p>Includes accurate assessments with prioritized diagnosis or problem list using relevant CP clinical algorithms (1.6)</p> <p>Can participate in a discussion of prioritized diagnostic approaches and is able to identify where patient teams and consultants are needed (1.3, 1.4, 1.5, 1.6, 1.8, 4.2, 4.3)</p>	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Masters Colloquium, Clinical Cases Sessions, and Medical Skills courses • OSCE • Self-assessment and peer assessment • Faculty and resident direct observation and evaluations during clinical clerkships • USMLE Step 2 Clinical Skills Exam
PC5: Medical Skills	<p>Perform all medical, diagnostic, and surgical procedures considered essential for the area of practice (1.1)</p> <p>Can describe and practice the basic principles of universal precautions in all settings (1.3)</p> <p>Has achieved certification in BLS (1.1, 6.6)</p> <p>Has achieved certification in ACLS (1.1, 6.6)</p>	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Medical Skills Courses • Medical Skills Lab: Standardized patient, simulation exercises • OSCE • Passing BLS and ACLS certification exam • Faculty and resident direct observation and evaluations during clinical clerkships. • USMLE Step 2 Clinical knowledge Exam and Clinical Skills Exam
PC6: Patient Care Teams	<p>Can explain how the composition of an adult and pediatric outpatient/hospital Patient Care Team (PCT) differs on each clinical service and can recognize and evaluate when their services should be ordered to facilitate recovery (1.3, 1.5, 1.8, 1.6, 4.2, 6.1)</p> <p>Make appropriate patient referral decisions and follow up the care outcome to ensure continuity of care while the patient moves between different providers/settings. (1.8)</p>	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Medical Skills Courses • Faculty and resident direct observation and evaluations during clinical clerkships
PC7: Patient Management	<p>Can describe a well thought out plan of management of all patients with acute and chronic illnesses in the adult population (1.5, 1.6)</p> <p>With appropriate supervision, participate in counselling & education of patients and their families enabling them to share in decision making and the care plan. (1.7)</p> <p>With appropriate supervision, participate in providing preventive and health maintenance services. (1.9)</p> <p>With appropriate supervision can construct a detailed patient management plan utilizing appropriate PCT members (1.6, 6.2)</p>	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases sessions and Medical Skills courses • Faculty and resident direct observation and evaluations during clinical clerkships • OSCE
PC8: Cost Effective Comparison in Treatment	<p>Is able to recognize that there are differences in the cost of treatment options (1.3, 1.5, 1.6, 6.3)</p> <p>Can discuss treatment costs in the context of efficacy, social and cultural factors (1.3, 1.5, 1.6, 6.3)</p> <p>Can use the cost effectiveness information to recommend a stepped approach to the treatment of common medical conditions in the adult patient (1.3, 1.5, 1.6, 6.3)</p>	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Masters Colloquium, Clinical Cases Sessions, and Medical Skills courses • Faculty and resident direct observation and evaluations during clinical clerkships

2) Medical and Scientific Knowledge [MSK]

Scope: Students must demonstrate knowledge about established and evolving biomedical and clinical sciences. They must showcase an ability to apply this knowledge to the practice of medicine. Students should be able to appraise and assimilate scientific evidence into their own ongoing learning, research, and patient care.

Spectrum of assessment methods to evaluate the achievement of the “Medical & Scientific Knowledge” competency:

- Written examinations (both individual and team-based) in basic science courses and clinical clerkships
- NBME shelf exams
- Faculty feedback in pre-clerkship settings including small groups, Clinical Cases Sessions, Masters Colloquium and Medical Skills courses
- Self-Directed Student Scholarly Project
- Faculty and resident evaluations during clinical clerkships
- Written and oral case presentations
- Objective Structured Clinical Examination (OSCE)
- Peer assessment and self-assessment
- USMLE Step 1 and Step 2
- Institutionally developed written examinations in system based courses and clinical clerkships
- NBME shelf exams

Sub-Competency Category	Educational Program Objective(s) Mapped & Hyperlinked to PCRS	Outcome Measure(s)
MSK1: Knowledge of Medical Practices	Can evaluate how the major organ systems contribute to both health and disease (2.1, 2.2, 2.3, 2.4)	<ul style="list-style-type: none"> ➤ Institutionally developed written examinations in system based courses and clinical clerkships ➤ NBME shelf exams
	Can explain how the organ system pathophysiology is reflected in the CP clinical algorithms and can relate this information to a clinical team (2.1, 2.2, 2.3, 2.4)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Master Colloquium, and Medical Skills courses • Faculty and resident evaluations during clinical clerkships • OSCE • Peer assessment and self-assessment • USMLE Step 1 and Step 2
	Apply clinical reasoning to construct CP clinical algorithms to propose differential diagnosis (2.1, 2.3, 1.2, 1.3, 1.4)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, and Medical Skills courses • Faculty and resident evaluations during clinical clerkships • OSCE • USMLE Step 2
	Can explain the anticipated clinical response to correctly selected medications for a specific number of medical conditions to patients, family members and team members (2.1, 2.3, 1.3, 1.4, 1.7, 4.1)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Master Colloquium, and Medical Skills courses • OSCE • Faculty and resident evaluations during clinical clerkships
	Recognizes the most common drug interactions and their likely signs of presentation in the elderly and can explain them to patient and family (2.1, 2.2, 2.3, 1.2, 1.3, 1.4, 1.7, 4.1)	<ul style="list-style-type: none"> ➤ Institutionally developed written examinations in system based courses and clinical clerkships • Faculty feedback in pre-clerkship settings including Clinical Cases, Master Colloquium, and Medical Skills courses • OSCE • Faculty and resident evaluations during clinical clerkships • USMLE Step 1 and Step 2
	Recognizes what types of medical knowledge is required for each individual members of the PCT (patient care team) (2.1, 2.3, 6.1, 6.2)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, and Medical Skills courses. • Faculty and resident evaluations during clinical clerkships

		<ul style="list-style-type: none"> • OSCE • Peer assessment and self-assessment • USMLE Step 1 and Step 2
MSK2: Problem Solving & Diagnosis	Can correlate the findings of a patient at clinical presentation with specific CP clinical algorithms and prioritize the conditions in the order of most to least likely <u>(2.1, 2.3, 1.2, 1.3)</u>	<ul style="list-style-type: none"> ➤ Institutionally developed written examinations in system based courses and clinical clerkships ➤ NBME shelf exams • Faculty feedback in pre-clerkship settings including Clinical Cases, and Medical Skills courses • Faculty and resident evaluations during clinical clerkships • OSCE • Peer assessment and self-assessment • USMLE Step 1 and Step 2
	Recognizes and is able to explain both typical as well as atypical presentations for commonly seen clinical conditions in clerkships <u>(2.1, 2.3, 1.2, 2.1, 2.3)</u>	
	Can construct comprehensive problem lists categorized as both acute versus chronic conditions and prioritize therapeutic interventions <u>(2.1, 2.3, 2.4, 1.5, 1.6)</u>	
	Can order appropriate diagnostic tests needed to facilitate both diagnosis and evaluate response to therapy in a cost and time effective manner <u>(2.1, 2.3, 1.2, 1.4, 1.5)</u>	
	Can analyze and evaluate diagnostic tests in regards to sensitivity/specificity <u>(2.1, 2.3, 1.2, 1.4)</u>	<ul style="list-style-type: none"> ➤ Institutionally developed written examinations system based courses and clinical clerkships ➤ NBME shelf exams • USMLE Step 1 and Step 2
MSK3: Medical Treatment	Can identify preventive, curative, and palliative therapeutic strategies <u>(2.12.2, 2.3, 2.4, 2.5, 2.6, 1.5, 1.6)</u>	<ul style="list-style-type: none"> ➤ Institutionally developed written examinations in system based courses and clinical clerkships ➤ NBME shelf exams • Faculty feedback in pre-clerkship settings including Clinical Cases, and Medical Skills courses • Faculty and resident evaluations during clinical clerkships • OSCE • USMLE Step 1 and Step 2
	Can identify and judge, from direct observation/experience, how cost and social/cultural issues affect the selection of therapeutic interventions <u>(2.1, 2.3, 2.4, 2.5, 1.3, 1.5, 6.3)</u>	<ul style="list-style-type: none"> ➤ Institutionally developed written examinations in system based courses and clinical clerkships • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills courses • NBME shelf exams • Faculty and resident evaluations during clinical clerkships • OSCE • USMLE Step 1 and Step 2
	Can select and defend basic therapeutic recommendations for preventive, curative and palliative therapies seen in the clerkships <u>(2.1, 2.2, 2.3, 2.4, 2.5, 1.5, 1.6, 3.4, 3.5, 3.6)</u>	<ul style="list-style-type: none"> ➤ Institutionally developed written examinations in system based courses and clinical clerkships ➤ NBME shelf exams • Faculty feedback in pre-clerkship settings including Clinical Cases, and Medical Skills courses • Faculty and resident evaluations during clinical clerkships • OSCE • USMLE Step 1 and Step 2
	Effectively utilizes ongoing diagnostic tests to modify recommended therapeutic strategies <u>(2.1, 2.3, 1.4, 1.5, 1.6)</u>	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, and Medical Skills courses

		<ul style="list-style-type: none"> • Faculty and resident evaluations during clinical clerkships • OSCE • Peer assessment and self-assessment
MSK4: Life-Long Learning	Can discuss the study design, data analysis and scientific findings of a journal article relevant to their patient's medical condition <u>(2.1, 2.2, 2.3, 3.6)</u>	<ul style="list-style-type: none"> • Successful completion of a scholarly project • Faculty feedback in pre-clerkship settings including Clinical Cases and Masters Colloquium • Faculty and resident evaluations during clinical clerkships
	Routinely reads medical journals <u>(2.1, 3.3, 3.7)</u>	
	Organizes a self-educating approach for life-long learning through observation, research, and analysis <u>(2.1, 2.6, 3.1, 3.2, 3.3, 3.5, 3.6, 3.7, 3.10)</u>	<ul style="list-style-type: none"> • Successful completion of a scholarly project • Faculty feedback in pre-clerkship settings including Clinical Cases and Masters Colloquium • Faculty and resident evaluations during clinical clerkships • Peer assessment and self-assessment
MSK5: Research or Knowledge Expansion	Through research and/or community service, in the context of the "Self-Directed Student Scholarly Project", the student will develop, apply, translate and/or communicate medical knowledge to their peers and/or community <u>(2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 3.8)</u>	<ul style="list-style-type: none"> • Successful completion of a scholarly project • Faculty feedback in pre-clerkship settings including Clinical Cases and Masters Colloquium • Faculty and resident evaluations during clinical clerkships • OSCE • Peer assessment and self-assessment

3) Communication and Interpersonal Skills [C]

Scope: Students must demonstrate compassionate and effective interpersonal communication skills toward patients and families necessary to deliver effective medical care and promote shared decision making. Students must be able to articulate information and ideas (written and oral) in an organized and clear manner to educate or inform patients, families, colleagues, and community.

Spectrum of assessment methods to evaluate the achievement of “Communication & Interpersonal Skills” competency:

- Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills course
- Faculty and resident direct observation and evaluations during clinical clerkships
- Patient case logs
- Presentation of written and oral clinical information
- Standardized patient evaluations, simulation and inter-professional exercises
- Objective Structured Clinical Examination (OSCE)
- Peer assessment, self-assessment
- USMLE Step 2 Clinical Skills Exam
- Multiple choice questions (MCQ's)

Sub-Competency Category	Educational Program Objective(s) Mapped & Hyperlinked to PCRS	Outcome Measure(s)
C1: Doctor-Patient Communication	Utilizes communication strategies involving nonverbal, verbal and written modalities to communicate with patients (4.1) Demonstrates how to ask clarifying questions in a way that is socially and culturally sensitive (4.1, 1.2) Creates rapport with the patient in order to generate an effective environment for counseling on wellness and disease prevention strategies (4.1) Effectively uses health coaching strategies (3.8, 4.1) Can effectively communicate medical errors to patients (4.6)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Medical Skills, and Masters Colloquium • Faculty and resident evaluations during clinical clerkships • OSCE • Peer assessment and self-assessment
C2: Communication with family members	Utilizes effective communication strategies involving nonverbal, verbal and written skills to communicate with patient's family members (4.1) Can recognize and effectively communicates his/her legal limitations due to patient privacy (4.1, 4.2, 4.3, 5.3) Can ask for the support/assistance of patient's family members for encouraging changes in disease prevention or wellness strategies (4.1) Can effectively communicate medical errors to family members (4.6)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Medical Skills, and Masters Colloquium • Faculty and resident evaluations during clinical clerkships • OSCE • Peer assessment and self-assessment
C3: Communication with Medical Team	Can effectively communicate a H&P and SOAP note in both written and oral format (4.2, 4.3) Can effectively communicate new patient problems or complaints in healthcare to the medical team (4.2, 4.3) Can question medical decisions in a non-confrontational manner (4.2, 4.3, 4.4, 3.9, 7.1) Effectively shares relevant information with the team (4.2, 4.3, 4.4, 3.9)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Medical Skills • Faculty and resident evaluations during clinical clerkships • OSCE • Peer assessment and self-assessment
C4: Communication with Faculty	Identifies gaps or deficiencies in understanding on each clerkship and can effectively communicate educational needs to the interns, residents, and faculty to increase knowledge (4.2, 4.3, 4.4, 3.1, 3.3) Can discuss personal ethical/social or cultural issues with faculty members to resolve any personal conflicts that may arise in the	<ul style="list-style-type: none"> • Faculty and resident evaluations during clinical clerkships • Faculty feedback in pre-clerkship settings including Medical Skills • OSCE • Peer assessment and self-assessment

	management or treatment decisions made for the benefit of the patient <u>(4.2, 4.3, 4.7, 7.1)</u>	
C5: Communication with Community	Can communicate medical knowledge to the community at large in a professional manner <u>(4.1, 3.8)</u>	<ul style="list-style-type: none"> • Faculty and resident evaluations during clinical clerkships • Faculty feedback in pre-clerkship settings including Medical Skills • OSCE • Peer assessment and self-assessment

4) Professionalism [P]

Scope: Students must demonstrate a commitment to the highest standards of professional responsibility and adherence to ethical principles. Students must display the personal attributes of compassion, honesty, integrity, and cultural competence in all interactions with patients, families, and the medical community.

Spectrum of assessment methods to evaluate the achievement of the “Professionalism” competency:

- Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills courses
- Faculty and resident direct observation and evaluations during clinical clerkships
- Presentation of clinical information
- Completion of HIPAA training
- Standardized patient evaluations
- Simulation and inter-professional exercises
- Objective Structured Clinical Examination (OSCE)
- Praise/concern professionalism incident reports
- Peer assessment
- Self-assessment
- USMLE Step 2 Clinical Skills Exam
- Institutionally developed written examinations in system based courses and clinical clerkships
- NBME shelf exams

Sub-Competency Category	Educational Program Objective(s) Mapped & Hyperlinked to PCRS	Outcome Measure(s)
P1: Ethical Behavior	Demonstrates respect, compassion and honesty in his/her approach to all patients and family members (5.1)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills courses • Faculty and resident direct observation and evaluations during clinical clerkships • Presentation of clinical information • Completion of HIPAA training • OSCE • Praise/concern professionalism incident reports • Peer & self-assessment
	Recognizes and discloses one's errors to appropriate residents/Clerkship Directors and when they involve patient care, seeks guidance on how and with whom that disclosure will be made to the patient or family (5.4, 5.6, 4.6)	
	Always displays professional attire and behavior (1.10)	
	Demonstrates the ability to maintain professional behavior in encounters with quarrelsome, hostile, abusive, arrogant or dismissive patients, family members or clinical staff (5.6, 4.7, 7.1)	
	Uses clinical hygiene for the prevention of nosocomial infection transmission (5.4, 5.5, 3.10, 1.3)	
P2: Ethical Responsibility	Obtains patient consent for all therapies and/or procedures in which s/he is involved (5.6)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observation and evaluations during clinical clerkships • Presentation of clinical information • Completion of HIPAA training • Standardized patient evaluations • Simulation and inter-professional exercises • OSCE • USMLE Step 2 Clinical Skills Exam • Masters Colloquium on professionalism
	Can identify and relate full disclosure of the risks and benefits of a therapy or procedure (5.6, 1.5)	<ul style="list-style-type: none"> • Faculty and resident direct observation and evaluations during clinical clerkships • Presentation of clinical information • Completion of HIPAA training • Standardized patient evaluations • Simulation and inter-professional exercises • OSCE • USMLE Step 2 Clinical Skills Exam
	Can discuss alternative therapies/procedures with their relevant risks and benefits (5.1, 5.6)	

		<ul style="list-style-type: none"> • Institutionally developed written examinations in system based courses and clinical clerkships • NBME shelf exams
	Can identify and adhere to institutional standards involved in patient care (5.6, 6.1)	<ul style="list-style-type: none"> • Faculty and resident direct observation and evaluations during clinical clerkships • Presentation of clinical information • Standardized patient evaluations • Simulation and inter-professional exercises • OSCE
P3: Ethical Principles and Boundaries	Recognize his/her role as the patient's advocate for clinical care (5.2, 5.4, 7.2)	<ul style="list-style-type: none"> • Faculty and resident direct observation and evaluations during clinical clerkships • Presentation of clinical information • Standardized patient evaluations • Simulation and inter-professional exercises • OSCE
	Demonstrates evidence of maintaining patient privacy (5.3)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observation and evaluations during clinical clerkships • Presentation of clinical information • Completion of HIPAA training • Standardized patient evaluations • Simulation and inter-professional exercises • OSCE
	Demonstrates ability to treat all patients with dignity even when the approach is not reciprocated (5.1, 5.5)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observation and evaluations during clinical clerkships • Presentation of clinical information • Standardized patient evaluations • Simulation and inter-professional exercises • OSCE • Masters Colloquium on professionalism
	Recognizes his/her legal limits on imposing medical care that is considered to be in the best interest of the patient when it is being refused (5.6)	<ul style="list-style-type: none"> • Faculty and resident direct observation and evaluations during clinical clerkships. • Presentation of clinical information • Standardized patient evaluations • Simulation and inter-professional exercises • OSCE
P4: Professional Relationships	Demonstrates integrity, honesty, and authenticity in interactions with faculty and the medical community (5.4, 5.6, 7.1, 7.3, 8.5)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observation and evaluations during clinical clerkships
	Can identify conflicts of interest in financial and organizational arrangements in the practice of medicine (5.6, 6.5)	
	Can identify and utilize standards established by specific professional societies (5.6)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observation and evaluations during clinical clerkships • Presentation of clinical information • Standardized patient evaluations • Simulation and inter-professional exercises

		<ul style="list-style-type: none">• OSCE• Institutionally developed written examinations in system based courses and clinical clerkships• NBME shelf exams
--	--	--

5) Health Care Systems [HC]

Scope: Students must demonstrate knowledge of and responsibility to the larger context of health care (social, behavioral, economic factors). They should have the ability to effectively call on system resources to provide optimal care.

Spectrum of assessment methods to evaluate the achievement of the “Healthcare Systems” competency:

- Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills
- Faculty and resident direct observations and evaluations during clinical clerkships
- Patient case logs
- Presentation of written and oral clinical information
- Standardized patient evaluations, simulation center evaluations
- Objective Structured Clinical Examination (OSCE)
- Peer assessment, Self-assessment
- NBME shelf exams

Sub-Competency Category	Educational Program Objective(s) Mapped & Hyperlinked to PCRS	Outcome Measure(s)
HC1: Healthcare Delivery Systems	Can identify all members and their roles in a patient care team (PCT) and explain which are specific to certain specialty areas of medical practice (6.1, 6.2, 7.2)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observations and evaluations during clinical clerkships • Standardized patient evaluations, simulation center evaluations • OSCE • NBME shelf exams
	Can identify the major components of a healthcare system and understands how they can impact access, cost and compliance (6.1, 6.2, 6.3, 7.2)	
	Can navigate different hospital/clinic infrastructures in providing patient care (6.1)	<ul style="list-style-type: none"> • Faculty and resident direct observations and evaluations during clinical clerkships • Patient case logs • Presentation of written and oral clinical information • Standardized patient evaluations, simulation center evaluations
	Can identify major monetary investment and legal needs in designing a student-run free clinic (6.3)	<ul style="list-style-type: none"> • Faculty and resident direct observations and evaluations during clinical clerkships • Peer assessment, Self-assessment
	Can interpret and use multiple forms of health information technologies including electronic medical records, patient registries, computerized order entry and prescribing systems (6.1, 3.7)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observations and evaluations during clinical clerkships • Patient case logs • Standardized patient evaluations, simulation center evaluations • OSCE
HC2: Delivery Systems Improvement	Recognizes the importance of current models of medical practice performance evaluation (6.6, 3.5)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observations and evaluations during clinical clerkships • Patient case logs • Presentation of written and oral clinical information • Standardized patient evaluations, simulation center evaluations • OSCE
	Recognizes the importance of quality assessment and benchmarking in practice improvement (6.6, 3.1, 3.2, 3.3, 3.5, 3.10)	
	Uses system approaches to prevent common medical errors and hazards (6.1, 6.4)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases, Masters Colloquium, and Medical Skills • Faculty and resident direct observations and evaluations during clinical clerkships • Patient case logs • Presentation of written and oral clinical information

		<ul style="list-style-type: none"> • Standardized patient evaluations, simulation center evaluations • OSCE • Peer assessment, Self-assessment
	Participates in Phase B and/or C clinic rotation quality assessment for education performance improvement <u>(6.6, 3.1, 3.2, 3.3, 3.4, 3.5)</u>	<ul style="list-style-type: none"> • Faculty and resident direct observations and evaluations during clinical clerkships • Presentation of written and oral clinical information • Standardized patient evaluations, simulation center evaluations • OSCE

6) Reflective Practice and Personal Development [RP]

Scope: Student must be able to reflect upon their experiences with the goal of continual improvement. They must also demonstrate habits of analyzing experiences that affect their well-being, relationships with groups and individuals. They must demonstrate self-motivations, and awareness and responsiveness to their own limitations.

Spectrum of assessment methods to evaluate the achievement of the “Reflective Practice and Personal Development” competency:

- Self-assessment
- Patient case logs/journal
- Evaluation by team members and peers in small group activities/clinical teams
- Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills courses
- Faculty and resident evaluations during clinical clerkships
- Objective Structured Clinical Examination (OSCE)

Sub-Competency Category	Educational Program Objective(s) Mapped & Hyperlinked to PCRS	Outcome Measure(s)
RP1: Personal Assessment	Can accept and respond appropriately to suggestions/constructive criticisms of performance including changing when necessary and discarding inappropriate feedback (3.5, 8.1)	<ul style="list-style-type: none"> • Self-assessment • Evaluation by team members and peers in small group activities/clinical teams • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills • Faculty and resident evaluations during clinical clerkships • OSCE
	Demonstrates the use of self-assessment and reflection skills for growth and development (3.1, 3.2., 3.3, 8.1)	<ul style="list-style-type: none"> • Self-assessment • Evaluation by team members and peers in small group activities/clinical teams • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills • Faculty and resident evaluations during clinical clerkships
	Uses self-assessment to identify gaps in knowledge and skill sets and finds an approach to fill such gaps (3.1, 3.2, 3.3, 8.1)	<ul style="list-style-type: none"> • Self-assessment • Patient case logs/journal • Evaluation by team members and peers in small group activities/clinical teams • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills • Faculty and resident evaluations during clinical clerkships
	Can give a balanced description of personal performance in a confident and skillful manner (3.1, 3.3, 8.1)	<ul style="list-style-type: none"> • Self-assessment • Evaluation by team members and peers in

		<p>small group activities/clinical teams</p> <ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills • Faculty and resident evaluations during clinical clerkships
RP2: Time Management	Can develop realistic plans and timelines to achieve desired outcomes (3.2, 3.3)	<ul style="list-style-type: none"> • Evaluation by team members and peers in small group activities/clinical teams • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills • Faculty and resident evaluations during clinical clerkships
	Can refine and implement correction to timelines when appropriate (3.5, 3.10)	
	Can implement corrective actions/changes to correct deficiencies and/or promote personal growth (3.5, 8.1, 8.4)	
RP3: Stress/Wellness Management	Works to identify a passion within the field of medical practice (8.1)	<ul style="list-style-type: none"> • Self-assessment • Evaluation by team members and peers in small group activities/clinical teams • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills • Faculty and resident evaluations during clinical clerkships
	Able to identify an outlet for personal stress and anxiety (8.2)	
	Is able to identify the signs, symptoms and triggers of personal stress and anxiety (8.1, 8.2)	
	Capable of developing a personalized program for physical/mental health (8.2, 8.4)	
	Can recognize and identify when to seek help (8.1)	
RP4: Conflict Resolution	Demonstrates open-mindedness to the opinions and approaches of others (8.3, 8.4)	<ul style="list-style-type: none"> • Faculty feedback in pre-clerkship settings including Clinical Cases Sessions, Masters Colloquium and Medical Skills • OSCE • Patient case logs/journal • Evaluation by team members and peers in small group activities/clinical teams • Faculty and resident evaluations during clinical clerkships
	Can articulate opinions in a non-confrontational manner (8.3, 8.6)	
	Can formulate strategies to diffuse confrontational situations between team members and/or patient/family members and the patient care team (8.3, 8.6, 8.7)	
	Can effectively negotiate with patients/family members to gain cooperation in the medical plan of treatment (1.7, 3.8, 4.1, 8.6)	

Admission to the MD Program

Applications to the California Northstate University College of Medicine (CNUCOM) are through the American Medical College Application Service (AMCAS) administered by the American Association of Medical Colleges (AAMC) at www.aamc.org/amcas.

Requirements

Applicants are expected to meet the minimum requirements listed below:

- CNUCOM prefers a baccalaureate degree from a regionally accredited, four-year institution within the United States; or a non-U.S. equivalent institution.
- Be a US citizen or a legal resident with a Green Card.
- Required minimum coursework
 - 2 semesters/ 3 quarters/ 1 year of college level English
 - 2 semesters/ 3 quarters/ 1 year of Biology with Laboratory¹
 - 2 semesters/ 3 quarters/ 1 year of Inorganic (General) Chemistry with Laboratory¹
 - 2 semesters/ 3 quarters/ 1 year of Organic Chemistry with Laboratory¹
 - 2 semesters/ 3 quarters/ 1 year of Physics¹
 - 2 semester/ 3 quarters of college level Math (Statistics and/or Calculus preferred¹)
 - 1 semester/1 quarter/ or 3 units of Biochemistry¹
- Recommended coursework (not required):
 - Social sciences
 - Behavioral sciences
 - Foreign Languages
 - Anatomy
 - Physiology
 - Microbiology
 - Immunology
- Preferred MCAT & GPA for competitive candidates:
 - GPA: 3.20
 - New MCAT²: 504
- Minimum MCAT & GPA requirements acceptable
 - GPA: 2.80
 - New MCAT²: 497

¹ IB or AP credits are not accepted.

²Only scores from the new MCAT exam from within the past three years are accepted.

An applicant is not required to have completed all the above requirements when applying for admission to the College; however, they must be completed prior to the first day of Orientation.

Applicants are required to meet the College of Medicine Technical Standards for admissions to the College.

If there is a question about the level of English proficiency of an applicant whose first language is not English, and the applicant is otherwise qualified for admission, the respective Committee may require that the student submit scores from the Test of English as a Foreign Language (TOEFL) examination and the Test of Spoken English (TSE).

Foreign Graduates/Coursework

CNUCOM accepts applications from graduates of foreign institutions provided they hold either US citizenship or US Permanent Resident status at the time of application. Foreign residents with F1 status should not apply.

In addition, the CNU will not accept foreign transcripts prior to being accepted. Transcripts and coursework from foreign institutions must be evaluated by WES, ECE or IERF. Evaluations must be sent directly to AMCAS and must include semester units and letter grades for each course, as well as a cumulative GPA and, if possible, a science GPA. If accepted, you must provide an official copy of your transcript directly to the Office of Admission. If a copy of your official transcript is not received, prior to the start of school, the offer of admission will be revoked and the seat will be offered to another candidate.

Applicants who receive their degree from a non-English speaking country may be requested to submit scores from the TOEFL Examination or the TSE. This will not apply, if an additional degree is obtained at a U.S. institution.

If there is a question about the level of English proficiency, you may be requested to submit scores from the TOEFL Examination (minimum TOEFL score: CBT " 213) or the TSE (minimum TSE score: 50).

Foreign students who do not have a Bachelor's degree from a U.S. institution must complete one year of English composition, and the public speaking, economics, and psychology prerequisite courses at a U.S. college.

Application Process

AMCAS Application

Applications are managed through the online AMCAS (American Medical College Application Service) portal.

There is a non-refundable fee for the application unless the applicant has applied for and receives a fee waiver by the AAMC Fee Assistance Program (FAP).
<https://www.aamc.org/students/applying/amcas/>

The AMCAS application deadline is November 1st.

Official Transcripts

An applicant must request that a set of official transcripts be forwarded directly to AMCAS by the Registrar of each institution the applicant has attended.

Letters of Recommendation

CNUCOM requires three letters of recommendation, including one (1) from a professor in the sciences (i.e. Biology, Chemistry, Physics), one (1) from a professor not in the sciences, and one (1) from someone who has known the applicant for a substantial amount of time (e.g. research

principal investigator, shadowed physician, volunteer coordinator, organization leader, work supervisor). Applicants are encouraged to submit two (2) additional letters from any source. A Pre-med Committee Packet may be submitted in lieu of both of the professor letters.

All letters of recommendation should address the applicant's preparedness to become a doctor. It is recommended that you submit letters written within the past three years and that each letter be written by an individual with whom the applicant has formed a strong ongoing relationship, and not simply someone who has given the applicant a high grade. CNUCOM is particularly interested in references to the applicant's work ethic, integrity, compassion, emotional stability, and judgment. Please consider, among others, professors who have taught in your upper-division courses, or individuals who have seen you interact in professional health settings or have witnessed your personal development.

Submit all letters of recommendation to the AMCAS letter service only.

Supplemental Application

Upon receipt of the AMCAS application packet, the material will be reviewed by the Office of Student Affairs, Admissions and Outreach. Candidates, who are qualified on the basis of their completion, or likelihood of completing the requirements for admission, will be invited to submit a Supplemental Application. There is a \$100 non-refundable fee for processing the Supplemental Application. CNUCOM is not accepting fee waiver for supplemental application fee.

Interviews

Highly qualified candidates will be invited to an on-campus interview with faculty and staff. Invitations are made on the basis of a review academic preparation, personal statement, letters of recommendations, and any other supporting documentation. Applicants will receive their invitation to Interview Day via email. Only applicants who have completed an on-campus interview are offered admission to the College of Medicine.

Interviews are conducted at the College of Medicine campus in Elk Grove, California. Only individuals who have received an invitation from the Office of Student Affairs, Admissions and Outreach will be interviewed.

The interview process includes orientation meetings and interviews with faculty and staff at California Northstate University. The process takes about one day.

During the period when interviews are taking place, the Admissions Committee will meet on a regular basis to consider applicants who have interviewed with the College of Medicine. Applicants are notified of the decision of the College of Medicine regarding their application as soon as possible.

Please review our website for more information about Interview Day at <http://medicine.cnsu.edu/admissions-com/admissions/interview-day>.

Decision Notification

Notification of the decision of the Admissions Committee continues until the class is filled. Accepted applicants may reserve their positions in the incoming class with a \$100 non-refundable deposit. All admission decision are final. Requests for admission decision appeals will not be accepted.

Deferred Matriculation

CNUCOM does not offer options of deferred matriculation at this time.

Early Decision Program

CNUCOM participates in the Early Decision Program. Please visit our website for dates at <http://medicine.cnsu.edu/students-com/admissions/admissions-timeline>.

Transferring from Other Institutions

CNUCOM is currently not accepting any transfer students from other medical program. In addition, the Doctor of Medicine program does not have any articulation or transfer agreements with any other college or university at this time.

Technical Standards

The Technical Standards describe the essential abilities required of all candidates:

- Reasonable accommodation in achievement of the standards is defined under U.S. federal statutes applied to individuals with disabilities. Such accommodations are intended to support the successful completion of all components of the MD degree.
- Standards in five areas must be met by all candidates: Observation, Communication, Motor Function, Cognitive, and Professional.

1. Observation. Candidates are reasonably expected to:

- Observe demonstrations and participate in experiments in the basic sciences
- Observe patients at a distance and close at hand.
- Demonstrate sufficient use of the senses of vision, hearing, and smell and the somatic sensation necessary to perform a physical examination.
- Integrate findings based on these observations and to develop an appropriate diagnostic and treatment plan.

2. Communication

- Communicate in verbal and written form with health care professionals and patients, including eliciting a complete medical history and recording information regarding patients' conditions.
- Perceive relevant non-verbal communications such as changes in mood, activity, and posture as part of a physical examination of a patient.
- Establish therapeutic relationships with patients.
- Demonstrate reading skills at a level sufficient to individually accomplish curricular requirements and provide clinical care for patients using written information.

3. Motor Function

- Perform physical examinations and diagnostic procedures, using such techniques as inspection, percussion, palpation, and auscultation.
- Complete routine invasive procedures as part of training, under supervision, using universal precautions without substantial risk of infection to patients.
- Perform basic laboratory tests and evaluate routine diagnostic tools such as EKGs and X-rays.
- Respond in emergency situations to provide the level of care reasonably required of physicians.
- Participate effectively in physically taxing duties over long hours and complete timed demonstrations of skills.

4. Cognitive

- Measure, calculate, analyze, synthesize, extrapolate, and reach diagnostic and therapeutic judgments.
- Recognize and draw conclusions about three-dimensional spatial relationships and logical sequential relationships among events.
- Formulate and test hypotheses that enable effective and timely problem-solving in diagnosis and treatment of patients in a variety of clinical modalities.
- Understand the legal and ethical aspects of the practice of medicine.
- Remain fully alert and attentive at all times in clinical settings.

5. Professionalism

- Demonstrate the judgment and emotional stability required for full use of their intellectual abilities.
- Possess the perseverance, diligence, and consistency to complete the Pre-Med Post-Baccalaureate curriculum and prepare to enter the independent practice of medicine.
- Exercise good judgment in the diagnosis and treatment of patients.
- Complete all responsibilities attendant to the diagnosis and care of patients within established timelines.
- Function within both the law and ethical standards of the medical profession.
- Work effectively and professionally as part of the health care team.
- Relate to patients, their families, and health care personnel in a sensitive and professional manner.
- Participate effectively in physically taxing duties over long work hours, function effectively under stress, and display flexibility and adaptability to changing and uncertain environments.
- Maintain regular, reliable, and punctual attendance for classes and clinical responsibilities.
- Contribute to collaborative, constructive learning environments, accept constructive feedback from others, and respond with appropriate modifications.

By signing the Enrollment Agreement, the student is acknowledging that the catalog, disclosures, and information located on the website have been made available to the student to read and review.

Any questions or concerns regarding the Student Enrollment Agreement should be directed to the college or university department.

Catalog, Performance Fact Sheet, and Website

Before signing the Student Enrollment Agreement, the prospective student is strongly urged to visit the University and College website at www.cnsu.edu, and to read and review the CNU General Catalog and School Performance Fact Sheet (SPFS). The SPFS contains important performance data for the institution. The Catalog contains important information and policies regarding this institution.

Student's Right to Cancel, Withdraw, and Refund

You have the right to cancel the Student Enrollment Agreement until 12:01 AM on the first calendar day after the first classroom instruction session attended, or until 12:01 AM on the eighth calendar day after a student has signed the Enrollment Agreement, whichever is later.

Cancellation shall occur when you give written notice of cancellation to the Admission Office at the University's address shown at the top of the first page of the Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of cancellation sent by hand delivery, email, or facsimile is effective upon receipt by the University. Written notice of cancellation sent by mail is effective when deposited in the mail properly addressed with postage prepaid.

After the cancellation period described above, you have the right to withdraw from the University at any time. Withdrawal shall occur when you give written notice of withdrawal to the Registrar at the University's address shown at the top of the first page of the Enrollment Agreement. When withdrawing from the college/university, please complete the Official College Withdrawal form available from the Registrar's request form website: <http://www.cnsu.edu/office-of-the-registrar/registrar-services>. Do not use this form to indicate your intent to cancel your enrollment agreement.

For information on refund calculations due to cancellation or college withdrawal, please see the FINANCIAL SERVICES & DISCLOSURES on page 149 of this catalog.

Student Enrollment Agreement

The Student Enrollment Agreement must be completed and submitted to the college in order to show intent to enroll in the program. The Student Enrollment Agreement is a legally binding contract when it is signed by the incoming student and accepted by the institution.

Tuition & Fees

All tuition, fees, expenses, and policies listed in this publication are effective as of August 2017 and are subject to change without notice by California Northstate University.

In the tables below, M1, M2, M3, and M4 indicate the student's year in the program (e.g. M1 is a first-year student; M2 is a second-year student, etc.).

Tuition is charged on a full-time, semester basis. Generally, tuition and fees are charged to a student's account thirty (30) days prior to the start of each semester term. The above is based on the assumption that a student will attend each semester term on a full-time basis, which allows for a student to graduate after successfully completing four (4) years of coursework consisting of 150 semester credit hours.

International students are not charged additional fees or charges associated with vouching for student status.

Payment deadlines, loan obligations, refund calculations due to cancellation and withdraw, and the Student Tuition Recovery Fund (STRF) disclosures are located in FINANCIAL SERVICES & DISCLOSURES (page 148).

2018-2019 MD Tuition & Fees

Tuition & Fees (T&F)	Amount	Class
Enrollment Fee (refundable; applied to tuition)	\$100.00	M1
Tuition	\$57,900.00	M1, M2, M3, M4
Student Association/Support Fee	\$500.00	M1, M2, M3, M4
Student Disability/Liability Coverage Fee	\$91.00	M1, M2, M3, M4
Technology Fee	\$50.00	M1, M2, M3, M4
Medicine Lab Fee (Anatomy, Medical Skills, and Research)	\$500.00	M1, M2
CPR Fee	\$40.00	M1, M3
Books and Supplies (estimate) ¹	\$1,000.00	M3, M4
Orientation Fee	\$50.00	M1
Medicine Kit ²	\$100.00	M1
USMLE Step 1 Preparation Package	\$239.00	M2
Background Check Fee	\$71.00	M3
Graduation Fees ³	\$300.00	M4
STRF Fee per \$1000 ⁴	\$0.00	M1, M2, M3, M4
M1 Total Estimated Tuition & Fees per Year ⁵	\$59,231.00	
M2 Total Estimated Tuition & Fees per Year ⁵	\$59,280.00	
M3 Total Estimated Tuition & Fees per Year ⁵	\$59,652.00	
M4 Total Estimated Tuition & Fees per Year ⁵	\$59,841.00	

Total estimated cost for the entire 4-year Doctor of Medicine program ranges from \$245,000 to \$257,500.00⁵

Estimated Other/Optional Educational Related Costs ⁶	Amount	Class
Health Insurance premium ⁷	\$3,200.00	M1, M2, M3, M4
Laptop ⁸	\$1,100.00	M1
Room and Board (housing and food costs, not paid to CNU) ⁸	\$23,272.00	M1, M2, M3, M4
Transportation (not paid to CNU) ⁸	\$4,648.00	M1, M2, M3, M4
Books and Supplies (estimate)	\$1,000.00	M1, M2
USMLE – Step 1 (M2), Step 2 CK (M3) ⁹	\$600.00	M2, M3
USMLE – Step 2 CS ⁹	\$1,275.00	M4
Remediation Fee (only if participant)	\$300.00	
M1 Total Estimated Cost per Year ¹⁰	\$92,851.00	
M2 Total Estimated Cost per Year ¹⁰	\$92,300.00	
M3 Total Estimated Cost per Year ¹⁰	\$91,372.00	
M4 Total Estimated Cost per Year ¹⁰	\$92,236.00	

¹ Books and supplies are provided and charged differently for M1 and M2 students than M3 and M4.

² Kit includes one stethoscope, one pen light, one pocket eye chart, tuning fork (c-128), adult Babinski reflex hammer, sphygmomanometer (pocket aneroid) and the case.

³ Covers regalia, graduation dinner, diploma cover, transcripts, etc.

⁴ The STRF fee is \$0.00 per \$1000 of institutional charges.

⁵ Based on estimate annual tuition increases of 3% to 5%. This estimate is not binding to CNU.

⁶ Includes estimated cost and expenses a student may incur during applicable year of attendance, whether or not paid directly to CNU, and includes estimated out-of-pocket cost of living expenses.

⁷ Provided and charged by outside healthcare plan insurance company; optional, estimated, and may increase or decrease based on number of participants and other factors.

⁸ Estimated amounts of individual housing, food, and transportation costs, not operated by, charged by, or paid to CNU

⁹ USMLE fees, estimated based on USMLE fee schedule.

¹⁰ Total of both Tuition and Fees and Estimated Other/Optional Educational Related Costs Charts.

Scholarships

Information regarding various scholarships can be found the College of Medicine's website, medicine.cnsu.edu, Financial Aid, Types of Assistance, Grants and Scholarships as well as within the Grants and Scholarships section of this catalog, page 148.

General Policies

Orientation and Registration

First year professional Orientation is mandatory for all students. If a student is not able to attend the scheduled orientation, due to illness or emergency, the Office of Student Affairs, Admissions and Outreach must be notified of the absence immediately. The student is required to complete a make-up orientation as soon as practical.

Registration for classes requires:

1. All admission contingencies be fulfilled.
 - a. Admission contingencies include proof of medical insurance coverage, all required immunizations, a cleared background check, and any other institutional requirements. Students may enroll in the Student Health Insurance Plan to satisfy the insurance requirement. For a complete list of required immunizations, please review the requirements at: <http://medicine.cnsu.edu/students-com/admissions/admission-steps>
2. Completion of all new student paperwork.
3. Financial aid clearance from the Financial Aid Office.

New students must submit the Emergency Contact and Medical Information Form to the Office of the Registrar by the end of Orientation. To make updates, a new form must be submitted to the Registrar. The Office of the Registrar requires submission of the Authorization to Release Student Records if a student desires to grant a personal third-party (such as a parent, spouse, etc.) access to his/her student record. Please refer to the ["Directory Information and Access to Student Records"](#) section of this catalog for more information.

New students should review their local, home, and billing contact information via the Student Portal and update as needed. It is the student's responsibility to maintain valid contact information throughout their enrollment at CNU. Instructions for accessing the Student Portal is sent by the CNU IT department to the student's CNU email address.

Registration is conducted by the Registrar prior to the start of each semester for new and continuing students. Students with business, financial, or other registration holds on their account will not be registered until the Registrar is notified that the hold has been cleared. Students who are in compliance with institutional requirements or who have a hold on their student account at the time of registration are required to satisfy the requirement and may also be required to submit the Course Add/Drop form by the end of the Add/Drop period to register or make schedule changes.

License Information for U.S. or Canadian Medical School Graduates

Completion of Program and Licensing

Completion of the educational program leading to a degree and/or diploma is dependent upon student performance and success. The requirements for licensure in the profession are established by the state where licensure is

sought. Completion of the educational program and obtaining a degree or diploma does not by itself guarantee licensure. Students are expected to remain current with other licensing requirements, including but not limited to the licensure examination and technical standards they may be required to meet in order to be licensed by the state in which they seek to practice. In addition, maintaining such technical standards is a condition for continued enrollment in this program; reasonable accommodations as defined and required by law may apply to persons with disabilities.

Licensure Eligibility

Information regarding the Medical Board of California Physician Licensure eligibility can be found at: http://www.mbc.ca.gov/Applicants/Physicians_and_Surgeons/

To be eligible for a Physician's and Surgeon's license, applicants must have received all of their medical school education from and graduated from a medical school recognized or approved by the Medical Board of California or must meet the requirements of Business and Professions Code section 2135.7. The medical school's name must exactly match the name on the Board's list of recognized medical schools. Prior to submitting an application, please refer to the Board's website to verify your medical school is recognized:

Medical Schools Recognized by the Medical Board of California

If you did not attend or graduate from a recognized or approved medical school you may be eligible for licensure pursuant to [section 2135.7 of the Business and Professions Code](#) (effective 1/2013).

[California Business and Professions Code section 30](#) requires mandatory disclosure of a Social Security Number (SSN), Individual Taxpayer Identification Number (ITIN), or Federal Employer Identification Number (FEIN). The number is used for tax enforcement purposes, for purposes of compliance with any judgment order for family support in accordance with [Section 17520 of the Family Code](#), or for verification of licensure or examination status by a licensing examination entity which uses a national examination and where licensure is reciprocal with the requesting state.

Address Where Instruction Will Be Provided

Class sessions are conducted at 9700 West Taron Drive, Elk Grove CA 95757. Experiential education and clinical rotations and service learning activities are conducted at assigned professional clinical locations and community sites as established by agreement among the student, professional preceptor, and College.

Instructions/Course Delivery

The College of Medicine offers innovative medical education integrated by organ system instead of the typical discipline based education. Students learn by using a mixture of lectures, small group sessions, Clinical Cases and Case Based Learning. In the pre-clinical years, students receive at least 130 hours of instruction regarding history and physical examination. The clerkships are conducted at a variety of

community based hospitals in the Sacramento area and surrounding Central Valley. CNUCOM also has affiliations in the Bay area and Southern California. All courses are delivered in English and English language services are not provided.

Awards: Non-Academic

During the academic year, students are notified in class, by email or a posting to the CNUCOM News bulletin board, of criteria, dates, nomination information, and deadlines of certain awards, scholarships, or honors. The College of Medicine Awards Committee coordinates selection of recipients of the College of Medicine honors, scholarships and awards. The Office of Student Affairs, Admissions and Outreach coordinates an Award and Scholarship Ceremony at the end of each academic year. Recipients and their friends and family are invited by formal invitation to attend this event to receive an official recognition of their achievement.

Policy on Stress & Fatigue Management

Purpose

In medical education, and specifically in clinical care settings, patient safety, as well as the personal safety and well-being of the student, mandates implementation of an immediate and proper response sequence. Student excess fatigue and/or stress may occur in patient care settings or in non-patient care settings. In non-patient care settings, responses may vary depending on the severity of and the demeanor of the student. The following is intended as guidelines for recognizing and observing excessive student fatigue and or stress in non-patient care and patient care settings.

All students will be trained on stress, fatigue, and burnout. Any release from duty assignments due to stress/fatigue that exceed the requirements for completion of educational objectives must be made up in order to meet curriculum requirements.

Responsibility of the Supervising Faculty: Classroom Setting

- In the classroom setting, if a faculty recognizes a student is demonstrating evidence for excess fatigue and/or stress, the faculty should notify the student's College Master, who, in turn, should discuss the possible reasons and opportunities for support.
- The College Master may recommend that the student meets with the Assistant Dean of Student Affairs and Admissions to identify available support.

Responsibility of the Supervising Faculty: Clinical Setting

- If a student in a clinical setting demonstrates evidence of excessive fatigue and/or stress, faculty supervising the student should immediately release the student from further clinical duties and responsibilities. If the student exhibits signs of excessive fatigue, the supervising faculty should advise the student to rest for at least a 30- minute period before operating a motorized vehicle. The student may also call someone to provide transportation back home.
- The faculty and/or supervising resident should privately discuss with the student the possible causes

of stress/fatigue in order to identify ways to reduce fatigue/stress.

- The faculty and/or supervising resident must immediately notify the Clerkship Director of the decision to release the student from further clinical duties.
- A student who is released from further clinical duties due to stress or fatigue cannot resume clinical duties without permission by the Clerkship Director.

Student Responsibility

- Students who perceive they are manifesting excess fatigue and/or stress have the professional responsibility to immediately notify their attending/precepting faculty and Clerkship Director without fear of reprisal.
- Students who recognize a peer student exhibiting excess fatigue and/or stress must immediately report their observations and concerns to the attending/precepting faculty and the Clerkship Director.

Clerkship Director Responsibility

- Upon removal of a student from duties, the Clerkship Director must determine the need for immediate change in duty assignments for peer students in the clerkship and/or the clinical site.
- The Clerkship Director will notify the departmental chair to discuss methods to reduce student fatigue.
- The Clerkship Director will meet with the student in person. If discussion with the Clerkship Director is judged to be inadequate, the student will be referred to the Director of Student Affairs and Admissions for provision of appropriate services and/or counseling.

Student Mistreatment Policy

Purpose

The purposes of this policy are to outline expectations of behaviors that promote a positive learning environment for CNUCOM medical students and other learners and to identify grievance procedures to address alleged violations. This policy offers a definition of these expectations through its Learning Environment Statement, provides examples of unacceptable treatment of medical students, and describes the procedures available to report incidents of mistreatment in a safe and effective manner.

Policy

CNUCOM is committed to assuring a safe and supportive learning environment that reflects the institution's values: professionalism, respect for individual rights, appreciation of diversity and differences, altruism, compassion, and integrity. Mistreatment of medical students is unacceptable and will not be tolerated.

Procedures

1. Distribution by the Student and Faculty Handbooks as outlined by this policy are to be shared with all students (new and continuing), all new residents and faculty teachers, and on an annual basis with all current instructors (e.g. residents, faculty, nurses, administrators).

2. Examples of Mistreatment—Students should use this Mistreatment Policy to address discriminatory, unfair, arbitrary or capricious treatment by faculty or staff. CNUCOM defines mistreatment as behavior that is inconsistent with the values of the university's Anti-Discrimination Policy Statement noted below and which unreasonably interferes with the learning process. When assessing behavior that might represent mistreatment, students are expected to consider the conditions, circumstances, and environment surrounding such behavior.
3. Examples of discriminatory, unfair, arbitrary or capricious treatment include, but are not limited to:
 - a. Verbally abusing, belittling, or humiliating a student.
 - b. Intentionally singling out a student for arbitrary treatment that could be perceived as punitive.
 - c. Unwarranted exclusion from reasonable learning opportunities.
 - d. Assignment of duties as punishment rather than education.
 - e. Pressuring students to exceed established restrictions on work hours.
 - f. Exploitation of students in any manner, e.g. performing personal errands.
 - g. Directing students to perform an unreasonable number of "routine hospital procedures", i.e. "scut" on patients not assigned to them or where performing them interferes with a student's attendance at educational activities, e.g. rounds, classes.
 - h. Pressuring a student to perform medical procedures for which the student is insufficiently trained (i.e. putting a student in a role that compromises the care of patients).
 - i. Threatening a lower or failing grade/evaluation to a student for inappropriate reasons.
 - j. Committing an act of physical abuse or violence of any kind, e.g. throwing objects, aggressive violation of personal space.
 - k. Making unwelcome sexual comments, jokes, or taunting remarks about a person's protected status as defined in the University's Anti-Discrimination Policy Statement.

Reporting Concerns of Possible Mistreatment

Medical students who themselves experience or observe other students experiencing possible mistreatment are encouraged to discuss it with someone in a position to understand the context and address necessary action. The individual considering making a report of mistreatment should first, if possible, attempt to resolve the matter directly with the alleged offender. Suggested options for medical students include:

1. DISCUSS it with their College Master, the Assistant Dean of Student Affairs, Admissions and Outreach, or the clerkship/course/sequence director.
2. REPORT it (utilizing one of three options below and hopefully prevent such behavior in the future):
 - a. File a formal report with the Assistant Dean of Student Affairs, Admissions and Outreach.
 - b. File an anonymous report via the CNUCOM website. This mechanism includes options for

prompt attention OR withholding the report until a future date.

- c. File an identified or anonymous report on campus using the College's official Student Complaint /Grievance Form located outside the Office of the Student Affairs, Admissions and Outreach.
 - Medical Students requesting complete anonymity should be made aware that doing so may interfere with the university's ability to investigate the concern and their ability to receive information about the follow-up investigation. Medical Students may also choose to pursue claims of unlawful discrimination or harassment in compliance with the University's Anti-Discrimination Policy Statement: "California Northstate University College of Medicine (CNUCOM) is committed to cultivating a diverse community that recognizes and values inherent worth in individuals, fosters mutual respect, and encourages individual growth. The College believes that diversity enhances and enriches the quality of our academic program. CNUCOM provides equal opportunity in education and employment and does not discriminate on the basis of race, color, creed, religion, national origin, ethnicity, gender identity, gender expression, age, sexual orientation, political affiliation, veteran status, or disability."

Responding to Concerns of Mistreatment

Every effort is made to respond to concerns of mistreatment in a professional manner to minimize the risk of retaliation. The Assistant Dean of Student Affairs, Admissions and Outreach and the Associate Dean of Faculty Affairs and Assessment will be provided with written notice of reported concerns of mistreatment of Medical Students (corresponding with the date indicated on the report), and conduct an initial inquiry into the circumstances. Consistent with Faculty Handbook guidelines on Disruptive or Inappropriate Behavior, and depending on the identity of the alleged offending party, the Assistant Dean of Student Affairs, Admissions and Outreach will engage the appropriate process channels for implementing notice to the offending party, and for investigation and implementation of potential corrective action. Aggregate and de-identified data on reports of mistreatment of Medical Students will be shared with the Curriculum Committee and the President's Executive Council at least quarterly.

No Retaliation

Retaliation is strictly prohibited against persons who in good faith report, complain of, or provide information in a mistreatment investigation or proceeding. Individuals who believe they are experiencing retaliation are strongly encouraged to contact the Assistant Dean of Student Affairs, Admissions and Outreach. Alleged retaliation will be subject to investigation and may result in disciplinary action up to and including termination or expulsion.

Academic Policies and Procedures

Please visit medicine.cnsu.edu, Student Services, to view all of our academic policies.

Academic Calendar

The academic calendar consists of two didactic course semesters lasting from 16—20 weeks long for first and second-year students. Third-year students complete clinical clerkships throughout the calendar year. Fourth-year students complete electives throughout the calendar year.

Credit Hour Policy

1 credit is assigned per hour each week of classroom or direct 1 credit for every 15 lecture hours and 30 preparation/homework hours (LEC). 1 credit for every 25 workshop hours and 25 preparation/homework hours (AL). 1 credit for every 30 laboratory hours and 30 preparation/homework hours (LAB). 1 credit hour for every week with scheduled at least 40 hours in an integrated curriculum, including (a) mixed methods of teaching [e.g., lecture, small group, TBL, flipped classroom, clinical skills, patient encounter, etc.] and (b) assigned self-preparation time (LAL). 1 credit hour for every week with assigned at least 36 clinical hours during clerkship or other clinical rotations (EL).

Code	Course Type	Code	Course Type
AL	Active Learning course	LAL	Lecture & Active Learning course
EL	Experiential Learning	LEC	Lecture course
LAB	Laboratory course		

Grading Convention

	Definition		Definition
H	90-100%, Pass with Honors	I	Incomplete, but work of passing quality (temporary grade)
HP	80-89%, High Pass*	Y	Provisional, requiring remediation (temporary grade)
P	70-89%, Pass	W	Official Withdrawal
F	<70%, Fail	IP	In Progress

*HP (High Pass) grade is issued only for M3 clerkship courses effective: 9/1/2017.

The work of all students in any of the required courses for the MD degree is reported in terms of the following grades: H (Pass with Honors), P (Pass) or F (Fail), or as two provisional marks: I (incomplete but work of passing quality), or Y (provisional, requiring remediation). Exceptions include Self-Directed Student Scholarly Project course and some electives that are graded P/F. Grade point average is not computed and is not available.

The provisional mark of Incomplete (I) is assigned only when the student's work is of passing quality, but is incomplete for good cause, as determined by the Course Director. The student is entitled to replace the "I" with a "P" or "H" grade and to receive course credit provided he/she satisfactorily completes the work of the course in a way specified by the Course Director. If course requirements have not been completed within the six weeks' time limit the Instructor of Record submits the "F" grade. Remediation of a "Y" grade must be completed within 6 weeks. Students remediating a "Y" grade are not eligible for Honors (H).

Course grades are determined by performance on the following:

- Summative Exam
- Written assignments
- Professionalism
- Other rubrics as assigned by the Course Director

For a passing grade, students are expected to score 70% or above or pass all scored/graded exams (except formative) and assignments as well as pass the requirements for professionalism according to the course specific rubrics. Percentages will be rounded to the nearest integer.

The Course Director must assign the final grade within 21 calendar days of the end of the course or the remediation examination. The grade assigned following completion of the reexamination is to be based either solely on the results of the reexamination or on an aggregate of all examinations as specified in the syllabus. If the student decides not to take the reexamination within six weeks, the Course Director must submit the "F" grade.

Numeric Scoring

During the progression of the course, faculty use numeric scoring to help quantify a student's achievements within the course. The Course Director assigns a total numeric score for the course, which translates to recording a passing grade if 70% or above, and an honors grade if 90% or above. The numeric score is kept for administrative, student progression and ranking purposes, and is not revealed to the student.

Narrative

Where possible (e.g. small group activities), all grades should be accompanied by a narrative.

Grade Appeal

A student can file an appeal if there is a disagreement with a final course grade. The appeal must be submitted within ten (10) business days of online grade posting.

The student must initiate a formal grade appeal process in writing and present the appeal to the course coordinator. The grade appeal form is located on the school's website.

The faculty member will respond to the student in writing within ten (10) business days. If the appeal cannot be resolved, the student has two (2) business days to appeal in writing to the appropriate Department Chair who renders a decision in writing within ten (10) business days of receipt of the formal appeal. (If the course Coordinator is the Department Chair, then the student may appeal the decision directly to the Senior Associate Dean of Medical Education and Accreditation. The student has two (2) business days to submit an appeal in writing to the Senior Associate Dean of Medical Education and Accreditation. The Senior Associate Dean of Medical Education and Accreditation will render a decision in writing within ten (10) business days of receipt of the formal appeal).

If the Department Chair cannot resolve the appeal, the student has two (2) business days to submit an appeal in writing to the Senior Associate Dean of Medical Education and Accreditation. The Committee will render a decision in writing within ten (10) business days of receipt of the formal appeal.

If the Senior Associate Dean of Medical Education and Accreditation cannot resolve the appeal, the student has two (2) business days to submit an appeal in writing to the Dean. The Dean will render the final decision in writing within ten (10) business days of receipt of the formal appeal.

If a grade appeal is approved, the professor must complete a Grade Change Form and submit the form to the Senior Associate Dean of Medical Education and Accreditation for final approval. The form must then be submitted to the Registrar so that the grade can be changed on the transcript.

The same process will be used at the conclusion of any required clerkship. The review will be conducted by the Associate Dean of Clinical Medicine instead of the Senior Associate Dean of Medical Education.

Graduation Requirements

Students are recommended and approved for the Doctor of Medicine degree from CNUCOM by the Student Promotions Committee provided that the following requirements are satisfied:

1. A maximum of four years are required to complete Phase A which includes passing USMLE Step 1.
2. Students must complete a minimum of 150 credit hours in the medical program, including all Phase A courses, all required clerkships in Phase B, and necessary Phase C sub-I and electives. No more than 27 credit hours of electives can count towards the 150 credit hours for graduation. Phase B and C must be completed within a maximum of four years.
3. Students must pass USMLE Step 1 and present supporting documentation by Feb 1st in the winter of their third year of training.
4. Total time from matriculation to graduation cannot exceed 7 years.
5. Students must pass USMLE Step 2 CK and Step 2 CS exams to qualify for graduation. It is strongly recommended but not required that Step 2 CK is passed by the end of the 1st semester of Phase C.
6. Failure to meet these requirements will result in review by the Student Promotions Committee.
7. Students must attain the knowledge and skills, and develop capacity and behaviors required of a physician.
8. Students must attain a level of clinical judgment which warrants entrustment by the Faculty as required for entry to residency.
9. Students must demonstrate a sense of responsibility and social accountability to patients and the community.
10. Students must comply with the School's standards of conduct, professionalism, and academic integrity.
11. Students must comply with the laws of the United States; the laws of the State of California; local city, county, and municipal ordinances; the policies, rules and regulations of the California Northstate University and the COM.
12. All academic requirements must be completed at least 10 days before the date of graduation. Failure to comply may lead to delayed graduation.
13. Only students in good academic standing are eligible for graduation. Students must have satisfied all conditions for resolution of probation before graduation.

In the clinical portion of the curriculum, students are required to complete 46 credits of required clerkships, 4 credits of required AI (Acting Internship) and 27 elective credits for graduation. Standard electives have one credit assigned for each week of training.

All students may take more than the required number of elective credits.

Exit Interview

Exit interviews will be conducted during the last academic year. COM does not issue grades, grant degrees, or furnish academic transcripts until all financial obligations have been met and all University property has been returned.

Commencement

Every student is required to attend commencement and wear traditional academic regalia consisting of cap, gown, and academic hood. Hoods of academics regalia are conferred upon the graduates at commencement by faculty. The hood is lined with the California Northstate University colors of cabernet (red) and gold, and is adorned with Kelly green, denoting Doctor of Medicine.

Any ornamentation must signify recognized College organizations and must be approved in advance of commencement by the Assistant Dean of Student Affairs, Admissions and Outreach.

Academic Progression Policy

Purpose

This policy can be found in its entirety on our website medicine.cnsu.edu under the "Current Students" tab.

The purpose of the policy is to ensure students reach and maintain high standards of learning throughout the medical program, accomplish all learning objectives and reach recommended competency levels. Students must demonstrate that they have attained a mastery of knowledge and skills, and developed capacity and behaviors required to practice medicine. The work of all students in any of the required courses for the MD degree is reported in terms of the following grades: H (Pass with Honors), HP (High Pass), P (Pass) or F (Fail), or as two provisional marks: I (incomplete but work of passing quality) or Y (provisional, requiring remediation). Exceptions include Self-Directed Student Scholarly Project course and some electives that are graded P/F. HP is only issued to M3 clerkships. A grade of F (Fail) in a course indicates a lack of understanding of the fundamental concepts of the course material necessary for progression.

Scope/Coverage

This progression policy applies to all medical students. This policy will be reviewed at least every three (3) years.

Policy

1. Good Academic Standing

A student who is advancing in the program as planned, is not placed on Probation and is not in Proceedings for Dismissal, is considered in Good Academic Standing. For students in good academic standing a standard (template) letter may be issued for verification purposes (academic and non-academic needs). If a student has been notified of probation or dismissal but a formal appeal is pending, a standard letter of good standing will still be issued.

2. Serving in Elective or Appointed Positions

For purposes of holding elective office at the class or the college level, serving on college or university committees, or representing the college to outside organizations, either on or off campus, a student shall be in a good academic standing.

For a student to assume elected or appointed position, both the Assistant Dean of Student Affairs and the Chair of the Student Promotions Committee must determine, based on the student's documented history of academic performance and professional behavior that assuming such responsibilities would be in the best interest of either the student or the college. Review of candidates for elected or appointed positions will be done before the announcement about filling in such positions.

If a probationary or dismissal procedures occur during an already started service term, the student will be allowed to complete the term; voluntary resignation will be accepted.

3. Medical Student Performance Evaluation (MSPE)

MSPE is the student's academic identity card. It is completed before October 1 of Phase C (Year 4). Its content includes, but is not limited to, the following:

- A descriptive narrative of student's performance over the length of the program till the date of MSPE issuance
- Student's academic standing, past and present probationary status and other disciplinary actions
- Student's class rank
- Student's class quartile
- Grades and narratives for completed courses/clerkships in Phases A, B, and C at the time of issuance
- For certain specialties (e.g., Internal Medicine residency programs), class rank within the related clerkship
- College Master/Advisor note/letter(s)
- Notes about research projects and service learning activities
- Any other information that might be considered important to residency programs (students will be notified about changes).

7.

Academic Notification

a. Academic Alert

This is not considered an adverse action. Academic Alert is issued by the Office of Student Affairs and applies to students in good academic standing that may have failed one or more formative assignments. Since the student is in good academic standing, this designation is not recorded in the Medical Student Performance Evaluation (MSPE) or in outside requests for documentation (e.g.—visiting student elective applications, other degree program applications, license requests, etc.). Academic alerts are shared with the student, the course director and the respective college master.

b. Behavioral Alert

Behavioral alert is not considered an adverse action. Behavioral Alert when warranted after incident report, fact finding and deliberation, is issued by the Office of Student Affairs for significant infraction of professionalism which will be shared with the student and the respective college master.

Student will be required to undertake behavioral improvement as outlined in the alert. Repeated incidence of unprofessional conduct may lead to disciplinary review at the Student Promotion Committee. Student must appear at the review session to defend, to explain, or to provide behavioral improvement plan.

Provisional Academic Status

The Y grade is a temporary transcript grade and can be replaced by a passing grade (P) if the course/clerkship requirements are met within six weeks after the course/clerkship ends. If Y has been assigned due to failing on a summative examination, such deficiency must be corrected within two attempts during remediation. Such remediation and all allowed attempts at remediation must occur within six weeks from the course/clerkship's end. Students remediating a "Y" grade are not eligible for Honors (H) in that course, and upon successful remediation a grade of P may be recorded.

When a student fails the initial summative exam, s/he will not be eligible for Honors even if the remediation happens before the final grade for the course is registered in the Registrar's office.

If the course/clerkship requirements are not met or the student is unable to pass a summative exam within two attempts during the remediation period, a grade of F (Fail) will be recorded.

Upon the recording a failing grade (F), the student will be required to appear in front of the Student Promotions Committee. The student's academic record will be reviewed and a personalized study plan, which must include retaking of the summative examination if that was the reason for the F grade, will be designed by the Student Promotions Committee with the help of the respective Course Director; the remediation study plan will be sent for approval to the Assistant Dean of Student Affairs, Admissions and Outreach. Upon successful completion of the study plan, a passing grade (P) may be recorded. If the student's performance is not satisfactory, the course grade will remain recorded as a Fail (F). The student will be allowed to repeat the course in its entirety if the student remediation plan assigned by the Student Promotions Committee is not met.

Provisional academic status will not be noted in the Medical Student Performance Evaluation (MSPE).

Extended remediation period may be requested for certain documented conditions or a leave of absence may be sought. A request for extended remediation period must be in writing and submitted by the student to the Student Promotions Committee, whose recommendation and accompanying documentation will be forwarded for approval to the Assistant Dean of Student Affairs, Admissions and Outreach.

Probationary Academic Status (Academic Probation)

A student may be placed on academic and/or disciplinary probation due to conditions such as but not limited to:

- a. Receiving two failing grades within one academic year
- b. Receiving a failing grade when repeating a course as a remediation of a previously recorded F in same course
- c. Documented unprofessional behavior that has not been corrected with remediation

A student may be placed on probation upon a written notice from the Assistant or Associate Dean of Student Affairs per recommendation by the Student Promotions Committee.

Probationary status is recorded in the Medical Student Performance Evaluation (MSPE) and in outside requests for documentation (e.g. -visiting student elective applications, other degree program applications, licensure requests, etc.). Students, who are on probation, are not eligible to assume new class, college or university-related positions, such as running for officer positions at student organizations, and applying for other elected or appointed positions.

Students on Probation must appear in front of the Student Promotions Committee, who will prepare a plan of action with specific timelines in accordance with the requirements to meet graduation deadlines. The plan of action may include but is not limited to repeating the failed courses, repeating an academic year or designing a study plan to extend the content of one academic year over two academic years, should the timing for graduation permit. This list is not all-inclusive. The plan for student remediation may not extend the maximum allowed time for graduation from the program (7 years). The plan of action must be in writing; the Student Promotions Committee's plan and accompanying documentation will be forwarded for approval to the Assistant Dean of Student Affairs, Admissions and Outreach.

Repeating Courses

Adverse actions such as repeating a portion of or a whole course, a semester, or an academic year will be determined by the Student Promotions Committee, following procedure and due process.

USMLE Step Examinations

Students are required to pass Step 1 and both components of Step 2, Clinical Knowledge (CK) and Clinical Skills (CS), of the United States Medical Licensing Examination (USMLE) prior to graduation. Performance on these examinations provides one method of comparing our students to those at other medical schools and thereby assessing performance relative to a national peer group. The successful completion of all three steps of the USMLE is necessary for obtaining a license to practice medicine.

Important Dates**USMLE Step 1**

Students must pass USMLE Step 1 by Feb 1 in the winter of their 3rd year. If the student has not passed Step 1 by Feb 1 of their third year, they will be allowed to complete the clerkship in which they are currently engaged. They will not be allowed to continue with subsequent clerkships, they will be placed on academic probation, and they will be required to appear before the Student Promotions Committee.

USMLE Step 2 CK and CS

Students must complete all required third year clerkships prior to taking the USMLE Step 2 CK and CS examinations. Students are required to register for the Step 2 CK and CS examinations no later than July 30, of their Phase C year. A failure to comply will be reported to the Student Promotions Committee.

Students are required to take Step 2 CK and CS before December 1st of their Phase C year, if graduation in May is anticipated. No student may defer the Step 2 CK and CS examinations beyond December 1st without appropriate approval from the Associate Dean of Student Affairs, Admissions and Outreach.

Students have, with the approval of the Student Promotions Committee, a maximum of 12 months after completion of their clinical course work to record a passing score on the USMLE Step 2 CK and CS examinations. Delay in presenting passing scores for Step 2 examinations may warrant delay in graduation and therefore affect start of residency.

Implications if Examination is Failed

Students who do not pass the USMLE examinations are reviewed by the Student Promotions Committee. Students are expected to develop a study plan for retaking Step 1, and should retake it as soon as possible before continuing in the clinical curriculum. Generally, if a student is not having academic difficulty in the curriculum, she or he is permitted to attempt the examination again. If a student has had difficulty in the basic science curriculum, the Student Promotions Committee may recommend dismissal if Step 1 is failed twice.

If a student fails Step 1, s/he should contact the Assistant Dean of Student Affairs, Admissions and Outreach to discuss the timing of retaking the examination in relation to his/her clinical schedule. With the Step 1 examination being given essentially year-round, the student is usually permitted to complete the clerkship in which s/he is currently enrolled.

For students who are having difficulty both in the curriculum and with the USMLE examinations, the Student Promotions Committee will take a more active role in the determination of the student's academic program and may require the student to develop an independent study program of three to six months in duration.

If either component of Step 2 is failed in the summer of the senior year, the student's clinical schedule needs to be modified to allow time for studying and retaking the exam within a timeframe that allows a passing score to be reported prior to the student entering his/her residency rank order list. The status of completion of either component of Step 2 is included in the Dean's MSPE. If Step 2 is failed a second time and if the student has had difficulty in the curriculum, the Student Promotions Committee may recommend dismissal.

If either Step 1 or either component of Step 2 is failed three times, the Student Promotions Committee will consider a dismissal recommendation.

The USMLE program recommends to medical licensing boards that they require that the dates of passing the Step 1, Step 2, and Step 3 examinations occur within a seven-year period.

For purposes of medical licensure in the United States, any time limit to complete the USMLE is established by the state medical boards. Many require completion of the full USMLE sequence within seven years from the date the first Step or Step Component is passed or, in some cases, from the date of the first attempt at any Step or Step Component. Students should understand the implications of time limits for licensure.

Policy on Assignment of Clerkship Grades

For all required clerkships, the Clerkship Director is responsible for assigning the final grade and narrative as the Clerkship Director bears ultimate responsibility for the clerkship and students assigned to the required clerkships. Grading for geographic sites that are remote from the main clerkship director should be done with consultation from the appropriate site director(s).

Policy on Deficient Grades

When a student receives a deficient grade in a course, it is a course director's responsibility to outline what will be expected to remediate the deficiency, as close to the time that the grade is given as possible. This should be as specific as possible, e.g., retake the course at California Northstate University, College of Medicine or in a summer remediation course at another institution approved by the course director, or retake XXX exam by YYYY date, etc. This should be communicated to the student directly by the course director, and should include a phrase at the end of the communication similar to the following:

"If you are on probation, receive, or have received other previous deficient grades, this remediation will require the approval of the Grades Committee in order to proceed. The Grades Committee considers performance across the entire curriculum in making recommendations for promotion or dismissal which may impact course-specific remediation."

It is fair to students to provide as much information as possible, and as early as possible, about what is expected to remediate a deficient grade. This information needs to be reported to the Registrar as well.

Academic Suspension

A student may be placed on academic suspension if the terms required to resolve Academic Probation are not successfully met. In these cases, the student must meet with the Student Promotion Committee where several options will be addressed, including the possibility of dismissal from the College of Medicine.

Dismissal

A student will be dismissed from CNUCOM if any of the following conditions exist and the Student Promotions Committee determines that dismissal is warranted:

- Failure to meet the requirements for academic progression as stated above for Repeating Courses, Remediation, Probation, or Academic Suspension;
- Failure to meet any other terms described above or otherwise imposed for Repeating Courses, Remediation, Probation, or Academic Suspension;
- Conduct subject to dismissal as described in the Academic Honesty: Honor Code section of the Student Handbook (See Appendix II);
- Foregoing an academic semester without obtaining an approved leave of absence;
- Failure to complete the degree requirements in seven (7) consecutive academic years from the date of the first day the student begins the program.

Appeal

With the exception of dismissal, the student may appeal all actions of the Student Promotions Committee to the Senior Associate Dean of Medical Education and Accreditation, in writing, within fourteen (14) days of notification of the action. The Senior Associate Dean of Medical Education and Accreditation renders a decision in writing within fourteen (14) days of the receipt of the formal written appeal. The decision of the Senior Associate Dean of Medical Education and Accreditation is final in these matters.

Students dismissed from the College may appeal the decision in writing within thirty (30) days of notification of dismissal to the Dean of the College. The Dean renders a decision in writing within thirty (30) days of receipt of the formal written appeal. The Dean's decision is final.

There is no appeal process for students placed on academic probation.

Attendance

Regular class attendance is expected of all students. The college recognizes that circumstances may cause a student to miss an occasional class. The student may make up the missed work, providing that it is an excused absence. What constitutes an acceptable rate of class attendance is a matter between students and their instructors, although the college expects instructors to maintain reasonable standards. If a student misses more than five percent (5%) of any class he/she needs to meet with the assigned College Master and/or Student Promotions Committee to discuss the situation. The College Master may refer the student to tutoring or if too much time is missed, the College Master in discussions with the faculty member may suggest that the student repeat the course. Students should refer to the Excused Absence Policy and Leave of Absence Policy for illness, family death, emergency or other serious personal issues.

Laboratory exercises and all Medical Skills sessions are mandatory. If a student misses a laboratory session or a Medical Skills session through an Excused Absence, s/he must make arrangements with the Course Director to make up the work that was missed.

Excused Absence Policy

A student may request an excused absence from required educational class/medical practice experiences for personal, emergency, compassionate, professional, or health-related reasons. To protect the confidentiality of students, all excused absence requests are initiated in writing through the Assistant Dean of Student Affairs, Admissions and Outreach (College of Medicine). Absences are generally for a short duration of a day or two, not generally longer than five academic days. Absences greater than five academic days may require a student to request a leave of absence or a personal withdrawal.

Process

Students should complete a Request for an Excused Absence Form posted online under the "Student Services" tab. Requests should be submitted to the Assistant Dean of Student Affairs at least 14 days in advance except in cases of emergency. Students also involved in off-campus programs should submit written requests as well.

Conditions and Requirements

On Campus Students:

Students on campus should complete a Request for Excused Absence form and submit it to the Assistant Dean of Student Affairs, Admissions and Outreach (College of Medicine) for approval.

Once approved, faculty and students are expected to make reasonable accommodations for make-up exams and assignments for excused absences. If the activity cannot be made-up, then the missed activity will not count against the student's final grade. Since course coordinators determine arrangements for missed coursework, students must contact course coordinators within 24 hours upon approval of an excused absence. Disputes or disagreements between a student and the faculty member concerning an excused absence should be submitted to the Assistant Dean of Student Affairs, Admissions and Outreach (College of Medicine) in writing for resolution.

Off Campus Students (Clinical Years 3 and 4):

General Principles

- Medicine is a profession of service. We are routinely called upon to subordinate our own priorities, needs, and desires to those of our patients. This applies to physicians-in-training as well.
- The faculty believes that increased involvement and assumption of progressive responsibility by students for patient care is essential to their development as future physicians. Students who

limit their participation in this process and do not fully immerse themselves in the care of patients significantly diminish their educational experience.

- Patients should be protected from communicable disease
- Attending to our own needs in a healthy way will in the long run improve our ability to be of sustained useful service to our patients.
- Required activities in all clerkships/rotations/electives in which you are enrolled must be completed satisfactory to pass.
- Attendance and punctuality are essential aspects of professional behavior and required for successful progress through a clinical rotation. Clinical performance and exam scores depend on your time and effort put into rotations. Absences or tardiness, whether for illness or other reasons, can affect your grade. In some cases, a student may be required to repeat all or a portion of a rotation because of excessive absence or tardiness. Unexcused absences or tardiness will not be permitted.

Practical Considerations

- Students should request time off for planned absences as far in advance as possible; three months or more is preferred, but no less than one month before the start of the clerkship. You must make this request to the contact listed for the clerkship in the Course Selection Book.
- Any student who anticipates needing multiple absences over the clerkship period, and particularly over the academic year, is directed to discuss their situation with the Assistant Dean for Student Affairs, Admissions and Outreach who can then interface with clerkship directors to facilitate appropriate scheduling adjustments. Examples include: regularly scheduled medical therapies, counseling, or personal/family needs
- When a medical student is to be absent from assigned duties on clinical services, for any reason, it is the responsibility of the individual student to notify the attending faculty physician, the director of any ongoing experiences (e.g. longitudinal Family Medicine lecture series) of his/her absence AND the clerkship director with as much prior notice as possible. Prospective arrangements for absences should not unduly inconvenience other members of the team including students, house officers, faculty, or staff. When asking for time off for medical or personal reasons, the utmost professionalism is expected of students.

Time Off During Clerkships

- Any time off from clinical rotations is at the discretion of the clerkship director. The clerkship director may decline to grant time off and/or may require remediation.
- Any time off allowed by the clerkship director should not materially change the rotation.

- Students may not miss more than 1 day in a 5 week clerkship and may not miss more than 2 days in clerkships greater than 5 weeks without being required to make up that time. All days off are tracked and followed centrally.
- Time off provided prior to the NBME subject exam will be determined within each clerkship. However, it is critical that the time allotted be the same across all hospital sites with that clerkship.
 - Example: The Internal Medicine Clerkship Director decides to allow for 1 day off prior to the NBME subject exam. All Internal Medicine rotations at each hospital site MUST allow for the same time off schedule for their students.

M4 Interviewing

Senior medical students have ample credit time available to be able to plan for periods of time off in the fourth year to accommodate residency interviewing. Because interviewing for a house officer position is time-consuming, students are expected to schedule blocks of time off for this purpose. Time off during the M4 year is governed by the same policy as above.

Extended Illness

On rare occasions when a prolonged illness causes a student to miss more than 1 day in a less than 5 week clerkship, or more than 2 days in a greater than 5 week clerkship, the student should:

1. Visit Student Health Services to obtain written documentation regarding duty restrictions, if any. You should provide this documentation to your Clerkship Director
2. Upon recovery, you should consult with the Clerkship Director regarding the viability of successfully completing the clerkship as planned. Consultation with the Assistant Dean of Student Affairs, Admissions and Outreach may be necessary.

Medical or Personal Reasons

Excused absences for health reasons of more than one (1) day must be verified by the student's physician using the Medical Excuse form. The Medical Excuse form must be signed by a physician and returned to the Assistant Dean of Student Affairs, Admissions and Outreach (College of Medicine) before an official excused absence can be given to the clinical preceptor, course coordinator, and/or instructor(s). Excused absence requests for health-related reasons not of an acute nature (scheduled procedures, out-of-town appointments with specialists) or personal reasons that are not an emergency must be presented to the Assistant Dean of Student Affairs, Admissions and Outreach (College of Medicine) two weeks prior to the date of the excused absence.

Conferences

CNUCOM supports the learning and professional development opportunities national or local

conferences can provide students; thus CNUCOM allows student participation and attendance on a limited basis.

If an absence from class does not interfere with the academic work of other students or does not result in the student missing a class assignment or rotation which cannot be remediated (as determined by the course coordinator), a student in good academic standing (no conditional grades and not on academic probation) may be allowed excused absence for a qualifying professional conference. In addition, if the aforementioned conditions are met, there may be additional days made available for the CMA, AMA, and other major medical organization for Student Presidents, members of the Student Organization Leadership Council, alumni association representatives, students holding a nationally-ranked position, students pre-approved to present research, or club officers. The Senior Associate Dean of Medical Education and Accreditation determines student eligibility and which conferences qualify. Approval of the Senior Associate Dean of Medical Education and Accreditation or designee is required for any other conference absences. Students are accountable for their academic performance and so must weigh the advisability of attending such conferences.

Students must obtain an excused absence form and submit it to the Office of the Senior Associate Dean of Medical Education, a minimum of 14 academic days prior to the conference. If the academic status of the student changes prior to departure for the conference and is failing a course, the permission to attend the conference will be revoked.

A limited amount of funding is available through the college for assisting students who plan to represent their organization or club at approved meetings (as described above). Travel requests to attend other types of meetings must be approved by the organization's advisor and the Senior Associate Dean of Medical Education and Accreditation. A request to attend an off-campus professional conference must be made by submitting a Request for an Excused Absence form while a request for funding must be made by submitting a Student Organization Travel Request form. Both forms must be filled out completely, including all required signatures, and submitted to the Senior Associate Dean of Medical Education a minimum of 14 days prior to the meeting or conference. Students requesting travel funds must: 1) be in good academic standing; 2) be a full-time student; and 4) be able to attend all student functions offered at the meeting/conference or have the ability to complete any and all other assignments as specified by the officer's and advisor of the organization the student is representing.

Professional Meetings

A goal of the College is to graduate competent physicians who will improve health care to a diverse population through medical expertise. The College appreciates the value, and encourages the participation

of all its students in professional organizations. The College recognizes that attendance at professional meetings is beneficial but may also interfere with the students' pursuits of academic excellence. Students desiring to attend professional meetings must obtain a written approval at least three weeks prior to the meeting from the Senior Associate Dean of Medical Education and Curriculum. Any student on academic probation will not be allowed to attend.

Leave of Absence

Purpose

The purpose of the policy is to provide guidelines for approved extended leaves of absences for medical students at CNUCOM.

Procedure

It is the responsibility of the student to ensure that a LOA request form is submitted in a timely manner. Non-attendance does not constitute notification of intent to apply for LOA status. It is the responsibility of the student to continue coursework (barring an emergency) until the LOA is approved.

In order to request a planned absence, students should first contact their individual College Master, and also immediately contact the appropriate course director(s) or clerkship director(s). After consultation with the College Master, an official LOA request must be submitted that specifically states the reason for the request. The LOA request must also be signed by both the Director of Student Financial Aid and the Registrar prior to being submitted to the Assistant Dean of Student Affairs. The Assistant Dean of Student Affairs will review the academic standing of the student in determining whether a LOA will be granted. Final approval of a LOA is required by the Senior Associate Dean of Medical Education. LOA forms can be found on the CNUCOM website and in the CNUCOM Student Handbook. All requests for planned absences must be submitted to the Assistant Dean of Student Affairs at least two months prior to the planned absence.

A LOA is approved for a specific period of time, not to last more than one calendar year. Due to the integrated curriculum at CNUCOM, a LOA causing a student to miss more than one course during the first two years of instruction will result in the student needing to repeat the entire year.

Likewise, a single clinical rotation missed due to a LOA may result in the student repeating that year. In general, a student is eligible for one LOA request during their tenure at CNUCOM. Requests for a second LOA are highly discouraged and unlikely to be approved due to the disruption it would cause to the student's chances of progression through the curriculum.

Students considering leaves of absence should consider the fact that an LOA can have a significant financial impact, and that the timing of the leave is therefore critical. A student may not receive a full refund of tuition

if a LOA is submitted after the first day of instruction. A leave may affect financial aid, health insurance and malpractice insurance coverage. University health insurance is good only through the last semester for which a student has been registered. Malpractice coverage is in effect only when a student is registered and participating in clinical activities that are approved as part of the curriculum. Therefore, clinical activities are not authorized by the school during an LOA. In addition, a student may not serve elected office or represent the school to another organization while on LOA unless the Senior Associate Dean of Medical Education has specifically granted an LOA with that provision. These factors should be carefully considered along with the timing and benefits of a planned LOA.

If a student is approved for a LOA, that student is eligible to return without reapplication if the absence is within the approved time frame. Prior to return, the student must submit an Intent to Return from Leave of Absence Form, which must be approved by the Assistant Dean of Student Affairs at least four weeks before the return of the student. If a student was granted a LOA with prerequisites for return to the College, the student must submit written proof of completion of the prerequisites with the Intent to Return Form. The Student Promotions Committee will review the academic progress of the student to determine the status of the student upon return from a LOA.

Failure of a student to adhere to the indicated policies for returning from a LOA may result in a terminal separation of the student with California Northstate University.

Leave of Absence Duration for Military Personnel

A LOA will be granted for all uniformed service members called to duty (whether voluntary or involuntary) for the duration of their time served. The student must fill out a Request for LOA form and provide the Registration and Records office with a copy of their written orders. Service members will be re-admitted to the university upon their return under the same re-admittance policies as all students who have been on a LOA from the university. Service members will not experience any added penalties from the University for fulfilling their military obligations.

Return from Leave of Absence

The student is to submit the Intent to Return Form or the Official College Withdrawal form at least four weeks prior to the planned return date. Submission of the completed Intent to Return Form to the Office of the Registrar is required to be eligible for course and rotation registration.

The student must meet Associate Dean of Student Affairs at least 30 days prior to the first day of class to review course and performance expectations for the upcoming the remainder of the student's educational career at CNUCOM.

If a student does not return within one year of approved LOA they are no longer eligible to return as a continuing student and must reapply to the University/College for admission (See Readmission to the University/College section below)

Withdrawal from University/College

Students may voluntarily withdraw from the University/College at any time during the academic semester. The student will earn a "W" grade for a course(s) that is (are) not complete at the time the withdrawal is initiated. Informing CNUCOM, your academic department or your instructor does not constitute official withdrawal from the program. All withdrawals must be processed by the Office of the Registrar.

Students must submit an Official College Withdrawal Form to the Office of the Registrar. A student must meet with and receive signatures from the following departments before the form can be filed with the Office of the Registrar: Office of Academic Affairs, Business Office, Financial Aid, and Office of the Registrar. A student that officially withdraws from the college is entitled to apply for readmission.

Readmission to the University/College

If a student has withdrawn from the University, the student may reapply to the College. If accepted, the student may be required to return as a first-year student.

Complaint/Grievance Policy

For complaints related to accreditation standards, please see Accreditation Information on page 9 of this catalog.

Internal complaints/grievances: A grievance is defined as a matter not falling under the progression policy for academic or non-academic due-process.

Procedure:

1. The student shall file a written complaint using the Student Complaint/Grievance Form.
2. The completed Student Complaint/Grievance Form should be submitted to any member of the CNU Office of Student Affairs in a sealed envelope.
3. The Associate Dean of Student Affairs will handle the complaint in accordance with the policies of the California Northstate University College of Medicine, will review the facts surrounding the issue and will attempt to resolve the complaint.
4. The complaint will be answered in writing by the Associate Dean of Student Affairs within four weeks of receipt of the complaint, excluding holidays/university breaks.
5. If the complaint relates to the Associate Dean of Student Affairs, the matter will be handled by

the Assistant Dean of Student Affairs following the same procedure.

6. If the Associate Dean of Student Affairs cannot resolve the complaint satisfactorily, the matter will be referred to an ad hoc committee formed on a case-by-case basis. This will include 3-5 individuals one of whom will have a legal background. Otherwise the committee will be constituted of CNU faculty and staff.
7. If the ad hoc committee cannot resolve the complaint satisfactorily, the matter will be transferred to the Dean for appropriate action.
8. Students may appeal decisions by filing an appeal with the Dean within five days of receipt of the complaint/grievance resolution. The Dean's decision is final.

A record of the student complaints is kept on file in the Associate Dean of Student Affairs office.

All aspects of student complaints shall be treated as confidential.

COM Course Descriptions

Department of Medical Education

COM 501 Foundations of Clinical Medicine (6 cr)

The Foundations of Clinical Medicine course will introduce the practice of using clinical presentations (CPs) to frame the delivery of the basic and clinical sciences. The CPs within this first course will be focused on common situations and presentations that a primary care physician will experience. Each week consists of 1 to 2 clinical presentations that are accompanied by clinical algorithms, clinical reasoning guides, and objectives lists. Medical science faculty and clinical faculty from the community will walk the students through the clinical algorithm(s) emphasizing critical decision points and setting the framework for the integration of the basic sciences. Following the clinical algorithm presentation by the medical science faculty or clinical faculty from the community, basic science faculty will present the fundamental principles from the traditional basic sciences (e.g. anatomy, biochemistry, cell biology, genetics, immunology, microbiology, nutrition, pathology, pharmacology, physiology etc.) to ensure adequate knowledge and skills required to arrive at a correct diagnosis. These basic science sessions will highlight the normal structures and functions of the system as a whole, immediately followed by an examination of various disease states including care and treatment options. Students will participate in clinical case example sessions as well as take part in a Medical Skills course that runs concurrently with the systems-based courses.

COM 511 Integumentary and Musculoskeletal Systems (7 cr)

The Integumentary and Musculoskeletal Systems course contains twelve clinical presentations that reflect commonly encountered situations affecting the integumentary and musculoskeletal systems. The course is focused on providing students with a detailed understanding of normal structure, function and pathologic dysfunction of the two systems. Each week of the seven weeks consists of 1 to 3 clinical presentations, which are accompanied by clinical algorithms, clinical reasoning guides, and detailed objectives lists. Medical science faculty or clinical faculty from the community will lead the students through the clinical algorithms emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Following the clinical algorithm presentation by the medical science faculty or clinical faculty from the community, basic science faculty will present the fundamental principles from the traditional basic sciences (e.g. anatomy, histology, embryology, biochemistry, immunology, microbiology, nutrition, pathology, pharmacology, and physiology) to ensure adequate knowledge and skills required to arrive at a correct diagnosis. These basic science lectures will highlight the normal structures and functions of the system as a whole, followed by presentations of various disease states including management and treatment

options. In addition to the lectures, library resources, and other learning activities that support each clinical presentation, students will attend anatomy labs and perform appropriate cadaver dissection activities and review prosected materials to reinforce learning of structures and relationships described in lecture. Traditional X-rays, CT scans and MRIs will be presented to illustrate normal and abnormal structures related to disease processes as well to illustrate some management techniques. In addition, students will participate in clinical case example sessions with medical science faculty or clinical faculty from the community and take part in a Medical Skills course that runs concurrently and supports content covered.

COM 521 Gastrointestinal System (5 cr)

This course will cover the structures and functions of the organs of the gastrointestinal tract, as well as the auxiliary organs critical for digestive processes including the pancreas and liver. The behavior of this complex system of organs will be considered in normal health and in a variety of GI, hepatic, and metabolic disorders. The clinical presentations (CPs) within the GI course will be focused on common situations and presentations that a primary care physician will experience such as swallowing difficulty, vomiting, diarrhea, jaundice, abdominal pain and distension, abdominal mass and GI bleeding. Each week consists of 1 to 2 CPs that are accompanied by clinical algorithms, clinical reasoning guides, and objectives lists. Clinical faculty will walk the students through the clinical algorithm(s) emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Following the clinical algorithm presentation by the clinical faculty, basic science faculty will present the fundamental principles from the traditional basic sciences (e.g. anatomy, biochemistry, cell biology, genetics, immunology, microbiology, nutrition, pathology, pharmacology, physiology, etc.) to ensure adequate knowledge and skills required to arrive at a correct diagnosis. These basic science lectures will highlight the normal structures and functions of the system as a whole, immediately followed by an examination of various disease states including care and treatment options. Students will participate in clinical case example sessions as well as take part in a Medical Skills and Masters Colloquium course that runs concurrently.

COM 526 Hematology (4 cr)

This course deals with components of the hematopoietic system – bone marrow, blood, and lymphoid tissues – emphasizing basic structures (of cells, tissues, organs) and functions (from molecular to tissue to whole organ level) in health and disease. Clinical presentations within the Hematology course are focused on common situations and presentations that a primary care physician is most likely to encounter, such as anemia, polycythemia, abnormal white cells, lymphadenopathy, abnormal bleeding (bleeding diatheses), and hypercoagulable states. Each week consists of 1 to 2

clinical presentations accompanied by clinical algorithms, clinical reasoning guides, and lists of learning objectives. Medical science faculty or clinical faculty from the community will introduce students to the clinical algorithm(s) for each clinical presentation, emphasizing critical decision points and setting the framework for integration of the basic and clinical sciences to each topic. Following the clinical algorithm presentation, medical science faculty will present fundamental principles from the basic sciences (e.g., anatomy, biochemistry, cell biology, genetics, histology, immunology, microbiology, nutrition, pathology, pharmacology, physiology) that underlie understanding of the schematic algorithms and provide knowledge and skills required to arrive at a correct diagnosis. Basic science sessions will highlight normal/homeostatic structure and function, followed by examination of relevant disease states, including introduction to care and treatment options. Students will actively participate in clinical case example sessions tied to each clinical presentation and will take part in Medical Skills and Masters Colloquium courses that run concurrently.

COM 531 Cardiovascular and Pulmonary Systems (9 cr)

The Cardiovascular and Pulmonary (CVP) Systems course deals with components of Cardiovascular and Pulmonary systems, which includes – the heart and major vessels, peripheral vascular system, lungs and its vessels and their integrated functions under normal and abnormal conditions. This course teaches the main components of the CVP system at a molecular, cellular, tissue and organ level, both in health and disease as well as their treatment and prophylactic strategies. The course consists of 16 clinical presentations (CPs) spread over 9 weeks, which were selected on the basis of the clinical importance and the frequency at which they are presented to a health care system. They are cough, hemoptysis and pulmonary nodules, pleural effusion, wheezing, acute and chronic dyspnea, peripheral swelling, mediastinal mass, abnormal pulse, palpitation, syncope, chest pain, cyanosis, abnormal heart sounds, shock and cardiac arrest. Students will be exposed to one to three clinical presentations every week followed by active learning sessions (such as small group discussions, TBL and flipped classes) relevant to the clinical presentation/s demonstrated during that week. The clinical faculty will be responsible for conducting those CPs with a logical approach to arriving at a clinical diagnosis using clinical algorithms and clinical reasoning guides, which are algorithms developed based on clinical information and probabilities of signs and symptoms for a particular disease condition. Students will also undergo preliminary training in the medical skills course where they will learn about physical examination and basic clinical and laboratory skills such as checking blood pressure, electrocardiography, spirometry and Gram staining. Each week, students will also be exposed to 2 hours of clinical case examples, where they will be given 4 clinical cases with necessary information to arrive at a clinical diagnosis using both their clinical and basic science knowledge. Here too, students will be using a combination of clinical

algorithms, an acquired knowledge base and course objectives for a logical deduction of a possible diagnosis. In addition, 2 hours of Masters Colloquium session performed every other week will teach students about socio-economic, community and global health issues from a more integrated perspective. The students will be evaluated using 4 formative examinations conducted every other week and a final summative examination at the end of the course.

COM 541 Renal System (5 cr)

This course will highlight the renal system's contribution to maintaining homeostatic levels of fluids, electrolytes, pH, and blood pressure. The behavior of this intricate system will be considered in normal health and in a variety of disorders. The clinical presentations (CPs) within the Renal course will focus on common situations and presentations that a primary care physician will experience such as hypertension, abnormal levels of different electrolytes, metabolic acidosis and alkalosis, polyuria, proteinuria and hematuria, renal calculi, renal mass, acute and chronic renal failure, and edema. Each week consists of 1 to 2 CPs that are accompanied by clinical algorithms, clinical reasoning guides, and objectives lists. Clinical faculty will walk the students through the clinical algorithm emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Following the clinical algorithm presentation by the clinical faculty, basic science faculty will present the fundamental principles from the traditional basic sciences (e.g. anatomy, biochemistry, cell biology, genetics, immunology, microbiology, nutrition, pathology, pharmacology, physiology etc.) to ensure adequate knowledge and skills required to arrive at a correct diagnosis. These basic science lectures will highlight the normal structures and functions of the system as a whole, immediately followed by an examination of various disease states including care and treatment options. Students will participate in clinical case example sessions as well as take part in a Medical Skills course that runs concurrently.

COM 551 Neuroscience (9 cr)

The Neuroscience course spans nine weeks and contains twenty clinical presentations that reflect commonly encountered situations affecting the nervous system. The course is focused on providing students with a detailed understanding of normal structure, function and pathologic dysfunction of the nervous system and special senses. Depending on the week, 1 to 5 clinical presentations will be covered, each one of them accompanied by clinical algorithms, clinical reasoning guides, and detailed objectives lists. Clinical faculty will lead the students through the clinical algorithms emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Following the clinical algorithm presentation, basic science faculty will present the fundamental principles from the traditional basic sciences (e.g., anatomy, histology, embryology, biochemistry, immunology, microbiology, nutrition, pathology, pharmacology, and physiology) to ensure adequate

knowledge and skills required to arrive at a correct diagnosis. These basic science lectures will highlight the normal structures and functions of the nervous system as a whole, including special senses, followed by presentations of various disease states including management and treatment options. In addition to the lectures, library resources, and other learning activities that support each clinical presentation, students will attend anatomy labs and perform appropriate cadaver dissection activities and review prosected materials to reinforce learning of structures and relationships described in lecture. Traditional X-rays, CT scans and MRIs will be presented to illustrate normal and abnormal structures related to disease processes as well to illustrate some management techniques. In addition, students will participate in clinical case example sessions with medical science faculty physicians and take part in a Medical Skills course that runs concurrently and supports content covered, emphasizing the skills that the students need to acquire to diagnose and for the management of different clinical cases.

COM 561 Behavioral Medicine (3 cr)

This course focuses on the etiology, diagnosis, and management of psychopathologic disorders. The clinical presentations (CPs) within the Behavioral Medicine course will focus on common situations and presentations that a primary care physician will experience. Each week consists of 1 to 2 CPs that are accompanied by clinical algorithms, clinical reasoning guides and objectives lists. Clinical faculty will walk the students through the clinical algorithm emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Following the clinical algorithm presentation by the clinical faculty, basic science faculty will present the fundamental principles from the traditional basic sciences (e.g. anatomy, biochemistry, cell biology, genetics, immunology, microbiology, nutrition, pathology, pharmacology, physiology etc.) to ensure that adequate knowledge and skills required to arrive at a correct diagnosis are communicated. These basic science lectures will highlight the normal structures and functions of the systems, immediately followed by an examination of various disease states including care and treatment options. Students will participate in clinical case example sessions as well as take part in a Medical Skills course that runs concurrently.

COM 571 Endocrine System (5 cr)

The endocrine system acts to coordinate the body's activities using chemical messengers (hormones) that are transported by the circulatory system to influence every cell, organ, and function of our bodies. The foundations of this system are the glands and the hormones they produce. Hormones, as the body's chemical messengers, transfer information and instructions from one set of cells to another and are thereby instrumental in regulating mood, growth and development, cellular and tissue function, metabolism, sexual function and reproductive processes. The course covers the endocrine system and its hormonal products, including (a) the hormone producing cells, (b) synthesis,

release and transport of the hormones, (c) the effects of hormones on target cells covering hormone receptors, signal transduction and the mechanisms of hormone action, (d) the intricacies of the hormonal and metabolic feedback regulatory mechanisms, (e) the effects of hormones on physiological processes as well as (f) the diseases caused by inappropriate hormone secretion and function. The basic science structure of the course (covering anatomy, embryology, histology, biochemistry, genetics, microbiology, immunology, physiology, pathophysiology and pathology) is integrated with clinical correlates through the introduction of Clinical Presentations (CP's) that focus on common presenting clinical situations/complaints that primary care physicians will encounter in their daily practice. The course will also introduce therapeutic principles in treating endocrine disorders. Instructional methods employed in this course will rely on active-learning techniques where students are involved in doing meaningful activities while being stimulated to think about what they are doing. The active learning methodologies incorporating self-directed learning that are employed throughout the course include: Team-Based Learning; Case-Based Learning; Flipped Classrooms; Inquiry-Based Learning; Problem-Based Learning; Oral Presentations; and Role Playing. All learning methods will be reinforced with the use of a variety of self-assessment techniques, including iRAT's and audience response system-supported tRAT's, aimed at furnishing real-time feedback.

COM 581 Reproductive System (5 cr)

The reproduction course is designed to teach each medical student the medical and scientific knowledge pertinent to the male and female human reproductive systems in both health and disease. The course consists of thirteen clinical presentations dispersed over the course of seven weeks. Each clinical presentation is accompanied by a clinical algorithm. The clinical algorithm consists of a branching diagram designed to aid the student in reaching a diagnosis via deductive reasoning. The branches of the clinical algorithm represent reductive diagnostic groups that narrow the range of diagnoses under consideration. Each clinical algorithm is accompanied by a clinical reasoning guide. The "Clinical Presentations" for this course were designed to capture the most common and medically significant chief complaints pertinent to the reproductive system in health and disease.

Following a given clinical presentation and the accompanying basic science content, students will participate in clinical case example sessions. Clinical case examples consist of clinical vignettes pertinent to a given clinical presentation. Students will assemble in small group classrooms, and will be mentored by a clinical faculty member. Four clinical vignettes, usually based on real patient cases, will be provided to the students. Students will be initially presented only with patient demographics and chief complaint. Students then will use the clinical algorithm and clinical reasoning guide to work through the case, eliciting the appropriate clinical history, physical examination findings, and ordering and interpreting any necessary imaging, clinical

laboratory studies, and/or biopsy/resection findings. Clinical case examples will provide students with an opportunity to employ the clinical algorithms and clinical reasoning guides to arrive at a diagnosis. Faculty clinicians, mentoring the clinical case example sessions, will provide feedback on a variety of topics including but not limited to: cost-effectiveness in arriving at a diagnosis and/or treatment, communication skills, and ethics. Concurrently, students will participate in Masters Colloquium, a course designed to cover complex, multidisciplinary aspects of professional development. Masters Colloquium content is designed to integrate with the reproduction course. Masters Colloquium topics scheduled during the reproductive course include the following: 1) Rape 2) Abortion 3) Ethical Issues in Reproduction. These topics were chosen as both critical topics for medical students to establish appropriate professional attitudes and behaviors, as well as critical topics pertinent to human reproductive health care. Concurrently, students will participate in the Medical Skills course. For example, following the clinical presentation and basic science sessions pertinent to an "abnormal Papanicolaou smear" students will practice performing Papanicolaou smears during their medical skill session.

COM 591 Stages of Life (5 cr)

(Birth, Growth, Development, Aging) This course spans the life cycle beginning with birth and infancy and concludes with the dying patient. The Stages of Life course contains 16 clinical presentations (CPs) that are focused on the most frequently encountered CPs that a primary care physician may experience. Each CP starts with a clinical algorithm that is presented by the clinical faculty. Each CP will be introduced by a brief definition and a statement of its clinical significance along with a list of potential causes. Clinical faculty will walk the students through the clinical algorithm emphasizing critical decision points and setting the framework for the integration of the basic and clinical sciences. Basic scientific concepts will be interwoven within each CP providing the necessary basis for understanding relationships and causal entities. Each CP is accompanied with a clinical reasoning guide that contains details of the thought process that follows the related CP. Clinical relevance and appropriate application of basic scientific knowledge will be reinforced with clinical case examples related to that CP.

COM 601 Medical Skills (1 cr)

Medical Skills course is designed to teach each medical student the basic clinical skills needed for medical practice. These skills include: communication, physician-patient rapport, history taking, physical examination, interpretation of diagnostic studies, note writing, oral presentations, use of patient care teams, application of medical and scientific knowledge in patient management, cost effective comparisons in treatment approaches, mastery of selected procedures and professionalism. In addition, we expect them to understand the use of counseling and feedback both in their own growth as future physicians as well as how to use this with their future patients.

Learning will be accomplished using a combination of: 1) preparatory self-directed learning materials, 2) surface anatomy sessions with body painting 3) hands-on demonstrations, 4) paired or standardized patient practice sessions, 5) simulated clinical procedures, 6) team-based problem solving exercises, 7) small group training using partial task simulators, 8) interactions with real patients with real medical problems or physical findings when appropriate and available 9) experiential education on relevant topics in nutrition, and 10) journal club. Formative feedback/assessment will include: 1) self-reflection, 2) self-assessment (video tapes), 3) faculty observation with checklist assessment, 4) peer feedback, and 5) standardized patient assessment.

The mini-OSCE (formative exam) and medium-OSCE (summative exam) will be used to: 1) familiarize them with the process used in USMLE step 2 CS exams, 2) facilitate improved efficiency in the basic clinical history and physical exam skills needed for 3rd and 4th year clerkships, and 3) objectively identify areas that need improvement.

COM 602 Medical Skills (1 cr)

Medical Skills course is designed to teach each medical student the basic clinical skills needed for medical practice. These skills include: communication, physician-patient rapport, history taking, physical examination, interpretation of diagnostic studies, note writing, oral presentations, use of patient care teams, application of medical and scientific knowledge in patient management, cost effective comparisons in treatment approaches, mastery of selected procedures and professionalism. In addition, we expect them to understand the use of counseling and feedback both in their own growth as future physicians as well as how to use this with their future patients.

Learning will be accomplished using a combination of: 1) preparatory self-directed learning materials, 2) surface anatomy sessions with body painting 3) hands-on demonstrations, 4) paired or standardized patient practice sessions, 5) simulated clinical procedures, 6) team-based problem solving exercises, 7) small group training using partial task simulators, 8) interactions with real patients with real medical problems or physical findings when appropriate and available 9) experiential education on relevant topics in nutrition, and 10) journal club. Formative feedback/assessment will include: 1) self-reflection, 2) self-assessment (video tapes), 3) quizzes, 4) faculty observation with checklist assessment, 5) peer feedback, and 6) standardized patient assessment.

The mini-OSCE (formative exam) and medium-OSCE (summative exam) will be used to: 1) familiarize them with the process used in USMLE step 2 CS exams, 2) facilitate improved efficiency in the basic clinical history and physical exam skills needed for 3rd and 4th year clerkships, and 3) objectively identify areas that need improvement.

COM 603 Medical Skills (1 cr)

Medical Skills course is designed to teach each medical student the basic clinical skills needed for medical practice. These skills include: communication, physician-

patient rapport, history taking, physical examination, interpretation of diagnostic studies, note writing, oral presentations, use of patient care teams, application of medical and scientific knowledge in patient management, cost effective comparisons in treatment approaches, mastery of selected procedures and professionalism. In addition, we expect them to understand the use of counseling and feedback both in their own growth as future physicians as well as how to use this with their future patients.

Learning will be accomplished using a combination of:

1) preparatory self-directed learning materials, 2) surface anatomy sessions with body painting 3) hands-on demonstrations, 4) paired or standardized patient practice sessions, 5) simulated clinical procedures, 6) team-based problem solving exercises, 7) small group training using partial task simulators, 8) interactions with real patients with real medical problems or physical findings when appropriate and available 9) experiential education on relevant topics in nutrition, and 10) journal club. Formative feedback/assessment will include: 1) self-reflection, 2) self-assessment (video tapes), 3) faculty observation with checklist assessment, 4) peer feedback, and 5) standardized patient assessment.

The mini-OSCE (formative exam) and medium-OSCE (summative exam) will be used to: 1) familiarize them with the process used in USMLE step 2 CS exams, 2) facilitate improved efficiency in the basic clinical history and physical exam skills needed for 3rd and 4th year clerkships, and 3) objectively identify areas that need improvement.

COM 604 Medical Skills (1 cr)

Medical Skills is a course designed to teach each medical student the basic clinical skills needed for medical practice. These skills include: communication, physician-patient rapport, history taking, physical examination, interpretation of diagnostic studies, note writing, oral presentations, use of patient care teams, application of medical and scientific knowledge in patient management, cost effective comparisons in treatment approaches, mastery of selected procedures and professionalism. In addition, we expect them to understand the use of counseling and feedback both in their own growth as future physicians as well as how to use this with their future patients.

Learning will be accomplished using a combination of:

1) preparatory self-directed learning materials, 2) hands-on demonstrations, 3) paired or standardized patient practice sessions, 4) simulated clinical procedures, 5) team-based problem solving exercises, 6) small group training using partial task simulators, 7) interactions with real patients with real medical problems or physical findings when appropriate and available 8) experiential education on relevant topics in nutrition, and 9) journal clubs. Formative feedback/assessment will include: 1) self-reflection, 2) self-assessment (video tapes), 3) faculty observation with checklist assessment, 4) peer feedback, and 5) standardized patient assessment.

The mini-OSCE (formative exam) and full-OSCE (summative exam) will be used to: 1) familiarize them with the process used in USMLE step 2 CS exams, 2) facilitate improved efficiency in the basic clinical history

and physical exam skills needed for 3rd and 4th year clerkships, and 3) objectively identify areas that need improvement.

COM 611 Masters Colloquium (1 cr)

The purpose of the Masters Colloquium course is to address important issues that the students will encounter in the practice of medicine and to prepare them to become compassionate, trustworthy, well-informed medical doctors who understand the challenges of this profession and can face them with confidence and honor. The Masters Colloquium course is a biweekly 2 hour seminar presented to medical students in Years 1 and 2. At the beginning of Year 1, students will be divided into groups of 10-20 and each group will constitute a college. Students will stay in their assigned college for the first two years of Medical School. Colleges will be led by College Masters. College Masters will be responsible for delivering the content of the Masters Colloquium course to their college. Changing the college will only be allowed in exceptional circumstances and only if appropriate exchange is done. Any requests to change the college should be well grounded, documented and submitted to the Office of Student Affairs, Admissions and Outreach. The colloquia are conducted in a discussion or workshop format, and cover complex, multidisciplinary aspects of professional development. Invited presentations by experts will be followed by discussion. Each Masters Colloquium session will be evaluated by the students of each college via an anonymous survey. Feedback from these surveys will be sent to the corresponding College Masters, the person that delivered the session (if different) and the Course Director. College Masters will assist in identifying and clarifying ambiguities within the presentations and will provide the first line of student evaluation and possible intervention. Areas that will be covered in the first year are:

- Fundamental Ethical Principles in Patient Care and Medical Practice
- Patient-Physician Relationship: Confidentiality, truth-telling and withholding information
- Breaking bad news; talking about genetic testing
- Communicating knowledge, interpretation, and recommendations orally and/or in writing to a wide range of professional or lay audiences in culturally appropriate ways.
- Scientific Methods for Gathering Information
- Principles of Evidence-Based Medicine
- Conflict of Interest
- Professional Honesty
- Informed Consent and Malpractice
- Providing Culturally Appropriate Care
- Population, Resources and the Environment
- Describe the components of social structure (eg family, neighborhood, community) and the role each plays in health behavior, disease prevention and the treatment for illness
- Health Implications of Travel, Migration and Displacement
- Complementary and Alternative Medicine

COM 612 Masters Colloquium (1 cr)

The purpose of the Masters Colloquium course is to address important issues that the students will encounter in the practice of medicine and to prepare them to become compassionate, trustworthy, well-informed medical doctors who understand the challenges of this profession and can face them with confidence and honor. The Masters Colloquium course is a biweekly 2 hour seminar presented to medical students in Years 1 and 2. At the beginning of year 1, students will be divided into groups of 10-20 and each group will constitute a college. Students will stay in their assigned college for the first two years of Medical School. Colleges will be led by College Masters. College Masters will be responsible for delivering the content of the Masters Colloquium course to their college. Changing the college will only be allowed in exceptional circumstances and only if appropriate exchange is done. Any requests to change the college should be well grounded, documented and submitted to the Office of Student Affairs, Admissions and Outreach. The colloquia are conducted in a discussion or workshop format, and cover complex, multidisciplinary aspects of professional development. Invited presentations by experts will be followed by discussion. Each Masters Colloquium session will be evaluated by the students of each college via an anonymous survey. Feedback from these surveys will be sent to the corresponding College Masters, the person that delivered the session (if different) and the course director. College Masters will assist in identifying and clarifying ambiguities within the presentations and will provide the first line of student evaluation and possible intervention. Areas that will be covered in the first year are:

- Fundamental Ethical Principles in Patient Care and Medical Practice
- Patient-Physician Relationship: Confidentiality, truth-telling and withholding information
- Breaking bad news
- Evidence-Based Medicine Principles
- Patient's Social Structure
- Conflicts of Interest
- Complementary and Alternative Medicine
- Chronic Disease
- Persistent Vegetative State
- Preserving Patient Dignity
- Providing Culturally Appropriate Care
- Health Implications of Travel, Migration and Displacement
- Population, Resources and the Environment
- Globalization of Health and Healthcare
- Informed Consent and Malpractice
- Professional Honesty

COM 613 Masters Colloquium (1 cr)

The purpose of the Masters Colloquium course is to address important issues that the students will encounter in the practice of medicine and to prepare them to become compassionate, trustworthy, well-informed medical doctors who understand the challenges of this profession and can face them with confidence and honor. The Masters Colloquium course is a biweekly 2 hour seminar presented to medical

students in Years 1 and 2. At the beginning of year 1, students will be divided into groups of 10-20 and each group will constitute a college. Students will stay in their assigned college for the first two years of Medical School. Colleges will be led by College Masters. College Masters will be responsible for delivering the content of the Masters Colloquium course to their college. Changing the college will only be allowed in exceptional circumstances and only if appropriate exchange is done. Any requests to change the college should be well grounded, documented and submitted to the Office of Student Affairs, Admissions and Outreach. The colloquia are conducted in a discussion or workshop format, and cover complex, multidisciplinary aspects of professional development. Invited presentations by experts will be followed by discussion. Each Masters Colloquium session will be evaluated by the students of each college via an anonymous survey. Feedback from these surveys will be sent to the corresponding College Masters, the person that delivered the session (if different) and the Course Director. College Masters will assist in identifying and clarifying ambiguities within the presentations and will provide the first line of student evaluation and possible intervention. Areas that will be covered in the second year are:

- The National Health System
- Healthcare in Low Resource Settings
- Allocating Resources in Low Resource Settings
- Human Rights in Global Health
- Use and Abuse of Steroids
- Use of Social Media Sites
- Time Management for Medical Students
- Taking Responsibility and Dealing with Errors
- The Doctor as a Patient
- Refusal of Care
- Advocacy for the Patient
- Ethical Issues in Reproduction
- Sexual Assault
- Abortion
- Respect for the Beliefs, Opinions and Privacy
- Parental/Surrogate Decision Making
- Approach to family violence, abuse, neglect and harassment
- Age-appropriate care and advanced care planning
- End of life issues and termination of life-sustaining treatment
- Our Beliefs, Opinions Prejudices and Religion as a Barrier to Providing Healthcare

COM 614 Masters Colloquium (1 cr)

The purpose of the Masters Colloquium course is to address important issues that the students will encounter in the practice of medicine and to prepare them to become compassionate, trustworthy, well-informed medical doctors who understand the challenges of this profession and can face them with confidence and honor. The Masters Colloquium course is a biweekly 2 hour seminar presented to medical students in Years 1 and 2. At the beginning of year 1, students will be divided into groups of 10-20 and each group will constitute a college. Students will stay in their assigned college for the first two years of Medical School. Colleges will be led by College Masters. College

Masters will be responsible for delivering the content of the Masters Colloquium course to their college. Changing the college will only be allowed in exceptional circumstances and only if appropriate exchange is done. Any requests to change the college should be well grounded, documented and submitted to the Office of Student Affairs, Admissions and Outreach. The colloquia are conducted in a discussion or workshop format, and cover complex, multidisciplinary aspects of professional development. Invited presentations by experts will be followed by discussion. Each Masters Colloquium session will be evaluated by the students of each college via an anonymous survey. Feedback from these surveys will be sent to the corresponding College Masters, the person that delivered the session (if different) and the Course Director. College Masters will assist in identifying and clarifying ambiguities within the presentations and will provide the first line of student evaluation and possible intervention. Areas that will be covered in the second year are:

- The National Health System
 - Healthcare in Low Resource Settings
 - Allocating Resources in Low Resource Settings
 - Human Rights in Global Health
 - Use and Abuse of Steroids
 - Use of Social Media Sites
 - Time Management for Medical Students
 - Taking Responsibility and Dealing with Errors
 - The Doctor as a Patient
 - Refusal of Care
 - Advocacy for the Patient
 - Ethical Issues in Reproduction
 - Sexual Assault
 - Abortion
 - Respect for the Beliefs, Opinions and Privacy

Office of Research

COM 623 Self-Directed Student Scholarly Project (1 cr)

The required Self-Directed Student Scholarly Project (hereafter referred to as the Scholarly Project) is a one-year, research-based program to be completed during the 2nd year of medical school. Students will assemble in groups of 3 to reinforce teamwork and development of collaborative skills. The Scholarly Project will allow students to hone their analytical and investigative skills by participating in an active research project under a faculty mentor to produce usable data sets, public presentations, and abstracts suitable for publication. The requirements for the project will be explained to students during the Orientation. Students will then be encouraged to find an area of interest that they wish to

pursue further and to identify faculty and other students that have similar research interests. The following are examples of broader categories that are considered to be suitable for a scholarly project:

- Translational Research
- Clinical Research
- Basic Research
- Global Health
- Medical Education
- Epidemiology
- Public and Environmental Health
- History of Medicine

The students will choose their project and mentor during the first year in Medical school. The student group will develop a hypothesis/question and devise the methods and steps appropriate to answering the question/hypothesis with the guidance of their chosen mentor. They will then generate a suitable research project proposal with corresponding planned analysis and outcomes.

A final project proposal will be submitted to the Course Committee for review and approval. The project will be reviewed for its feasibility and for the level of critical thinking and if suitable, approved.

Approval by the Course Committee will allow the project to proceed. Depending on the type of project, the students may have to complete required training (for example, laboratory biosafety training, blood-borne pathogen training, radiation safety training, IRB and HIPAA training for working with human subjects or accessing patient data, or IACUC training for working with laboratory animals). Projects that include human research subjects will require approval by the CNU IRB. Similarly, if laboratory animals are used, approval by the CNU IACUC will be required.

COM 624 Self-Directed Student Scholarly Project (1 cr)

The required Self-Directed Student Scholarly Project (hereafter referred to as the Scholarly Project) is a one-year, research-based program to be completed during the 2nd year of medical school. Students will assemble in groups of 3 to reinforce teamwork and development of collaborative skills. The Scholarly Project will allow students to hone their analytical and investigative skills by participating in an active research project under a faculty mentor to produce usable data sets, public presentations, and abstracts suitable for publication. The requirements for the project will be explained to students during the Orientation. Students will then be encouraged to find an area of interest that they wish to pursue further and to identify faculty and other students that have similar research interests. The following are examples of broader categories that are considered to be suitable for a scholarly project:

- Translational Research
- Clinical Research
- Basic Research
- Global Health
- Medical Education

- Epidemiology
- Public and Environmental Health
- History of Medicine

The students will choose their project and mentor during the first year in Medical school. The student group will develop a hypothesis/question and devise the methods and steps appropriate to answering the question/hypothesis with the guidance of their chosen mentor. They will then generate a suitable research project proposal with corresponding planned analysis and outcomes.

A final project proposal will be submitted to the Course Committee for review and approval. The project will be reviewed for its feasibility and for the level of critical thinking and if suitable, approved.

Approval by the Course Committee will allow the project to proceed. Depending on the type of project, the students may have to complete required training (for example, laboratory biosafety training, blood-borne pathogen training, radiation safety training, IRB and HIPAA training for working with human subjects or accessing patient data, or IACUC training for working with laboratory animals). Projects that include human research subjects will require approval by the CNU IRB. Similarly, if laboratory animals are used, approval by the CNU IACUC will be required.

M3 Clerkships

COM 701 Family Medicine Clerkship (6 cr)

Each student will spend six weeks on a family practice rotation working directly with a family practice physician in one of the community preceptor's office. In these settings the students will have the opportunity to hone their skills in: patient care, medical knowledge, communication, professionalism, health care systems and personal development in the context of adult primary or inpatient care. Special emphasis will be placed on learning about preventative care, end of life issues, and health screening programs. In addition, we expect the students to be provided opportunities to participate in the common medical conditions seen in a family practice. The student's participation/exposure will be tracked by using a checklist of medical conditions and procedure skills that are expected to be seen/done during the rotation and which require the signature of the supervision physician.

COM 711 Internal Medicine Clerkship (8 cr)

Each student will spend four weeks on an internal medicine inpatient rotation working directly with an internist and family practice resident in one of the hospitals listed above. Additionally, the student will spend four weeks in an ambulatory (outpatient) setting working with a primary care internist. In these settings the students will have the opportunity to hone their skills in: patient care, medical knowledge, communication, professionalism, health care systems and personal development in the context of adult primary or inpatient care. Special emphasis will be placed on providing

opportunities to participate in the common medical conditions seen in internal medicine which will be tracked by each student having a checklist of medical conditions and procedure skills that are expected to be seen/done during the rotation and which require the signature of the supervising physician.

COM 721 Neurology Clerkship (4 cr)

Each student will spend four weeks at one of the institutions listed above working rotation working directly with a neurologist and possible family practice resident in either an inpatient or outpatient setting. In these settings the students will have the opportunity to hone their skills in: patient care, medical knowledge, communication, professionalism, health care systems and personal development in the context of neurologic problems. Special emphasis will be placed on honing a comprehensive neurologic history and physical exam including cognitive testing. To ensure adequate exposure to common neurologic conditions, each student will be provided with a checklist of conditions they are expected to see and participate in their care. A skills checklist for signatures will also be provided to ensure adequate skills practice.

COM 731 Obstetrics and Gynecology Clerkship (6 cr)

Each student will spend three weeks on an ob/gyn inpatient rotation working directly with an ob/gyn physician and family practice resident in one of the hospitals listed above. Additionally, the student will spend three weeks in an ambulatory (outpatient) setting. In these settings the students will have the opportunity to hone their skills in: patient care, medical knowledge, communication, professionalism, health care systems and personal development in the context of adult primary or inpatient care. Special emphasis will be placed on having a good working knowledge of pelvic female anatomy as it related to reproduction, labor and delivery as well as infectious and oncologic issues. Each student will have a checklist of conditions/skills they are expected to participate in and obtain signatures validating their participation. These include uncomplicated labors and deliveries as well as the steps/screening of uncomplicated pregnancies. They should have an opportunity to participate in counseling women about contraception, abortion and sterilization options.

COM 741 Pediatrics Clerkship (6 cr)

Each student will spend three weeks on a pediatric inpatient rotation working directly with pediatrician attending and family practice resident in one of the hospitals listed above. Additionally, the student will spend three weeks in an ambulatory (outpatient) setting. In these settings the students will have the opportunity to hone their skills in: patient care, medical knowledge, communication, professionalism, health care systems and personal development in the context of pediatric primary or inpatient care. Special emphasis will be placed on having a good working knowledge of normal infant/toddler milestones and adolescent development. In addition, they will be able to experience counseling

the adolescent in such issues as birth control, sexual behavior, social acceptance etc. Each student will have a checklist of conditions/skills they are expected to participate in and obtain signatures validating their participation.

COM 751 Psychiatry Clerkship (4 cr)

Each student will spend four weeks on a psychiatry rotation working directly with a family practice resident and psychiatry attending in one of the community hospitals or preceptor office listed above. In these settings the students will have the opportunity to hone their skills in: patient care with patients which psychiatric disorders, medical knowledge, communication, professionalism, health care systems and personal development in the context of adult primary or inpatient care. Special emphasis will be placed on learning psychiatric diagnoses, mental health testing, and communication with individuals with mental illness. In addition, we expect the students to be provided opportunities to participate in the common psychiatric conditions seen in a psychiatry including suicidal ideation and suicidal attempts. The student's participation/exposure will be tracked by using a checklist of medical conditions and procedure skills that are expected to be seen/done during the rotation and which require the signature of the supervision physician.

COM 771 Emergency Medicine Clerkship (4 cr)

Each student will spend four weeks on an Emergency Medicine Rotation at one of the hospitals listed above. In this setting the students will have the opportunity to hone their skills in: patient care, medical knowledge, communication, professionalism, health care systems and personal development in the context of adult primary or inpatient care. Special emphasis will be placed on expedient history/physical examinations, developing an appropriate differential, identifying urgent from routine patient needs. Each student will be expected to participate in the most common medical emergencies routinely seen in an emergency department. To ensure adequate exposure, each student will be asked to complete a checklist of conditions and skills they have participated in and obtain a supervising physician's signature. This will be routinely shared with the Clerkship Director to better determine the adequacy of the learning environment.

COM 761 Surgery Clerkship (8 cr)

Each student will spend four weeks on a general surgery inpatient rotation working directly with a general surgeon and family practice resident in one of the hospitals listed above. Additionally, the student will spend two, two week rotations in surgical specialty rotations. In these settings the students will have the opportunity to hone their skills in: patient care, medical knowledge, particularly anatomy, communication, professionalism, health care systems and personal development in the context of surgical care. Special emphasis will be placed on having a good working knowledge of anatomy as it relates to the surgical specialty, pre and post-operative care, operative risk assessment and informed consent procedures. Each

student will have a checklist of conditions/skills they are expected to participate in and obtain signatures validating their participation.

M4 Sub-Internships

For the following Sub-Internships, please see the specialty area within the section M4 Electives.

EME 801 Emergency Medicine Sub-Internship (4 cr)

INT 801 Internal Medicine Sub-Internship (4 cr)

INT 802 Inpatient Medicine Sub-Internship (4 cr)

PED 801 Pediatric Sub-Internship (4 cr)

PUL 801 Pulmonary & Critical Care Medicine Sub-Internship (4 cr)

OBG 801 Ob/Gyn Sub-Internship (4 cr)

SUR 801 Surgery Sub-Internship (4 cr)

FAM 801 Family Medicine Sub-Internship (4 cr)

M4 Electives

EXTERNAL/AWAY ROTATIONS

On the transcript, away rotations are indicated as xxx899. For example, EME 899 indicates an Emergency-area external/away rotation. Students apply independently for placement typically through VSAS or by separate application.

ALLERGY/IMMUNOLOGY (AAI)

AAI 810 Allergy, Asthma, Immunology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Kaiser South Sacramento

4-week rotation. Office based allergy practice that will help the learner to manage allergic diseases from rhinitis, asthma, food allergies, primary immunodeficiency, angioedema, and anaphylaxis. Additional areas for longer options (if multiple rotation lengths are offered) include spirometry, skin testing, allergy injections, drug desensitization, and care of anaphylaxis. Students will demonstrate knowledge pertaining to the management of allergic diseases including rhinitis, asthma, food allergies, primary immunodeficiency, angioedema and anaphylaxis.

AAI 812 Allergy & Immunology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Allergy Medical Group of Northern Area - Sacramento Clinic; Roseville Clinic

4-week rotation. This elective rotation is a four (4) weeks structured clinical experience under direct supervision of an endocrinology attending designed to orient students how to obtain problem focused history from patients with atopic disease focused physical exam. Students will also be exposed to patients with atopic disease. This intensive month will provide an opportunity for the

students to do more in-depth reading about the various atopic diseases and conditions they see. Students are expected to attend and participate in all scheduled educational activities at the host institution. Students will learn basic information of following diseases: basic atopic diseases, allergic rhinitis, sinusitis, asthma, urticarial, angioedema, food allergy/intolerance, drug allergy, insect allergy, environmental sensitivity. Students will perform a comprehensive history and physical examination in a timely manner and will gain experience in generating more specialized differential diagnoses, assessments, and diagnostic and treatment plans.

ANESTHESIA (ANE)

ANE 810 Anesthesia (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. Students seeking to increase their knowledge of anesthesiology and perioperative medicine will actively participate in the anesthetic care of surgical patients. Progressive and increased responsibility for pre-, intra-, and postoperative patient management will be assumed by the student under the direction of an anesthesiologist. The student will participate fully in the perioperative anesthetic care of a healthy patient during uncomplicated surgery. Students will participate in the department's didactic conferences; reading is required to meet learning objectives. Students will learn to perform pre-anesthetic evaluation, present an organized summary of findings, develop a rational plan of anesthetic management -Discuss effects of surgery and anesthesia on common medical conditions and execute plans to manage these conditions perioperatively, conduct the intraoperative administration of anesthesia demonstrating knowledge of anesthetic pharmacology, perform peripheral venous, cannulation, bag and mask airway management, endotracheal intubation.

ANE 811 The Art and Practice of Anesthesiology and Pain Medicine (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Sutter Roseville Medical Center

4-week rotation. Students will be assigned to an attending anesthesiologist each day and may rotate to another anesthesiologist depending on cases and anesthetic techniques used. Special emphasis is given to airway management, pre-operative evaluation, intra-operative and post-operative care of patients. Students will rotate to the ambulatory surgery centers, hospital inpatient surgical and obstetric department. Exposure to ICU and trauma patients will be included when students work alongside an on-call trauma anesthesiologist when available. Three didactic sessions will be given per week emphasizing the learning objectives. In addition, clinical and basic science articles will be critically reviewed and discussed. Complicated cases will also be analyzed and discussed. Students will learn:

1) Clinical skills include basic airway management, physiological monitoring, sedation and pain management.

2) Knowledge of basic anesthetic agents, intra-operative and pain medications.

3) Critical review of basic and clinical anesthesia literature.

4) Exposure to different anesthetic techniques from lines placement to regional and neuraxial anesthesia.

5) Techniques in stabilizing an unstable patient.

CARDIOLOGY (CAR)

CAR 810 Cardiology Clinical Rotation (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Sutter Medical Center, Sacramento

4-week rotation. Students will be exposed to a wide range of cardiology experiences including inpatient consultation and procedures, as well as advanced heart failure and transplant clinical committee meetings, and outpatient office setting. They will be expected to have some initiative and ask questions and as such will "get out of it what they put into it." Students will be quizzed on differential diagnoses and treatment plans. (Pre-req: M4 standing & ICU Req.)

CAR 880 Cardiovascular Surgery (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Sutter Medical Center Sacramento

4-week rotation. Students will understand cardiovascular pathophysiology and develop basic surgical skills. Pre assessment, operative experience, and post-operation care. This intensive month will provide an opportunity for the students to do more in-depth reading about the various atopic diseases and conditions they see. Students are expected to attend and participate in all scheduled educational activities at the host institution. Specialty Area(s): Cardiology; Surgery.

CAR 811 Cardiology Elective (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): SMG Cardiology Sacramento Sutter Medical Center, Sacramento, CA.

4-week rotation. Diagnosis and therapy of common cardiac diseases. Fundamentals of cardiac anatomy and physiology – working knowledge of common cardiac disease states – cardiac pharmacology interpretation of cardiac diagnostic studies (ECG, ECHO, Stress testing, and Nuclear Imaging) – cardiac history and physical examination. Experience in viewing cardiac procedures; EP studies, ablations, heart cath intervention, device implantation, transesophageal echo, cardio version. 12 lectures: ECG, ECHO, coronary anatomy and physiology, methods for evaluating cardiac disease, valvular heart disease, guideline: lipids, hypertension, risk factors, arrhythmia including ablation therapy, atrial fibrillation, peripheral vascular disease (arterial and venous), devices including resynchronization therapy, CAD diagnosis and treatment, treatment of CHF.

CAR 815 Cardiothoracic (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Mercy San Juan Hospital

4-week rotation. Lung Cancer, Esophageal Cancer, Thymus cancer, Airway Disease, Esophageal Reflux Disease, Diaphragm Disease, Chest wall issues, critical

care for surgery, Lung Screening, Management of Stage IV cancers, Interventional Bronchoscopy and Esophagostomy. Clinical experiences includes rounds, seeing patients, consults, and surgery.

DERMATOLOGY (DER)

DER 810 Dermatology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. Students will learn about medical surgical dermatology. The student will be exposed to medical dermatology encounters with patients having primary skin disease, to include immunobullous diseases, contact dermatitis, connective tissue diseases, congenital skin disease, skin cancer, and infectious diseases, as well as medically-complicated patients displaying dermatologic manifestations of systemic disease or therapy. Clinical experiences includes working with other residents/fellows.

EMERGENCY MEDICINE (EME)

EME 801 Emergency Medicine Sub-Internship (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Multiple

4-week rotation. Students will take a higher level of responsibility in the evaluation and management of emergency medicine or related specialty. Students will also be exposed to disaster medicine, wilderness medicine, and ultrasound in emergency care. In addition to primary care responsibilities, there will be daily lectures and/or conferences. Students are expected to attend and participate in all scheduled educational activities. Students will be managing patients as primary caregivers, under direct supervision by an attending physician. Students will learn how to perform a focused history and physical examination and will gain experience in generating differential diagnoses, assessments, and diagnostic and treatment plans at a level above the completed Emergency Medicine internship. Students will participate in a number of procedures including wound closure, reduction and splinting, incision and drainage etc. with guidance from experienced residents and faculty members. In addition, students will actively participate in both medical and trauma resuscitations during their rotation at Bellevue. (Pre-requisite: M4 standing; COM 771)

EME 810 Emergency Medicine (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. Exposure of the medical student to patients with complaints covering all age and all subspecialties who present to the Emergency Department. Will have first contact responsibility to perform a history and physical exam on each of his/her patients. Will discuss each case with an Emergency Department physician prior to ordering lab work, x-rays, medicines or consultation. Will discuss each case with an Emergency Department physician prior to patient's treatment and disposition. Will be actively involved in patient's education concerning discharge instruction

(prescription, home care, etc.), and appropriate physician follow up.

ENDOCRINOLOGY (END)

END 810 Endocrinology (4 cr)

Understand real life experiences of an endocrinologists and learn the clinical utilities and techniques related to endocrinology and metabolism. Students will 1) Describe the disease process in patients by integration of clinical findings (history and physical) with laboratory tests, 2) Explain the pathogenesis and pathophysiology of diseases of the pituitary, thyroid, parathyroid, adrenal, pancreas (endocrine), and reproductive organs, 3) Outline the function of the endocrine organ and explain the metabolism of their hormones and their effects on the body, 4) Develop adequate experience with the use of insulin, thyroid hormones, corticosteroids, and other related therapeutic agents, and 5) Develop adequate experience in endocrine related surgery and diagnostic procedures such as thyroid needle biopsy, vascular ultrasound in diabetic patients, and bone mineral density testing.

FAMILY MEDICINE (FAM)

FAM 801 Family Medicine Sub-Internship (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Multiple

4-week rotation. The clerkship gives medical students experience in an urban Family Medicine office, which serves a multi-ethnic, medically indigent population, as well as addressing child and women's health issues. Students will also see patients at our adolescent high school clinics and school for pregnant girls. Lecture series will concentrate on Public Health, Health Policy, and Managed Care. Students will have exposure to procedures such as Minor Surgery, Flex Sigmoidoscopy, Sports Medicine, and Colposcopy/Endometrial Biopsies.

FAM 810 Family Medicine Elective (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Elevation Physicians

4-week rotation. In hospital and office-based contact with patients in a primary care setting, students develop: 1) adequate experience to competently approach and initially manage patients with acute and chronic medical problems that present to the outpatient office setting, 2) adequate experience to competently approach and conduct wellness visits for patients of any age, 3) adequate experience to proficiently gather and record patient data via history taking and the performance of physical examinations, and 4) proficient reasoning and communication skills relevant to the medical management of patients. Students attend weekly Family Medicine didactics. (Prerequisite: COM 701)

GASTROENTEROLOGY (GST)

GST 810 Gastroenterology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Mercy San Juan Medical Center

4-week rotation. Students will gain experience and knowledge about the specialty of Gastroenterology and

the conditions that specialists in this field are involved in diagnostic, management and treatment of. Demonstrate the pertinent aspects of the history and physical exam findings in patients with gastroenterological conditions. Explain the appropriate evaluative steps for patients with gastroenterological symptoms. Illustrate knowledge about common gastroenterological diseases and their treatment and management.

HEMATOLOGY & ONCOLOGY (HEM)

HEM 810 Hematology and Oncology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): TBD

4-week rotation. Approach to a patient with hemonc ailments, history taking, relevant physical exam, interpretation of common blood tests, reviewing smears if needed, discussing imaging results and making a sound provisional diagnosis. Outline the pertinent history and physical exam considerations in patients with hematologic and oncologic diseases. Demonstrate knowledge about patients with hematology and oncology related diseases. Interpret common blood test results and their indications. Demonstrate knowledge about blood smear findings. Clinical experiences are predominately by seeing patients.

INFECTIOUS DISEASE (INF)

INF 810-01 Infectious Disease (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Kaiser South Sacramento
4-week rotation. The student will be able to: 1. Understand the pathophysiology of common infectious diseases 2. Understand the clinical presentation and diagnostic approach to patients with Infectious Diseases. 3. Understand the approach to management and the use of antimicrobials or antivirals in patients with infectious diseases. Students will learn how to identify, diagnose and treat various bacterial, viral, fungal infections, Infer how to diagnose and treat various orthopedic/bone infections, neutropenic fevers, bacteremias, Demonstrate an understanding of management of infections in an immunocompromised host, Infer how to manage and counsel HIV patients, Show an understanding of the principles behind antimicrobial stewardship.

INF 810-02 Infectious Diseases – 2 Wk (2 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Kaiser Sacramento and Morse Avenue
2-week rotation. Students will learn common infectious diseases and how to treat them. Learn about HIV care. Understand the importance of antimicrobial stewardship and the judicious use of antimicrobials. To show an understanding of how to identify, diagnose and treat various bacterial, viral, fungal infections Infer how to diagnose and treat various orthopedic/bone infections, neutropenic fevers, bacteremias. Demonstrate an understanding of management of infections in an immunocompromised host. Infer how to manage and counsel HIV patients. Show an understanding of the

principles behind antimicrobial stewardship. (Prerequisite: COM 711)

INF 812 California Northstate University College of Medicine M4 Infectious Diseases Clerkship

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Kaiser Permanente Medical Center, Modesto
4-week rotation. This Infectious Disease clerkship is scheduled with a preceptor who is an expert in this field. The student will experience the day to day activities of clinicians as he/she assists in the care of their patients. Exposure to patients in the clinic and hospital setting will give the student opportunity to practice interview and documentation skills. The student may be given the opportunity to participate in procedures as the preceptor determines his/her readiness. The curriculum for this rotation is based on nationally recognized curriculum modified for fourth year elective focus from the Clerkship Directors for Internal Medicine. Clinical rotations for California Northstate University College of Medicine are developed in a community training model. Community training involves placing students in a busy physician's practice with learning objectives that direct the student's focus. It is the student's job to learn rather than the physician's job to teach. Learning is "just in time" taking advantage of educational opportunities that present and augmenting learning opportunities with reading or modules to complete the objectives. In this model, students are expected to develop lifelong learning patterns of accessing appropriate resources rather than being told what to do and when to do it (prescriptive learning). The required texts will provide information necessary for successfully studying in this rotation, but some students may prefer suggested texts or others. Preceptors may direct the student to their favorite texts or online resources.

INTERNAL MEDICINE (INT)

INT 801 Internal Medicine Sub-Internship (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Highland Hospital, Alameda Health System
4-week rotation. Students will assume responsibilities quite similar to those of an intern, although with fewer patients. The student will be a member of a general medicine ward service consisting of an attending physician, residents, interns, and usually one "third year" student. Attending Rounds are made daily. Students will be able to gather a medical history, perform a physical examination, interpret common diagnostic tests, prioritize a differential diagnosis, and recommend and execute a management plan for common in-patient internal medicine patient presentations. Students will be able to organize and communicate their clinical thinking both in the form of written notes and oral presentations. Students will be able to communicate and collaborate in an inter-professional team of other healthcare providers, out-patient providers, consultants, RNs, and ancillary staff. Students will be able to communicate effectively with patients and caregivers. Students will transition patients safely across the healthcare system. (Prerequisite: COM 711)

INT802 Inpatient Medicine Sub-Internship (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. The major goal of this sub-internship is to construct the clinical environment for the senior student to develop inpatient case management responsibilities in the broad field of internal medicine that will allow confident transition to resident level responsibilities in all disciplines.

INT 810 Palliative Medicine (2 or 4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser Permanente Modesto Medical Center

2 or 4-week rotation. Variable credit based on duration of rotation. Palliative Medicine is an essential component of medical care for patient with a life limiting illness. This course provides medical students and residents a framework in which to effectively to acquire Palliative Care knowledge and skill sets necessary to care for serious ill patients and their families. Clinical experiences includes Inpatient and outpatient Palliative Care experiences, pain management, disclosing serious news, offering prognostic information, disease trajectory, addressing goals of care, conducting family conference, home visits (optional). Mandatory Palliative Care didactic lecture given by preceptor in the first week of the rotation. (Pre-requisite: COM 711 or COM 701)

INT 811 Introduction to Palliative Medicine (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser Sacramento and Roseville Hospitals

4-week rotation. Course goals are to provide the medical student with a foundation in the principles of Palliative Medicine, particularly communication skills, pain and symptom management, and care of the dying patient. Students will demonstrate proper communication skills, particularly between providers and patients/families, the ability to organize and conduct a family meeting. Students will discover the basics of pain and symptom management and improve prognostic awareness. Students will perform the basic skills of care for the dying patient. Clinical experiences includes Hospital-based care, following patients on the in-patient Palliative Medicine team and Hospice-based care, spending several days with hospice care providers in the community.

NEUROLOGY (NEU)**NEU 810 Clinical Neurosciences (4 cr)**

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): CNUCOM

4-week rotation. Build the understanding of neurology through better understanding of more basic clinical neurosciences. 1) Apply and demonstrate basic neurosciences theory and principles in clinical application. 2) Utilize the literature and apply the knowledge for evidence based practice. 3) Apply self-directed learning methodologies to clinical practice. 4) Create and propose teaching sessions and tutorials for other medical students. Regular meeting with the preceptor to discuss learning and teaching activities.

Regular self-directed learning activities with literature search and understanding.

NEU 811 Clinical Neurology Elective (2-4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): CNUCOM

2-4-week rotation. Variable credit determined by duration of rotation. Student goals: Improve the understanding of neurology in the clinical setting, inpatient and/or ambulatory. Deepen and expand Neurology skills and knowledge acquired in 3rd year clerkship in areas of: history taking, physical exam, formulating differential diagnosis and management plan, improve skills in oral and written presentations, and procedural skills (when available). Will explore selected subspecialties in Neurology in more depth and continue to refine skills in professionalism, communication and collaboration. Students acquire skills in patient management as part of the neurology team under supervision by the preceptor.

NEU 812 Neuroradiology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser and others

4-week rotation. Students will understand and learn neuroradiology as an extension of general radiology. Students will apply and understand neuroanatomy through neuroimaging, understand theories and practice of different neuroradiological entities. Students will perform and understand neuropathology through neuroimaging and Analyze cost-effectiveness of different neuroimaging entities. Clinical experiences includes regular learning and interaction on clinical sites with the preceptors.

NEU 880 Neurosurgery (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Mercy General Hospital, Sutter General Hospital

4-week rotation. The student will be exposed to the breadth of neurosurgery pathologies such as brain tumors, vascular lesions, pain syndromes, spinal deformities, trauma of the brain or spine. The student will have the opportunity to work in the clinic as well as in the operating room and assist on neurosurgical operations. It is recommended that the student has a strong interest in the surgical specialties for this rotation. Students will learn to: 1) Apply knowledge of neuroanatomy to describe etiopathogenesis and management of neurosurgical disorders. 2) Apply knowledge of neuroanatomy to interpret neuro-radiological findings. 3) Explain the mechanisms of traumatic brain injuries and outline their management. 4) Outline the clinical course including management of common neurosurgical problems including tumors, stroke, and spinal disease. Clinical experiences includes assisting in surgery, round in the hospitals, and evaluate patient in the clinic. Specialty Area(s): Neurology; Surgery.

OBSTETRICS GYNECOLOGY (OBG)

OBG 801 Ob/Gyn Sub-Internship (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Multiple

4-week rotation. This is a course that exposes the student to general obstetrics and gynecology. The student will rotate through obstetrical services including labor and delivery, the gynecological services, and ambulatory clinics. There will be one call day. This rotation is designed to prime and prepare the student for an OBGYN internship. Medical students interested in an OBGYN residency are encouraged to experience this course.

OBG 810 Clinical OB/GYN Elective (2-4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): CNUCOM

2-4-week rotation. Variable credit determined by duration of rotation. Students will apply knowledge of basic & clinical sciences into medical practice; obtain and deliver a complete concise, clear and concise oral and written presentation of a patient's history and examination in a more complex setting; distinguish normal from abnormal findings and the ability to localize the likely sites of lesion in the Ob-Gyn system from available clinical information; utilize and interpret common tests used in diagnosing common condition in Ob-Gyn; Formulate a differential diagnosis based on clinical information and relevant history; Demonstrate a systematic approach to the diagnosis and management of common Ob-Gyn conditions and formulate a logical management plan; understand Ob-Gyn Subspecialties and their applications; and function as a "contributor" to the team managing the Ob-Gyn disorders. (Pre-requisite: COM 731)

OPHTHALMOLOGY (OPH)

OPH 810 Ophthalmology Clerkship (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Martel Eye Medical Group, Retinal Consultants

4-week rotation. Students are expected to develop the basic skills of medical problem solving, basic science integration, case management, procedural competence, and professional behavior as it pertains to the field of ophthalmology. They will accomplish this by: Refining history taking, Refining the physical examination, Developing a reasonable differential diagnosis, and Outlining an initial diagnostic and treatment plan. Clinical Experiences: Students will observe, participate, and manage in the care of clinical patients. Surgical Experiences: Students will observe and assist the preceptor in surgeries.

ORTHOPEDIC (ORT; SPM)

ORT 881 Orthopedic Surgery (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Office, Mercy San Juan Hospital, surgery center

4-week rotation. General observations and interactions with patients. Rounds in the hospital and observation in surgery. Extend knowledge in orthopedic anatomy and physical exam skills of the extremities. Build basic surgical skills. Clinical experiences includes Office, OR, rounding, surgery center. Specialty Area(s): Orthopedics; Surgery.

ORT 882 Ortho Spine (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Office, operating room, hospital (Sutter General)

4-week rotation. Students will see and evaluate patients in office, observe surgery, and make rounds. Develop experience in understanding medical and surgical options for patients with spine disorders. Evaluate patients with spine conditions. Understand decision making in operative and non-operative care. Specialty Area(s): Orthopedics; Surgery.

ORT 883 Orthopedic and Podiatry (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. The student will be able to develop skills in the Orthopedic Surgery Department by examining and supporting the residents and faculty. The student will be able to make use of the outpatient clinic, emergency room, ambulatory surgery, and the main operating room. To show students to the field of orthopedics and its various subspecialties and research opportunities. To demonstrate a general feel for the training involved in Orthopedics. To show basic orthopedic skills such as x-ray interpretation, splinting and casting techniques, suturing techniques, physical exam. To extend the student knowledge of anatomy as it applies to musculoskeletal conditions, and to introduce student to orthopedic treatments and the medical decision making process. Specialty Area(s): Orthopedics; Surgery.

SPM 814 First Degree Care Sports Medicine

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Rocklin Family Practice and Sports Medicine
Improve and acquire high skills in MSK exams / OX / Injections / Fracture & concussion management / XRAY interpretation. Students will: demonstrate and describe basic structures and functioning of body joints, demonstrate proper injections technique, observe and manage fractures and concussions, and acquire high skills in XRAY interpretation.

OTOLARYNGOLOGY-ENT (OTO)

OTO 813 Otolaryngology Elective (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Sacramento, Roseville, & Carmichael.

4-week rotation. Develop an understanding of the diagnosis and treatment of many common otolaryngology diseases. Students will learn to: Improve examination skills, Develop recognition of head and neck pathology, Demonstrate the understanding of when to refer for specialty opinion. Clinical experiences includes on-site experience at one of three SacENT

offices as well as surgery centers and hospitals in Sacramento and Roseville areas.

OTO 881 Otolaryngology – Head and Neck Surgery

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser Modesto and Stockton

4-week rotation. The objective of this course is to give a broad exposure to the clinical and surgical aspects of otolaryngology. Students will become acquainted with the experience of outpatient office, operating room care, and overall integrated care between patients, general otolaryngologists, and other health care providers including primary care, audiology, and speech therapy. In the office, students will have the opportunity to obtain focused history, perform a complete head and neck exam, formulate differential diagnosis, and management plan. In the operating room, students will perform chart reviews prior to surgery and be knowledgeable about relevant surgical anatomy and treatment options for common surgical disorders like otitis media, sinusitis, pediatric obstructive sleep apnea, and thyroid disorders. At the end of the rotation, the student will be expected to present a topic that was encountered during the rotation. The course setting includes Kaiser Stockton Medical offices (with a potential opportunity for facial plastics exposure), Modesto and Manteca Kaiser Hospitals. The hours may potentially run from 7 AM to 7 PM without overnight call. Clinical experiences includes Outpatient clinic, outpatient clinic procedures, operating room, audiology, lunch sessions, interdepartmental monthly meetings (Head and Neck surgery, audiology, and speech therapy). Specialty Area(s): Otolaryngology-ENT; Surgery. (Pre-requisite: COM 761)

PATHOLOGY (PTH)

PTH 810 Pathology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Hospital laboratory

4-week rotation. Students will understand the role of pathology, appropriate utilization of lab tests. Understand the behind the scenes work that is involved in clinical laboratory result reporting. Demonstrate the functions of a community pathologist: Anatomic pathology: frozen sections, intraoperative consultation, hospital slide review and special studies, gross examination of surgical specimens. Clinical lab management: take part in the hematology, blood bank, chemistry, attend hospital lab meetings as appropriate, lab management. The field of pathology differs from the more traditional fields of medicine. The rotation will be modified to accommodate for the interest of the student in the field of pathology. Patient care will include gross examination of surgical specimens, intraoperative consultations and slide review of hospital cases. These results will be correlated with the clinical information.

PEDIATRICS (PED)

PED 801 Pediatric Sub-Internship (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Multiple

4-week rotation. The medical students will function as interns. Each student will meet with Dr. Khaira on the first day to determine how the rotation is to be structured with educational goals and objective. Rotations are based on the individual interests and needs of the student. Students will care for patients of all socioeconomic backgrounds and with a mix of pathology ranging from bread and butter problems to tertiary care inpatient pediatrics.

PEDS 810 Pediatric Cardiology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Capital Pediatric Cardiology Associates

4-week rotation. During the pediatric cardiology rotation, students will be under the direct supervision of pediatric cardiologists in both outpatient and inpatient setting. Students will attend either morning or afternoon clinic, participate in obtaining a history and perform a physical examination on patients in clinic. In addition, they will participate in the selection of appropriate tests and participate in the interpretation of those tests. Students will join pediatric cardiologists on their inpatient rounds seeing patients in Nursery, NICU, Pediatric Ward, and PICU. Students will also have the opportunity to observe cardiac catheterization for diagnostic and interventional procedures as well as observe pediatric electrophysiology studies and catheter ablations of rhythm disorders. Students will also have the opportunity to observe cardiothoracic surgery of neonates, infants, children and adolescents and adults with congenital heart disease. In addition to clinics, students will have the opportunity to attend pediatric cardiovascular presurgical and catheterization conferences in addition to participating in teaching conferences. Specialty Area(s): Cardiology; Pediatrics.

PEDS 811 Otolaryngology (2 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser Roseville Women & Children's Center

2-week rotation. Rotation includes the analyzing of pediatric otolaryngology problems presented to specialist for diagnosis and treatment. The student develop skills in the clinic, hospital and operating room. Specialty Area(s): Pediatrics; Otolaryngology.

PED 812 Pediatric Neurology Elective (2-4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): CNUCOM

2-4 week rotation. Variable credit determined by duration of rotation. Improve the understanding of neurology with expansion to Pediatric Neurology in the clinical setting, inpatient and/or ambulatory. Deepen and expand Neurology skills and knowledge acquired in 3rd year clerkship in areas of: history taking, physical exam, formulating differential diagnosis and management plan, improve skills in oral and written presentations, and procedural skills (when available). Continue to refine skills in professionalism, communication and collaboration. Acquire skills in patient management as part of the neurology team under supervision by the preceptor. Prerequisite: COM 741. Specialty Area(s): Pediatrics; Neurology.

PED 813 Pediatric Neurology with Clinical Neurology Subspecialty (2-4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): CNUCOM

2-4 week rotation. Variable credit determined by duration of rotation. Clinical experience in Pediatric Neurology with the option to explore selected subspecialties/adult Neurology in more depth. Improve the understanding of neurology in the clinical setting, inpatient and/or ambulatory. Deepen and expand Neurology skills and knowledge acquired in 3rd year clerkship in areas of: history taking, physical exam, formulating differential diagnosis and management plan, improve skills in oral and written presentations, and procedural skills (when available). Continue to refine skills in professionalism, communication and collaboration. Acquire skills in patient management as part of the neurology team under supervision by the preceptor.

PHYSICAL MEDICINE (PMR)

PMR 810 Physical Medicine and Rehabilitation PM&R (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser Sacramento and Roseville

4-week rotation. This rotation allows students to understand the diversity and scope of PM&R practice (neurologic rehab, musculoskeletal, spine, interventional procedures, electrodiagnostic tests, inpatient and outpatient care); Understand basic principles involved in the above. Clinical experiences includes: 1) Spine clinic appointments (Kaiser Sacramento and Roseville); Injection Risk Orientation (Kaiser Roseville); and outpatient physical therapy appointments, 2) Interventional spine procedures – fluoroscopy and ultrasound-guided (Kaiser Ros), 3) Electrodiagnostic clinic appointments (Kaiser Sac, Ros), 4) Neurorehab clinic appointments (Kaiser Sac, Ros); amputee clinic; and outpatient physical, occupational, speech therapy appointments, and 5) Hospital consultations, neuro-ICU and stroke rounds, inpatient therapy sessions (Kaiser Sac).

PMR 811 Physical Medicine and Rehabilitation (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. This elective provides a custom designed experience in the field of Physical Medicine and Rehabilitation based on the interests of the individual student. Students can elect for a broad exposure to the field, or concentrate in a specific area including outpatient, acute inpatient, subacute inpatient, trauma, and electromyography testing. This elective is recommended for students contemplating a career in physical medicine and Rehabilitation as well as those anticipating a career in primary care.

PLASTIC SURGERY (PLS)

PLS 880 Plastic Surgery (2 or 4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): AHMC San Gabriel Valley Hospital

2-4-week rotation. Variable credit determined by duration of rotation. The specialty of plastic and reconstructive surgery is that branch of surgery concerned with the restoration of normal form and function. It is a varied specialty involving adults and children and encompassing a wide range of conditions in different parts of the body. A major proportion of the workload involves take part in urgent or emergency cases including: Hand trauma, Burns and scalds, Soft tissue injuries involving face, trunk or limbs. Elective surgery includes demonstration of the following major areas: Head and neck. This includes excisional and reconstructive surgery for congenital and acquired abnormalities, and for malignancy involving the face and mouth. Cleft lip and palate and other craniofacial abnormalities. Breast: including surgery for reconstruction, reduction and augmentation. Hand and upper limb: including congenital and acquired conditions. Skin and soft tissue tumors. Congenital and acquired deformities of the trunk and urogenital system. Aesthetic or cosmetic surgery. One of the most interesting aspects of the specialty is the frequency with which plastic surgeons relate with surgeons from other specialties such as general surgery, orthopedics, otorhinolaryngology, and maxillofacial surgery. In these cases, the reconstructive techniques that plastic surgeons have at their disposal are recognized. The specialty is also closely associated with aesthetic surgery where body parts are surgically altered to bring about an improvement in appearance.

PLS 881 UC Davis Plastic Surgery Acting Internship (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): UC Davis Medical Center

4-week rotation. Gain a greater appreciation of Plastic Surgery, as the surgical specialty that restores, reconstructs, or alters the human body in response to congenital or acquired deformities following trauma, weight changes, or the natural aging process. It encompasses many specialty areas including craniofacial, hand, microsurgery, breast and aesthetic surgery. Elective is flexible with primary emphasis on reconstructive and aesthetic surgery at the University Hospital with opportunities for assisting in the operating room. The rotation also includes Trauma call to provide experience with the evaluation and management of maxillofacial and hand trauma with opportunities for suturing of lacerations as well as closed reduction and splinting of common hand fractures.

PULMONARY (PUL)

PUL 801 Pulmonary & Critical Care Medicine Sub-Internship (2 or 4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Sutter Sacramento/Roseville Med/Mercy San Joan

2 or 4 week rotations. Variable credit determined by duration of rotation. This rotation offers an opportunity for a 4th-year student to work jointly with a faculty attending to evaluate and manage critically ill medical and surgical patients. Typical patient diagnoses include

myocardial infarction and cardiac arrest, acute respiratory failure (asthma, COPD, pneumonia, ARDS), delirium and coma, stroke, severe sepsis, toxic ingestions, diabetic ketoacidosis, cardiogenic and septic shock, renal and hepatic failure, and post-operative co-management. A comprehensive evidence-based management approach based in physiology will be taught. Students will be responsible for patient evaluations and notes and will progress to performance of diagnostic and therapeutic procedures as appropriate. Students will become familiar with basic mechanical ventilator management and arterial blood gas interpretation, and the value of a multi-professional team approach to the care of the critically ill.

PUL 810 Pulmonary & Critical Care

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. General Description: This rotation offers an opportunity for a 4th-year student to work jointly with a faculty attending to evaluate and manage critically ill medical and surgical patients. Typical patient diagnoses include myocardial infarction and cardiac arrest, acute respiratory failure (asthma, COPD, pneumonia, ARDS), delirium and coma, stroke, severe sepsis, toxic ingestions, diabetic ketoacidosis, cardiogenic and septic shock, renal and hepatic failure, and post-operative co-management. A comprehensive evidence-based management approach based in physiology will be taught. Students will be responsible for patient evaluations and notes and will progress to performance of diagnostic and therapeutic procedures as appropriate. Students will become familiar with basic mechanical ventilator management and arterial blood gas interpretation, and the value of a multi-professional team approach to the care of the critically ill.

PUL 811 Pulmonary & Critical Medicine

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Simi Valley Hospital & Los Robles Regional Medical Center

4-week rotation. Students will learn how to manage respiratory diseases both inpatient and outpatient. Students will build the skill to manage COPD, asthma, pneumonia and the skill to manage critical patients in the ICU. Students manages sepsis, stroke, and many other critical illnesses in the ICU.

RADIOLOGY/NUCLEAR MEDICINE

(RAD)

RAD 810 Radiology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. Students will gain experience and knowledge about the specialty of Radiology, its indications, interpretations, and common interpretation errors. After the 4-week rotation through various sections of the department, student(s) should be able to:

- 1) Explain the basic principles of radiography and identify basic daily routine clinical radiographic examinations and interpretation of common diseases-

pathologies. 2) Explain the basic principles of computed tomography (CT) and magnetic resonance imaging (MRI) its daily routine clinical examinations including appropriate indications and grasp basic cross-sectionally anatomy as well as common pathologic conditions/diseases. 3) Explain the basic principles of fluoroscopy and basic daily routine clinical fluoroscopic examinations and procedures. 4) Explain the basic principles of nuclear medicine and its daily routine clinical examinations and interpretation. 5) Explain the basic principles of interventional radiography and its daily routine clinical examinations and procedures.

RAD 811-01 Interventional Radiology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser South Sacramento

4-week rotation. Students will understand the basic technical principles of image-guided procedures using fluoroscopy, ultrasound, and CT and application into intervention in organ systems. Students are exposed to a wide range of procedures performed by a practicing Interventional Radiologist. Students will understand the clinical principles of interventional radiography as applied to disease processes and importance of active patient management. Students will develop mastery of arterial, venous anatomy, mastery of Seldinger technique, advanced understanding of interventional oncology especially in treatment of hepatocellular carcinoma, and understanding of clinical role of IR in caring for patients in the outpatient setting. Students will perform the familiarity with use of ultrasound and ultrasound guided needle access, use of guide wires, catheters, and microcatheter systems. Students will demonstrate familiarity with angioplasty equipment, stents, and embolic agents, the understanding of clinical role of IR in caring for the critically ill patient, and familiarity with venous and arterial interventions.

RAD 811-02 Interventional Radiology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): AHMC Whittier Hospital

4-week rotation. Designed to provide the student with a better understanding of the central role of interventional radiology in the evaluation and management of patients through participation in reading room readouts, radiology call, case presentations, interactive labs, and observation of the various imaging modalities and procedures. Students will construct the appropriate sequencing of exams and the limitations of diagnostic imaging tests, including cost-effectiveness of imaging studies. Apply basic interpretive skills to evaluate common imaging studies – predominantly plain films and CT. Take part in imaging interpretation, including basic study identification, recognition of normal radiographic and cross-sectional anatomy, and common pathology as depicted on common studies. Utilize the PACS system to retrieve and review images.

RAD 816-01 Nuclear Medicine, Molecular Imaging and Theranostics (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Kaiser Hospital-Roseville, Sacramento

4-week rotation. Students will demonstrate knowledge of Nuclear Medicine items which pertain to USMLE Step 2. and the ability to tackle what is the next step imaging test asked on standardized examinations. Students will perform the ability to manage Hyperthyroid patients and gather a focused history on patients with Hyperthyroidism. Students will be able to describe the appropriate utilization of cardiac imaging guidelines and Fleischner criteria for management of pulmonary nodules (both solid and subsolid). Students will show knowledge of basics of PET, molecular imaging and theranostics. (Pre-requisite: COM 711; COM 761)

RAD 816-02 Nuclear Medicine, Molecular Imaging and Theranostics (2 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Kaiser Hospital-Roseville, Sacramento
2-week rotation. Students will demonstrate knowledge of Nuclear Medicine items which pertain to USMLE Step 2. and the ability to tackle what is the next step imaging test asked on standardized examinations. Students will perform the ability to manage Hyperthyroid patients and gather a focused history on patients with Hyperthyroidism. Students will be able to describe the appropriate utilization of cardiac imaging guidelines and Fleischner criteria for management of pulmonary nodules (both solid and subsolid). Students will show knowledge of basics of PET, molecular imaging and theranostics. (Pre-requisite: COM 711; COM 761)

RENAL

REN 810 Nephrology (2 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Kaiser Medical Center, Roseville
2-week rotation. Basics of Renal disease, Acute Kidney Injury, Chronic Kidney Disease, Hypertension, Electrolyte abnormalities and introduction to dialysis and kidney transplant

RHEUMATOLOGY (RHE)

RHE 810-01 Rheumatology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Roseville Rheumatologists, Roseville, CA
4-week rotation. Rheumatology is a study of autoimmune disease and in this specialty students would learn clinical signs and symptoms of some of the most common rheumatologic autoimmune diseases like Rheumatoid arthritis, Lupus, Psoriatic Arthritis, Ankylosing spondylitis and various other autoimmune disease. Evaluate history and physical examination specific for rheumatologic disease process. Maximize basic knowledge about most common disease like Rheumatoid arthritis, Osteoarthritis, lupus and gout.

RHE 810-02 Rheumatology (2 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Roseville Rheumatologists, Roseville, CA
2-week rotation. Rheumatology is a study of autoimmune disease and in this specialty students would learn clinical signs and symptoms of some of the most common rheumatologic autoimmune diseases like

Rheumatoid arthritis, Lupus, Psoriatic Arthritis, Ankylosing spondylitis and various other autoimmune disease. Evaluate history and physical examination specific for rheumatologic disease process. Maximize basic knowledge about most common disease like Rheumatoid arthritis, Osteoarthritis, lupus and gout.

RHE 810-03 Rheumatology (2 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): TBD

2-week rotation. Rheumatology is a study of autoimmune disease and in this specialty students would learn clinical signs and symptoms of some of the most common rheumatologic autoimmune diseases like Rheumatoid arthritis, Lupus, Psoriatic Arthritis, Ankylosing spondylitis and various other autoimmune disease. Evaluate history and physical examination specific for rheumatologic disease process. Maximize basic knowledge about most common disease like Rheumatoid arthritis, Osteoarthritis, lupus and gout.

RHE 811 Rheumatology (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): TBD

4-week rotation. Rheumatology is a study of autoimmune disease and in this specialty students would learn clinical signs and symptoms of some of the most common rheumatologic autoimmune diseases like Rheumatoid arthritis, Lupus, Psoriatic Arthritis, Ankylosing spondylitis and various other autoimmune disease. Students will demonstrate how they examine and analyze patients with rheumatic diseases. When appropriate they should analyze laboratory assessment and radiographic characteristics of the diseases. Clinical experiences includes seeing patients with history and physical exam followed by review of labs and images with further discussion.

SURGERY (SUR)

SUR 801 Surgery Sub-Internship (4 cr)

Sponsor(s): Dept. of Med Ed. & Affiliated Institutions
Locations: Multiple

4-week rotation. Students will take a higher level of responsibility for the evaluation and management of various acute surgical disorders. Students are expected to attend and participate in all scheduled educational activities at the host institution. Students will learn how to perform comprehensive history and physical examinations in a timely manner and will gain experience in generating differential diagnoses, assessments, and diagnostic and treatment plans at a level similar to a person doing a surgery internship. They will have a greater opportunity to hone their surgical skills in the OR as well as hone skills in the pre-surgical evaluation of patients and post-operative and their management.

SUR 881 Head and Neck Surgery (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions
Location(s): Kaiser Roseville

4-week rotation. Designed to provide the student with a better understanding common head and neck

pathologies and management strategies. Develop competency with the head and neck exam and identification of normal anatomy. Demonstrate understanding of head and neck surgical anatomy. Show familiarity with common head and neck pathology and basic management strategies. Demonstrate familiarity with common head and neck emergencies basic management strategies. Specialty Area(s): Surgery; Otolaryngology.

SUR 882 Trauma Surgery (4 cr)

Sponsor(s): Dept. of Med. Ed. & Affiliated Institutions

Location(s): Mercy San Juan Hospital

4-week rotation. The Trauma Team responds to trauma resuscitations and is involved with immediate evaluation and management of critically injured patients in the emergency department.

Students should demonstrate the initial evaluation and management of the trauma patient and basic principles of resuscitation in the emergency department and in the ICU/trauma ward. The student will also demonstrate the familiarity with physiology, management and outcome of multiple organ dysfunctions. They will gain exposure to procedure: central access, chest tube placement, wound debridements, tracheostomies, laceration repairs, etc. The will be make use of the exposure to complex and difficult decision making involving the injured patient.

Interdisciplinary Electives

COM 901 Honors Medical Research (1 cr)

This elective research course is designed to enhance student's skills and interest in an academic career. Students will focus on developing a research question and will conduct a review of current literature to assist with the answering or further development of that question. The course will allow students to hone their analytical and investigative skills by participating in an active research project under a faculty mentor to produce usable data sets, public presentations, and abstracts suitable for publication. (Prerequisites: COM623)

COM 903 Being a Leader (2 cr)

Given the complex and demanding environment of healthcare, effective leadership is often required to meet these challenges. This course is designed to provide you with tools to give you access to being who you need to be, to be a leader, and to exercise leadership effectively as you encounter each of these challenges.

This course is a leadership laboratory in which you will discover that leadership does not always mean a position, a title, time, money, influence, or any of the traits typically "required" to be a leader or produce the results of a leader. Instead of more knowledge about leadership, you will gain access to actually begin a leader and effectively exercising leadership as your natural self-expression, in any situation and under any circumstances. During the course your current conventional thoughts will be challenged, new ways of thinking will emerge, and you will leave with new actions to create even greater success in the areas of life and

leadership that matter most to you. The purpose of this course is to inquire into the meaning and being of leader and leadership in order to empower each of us to be leaders in our lives, communities, and societies. It is not an academic inquiry to theories, models, and case studies about leadership. The promise of this course is that, if you participate fully, you will leave the course being a leader and exercising leadership effectively as your natural self-expression. By the end of the semester, these terms will be clear to you and you will be a leader in ways you never conceived of before. (Prerequisites: M1-M4 in good standing; Repeatable for max of 4 credits)

COM 904 The Healers Art (0.5 cr)

The Healers Art course is an elective course consisting of 5 three-hour sessions. It is available to all CNU COM students. The course will be offered 1-2 times per year in the Fall and/or Spring semester. Each session will have both large group presentations and small group discussions. The small groups will consist of 1 faculty member and 5 students, and students will remain with the same small group (including faculty member) throughout the course. The maximum number of students will be based on faculty available for small group facilitation for a particular course and will be 5 times the number of faculty available (1:5 ratio faculty to students). The Healers Art course is a defined curriculum created in 1991 by Dr. Rachel Remen (Professor, UCSF School of Medicine) is currently being taught in over 90 medical schools. The purpose of the course is to explore the human dimension of health care including learning self-care strategies and recognizing the value of service. Topics covered will include defining an individual's purpose and commitment in medicine, tools to deal with grief and loss, recognizing awe and mystery in the practice of medicine, and open dialogue about mission and service. The course and its small group discussions offer an opportunity for open dialogue, depth of discussion and interaction with faculty that is unique and not available in other areas of the curriculum. (Prerequisites: M1-M4 in good standing)

COM 905 Mindfulness-Based Stress Reduction (1 cr)

This course is a Phase A elective course consisting of 9 two-hour sessions and a one-hour orientation which can be taken either as an M1 or M2. Each session will include a formal 30-45 minute meditation practice as well as other mindfulness exercises and facilitated group discussions, including a discussion of research articles on the top of mindfulness. This elective course is modeled after the MBSR program created by Dr. Jon Kabat-Zinn at the University of Massachusetts. As described by Dr. Kabat-Zinn, mindfulness is "paying attention on purpose" and remaining in the present in a nonjudgmental way. Research has shown that participation in an MBSR course can lead to reductions in chronic pain, anxiety, depression, headaches, and improved quality of life and prevent fatigue and burnout in physicians. By participating in the this MBSR course, students will be introduced to the idea of mindfulness as a tool to improve their lives as future physicians as well

as knowledge base that can be shared with future colleagues and patients who may benefit from the program. The course requires at least 8 attendees with a maximum of 30 attendees. The course will be offered 1-2 times per year in the Fall and/or Spring semester. (Prerequisite: M1 or M2 in good standing)

COM 906 Military Officer Training (Variable Credit)

Varies slightly by branch of service. For Army: This course will last 6 weeks in duration and will require duty through weekends. 1. To obtain information about the AMEDD Basic Officer Leader Course, go to <http://www.cs.amedd.army.mil/BOLC/index.htm>. This web site contains key information for students to be successful at BOLC, to include: frequently asked questions (FAQ) page, field packing lists, recommended uniform items, and key dates during the course. 2. Officers will be assigned to A Company, 187th Medical Battalion, Fort Sam Houston, Texas. See A Company's website: <http://www.cs.amedd.army.mil/BOLC>. This website contains the Commander's welcome letter, frequently asked questions, and command policy letters. Check it frequently since the information is often updated. 3. Officers are to bring their uniforms to Fort Sam Houston. There will be an opportunity to purchase more uniforms while attending the course. 4. It is highly recommended that officers bring computer/laptop and printer, as many homework assignments require the use of a computer and printer. There are computer labs in the AMEDD Center and School, but the hours may be limited. CRITICAL TASK:

Students are required to meet all course graduation requirements and WILL SPECIFICALLY MEET ALL STANDARDS FOR THE FOLLOWING TASKS: four-man litter carry.

HLT 810 Wellness – Leadership, Healers Art, Mindfulness and Compassionate Conversations (4 cr)

This elective offers students an exposure to the art of medicine - a new style of leadership where leadership becomes your natural self- expression, experience with several mindfulness practices and engagement and reflection with challenging conversations that can arise for oneself and with patients and other staff/faculty in the midst of the practice of medicine.

HLT 812 You and Your Patients are What You Eat and More – How Slow Food & Slow Medicine Work Together (4 cr)

To cover nutrition thru the life cycle of your future patients: anemia, cancer, hypertension, cardiovascular disease, diabetes, infancy, pediatrics, pregnancy and lactation, aging and chronic disease, obesity, sports, stress and nutrition support, and supplements.

COM 810 OSCE Program Assistance (4 cr)

Review and improve history taking, physical exam and presentation skills by teaching and mentoring M1 & M2 students during their Medical Skills courses. (Prerequisite: M1, M2, or M4 standing)

COM 2018-2019 Academic Calendar

MS1-Phase A

Fall semester:08/06/2018 – 12/11/2018			
course	Start Date	End Date	
foundations of Clinical Medicine	08/06/2018	09/21/2018

COLLEGE OF PHARMACY

Mission, Vision, and Values

Mission: To advance the Art and Science of Pharmacy.

Vision: To utilize innovative active learning strategies in educating students and practitioners, advance the practice of pharmacy, and improve the health of Californians and beyond.

Values: Advancing our College, our goals, and our discipline. Caring about our students, our staff, our faculty, and our profession. Teamwork in teaching, learning, research, scholarship, and service.

Goals:

Student Learning:

1. An academic program that fosters critical thinking, problem-solving, clinical reasoning, and self-directed learning skills.
2. A didactic curriculum that is based on an active learning and team-based pedagogy.
3. An experiential program that progressively develops student skills, attitudes, values, judgment, professional behavior, and expertise in patient-centered care.

Research and Scholarship:

1. A research infrastructure that promotes collaboration, innovation, and discovery.
2. A faculty engaged in discipline-related research and other scholarly activities.
3. A faculty development program that nurtures and supports a learning-centered curriculum and the scholarship of teaching.

Service:

1. Faculty engaged in professional and community activities.
2. A continuing education program responsive to the needs of alumni, pharmacy practitioners, and other healthcare professionals.
3. An operation system that supports teaching, learning, research, scholarship, and professional development.

Educational Philosophy

The CNUCOP curriculum is designed to help students become active, self-directed and lifelong learners. The four (4) year curriculum is designed to facilitate and optimize student learning in a progressive and integrated manner both in didactic and experiential courses.

Team-Based Learning

Team-Based Learning (TBL) is a well-defined educational strategy that CNUCOP employs throughout the first three years of the curriculum. TBL promotes judgment, mastery of content, communication, teamwork skills, problem-solving, and critical thinking. TBL emphasizes the importance of individual accountability, group collaboration, and the application of basic concepts to work through team

assignments. The role of the instructor is to clearly articulate the learning objectives, create challenging problems for students to solve, and probe their reasoning in reaching conclusions. All students are accountable for their individual and group work. At the beginning of each course, the Office of Academic Affairs forms teams comprised of 5 to 6 students based on various criteria that will help achieve an even distribution of resources across all teams. Students remain with the same team throughout the semester for each course. The format for TBL is comprised of three phases as shown in the diagram below.

In Phase 1, learners study independently outside of class to learn identified objectives. This may involve audio-taped slide presentations, reading assignments, or other activities. In Phase 2, individual learners complete a multiple choice exam to assure their readiness to apply the concepts learned during Phase 1. This is referred to as the Individual Readiness Assurance Test (IRAT). Then the teams retake the same multiple choice test exam and reach a consensus on the answer for each question. This is referred to as the Team Readiness Assurance Test (TRAT). Written appeals may be submitted by any team who would like to challenge the instructor on the correct answer or the adequacy of Phase 1 assignments. The instructor will provide immediate feedback on the concepts covered on the exam and will consider giving additional points to teams if their appeals are upheld. In Phase 3, which makes up most of the class time, teams will complete in-class assignments by applying the knowledge and skills learned in phases 1 and 2 to promote critical thinking, integration of knowledge and mastery of the topics. Peer evaluations are performed twice a semester.

Learning Outcomes

Program Learning Outcomes

Upon successful completion of the CNUCOP Doctor of Pharmacy program, students will be able to demonstrate the following learning program learning outcomes:

PLO 1: Foundational Knowledge. Demonstrate the knowledge, skills, abilities, behaviors, and attitudes necessary to apply the foundational sciences to the provision of patient-centered care.

PLO 2: Essentials for Practice and Care. Demonstrate the knowledge, skills, abilities, behaviors, and attitudes necessary to provide patient-centered care, manage medication use systems, promote health and wellness, and describe the influence of population-based care on patient-centered care.

PLO 3: Approach to Practice and Care. Demonstrate the knowledge, skills, abilities, behaviors, and attitudes necessary to solve problems; educate, advocate, and collaborate,

working with a broad range of people; recognize social determinants of health; and effectively communicate verbally and nonverbally.

PLO 4: Personal and Professional Development. Use the knowledge, skills, abilities, behaviors, and attitudes necessary to demonstrate self-awareness, leadership, innovation, entrepreneurship, and professionalism.

PLO 5: Interprofessional Competence. Use the knowledge, skills, abilities, behaviors, and attitudes necessary to demonstrate appropriate values and ethics, roles and responsibilities, communication, and teamwork for collaborative practice.

Co-Curricular Learning Outcomes

Upon successful completion of the CNUCOP Doctor of Pharmacy program, students will be able to demonstrate the following co-curricular learning outcomes:

1. **Social Awareness and Cultural Sensitivity.** Demonstrate awareness of and responsiveness to social and cultural differences by adapting behaviors appropriately and using effective interpersonal skills.
2. **Professionalism and Advocacy.** Demonstrate professional behavior and effective interactions with other healthcare professionals, community members, and/or patients and advocate for initiatives to improve patient care, health outcomes, and the profession of pharmacy.
3. **Self-Awareness and Learning.** Demonstrate self-awareness through reflection and the development of appropriate plans for self-directed learning and development.
4. **Innovation and Entrepreneurship.** Demonstrate innovation and creativity to develop novel strategies to accomplish professional goals, or students demonstrate an understanding for how innovation and creativity influence the development of novel strategies to accomplish professional goals.
5. **Public Health and Education.** Apply skills learned in the classroom to create and effectively deliver public health initiatives and health-related education to the community.
6. **Service and Leadership.** Demonstrate the ability to lead and work collaboratively with others to accomplish a shared goal that improves healthcare.

Experiential Educational Expectations

Experience in real pharmacy practice settings teaches judgment and California Northstate College of Pharmacy is committed to developing and maintaining a robust experiential component to the Doctor of Pharmacy program.

Pharmacy practice experience is designed to develop a foundation of competencies that students will build upon as they progress through the program. By the end of the introductory pharmacy practice experiences (IPPE), students should be able to demonstrate competencies in basic practitioner skills at a fundamental level. During advanced pharmacy practice experiences (APPEs), students should demonstrate IPPE outcomes at an advanced and progressive manner that emphasize clinical judgment, professional behavior, and personal responsibility. Achievement of these

competencies allows student pharmacists to embark on an independent and collaborative practice upon graduation. The following experiential outcomes were developed by a collaborative group representing seven of the California Colleges and Schools of Pharmacy.

1) Communication and Professional Behavior

A. Communicate effectively.

1. Communicate accurate and appropriate medical and drug information to a pharmacist, preceptor or other health care professional in a clear and concise manner.
2. Determine the appropriate means of communication for the situation.
3. Actively listen to patients, peers, and other health care professionals.
4. Use proper grammar, spelling, and pronunciation in communications.
5. Explain medication information to patients in understandable terms.
6. Adjust communication based on contextual or cultural factors, including health literacy, language barriers, and cognitive impairment.
7. Routinely verify patient or recipient understanding of communicated information.
8. Demonstrate effective public speaking skills and the appropriate use of audio-visual media when communicating with groups of patients, peers, and other health care professionals.
9. Develop effective written materials for patients, peers, and other health care professionals.

B. Interact with patients & the health care team.

1. Articulate the pharmacist's role as a member of the health care team.
2. Establish professional rapport with patients and healthcare professionals.
3. Demonstrate sensitivity to and respect for each individual's needs, values, and beliefs, including cultural factors, religious beliefs, language barriers, and cognitive abilities.
4. Demonstrate empathy and caring in interactions with others.
5. Maintain patient confidentiality and respect patients' privacy.
6. Demonstrate ability to resolve conflict in the pharmacy practice setting.

C. Behave in a professional and ethical manner.

1. Dress professionally and appropriately for the practice setting.
2. Arrive punctually and remain until all responsibilities are completed.
3. Use time effectively and efficiently.
4. Distinguish professional interests from personal interests and respond appropriately.
5. Demonstrate awareness of personal competence and limitations, and seek guidance or assistance from preceptors when appropriate.
6. Accept responsibility for one's actions.

7. Respond appropriately to feedback from preceptors, patients, peers, and other health care professionals.
8. Show initiative in interactions with patients, peers, and other health care professionals.
9. Demonstrate passion and enthusiasm for the profession.
10. Be aware of and work appropriately within the culture of the assigned practice setting.
11. Demonstrate awareness of site or institutional policies and procedures.
12. Prioritize workload appropriately.
13. Identify issues involving ethical dilemmas.
14. Weigh and balance different options for responding to ethical dilemmas.
15. Propose steps to resolve ethical dilemmas.
16. Adhere to all state and federal laws and regulations as a pharmacy intern in the practice setting.

2) The Practice of Pharmacy

A. Organize and evaluate information.

1. Assess prescription or medication orders for completeness, authenticity, and legality.
2. Verify that dose, frequency, formulation, and route of administration on prescription or medication orders are correct.
3. Obtain any pertinent information from the patient, medical record, or prescriber, as needed, for processing prescription or medication orders (e.g., allergies, adverse reactions, diagnosis or desired therapeutic outcome, medical history).
4. Review the patient profile or medical record for any allergies or sensitivities.
5. Determine the presence of any potential medication-related problems.
6. Determine if it is legal and appropriate to refill a prescription and to contact the prescriber for authorization, if necessary.

B. Prepare and dispense medications.

1. Accurately enter patient information into the patient's pharmacy profile or medication record.
2. Select the correct drug product, manufacturer, dose, and dosage form and prepare it for dispensing.
3. Assure that the medication label is correct and conforms to all state and federal regulations.
4. Assure that the label conveys directions in a manner understandable to the patient and that appropriate auxiliary labels are attached.
5. Select an appropriate container for storage or use of medications with special requirements (e.g., child-resistant containers, compliance devices).
6. Accurately perform and document the necessary calculations to correctly prepare the medication.
7. Perform the required technical and basic compounding steps to produce a pharmaceutically elegant product.
8. Demonstrate aseptic technique during the preparation of parenteral medications.
9. Document the preparation of any medication that has been compounded, repackaged or relabeled.
10. Adjudicate third-party insurance claims using established billing systems.

11. Determine the appropriate storage of medications before and after dispensing.
12. Comply with all legal requirements and professional scope of practice.

C. Provide patient counseling.

1. Communicate pertinent information to the patient to encourage proper use and storage of medications.
2. Discuss any precautions or relevant warnings about medications or other therapeutic interventions.
3. Assure the patient comprehends the information provided.
4. Assess and reinforce the patient's adherence to the prescribed therapeutic regimen.

D. Maintain accurate records.

1. Document the preparation and dispensing of medications.
2. Maintain manual or computerized files for prescription records that conform to state and federal laws and regulations.
3. Adhere to state and federal laws and regulations related to inventory control (e.g., controlled substances, investigational drugs).

E. Assist patients seeking self-care.

1. Assess a patient's self-identified problem (e.g., common cold, fever, pain, gastrointestinal problems) to determine if the problem is appropriate for self-care or requires referral.
2. Discuss options for treatment and, if indicated, recommend appropriate non-prescription product(s).
3. Counsel the patient about the proper use of self-care products.
4. Instruct a patient about the proper use of a diagnostic agent or device, including directions for obtaining accurate results and how to interpret the results.
5. Teach a patient the proper and safe use of commonly-used health products (e.g., condoms, thermometers, blood pressure monitoring devices, blood glucose meters, metered-dose devices, ear syringes, and adherence devices).

F. Contribute to and monitor the optimal use of medications.

1. Articulate the pharmacist's role in medication use oversight (e.g. formulary management, practice guidelines).
2. Participate in established medication safety and quality improvement activities (e.g., adverse drug reaction reporting, medication reconciliation).
3. Access, select, utilize, and cite appropriate references for health information and patient education materials.
4. Demonstrate proficiency with the technology used at assigned experiential sites.
5. Formulate evidence-based pharmaceutical care plans based upon sound pharmacotherapeutic principles that take into account individual patient health beliefs, attitudes, and behaviors.

3) Public Health

A. Participate in health education programs and community-based health interventions.

1. Raise public awareness about the role of a pharmacist as a public health educator.
2. Participate in activities that promote health, wellness, and the use of preventive care measures.
3. Articulate the concept of advocacy - what it means both professionally and personally.

B. Demonstrate public health-related practice skills.

1. Administer subcutaneous, intramuscular or intradermal injections, including immunizations.
2. Screen for common medical conditions and make appropriate referrals.
3. Conduct smoking-cessation interventions when appropriate.

Professional Standards

Communication Skills

Pharmacists must be able to effectively communicate with individuals from within and outside of the health care professional environment to engender a team approach to patient care. Those individuals may include other health care providers such as physicians and nurses; non-health care providers, such as patients, family members, caregivers; and other community members, such as policy makers. Influential communication focuses on the ability to adapt language style and vocabulary to meet the health-care literacy needs of each individual or unique community. Pharmacists must display an in-depth knowledge of medications and be able to convey pharmaceutical information in a clear and concise manner to ensure safe and effective medication use.

Students at CNUCOP must exhibit in-depth medication knowledge, effective interpersonal communications skills, the ability to work as an effective member of a health care team, and the ability to collaborate with all members of the health care team to ensure continuous quality patient care.

Patient Care Commitment

To provide patients with unparalleled health care, pharmacists must focus on disease treatment and management as well as wellness and disease prevention. Pharmacists must practice on inter-professional teams that focus on patients, patient populations, and outcomes. Pharmacists, in collaboration with patients and other health care providers, can ensure proper medication use by focusing on evidence-based medicine, quality improvement, cultural competence, health care disparities, and advocacy.

Students at CNUCOP should advocate for patient-centered pharmacist care to ensure safe and effective medication use.

Knowledge of the Profession

Revelation occurs when wisdom of the past is combined with current reality. Pharmacists must be aware of the evolutionary

steps within the profession and continue to advocate for improved patient-centered care.

Students at CNUCOP are required to attend didactic, laboratory, discussion, and experiential programs. They should understand how the practice of pharmacy has continually evolved to benefit the needs of society and develop visionary thinking capabilities to continue to advance the science and art of pharmacy.

Technical Abilities

All students will be certified in cardiopulmonary resuscitation (CPR), first aid, and immunizations. Therefore, student pharmacists are required to perform immunizations, cardiopulmonary resuscitation, and physical assessments suitable for medication therapy management to fulfill all academic requirements of the College.

General Abilities

Students should have the cognitive ability to critically and analytically think, to make compassionate and ethical decisions, and to engage in self-assessment and self-directed learning.

Licensure

Completion of Program and Licensing

Completion of the educational program leading to a degree and/or diploma is dependent upon student performance and success. The requirements for licensure in the profession are established by the state where licensure is sought. Completion of the educational program and obtaining a degree or diploma does not by itself guarantee licensure. Students are expected to remain current with other licensing requirements, including but not limited to the licensure examination and technical standards they may be required to meet in order to be licensed by the state in which they seek to practice. In addition, maintaining such technical standards is a condition for continued enrollment in this program; reasonable accommodations as defined and required by law may apply to persons with disabilities.

California Intern Pharmacist

Registration Requirements

To register as an intern pharmacist in California, candidates must be currently enrolled in a school of pharmacy recognized by the Board or accredited by the Accreditation Council for Pharmaceutical Education (ACPE) and have fingerprint and background clearances. Complete registration instructions can be downloaded from the California State Board of Pharmacy website at: http://www.pharmacy.ca.gov/forms/intern_app_pkt.pdf.

California Pharmacist

The standard processing time for Pharmacist Examination and Licensure Applications by the California Board of Pharmacy is approximately 30 days after submission; however, the Board will process applications submitted by schools within 10 business days if these applications are submitted as a batch by the school. Students interested in participating in the batch processing of applications must submit their completed

applications to the Office of Student Affairs and Admissions by May 1st, prior to graduation. The Office of Student Affairs and Admissions reviews each application prior to submission to the Board; however, it is the responsibility of the applicant to ensure all information is correct and that all required application materials have been included as part of the final application packet. These applications will then be hand-delivered to the Board of Pharmacy after graduation, since official transcripts, which are a component of the application, are not complete until after graduation has occurred.

To qualify for a pharmacist license, you must submit one of the following to document your education (A or B).

A. Graduate of a School of Pharmacy - If you are a graduate from an ACPE accredited college of pharmacy or a school of pharmacy recognized by the board, please request an official transcript to be sent directly to the board by your school. The official transcript must indicate your degree earned and date conferred.

Eligibility Requirements

To be licensed in California you must pass the North American Pharmacist Licensure Examination (NAPLEX) and the California Pharmacist Jurisprudence Exam (CPJE).

To be eligible to take the licensure examination for California, you must:

- Be at least 18 years of age
- Be a graduate of a domestic school of pharmacy or be a graduate of foreign school of pharmacy and be certified by the Foreign Pharmacy Graduate Examination Committee (FPGEC)
- Have completed at least 150 semester hours of collegiate credit, 90 of which must be from a school of pharmacy
- Have earned at least a baccalaureate degree in a course of study devoted to pharmacy
- Have completed 1,500 hours of approved pharmaceutical experience as a registered intern or one year of experience as a licensed pharmacist in another state
- Have fingerprint and background clearances.

The registration instructions, requirements, and application form for licensure as a pharmacist in California may be obtained and downloaded at the California State Board of Pharmacy website:
http://www.pharmacy.ca.gov/forms/rph_app_pkt.pdf.

NAPLEX/MPJE

The MPJE exam is for students pursuing licensure out of the state of California.

To take the NAPLEX and/or MPJE, candidates must meet the eligibility requirements of the board of pharmacy from which they are seeking licensure. The board will determine your eligibility to take the examinations in accordance with the jurisdiction's requirements. If the board determines that you are eligible to take the examinations, it will notify the National Association of Boards of Pharmacy (NABP) of your eligibility. If you have questions concerning eligibility requirements,

contact the board of pharmacy in the jurisdiction from which you are seeking licensure.

Registration instructions, requirements, and application form can be obtained and downloaded from the National Association of Board of Pharmacy (NABP) website at <http://www.nabp.net>.

Admission to the PharmD Program

The California Northstate University College of Pharmacy (CNUCOP) utilizes the national Pharmacy College Application System (PharmCAS). Applicants for admission to the Doctor of Pharmacy program at CNUCOP are required to complete and submit an official online application at www.PharmCAS.org. Applicants must also electronically submit a completed supplemental application and associated processing fee.

The admissions team evaluates applicants for admission on an individual basis. Candidates are required to meet all prerequisites prior to entering the program. Prerequisites may be substituted with courses the admissions committee evaluates to be equivalent. One or more members of the admissions committee review and evaluate each completed admission packet to determine an invitation for an interview.

The interview is conducted on campus. A modified multiple mini interview (MMIs) approach is used. A writing sample is also a required component of the onsite interview. The interview is designed to assess a variety of factors including: interest, oral and written communication skills, maturity, dedication, critical thinking, and an assessment of the applicant's ability to complete the program successfully and advance in the field of pharmacy. The interview may also be used to determine if the student has the English language proficiency to complete instruction in the English language since English is the only language of instruction.

All accepted students who matriculate must have all official transcripts for all courses taken since high school on record in the Admissions Office by September 30th. All qualifying applicants must interview for admission into the pharmacy program. Please note financial assistance may be limited for non-U.S. applicants. Personal transportation, such as a vehicle, will be necessary to participate in experiential education at clinical sites.

Pre-Pharmacy Requirements

Applicants seeking admission to the four-year Doctor of Pharmacy program must, prior to matriculation, have:

- Earned a high school diploma, GED, or its equivalent;
 - A Bachelor's degree is not required, however a Bachelor's degree is preferred;
- A cumulative GPA of 2.60 or greater on a 4.00 scale; A 2.6 science GPA is recommended.
- Completed a minimum of 51 semester units (73 quarter units) with a grade of C or better of non-GE prerequisite credit from a regionally accredited US institution or its equivalent abroad as outlined in the table below;
 - Science and math prerequisite coursework must be designed for science majors;
- Public speaking and science courses requiring a lab component (biology, general chemistry, and organic chemistry) cannot be taken online or through distance education;
- Science and math courses, along with any AP exams, must have been completed no greater than nine years from the planned date of matriculation;

- Completed a minimum of 12 semester units (18 quarter units) of general education courses as indicated on the table below;
- Met the Professional and Technical Standards;
- Completed a successful admission interview; and
- Received approval of acceptance for admission by the admissions committee.

The PCAT is not required for admission.

The pre-pharmacy requirements ensure that applicants have the primary academic background necessary to complete a rigorous professional curriculum, as well as adequate exposure to a broad range of academic coursework. Applicants must receive a C grade or better in each prerequisite with a minimum cumulative GPA of 2.60 on a 4.00 grade scale. The courses may not be taken on a pass/no pass or credit/no credit basis. The specific pre-pharmacy course requirements are:

EREQUISITE COURSEWORK		
Course(s)	Semester Hours	Quarter Hours
General Chemistry I and II with lab components	8	12
Organic Chemistry I and II with lab components	8	12
Biochemistry or Cell & Molecular Biology	3	4
General Biology I and II with one lab or lab equivalent	8	12
Microbiology	3	4
Human Physiology*	3	4
Physics	3	4
Calculus	3	4
Statistics	3	4
Public Speaking	3	4
English Composition I and II	6	9
General Education Requirements**: Psychology, Economics, and two additional courses in the Humanities or Social and Behavioral Sciences	12	18
Total	63	91 (est.)

*If taking a combined Anatomy and Physiology course, both Anatomy and Physiology I and II must be taken to fulfill the Physiology course requirement.

** General Education requirements are waived for applicants who have or will be receiving a Bachelor's degree or US equivalent prior to matriculation in the pharmacy program.

For an in-depth overview of admission requirements, how to apply, and key dates visit the Admissions website at <http://pharmacy.cnsu.edu> and the PharmCAS School Pages at www.pharmcas.org.

Advanced Placement Exams (AP)

AP exam scores of 3 or higher, with 4 being preferred, will be accepted for prerequisite coursework and/or general education requirements. AP credit must be reported by subject and credit and must be mailed directly from your institution or testing services to the College of Pharmacy. Additionally, the AP exam must have been taken no greater than nine years from the date of matriculation. Please note, AP exam scores will only count towards the first course in a series of science courses. For instance, an AP exam score of 3 or higher for chemistry would only count towards the General Chemistry I requirement.

CNUCOP College Board AP Code is 7306.

Professional and Technical Standard Requirements

CNUCOP endeavors to select applicants who have the ability to become highly competent pharmacists. The college adheres to the guidelines promulgated by the American Council for Pharmacy Education in its "Guidelines for Accreditation Standards." Within these guidelines, the college has the freedom and ultimate responsibility for the selection of students; the design, implementation, and evaluation of its curriculum; the evaluation of students; and the determination of who should be awarded a degree. Admission and retention decisions are based not only on satisfactory academic achievement, but also on non-academic factors that serve to ensure that the candidate can complete the essential functions of the academic program required for graduation. The professional and technical standards, as distinguished from academic standards, refer to those physical, cognitive, and behavioral abilities required for satisfactory completion of all aspects of the curriculum, and the development of professional attributes required by the faculty of all students at graduation. The essential abilities required by the curriculum are in the following areas: Motor, sensory, verbal and written communication, intellectual (conceptual, integrative, and qualitative abilities for problem solving and decision-making), and the behavioral and social aspects for the performance of the profession of pharmacy.

Pharmacy is a physically and mentally demanding profession in which practitioners are asked to place the interests of their patients above their own which requires commitment to a life of service and dedication to continuous learning. The rigorous four year pharmacy school curriculum is where Students begin to develop the qualities necessary for the practice of pharmacy. It is during this period of professional pharmacy education that the candidate acquires the foundation of knowledge, attitude, skills and behaviors that he or she will need throughout his or her professional career. The abilities that pharmacists must possess to practice safely are reflected in the technical standards that follow. Students to the CNUCOP program must be able to meet these standards.

Technical Standards

Visual

Students must be able to observe and participate in experiments in the basic sciences. In order to make proper clinical decisions, Students must be able to observe a patient accurately. Students must be able to acquire information from

written documents, films, slides or videos. Thus, functional use of vision is necessary (close and at a distance).

Oral-Auditory

Students must be able to communicate effectively and sensitively and rapidly with patients (must be able to speak and hear) and members of the health care team (both verbal and written). Students must be fluent in English. In emergency situations Students must be able to understand and convey information essential for the safe and effective care of patients in a clear unambiguous and rapid fashion. In addition, Students must have all the ability to relate information to and receive from patients in caring and confidential manner.

Motor

Students must possess the motor skills necessary to perform palpation, percussion, auscultation, and other diagnostic maneuvers. Motor skill demands require reasonable endurance, strength, and precision. A candidate should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients as well as complete the CPR and First Aid component of the program. Such actions require coordination of both gross and fine muscular movements, equilibrium and functional use of senses, of touch, and vision.

Sensory

Students need enhanced sensory skills including accuracy within specific tolerances and functional use for laboratory, classroom, and clinical experiences. Students who are otherwise qualified but who have significant tactile sensory or productive disabilities must be evaluated medically. These disabilities included individuals who were injured by significant burns, have sensory motor deficits, or cicatrix formation.

Professional Standards

Students must demonstrate the judgment and emotional stability required for full use of their intellectual abilities. Possess the perseverance, diligence, and consistency to complete the College of Pharmacy curriculum and prepare to enter the profession of pharmacy.

Students must: exercise good judgment in the treatment of patients; function within both the law and ethical standards of a healthcare professional; be able to work effectively and professionally as part of a team during the pharmacy curriculum and as a member of a health care team after graduation.

Students must be able to participate in a culturally diverse classroom and practice environments; be sensitive and behave in a professional manner during interactions with patients, their families, and with health care personnel; maintain regular, reliable, and punctual attendance for classes, experiential education and clinical responsibilities; and be responsible for contributing to collaborative, constructive learning environments, accept constructive feedback from others, and respond with appropriate modification in a professional manner.

Strength and Mobility

Students must have sufficient posture, balance, flexibility, mobility, strength and endurance for standing, sitting, and participating in the laboratory, classroom and clinical sites.

Cognitive

In order to effectively solve clinical problems, Students must be able to measure, calculate, reason, analyze, integrate and synthesize in a timely fashion. In addition, they must be able to comprehend three-dimensional relationships and to understand the spatial relationships of others.

Social

Students must possess the emotional health required for the full utilization of their intellectual abilities, the exercise of good judgment for the prompt completion of all responsibilities, and for the development of effective relationships with patients. Students must be able to tolerate physically taxing workloads and function effectively under stress. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical problems of patients.

The unpredictable needs of patients are at the heart of becoming a pharmacist. Academic and clinical responsibilities of students must require their presence during day and evening hours. Students will be considered not only for their scholastic accomplishments, but also on their physical and emotional capacities to meet the full requirements of the school's curriculum, and to graduate as skilled and effective practitioners of pharmacy.

Transferring from Other Institutions

Transfer requests for entry to the Doctor of Pharmacy program at California Northstate University College of Pharmacy (CNUCOP) will be reviewed and determined for acceptance on a case-by-case basis, based on specific provisions and contingent on space/seat availability. Students interested in transferring to CNUCOP must complete a Transfer Student Application available on the CNUCOP webpage. COP does not have any articulation or transfer agreements with any other college or university at this time to accept students into the CNUCOP PharmD program.

Credit for coursework completed at other institutions for recognition of advanced standing at CNUCOP will be transferred subject to the following considerations.

- The comparability of the completed coursework with CNUCOP coursework;
- The appropriateness of the completed coursework towards meeting CNUCOP PharmD degree requirements.
- COP does not grant credit for prior experiential learning other than IPPEs completed at an ACPE accredited School/College of Pharmacy that have been deemed equivalent to COP degree requirements and eligible for transfer.
- Determination of both the institutional source and quality of professional coursework, as reflected by the accreditation standing of the originating institution.

A student approved to transfer does not guarantee that the transferring student will be granted entry into the same

academic year of standing as that of the pharmacy school/college of origin.

Acceptance of transfer courses and the award of University transfer credit shall not express nor imply that all transfer credits will be fully accepted towards advanced standing for the PharmD degree requirements at CNU.

The total number of credits transferred shall not exceed the maximum allowable units as defined by accrediting institutions.

Transfer applicants must meet the same eligibility and progression policy standards required of students enrolled at CNUCOP.

The institutional residency requirement for a transferring student includes a minimum of two years of enrollment as a full-time student at CNUCOP to receive the PharmD degree from CNUCOP.

International Applicants

California Northstate University College of Pharmacy accepts applications from international students provided they meet the same prerequisite requirements as U.S. applicants. CNUCOP will work with international students admitted to the PharmD program to complete the I-20 and will report the student's status to SEVIS. Please see the International Student Handbook available on the CNUCOP website for detailed instructions and timeline.

International (including Canadian) applicants must submit all prerequisite coursework taken from non-US institutions to the World Education Services (WES), Inc. for an evaluation of coursework. The foreign coursework evaluation must be submitted directly to PharmCAS. International applicants must complete all of the prerequisite course requirements.

International applicants who have not completed at least two years and at least 48 semester units (72 quarter units) at a US college or university are required to take the TOEFL or IELTS exam. Exam scores are valid for a two year period from the date of the exam.

The minimum total TOEFL IBT score is 88 with minimum section score requirements of

- Reading: 20
- Listening: 20
- Speaking: 25
- Writing: 23

The minimum total IELTS score is 6.5 with minimum section score requirements of:

- Reading: 6.5
- Listening: 6.5
- Speaking: 7.5
- Writing: 6.0

The "two semesters of English Composition" requirement will be considered as met for foreign applicants who take English Composition at an English-speaking institution as part of their degree program.

Visa services information is located under International Students (Visa Services)**Error! Reference source not found.** (pg. **Error! Bookmark not defined.**).

FINANCIAL SERVICES & DISCLOSURES on page 149 of this catalog.

Student Enrollment Agreement

The Student Enrollment Agreement must be completed and submitted to the college in order to show intent to enroll in the program. The Student Enrollment Agreement is a legally binding contract when it is signed by the incoming student and accepted by the institution.

By signing the Enrollment Agreement, the student is acknowledging that the catalog, disclosures, and information located on the website have been made available to the student to read and review.

Any questions or concerns regarding the Student Enrollment Agreement should be directed to the college or university department.

Catalog, Performance Fact Sheet, and Website

Before signing the Student Enrollment Agreement, the prospective student is strongly urged to visit the University and College website at www.cnsu.edu, and to read and review the CNU General Catalog and School Performance Fact Sheet (SPFS). The SPFS contains important performance data for the institution. The Catalog contains important information and policies regarding this institution.

Student's Right to Cancel, Withdraw, and Refund

You have the right to cancel the Student Enrollment Agreement until 12:01 AM on the first calendar day after the first classroom instruction session attended, or until 12:01 AM on the eighth calendar day after a student has signed the Enrollment Agreement, whichever is later.

Cancellation shall occur when you give written notice of cancellation to the Admission Office at the University's address shown at the top of the first page of the Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of cancellation sent by hand delivery, email, or facsimile is effective upon receipt by the University. Written notice of cancellation sent by mail is effective when deposited in the mail properly addressed with postage prepaid.

After the cancellation period described above, you have the right to withdraw from the University at any time. Withdrawal shall occur when you give written notice of withdrawal to the Registrar at the University's address shown at the top of the first page of the Enrollment Agreement. When withdrawing from the college/university, please complete the Official College Withdrawal form available from the Registrar's request form website: <http://www.cnsu.edu/office-of-the-registrar/registrar-services>. Do not use this form to indicate your intent to cancel your enrollment agreement.

For information on refund calculations due to cancellation or college withdrawal, please see the

Tuition & Fees

All tuition, fees, expenses, and policies listed in this publication are effective as of August 2018 and are subject to change without notice by California Northstate University.

In the tables below, P1, P2, P3, and P4 indicate the student's year in the program (e.g. P1 is a first-year student; P2 is a second-year student, etc.).

Tuition is charged on a full-time, semester basis, except during the fourth program year in which tuition is charged on a full-time, annual basis. Generally, tuition and fees are charged to a student's account thirty (30) days prior to the start of each semester term. The above is based on the assumption that a student will attend each semester term on a full-time basis, which allows for a student to graduate after successfully completing four (4) years of coursework consisting of 147 semester credit hours.

International students are not charged additional fees or charges associated with vouching for student status.

Payment deadlines, loan obligations, refund calculations due to cancellation and withdraw, and the Student Tuition Recovery Fund (STRF) disclosures are located in FINANCIAL SERVICES & DISCLOSURES (page 148).

2018-2019 PharmD Tuition & Fees

Tuition & Fees	Amount	Class
Enrollment Fee (nonrefundable)	\$250.00	P1
Tuition	\$48,660.00	P1, P2, P3, P4
Student Activity Fee	\$300.00	P1, P2, P3
Pharmacy Lab Fee / Skill Lab Fee	\$300.00	P1, P2, P3
Technology Fee	\$50.00	P1, P2, P3
Orientation Fee	\$75.00	P1
Immunization Fee	\$95.00	P1
BCLS/CPR Certification Fee	\$40.00	P1
BCLS/CPR Certification Fee	\$30.00	P3
NAPLEX Review	\$250.00	P3
Graduation Fee ¹	\$250.00	P4
STRF Fee per \$1000 ²	\$0.00	P1, P2, P3, P4
P1 Total Estimated Tuition & Fees per Year ³	\$49,770.00	
P2 Total Estimated Tuition & Fees per Year ³	\$49,310.00	
P3 Total Estimated Tuition & Fees per Year ³	\$49,590.00	
P4 Total Estimated Tuition & Fees per Year ³	\$48,910.00	

Total estimated cost for the 4-year Doctor of Pharmacy program ranges from \$200,000 to \$220,000.

Estimated Other Educational Related Costs ⁴	Amount	Class
Health Insurance premium ⁵	\$3,200.00	P1, P2, P3, P4
Books and Supplies (estimate)	\$1,600.00	P1, P2, P3, P4
Room and Board ⁶	\$17,454.00	P1, P2, P3
Transportation ⁶	\$3,485.00	P1, P2, P3
Room and Board ⁶	\$23,272.00	P4
Transportation ⁶	\$4,648.00	P4
P1 Total Estimated Cost per Year ⁷	\$75,509.00	
P2 Total Estimated Cost per Year ⁷	\$75,049.00	
P3 Total Estimated Cost per Year ⁷	\$75,329.00	
P4 Total Estimated Cost per Year ⁷	\$81,630.00	

¹ Covers regalia, graduation dinner, diploma cover, transcript, etc.

² The STRF fee is \$0.00 per \$1,000 of institutional charges.

³ Based on estimated annual tuition increases of 3% to 5%. Range amounts are estimated and nonbinding on CNU.

⁴ Costs and expenses a student may incur during the applicable year of the PharmD program, whether or not paid directly to CNU or CNUCOP. These expenses include estimated out-of-pocket cost of living expenses for the year.

⁵ Provided and charged by outside healthcare plan insurance company; optional, estimated, and may increase or decrease based on number of participants and other factors.

⁶ Estimated amounts of individual housing, food, and transportation costs, not operated by, charged by, or paid to CNU.

⁷ Includes tuition, fees, and educational related costs from Tuition & Fees chart.

Scholarships

In the past, several companies have helped California Northstate University's students finance their education through scholarships. Some of these companies include: Albertson's, CVS, Pharmacist Mutual Insurance Company, Safeway, SuperValu Drug Stores, and Walgreen's. These scholarships range from \$500 to \$2,000. Criteria for scholarships vary by the specific donors and are awarded in the late fall and early spring.

The Northern California Education Foundation and the College of Pharmacy award various scholarships to students during the academic year. The scholarships are awarded on the basis of financial need, academic performance, leadership, and promoting diversity in the profession.

Information regarding various scholarships can be found on the CNU Student Financial Aid Tools webpage, <http://www.cnsu.edu/student-financial-aid-office/student-financial-aid-tools/student-financial-aid-tools>, as well as within the Grants and Scholarships section of this catalog, page 148.

General Policies

Orientation and Registration

First year professional orientation is mandatory for all new students. The Office of Student Affairs and Admissions must be notified of any absence due to illness or emergency, if a student is not able to attend the scheduled orientation. The student will be required to provide documentation for the absence and complete a make-up orientation within the first week of school, in addition to attending scheduled classes and maintaining course requirements.

Registration for classes requires:

1. All admission contingencies be fulfilled.
 - a. Admission contingencies include proof of medical insurance coverage, all required immunizations, a cleared background check, and any other institutional requirements. Students may enroll in the Student Health Insurance Plan to satisfy the insurance requirement. For a complete list of required immunizations, please review the [COP Student Handbook](#)
2. Completion of all new student paperwork.
3. Financial aid clearance from the Financial Aid Office.

Students who are not in compliance with institutional requirements or who have a financial hold at the time of registration are required to satisfy the requirement and submit an approved Add/Drop form by the end of the Add/Drop period.

New students must submit the Emergency Contact and Medical Information Form to the Office of the Registrar by the end of Orientation. To make updates, a new form must be submitted to the Registrar. The Office of the Registrar requires submission of the Authorization to Release Student Records if a student desires to grant a personal third-party (such as a parent, spouse, etc.) access to his/her student record. Please refer to the ["Directory Information and Access to Student Records"](#) section of this catalog for more information.

New students should review their local, home, and billing contact information via the Student Portal and update as needed. It is the student's responsibility to maintain valid contact information throughout their enrollment at CNU. Instructions for accessing the Student Portal is sent by the CNU IT department to the student's CNU email address.

Registration is conducted by the Registrar prior to the start of each semester for new and continuing students. Students with business, financial, or other registration holds on their account will not be registered until the Registrar is notified that the hold has been cleared. Students who are in compliance with institutional requirements or who have a hold on their student account at the time of registration are required to satisfy the requirement and may also be required to submit the Course Add/Drop form by the end of the Add/Drop period to register or make schedule changes.

All accepted students who matriculate must have all official transcripts for all courses taken since high school as well as evidence of high school diploma or equivalent on record in

the Admissions Office by September 30 of the Fall semester that they matriculate.

Intern License

Enrolled CNU students must have a valid, current California Pharmacy Intern License. Incoming students are required to apply for a Pharmacy Intern License at the start of the Professional Year 1 (P1). Accepted students must download the application and complete the requirements prior to the orientation program. During orientation week these applications are collected by the Office of Experiential Education and submitted to the California Board of Pharmacy. Once the applications are received and processed, the California Board of Pharmacy mails the Intern License to the Office of Experiential Education where a copy is kept in the student's permanent file.

It is not possible to participate in the experiential component (the IPPE or APPE rotations) without a current California Pharmacy Intern License.

Address Where Instruction Will Be Provided

Class sessions are conducted at 9700 West Taron Drive, Elk Grove CA 95757. Experiential education, clinical rotations, and service learning activities are conducted at assigned professional clinical locations and community sites as established by agreement among the student, professional preceptor, and College.

Catalog, School Performance Fact Sheet, and Website

Before signing the Student Enrollment Agreement, students are strongly encouraged to visit the College website at <http://pharmacy.cnsu.edu/> and to read and review the CNU General Catalog and School Performance Fact Sheet (SPFS). The SPFS contains important performance data for the institution. The Catalog contains important information and policies regarding this institution.

By signing the Enrollment Agreement, the student is acknowledging that the catalog, disclosures, and information located on the website have been made available to the student to read and review.

Instruction/Course Delivery

The College of Pharmacy offers a didactic component of the curriculum that is in a classroom instruction setting comprised of an initial sequence of biomedical, clinical, pharmaceutical, and social and administrative science courses, followed by a series of organ-system based modules that integrate pathophysiology, pharmacology, medicinal chemistry, and pharmacotherapy concepts into the management of acute and chronic conditions.

The experiential component of the curriculum includes 300 hours of introductory pharmacy practice experience over the first three academic years and 1440 hours of advanced

pharmacy practice experience in the final academic year. Students complete the pharmacy practice experience throughout various offsite locations.

The College of Pharmacy provides learning experiences through the use of team-based learning to deliver the

curriculum. Team-based learning (TBL) prepares students to play a key role in a multidisciplinary team setting.

All courses are delivered in English and English language services are not provided.

Academic Policies & Procedures

Academic Calendar

The academic calendar consists of two didactic course semesters lasting approximately 15 weeks long and a summer term lasting approximately 11 weeks. Second and third-year students complete IPPE and fourth-year students complete APPE experiential education modules throughout the calendar year as assigned.

Credit Hour Policy

For each 15 week semester, 1 credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in class time) and a minimum of 2 hours of out-of-class student work (homework) (TBL). 1 credit is assigned per 3 hours each week of student time spent for courses that include workshop and/or laboratory time, and for experiential education (AL/LAB/EL). Students complete 300 hours of IPPE and 1440 hours of APPE as part of their experiential education training (EL).

Code	Course Type	Code	Course Type
AL	Active Learning course	LEC	Lecture course
EL	Experiential Learning	TBL	Team- Based Learning course
LAB	Laboratory course		

Grading

A letter grade equal to or greater than a C is considered satisfactory performance (passing) for completion of a course. In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Grade	Definition	GPA Unit
A	90.0- 100%	4.00
B	80.0- 89.9%	3.00
C	70.0- 79.9%	2.00
D	60.0-69.9%	1.00
F	<60%	0.00
I	Incomplete	Not in GPA
W	Official Course Withdrawal	Not in GPA

Note: Individual course coordinators reserve the right to change the grading scale for a specific course and/or round percentages as they see fit for their specific course.

Incomplete or Withdrawal from a Course

During a semester, a student may withdraw or fail to complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such cases, the course coordinator may give a grade of Incomplete for the course.

All missed assignments and exams must normally be completed within 10 business days after the end of the semester in which the Incomplete was received, or within a timeframe determined by the course coordinator. Failure to

successfully complete the course will result in an earned F grade for the course and placement on Academic Probation.

Withdrawal from a course must first be approved by the course coordinator and the Office of Academic Affairs. Where a student has had to withdraw from a course a grade of W will be applied and the student will have to repeat the course next time it is offered.

GPA Calculation

To calculate cumulative GPA, letter grades will be converted to their numeric grade point value using the grading convention table above, and then added together. The sum is then divided by the number of courses taken. Grades received in retaken classes will be used in determining cumulative GPA. The grade initially received in the course will not be included in the calculation, but is recorded on the transcript.

Academic Honors

The Registrar compiles a list of full-time P1-P3 students who have demonstrated academic excellence in each didactic semester. Honors are noted on the student's transcript for each qualifying semester.

President's List: 3.75-4.00 GPA

Dean's List: 3.50-4.00 GPA

Rho Chi Honor Society – Invitation requires a minimum 3.50 cumulative GPA and class standing within the top twenty percent (20%) determined after the first semester of the student's second (P2) year. New members will be inducted into Rho Chi in the Spring semester of their P2 year. Any P2 or P3 students who become newly eligible in subsequent semesters will be inducted in the spring semester of their P3 year.

Course Grade Appeal Policy

Students may file an appeal if there is a disagreement with a final course grade. Students wishing to appeal a grade received in a College of Pharmacy course must follow the six steps listed below.

First Step - Student statement to course coordinator

A student can initiate the formal grade appeal process in writing using the Course Grade Appeal Form. The student must complete sections I and II and submit the form to the Course Coordinator within 3 business days of online grade posting.

The Course Coordinator, in collaboration with the Department Chair, will respond to the student's grade appeal in writing within 5 business days of receipt of the appeal. The Course Coordinator will return copies of the grade appeal form, with section III completed, to the Designated Academic Official for Academic Affairs and the Registrar, while returning the original copy to the student in case they wish to pursue the matter further. If the appeal is approved by the Course Coordinator and Department Chair, the Course Coordinator

returns the completed grade appeal form to the Office of the Registrar along with a completed Grade Change Form. If the appeal is denied, and the student accepts the outcome, the process ends here.

Second Step - Appeal to the Designated Academic Official for Academic Affairs

If the appeal is denied by the course coordinator/department chair, and the student wishes to pursue the matter further, the student has 3 business days from the date the Course Coordinator returns the form to sign and complete section IV of the form and submit it to the Designated Academic Official for Academic Affairs.

The Designated Academic Official for Academic Affairs will render a decision in writing to the student within 5 business days of receipt of the formal appeal. If the appeal is approved by the Designated Academic Official for Academic Affairs, the form will be returned to the Office of the Registrar with a completed Grade Change Form. If the appeal is denied, and the student accepts the outcome, the process ends here.

In the event the Course Coordinator is the Designated Academic Official for Academic Affairs, the student may appeal the decision directly to the Dean.

Third Step - The Dean of the College

If the Designated Academic Official for Academic Affairs denies the appeal, and the student wishes to pursue the matter further, the student has 3 business days from receipt of the decision from the Designated Academic Official for Academic Affairs to submit an appeal in writing to the College Dean. The Dean will render the final decision in writing within 5 business days of receipt of the formal appeal. The final Course Grade Appeal form must be submitted to the Office of the Registrar for processing.

Milestone and Capstone Exams

An examination on course material presented during the previous program years will be administered yearly. The exam for the P1 and P2 classes is referred to as the Milestone Exam while the exam for the P3 class is referred to as the Capstone Exam. Each exam is made of multiple choice questions developed by faculty, practitioners, or outside trainers. Exam questions cover all courses offered up to the students' present status in the program. The P1 Milestone Exam covers the content of the first year courses including the top 100-200 drugs and pharmacy calculations. The P2 Milestone Exam primarily covers material presented in courses offered during the immediate previous year with some general concept questions from first year curriculum, including calculations. The P3 Capstone Exam primarily covers pharmacotherapeutic content presented in all three didactic years at CNUCOP, including calculations and is designed to introduce and help develop the skills necessary for taking the NAPLEX and CJPE Academic.

Alert Policy

An Academic Alert is designed to allow a course coordinator to refer a student for academic support at any point during the semester. Such a step may be taken based on a quantifiable assessment such as an exam grade or a

cumulative iRAT score. It could also be based on observation of behavior, such as participation in team work.

Process

The course coordinator activates the academic alert and requests to meet with the students within 5 business days. A plan for academic support will be determined by the course coordinator and the student. The completed Academic Alert form will be submitted to the Office of Academic Affairs (OAA) which then notifies the student's academic advisor. The OAA may request to meet with students who have alerts in multiple courses. The Office of Student Affairs (OSA) will also be notified to provide tutoring assistance if requested by the student. The student is encouraged to work with the course coordinator, academic advisor, the OAA, and OSA, to assure all resources are being utilized to improve academic performance.

Academic Progression

The purpose of the Academic Progression policy is to ensure students reach and maintain high standards of learning throughout their time at COP and accomplish all course learning objectives. A grade of D or below in a course indicates a lack of understanding of the fundamental concepts of the course material necessary for progression. The policy is intended to allow students opportunity to remediate or repeat when they do not pass a course first time. A student must complete the program within 5 years (60 calendar months) from the time they registered and attended their first core course.

For a student to successfully progress through the COP PharmD program they must pass all courses each semester with at least a grade of C and maintain a minimum grade point average (GPA) of 2.0. Students will only have the opportunity to remediate a maximum of four courses throughout the didactic Program; hence more than 4 D grades will result in dismissal. Failing more than two courses will also result in dismissal. Students will not be allowed to take a course if prerequisite course(s) have not been passed. The consequence if a student earns a letter grade lower than C in any course in the curriculum, is shown in the table below:

	Consequence
1 or 2 Ds	Remediated all courses graded D; optional Academic Probation if remediation is unsuccessful, provided the course is not a prerequisite for future course(s)
3 or 4Ds	Remediate all courses graded D; mandatory Academic Probation if remediation is unsuccessful in three or more courses
5 or more Ds	Dismissal
1 or 2 Fs	Repeat failed course(s); mandatory Academic Probation
3 or more Fs	Dismissal
Students will only be allowed to remediate a maximum of 4 courses in any one semester and over the duration of the PharmD program; further Ds will result in dismissal; students will be dismissed if cumulative GPA at the end of year 1 or later falls below 2.0; the GPA will be calculated on completion of remediation; failed	

courses must be repeated; a failed course can only be repeated once.

Remediation

In the event of a student receiving a D or F grade in a course the instructor will complete a Remediation Form which will be used to notify Instructors of a student's eligibility to remediate or repeat a course. Eligibility is determined by the Office of Academic Affairs based on the number of courses where an F or D grade is achieved in a semester. If eligible, Instructors will make arrangements with the student to remediate.

- a. Remediation will consist of taking a comprehensive remedial examination that covers the material presented throughout the course. Only a course grade of D is eligible for remediation. A course grade of F must be repeated next time it is offered.
- b. The format of the remediation examination is at the discretion of the course coordinator.
- c. Preparation for remedial examinations is the sole responsibility of the student, and may consist of, but is not limited to, self-study, tutoring, and/or meetings with the course instructor(s) as the student and instructor(s) feel necessary for the student to gain a fundamental understanding of the course material.
- d. Satisfactory mastery of the material will be decided by the course coordinator/director/instructor(s), but generally will be a score of at least 70 percent on the comprehensive remedial examination.
- e. Remediation must be completed within 10 business days after the last exam to ensure timely submission of grades to the Registrar. Failure to remediate within this timescale will result in dismissal, unless there are exceptional circumstances making remediation within this time frame impossible.
- f. Faculty will report a grade of C to the Registrar for the course for which the remedial comprehensive examination was satisfactorily completed.
- g. The grade of C earned as a result of passing the remedial examination will be used in the calculation of the student's cumulative GPA. A minimum cumulative GPA of 2.0 must be maintained even if remediation is successful.
- h. If the course is not successfully remediated, the initial D recorded for the course will remain on the transcript and be used in the calculation of the student's GPA.
- i. Any student who receives an F or fails to remediate a D will be placed on Academic Probation.
- j. Remediation is not a substitute for lack of full course participation. To be eligible for remediation a student must have taken all exams, course assessments, and any graded activities (unless excused absences for these have been permitted).

Academic Probation

If a student fails a course, or if remediation of a D in three or more courses is unsuccessful, the office of Academic Affairs will automatically place the student on academic probation and notify them in writing of the action. When a student has been placed on academic probation the following apply:

- a. Academic Probation may mean a student is placed on a five-year schedule to complete the program. The program must be completed within five consecutive years of the date of the first day the student begins the program.
- b. A student on Academic Probation will not be allowed to progress to any course that requires the unsuccessfully completed course as a prerequisite.
- c. Within one week of the date that the student receives notification of his/her academic probation, the student will meet with the Office of Academic Affairs, or designated individual, to discuss their academic probation and to develop their curricular plan.
- d. Once the plan has been agreed the Office of Academic Affairs (or designated individual) will draw up documentation outlining details of the academic plan, which the student must sign. Failure to sign will mean the student will not be allowed to continue in the program. A copy of the plan will be shared with the Office of the Registrar, the Business Office, and the Office of Experiential Education.
- e. While on academic probation the student may not hold office in any College or University organization.
- f. In the case of a failed course, the student must successfully pass the course the next time it is offered to continue on the Program.

A student who achieves a grade of F in any course may repeat the course only once. Thus, failure to pass a repeated course will result in dismissal from the program.

Appeal of Academic Probation

There is no appeal process for students placed on Academic Probation.

IPPES and APPEs

A failed IPPE or APPE cannot be remediated except by retaking the rotation. If the IPPE or APPE is not successfully remediated the student will be dismissed from the program. If more than one Block is failed the student will be dismissed. Having to retake an IPPE may delay entry into the fourth year of the program, while having to retake an APPE block may delay graduation from the program. Students should refer to the EE Handbook for specific requirements regarding progression through IPPES and APPEs.

Dismissal

A student may be dismissed from CNUCOP if any of the following conditions exist and the Professional and Academic Standards Committee determines that dismissal is warranted:

- a. Failure to meet any terms of **Remediation** or **Academic Probation**
- b. Conduct subject to dismissal as described in the Honor Code section of the Student Handbook
- c. Foregoing an academic semester without obtaining an approved leave of absence
- d. Failure to complete the degree requirements in five consecutive academic years from the date of the first day the student begins the program.

Appeal of Dismissal

Students dismissed from the College may appeal the decision in writing within ten (10) business days of notification of

dismissal to the Dean of the College. The Dean will render a decision in writing within 10 business days of receipt of the formal written appeal. The Dean's decision is final.

Graduation & Commencement

Graduation Requirements

Students at CNUCOP are approved to receive the Doctor of Pharmacy degree by the COP faculty and the Board of Trustees (BOT). Students must meet the following requirements:

- Has conducted oneself in an ethical, moral, professional, and lawful manner;
- Has satisfactorily completed all of the CNUCOP curricular requirements in a timely fashion, not to exceed five (5) years from the date of initial enrollment (including approved leave of absence);
- Has fulfilled all tuition and financial requirements and completed all necessary paperwork for CNUCOP;
- Attends graduation and commencement ceremonies in person. Students cannot attend commencement if they have not fulfilled all the above requirements. Under special circumstances the Dean of the College may excuse the attendance requirement.

Students must file a completed Petition to Graduate with the Office of the Registrar by the semester deadline.

Degree Honors

Students who meet the cumulative GPA listed below will be honored with special recognition at graduation. The honor is noted on the degree.

Summa Cum Laude: CGPA of 3.90 or higher

Magna Cum Laude: CGPA of 3.70- 3.89

Cum Laude: CGPA 3.50-3.69

Commencement

Each student is required to attend commencement and wear traditional academic regalia consisting of a cap, gown, and academic hood. Hoods of academics regalia are conferred upon the graduates at commencement by faculty. The hood is lined with the California Northstate University colors of cabernet and gold, and is adorned with olive green denoting Doctorate of Pharmacy. Honor cords and/or medallions will distinguish honor graduates. Any additional ornamentation must signify recognized College organizations and must be approved in advance of commencement.

Attendance Policy

Students are required to attend all classes and all courses, including laboratory sessions, IPPES, and APPEs, on a regular basis. The University/College recognizes that circumstances may cause a student to miss an occasional class. The student may make up the work missed if the absence has been excused. What constitutes an acceptable rate of class attendance is a matter between students and their instructors, although the University/College expects instructors to maintain reasonable standards. Students requiring absence during a semester should refer to the Excused Absence Policy and the Leave of Absence Policy.

Pharmacy Practice Experience

Refer to Introductory Pharmacy Practice Experience and Advanced Pharmacy Practice Experience manuals for attendance information.

Excused Absence Policy

The College of Pharmacy expects students to attend and participate in all classes, participate in all introductory and advanced practice experiences, and complete all exams and assessments as scheduled (together defined as "coursework"). Missed coursework has the potential to disrupt individual and team learning, invalidate assessment of learning outcomes, create unfair advantages, and divert faculty and student resources away from teaching and learning. However, occasionally an absence from coursework will be unavoidable.

A student may request an excused absence for personal, emergency, compassionate, professional, or health-related reasons. Please refer to detailed policy for a full list of reasons for which an excused absence may be requested.

High stakes absence requests will be held to the highest standard for documentation and communication. A student requesting to receive an excused High Stakes Absence must satisfy FIVE criteria described in the detailed policy available on the website.

A student may request no more than three academic days of excused absences per semester or APPE Block. In total, excused and unexcused absences shall not exceed five academic days per semester or three per APPE Block. Absences exceeding five academic days per semester may require a student to request a leave of absence or a withdrawal. Please contact the Office of Academic Affairs for further information.

A student seeking an excused absence should complete the Excused Absence Request Form (available from the CNUCOP website) and seek the Course Coordinator's signature for each missed course within 3 business days upon return to courses or campus. The Course Coordinator will determine if an absence will be excused or unexcused for their course based on the categories and criteria outlined in the detailed policy; the completed form should be emailed or handed in to the Office of Academic Affairs for final approval.

Professional Conferences

California Northstate University College of Pharmacy supports the learning and professional development opportunities professional conferences can provide students; thus the college has a policy to allow student participation and attendance. A student in good academic standing, and not on Academic Alert, may submit an excused absence request to attend a professional conference. The request must be submitted at least 10 business days in advance of the professional conference attendance.

Approved Absences

A student may request an excused absence for the following circumstances:

- Medical (self or immediate family)

- Military Duty
- Immigration & Naturalization
- Emergency
- Jury Duty
- Legal
- Bereavement (Immediate Family)
- Professional Conference (requires verification of academic standing)
- Involvement in traffic accident documented by law enforcement report

Course Add /Drop Policy

Changes in course registration may be made without penalty up to the end of the first week (5 class days) for fall and spring terms. Specific add/drop deadlines will apply for courses offered during the summer and winter terms (e.g. IPPE courses, research courses). These deadlines can be found in the IPPE/APPE Handbook, but will generally be five (5) days from the deadline for registration.

Students must obtain permission from the course director or coordinator for each course added to their official registration during the add/drop period. Permission will be signified by the course director or coordinator's signature on the add/drop form. Students must also obtain approval from the Office of Academic Affairs. Approval from the Office of Academic Affairs will be indicated by the signature on the Course Add/Drop form.

Even though a student obtains approvals and signatures, the completed Course Add/Drop form must be submitted to the Registrar during the add/drop time period in order to be valid. Students may not make changes in their course registration after the add/drop period has ended.

For experiential education courses, please refer to the experiential education manuals. Students are not allowed to drop a rotation once it has begun. The student must file for a Leave of Absence.

Leave of Absence

A leave of absence is approved for a specific period of time, not to exceed more than a year, and the institution agrees to permit the student to return to the University/College without formally reapplying for admission to the University/College.

The student will be required to return to the University/College at the beginning of the semester in which the leave was granted. All students requesting a Leave of Absence should fill out a Leave of Absence Form after discussing their decision with the Designated Academic Official for Academic Affairs. If a student is requesting a leave of absence, the Designated Academic Official for Academic Affairs must sign the form. If the student is approved for a leave of absence, the student is eligible to return without reapplication if the absence is within the approved time frame. A student requesting a leave of absence should also meet with the Financial Aid Manager and Business Office to determine impact of their decision and any requirements needing fulfillment prior to the leave.

Non-attendance does not constitute notification of intent to apply for leave of absence status. The date of leave status is the date the Registrar receives the signed form.

Return from Leave of Absence

The Office of the Registrar will contact a student on Leave of Absence (LOA) approximately 90 days before the LOA expires via certified US mail and the email addresses on record. The student will receive the Intent to Return Form and instructions for re-enrollment and for withdrawing from the University. Submission of the completed Intent to Return Form to the Office of the Registrar is required to be eligible for course and APPE/IPPE registration.

The student will have 30 days of the date of the notice to reply to the Office of Registrar with their intent to return to the University/College or officially withdraw.

If a student does not return within 1 year of approved LOA they are no longer eligible to return as a continuing student and must reapply to the University/College for admission (See Withdrawal/Readmission in this handbook).

Withdrawal from the College/University

Students may voluntarily withdraw from the University/College at any time during the academic semester. The student will earn a "W" grade for a course(s) that is (are) not complete at the time the withdrawal is initiated. Informing CNUCOP, your academic advisor or instructor does not constitute official withdrawal from the program.

All withdrawals must be processed by the Office of the Registrar. Students must submit a completed Official University/College Withdrawal form to the Office of the Registrar. The form is available online at <http://www.cnsu.edu/office-of-the-registrar/registrar-services> and in the Office of the Registrar.

A student must meet with and receive signatures from the following departments before the form can be filed with the Office of the Registrar: Office of Academic Affairs, Business Office, Financial Aid, and Office of the Registrar.

A student who officially withdraws from the University/College is entitled to apply for readmission.

Readmission to the College/University

Students who fail to return from a leave of absence, who are dismissed, or withdraw from the program can reapply for admission. Candidates seeking readmission must apply through PharmCAS and adhere to the guidelines for all new applicants. Applicants for readmission will be evaluated by the admissions committee. The committee's decision is final. Applicants will not be given special consideration over new applicants and will be evaluated equally on their overall academic record.

If readmitted, the student may be required to restart the program beginning with the first professional year, regardless of their professional standing prior to dismissal or withdrawal.

Complaint/Grievance Policy

All academic related complaints regarding a course, courses or a faculty member should be filed with the Associate/Assistant Deans of Academic Affairs or Student

Affairs. An electronic Grievance/Complaint form is available at <http://pharmacy.cnsu.edu/forms>.

For complaints related to accreditation standards, please see Accreditation Information on page 9 of this catalog.

COP Course Descriptions

Clinical & Administrative Sciences (CAS)

CAS 606 Biostatistics and Pharmacoepidemiology (3 cr)

This course is designed to introduce major concepts in biostatistics and pharmacoepidemiology. Students will develop the ability to interpret and critically evaluate medical literature and to identify findings that have implications for their practice. Emphasis will be placed on an examination of how observational study designs draw upon epidemiologic techniques to address drug effectiveness, safety, outcome assessment and regulatory decision making. Students will also acquire skills in applying statistical analysis concepts learned throughout this course with the use of common computer software. (Prerequisite: none)

CAS 608 Self Care (4 cr)

Self-Care is an interactive course designed to introduce a systematic approach for evaluating a patient's self-care needs, including assessing, triaging and making appropriate treatment recommendations. This course also provides an introduction to over-the-counter medications used for self-treating common medical conditions in the community setting. Students will be expected to understand how and why obtaining a comprehensive patient history are necessary to objectively recommend appropriate over-the-counter medications that are safe and effective. Students will begin to appreciate the role of a pharmacist and how educating and empowering patients is a cornerstone in community pharmacy practice. (Prerequisites: IPP607, PRC609)

CAS 702 Communications (2 cr)

The course is designed to teach student pharmacists the skills and techniques necessary to have productive communication encounters with patients and healthcare professionals using verbal and non-verbal skills. Utilizing techniques that evolve around oral and written communication, the students will begin to develop the skills necessary to conduct effective patient interviewing/counseling encounters, initiate problem solving & conflict management techniques, and expand their awareness regarding cultural competence and health literacy. (Prerequisite: none)

CAS 703 Drug Literature Evaluation & Drug Information (3 cr)

This course will provide a systematic approach to drug information and literature evaluation to formulate and implement appropriate drug therapy decisions. This includes effective searching, retrieval, evaluation and dissemination of electronic and print resources. Students will utilize skills learned in this course to effectively communicate and tailor drug information at the appropriate level for providers, other health professionals, caregivers, patients and the public. Additionally, this course will provide introductory knowledge on the state of the art in pharmacy informatics and decision support systems needed to implement patient-centered care. Students will be able to define basic terminology used in health informatics and describe the benefits and current

constraints in using information and communication technology in health care. (Prerequisite: CAS606)

CAS 705 Pharmacotherapy I (6 cr)

This course will focus on the clinical foundations of pharmacotherapy, integration of pathophysiological and pharmacological mechanisms, and the pharmacotherapeutic interventions used in the management of disorders that are specific to or have a high prevalence in psychiatry or neurology. (Prerequisite: PBS602)

CAS 706 Pharmacotherapy II (6 cr)

This course focuses on the development of highly skilled clinical pharmacists. Students are taught to integrate knowledge of therapeutic interventions with the pathophysiological and pharmacological mechanisms and patient specific data to optimally management cardiovascular, pulmonary, and endocrine disorders. Students will gain understanding of disease state management through the interpretation of case reports, laboratory findings, application of pharmacologic principles and evidence based guidelines. (Prerequisites: PBS701 & CAS703)

CAS 801 Pharmacy and the Health Care System (3 cr)

This course will introduce the major healthcare stakeholders and elucidate the manner by which their interests and interactions have shaped the current US healthcare financing and delivery system, and set the stage for healthcare reform. Students will learn how to use this information as a framework to identify existing and future healthcare needs, and develop potential pharmacist-driven initiatives to improve value and patient care in general. (Prerequisite: none)

CAS 802 Pharmacy Law and Ethics (3 cr)

This course is designed to prepare student pharmacists to evaluate through critical thinking and problem solving skills and techniques necessary to identify, analyze, and evaluate the legal and ethical issues pertaining to the practice of pharmacy. Upon completion, a student will have an understanding of requirements for preparing and dispensing medications in a manner compliant with pharmacy rules/regulations and laws, as well as preparing and maintaining records that respect a patient's privacy interests and comply with the law, along with an appreciation for a pharmacist's duty to avoid harm while practicing the profession within the allocation of health resources, patient autonomy, and interactions with other healthcare providers. (Prerequisite: IPP607)

CAS 804 Pharmacy Management and Economic Principles (3 cr)

The objective of this course is to provide an opportunity to pharmacy students to learn important management, organizational, accounting, entrepreneurial, and marketing skills that are useful for pharmacy practice. To provide optimum care and services as a healthcare professional, pharmacists should understand the basic principles of managerial, organizational, and financial management. On a day-to-day basis pharmacists have to deal with people,

change, structural demands, and organizational behavior. Therefore, more emphasis will be given to planning, organization, motivation, control, and marketing as they relate to community and health-system pharmacy management. This course will also provide a basic introduction of pharmacoeconomic principles and its application to improve patient outcomes. Course material will provide the students with an understanding of the methods to choose a cost-effective drug therapy for patient populations in order to achieve quality clinical, economic and humanistic outcomes. A combination of classroom mini-lectures, class discussion, required readings, and in-class learning assignments will be used to facilitate the student's understanding of important concepts related to pharmacy management and pharmacoeconomics. (Prerequisite: CAS801)

CAS 805 Pharmacotherapy III (6 cr)

This course will cover the pathophysiology and treatment of bacterial, viral, and fungal infections, as well as the principles of antimicrobial regimen selection and antimicrobial prophylaxis. By the end of this course the student should be able to: identify the principles of the practice of infectious diseases, identify the impact of the use of antimicrobial agents on the population, describe basic properties of common pathogenic microorganisms, list pharmacological properties of selected antimicrobial agents, identify likely pathogens responsible for a particular infectious disease process, select first line and alternative antimicrobial agents for selected disease states, and identify appropriate actions to monitor for efficacy and toxicity. (Prerequisites: PBS604, CAS703, CAS706 & PBS803)

CAS 806 Pharmacotherapy IV (6 cr)

This course covers several topics of pharmacotherapy: renal, nutrition, gastrointestinal and hepatic disorders as well as hematology and oncology with a focus on patient care. The student will need to integrate physiologic, pathophysiologic, pharmacologic, pharmacodynamic, pharmacokinetic, laboratory monitoring, and pharmacotherapeutic principles to assess and/or formulate disease specific pharmacotherapy care plans. The course will focus on optimizing drug therapy through the design, recommendation, implementation, monitoring, and modification of individualized pharmacotherapeutic plans using updated pharmacologic principles, clinical recommendations, and evidence based guidelines. (Prerequisite: PBS704 & CAS706)

Pharmaceutical & Biomedical Sciences (PBS)

PBS 601 Cell and Molecular Biology and Biochemistry (5 cr)

This course is designed to provide the pharmacy students with a fundamental understanding of current concepts of cellular and molecular biology, and human biochemistry. Students are provided an overview of eukaryotic carbohydrate, lipid and protein metabolism, cellular signal transduction, biomedical aspects of human nutrition, genetic regulation, the molecular basis of inherited genetic diseases and acquired diseases like cancer, principles of commonly used biotechnologies, drug targets screening, and biopharmaceutical products generation. (Prerequisite: none)

PBS 602 Pathophysiology and Pharmacology I: Neuro & Psychiatric (6 cr)

This course introduces the basic mechanisms of pathophysiology and pharmacology, and then integrates these disciplines through the study of the etiology, pathogenesis, clinical manifestations, treatment and prevention of major neurologic, psychiatric, and neuroendocrine diseases/disorders. Following an introduction to normal tissue types and adaptive responses, the course will cover basic etiological and pathophysiological mechanisms; mechanisms of injury will be reviewed; the central and peripheral nervous systems (CNS & PNS) are reviewed, major CNS, PNS and neuroendocrine diseases and disorders are covered. Students will learn the mechanism(s) of action and common or serious adverse effects of pharmacological agents and identify appropriate pharmacological treatments or adjust pharmacotherapy in the face of adverse effects. In addition, each student team will research a topic in depth, including a systematic search of peer-reviewed literature, to develop and present a formal case study, given at a level appropriate for an audience of healthcare professionals. To promote information literacy, teams will use systematic PubMed searches using MESH terms to identify and incorporate current literature reviews, guidelines, or other advanced professional sources, and carefully cite the information and sources on their slides. (Prerequisites: PBS601 & PBS 603)

PBS 603 Medicinal Chemistry & Physical Pharmacy (5 cr)

The course consists of four components: (1) drug structure-relationships, prediction of the physico-chemical properties of a drug, basic knowledge of the major pathways of drug metabolism and factors that can contribute to drug-drug interactions; (2) the solubility, metabolism and pharmacological activity/potency of drugs classes based on the contribution of their functional groups to their structures; (3) drug assay and the application of chemical and physico-chemical methods of analysis to pharmaceutical substances; (4) active constituents of natural medicines with emphasis on the top selling medicinal herbs. (Prerequisite: none)

PBS 604 Pharmacokinetics (5 cr)

This course focuses on understanding and applying pharmacokinetic principles for optimizing drug dosage. It is divided in to three modules: (1) descriptive, quantitative, and pharmacokinetics of special population. Descriptive pharmacokinetics provides a basic introduction to the key pharmacokinetic principles; it enables the student to conceptualize principles such as drug bioavailability, distribution, clearance, and excretion; concepts of drug absorption, metabolism, protein binding, and pharmacokinetic drug interactions will be discussed as well. (2) Quantitative pharmacokinetics covers the mathematical aspects, including the calculation of pharmacokinetic parameters following drug administration and compartment modeling. (3) the process of using pharmacokinetic principles to optimize drug dose in individuals and in patients with altered physiology is covered last. (Prerequisite: PBS 605)

PBS 605 Biopharmaceutics, Drug Delivery and Calculations (5 cr)

This course is designed to give students an appreciation of the formulation, manufacture, and testing of dosage forms as well as an understanding of the interactions between complex

drug delivery systems and biological systems. The course covers all the basic dosage forms and drug delivery systems as well as the routes of administration, absorption, and bioavailability. The course will also cover pharmaceutical calculations and some elements of compounding. It presents an overview of drug quality control and regulation. (Prerequisite: none)

PBS 701 Pathophysiology and Pharmacology II: Cardiovascular, Diabetes, Thyroid (6 cr)

This course describes and evaluates underlying pathogenesis of major cardiovascular disorders and cardiovascular pharmacology. Upon completion of this course students gain an understanding of major cardiovascular disease states, drug targets based on understanding the pathophysiology, and the mechanism of action and adverse effects of drugs used to treat cardiovascular disorders. Selected topics include: hypertension, dyslipidemia, thrombosis, arrhythmia, ischemic heart diseases, heart failure, venous thromboembolism, peripheral arterial diseases, valvular disease and cardiovascular shocks. In addition, this course describes the pathophysiology of two of the endocrine glands: thyroid and pancreas. Students gain an understanding of underlying pathogenesis of hypothyroidism, hyperthyroidism and Diabetes Mellitus, and the mechanism of action and adverse effects of pharmacological classes and agents to treat these endocrine disorders. (Prerequisites: PBS601, PBS602, PBS603, & PBS604)

PBS 704 Pathophysiology and Pharmacology III: Pulmonary/ Renal/GI/GU (6 cr)

In this course, students will learn to identify drug targets based upon an understanding of the pathophysiology of major diseases of the respiratory, renal, gastrointestinal, genitourinary, and endocrine systems. Students will learn to recognize the major disorders of these systems, the mechanism of action and adverse effects of pharmacological classes of drugs used in the treatment of these disorders. In addition, students will learn the alternative pharmacological agents for patients who exhibit significant adverse effects to existing pharmacological therapy of these disorders. (Prerequisite: PBS602)

PBS 803 Immunology and Rheumatology (4 cr)

The course will initially focus on an overview of innate and adaptive immunity as well as basic principles of cellular immunology. A special emphasis will then be placed on integrating the underlying pathophysiological and applicable pharmacological mechanisms, which can be used in the intervention and management of immunological-based diseases. These disease states include: Rheumatoid Arthritis, Psoriasis, Crohn's Disease, Systemic Lupus Erythematosus, and Multiple Sclerosis. Other topics covered in the course include organ transplantation, vaccination for disease, immunodeficiency and AIDS, as well as interactions between the immune system and cancer. Students are provided with an overview of immunity, cells and proteins of the immune system, along with their specific roles and interactions in human disease. (Prerequisites: PBS601, PBS603, & PBS704)

Experiential Education (EED) - IPPE

IPP 607 Introduction to Pharmacy Practice (2 cr)

This didactic class prepares students for their IPPEs. It covers introductory and contemporary pharmacy issues, practice history, pharmacy organizations and medical terminology, and certificate programs as required by experiential practice experiences. Additionally, students will be introduced to pharmacy law and professionalism issues, and they will be provided with an opportunity to develop introductory knowledge of the top 100 dispensed prescription medications. (Prerequisite: none)

IPP 707 Introduction to Pharmacy Practice Experience: Community Practice (4 cr)

This is an introductory Pharmacy Practice Experience (IPPE) in a community practice setting. This IPPE requires 150 hours on site in a community practice setting. Summer placement is strongly encouraged, and the work schedule suggested should incorporate 4 x 40 hour weeks. (Prerequisites: IPP607)

IPP 807 Introductory Pharmacy Practice Experience: Institutional Practice (2 cr)

This is an introductory Pharmacy Practice Experience (IPPE) in an institutional practice setting. This IPPE requires 75 hours on site in this practice setting. (Pre-requisite: IPP607)

IPP 808 Introductory Pharmacy Practice Experience: Specialty Practice (2 cr)

This is an introductory Pharmacy Practice Experience (IPPE) in specialty practice setting. This IPPE requires 75 hours on site in this practice setting. (Prerequisite: IPP607)

Experiential Education (EED) - APPE

Advanced Pharmacy Practice Experiences

APPE prerequisite: students must successfully complete all P1-P3 courses before commencing APPEs. Collectively, APPEs provide students with the opportunity to hone the practice, skills, professional judgement, behaviors, attitudes, values, confidence and sense of personal and professional responsibility required for each student to practice independently and collaboratively in an inter-professional, team-based environment.

APP 901 Advanced Pharmacy Practice Experience: Community (6 cr)

In the Community Pharmacy Practice APPE, the student will have an opportunity to practice contemporary pharmacy in a community setting, balancing the changing demands of the healthcare system with those of the retail market. Whether in the large chain or independent pharmacy, activities will include managing the prescription verification process, selecting over-the-counter products for patient-specific needs, patient counseling, and delivering medication therapy management services. (Prerequisite: P4 standing)

APP 902 Advanced Pharmacy Practice Experience: Hospital/Health Systems (6 cr)

Students in the Hospital/Health System APPE will apply knowledge of sterile technique, pharmaceutical calculations, pharmaceutical compounding, medication use evaluation and pharmacokinetic monitoring in activities that enhance

the safe and effective use of medications in the hospital environment. (Prerequisite: P4 standing)

APP 903 Advanced Pharmacy Practice Experience:

General Medicine (6 cr)

Students in the General Medicine APPE apply critical thinking skills and drug information knowledge to evaluate a patient's medical information, identify drug therapy problems, design therapeutic interventions, and communicate medication therapy recommendations to other healthcare providers. (Prerequisite: P4 standing)

APP 904 Advanced Pharmacy Practice Experience:

Ambulatory Care (6 cr)

In the Ambulatory Care APPE, students apply drug knowledge and communication skills with both patients and other healthcare team members to formulate and implement pharmacotherapy care plans, including monitoring and follow-up to assure the best possible outcomes for their patients. (Prerequisite: P4 standing)

APP 905 Advanced Pharmacy Practice Experience:

Specialty I (6 cr)

This rotation allows students to explore areas of interest and focus in pharmacy practice. Specialty APPE offered in the CNUCOP curriculum include (but are not limited to) Infectious Disease, Critical Care, Emergency Medicine, Geriatrics, Pediatrics, Academia, Management, Leadership, Compounding, Home Infusion and Long-term Care. (Prerequisite: P4 standing)

APP 906 Advanced Pharmacy Practice Experience:

Specialty II (6 cr)

This rotation allows students to explore areas of interest and focus in pharmacy practice. Specialty APPE offered in the CNUCOP curriculum include (but are not limited to) Infectious Disease, Critical Care, Emergency Medicine, Geriatrics, Pediatrics, Academia, Management, Leadership, Compounding, Home Infusion and Long-term Care. (Prerequisite: P4 standing)

Longitudinal Practicum Education

PRC 609 Longitudinal Practicum I (1 cr)

Longitudinal Practicum I is the first in a series of six practicums designed to provide students with the opportunity to practice essential skills, and use knowledge learned in didactic courses to build and develop these skills in a sequential and integrated way. Longitudinal I provides a hands-on introduction to bench-top pharmaceutical compounding and calculations. Practicum I will provide an overview of the value of compounded dosage forms, and their limitations and relationship to FDA-approved drugs. Some insight will be given to the use of compounding pharmacies for the preparation of clinical trial materials, and various compounded preparations will be made. This practicum involves three pre-lab sessions, four wet lab sessions and nine hours of calculation sessions. (Prerequisite: none)

PRC 610 Longitudinal Practicum II (1 cr)

Using the sterile IV hood, Practicum II will provide students with a hands-on introduction to aseptic techniques, and personal safety measures. Patient counseling and interviewing skills will be introduced and practiced. In

addition, students will learn how to conduct a physical assessment of patients, with a focus on smoking cessation, blood pressure monitoring, and blood glucose assessment. Students will get the opportunity to practice physical assessment techniques on a simulated patient. In addition, students will participate in an immunization certification program, and the concept of Medication Therapy Management (MTM) and SOAP notes will be introduced. Practicum II emphasizes oral presentation skills, and introduces key concepts such as leadership, professionalism, and ethics. (Prerequisites: IPP607 & PRC609)

PRC 709 Longitudinal Practicum III (2 cr)

The third in the series this Practicum will enable students to apply their knowledge of pharmacotherapy to clinical scenarios through the use of Objective Structured Clinical Exams (OSCEs) and debates. Basic laboratory elements will be introduced and skill sets related to conducting MTM/motivational interviewing will be further refined. Students will also have the opportunity to enhance their oral communication skills through patient counseling exercises and debates on topics related to psychiatry and/or neurology. Professionalism, including behaviors and attitudes that are consistent with being a health care professional, will be reinforced. (Prerequisite: PRC610; Co-requisite: CAS705)

PRC 710 Longitudinal Practicum IV (2 cr)

This Practicum will provide students with an opportunity to develop and practice clinical skills through the assessment of case reports laboratory findings, pharmacologic principles and evidence based guidelines. Students will be exposed again to OSCE which were first introduced in Practicum III. Journal Clubs, MTM, SOAP Notes and Care Plans will all be revisited, using various cardiovascular, endocrinologic, and pulmonologic disease states as a platform. Students will learn to demonstrate clinical skills relevant to providing patient care in simulated learning activities with other health care professional students. Evidence-based patient case discussion and patient therapeutic treatment plan recitation will be developed throughout the practicum. Students will be expected to continue to demonstrate the professional skills, attitudes, and values necessary to enter a clinical service. (Co-requisite: CAS706)

PRC 809 Longitudinal Practicum V (2 cr)

Practicum V will help students practice their clinical skills and to understand the different roles and responsibilities pharmacist can have in various practice settings. Emphasis will be placed on infectious disease case scenarios in this practicum, related to this semester's pharmacotherapeutic course. Throughout Practicum V, students will be exposed to simulations in community, hospital, and ambulatory care environments, and reinforcing their skills in disease state management. The students will also be exposed to patient case scenarios and tasked to assess, evaluate, and prioritize patient problems, by providing appropriate treatment recommendations. Students will also have continued exposure to practice their skills in the areas of leadership, MTM, patient care and inter-professional practice. (Prerequisite: PBS 604; Co-requisites: PBS803 & CAS 805)

PRC 810 Longitudinal Practicum VI (2 cr)

The sixth and final Practicum will provide students with practice in nutritional calculations, MTM review of cases using

specific topics such as renal, gastroenterologic and oncologic disease from this semester's pharmacotherapeutic course. In particular, this longitudinal practicum will build on skills developed in previous didactic courses and practicums in order to optimize personal performance going into the Advanced Pharmacy Practice Experiences (APPEs). Students will be provided with an opportunity to participate in an additional Inter-Professional Education (IPE) Simulation exercise; and there will be team-based topic presentations to solidify communication skills. Overall, students will be provided with sufficient exposure to learn and practice their skills in the area of leadership, MTM, patient care and inter-professional practice. (Prerequisite: CAS703; Co-requisite: CAS806)

Elective Courses

P2 and P3 students must choose one from a number of elective topics that will be offered each academic year. P2 elective courses (ELC 7XX) are offered during the Spring semester and P3 elective courses (ELC 8XX) are offered in the Fall semester. Topics vary each year. Students may complete an approved an Independent Study in lieu of an elective course offered. Completion of a minimum of 4 credits of elective coursework is required. P2 elective offerings will be distributed as an addendum.

ELC 750/850: Independent Study (1-2 cr)

The purpose of independent study is to provide interested students with an opportunity to collaborate with faculty on research or specialty projects. The interested student meets with the appropriate faculty member, and the student and the faculty determine the nature and scope of the project to be completed. In collaboration the student and the faculty member design the course, the scope of the project, project specific assignments, methods of evaluation, timeline, and expectations. Prior to starting the project/course, the student and the faculty member complete the independent study form and submit the completed form to the appropriate Department Chair for approval. Once approved by the appropriate Department Chair, the completed form is subsequently submitted to the Office of Academic Affairs for final approval. Once final approval has been granted, the form will be sent to the Office of the Registrar to officially enroll the student in the course. Request form and instructions available online: <http://pharmacy.cnsu.edu/independent-study>. (Prerequisites: P2/P3 standing and minimum 2.80 cumulative GPA; Faculty, Department Chair, and Office of Academic Affairs approval)

ELC 851 Demystifying Formulary Decisions: An Evidence Based Approach (2 cr)

This course will focus on common disease states affecting the pediatric and geriatric population and their management. These specific patient populations require special consideration as a result of their varying pharmacokinetic and pharmacodynamic profiles. Pathophysiological and pharmacological principles of each disease state and their respective treatments will be reviewed. The course will be based on team-led topic presentations and class discussions to enhance students' knowledge base and improve oral and written communication skills. (Prerequisite: P3 standing)

ELC 853 Preventing the Misuse & Abuse of Prescription Medications (2 cr)

This course is designed to raise awareness among the students about the misuse and abuse of prescription medications. Students will develop knowledge and understanding of drugs and substances of abuse, how to promote appropriate use of controlled substances, and minimize their abuse and diversion. (Prerequisite: P3 standing)

ELC 861 Pharmacogenomics and Genetics (2 cr)

The Pharmacogenomics (PGx) and Genetics course is designed to provide pharmacy students with a fundamental understanding of current concepts and application of genetics and genomics in light of the relevance and the scope of pharmacy practice. The course is designed with a learner-centered perspective, leading step-wise through introductory content emphasizing PGx research design including utilization of key knowledge from the human genome and genome projects and Big "Omics" data such as genomic, transcriptomics, and proteomic approaches to patient care. Students are provided an application of pharmacogenomics in drug discovery, disease diagnosis, and the value of phenotyping/genotyping in guiding drug therapy of individual patients. Examples of clinical applications will be included and will examine the relationship between PGx and personalized medicine. This course uses a combination of lectures, discussions of assigned literature, projects, and student-led presentations. (Prerequisite: P3 standing; PBS604; PBS701; PBS704; CAS705; & CAS706)

ELC 863 Frontiers in Translational Medicine: From Bench to Bedside (2 cr)

Translational medicine is the practice of transferring scientific knowledge "from bench to bedside" (B2B), translational medicine builds on basic research advances and uses them to develop new therapies or medical procedures. Translational medicine transforms scientific discoveries arising from laboratory, clinical or population studies into new clinical tools and applications that improve human health. This course provides students with insight into state-of-the art research and research application in the medical field. The emphasis is the dynamic relationship between laboratory research and bedside application with the purpose of providing optimal patient therapies. Students will learn how research results guide clinical therapies, and vice versa. This course will provide real-life examples of translational medicine practices and give students exposure to analyzing and developing diagnostic tools and treatment protocols. Students will be required to actively participate in individual journal clubs and develop a review of literature presentations. Finally, each team will write a review literature on a selective topic appropriate for peer-review publication. (Prerequisite: P3 standing; PBS601)

ELC 859 Postgraduate Pharmacy Residency and Fellowship Training Preparation (2 cr)

The post-graduate pharmacy residency and fellowship training preparation elective is an interactive course designed to provide students with the tools and skill sets necessary to obtain a residency or a fellowship position following graduation. This course will introduce students to the basic elements of residency and fellowship, identifying programs based on one's interest, developing application materials (CV,

letter of intent), and preparing for Personal Placement Service (PPS) and/or onsite reviews (interview preparation, mock interviews, and topic presentation). In addition, students preparing for a residency will gain the skills necessary to

navigate the application and residency match processes and students preparing for a fellowship will gain the skills necessary to remain a competitive candidate for onsite interviews following PPS. (Prerequisite: P3 standing)

COLLEGE OF PSYCHOLOGY

Mission, Vision, and Values

Mission: To advance the science and practice of psychology by developing clinicians trained to promote health through knowledge, research, service, and social responsibility.

Vision: To provide training to future psychologists using the latest scientific research to promote health, illness prevention, consultation, assessment, and the treatment of psychological and health-related disorders.

Values: To pursue six guiding principles: 1) curiosity towards clinical work and scholarship; 2) integrity as scholars, professionals, and clinicians; 3) diversity of people, ideas and beliefs; 4) accountability as professionals; 5) respect for the work, colleagues, clients, and ourselves; and 6) recognizing relationships as the foundation of psychology.

Educational Philosophy

The College of Psychology curriculum provides the knowledge and training necessary for students to diagnose and treat behavioral conditions in diverse and varied populations.

The Practitioner/Scholar model prepares practitioners for entry into the profession by requiring both practical clinical experience and guided research opportunities. Those in our program learn to critically examine and evaluate scientific research as it applies to practical application while adapting information gained through classroom instruction and during their practicum placements.

Because the College of Psychology is committed to ensuring that those enrolled in the program gain the knowledge and skills needed to become licensed psychologists, students will meet with their faculty academic advisor twice per semester to both monitor their academic and practicum performance and elicit feedback regard students' experience in the college.

To assist students in both dissertation and internship preparation, class loads are reduced in the fourth year and replaced by workshops designed to provide students with the support needed to obtain their professional goals and to facilitate graduation by the end of the program.

Learning Outcomes

Program Learning Outcomes (PLOs)

Upon successful completion of the doctor of psychology program, students will be able to demonstrate the following program learning outcomes:

1. **Scientific Orientation:** Students will utilize scientific methods in their research and practice to predict and plan treatments for psychological conditions.
2. **Assessment and Intervention:** Students will implement interventions informed by current scientific literature, assessment findings, diversity characteristics, and contextual variables.

3. **Relational and Cultural Competence:** Students will interact with clients and professionals in a respectful and culturally appropriate manner considering societal context and human diversity.
4. **Professionalism:** Students will identify and observe their boundaries of competence through reflective practice and considering meaningful feedback from colleagues and professionals.
5. **Ethical Practice:** Students will resolve complex moral and ethical situations by acting in accordance to relevant rules, laws, and regulations governing the profession of psychology.
6. **Collaboration and Consultation:** Students will learn to work in collaboration with professionals and the public providing consultation regarding treatment and program effectiveness.

Discipline Specific Knowledge

Along with program learning outcomes, the curriculum also addresses the discipline specific knowledge and professional competencies expected by the American Psychological Association:

1. **History and Systems of Psychology:** Students gain a knowledge of the discipline of psychology by examining historical precedents in the profession and the social/cultural factors that contributed to the advent of various theories and interventions. They will also learn about the changes that have occurred in the profession over time, its expanding role in healthcare, and its current position as a profession rooted in scientific inquiry.
2. **Affective Aspects of Behavior:** Students learn about affective response, mood, feeling states, and the interplay between behavior and emotion. They will have gained knowledge regarding arousal, intensity, and interaction.
3. **Biological Aspects of Behavior:** Before graduating the program students will know the biological underpinnings of behavior including neural, physiological, anatomical, and genetic influences.
4. **Cognitive Aspects of Behavior:** This class examines ways humans learn through factors such as memory, categorization of thoughts, and decision making.
5. **Developmental Aspects of Behavior:** This knowledge is focused on human transitions through various stages of growth and the intellectual and behavioral changes that occur across an individual's lifespan.
6. **Social Aspects of Behavior:** The study of social behavior includes group process, attributions, discrimination, societal attitudes, and the interface between the subjects of sociology and psychology.
7. **Advanced Integrative Knowledge of Basic Discipline-Specific Content Areas:** The integration of classroom knowledge into practical applications is formalized both during the dissertation process and throughout practicum training. It is also evaluated through the Comprehensive Exam.
8. **Research Methods:** These skills include the ability to critically read research, understand the mathematical underpinnings of assessment measures, and to begin

work on their own research. They will learn the strengths and limitations, means of interpretation, and the technical aspects of a rigorous case study. They will also learn the difference between correlational, descriptive, and experimental research designs while studying measurement techniques such as sampling, replication, and theory testing.

9. **Quantitative Methods:** In the statistics and research classes students will learn about meta-analysis, quasi-experimentation, modeling, data analysis, description, inference, univariate and multivariate analysis, null-hypothesis testing, power, and estimation.
10. **Psychometrics:** This course reviews theory and techniques of psychological measurement, scale and inventory construction, reliability, validity, evaluation of measurement quality, classical and contemporary measurement theory, and standardization.

Profession-Wide Competencies

1. **Research:** Psychology doctoral students will demonstrate the ability to formulate and carry out research that will contribute to the scientific, psychological, and professional knowledge base. They will be able to critically evaluate the scholarly activities of others and engage in meaningful debate with fellow students and professional colleagues.
2. **Assessment:** Students will conduct evidence-based assessments applying appropriate measures and tools, utilizing the best available literature from multiple sources, and factoring diversity characteristics into their treatment plans. They will be able to interpret assessment results and write reports using current professional standards to conceptualize, classify, and make both oral and written recommendations regarding a wide range of disorders and patient issues.
3. **Intervention:** Different theoretical orientations will be learned by students to maximize their treating potential. Students will establish and maintain effective relationships with recipients of psychological services and develop evidence-based intervention plans specific to the service delivery goals. They will be able to implement interventions informed by current scientific literature, assessment findings, diversity characteristics, and contextual variables. They will be able to modify and adapt evidence-based approaches in evaluating intervention effectiveness and adapt goals and methods with continuous evaluation of patient care outcomes.
4. **Ethical and Legal Standards:** Students must be able to respond professionally to complex moral and ethical situations using the current version of the APA Ethical Principles of Psychologists; the APA Code of Conduct; and relevant laws, regulations, rules, and policies governing the practice of psychology. They must be able to employ sophisticated decision-making processes in order to resolve issues related to patient care and always conduct themselves in a professional and ethical manner.
5. **Individual and Cultural Diversity:** Students must conduct professional activities with the appropriate knowledge, awareness, sensitivity, and skills with regard to individuals and communities of varying cultural and personal backgrounds. It is important that students understand how their own personal/cultural history,

attitudes, and biases may affect their interactions with others. They must also have knowledge of current theoretical and empirical research regarding diversity as it relates to interventions, training, supervision/consultation, and service.

6. **Professional Values and Attitudes:** Students will behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others. They will engage in self-reflection regarding their personal and professional functioning. They will also engage in activities to maintain and improve performance, well-being, and professional effectiveness. They will actively seek and demonstrate openness and responsiveness to feedback and supervision.
7. **Communication and Interpersonal Skills:** Students are expected to develop and maintain effective relationships with a wide range of individuals, colleagues, communities, organizations, supervisors, and clients. They must produce and comprehend oral, nonverbal, and written communications that are informative and appropriate for the given audience. They must demonstrate a thorough grasp of professional language and concepts and utilize effective interpersonal skills to relay relevant information to clients, families, and other professionals.
8. **Supervision:** In the course of their professional careers psychologists will need to pass on their knowledge and experience to others. It is the responsibility of all psychologists to learn the basic techniques and ethical responsibilities regarding supervision so that the practice of psychology continues to grow organically through shared experience.
9. **Consultation and Interprofessional/ Interdisciplinary Skills:** Students will find few times in their scholastic and professional careers when they are truly working alone. Understanding other health professions, their areas of expertise, and the collaborative nature of modern case formulation is imperative to ensure that patients are receiving optimal care. Students will demonstrate knowledge and respect for the roles and perspectives of other professions and learn how best to utilize the skills and knowledge of a psychologist when working in a team environment.

Program Overview and Licensure

The PsyD in the College of Psychology is a 5-year program that will prepare students for entry into the profession of psychology.

The first year of the program will involve classroom instruction with clinical training, including the use of professional actors (standardized patients) so that students can learn interview, assessment, and intervention skills while under the direct guidance of their professors.

In the second through fourth years, students will continue their classroom instruction, but will now perform clinical service in the surrounding community in environments approved by the College of Psychology. These practicums

vary in setting, patient population, and difficulty as the student progresses through the program. Each practicum lasts between 9-12 months. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection.

Year 3 students will be taking the Comprehensive Exam. This requirement is comprised of questions covering course information conveyed during the first two and a half years of study.

Year 4 students are provided workshops designed to assist in the completion of their dissertation and in preparing for the applications and interviews required to obtain an internship.

It is the expectation of the College of Psychology that students will make every attempt to complete their dissertation by the end of the fourth year. Dissertations are the culmination of students' work in the PsyD program and are done under the supervision of faculty. These are independent, original works of publishable quality reviewed by a faculty chair and a dissertation committee. Along with the written work, students will also provide an oral, public defense of their research.

Year 5 students are no longer on campus but are engaged full time at an internship site. There are various levels of training offered during this year with the highest being an APA accredited internship. All students will be required by the College of Psychology to apply for APA accredited internships.¹

When a student has completed their internship year and all other program requirements (dissertation, etc.) they have officially graduated from the program and will be granted their doctorate.

Each state has separate requirements regarding licensure as a psychologist. In California, students must have a minimum of 1,500 pre-doctoral hours. California Northstate University requires an additional 500 pre-doctoral hours. This requirement will be fully satisfied by the internship requirements of the PsyD program.

After a student has been awarded their doctorate they may take the next step towards licensure and sit for the national psychology test called the Examination for the Professional Practice of Psychology (EPPP). This is a requirement for California licensure and can be taken any time after the student has been awarded their PsyD.

After graduation, California also requires that students obtain an additional 1,500 post-doctoral hours. These may be gained through a formal post-doctoral fellowship or a psychological assistantship. Once all 3,000 hours have been obtained, the doctorate degree awarded, and the EPPP passed, a candidate may sit for the California Psychology Law and Ethics Examination (CPLEE). After passing this test a candidate will be issued a license to practice in the state of California and they have earned the right to call themselves a psychologist.

¹APA requires that applicants to their internships must be from programs that have either Accredited, on contingency or full Accredited status. It is the expectation of the College of Psychology that we will reach Accredited, on contingency status prior to students applying for internship. Please refer to the timeline described in the The College of Psychology curriculum provides the knowledge and training necessary for students to diagnose and treat behavioral conditions in diverse and varied populations.

The Practitioner/Scholar model prepares practitioners for entry into the profession by requiring both practical clinical experience and guided research opportunities. Those in our program learn to critically examine and evaluate scientific research as it applies to practical application while adapting information gained through classroom instruction and during their practicum placements.

Because the College of Psychology is committed to ensuring that those enrolled in the program gain the knowledge and skills needed to become licensed psychologists, students will meet with their faculty academic advisor twice per semester to both monitor their academic and practicum performance and elicit feedback regard students' experience in the college.

To assist students in both dissertation and internship preparation, class loads are reduced in the fourth year and replaced by workshops designed to provide students with the support needed to obtain their professional goals and to facilitate graduation by the end of the program.

Accreditation

Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC)

California Northstate University is accredited WASC). On March 16, 2018 the California Northstate University proposal for the Doctorate of Psychology degree was granted final approval by the WSCUC Commission.

Bureau for Private Postsecondary Education (BPPE)

BPPE completed its review of the PsyD program and granted the program state approval on June 12, 2018.

American Psychological Association (APA)

The College of Psychology will be pursuing American Psychological Association accreditation. This takes place in three phases. The first is "Intent to Apply" status. This step can now be initiated in Summer 2018. It involves the submission of a self-study report reviewed by the APA to determine whether or not the program is on track to meeting requirements for accreditation.

Within three years after the PsyD program is granted "Intent to Apply" status and no sooner than when two classes are enrolled in the program and one has completed a term of practicum service may the program submit for "Accredited, on contingency" status. This requires a second self-study and a site visit by APA.

Within three years after receiving "Accredited, on contingency" status and after the inaugural class has completed internship, the College of Psychology can apply

for full accreditation from APA. This requires a third self-study with proximal and distal data and a second site visit.

Admission to the PsyD Program

Through our website (www.psychology.cnsu.edu), students seeking admission to the College of Psychology can access the APA's centralized application service for psychology graduate programs called PSYCAS.

Minimum requirements:

1. An undergraduate degree from an accredited college or university;
2. Overall undergraduate GPA of 3.0 or higher or an overall graduate GPA of 3.3 or higher;
3. An undergraduate/ graduate degree in psychology; OR coursework in General Psychology, Abnormal Psychology, Statistics, and Developmental Psychology.

If an applicant does not meet the minimum GPA requirements, they may submit a petition for exemption if they feel that extenuating circumstances have adversely impacted their academic performance. Petitions should include a brief personal statement explaining the factors involved and the reasons why an exemption from the GPA requirement should be considered. The GPA Exemption Request Form can be downloaded and submitted on our website.

A complete application consists of the following:

- Completed PsyD program application
- Curriculum vitae or resume;
- All official college transcripts
- Three (3) letters of recommendation

While not required, clinical or research experience and the GRE General Test are recommended.

International Coursework

If the student has attended an international university with instruction in a language other than English, they must demonstrate proficiency by obtaining a score above 80 on the TOEFL or a score of 6.5 or higher on the IELTS. If transcripts are in a language other than English, they must be translated before review. A request for such services can be made through the PSYCAS system.

Decisions

Applicants will be notified by email and subsequent written communication if they have been selected for invitation to attend an onsite interview. Skype interviews are available for applicants who are unable to travel. Applicants who have not been selected for an interview will be notified that their application is no longer being considered. Interviews will take place at the CNU College of Psychology campus in Elk Grove. Offers of admission and notice of waitlist status will be sent by email and subsequent written communication.

Each application will be thoroughly reviewed by the admissions committee and all areas of the application will be carefully considered. It is important that the student body at the College of Psychology represents the best of future clinicians and the admissions committee will pay particular attention to professional, research, education, and life experiences. Along with academic excellence, the Admissions

Committee will be looking for students with diverse cultural, socioeconomic, work, and educational backgrounds. We are a diverse faculty and student body and it is the admissions policy of the University and the College of Psychology that no applicant will be discriminated against on the basis of disability, gender, religion, military obligations, veteran status, marital status, race, creed, ethnicity, color, sex, gender expression, age, physical or mental ability, sexual orientation, national identity, or national origin.

The CNU College of Psychology reserves the right to withdraw an offer of admission if false statements are made on the application materials, academic performance of the applicant drops significantly or they fail to earn an undergraduate degree, or the applicant engages in behavior prior to matriculation that violates legal, professional, or ethical standards or otherwise raises concerns about the applicant's judgement or integrity.

Deadlines

The CNU College of Psychology follows the Council of Graduate Departments of Psychology Guidelines for Graduate School Offers and Acceptances.

The application process will be opened on our website and through PSYCAS on September 1. If students wish to be considered for early admittance, they must have their applications submitted by December 1. All remaining applications must be received by February 2 of the admitting year. Interviews will begin in January for early admission candidates and in March for the remaining submissions. The admissions committee will use the interview to evaluate the candidate's critical thinking, interpersonal skills, and level of commitment and motivation to the process of obtaining a doctorate degree.

Initial offers of admission are made to students no later than April 1. Students are not required to respond to the College of Psychology regarding the offer of admission before April 15. However, students may accept or reject the enrollment offer at any time.

Transferring Credits from Other Institutions

The College of Psychology currently does not accept credits from other graduate institutions.

International Applicants

The College of Psychology currently does not accept international students.

Student Enrollment Agreement

The Student Enrollment Agreement must be completed and submitted to the college in order to show intent to enroll in the program. The Student Enrollment Agreement is a legally binding contract when it is signed by the incoming student and accepted by the institution.

By signing the Enrollment Agreement, the student is acknowledging that the catalog, disclosures, and information located on the website have been made available to the student to read and review.

Any questions or concerns regarding the Student Enrollment Agreement should be directed to the college or university department.

Catalog, Performance Fact Sheet, and Website

Before signing the Student Enrollment Agreement, the prospective student is strongly urged to visit the University and College website at www.cnsu.edu, and to read and review the CNU General Catalog and School Performance Fact Sheet (SPFS). The SPFS contains important performance data for the institution. The Catalog contains important information and policies regarding this institution.

Student's Right to Cancel, Withdraw, and Refund

You have the right to cancel the Student Enrollment Agreement until 12:01 AM on the first calendar day after the first classroom instruction session attended, or until 12:01 AM on the eighth calendar day after a student has signed the Enrollment Agreement, whichever is later.

Cancellation shall occur when you give written notice of cancellation to the Admission Office at the University's address shown at the top of the first page of the Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of cancellation sent by hand delivery, email, or facsimile is effective upon receipt by the University. Written notice of cancellation sent by mail is effective when deposited in the mail properly addressed with postage prepaid.

After the cancellation period described above, you have the right to withdraw from the University at any time. Withdrawal shall occur when you give written notice of withdrawal to the Registrar at the University's address shown at the top of the first page of the Enrollment Agreement. When withdrawing from the college/university, please complete the Official College Withdrawal form available from the Registrar's request form website: <http://www.cnsu.edu/office-of-the-registrar/registrar-services>. Do not use this form to indicate your intent to cancel your enrollment agreement.

For information on refund calculations due to cancellation or college withdrawal, please see the FINANCIAL SERVICES & DISCLOSURES on page 149 of this catalog.

Tuition & Fees

All tuition, fees, expenses and policies listed in this publication are effective as of May 2018 and are subject to change without notice by California Northstate University.

In the tables below, Psy1, Psy2, Psy3, Psy4, and Psy5 indicate the student's year in the program (e.g. Psy1 is a first-year student; Psy2 is a second-year student, etc.).

Tuition is charged on a full-time, semester basis. Generally, tuition and fees are charged to the student's account thirty (30) days prior to the start of each semester term. The above is based on the assumption that a student will attend each semester term on a full-time basis and meets all program requirements, which allows for a student to graduate after successfully completing four (4) years of coursework and one (1) year Internship for a total of five (5) years consisting of 146 credit hours.

Payment deadlines, loan obligations, refund calculations due to cancellation and withdraw, and the Student Tuition Recovery Fund (STRF) disclosures are located in FINANCIAL SERVICES & DISCLOSURES (page 148).

2018-2019 Doctor of Psychology (PsyD)

Tuition & Fees	Amount	Class
Enrollment Fee (nonrefundable)	\$200.00	Psy1
Tuition	\$33,500.00	Psy1, Psy2, Psy3
Tuition	\$14,000.00	Psy4, Psy5
Student Activity Fee	\$320.00	Psy1, Psy2, Psy3, Psy4, Psy5
Orientation Fee	\$50.00	Psy1
Technology Fee	\$50.00	Psy1, Psy2, Psy3, Psy4, Psy5
Graduation Fee ¹	\$350.00	Psy5
STRF Fee per \$1000 ²	\$0.00	Psy1, Psy2, Psy3, Psy4, Psy5
Psy1 Total Estimated Tuition & Fees per Year ³	\$34,120.00	
Psy2 Total Estimated Tuition & Fees per Year ³	\$33,870.00	
Psy3 Total Estimated Tuition & Fees per Year ³	\$33,870.00	
Psy4 Total Estimated Tuition & Fees per Year ³	\$14,370.00	
Psy5 Total Estimated Tuition & Fees per Year ³	\$14,720.00	

Total estimated cost for the 5-year Doctor of Psychology program ranges from \$136,000 to \$142,000.³

Estimated Other Optional Educational Related Costs ⁴	Amount	Class
Health Insurance Premium ⁵	\$3,200.00	Psy1, Psy2, Psy3, Psy4, Psy5
Books and Supplies ⁶	\$2,500.00	Psy1, Psy2, Psy3, Psy4, Psy5
Room and Board ⁶	\$23,272.00	Psy1, Psy2, Psy3, Psy4, Psy5
Transportation ⁶	\$4,648.00	Psy1, Psy2, Psy3, Psy4, Psy5
Psy1 Total Estimated Cost per Year ⁷	\$67,740.00	
Psy2 Total Estimated Cost per Year ⁷	\$67,490.00	
Psy3 Total Estimated Cost per Year ⁷	\$67,490.00	
Psy4 Total Estimated Cost per Year ⁷	\$47,990.00	
Psy5 Total Estimated Cost per Year ⁷	\$48,340.00	

¹ Covers regalia, transcriptions, etc.

² The STRF fee is \$0.00 per \$1,000 of institutional charges.

³ Based on estimated annual tuition increases of 3% to 5%. This is not binding on the University. Completion of the program in more than the prescribed 5 years could result in additional tuition and fees for the additional time of attendance, including, but not limited to, a Dissertation Extension Fee currently at \$4,187.50 per semester.

⁴ Costs and expenses a student may incur as part of participation in the applicable year of the PsyD program, whether or not paid directly to CNU College of Psychology. These expenses include estimated costs of living.

⁵ Optional, estimated, and will vary based on number of insured members.

⁶ Estimated amounts.

⁷ Includes tuition, fees, and other estimated educationally related costs. Some practicum or internship sites may require students to have a background check, fingerprinting, and/or CPR class.

General Policies

Orientation and Registration

First year orientation is mandatory for all new students. The Office of Student Affairs and Admissions must be notified of any absence due to illness or emergency if a student is not able to attend the scheduled orientation. The student will be required to provide documentation for the absence and complete a make-up orientation within the first week of school in addition to attending scheduled classes and maintaining course requirements.

Registration for classes requires:

1. All admission contingencies be fulfilled.
 - a. Admission contingencies include proof of medical insurance coverage and any other institutional requirements. Students may enroll in the Student Health Insurance Plan to satisfy the insurance requirement.
2. Financial aid clearance from the Financial Aid Office.
3. Completion of all new student paperwork.

New students must submit the Emergency Contact and Medical Information Form to the Office of the Registrar by the end of Orientation. To make updates, a new form must be submitted to the Registrar. The Office of the Registrar requires submission of the Authorization to Release Student Records if a student desires to grant a personal third-party (such as a parent, spouse, etc.) access to his/her student record. Please refer to the Directory Information and Access to Student Records section of this catalog for more information.

New students should review their local, home, and billing contact information via the Student Portal and update as needed. It is the student's responsibility to maintain valid contact information throughout their enrollment at CNU. Instructions for accessing the Student Portal is sent by the CNU IT department to the student's CNU email address.

Registration is conducted by the Registrar prior to the start of each semester for new and continuing students. Students with business, financial, or other registration holds on their account will not be registered until the Registrar is notified that the hold has been cleared. Students who are in compliance with institutional requirements or who have a hold on their student account at the time of registration are required to satisfy the requirement and may also be required to submit the Course Add/Drop form by the end of the Add/Drop period to register or make schedule changes.

Address Where Instruction Will Be Provided

Class sessions are conducted at 9700 West Taron Drive, Elk Grove CA 95757. Experiential education and clinical rotations and service learning activities is conducted at assigned professional clinical locations and community sites as established by agreement among the student, professional preceptor, and College.

Catalog, School Performance Fact Sheet, and Website

Before signing the Student Enrollment Agreement, students are strongly encouraged to visit the College website at <http://psychology.cnsu.edu/> and to read and review the CNU General Catalog and School Performance Fact Sheet (SPFS). The SPFS contains important performance data for the institution. The Catalog contains important information and policies regarding this institution.

By signing the Enrollment Agreement, the student is acknowledging that the catalog, disclosures, and information located on the website have been made available to the student to read and review

Instruction/Course Delivery

The PsyD program at the College of Psychology is designed to be completed in 5 years. Students will be in residency at California Northstate University full-time for their first 4 academic years. During the fifth year, students will be attending a full-time one-year internship. Students may elect to also do a two-year part-time internship.

Year 1 students will take 5 courses each semester. This provides the foundation necessary to begin practicum work. Year 2 and Year 3 students will take 4 courses each semester and attend a practicum. Year 4 students take a "Preparation for Internship" workshop and "Dissertation Research" seminar the first semester and in the second semester they will only take the "Dissertation Research" seminar. Year 4 students will also be attending a practicum.

Year 5 students will be attending a full-time internship. Because internships can take place anywhere in the country, there are no in class course requirements for this year and students are not expected to attend University functions.

All courses are delivered in English and English language services are not provided.

Academic Policies and Procedures

Academic Calendar

The academic calendar consists of two semesters lasting approximately 15 weeks long didactic coursework. Practicum and internship hours are completed throughout the calendar year. Students are required to complete a total of 1500 hours in practicum training and a 2000 hour clinical internship.

Credit Hour Policy

For each 15-week semester, 1 hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of 2 hours of out-of-class student work (homework) (LEC/SEM). For practicum and internship time, 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity (AL/EL).

Code	Course Type	Code	Course Type
AL	Active Learning	LEC	Lecture course
EL	Experiential Learning	SEM	Seminar

Grading Policy

Students must maintain a min. cum. grade point average (GPA) of 3.0.

	Definition	Grade Points		Definition	Grade Points
A	90.00-100%	4.00	P	≥70%, Pass*	Not in GPA
B	80.00-89.99%	3.00	NP	<70% No Pass	Not in GPA
C	70.00-79.99%	2.00	I	Incomplete	Not in GPA
D	60.00-69.99%	1.00	W	Withdrawal	Not in GPA
F	<60.00%	0.00			

*The grades of P and NP are only available to practicum and internship courses.

Course Withdrawal

With the written permission of the instructor, it is possible to withdraw from a course until the last day of class in each semester. Withdrawal from a course may impact the student's ability to graduate in five years so students should discuss their decision with their academic advisors. Course withdrawal and course registration changes may have financial implications and as such, students are encouraged to discuss their decision and options with the CNU Financial Aid Office. Officially withdrawn courses appear on the student's transcript with the grade of W. Failure to officially withdraw from a course by the last day of class will result in an issuance of an earned course grade.

Incomplete Course

In Incomplete (I) on the transcript is a preliminary, non-permanent notation indicates that work in the course was satisfactory but not completed by the time grades were due.

If the instructor gives a grade of Incomplete, the missing work is to be submitted to the instructor by the last day of class the following semester. If a student is unable to complete the coursework by this second due date, the instructor may grant an extension of the Incomplete. This extension can last no

longer than an additional semester. In this way all work towards the removal of an Incomplete grade must be completed no later than one year after the completion of the course, and then only with the instructor's permission. If a student does not complete all coursework required within the timeframe specified by the instructor, but no later than one year after the course, the Incomplete is changed automatically to an F.

GPA Calculation

To calculate cumulative GPA, letter grades will be converted to their numeric grade point value using the table above, and then added together. The sum is then divided by the number of courses taken. Practicums are not included in this calculation as they are taken on a pass/no pass basis. Grades received in retaken classes will be used in determining cumulative GPA. The grade initially received in the course will not be included in the calculation.

Degree Honors

Students who meet the cumulative GPA (CGPA) listed below will receive degree honors. The honor is noted on the degree.

High Distinction: CGPA of 3.90 or higher

Distinction: CGPA of 3.70- 3.89

Grade Appeal Procedure

If a student is not satisfied with a grade received or an academic evaluation, they should first approach the professor with their concerns. It is the policy of the College of Psychology that disagreements should be handled at the lowest level possible.

A student may file an appeal if there is continued disagreement regarding their academic performance. The appeal must be submitted within 10 business days of the online grade posting or receipt of the evaluation. The appeal must be in writing and submitted to the Assistant Dean of Academics or a representative. The Assistant Dean will respond to the appeal in writing within 10 business days of receipt.

If the appeal is not resolved to the student's liking, it can be resubmitted within 2 business days of receipt of response from the Assistant Dean of Academics to the Dean of the College who will render a decision within 10 business days. The Dean's decision is final.

A record of the final decision concerning the appeal will be kept on file in the Dean of Academics' office.

Course Repeat Policy

Each course can only be repeated once. Students who receive a D or F in a course are required to repeat the course. Students may elect to repeat any course in which they have received a C.

The grade initially received in the course will not be included in the cumulative GPA calculation. The grade received in the

retaken class will be used in calculating the student's cumulative GPA. Both the grade from the initial attempt and the repeated course will appear on the official transcript.

Each course can be repeated only once. Repeating courses may extend the students expected graduation date and may have financial implications. Students considering repeating a course are encouraged to discuss their decision with the CNU Financial Aid Office.

Course Add/Drop

Courses in PsyD program are sequential and progressive in difficulty. Students must take all courses offered in a given semester. Students may not add or drop required courses during the semester.

Students may make changes to elective course registration. The deadline to make changes to elective course registration is the fifth day of instruction for the semester.

Students have the right to withdraw or take a leave of absence from the program.

Academic Progression

To remain in good standing in the College of Psychology a student must:

1. Maintain a 3.0 grade point average.
2. Pass their first year readiness for practicum screening;
3. Receive satisfactory evaluations from their practicum sites and Academic Advisor;
4. Pass the Comprehensive Exam;
5. Finish their internship;
6. Complete their dissertation paperwork and submittals within the appropriate timeframes; and
7. Act in a manner that is consistent with the professional standards established by the American Psychological Association.

To support students in maintaining the necessary degree of academic excellence to remain in good standing, students will be meeting with their designated academic advisor. Although it is the student's responsibility to monitor and calculate their cumulative GPA throughout the course of their studies in the PsyD program, the academic advisor will inform students of their current cumulative GPA at each meeting.

A grade of D or F in a course indicates a lack of understanding of the fundamental concepts of the course material necessary for progression. Unless on an approved leave of absence, students must retake any class in which they have earned a grade of D or F in the following academic year. Each course can be repeated only once.

Practicum Readiness

Readiness for practicum is based on academic performance and feedback from the practicum preparation instructor.

The Practicum Preparation instructor completes a Practicum Readiness form that is forwarded to the Academic Advisor. The advisor can then choose to approve the student for advancement to practicum or recommend dismissal from the graduate program.

If the student is deemed unprepared for practicum placement by their Practicum Placement instructor or Advisor, their case will be presented to the Psychology faculty and a ballot issued. In rare cases the faculty may decide that there were extenuating circumstances leading to the student falling below the requirements for advancement.

If a majority of the faculty upholds the advisor's decision the student will be dismissed from the program.

Length of Program

Unless given written approval by the Dean, a student must complete the program within seven (7) years (84 calendar months) from the time they initially registered and attended their first course in the PsyD program.

Advancement to Candidacy

Requirements for advancement to candidacy include:

1. A 3.0 grade point average and completion of all coursework
2. Passing of the Comprehensive Exam
3. Approval from Academic Advisor
4. Removal of any probationary status
5. Completion and acceptance by the College of the student's dissertation
6. Completion of all practicum requirements
7. Completion of 1st semester of Internship

Once the above conditions have been met a student can apply for advancement to candidacy to obtain the doctorate degree. The student's record will be reviewed and a contract created stipulating that once the student completes their internship they will have graduated from the doctorate program.

Academic Probation and Dismissal

Probation

If a student fails to meet the "good standing" minimum requirements, they will be placed on probation.

Probation formally begins with a written notification to the student by their Advisor. It will include the reason for probation, probationary conditions, and the duration of probation. Students can return from probation by addressing the area of concern. For example, they may bring their GPA to 3.0 or they may speak to their practicum site and obtain a specialized contract to address their deficiencies.

Dismissal

A student may be dismissed from the program if they:

1. Fail to return from probation in the timeframe allotted;
2. Act in a manner that violates the ethical and professional standards of the APA as determined by faculty vote;
3. Fail to return from a leave of absence by the date specified; or
4. Their academic or professional actions have created a situation for which a warning or probation is inappropriate or impossible.

5. Have a cumulative GPA that falls below 2.0, or when it becomes mathematically impossible to graduate (i.e. a situation in which it is impossible to salvage an unacceptable GPA).

In the event that a student is dismissed from the PsyD program, the student may petition for readmission to the program with an endorsement from their Advisor. The petition will be voted on by full-time faculty and the approval must be unanimous. The petition is then sent to the Dean for final approval or rejection.

Academic Advisors

Students will be assigned an Academic Advisor upon entering the program. They will meet within the first semester of instruction to review the requirements of the program and the student's expectations and career goals. Throughout the program the student and Academic Advisor will meet each semester, though either the student or Advisor may choose to meet more frequently. At the end of their first year, the student will be evaluated and screened with regard to their academic performance and readiness for practicum in year 2.

Readiness for practicum is based on academic performance and feedback from the practicum preparation instructor. Upon receipt of the Practicum Readiness form from the instructor, the advisor can then choose to approve the student for advancement to practicum or recommend dismissal from the graduate program. See Academic Progression Policy.

The Advisor writes an evaluation of the student each year that becomes part of their academic record.

Attendance Policy

The curriculum for the doctorate degree in psychology provides a broad, generalist education by imparting knowledge that is sequential, cumulative, graded in complexity, and provides a basis for further professional growth. This requires that students attend all classes and complete all practicum and internship requirements. It is the policy of the College that students shall not have unexcused absences in excess of two missed classes during any given course. Individual instructors may impose their own attendance requirements.

Excused Absences

The College of Psychology recognizes that circumstances may cause a student to miss an occasional class. The student must make up the work missed if the absence is excused. A student may request an excused absence for the following circumstances:

- medical (self or immediate family)
- military duty
- immigration or naturalization
- emergency
- jury duty or legal/court mandated appearance
- bereavement (immediate family)
- professional conference (requires verification of academic standing)
- involvement in traffic accident documented by a law enforcement report.

Except where provided by state or federal law, absences in excess of ten consecutive academic days in a semester may require the student to request a leave of absence from the PsyD program. Students are encouraged to contact the Office of Academic Affairs for further information.

Procedure

A student seeking an excused absence should complete the Excused Absence Request Form and seek the course instructor's signature for each missed class within three business days upon return to campus. The course instructor will determine if the absence is excused or unexcused according to the above policy and the completed form should be submitted to the Office of Academic Affairs.

Planned Extended Absence

Extended absences are initiated by the student. If the student knows that they will need to miss class due to extenuating life circumstances, they have the option to file an Extended Absence Request form with the Office of Student Affairs.

Except where provided by state or federal law, a student may request no more than five academic days of leave per semester.

In the event that an extended absence is due to a medical condition, the student may not return to the program without appropriate medical clearance.

Leave of Absence

A leave of absence is approved for a specific period of time, no less than one semester, but not to exceed one academic year or to the time that it would be impossible for the student to graduate within 7 years from the student's program start date. While on a leave, the student cannot participate in any classes or related curriculum including, but not limited to practicums or internships. The student is eligible to return without reapplication if the absence is within the approved time frame.

During the leave of absence, the student is not considered enrolled in the University. For this reason, a student requesting a leave of absence is required to meet with the Financial Aid Manager and Business Office to determine the impact of their decision and any requirements needing fulfillment prior to the leave.

Students considering a formal leave of absence must meet with the Dean of Student Affairs the semester before the leave is to be taken or as soon as it is known that a leave of absence is needed. The request must include the basis for the request and expected time of return. The form should have the student's Academic Advisor and, if assigned, their dissertation Chair. If approved by all parties, the request will require a final signature from the Dean. To formally file the approved leave of the absence, the CNU Leave of Absence Form must be filed with the CNU Office of the Registrar. The student must submit the completed request form with the signatures of the Dean of Student Affairs, Financial Aid Manager, the Business Office, and the Registrar. The Leave of Absence form is available from the Office of the Registrar and online at: <http://www.cnsu.edu/office-of-the-registrar/registrar->

services. Approved leave of absences will be noted on the student's transcript. The date of leave status is the date the Registrar receives the signed form.

Non-attendance does not constitute notification of intent to apply for leave of absence status.

Return from Leave of Absence

Approximately 60 days from the planned return or other agreed deadline indicated on the initial approved Leave of Absence request form, the student is responsible for submitting the Intent to Return form to the Dean of Student Affairs. To initiate registration, the completed Intent to Return form must be submitted to the Office of the Registrar.

The student is required to return to the University/College at the beginning of the semester for which the return was planned

The student will have 30 days of the date of the notice to reply to the Office of Registrar with their intent to return to the University/College or officially withdraw.

A student who does not return to enrolled status at the end of an approved period of leave is no longer considered to be pursuing their doctorate degree. Students who fail to apply for a leave of absence or for whom leave is denied, but do not remain enrolled will be considered no longer pursuing their degree.

Withdrawal from the College/University

Students may voluntarily withdraw from the University/College at any time during the academic semester. The student will earn a "W" grade for a course(s) that is (are) not complete at the time the withdrawal is initiated. Informing the College of Psychology, your academic advisor, or instructor does NOT constitute official withdrawal from the program.

All withdrawals must be processed by the Office of the Registrar. Students must submit a completed Official University/College Withdrawal form to the Office of the Registrar. The form is available online at <http://www.cnsu.edu/office-of-the-registrar/registrar-services> and in the Office of the Registrar.

A student must meet with and receive signatures from the following departments before the form can be filed with the Office of the Registrar: Office of Academic Affairs/Student Affairs, Business Office, Financial Aid, and Office of the Registrar.

A student who officially withdraws from the University/College is entitled to apply for readmission.

Because of the sequential nature of the program, students wishing to reenter the graduate program will be considered on a case by case basis with determining factors including renewed commitment to the completion of the program, previous academic and clinical performance, and current openings in class enrollment.

Alcohol and Drug Abuse Policy

CNU policy prohibits the unlawful possession, use, manufacture, or distribution of alcohol or controlled substances by students and employees in buildings, facilities, grounds or property operated by CNU or as part of College activities.

Any student or employee found on CNU property or at a CNU sponsored event, including practicums and internships, abusing, using, possessing, manufacturing, or distributing controlled substances or alcohol in violation of the law shall be subject to disciplinary action in accordance to state law and the policies of CNU. Such University disciplinary action includes, but is not necessarily limited to, expulsion, termination of employment, referral for prosecution, and/or completion of an appropriate substance abuse assistance or rehabilitation program. Matters involving drug and alcohol use are taken very seriously by law enforcement officials and vigorously prosecuted by the District Attorney's office. A conviction can jeopardize the ability to receive a professional license.

Student Grievance Policy

If a student wishes to file a grievance, they can submit a written complaint using the Complaint/Grievance form. This can be in regards to an event at the University or at a practicum/internship site. It may be submitted to the Dean of Student Affairs and Admissions in a sealed envelope. The Dean of Student Affairs will handle the complaint in accordance to University policies and after a review of the facts will attempt to resolve the issue. Any resolution will be provided to the student in writing within 4 weeks of the form submission, excluding holidays and University breaks. If the complaint relates to the Assistant Dean, the matter will be handled by an alternate Assistant Dean. If the issue still cannot be resolved, a committee will be formed to address the issue on a case by case basis. It will include 3-5 faculty or staff. If the committee cannot resolve the matter it will be transferred to the Dean of the college for appropriate action.

Students may further appeal decisions during this process by filing a request with the Dean of the College within 5 days of receipt of the complaint/grievance resolution. The Dean's decision is final.

A record of student complaints is kept on file in the Dean of Student Affairs and Admissions' office and all aspects of the grievance process are kept confidential.

Curriculum Description

Didactic Courses

Course descriptions are located on page 106

Comprehensive Exam

The Comprehensive Exam is taken by 3rd year students and has both written and oral components. This exam is designed to test students' retention and integration of the information they have gained in the graduate program. The written portion of the test contains multiple choice and short answer questions provided to the Testing Committee by professors who have been teaching the students. The Committee will sort through the admissions and select enough material to create two exams covering the same areas of knowledge.

Once students have passed the written segment, they will have the opportunity to schedule the oral portion of their exam. They will be given once of a number of clinical cases carefully prepared by the faculty. During the oral exam students will be expected to give a case presentation to three faculty members providing a thorough formulation, assessment, diagnosis, and course of treatment.

If a student does not pass the written or oral portion of the exam they will have the opportunity to take either section a second time. If they again do not pass they will be placed on academic probation and remedies will be decided on a case by case basis.

Dissertation and Defense

Dissertations are the culminating experience for a student pursuing a doctorate in psychology. It represents their opportunity to create an original scholarly work that contributes new information to the field's body of knowledge.

Students are expected to formulate their dissertation question throughout the course of the program and to begin work on the project once they have adequate knowledge of research design and implementation. Once students have a firm idea of the hypothesis they wish to test, they should begin seeking faculty members that will agree to be their Chair and Vice Chair. If the student wishes to select a Chair who is not a member of the College of Psychology faculty they must get permission from their Advisor to ensure the potential committee member understands and meets the high expectations required for acceptance of a dissertation by the College of Psychology.

The process of completing a dissertation can take a considerable amount of time and there are workshops to assist students provided during the entirety of the 4th year. Because of the complexity of requirements regarding the completion of the research, development, implementation, and writing of the dissertation a separate Dissertation Handbook has been created. Students are encouraged to obtain a copy from their Advisor early in their graduate studies so that they can complete all requirements before attending their internship.

Clinical Training

Practicums

During the first year of graduate study students will take a year-long Practicum Preparation course designed to integrate the information they are receiving in their classes with the practical knowledge they need to be successful in their practicum training. This is also a forum where they can express their expectations and concerns with other students regarding their first year in graduate school.

In years 2-4 students will be engaged in off-site practicums. The Field Placement Office will have a list of potential practicum sites in the Greater Sacramento area and students will apply and interview in the spring prior to the beginning of a practicum placement. During these years in practicum, students will be enrolled in a Practicum Case Conference. This seminar series provides a space where participants can share their clinical experiences and receive feedback from their peers and the professor.

Students are expected to complete a minimum of 1500 hours of supervised clinical experience prior to internship. Time spent at sites and the complexity and degree of clinical interventions will increase each year. Students are encouraged to manage their time carefully to ensure that all practical and academic requirements are met. In return for their services, practicum sites will provide students supervised experience working with diverse individuals presenting various diagnoses and interpersonal issues. Practicums provide weekly individual supervision, didactic training, and evaluations of student performance based on direct observation of clinical interventions.

Internship

During the first semester of their 4th year, students will be attending a workshop to help them prepare internship applications. Other class requirements are reduced to allow students the time necessary to complete the application process and travel to attend interviews. Students will participate in the AAPI match system. This process will be thoroughly explained in the 1st semester of year 4. Internships are full time commitments and take up the entirety of the 5th year in graduate school.

All students must apply to APA internships as part of the College of Psychology curriculum, however, some may not obtain a position through the match system. If this occurs, the student may apply the following year, keeping in mind that they must complete all graduation requirements in 7 years. They may also apply for a CAPIC internship or work with a private psychologist to earn their internship hours as a psychological assistant. Students may elect to participate in these other internship opportunities to complete their doctorate requirements.

Professional Series

Also known as the "Brown Bag Seminars," present an opportunity for all CNU students to gain insight from professionals about the issues presented to psychologists working in the field and allow them to form relationships with professionals from different sub-fields of psychology.

PSY Course Descriptions

Didactic Courses

PSY 601 Foundations of Behavior: Biological (3 cr)

This course focuses on the biological underpinnings of behavior including neural, physiological, anatomical, and genetic influences.

PSY 602 Foundations of Behavior: Cognitive and Affective (3 cr)

This course examines the ways in which humans learn, elements that affect memory, how thought processes are categorized, and a general overview of decision making. It will also cover response, mood, feeling states, and the interplay between behavior and emotion. Topics will include arousal, intensity, and interaction.

PSY 603 Psychopathology: Adult (3 cr)

This series goes through the DSM-V reviewing mental conditions found in adult patients. Attention will also be given to the construction of the DSM and a comparison to the ICD 10.

PSY 604 Psychopathology: Child/Adolescent (3 cr)

This course will review DSM-V diagnoses that are most commonly found among children or adolescents. Special attention will be given to the autistic spectrum and learning disabilities.

PSY 605 History and Systems (3 cr)

This course includes the origins and development of major areas in the discipline of psychology. The class will move through historical changes in the profession while examining the social and cultural factors that contributed to the advent of particular theories. The course will also examine the changes that have occurred in the discipline, its expanding role in healthcare, and its current state as a profession.

PSY 606 Foundations of Behavior: Developmental (3 cr)

This class focuses on the human lifespan, transitions through various stages of growth, and the intellectual and behavioral changes that occur across an individual's lifespan.

PSY 607 Foundations of Behavior: Social and Cultural (3 cr)

The study of social and cultural behavior includes group process, attributions, discrimination, societal attitudes, and the interface between the subjects of sociology and psychology.

PSY 608 Standards and Ethics (3 cr)

This course reviews the current American Psychological Association's Ethics and Professional Code through the

lens of real world cases. Students will be challenged in their thinking as they move from recipients of healthcare to practitioners.

PSY 613 Research Methods and Statistics 1 (3 cr)

This class prepares students to critically read research, understand the mathematical underpinnings of assessment measures, and to begin work on their own research and dissertation. They will learn the strengths and limitations, means of interpretation, and the technical aspects of rigorous case study. They will learn the difference between correlational, descriptive, and experimental research designs while studying measurement techniques such as sampling, replication, and theory testing. Along with quantitative measures, students will be introduced to qualitative methods including meta-analysis and quasi-experimentation. Using statistics, they will learn to engage in mathematical modeling, analysis of psychological data, description, inference, univariate and multivariate analysis, null-hypothesis testing, power, and estimation.

PSY 614 Research Methods and Statistics 2 (3 cr)

This class prepares students to critically read research, understand the mathematical underpinnings of assessment measures, and to begin work on their own research and dissertation. They will learn the strengths and limitations, means of interpretation, and the technical aspects of rigorous case study. They will learn the difference between correlational, descriptive, and experimental research designs while studying measurement techniques such as sampling, replication, and theory testing. Along with quantitative measures, students will be introduced to qualitative methods including meta-analysis and quasi-experimentation. Using statistics, they will learn to engage in mathematical modeling, analysis of psychological data, description, inference, univariate and multivariate analysis, null-hypothesis testing, power, and estimation.

PSY 650 Practicum Preparation 1 (3 cr)

This course is designed to prepare students for starting work in the community as new practitioners and is continued into PSY651. Students work toward understanding theoretical orientations, their role as a student volunteer, what their rights and responsibilities will entail as a practicum student, procedural elements such as charting and organizing their appointments, and how they can best use practicums as a means of applying the knowledge they have learned in class. This course is also an open forum where students can express concerns, support, and questions regarding their first year in graduate school. As part of this course, students will engage in interaction with

standardized patients (actors) under the guidance and observation of faculty.

PSY 651 Practicum Preparation (3 cr)

This course is designed to prepare students for starting work in the community as new practitioners and is a continuation of PSY650. Students work toward understanding theoretical orientations, their role as a student volunteer, what their rights and responsibilities will entail as a practicum student, procedural elements such as charting and organizing their appointments, and how they can best use practicums as a means of applying the knowledge they have learned in class. This course is also an open forum where students can express concerns, support, and questions regarding their first year in graduate school. As part of this course, students will engage in interaction with standardized patients (actors) under the guidance and observation of faculty.

PSY 703 Psychometrics (3 cr)

This course builds on the basics learned in Research Methods and Statistics, preparing students for a deeper understanding of topics that will be necessary as they move through the assessment series and start work on their dissertation. This course reviews theory and techniques of psychological measurement, scale and inventory construction, reliability, validity, evaluation of measurement quality, classical and contemporary measurement theory, and standardization. This is also the first class that introduces students to the formal requirements of the dissertation process.

PSY 710 Best Practices Series: Child and Family (3 cr)

This course will examine common psychological conditions and their scientifically proven treatments for children and their families in a variety of settings.

PSY 711 Best Practices Series: Adults (3 cr)

This course will examine common psychological conditions and their scientifically proven treatments for adult patients in a variety of settings.

PSY 712 Best Practices Series: Groups and Organizations (3 cr)

This course focuses on interventions for groups, with special attention given to substance disorders and the ethical and professional issues that differentiate work with groups and individuals. The course will also examine the structure, process, and culture of organizations by examining the relationship between employees and the companies they serve. Motivation, change management, and the process of business consultation will be major topics of the course.

PSY 720 Assessment Series: Intelligence (3 cr)

This class focuses on intellectual assessment of both children and adults. It also introduces students to assessment report writing, the various components

necessary in client interviews, and how to review supplementary information.

PSY 721 Assessment Series: Personality and Emotion (3 cr)

This portion of the Assessment Series focuses on tests that gauge a patient's personality and emotional state. Measurements will include those that detect personality disorders and mood disturbances.

PSY 722 Assessment Series: Neuropsychological (3 cr)

This course is the culmination of the assessment series, using knowledge students have gained about both brain function and the capabilities of psychological assessment. Students will complete full neuropsychological batteries and review cases of severe impairment, injury, stroke, and dementia.

PSY 801 Human Diversity (3 cr)

This course will review the social and cultural context of both patient care groups and the clinicians themselves. Students are expected to promote a healthy and safe environment in the class while challenging their own preconceptions and attitudes. They will also be taught the latest research regarding cultural attitudes and norms and the way human diversity effects psychological treatment.

PSY 804 Consulting and Supervision (3 cr)

All psychologists will be consulting throughout their career, whether it is with other psychologists and healthcare providers or with members of the public and professional organizations. This course addresses effective means of supervision and spotlights ethical issues that present themselves in the supervisor/supervisee relationship.

PSY 811 Leadership in Health Professions 1 (3 cr)

This is the first semester of a year-long course that divided over two semesters and is attended by students from all three colleges at California Northstate University. It uses experiential learning, real world cases, class discussion, and the latest research to help students develop their own voices as future leaders in the healthcare industry. Students will also gain a deeper appreciation of the talents, skills, and abilities each profession brings to case formulation and the treatment of patients.

PSY 812 Leadership in Health Professions 2 (3 cr)

This is the second semester of a year-long course that divided over two semesters and is attended by students from all three colleges at California Northstate University. It uses experiential learning, real world cases, class discussion, and the latest research to help students develop their own voices as future leaders in the healthcare industry. Students will also gain a deeper appreciation of the talents, skills, and abilities each

profession brings to case formulation and the treatment of patients.

PSY 860 Preparation for Internship Workshop (2 cr)

This course takes place in Year 4 of the program and assists students in the construction and development of their internship application. Materials will be reviewed and constructive criticism given to improve students' chances of obtaining the internship of their choice. Students will also assist each other through mock interviews, needed motivation, and assistance in finding the best fit for each applicant.

PSY 861 Dissertation Research Seminar 1 (2 cr)

First semester. This series takes place in Year 4 and is designed to assist students with the completion of their dissertation. Students will find a supportive environment where they can work through challenges, seek feedback, and progress in a systematic fashion towards completion the capstone to their doctorate experiences.

PSY 862 Dissertation Research Seminar 2 (2 cr)

Second semester. This series takes place in Year 4 and is designed to assist students with the completion of their dissertation. Students will find a supportive environment where they can work through challenges, seek feedback, and progress in a systematic fashion towards completion the capstone to their doctorate experiences.

Elective Courses

PSY 802 Introduction to Health Psychology (3 cr)

Elective course. This class will focus on the interface between behavior, cognition, and illness. A review of conditions most commonly referred to by psychologists in a hospital setting will form the foundation of the subject along with the interface between psychologists, physicians, and nursing staff. Special attention will be given to healthcare delivery systems and the different populations they serve.

PSY 803 Crisis/Trauma Intervention (3 cr)

Elective course. Students in this course will learn effective means to evaluate and treat patients in crisis or whom have experienced recent traumatic events. Subjects covered will include an extensive review of the legal avenues for treatment and the ethical responsibilities of clinicians.

PSY 805 Substance Abuse Treatment (3 cr)

Elective course. This course will focus on both individual and group treatment, the interaction between substance abuse and mental disorders, and community resources. Students will go into depth regarding substances and their effects on the brain.

PSY 806 Introduction to Forensic Psychology (3 cr)

Elective course. This course will examine the interface between psychology and the law. Discussion topics will include competency, violence risk, commitments, malingering, and testimony. There will also be a review of common assessment tools and report writing for the courts.

PSY 808 Psychopharmacology (3 cr)

Patients are often prescribed medication in conjunction with behavioral interventions. It is imperative that students learn about the medications that can be used to treat disorders, the resultant physiology, and their overall effectiveness.

Practicum Experiences

PRC 713 Practicum Case Conference (1 cr)

First semester. This seminar series takes place while the student is in practicum and provides a space where participants can share their clinical experiences and receive feedback from their peers and the professor. These sessions occur once per week and are kept at a maximum enrollment of 8 students per session.

PRC 714 Practicum Case Conference (1 cr)

Second semester. This seminar series takes place while the student is in practicum and provides a space where participants can share their clinical experiences and receive feedback from their peers and the professor. These sessions occur once per week and are kept at a maximum enrollment of 8 students per session.

PRC 750 Practicum 1 (2 cr)

Completed during the first semester of Year 2. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection. (Grading P/NP only)

PRC 751 Practicum 1 (2 cr)

Completed during the second semester of Year 2. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection. (Grading P/NP only)

PRC 752 Practicum 1 (2 cr)

Completed during the summer semester of Year 2. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection. (Grading P/NP only)

PRC 813 Practicum Case Conference (1 cr)

Third semester. This seminar series takes place while the student is in practicum and provides a space where participants can share their clinical experiences and receive feedback from their peers and the professor. These sessions occur once per week and are kept at a maximum enrollment of 8 students per session.

PRC 814 Practicum Case Conference (1 cr)

Fourth semester. This seminar series takes place while the student is in practicum and provides a space where participants can share their clinical experiences and receive feedback from their peers and the professor. These sessions occur once per week and are kept at a maximum enrollment of 8 students per session.

PRC 850 Practicum 2 (3 cr)

Completed during the first semester of Year 3. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection. (Grading P/NP only)

PRC 851 Practicum 2 (3 cr)

Completed during the second semester of Year 3. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection. (Grading P/NP only)

PRC 852 Practicum 2 (3 cr)

Completed during the summer semester of Year 3. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary

in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection. (Grading P/NP only)

PRC 913 Practicum Case Conference (1 cr)

Fifth semester. This seminar series takes place while the student is in practicum and provides a space where participants can share their clinical experiences and receive feedback from their peers and the professor. These sessions occur once per week and are kept at a maximum enrollment of 8 students per session.

PRC 914 Practicum Case Conference (1 cr)

Sixth semester. This seminar series takes place while the student is in practicum and provides a space where participants can share their clinical experiences and receive feedback from their peers and the professor. These sessions occur once per week and are kept at a maximum enrollment of 8 students per session.

PRC 950 Practicum 3 (3 cr)

Completed during the first semester of Year 4. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection. (Grading P/NP only)

PRC 951 Practicum 3 (3 cr)

Completed during the second semester of Year 4. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement Office has final approval on practicum selection. (Grading P/NP only)

PRC 952 Practicum 3 (3 cr)

Completed during the summer semester of Year 4. 1 hour of credit is assigned approximately 3 hours each week of student time spent in this activity. Each practicum lasts between 9-12 months. Practicums vary in setting, patient population, and difficulty as the student progresses through the program. Students may apply to potential practicum sites based on their developmental level and practicum sites will select potential practicum students. The Field Placement

Office has final approval on practicum selection.
(Grading P/NP only)

Internship Experience

960 Internship (40 hours per week for 12 months)

Students participate in an APA internship or a CAPIC internship. Alternatively, students can work with a private psychologist to earn their internship hours as a psychological assistant. Part-time is available and requires 24 months to complete. (Grading P/NP only)

PsyD Curriculum

1st Year	Course#	Course Title	Credits	Semester
	PSY 601	Foundations of Behavior: Biological	3	Fall

COLLEGE OF HEALTH SCIENCES

Mission, Vision, and Values

Mission: To advance the art and science of healthcare.

Vision: Evolution to excellence in education requires continual pursuit of higher levels of performance and achievement. We seek to challenge undergraduate students with a comprehensive academic program that prepares them for success and leadership in a professional healthcare career. Quality education for students pursuing a career in healthcare professions begins with rigorous study of core sciences such as biology and chemistry. The program of education must further empower students to apply quantitative methods and critical thinking to the practice of healthcare. Strength of character and interpersonal skills essential for work in healthcare-related fields are developed and enhanced through the study of relevant humanities and social science disciplines. Along with traditional lecture and lab courses, the opportunity to perform community service learning projects and independent scholarly research provides important capstone experience in applying concepts and theory learned in the classroom to real-world situations.

Values: Integrity, Ethical Conduct, Empathy, Inter-Personal Collaboration, Social Accountability, Civic-Minded Commitment to Service, Respect for Human Diversity

Educational Philosophy

The philosophy of our academic programs encompasses three goals of competency and personal development which students who pursue careers in biomedical science and healthcare must attain in order to be compassionate practitioners. These competencies broadly include Cognitive Ability and Intellectual Depth, Social and Communication Skills, and Community Engagement/Civic Responsibility.

Cognitive Ability and Intellectual Depth corresponding to command of any subject is best achieved by thoughtful study of the relevant body of knowledge under the guidance of a teacher who is an expert in the field and is well prepared to mentor students. Learning is often a demanding and inscrutable process, but it is known to emerge reliably from the interplay of thoughtful reading, attendance of inspiring lectures, case studies and practice problems, classroom discussion, and assessment. Ultimately, every student must commit to personal engagement in the learning process using methods that work best for the individual. There is no magic substitute for the hard work of studying. However, our faculty members are tasked to use innovative teaching methods and

technologies proven to be effective by pedagogical research. Each concentration and every course delivered at CNU has specific learning outcomes that are measured by various forms of assessment. The assessment results are used to make changes that continually improve upon teaching and the curriculum. The goal of every teacher is not merely to convey a list of facts but to transform novice students into active scholars and ultimately prepare them for life-long learning. Every field of knowledge, especially science, is being constantly revised by discovery through research. Learning a subject does not end with the final exam of the course; it only begins a life's journey.

The goal of acquiring Social and Communication Skills acknowledges the need to communicate effectively. As professionals, we must be proficient in the art of written and verbal communication in order to exchange technical information. Moreover, the best health science in the world loses its purpose unless it can benefit the people who need it. This process involves personal interaction between the healthcare professional and the patient or consumer. The patient must feel free to communicate concerns and the care provider must be able respond effectively. Values beyond mastery of medical science such as empathy and compassion fall within this area. Emotional and cultural understanding must be conveyed along with the delivery of care. These values are difficult to objectify but they fall within the realm of liberal arts, humanities, and social sciences. Courses such as Cultural Anthropology, Sociology, Psychology, Art Appreciation, and Music Appreciation provide context and insights into the complexity and diversity of human behavior. Our students are encouraged to become socially and intellectually well-rounded through the study of human culture and participation in extra-curricular activities.

Community Engagement and Civic Responsibility also lies within the territory of being a health science professional. People need to live in healthy communities in order to sustain their own good health. Health care professionals play a major role in fostering a healthy society by advocating for policies that promote the conditions, resources, and behavior conducive to social well-being. Our educational program guides students to the rich content of voluntary service and contributing to the greater good through supervised projects that partner with advocacy groups and organizations for the benefit of the community at large.

Learning Outcomes

The goals of the Bachelor of Health Sciences program are defined and assessed by a set of carefully designed

Program Learning Outcomes and General Education Learning Outcomes. These outcomes specify the intellectual substance and interpersonal communication skills that our students are expected to demonstrate by the time they graduate.

As overarching educational standards, Program Learning Outcomes (PLOs) define the primary learning agenda and the associated platform of assessment that measures teaching effectiveness and student competency.

Program Learning Outcomes (PLOs)

Upon successful completion of the CNUCHS Bachelor of Science in Health Sciences, students will be able to demonstrate the following learning program learning outcomes:

1. **Core Sciences and Mathematics.** Demonstrate knowledge of the core sciences and mathematics.
2. **Arts and Humanities.** Demonstrate understanding of how the arts and humanities enhance health, well-being, and healthcare practice and delivery.
3. **Healthcare Delivery Systems.** Demonstrate understanding of the collaborative nature of healthcare delivery.
4. **Professional Interaction.** Communicate with respect, empathy, and cultural competence.
5. **Social Accountability and Community Service.** Acts with social accountability and demonstrates commitment to community service.

Co-Curricular Learning Outcomes:

Upon successful completion of the CNUCHS Bachelor of Science in Health Sciences, students will be able to demonstrate the following co-curricular learning outcomes:

1. **Social Awareness and Cultural Sensitivity.** Demonstrate awareness of and responsiveness to social and cultural differences by adapting behaviors appropriately and using effective interpersonal skills.
2. **Self-Awareness and Learning.** Demonstrate self-awareness through reflection and the development of appropriate plans for self-directed learning and development.
3. **Service and Leadership.** Demonstrate the ability to lead and work collaboratively with others to accomplish a shared goal.
4. **Professionalism.** Demonstrate professional behavior and effective interactions with others.
5. **Oral Communication.** Demonstrate appropriate delivery techniques when communicating materials to an audience.

General Education Learning Outcomes (GELOs)

Upon successful completion of the CNUCHS Bachelor of Science in Health Sciences, students will be able to demonstrate the following general education learning outcomes:

1. **Written Communication.** Demonstrate the ability to write coherent, supported and logically structured prose.
2. **Oral Communication.** Listen and speak effectively in formal communication.
3. **Information Literacy.** Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations.
4. **Critical Thinking.** Exercise reasoned judgement to assess technical information and make well-informed decisions using evidence-based approaches.
5. **Scientific Inquiry and Quantitative Reasoning.** Demonstrate knowledge of the complexity of biological systems and chemistry of matter through research with the use of mathematics and statistics in problem solving.
6. **Liberal Arts.** Demonstrate knowledge of diverse human cultures and influences of social forces, economic principles, and human interactions within the framework of social sciences.

The GE Requirements encompass a suite of courses that provide a broad educational framework for students. The GE curriculum at CNU CHS is designed to provide students with a solid foundation for advanced studies and essential skills needed to work effectively in diverse health-related careers. As required by the California Code of Regulations– Title 5– Article 2 on Admissions and Academic Achievement Standards “At least 25 percent of the credit requirements for a Bachelor’s Degree shall be in general education.” Accordingly, the GE courses comprise approximately 42 credit units of the minimum 120 required credits for graduation (35% of total degree credits).

The GE Learning Outcomes are fulfilled by completion of the following courses:

1. Written Communication (6 cr)

-ENGL 110 (3 cr); ENG 120 (3 cr)

2. Oral Communication (3 cr)

-COMM 110 (3 cr)

3. Information Literacy (3 cr)

-ENGL 120 or COLL 310 (3 cr)

4. Critical Thinking (3 cr)

-PHIL 310 or COLL 320

5. Scientific Inquiry and Quantitative Reasoning (14 cr)

- BIOL 110/L (3 cr/1 cr) and CHEM 110/L (3 cr/1 cr);
- MATH 120 (3 cr); & MATH 125 (3 cr) or MATH 130 (3 cr)

6. Liberal Arts (13 cr)

- Fine Arts (3 cr): ARMU 110 (3 cr), ARMU 120 (3 cr), or approved Arts elective
- Humanities (3 cr): ANTH 210 (3 cr) or approved Humanities elective
- Social Sciences (3 cr): ECON 210 (3 cr), GOVT 110 (3 cr), SOCL 110 (3 cr), or approved Social Sciences elective
- Social Accountability and Community Service (6 cr): COLL 210 (2 cr) and COLL 220 (2 cr)

Note: Approved course electives may be transfer credits including credit awarded by AP/IP exam, transfer courses, course substitution, or a CHS offered course designated as meeting the GE requirement area.

Academic Programs

Overview

The College of Health Sciences offers an undergraduate program leading to the Bachelor of Health Sciences (B.S.) degree. CHS has combined degree programs with California Northstate University's College of Medicine and the College of Pharmacy.

Bachelor of Science (BS)

In the undergraduate Bachelor of Science (BS) in Health Sciences program, students may choose from three concentrations within the program: Human Biology, Biopsychology, and Health Science Administration. Each concentration has a defined curriculum progressing from introductory to advanced courses. All concentrations include the same General Education (GE) requirements that fulfill a common set of learning outcomes spanning communication and critical thinking skills, natural sciences, liberal arts, and the social sciences. Additionally, the three concentrations are aligned with specific options for career paths in healthcare. This comprehensive program delivers a robust university education that prepares graduates to think independently and creatively as well as training them for practical occupations in health science.

Concentrations of Study Descriptions

Human Biology: This concentration is appropriate for students who are seeking focused coursework in biomedical sciences. It is a challenging curriculum that focuses upper division coursework on advanced topics of human biology such as functional anatomy, human genetics, microbiology, immunology, and pharmacology. Students who complete this concentration are expected to be exceptionally well prepared for a variety of professional health programs and employment in a variety of healthcare-related professions.

Biopsychology: This concentration is also appropriate for students headed for professional health programs since it includes many of the same rigorous basic science courses as the Human Biology concentration. However, students following this plan of study choose from a suite of psychology courses in the science of human behavior, mental health and mental illness. Such courses include developmental psychology, cognitive psychology, health psychology, and abnormal psychology. In addition to medical school options, students choosing this concentration will have a strong academic background for graduate schools that provide specialized training and certification for occupations such as clinical psychologists, psychiatrists, and counselors.

Health Science Administration: This concentration is offered for students who wish to work in the administrative side of health care delivery. The curriculum includes introductory science in the first year that is essential for understanding the basics of human biology. The second to fourth years of the curriculum consist of many courses relevant to business and management. Such courses include human resources management, healthcare financing, healthcare regulations and accreditation, and entrepreneurship. Students who complete this concentration will have a strong background in business and science to work

as administrators, managers, and sales representatives in hospitals, medical insurance companies, public health agencies, the pharmaceutical sector, health advocacy foundations, and other professions.

Bachelor of Sciences and Doctor of Medicine (BS-MD)

BS-MD combined programs offer high school applicants multiple options to enter the professional Doctor of Medicine (MD) program. Some program options are designed to allow entering freshmen to complete their pre-medicine coursework and MD in an accelerated time frame if they meet specific criteria. Students accepted into a BS-MD combined programs option will begin their program of study in the College of Health Sciences (CHS) undergraduate program to complete the MD prerequisite criteria and academic coursework. These students will work closely with the CHS pre-health advisors to ensure completion of all the required criteria and academic course prerequisites.

These students will also be required to participate in at least one activity per year in the CNU College of Medicine (COM) campus activity program. The COM campus activity program is designed to educate pre-medicine students about their future profession through community health service opportunities, specialty career exploration workshops, lab experiences, and special professional education sessions. This special program offers priority acceptance to the very competitive MD program provided they meet all the MD admission criteria.

Students have the opportunity to complete their BS degree and MD degree in an accelerated time frame--six to seven years in addition to the traditional eight years.

For the accelerated programs, at the end of the first year of COM coursework, the qualified BS-MD combined programs students who meet the graduation criteria of CHS will be eligible to earn the Bachelor of Science degree in Health Sciences.

2+4 BS-MD

Two Years Undergraduate + Four Years Doctor of Medicine. Students are required to take some classes in summer to fulfill the COM MD admissions requirements and CHS degree requirements for the Bachelor of Science.

3+4 BS-MD

Three Years Undergraduate + Four Years Doctor of Medicine. Students have the option to take some classes in summer to fulfill the COM MD admissions requirements and CHS degree requirements for the Bachelor of Science.

4+4 BS-MD

Four Years Undergraduate + Four Years Doctor of Medicine. Students have the option to take some classes in summer to fulfill the COM MD admissions requirements and CHS degree requirements for the Bachelor of Science.

Bachelor of Sciences and Doctor of Pharmacy (BS-PharmD)

BS-PharmD combined programs offer high school applicants two options to enter the professional Doctor of Pharmacy (PharmD) program. Both program options are designed to allow entering freshmen to complete their pre-pharmacy coursework and PharmD in an accelerated time frame if they meet specific criteria. Students accepted into a BS-PharmD combined programs option will begin their program of study in the College of Health Sciences (CHS) undergraduate program to complete the prerequisite criteria and academic coursework. These students will work closely with the CHS pre-health advisors to ensure completion of all the required criteria and academic course prerequisites outlined below.

These students will also be required to participate in at least one activity per year sponsored by CNU College of Pharmacy (COP). The COP campus activity is designed to educate pre-pharmacy students about their future profession through community health service opportunities, specialty career exploration workshops, lab experiences, and special professional education sessions. This special program offers priority acceptance to the very competitive PharmD program provided they meet all the PharmD admission criteria. In addition, students have the opportunity to complete the Doctor of Pharmacy degree in an accelerated time frame--six to seven years instead of the traditional eight years.

In addition, at the end of the first year of COP coursework, the qualified BS-PharmD combined programs students who meet the graduation criteria of CHS will be eligible for the Bachelor of Science degree in Health Sciences.

2+4 BS-PharmD

Two Years Undergraduate + Four Years Doctor of Pharmacy. Students are required to take some classes in summer to fulfill the COP PharmD admissions requirements and CHS degree requirements for the Bachelor of Science.

3+4 BS-PharmD

Three Years Undergraduate + Four Years Doctor of PharmD. Students have the option to take some classes in summer to fulfill the COP PharmD admissions requirements and CHS degree requirements for the Bachelor of Science.

Pre-Medicine Post-Baccalaureate

The Pre-Med Post-Baccalaureate coursework is designed to enhance the academic credentials and application portfolio of students aiming for a professional degree in the health professions. The post-baccalaureate provides a comprehensive 1-year educational experience that includes coursework in biomedical science and test preparation for medical school admission (i.e., MCAT exam).

Students will complete a minimum of 27 credit hours of advanced undergraduate coursework in the physical and social sciences over the course of two semesters. Students can also enroll in elective courses to engage in a community service learning project or serve as a standardized patient in role-play mode with medical and pharmacy students as supervised by medical school faculty.

Topics covered in career-building workshops for medical school admission include health professions seminars, MCAT exam skill-building and practice testing, application procedures (AMCAS, PHARMCAS), interview coaching, and portfolio fine-tuning. A comprehensive letter of recommendation will be provided for all students who complete the program. Fall admission is open through August 31.

Admission to the College of Health Sciences

Applicant Status Definitions

First-Time College Student: The College of Health Sciences (CHS) defines a first-time college student applicant as one who is either currently enrolled in, or has graduated from, a high school and has not registered in a regular session at any collegiate level institution since high school graduation. An applicant who has completed college courses while in high school or in a summer session immediately following high school graduation is still considered a first-time college student applicant.

Transfer Student: A transfer student applicant is a student who has been a registered student in a regular term at a college, university or in college-level extension classes since graduating from high school. A summer session attended immediately following high school graduation is excluded in this definition. Transfer applicants may not disregard any of their college records or apply for admission as a first-time college student. Students with 24 or more college credits are considered transfer students.

International Student: International student applicants are applicants with citizenship from any country other than the United States of America.

College Admission Criteria

The College offers rigorous programs seeking high school graduates who demonstrated notable academic and co-curricular accomplishments, and an interest in serving society in the health professions. The goal of the admission process is to identify and select applicants that have an excellent chance of success, are most likely to thrive at our campus, and will enhance the university's academic and cultural community.

The CHS Admissions Committee employs a holistic review, relying on both quantitative and qualitative indicators, to admit the most qualified applicants. A holistic review tool, scoring guide and a rubric were jointly developed by the Admissions Committee and the Assessment Committee of the College. The Admissions Committee reviews applications and makes admission recommendations based upon the qualifications of the applicant pool.

Admission Criteria for First-Time College Student

The Admissions Committee has established the following criteria for selecting and enrolling qualified students. The admissions criteria are posted on the CHS website and included in printed CHS brochures and other marketing materials.

2018-2019 Admission Requirements for Traditional Students

Min HS GPA	2.70
Min SAT (after 03/2016)*	1130
Min ACT	22

Admission Criteria for Transfer Students

Transfer students are those with 24 or more transferrable college credits. Admission of transfer students requires a 2.70 or higher in college coursework.

2018-2019 Admission Requirements for Transfer Students

Min HS GPA	2.70
Min SAT (after 03/2016)*	NA
Min ACT	NA
Interview	NA

*Math and Evidence-Based Reading and Writing (M+ERW) **Math and Reading

Guidelines for Evaluation of Transfer Student Coursework

- For applicants seeking to matriculate to CNUCHS as a transfer student from another college or university, the following general standards apply to the acceptance and award of transfer credits:
- CNUCHS will consider transfer of credit for college-level (not remedial) courses in which the student has earned a minimum grade of "C" (2.0 = "C" Grade Point Equivalent) (4.00 = "A") or higher from accredited colleges and universities.
- A maximum of 60 credit hours will be considered for transfer from regionally accredited community colleges, junior colleges, two-year and/or four-year colleges, and other accredited colleges, with the exception of certain unrecognized programs.
- Acceptance of any course for transfer credit granted toward the BS is subject to evaluation of the course topic, content, and teaching methodologies/pedagogy by expert faculty in that discipline.
- Course credits earned at other institutions based on different credit hours from those used by CHS are subject to conversion and possible decrease in credit hour value.
- Quarter-hours are converted to semester hours by multiplying those hours by 0.67. For example, 4 quarter-hours are equal to 2.68 semester hours.
- Transfer students are subject to the same graduation requirements as CNUCHS for the B.S. degree.
- The CHS cumulative grade point average (GPA) is based solely upon coursework taken at CNU.

Types of Transfer Credits NOT Accepted by CNU:

- Courses in which the student earned below "C" (2.0 = Grade Point Equivalent) (4.0 = "A") as the final grade
- Credit awarded by post-secondary schools in the United States that lack candidate status or are not accredited by a regional accrediting association
- Credit awarded by post-secondary schools for life experience
- Credit awarded by post-secondary schools for courses taken at non-collegiate institutions and society workshops (e.g., governmental agencies, corporations, industrial firms, etc.)

- Credit awarded by postsecondary schools for noncredit courses, workshops, and seminars offered by other postsecondary schools as part of continuing education programs

Admission Criteria for International Students

California Northstate University accepts applications from graduates of foreign institutions. California.

Transcripts and coursework from foreign institutions must be evaluated by WES, ECE or IERF. Evaluations must be sent directly to the College of Health Sciences Admissions Office, PharmCAS (for COP), AMCAS (for COM) and must include semester units and letter grades for each course, as well as a cumulative GPA and, if possible, a science GPA. If accepted, the applicant must provide an official copy of their transcript directly to the Office of Admission. If a copy of their official transcript is not received prior to the start of school, the offer of admission will be revoked and the seat will be offered to another candidate.

Applicants who receive their degree from a non-English speaking country will be requested to submit scores from the TOEFL Examination or the TSE. This will not apply, if an additional degree is obtained at a U.S. institution.

- A completed California Northstate University College of Health Science (CNUCHS) Application Form CHS Application.
- A high school diploma (or international equivalent) with a minimum Cumulative GPA of 2.70 on a 4.00 scale.
- Transcripts of all schools attended showing completion of the courses shown below. If the original document is not in English, please include a certified English translation.
 - 4 years of English
 - 3 years of mathematics at the level of Algebra I and higher (4 years recommended)
 - 2 years of laboratory science (3 years recommended)
 - 2 years of social science
- Standardized College Entrance Exam Scores:
 - Official SAT (College Code 7669) or ACT (College Code 7032) dates taken and scores
 - The College of Health Sciences may also take into account the following when considering

Applicants whose native language is not English must provide evidence of English language proficiency by submitting test scores from one of the following:

- Test of English as a Foreign Language (TOEFL): minimum 510 paper/93iBT
- International English Language Testing System (IELTS) (Academic): minimum 6.5

Applicants must have the test score sent directly to the College of Health Sciences at:

International Undergraduate Admissions
College of Health Sciences
California Northstate University
2910 Prospect Park Drive
Rancho Cordova, CA 95670

TOEFL: The official TOEFL score report can be sent directly to CNUCHS from the Educational Testing Service. For information about this test and registration procedures, contact ETS at PO Box 6151, Princeton, NJ 08541-6151, USA or visit www.toefl.org.

IELTS: For information about this test and registration procedures, contact the IELTS Office, University of Cambridge Local Examination Syndicate, 1 Hills Road, Cambridge/CB1 2EU, UK or visit www.ielts.org.

Bachelor of Science in Health Sciences (BSHS) Traditional Program

- High school diploma or equivalent (a General Education Development certificate, a California High School Proficiency Examination certificate, other official completion documentation recognized by the state of California) before entering the program.
- Overall GPA of 2.7 (on a 4.0 scale) and completion of the following classes with a grade of C or better
 - 4 years of English
 - 3 years of mathematics (4 recommended)
 - 2 years of natural science (3 recommended)
 - 2 years of social sciences
 - 2 years of a language other than English
- Standardized Test Scores:
 - March 2017 and later SAT: 1130 or higher. Pre-March 2017 SAT: 1050 or higher.
 - Math and Chemistry subject area tests are highly recommended.
 - ACT Composite 22 or higher
- Extra-Curricular Accomplishments: Demonstration of service activities in the community and/or school, employment, athletic accomplishments, or other extra-curricular accomplishments.
- Personal Statement: CHS highly recommends that students take the time to consult different resources, like their high school counselor, before writing the personal statement. The personal statement is an important component of the selection process. The college website contains links to sample personal statements as well as advice for writing personal statements.

Bachelor of Science and Doctor of Medicine (BS-MD)

These programs offer students a pathway to the College of Medicine at California Northstate University. In the 2+ and 3+ programs, students can complete the Bachelor of Science and MD degrees in six and seven years, respectively, rather than the traditional eight years. Students in these programs must meet the Technical Standards described on page125.

2+4 BS-MD

Admission Requirements for 2+4 BS-MD

Min HS GPA	3.75
Min SAT (after 3/2016)	1400
Min ACT	31
Interview	Required

- High school diploma or equivalent (a General Education Development certificate, a California High School Proficiency Examination certificate, other official completion documentation recognized by the state of California) before entering the program in the fall semester.
- Overall high school GPA of 3.75 or higher (on a 4.0 scale) as well as completion of the following courses with a grade of C or better:
 - 4 years of English
 - 3 years of mathematics (4 recommended)
 - 2 years of natural science (3 recommended)
 - 2 years of social sciences
 - 2 years of a language other than English
- Standardized Test Scores:
 - March 2017 and later SAT: 1400 or higher; Pre-March 2017 SAT: 1360 or higher.
 - Math and Chemistry subject area tests are highly recommended.
 - ACT Composite 31 or higher
- Extra-Curricular Accomplishments: Demonstration of service activities in the community and/or school, employment, athletic accomplishments, or other extra-curricular accomplishments.
- Personal Statement: CHS highly recommends that students take the time to consult different resources, like their high school counselor, before writing the personal statement. The personal statement is an important component of the selection process. The college website contains links to sample personal statements as well as advice for writing personal statements.
- An interview is required and may occur in-person, on the phone, or through video.

3+4 BS-MD

Admission Requirements for 3+4 BS-MD

Min HS GPA	3.60
Min SAT (after 3/2016)	1350
Min ACT	29
Interview	NA

- High school diploma or equivalent (a General Education Development certificate, a California High School Proficiency Examination certificate, other official completion documentation recognized by the state of California) before entering the program in the fall semester.
- Overall high school GPA of 3.60 or higher (on a 4.0 scale) as well as completion of the following courses with a grade of C or better:
 - 4 years of English
 - 3 years of mathematics (4 recommended)
 - 2 years of natural science (3 recommended)
 - 2 years of social sciences
 - 2 years of a language other than English
- Standardized Test Scores:
 - March 2017 and later SAT: 1350 or higher; Pre-March 2017 SAT: 1290 or higher.
 - Math and Chemistry subject area tests are highly recommended.
 - ACT Composite 29 or higher

- Extra-Curricular Accomplishments: Demonstration of service activities in the community and/or school, employment, athletic accomplishments, or other extra-curricular accomplishments.
- Personal Statement: CHS highly recommends that students take the time to consult different resources, like their high school counselor, before writing the personal statement. The personal statement is an important component of the selection process. The college website contains links to sample personal statements as well as advice for writing personal statements.
- An interview is required and may occur in-person, on the phone, or through video.

4+4 BS-MD

Admission Requirements for 4+4 BS-MD

Min HS GPA	3.50
Min SAT (after 3/2017)	1250
Min ACT	27
Interview	NA

- High school diploma or equivalent (a General Education Development certificate, a California High School Proficiency Examination certificate, other official completion documentation recognized by the state of California) before entering the program in the fall semester.
- Overall high school GPA of 3.50 or higher (on a 4.0 scale) as well as completion of the following courses with a grade of C or better:
 - 4 years of English
 - 3 years of mathematics (4 recommended)
 - 2 years of natural science (3 recommended)
 - 2 years of social sciences
 - 2 years of a language other than English
- Standardized Test Scores:
 - March 2017 and later SAT: 1250 or higher. Pre-March 2017 SAT: 1290 or higher.
 - Math and Chemistry subject area tests are highly recommended.
 - ACT Composite 27 or higher
- Extra-Curricular Accomplishments: Demonstration of service activities in the community and/or school, employment, athletic accomplishments, or other extra-curricular accomplishments.
- Personal Statement: CHS highly recommends that students take the time to consult different resources, like their high school counselor, before writing the personal statement. The personal statement is an important component of the selection process. The college website contains links to sample personal statements as well as advice for writing personal statements.
- An interview is required and may occur in-person, on the phone, or through video.

BS-MD Progression Requirements

Bachelor's degree NOT required for admission to COM or COP		

Advanced Placement (AP) & International Baccalaureate (IB) Credit Evaluation Policy

For students pursuing the Bachelor of Science in Health Sciences, the College of Health Sciences awards credit according to the following guidelines:

- CNUCHS will accept Advanced Placement (AP) test scores of 3, 4 or 5 for most exams and a 4 or 5 for science and math exams.
- International Baccalaureate (IB) test scores of 5, 6 or 7 for most exams and a 6 or 7 for science and math (see the attached table for detailed information); and
- A maximum of 60 course credit hours from AP, IB and/or other institutions can be transferred to CNUCHS.

Credit hours for AP and IB courses will appear on the student's transcript. Credits for AP and IB courses will not be used in the calculation of the Grade Point Average (GPA) noted on the CNUCHS transcript.

While some medical and other health professional schools accept Advancement Placement and International

Baccalaureate courses to satisfy admissions requirements pertaining to course subject preparation, many do not. Undergraduate students planning to apply to health professional schools are advised to carefully research admission requirements before deciding to use AP/IB credits to opt out of required CHS courses. It is strongly recommended that these students complete required science and math courses at CHS to retain maximal flexibility in meeting the admission standards of professional schools.

AP/IB Transfer Credit Tables

Note: the below AP/IB table is subject to change without notice. Questions regarding applicability of credit should be directed to CHS Admissions. Please visit the CHS website for the current AP/IB transfer equivalencies: <http://healthsciences.cnsu.edu/for-students/academic-advising>.

*No credit is awarded if the language is the student's native language.

① Entering freshmen and other undergraduate students who do not have credit for ENGL110 are required to take the CNUCHS English Placement Test. A total of 6 credits can be granted for English AP exams. Three of these credits will be for ENGL110 and the other 3 will be for English elective credit.

② BS-MD students are advised to take Mathematics and Physics courses in the College of Health Sciences in order to meet the admission requirements of medical schools. The CNU College of Medicine no longer accepts AP or IB course credits for Statistics and Calculus to fulfill the admission requirement of two semesters of college level mathematics courses.

③ BS-PharmD students are able to transfer AP Calculus and Physics to CNU's College of Pharmacy. However, BS-PharmD students are advised to carefully research admission requirements of other pharmacy schools.

④ Transfers and other undergraduate students who have achieved advanced level of proficiency in general biology, chemistry, mathematics and physics may opt to waive certain courses. They are advised to meet with course instructor and discuss a test-out option (with a minimum passing grade of B).

AP Subject Area	Score	Semester Units	CHS Equivalent Course
ART: Art History	3, 4 or 5	3	ARMU110

Pre-Medical Post-Baccalaureate (PMPB)

California Northstate University (CNU) offers a Pre-Medical Post-Baccalaureate (PMPB) program for students aiming for an advanced degree in the health professions. This comprehensive learning experience prepares students for admission to professional health schools.

The PMPB is a one year program and is suited for students interested in enhancing their knowledge and GPA in the natural and social sciences and/or in increasing their MCAT score. Students must have already completed all pre-requisites for admissions to a professional health school (Medicine, Pharmacy, etc.).

MCAT Review: Intensive MCAT Review is offered in the summer via a partnership with Kaplan, Inc. Students may opt out of the summer review class after consultation with an advisor at CHS.

The PMPB program is offered in a collaborative and supportive environment of the CHS. It also provides students with significant career development counselling, intercultural awareness and communication, and opportunities to interact with faculty from CNU's Colleges of Medicine (COM) Pharmacy (COP).

Admission Requirements

	Medicine (S18 and later)	Pharmacy
Min Overall GPA	3.20	2.60
Min BCPM* GPA	3.00	NA
Interview	Required	NA
*Biology, Chemistry, Physics, Math (Calculus and Statistics)		

- **Minimum Requirements:** The PMPB requires a baccalaureate degree from a U.S.-regionally accredited four-year institution or a non-U.S. equivalent institution. Required minimum coursework is:
 - 2 semesters, 3 quarters or 1 year of English
 - 2 semesters, 3 quarters or 1 year of Biology with laboratory
 - 2 semesters, 3 quarters or 1 year of Inorganic (General) Chemistry with laboratory
 - 2 semesters, 3 quarters or 1 year of Organic Chemistry with laboratory
 - 2 semesters, 3 quarters or 1 year of Physics with laboratory
 - 1 Semester or 2 quarters of Mathematics, including calculus and statistics
- **Other Recommended Courses:**
 - Social sciences
 - Behavioral sciences
 - Languages

- Anatomy
- Physiology
- Biochemistry
- Microbiology
- Immunology

PMPB Progression Requirements

Progression Requirements for PMPB

	Medicine SP18 and later	Pharmacy SP18 and later
Min Prog GPA	3.50	2.60
Min Prog MCAT	508	NA
Prof Activity	Rec.	Rec.
Interview	Required	Required
Supp App	Required	Required

When completing the PMPB coursework, students are equipped with sharpened critical thinking, writing, interview skills, and a more robust, competitive application portfolio.

The PMPB offers the following bonuses:

Pre-Med Post-Baccalaureate Bonus: After successfully completing the PMPB coursework, each student's faculty advisor will write a comprehensive letter of recommendation for qualified students who wish to apply to professional school.

Medical School Bonus: Students who successfully complete the PMPB coursework and MCAT score, as shown below, will be guaranteed a Medical College Application Services (AMCAS) interview with the CNU College of Medicine (COM).

Pharmacy School Bonus: Students who successfully complete the PMPB coursework with a minimum GPA of 2.60 will be guaranteed a Pharmacy College Application Services (PHARMCAS) interview with CNU College of Pharmacy.

Technical Standards

The Technical Standards describe the essential abilities required of BS-MD and PMPB candidates pursuing a professional medical degree.

- Reasonable accommodation in achievement of the standards is defined under U.S. federal statutes applied to individuals with disabilities. Such accommodations are intended to support the successful completion of all components of the MD degree.
- Standards in five areas must be met by all candidates: Observation, Communication, Motor Function, Cognitive, and Professional.

1. Observation:

- Observe demonstrations and participate in experiments in the basic sciences
- Observe patients at a distance and close at hand.

- Demonstrate sufficient use of the senses of vision, hearing, and smell and the somatic sensation necessary to perform a physical examination.
- Integrate findings based on these observations and to develop an appropriate diagnostic and treatment plan.

2. Communication

- Communicate in verbal and written form with health care professionals and patients, including eliciting a complete medical history and recording information regarding patients' conditions.
- Perceive relevant non-verbal communications such as changes in mood, activity, and posture as part of a physical examination of a patient.
- Establish therapeutic relationships with patients.
- Demonstrate reading skills at a level sufficient to individually accomplish curricular requirements and provide clinical care for patients using written information.

3. Motor Function

- Perform physical examinations and diagnostic procedures, using such techniques as inspection, percussion, palpation, and auscultation.
- Complete routine invasive procedures as part of training, under supervision, using universal precautions without substantial risk of infection to patients.
- Perform basic laboratory tests and evaluate routine diagnostic tools such as EKGs and X-rays.
- Respond in emergency situations to provide the level of care reasonably required of physicians.
- Participate effectively in physically taxing duties over long hours and complete timed demonstrations of skills.

4. Cognitive

- Measure, calculate, analyze, synthesize, extrapolate, and reach diagnostic and therapeutic judgments.
- Recognize and draw conclusions about three-dimensional spatial relationships and logical sequential relationships among events.
- Formulate and test hypotheses that enable effective and timely problem-solving in diagnosis and treatment of patients in a variety of clinical modalities.
- Understand the legal and ethical aspects of the practice of medicine.
- Remain fully alert and attentive at all times in clinical settings.

5. Professionalism

- Demonstrate the judgment and emotional stability required for full use of their intellectual abilities.

- Possess the perseverance, diligence, and consistency to complete the Pre-Med Post-Baccalaureate curriculum and prepare to enter the independent practice of medicine.
- Exercise good judgment in the diagnosis and treatment of patients.
- Complete all responsibilities attendant to the diagnosis and care of patients within established timelines.
- Function within both the law and ethical standards of the medical profession.
- Work effectively and professionally as part of the health care team.
- Relate to patients, their families, and health care personnel in a sensitive and professional manner.
- Participate effectively in physically taxing duties over long work hours, function effectively under stress, and display flexibility and adaptability to changing and uncertain environments.
- Maintain regular, reliable, and punctual attendance for classes and clinical responsibilities.
- Contribute to collaborative, constructive learning environments, accept constructive feedback from others, and respond with appropriate modification.

Student Enrollment Agreement

The Student Enrollment Agreement must be completed and submitted to the college in order to show intent to enroll in the program. The Student Enrollment Agreement is a legally binding contract when it is signed by the incoming student and accepted by the institution.

By signing the Enrollment Agreement, the student is acknowledging that the catalog, disclosures, and information located on the website have been made available to the student to read and review.

Any questions or concerns regarding the Student Enrollment Agreement should be directed to the college or university department.

Catalog, Performance Fact Sheet, and Website

Before signing the Student Enrollment Agreement, the prospective student is strongly urged to visit the University and College website at www.cnsu.edu, and to read and review the CNU General Catalog and School Performance Fact Sheet (SPFS). The SPFS contains important performance data for the institution. The Catalog contains important information and policies regarding this institution.

Student's Right to Cancel, Withdraw, and Refund

You have the right to cancel the Student Enrollment Agreement until 12:01 AM on the first calendar day after the first classroom instruction session attended, or until 12:01 AM on the eighth calendar day after a student has signed the Enrollment Agreement, whichever is later.

Cancellation shall occur when you give written notice of cancellation to the Admission Office at the University's address shown at the top of the first page of the Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of cancellation sent by hand delivery, email, or facsimile is effective upon receipt by the University. Written notice of cancellation sent by mail is effective when deposited in the mail properly addressed with postage prepaid.

After the cancellation period described above, you have the right to withdraw from the University at any time. Withdrawal shall occur when you give written notice of withdrawal to the Registrar at the University's address shown at the top of the first page of the Enrollment Agreement. When withdrawing from the college/university, please complete the Official College Withdrawal form available from the Registrar's request form website: <http://www.cnsu.edu/office-of-the-registrar/registrar-services>. Do not use this form to indicate your intent to cancel your enrollment agreement.

For information on refund calculations due to cancellation or college withdrawal, please see the FINANCIAL SERVICES & DISCLOSURES on page 149 of this catalog.

Tuition & Fees

All tuition, fees, expenses, and policies listed in this publication are effective as of August 2018 and are subject to change without notice by California Northstate University.

In the tables below, Y1, Y2, Y3, and Y4 indicate the student's year in the program (e.g. Y1 is a first-year student; Y2 is a second-year student, etc.).

Tuition is charged on a full-time, semester basis. Generally, tuition and fees are charged to a student's account thirty (30) days prior to the start of each semester term. The above is based on the assumption that a student will attend each semester term on a full-time basis, which allows for a student to graduate after successfully completing four (4) years of coursework consisting of 120-125 semester credit hours, depending on concentration.

International Students are not charged additional fees or charges associated with vouching for student status.

Payment deadlines, loan obligations, refund calculations due to cancellation and withdraw, and the Student Tuition Recovery Fund (STRF) disclosures are located in FINANCIAL SERVICES & DISCLOSURES (page 148).

2018-2019 Tuition & Fees for BSHS, BS-MD, & BS-PharmD

Tuition & Fees	Amount	Class
Enrollment Fee (nonrefundable)	\$100.00	Y1
Tuition	\$32,700.00	Y1, Y2, Y3, Y4
Student Association & Activity Fee	\$100.00	Y1, Y2, Y3, Y4
Technology Fee	\$50.00	Y1, Y2, Y3, Y4
Lab Fee	\$500.00	Y1, Y2, Y3, Y4
STRF ¹	\$0.00	Y1, Y2, Y3, Y4
Orientation Fee	\$50.00	Y1
Graduation Fees ²	\$300.00	Y4
Y1 Total Estimated Tuition & Fees per Year ³	\$33,500.00	
Y2 Total Estimated Tuition & Fees per Year ³	\$33,350.00	
Y3 Total Estimated Tuition & Fees per Year ³	\$33,350.00	
Y4 Total Estimated Tuition & Fees per Year ³	\$33,650.00	

Total Tuition & Fees for the entire 4-year College of Health Sciences undergraduate program estimated at \$140,000 to \$145,000; see headnote 1 below regarding 3+4 and 2+4 Combined Programs.

Estimated Other Educational Related Costs ⁴	Amount	Class
Health Insurance premium ⁵	\$3,200.00	Y1, Y2, Y3, Y4
Books and Supplies ⁶	\$1,600.00	Y1, Y2, Y3, Y4
Room and Board ⁶	\$23,272.00	Y1, Y2, Y3, Y4
Transportation ⁶	\$4,648.00	Y1, Y2, Y3, Y4

Y1 Total Estimated Cost per Year ⁷	\$66,220.00	
Y2 Total Estimated Cost per Year ⁷	\$66,070.00	
Y3 Total Estimated Cost per Year ⁷	\$66,070.00	
Y4 Total Estimated Cost per Year ⁷	\$66,370.00	

¹ The STRF fee is \$0.00 per \$1,000 of institutional charges.

² Covers regalia, graduation dinner, diploma cover, transcript, etc.

³ Total Tuition and Fees estimated at range of \$140,000 to \$145,000 through completion of entire four year traditional undergraduate program; assumes completion within four years prescribed time and 3% to 5% estimated annual tuition increases are not binding on the University. This estimate for students in the 3+4 and 2+4 Combined Programs needs to be adjusted to reflect the Period of Attendance on CNU College of Health Sciences campus, with the Period of Attendance at CNU Colleges of Medicine or Pharmacy based on the tuition and fees while at the latter two Colleges.

⁴ Costs and expenses a student may incur during the applicable year of the program, whether or not paid directly to CNU or CNUCHS. These expenses include estimated out-of-pocket cost of living expenses for the year.

⁵ Provided and charged by outside healthcare insurance plan; optional, estimated, and may increase or decrease based on the number of insured participants and other factors.

⁶ Estimated amount of student's individual housing, food, and transportation costs, not operated by, charged by, or paid to CNU.

⁷ Total Tuition and Fees from first table, plus estimated items from second table that student may incur, including estimated cost of living items not paid to CNU.

2018-2019 Tuition & Fees for Pre-Medicine Post-Baccalaureate Program

Tuition & Fees	Amount
Enrollment Fee (nonrefundable)	\$100.00
Tuition	\$32,700.00
Scholar Activity Fee (nonrefundable upon start of instruction)	\$100.00
Technology Fee (nonrefundable upon start of instruction)	\$50.00
Orientation Fee (nonrefundable upon start of instruction)	\$50.00
STRF Fee per \$1,000 ¹	\$0.00
Total Tuition & Fees	\$32,900.00

Estimated Other and Optional Educational Related Costs per year ²	Amount
Health Insurance premium ³	\$3,200.00
Books and Supplies (estimate)	\$1,000.00
Room and Board ⁴	\$23,272.00

Transportation ⁴	\$4,648.00
Total Estimated Cost per year⁵	\$65,20.00

¹ STRF fee is \$0.00 per \$1000 of institutional charges.

² Cost of living and other educationally related costs a student may incur while participating in the Pre-Medicine Post-Baccalaureate, whether or not paid directly to CNU.

³ Provided and charged by outside healthcare plan insurance company; optional, estimated, and may increase or decrease based on number of participants and other factors.

⁴ Estimated amounts of individual housing, food, and transportation costs, not operated by, charged by, or paid to CNU.

⁵ Total Tuition & Fees from first table, plus estimated items from second table that student may incur, including cost of living items not paid to CNU.

Scholarships

In the past, several companies have helped California Northstate University students finance their education through scholarships. Some of these companies include: Albertson's, CVS, Pharmacist Mutual Insurance Company, Safeway, SuperValu Drug Stores, and Walgreen's. These scholarships range from \$500 to \$2,000. Criteria for scholarships vary by the specific donor and are usually awarded in the late fall and early spring.

Information regarding various scholarships can be found the College of Health Science's website, healthsciences.cnsu.edu, Financial Aid, Types of Assistance, Grants and Scholarships as well as within the Grants and Scholarships section of this catalog, page 148.

General Policies

Orientation and Registration

Mandatory orientation for new students is held during the days preceding the start of classes. The Office of Student Affairs must be notified if a new student is unable to attend scheduled orientation due to illness or emergency.

Registration for classes requires:

1. All admission contingencies be fulfilled.
2. Financial aid clearance from the Financial Aid Officer.
3. Completion of all new student paperwork.

Admission contingencies include a final, official high school transcript evidencing high school graduation, or equivalent, required immunizations, evidence of health insurance coverage, and any other institutional requirements.

New students must submit the Emergency Contact and Medical Information Form to the Office of the Registrar by the end of Orientation. To make updates, a new form must be submitted to the Registrar. The Office of the Registrar requires submission of the Authorization to Release Student Records if a student desires to grant a personal third-party (such as a parent, spouse, etc.) access to his/her student record. Please refer to the Directory Information and Access to Student Records section of this catalog for more information.

New students should review their local, home, and billing contact information via the Student Portal and update as needed. It is the student's responsibility to maintain valid contact information throughout their enrollment at CNU. Instructions for accessing the Student Portal is sent by the CNU IT department to the student's CNU email address.

The Registrar acting in cooperation with the Assistant Dean for Student Affairs and Admissions and CHS faculty advisors is responsible for managing course registration for incoming freshmen, transfer students, PMPB students, and continuing students. The process of course registration for current students continuing into the next semester should be completed by the end of the 10th week of classes. The Registrar will enroll students in assigned and previously elected classes prior to the start of each semester.

Students with business, financial, or other registration holds on their account will not be registered until the Registrar is notified that the hold has been cleared. Students who are in compliance with institutional requirements or who have a hold on their student account at the time of registration are required to satisfy the requirement and may also be required to submit the Course Add/Drop form by the end of the Add/Drop period to register or make schedule changes.

Address Where Instruction Will Be Provided

Class sessions are conducted at the campus located at 2910 Prospect Park Drive and 2920 Prospect Park Drive, Rancho Cordova, CA 95670 and 9700 West Taron Drive, Elk Grove, CA 95757. Experiential education and clinical rotations and

service learning activities is conducted at assigned professional clinical locations and community sites as established by agreement among the student, professional preceptor, and College.

Catalog, School Performance Fact Sheet, and Website

Before signing the Student Enrollment Agreement, students are strongly urged to visit the College website at healthsciences.cnsu.edu/ and to read and review the CNU General Catalog and School Performance Fact Sheet (SPFS). The SPFS contains important performance data for the institution. The Catalog contains important information and policies regarding this institution.

By signing the Enrollment Agreement, the student is acknowledging that the catalog, disclosures, and information located on the website have been made available to the student to read and review.

Instruction/Course Delivery

The College of Health Sciences utilizes a variety of active learning pedagogical approaches within a classroom setting and through integrated research and teaching.

Research Instruction

The Freshman Research Experience is part of the core curriculum. Student enrolled in freshman biology and chemistry participate in original research projects during the entire first year or course work. The project is called the Interdisciplinary Science Learning and Novel Discovery (ISLAND) project, is a cross disciplinary innovation where student teams research the relationship between organismal health and environmental variables within a local ecosystem.

Scholarly Projects focuses on the language, ethics, approaches, and challenges of the research processes. Students can participate in a structured independent research experience where the student has the option of:

- Apprenticeship with a faculty research mentor, or
- CURE (Course-Based Undergraduate Research Experience) with themes, topics, and techniques.

Community Service Learning

Service Learning is a critical learning component that CHS requires of all undergraduate students. CHS offers a unique one-year approach: the first semester combines academic studies, experiential learning, and professional development prior to placement in a community agency. The subsequent semester includes meaningful work in the community with a concurrent course to support students as they move from theory to practice.

Language of Instruction

All courses are delivered in English and English language services are not provided.

Academic Policies and Procedures

Academic Calendar

The academic calendar consists of two semesters lasting approximately 15 weeks and an 8 week summer term.

Credit Hour Policy

1 credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in class time) and a minimum of 2 hours of out-of-class student work (homework) (LEC/SEM). For courses that include workshop and/or laboratory time, 1 credit is assigned per 3 hours each week of student time spent in this activity (LAB/EL).

Code	Course Type	Code	Course Type
EL	Experiential Learning	LEC	Lecture course
LAB	Laboratory course	SEM	Seminar

Grading

All courses are assigned student performance grades by the teaching faculty according to the following grade point and letter grade convention:

Definition	Grade Points	Definition	Grade Points
A+ 97-100%	4.00	P ≥70%, Pass*	Not in GPA
A 90 - 96%	4.00	NP <70%, No Pass*	Not in GPA
B+ 87 - 89%	3.30	AU Audit	Not in GPA
B 80 - 86%	3.00	I Incomplete	Not in GPA
C+ 77-79%	2.30	W Withdrawal	Not in GPA
C 70-76%	2.00		
D 60-69%	1.00		
F <60.00%	0.00		

Pass/No Pass

A course grade of "P" (Passing Course) will be recorded on student transcripts when students take a course on a Pass/No Pass basis. A "P" grade indicates that the student achieved 70% or higher in the course. A course grade of "NP" (Not Passing Course) indicates that the student earned less than 70% in the course. Courses taken on a P/NP basis will count toward the total hours earned but will not be used to satisfy degree/program completion. "P/NP" grades are not calculated into the GPA, thus, have no effect on the term or cumulative GPA. Undergraduate and PMPB students may take only 10% of their courses with a P/NP grading option—approximately 12 credit hours for undergraduate students and 2-3 credit hours for PMPB students. The P/NP grading option is usually allowed only for courses where a letter grade is not practicable, i.e. Teaching/Research/Student Service Assistant courses or introductory science courses. Students wishing to explore academic disciplines on an elective basis may request a P/NP grading option from the course instructor pending approval by Academic Affairs.

Incomplete

A course grade of "I" (Incomplete) may be recorded on the student transcript in cases where extenuating circumstances prevent a student from completing assignments or exams by the end of an academic term. Granting a grade of "I" is at the

discretion of the instructor of the course. Students must request an incomplete grade within two weeks of the extenuating circumstance by submitting an Incomplete Grade Agreement to the course instructor. If the course instructor approves of the granting of an "I" grade for the course they will complete the Incomplete Grade Agreement and enter an "I" grade for the course. The "I" is then transmitted to the Registrar by the grade submission deadline and the "I" is noted on the transcript for the corresponding course. An "I" grade may be changed to a letter grade upon the completion of the stipulations contained in the Incomplete Grade Agreement within 21 days following the last day of the term. Failure to complete the course within the 21-day extension period will result in a conversion of the "I" to the calculated grade for the course. In cases of valid excuses, students may request an exception to this deadline by completing and submitting a Petition Form.

Course Withdrawal

A course grade of "W" (Withdraw) will be recorded on the student transcript in lieu of an "A-F" letter grade in cases where withdrawal from a course is formally initiated and executed as described according to guidelines of the CHS3313 Course Add/Drop and Withdraw Policy.

A course grade of "P" (Pass) is to be placed on the transcript in lieu of an "A-F" letter grade in cases where the course is not required for degree completion and the student earns 70% or higher in the course.

A course grade of "NP" (No Pass) is to be placed on the transcript in lieu of an "A-F" letter grade in cases where the course is not required for degree completion and the student earns less than 70% in the course.

Course Auditing

A course grade of "AU" (Audit) will be recorded on a student transcript when a student has been granted permission to audit a course and enrolls in the course. "AU" notations have no grade point value. Students are charged tuition for courses taken as audit. Students may only audit one course per semester and a total of only two courses in their time in the College.

CNU students may audit lecture courses (i.e., attend lectures without receiving credit or calculated grade) only with advance permission of the faculty instructor. The instructor will inform the student of the amount of participation that is expected in the course. Lab courses cannot be audited. The responsibility of course instructors is to first meet the needs of officially registered students. Faculty are not obligated to review work submitted by course auditors.

GPA Calculation

The running and final grade point average (GPA) is calculated according to the following formula where C₁ = credit hours of Course1 and GP₁ = grade points of Course1, etc.:

$$\text{GPA} = \{(C_1 \times GP_1) + (C_2 \times GP_2) + \dots + (C_n \times GP_n)\} \div (\text{Total Credit Hours})$$

Note that GPAs recorded on semester grade reports and transcripts are calculated on the basis of grade point credits from courses taken exclusively at CNU. Scores from Advanced Placement, International Baccalaureate, and college level courses reported and/or transferred as credits toward the CNU degree are listed on the transcript but are not included in the CNU GPA calculation.

Academic Honors

Undergraduate students who earn 12 or more graded semester hours during a semester, or in 6 or more graded hours in the summer, in residence at CHS can qualify for semester honors. The honor is noted on the transcript for the semester it is earned and will receive a recognition letter.

President's List: GPA of 3.75 or higher

Dean's List: GPA of 3.50 or higher

Grade Change Policy

This policy will pertain to faculty who need to change the final grade of a course under certain recognized circumstances.

Course grade changes are permissible under the following circumstances:

1. When a faculty member has issued a grade of Incomplete (I) and the course has subsequently been completed. The "I" grade can be changed to the grade earned.
2. When a grade appeal process results in the legitimate change of grade.
3. When there has been a calculation or procedural error in the posting of a course grade.

To change a student's final grade, the faculty member must complete and sign a CNU Grade Change Request form available from the Office of the Registrar with an explanation of the circumstances for the change and submit it to the Department Head for consideration. The Department Head will review the request in accordance with the policy statement outlined above and either approve or deny. If approved, the Department Head will submit the completed form to the Office of the Registrar for processing.

Course Grade Appeal Policy

Students are permitted to appeal a final course grade if they believe the assigned course grade is inaccurate based on calculation error by faculty course instructor(s) or actions inconsistent with official published grading policies of the course, College, or University.

Early Resolution

1. Students using this appeal must communicate questions or disputes regarding the final course grade within 5 business days after the grade posting by discussing the basis of their concerns with the faculty instructor who issued the course grade. Students should obtain a Course Grade Appeal form from the Office of the Registrar, the faculty instructor, or other College personnel to document the discussion.
4. If the faculty member and the student do not resolve the issue, the student may schedule a follow-

up meeting with the appropriate Department Head for the course in question.

Formal Appeal

1. If the Department Head and the student do not resolve the issue, the student may initiate a formal grade appeal by completing the Course Grade Appeal form and submitting it to the Senior Associate Dean for Academic Affairs within 5 business days after the meeting with the Department Head.
2. The grade appeal must address at least one of the following:
 - a. Errors in grade calculation, or
 - b. Unpublished criteria used to calculate the grade, or
 - c. The assigned grade was based on procedures inconsistent with specific course, College or University policies.
3. Students who file a Grade Appeal form must provide the following materials and requests for information:
 - a. A description of their attempt at resolution of the grade dispute with the faculty instructor and Department Head;
 - b. Evidence of graded assignments, and/or
 - c. Any other relevant materials;
 - d. The Senior Associate Dean for Academic Affairs may request additional materials from the student or faculty instructor.
4. The Senior Associate Dean for Academic Affairs will convene an ad hoc committee of 3 faculty members to review the materials submitted the by student and the faculty instructor. This committee will report their recommendation to the Senior Associate Dean for Academic Affairs.
5. If the Senior Associate Dean for Academic Affairs decides that a grade change is appropriate and necessary, the faculty instructor will be notified within 5 business days after appeal form submission to submit a Grade Change form to the Registrar within 5 business days.
6. If the Senior Associate Dean for Academic Affairs decides that a grade change is inappropriate, the student may appeal the decision to the Dean of the College of Health Sciences. The appeal to the Dean must be submitted within 5 business days after the student is notified of the result of the formal grade appeal. The Dean's decision is final.

Academic Standing and Formal Warning Policy

The following levels of official standing with the university are applied in cases of academic underperformance:

1. 1st Warning Status: A semester GPA of less than 2.0 (C average) will result in a record of "1st Warning" placed on the semester grade report. The record of 1st Warning will be removed if the student achieves a semester GPA of greater than 2.0 for a full course schedule taken the following semester.
2. 2nd Warning - Probation status: If a second semester GPA of 2.0 or less follows a semester after 1st Warning, a record of "2nd Warning - Probation" is placed on the semester grade report. This record will

also be removed if the student achieves a GPA of greater than 2.0 for a full course schedule taken the following semester.

3. A third semester of poor performance with a GPA less than 2.0 will result in official separation from the university and termination of the student's enrollment pending the outcome of any appeals for consideration and readmission on a probationary basis. Students in this category will receive an email and official letter of separation at the home address on record.

Course Remediation Policy

A grade of D (letter grade of 1.0) in a course indicates a significant lack of understanding of the content of the course necessary for completion of the academic program. Remediation of D grades will be offered to students at the discretion of the Department Head and Course Instructor. Student eligibility for course remediation is also subject to verification by the Registrar. The Course Instructor will decide the format of the remediation exam. Students may prepare for the exam using a combination of self-study, tutoring, and meeting with the instructor. A course score of 70% or better after the remediation exam will be reported to the Registrar. If the course is not satisfactorily remediated, the original course grade will remain on the transcript and used in the calculation of the official GPA. The remediation process must be completed within 14 calendar days after the end of the term. Each CHS student is allowed a maximum of 3 course remediation opportunities.

Course Instructors are required to contact students who have earned a final course grade of "D" or lower at the close of each semester for possible grade remediation. Such students are given the option of taking a remediation exam that can be used to convert a grade of "D" or lower to the revised course grade as described above. The remediation exam should be weighted toward course content that was not mastered by the student. The student will be given the opportunity to seek tutoring and to study for a course remediation exam given after the regular close of the semester. However, the study and exam process must be completed within the 14 day remediation period. Course instructors are not necessarily required to be present on campus throughout the full remediation period but are responsible for making necessary arrangements and provisions for the exam process.

Academic Progression Policy

BS in Health Sciences (BSHS)

The BSHS program is designed to be completed in four years. In order for students to progress through this degree program they must meet certain criteria each semester and each academic year. These criteria are both qualitative and quantitative and include:

1. Students must pass all courses that are counted toward degree conferral with a minimum letter grade of C;
2. Students must maintain a cumulative GPA of 2.0; and
3. Students must complete the BSHS degree requirements within six consecutive academic years

(150%) from the date of the first day the student begins the program. Students may take up to 20 credits per semester but may not exceed 188 total credit hours earned.

Students who do not meet the above-listed criteria are considered to not meet academic progression requirements, and will be issued a formal warning and placed on probation until able to meet such requirements. Students not meeting academic progression requirements are expected to repeat courses and/or complete other activities to regain good academic standing status. See the Course Repeat Policy, the Course Failure Remediation Policy, and the Academic Standing and Formal Warning Policy

Students who do not successfully complete a course that is a prerequisite to a course in the next term must take the prerequisite course in the next term it is offered, and will not be able to enroll in the successive course. See the [Course Add/Drop and Withdraw Policy](#).

Students who earn a grade of Incomplete (I) may not enroll in the next course if the course in which the Incomplete was earned is prerequisite to a course in the next term. See the [Grading Convention Policy](#).

Students who take a Leave of Absence for one or more terms will need to enroll in the term following the leave in order to remain in good academic standing. All periods of leave of absence are included in the maximum time frame allowed (150%) to complete the program. See the [Leave of Absence Policy](#).

Students who do not earn at least a C- in a course may be offered the opportunity to remediate that course (or courses). A grade of D (letter grade of 1.0) in a course indicates a significant lack of understanding of the content of the course necessary for completion of the academic program. Remediation of D grades will be offered to students at the discretion of the Department Head and Course Instructor. If a course is remediated, the remediated grade earned will be noted on the official transcript and calculated in the cumulative GPA. If the course is not satisfactorily remediated, the student will need to repeat that course in a subsequent semester. See the [Course Repeat Policy](#) and [Course Remediation Policy](#).

Credit hours from another educational institution accepted as transfer credits into the BSHS program will be included as completed credit hours.

Students who are not academically progressing may not be eligible for financial aid.

BS-MD Combined Programs Progression

The BS-MD accelerated pathway is designed to be completed in either two, three or four years of prerequisite coursework and four years of medical school coursework. In order for students to progress through this accelerated pathway, they must meet certain criteria each semester and each academic year. These criteria are both qualitative and quantitative and include:

1. Students must pass all courses that are counted toward degree conferral with a minimum letter grade of C;
2. Students must maintain a cumulative GPA of 3.50 in the undergraduate program and be in good academic and professional standing;
3. Students must participate in at least one College of Medicine campus activity per year while attending the College of Health Sciences;
4. Students must submit a Supplemental Application to the College of Medicine Office of Admission upon request;
5. Students must successfully complete the College of Medicine Prerequisites;
6. Students must score a 510 or higher on the MCAT; and
7. Students must successfully complete the MD admission interview.

Students who do not meet the criteria described above will be notified of that status at the end of each term. They are still able to pursue the BSHS degree and compete for medical school admission. They will be subject to the Progression Criteria for the BSHS.

BS-PharmD Combined Programs Progression

The BS-PharmD accelerated pathway is designed to be completed in either two, three or four years of prerequisite coursework and four years of pharmacy school coursework. In order for students to progress through this accelerated pathway, they must meet certain criteria each semester and each academic year. These criteria are both qualitative and quantitative and include:

1. Students must pass all courses that are counted toward degree conferral with a minimum letter grade of C;
2. Students must maintain a cumulative GPA of 3.00 in the undergraduate program and be in good academic and professional standing;
3. Students must participate in at least one College of Pharmacy campus activity per year while attending the College of Health Sciences;
4. Students must submit a Supplemental Application to the College of Pharmacy Office of Admission upon request;
5. Students must successfully complete the PharmD admission interview;
6. Students must successfully complete the College of Pharmacy Prerequisites.

Students who do not meet the criteria described above will be notified of that status at the end of each term. They are still able to pursue the BSHS degree and compete for pharmacy school admission. They will be subject to the Progression Criteria for the BSHS.

Pre-Med Post-Baccalaureate (PMPB)

Students who successfully complete the PMPB program with an overall undergraduate GPA of 3.0 or higher, CNU program GPA of 3.2 or higher, and an MCAT score of 510 or higher will be invited for an interview for admission to the CNU College of Medicine through AMCAS.

Additionally, students who successfully complete the PMPB program curriculum with an overall undergraduate GPA of 2.6 or higher, and CNU program GPA of 2.6 or higher will be offered an invited interview for admission to the CNU College of Pharmacy via PharmCAS.

Degree Requirements for the Bachelor of Science in Health Sciences

The diploma of Bachelor of Science degree in Health Sciences from California Northstate University shall be awarded to a student who has met all of the following criteria:

1. A minimum of 120 credit hours. A maximum of 60 credit hour units from officially transmitted AP/IB courses (CHS Policy 3202) and/or officially transferred from another institution (CHS Policy 3203) with a grade point of 2.0 (letter grade of C or better) may be counted toward this total. At least 60 credit hours must be from courses taken at CNUCHS. Credit hours from courses with a grade of D, F, AU or W are not counted toward the credit hour minimum for graduation.
2. Pertaining to students in good standing and officially enrolled in accelerated pathways to Pre-Med to MD and Pre-Pharm to PharmD degrees, the CNU College of Health Sciences will accept credit hours from certain specified basic biomedical science courses in the CNU Colleges of Medicine (CNUCOM) and Pharmacy (CNUCOP) as substitute credit hours for advanced undergraduate courses in the CHS curriculum for the BS Degree in Health Sciences. Such substitute course credits accepted from CNUCOM and CNUCOP are not to exceed 60 credit hours. At least 60 credit hours must be from courses taken at CNUCHS.
3. An overall grade point average of 2.0 (letter grade of C) or higher as calculated by the weighted average of all course credit units and grade points for courses taken at CNU.
4. Satisfaction of the course requirements and associated learning outcomes.
5. Students who complete all the recommended courses specific to the example curriculum of a health sciences area concentration such as Human Biology, Biopsychology and Health Science Administration may have the area concentration listed on the BS degree diploma as follows: "Bachelor of Science Degree in Health Sciences with a Concentration in Human Biology (Biopsychology, or Health Science Administration)." Students who do not complete all the undergraduate courses specific to the health science concentration area will be awarded the "Bachelor of Science Degree in Health Sciences" without a concentration area listed on the diploma.
6. Students are expected to complete the Bachelor of Science in Health Sciences degree within six years or less after date of admission to the program.

Any deviation from these standards must be approved by a majority of the voting faculty and signed by the Dean after consideration of supporting material. Reasons for the exception must be fully documented.

Degree Honors

Students who complete the BS degree requirements with specified CHS grade point averages (GPAs) will have an Honors designation placed on their transcripts. The cumulative GPA requirements for graduating with honors are as follows:

Summa Cum Laude:	3.80 – 4.00 GPA
Magna Cum Laude:	3.65 – 3.79 GPA
Cum Laude:	3.50 – 3.64 GPA

Commencement

Students and faculty are strongly encouraged to attend commencement and wear the traditional regalia of cap, gown, and academic hood. Honor sashes will be awarded to honor graduates.

Attendance Policy

Students are encouraged to attend all lecture and discussion courses on a regular basis and are required to attend and complete all laboratory sessions and work. The college recognizes that illness and circumstances beyond one's control may cause a student to miss an occasional class. Course instructors are free to set their own attendance policy that may include signing in for each class and a having a portion of the grade dependent on attendance. If a student misses a required laboratory session, the work must be made up in accordance with the schedule and arrangements of the lab instructor.

Formal Excused Absence Policy

A student may request a formal excused absence for personal, legal, emergency, compassionate, professional conferences and functions, or health-related reasons. To protect confidentiality of students, all formally excused absence requests must be initiated in writing and submitted through the Office of Academic Affairs. Such reasonable requests are normally granted for a period of 1-5 academic days. Absences longer than 5 days may require a student to request a leave of absence or personal withdrawal. Approved formal absence will be communicated to the relevant course instructors who will make necessary accommodations for missed work. Official forms and directions for submitting a Request for Excused Absence are available on the college website or from the Office of Academic Affairs.

Leave of Absence Policy

This policy specifies procedures and rules for students who wish to take a Leave of Absence from the CHS.

A Leave of Absence is defined as a hiatus from college enrollment for one or two semesters. An official Leave of Absence may be approved for reasons in the student's best interest but may not exceed one academic year. The CHS will permit a student on an approved Leave of Absence to return to the College and re-enroll in classes without formal re-application for admission. Non-attendance does not constitute notification of intent to apply for Leave of Absence status. The starting date of Leave of Absence status is the date the Registrar receives the completed and signed Leave of Absence form. Because the curriculum progression is linear and most courses are offered in sequence in either the Fall or Spring semester, it is expected that most Leaves of Absence

will be for one year. However, a one-semester Leave of Absence is permissible with the understanding that students may have to take certain courses out of sequence. Students who take a one or two semester Leave of Absence must consult with the Office of Financial Aid to determine how the leave will affect their eligibility for financial aid. In some cases, students returning from a Leave of Absence may need to reapply for financial aid.

Students in the Pre-Medical Post-Baccalaureate are not permitted to take a leave of absence.

Procedure

Students requesting a Leave of Absence from the College of Health Sciences should fill out a Leave of Absence Form after discussing their decision with their faculty advisor and the Senior Associate Dean for Academic Affairs. The Leave of Absence form must be signed by the student, the faculty advisor, the Senior Associate Dean of Academic Affairs, and the Dean before it is forwarded to the Office of the Registrar for official approval and notation on the transcript.

Students requesting a Leave of Absence from the College of Health Sciences should fill out a Leave of Absence Form after discussing their decision with their faculty advisor and the Senior Associate Dean for Academic Affairs. The Leave of Absence form must be signed by the student, the faculty advisor, the Senior Associate Dean of Academic Affairs, and the Dean before it is forwarded to the Office of the Registrar for official approval and notation on the transcript.

Course Enrollment Policy

This policy specifies rules and procedures for enrolling in courses at the CHS.

Course Advisement and Enrollment

Incoming students entering college for the first time after completion of high school are automatically enrolled in an appropriate schedule of courses by the Office of the Registrar in consultation with the Director of Admissions. Transfer students are offered assistance in course selection and registration at the time of admission by the Admissions Office and an assigned faculty advisor. Currently enrolled students in the College of Health Sciences are required to meet with their faculty or professional advisor by the end of the 10th week of classes in each semester. At this meeting the faculty advisor is responsible for reviewing current academic progress and advising the student in appropriate selection of courses to be taken in the following semester. Students have the right to choose among optional course electives offered in any given semester within the constraints of course prerequisites stated in the college catalog and course syllabus.

Minimum and Maximum Number of Credit Hours per Semester

A standard load of courses is considered to average 15 credit hours per semester. A minimum of 12 credit hours for fall or spring semester is required to be considered a full time student. A maximum of 20 credit hours per fall or spring semester is allowed. During the summer session a maximum of 10 credit hours is allowed. A student may not enroll in more

than 30 total credit hours for the summer and fall terms combined.

Course Auditing

CNU students may audit lecture courses (i.e., attend lectures without receiving credit or transcript documentation) only with advance permission of the faculty instructor. The responsibility of course instructors is to first meet the needs of officially registered students. Faculty are not obligated to review work submitted by course auditors. Audited courses appear on the student's transcript.

Course Placement Policy

Math Placement

Entering students must take the CHS Mathematics Placement Exam. Students scoring below 60% on the CHS Mathematics Placement Exam will be enrolled in MATH125 Pre-Calculus. Students scoring above 60% will be enrolled in MATH120 Applied Statistics.

English Placement

Incoming students are eligible for the ENGL 110 credits if they satisfy any of the following criteria:

1. A score of 3 or above on the AP (Advanced Placement) English Language and Composition or AP English Literature and Composition Exam. An additional 3 credits can be awarded for English elective credit;
2. A score of 5 or above on IB (International Baccalaureate) English A; or
3. Official transcript record of a 3-unit college-level English composition course equivalent to ENGL 110 with a grade of C or higher.

Students who are awarded credit for ENGL 110 may be excused from taking the English Placement Diagnostic test if they so choose.

Students with 6 or more credit hours of English composition or writing courses with grades of C or better from a community college or four-year university are eligible to be credited with ENGL 110 and 120. The syllabus/syllabi of the qualifying course(s) must be reviewed for approval and one of the courses in question should have included a documented research paper. Students who transfer approved credits equivalent to both ENGL110 and ENGL120 may also be excused from taking the English Placement Diagnostic test if they so choose.

New first-year CHS students who do not meet one of the criteria above are required to take the English Placement Diagnostic Test given before the beginning of the semester to assess reading and writing skills and facilitate appropriate English composition course placement.

Course Repeat Policy

Students may only repeat courses in which they have received a grade of D or F; and, ordinarily, a course may only be repeated once. If a second repeat is desired, the student may petition the Office of Academic Affairs by describing extenuating circumstances that merit a second repeat attempt. If warranted, the Senior Associate Dean of Academic Affairs may authorize a second course repeat via a signed

Exceptions Form. Only six courses (up to 24 credits in the four-year program) may be repeated by any given student. Once a student successfully repeats a previously failed course, revised grade point units for the repeated course are calculated and the original grade points and credit hours for the initial course are removed and the course is marked as "Repeated" on the student transcript.

Course Add/Drop and Withdrawal Policy

Routine changes in course registration to add, drop, or withdraw from a course may be made under the terms of the CHS enrollment agreement simply by submission of a Course Add/Drop Form up to the end of the 3rd week of classes for Fall and Spring terms or the fourth day of classes for a summer term. If a class is dropped by the end of the 3rd week of classes, or the fourth day of summer term, the record of class enrollment is removed from the transcript. As stated in the CHS enrollment agreement, tuition is non-refundable for individual dropped classes. The CHS enrollment agreement specifies conditions for pro-rated tuition refund in cases where a student completely withdraws from the college during the academic term as described under the **Error! Reference source not found.** policy.

Students may petition for a "drop" instead of a "withdrawal" if there are extenuating circumstances.

Students are also permitted to withdraw from courses beginning from the 4th week of class to the end of the instructional period by submitting a Course Withdrawal Form signed by the student, course instructor, and the department head. Course withdrawal is documented by course grade of "W" with no credit noted on the permanent transcript in lieu of a grade. Students are limited to a maximum of four course withdrawals (up to 12 units in the four-year program). Note that course withdrawal may increase the time of completion to graduation of the standard four-year BS degree program.

The addition or removal of courses from the current course registration list and transcript is handled by submission of a Course Add/Drop Form or Course Withdrawal Form that must be signed by the student, course instructor, and department head before it is sent to the Registrar's Office for documentation on the student transcript.

Exam Policy

Course grades in which written examinations and assignments are the principal determinant of a student's semester grade may not be based on fewer than three exam/assignments plus a final exam. The purpose of this policy is to ensure that students have sufficient opportunities to achieve a passing grade in the course. Scheduled dates for final exams are announced via classroom instructors by the 12th week of classes and are staggered during Finals Week to minimize the occurrence of multiple exams on the same day. Make-up examinations are administered at the discretion and convenience of the course instructor.

Academic Integrity and Good Conduct Code of Honor

This policy governs standards of academic integrity and good conduct expected of students, faculty, and staff at the College of Health Sciences. It also establishes the operational plan for reporting and investigation of incidents, procedures of adjudication, and determination of sanctions pertaining to violations of academic integrity and personal misconduct.

The Academic Integrity and Good Conduct Policy of CNUCHS is defined by a Good Conduct Code of Honor that emphasizes the following four core principles which all students, faculty, and staff are expected to exemplify: Respect, Honesty and Integrity, Legal and Ethical Behavior, and Professionalism.

1. RESPECT

CNUCHS is dedicated to pursuit of education, scholarly activity, research, and service in an honorable and respectful manner. We respect one another, our supporters, our colleagues, and our community. We extend this respect to all persons, regardless of race, color, national origin, ancestry, citizenship, gender, gender identity, sexual orientation, age, religion, physical or mental disability, or veteran status. We promote good will within our diverse population and uphold the autonomy, dignity, and moral integrity of all persons. We respect the abilities, customs, beliefs, values, and opinions of others. As students of health sciences and members of the larger community, we exemplify respectful behavior both within and outside the college. The CNUCHS curriculum includes a variety of lectures and seminars on student success and leadership that discuss professional standards of personal ethics and teach students how to model respectful behavior and exemplify good conduct.

The following examples include acts that violate the respect principle of the Good Conduct Code of Honor: physical violence against any person, theft, vandalism, defacement, or destruction of property owned by or in the possession or control of CNUCHS or a member of the CNUCHS community, slander, libel, or defamation, and hate crimes against a member of the CNUCHS community. Acts described in the preceding sentence and similar types of personal misconduct that violate the respect principle of the Good Conduct Code of Honor are subject to disciplinary action whether they occur on campus or off campus or involve sponsored events and members of the CNUCHS community.

2. HONESTY AND INTEGRITY

CNUCHS is dedicated to conducting education, scholarly activity, research, and service with honesty and integrity, both on and off campus. Students have a duty to be truthful in academic and professional relationships. We are committed to teaching, scholarly activity, and professional growth in a community-based learning environment, in which all individuals are personally accountable and adhere to the high standards of honesty and integrity in the classroom and in the community. Cheating, plagiarism, commercial purchase of term paper assignments, and other forms of academic dishonesty are not tolerated. Academic work assigned to the individual student is to be based solely on the effort of the individual. Academic work assigned to a team of students is to be based on the individual contributions and collaboration

of all team members. All examinations, projects, and in or out of classroom assignments, whether individual or team-based, are expected to be performed and completed with the utmost degree of honesty and integrity.

The following examples include, but are not limited to, acts that violate the honesty and integrity principle of the Good Conduct Code of Honor and will be subject to academic disciplinary action: cheating; plagiarism; lack of attribution of cited material; claiming authorship of written material not so authored; commercial purchase of term papers submitted for assignments; claiming personal credit for research performed by others; claiming participation on a team project while not participating in the project; other forms of academic dishonesty; or, theft or destruction of academic materials owned by CNUCHS or a member of the CNUCHS community. The acts described in the preceding sentence and other acts in violation of the honesty and integrity principle are subject to disciplinary action whether they occur on or off campus.

3. LEGAL STANDARDS AND ETHICAL BEHAVIOR

CNUCHS is dedicated to promotion of behavior that follows legal and ethical standards in teaching, scholarly activity, research, and service. We are committed to following the law and professional practice standards. We comply with and adhere to all federal, state, and local laws and regulations. We encourage all to act ethically in developing and advocating a culture of consideration for codes of ethics, values, and moral convictions of those who could be affected by our decisions. Whenever appropriate, we seek advice and counsel to determine the right course of action and make the best decision on behalf of those who depend on us to do so.

The following examples include, but are not limited to, acts that violate the legal standards and ethical behavior principle of the Good Conduct Code of Honor and will be subject to academic disciplinary action or non-academic disciplinary action as appropriate: any behavior which violates federal, state, or local laws, or any University/College or formal affiliate policy, regulation, or rule; violation of the health-care related laws and regulations of the State of California; or, violation of the written standards of practice of schools and community organizations participating in the CNUCHS experiential education program. The acts described in the preceding sentence and other acts in violation of the legal standards and ethical behavior principle are subject to disciplinary action whether they occur on or off campus.

4. PROFESSIONALISM

CNUCHS is committed to providing teaching, scholarly activity, research, and service in a professional manner. We display professional attitudes, values, and behaviors in the classroom, at community partner organization sites, and within the broader community. We encourage teamwork and team-based learning that respects differing points of views of team members. At the same time we expect individual competence, performance, and accountability in a professional manner. We serve as positive role models by striving for excellence in the performance of our duties, while protecting the health and autonomy of colleagues and clients, and in serving individual, community, and societal needs.

The following examples include, but are not limited to, acts that violate the professionalism principle of the Good Conduct Code of Honor and will be subject to academic disciplinary action or non-academic disciplinary action as appropriate: any behavior which violates federal, state, or local laws, or any University/College or formal affiliate policy or rule; lewd, obscene, or indecent conduct on any University/College owned or controlled building or property; sexual harassment/misconduct; sexual harassment; unauthorized manufacture, sale, possession, or use of any illegal substance or substance that causes chemical dependence or impairment; hazing; bullying; physical or verbal abuse; or, possession of a deadly weapon. The acts described in the preceding sentence and other acts in violation of the professionalism principle are subject to disciplinary action whether they occur on or off campus.

Personal Accountability and Expectations

All students, faculty, and staff of the CNUCHS community are required to follow this Academic Integrity and Good Conduct Code of Honor. We are all personally responsible and accountable for maintaining an environment and culture of respect, honesty, integrity, legal and ethical behavior, and professionalism. This environment and culture is to be extended off campus when it involves a CNUCHS-related matter or a member of the CNUCHS community, including, but not limited to clients, preceptors, and volunteer sites participating in the CNUCHS experiential education program. It is understood that teamwork is necessary for ensuring and sustaining an environment and culture that support these core principles and related values.

As such, it is expected that all students, faculty, and staff of CNUCHS shall:

- Embrace the Academic Integrity and Good Conduct Code of Honor and its standards of expected behavior
- Uphold the Code of Honor in daily life both on and off-campus
- Promote the Code of Honor in an environment and culture of respect, honesty, integrity, legal and ethical behavior, and professionalism
- Report Academic Integrity and/or Good Conduct violations to the appropriate faculty and administrators
- Seek appropriate advice if unsure or in doubt
- Cooperate with investigations of violations of this Code of Honor

Consequences of Violations of the Academic Integrity and Good Conduct Code of Honor

Violations of the Code of Honor shall be reported and accorded due process according to the following procedures:

1. Students should report instances of academic dishonesty to the faculty member whose assignment or exam was compromised. The faculty member should evaluate the evidence and seriousness of the academic misconduct and hold a preliminary meeting with the accused student. For a first-time or minor infraction where the accused student admits misconduct, the faculty member has the option of setting a reasonable punishment (i.e., loss of points on an assignment) and/or mentoring the student on proper behavior with advisement of the consequences of repeated violation of the Code of Honor. If the accused student denies

misconduct in the face of sufficient evidence, the faculty member should refer the matter to the CNUCHS Committee on Academic Integrity and Good Conduct for documentation, investigation, and adjudication and disposition of the incident. Faculty members receiving such reports shall document all instances of academic dishonesty and Code of Honor violations in a confidential letter describing the incident and its resolution. The letter is to be forwarded to the Director of Student Success and Career Services who maintains confidential student records and communicates with appropriate university officials on a need-to-know basis.

2. Students and faculty should report instances of non-academic or personal misconduct to the Associate Dean of Student Affairs. The Associate Dean of Student Affairs is charged with handling the matter according to separate CNUCHS policies governing personal misconduct and crimes.

Non-Retaliation

CNUCHS does not tolerate retaliation against individuals who report dishonest, illegal, unethical, unprofessional, hateful, or otherwise inappropriate acts. Anyone who retaliates against reporting or whistle-blower individuals is in violation of the Code of Honor and is subject to appropriate disciplinary action for that violation including suspension and termination of employment or enrollment.

Complaint/ Grievance Policy

California Northstate University College of Health Sciences (CNUCHS) is committed to serving students by providing a rigorous academic program and the appropriate student services to promote success upon graduation. If students are dissatisfied with a decision, act, or condition at CNUCHS that is evidence-based, regarding negative, unjust, arbitrary, or discriminatory treatment they are encouraged to seek a remedy. Also see the Discrimination and Sexual Harassment and Sexual Violence Policies.

Early Resolution

Students who have a complaint relating to a College or University issue may wish to first discuss the matter with the relevant person or office. If this is not possible or the student is uncomfortable with a direct approach, the student may discuss the issue with a university official such as a faculty member, Director, or other neutral party. If the issue is not resolved through such an informal approach, the student may file an official written grievance using the Student Complaint or Grievance Form as soon as possible after the occurrence.

Formal Grievance

For grievances of an academic nature, students should direct their appeal to the Senior Associate Dean of Academic Affairs. See the Student Complaint or Grievance Form.

For grievances non-academic in nature, students should direct their appeal to the Associate Dean of Student Affairs. See the Student Complaint or Grievance Form.

Students filing an official written grievance must identify the specific College or University Policy that has been allegedly violated, cite specific evidence supporting the allegation, and suggest a possible approach to resolution.

As appropriate, the Senior Associate Dean for Academic Affairs or the Associate Dean for Student Affairs will convene an ad hoc committee of 3 faculty members or Directors. This committee will examine the grievance and recommend a remedy to the Senior Associate Dean or Associate Dean. The appropriate Associate Dean will provide a written response to the student with proposed resolution within 21 calendar days after receiving the written complaint. If the student is dissatisfied with the resolution, a further appeal can be made to the Dean of the College of Health Sciences within 7 calendar days after the formal written resolution. The Dean is charged with investigating the matter by examining all the relevant evidence. Upon due consideration, the Dean shall issue a final decision documented in a letter to the student and the relevant individuals involved in the matter. The Dean's decision is final.

A record of formal student complaints and their resolutions will be maintained by the Dean's Office.

For complaints related to accreditation standards, please see Accreditation Information on page 9 of this catalog.

CHS Course Descriptions

In alphabetical order by department

ANTH 210 Cultural Anthropology (3 cr)

This course introduces key concepts, methods and theoretical debates in cultural anthropology - a discipline that examines social patterns and practices across cultures. All stages of human life from birth to death are culturally influenced. Our lives emerge from programmed biological processes, yet we experience life within in a culturally rich world envisioned through identity, expectation and experience. We will explore various aspects of human life including perceptions of time and space, race, gender, marriage, sexuality, and family to examine how life stages are made meaningful and are given value through culture. We will also look at the historical development of social and economic systems, the role of language in culture and various systems of political power. We will conclude by looking through the anthropologist's lens at diverse concepts of body, health and illness. Summative work will emerge in Life Envisioned Projects and Life Envisioned Reflections that utilize the anthropologist's observation and ethnography toolkit. (Prerequisites: sophomore year standing or instructor approval)

ARMU 110 Art Appreciation (3 cr)

Artists document and interpret the human experience through creative expression recorded in drawings, painting, sculpture and other media. The history of art is also a catalog of human development from primitive origins to modern civilization. This course will enhance students' appreciation of art by exploring its many forms, interpretations, and creators. (Prerequisites: none)

ARMU 120 Music Appreciation (3 cr)

Students survey the evolution of western music from the middle ages to the present by identifying and analyzing musical compositions. The course explores basic elements of music, including structure of musical compositions as well as orchestral instrumentation and elements of world music culture as it relates to each stylistic period. For each musical period, students explore styles, characteristics, and major composers. Emphasis is placed on becoming a knowledgeable and discerning listener. (Prerequisites: none)

BIOL 110 Biology I – Inheritance, Evolution, & Diversity of Life (3 cr)

BIOL110 is an introductory course focusing on exploring the evolution and diversity of living organisms, including how organisms interact with each other and the environment. Emphasis is placed on relationships between living organisms and on organismal form and function. Companion laboratory course (BIOL110L) to be taken concomitantly with BIOL110 lecture course. (Prerequisites: none; co-requisite: BIOL110L)

BIOL 110L Biology I – Inheritance, Evolution, & Diversity of Life Laboratory (1 cr)

Companion laboratory course to be taken concomitantly with BIOL110 lecture course. (Prerequisites: BIOL110 if not taken concurrently)

BIOL 120 Biology II – Cells & Biomolecules (3 cr)

A continuation of BIOL110 that focuses on cell and molecular biology. Topics include cell organelles, cell physiology, membrane biology, bioenergetics, DNA, RNA, replication, gene transcription and regulation, protein synthesis, and protein structure and function. (Prerequisites: BIOL110 & CHEM110, or instructor approval)

BIOL 120L Biology II – Cells & Biomolecules Laboratory (1 cr)

A co-requisite of Bio 120 that focuses on current themes and techniques commonly used in cell and molecular biology laboratories. (Prerequisites: (Prerequisites: BIOL110 & CHEM110, or instructor approval); BIOL120 if not taken concurrently)

BIOL 210 Human Anatomy (3 cr)

This course provides a comprehensive overview of the gross anatomy of the human body. The architecture of the body and its structural relationships are presented with the use of three-dimensional models and software. NB: Organ dissections (kidney, heart, brain eye) will be performed by students who take the BIOL201L (laboratory component). However, should a student wish not to engage in dissection (e.g., ethical or religious concerns), the student may observe dissections performed by other students or study digital video demonstration of dissections. See BIOL210L Course Proposal for more information. (Prerequisites: BIOL110 & BIOL120, or instructor approval)

BIOL 210L Human Anatomy Laboratory (1 cr)

Companion laboratory course to be taken concurrently with BIOL210 lecture course. NB: Organ dissections (kidney, heart, brain eye) will be performed by students. However, should a student wish not to engage in dissection (e.g., ethical or religious concerns), he/she may observe dissections performed by other students or study digital video demonstration of dissections. (Prerequisites: BIOL210 if not taken concurrently)

BIOL 220 Human Physiology (3 cr)

The science of human physiology is presented in broad survey. Questions addressed by the course include: How does the body function at a mechanistic level? What are the quantitative principles of homeostasis compatible with life? A systems-based approach is used to examine the detailed function of the major organs and compartments of the body. (Prerequisites: BIOL210 & BIOL210L, or instructor approval)

BIOL 220L Human Physiology Laboratory (1 cr)

Companion physiology laboratory course to be taken concurrently with BIOL220 lecture course. This course provides a hands-on experience in applying physiological concepts and practices in addressing human health. (Prerequisites: BIOL210 & BIOL210L; BIOL220, if not taken concurrently)

BIOL 230 Genetics – From Genes to Genomes (3 cr)

Genetics deals with the structure and role of genes as determinants of inheritance (genotype) and biological function (phenotype) of all living organisms. The course explores the intricacies of gene function as elucidated from the structure of DNA to the organization and evolution of the genome – the entire complement of genes for a given organism. (Prerequisites: BIOL120 or instructor approval)

BIOL 240 Essentials of Biochemistry (3 cr)

Essentials of Biochemistry will focus on discovering the biological aspects of chemistry. Throughout the semester students will focus on fundamental topics in relation to the molecular design of life and transducing and storing energy. Specifically, students will build their foundations with macromolecule structure and function, energy storage and metabolism, synthesis of the molecules of life and the experimental methods used to study these components. (Prerequisites: BIOL110, BIOL120, CHEM110, & CHEM120)

BIOL 310 General Microbiology (3 cr)

This course is a general introduction to the study of microscopic forms of life including viruses, bacteria, protozoa, fungi, and algae. (Prerequisites: BIOL120, or instructor approval; co-requisite: BIOL310L)

BIOL 310L General Microbiology Laboratory (1 cr)

Companion laboratory course to be taken concurrently with BIOL310 lecture course. (Prerequisites: BIOL310 if not take together)

BIOL 320 Medical Microbiology & Epidemiology (3 cr)

A continuation of microbiology discussed in BIOL320 with a specific focus on microorganisms associated with infectious diseases of biomedical concern such as influenza, measles, methicillin-resistant staphylococcus, and HIV-AIDS. Epidemiology is the study of how microbial infections originate and spread within a population, and how they are contained. (Prerequisites: BIOL310 or instructor approval)

BIOL 330 Human Nutrition (3 cr)

(Formerly titled "Essentials of Nutrition") This course describes the nutrient requirements of the human body and the principles that define the relationship between diet and good health. (Prerequisites: CHEM310 or instructor approval)

BIOL 340 Immunology (3 cr)

Immunology is the study of the innate and adaptive capacities of the immune system as a complex cellular network that functions in the body's response to exposure to foreign substances (antigens) and organisms. The immune system exhibits a wide variety of cell-mediated defensive functions and antibody-mediated protective functions. It is also involved in pathological conditions such as septic shock and autoimmune disorders that are also covered in this course. (Prerequisites: BIOL220 or instructor approval)

BIOL 350 Current Topics in Biology and Medicine (3 cr)

This course surveys important developments in biology and medicine with regard to their present and future implications. Discussions may include such topics as discovery of DNA and founding of molecular biology, eugenics, biotechnology, human genome sequencing, genetic fingerprinting, and gene therapy. Special attention will be given to ethical issues

concerning the practice of medicine and the creation and application of biotechnology. (Prerequisites: sophomore year standing or instructor approval)

BIOL 410 Neuroscience (3 cr)

Neuroscience is the study of the cellular and molecular basis of nervous system function. Neurons and associated glial cells form an electrical and chemical signaling network that underlies sensory perception, muscle contraction, and central information processing in the brain. This course provides an in-depth overview of neurobiology relevant to the physiological function of peripheral nerves and central nervous system (brain and spinal cord). (Prerequisites: BIOL120 & CHEM120 both with a C or better)

BIOL 420 Advanced Cell and Molecular Biology (3 cr)

This course covers a variety of advanced topics in cell biology such as mechanisms of membrane transport, signal transduction, bioenergetics, cell cycle regulation, cell migration, gene expression, cancer, and cell death mechanisms. (Prerequisites: BIOL120; recommended courses: BIOL210 & CHEM310)

BIOL 430 Pharmacology (3 cr)

This course surveys major classes of drugs in clinical use and also introduces the science of modern drug discovery. A drug is broadly defined as any chemical that affects physiological function. Drugs that have been clinically tested and approved for human use are also powerful chemical tools used to manage symptoms and treat disease. The science of pharmacology is concerned with mechanisms of drug action at various levels from the whole organism to the cellular level to molecular interactions. (Prerequisites: BIOL220 & CHEM310, or instructor approval)

BIOL 440 Pathophysiology (3 cr)

Pathology refers to the general study of disease. The science of pathophysiology seeks to understand the physiological bases of the origin and progression of disease. This course also covers advanced methods used to detect and diagnose diseases such as histological examination of tissue samples and biochemical analysis of biomarkers. (Prerequisites: BIOL220 & BIOL420 or instructor approval)

BIOL 450 Human Genetics and Genomics (3 cr)

This course is an advanced course in human genetics which will build upon the fundamentals of Mendelian genetics by examining the chromosomal basis of inheritance and variation, complex inheritance patterns and advances in DNA technology and genomics. In particular, we will explore important ethical questions in addition to the benefits and limitations surrounding the field of human genetics. (Prerequisites: BIOL230 or instructor approval)

BIOL 460 Human Functional Anatomy (3 cr)

This course provides a comprehensive and integrative examination of the structure, function and evolution of the human body through integration of several fields of study. Structures and their organization are interpreted in terms of embryological, developmental, biomechanical and phylogenetic properties. Although the course requires rigorous, focused effort, its pay-off comes from a solid understanding of the whole organism's biology. The course reduces the number of unexplained facts otherwise

encountered in descriptive anatomy, in favor of an in-depth study of human form and function. (Prerequisites: successful completion of C grade or better of an introductory course in whole organism biology.)

CHEM 100 Principles of General Chemistry (1 cr)

A course introducing the basic principles of chemistry in preparation for general chemistry. Topics include basic anatomic structure, concepts of bonding, electronegativity, molecular geometry, chemical equations, stoichiometry, concentration, and acids/bases. (Prerequisites: none)

CHEM110 General Chemistry I (3 cr)

This course covers the electronic structure of atoms, periodic table, quantum theory, atomic bonding, molecular orbitals, principles of molecular structure, and chemical reactions. Students are introduced to the diversity of inorganic and organic chemical interactions that underlie the physical substance of matter. (Prerequisites: MATH110; co-requisite: CHEM110L)

CHEM 110L General Chemistry I Laboratory (1 cr)

Companion laboratory course to be taken concurrently with CHEM110 lecture course. (Prerequisites: CHEM110 if not taken concurrently)

CHEM 120 General Chemistry II (3 cr)

The second semester of general chemistry investigates the guiding principles of the behavior of chemical systems including thermodynamics, kinetics, equilibrium, electrochemistry, and radioactivity. (Prerequisites: CHEM110 & CHEM110L)

CHEM 120L General Chemistry II Laboratory (1 cr)

Companion laboratory course to be taken concurrently with CHEM120 lecture course. (Prerequisites: CHEM120 if not taken concurrently)

CHEM 200 Principles of Organic Chemistry (1 cr)

A course highlighting and extending the basic principles from general chemistry imperative to organic chemistry. Topics include extended geometry, basic nomenclature, molecular orbitals, resonance, electronegativity, polarity, acids, bases, pKa, kinetics, and thermodynamics. (Prerequisites: CHEM120)

CHEM 210 Organic Chemistry I (3 cr)

This course covers the chemistry of major classes of organic molecules and functional groups such as halogens, amines, ethers, esters, and amides. Organic compounds are broadly defined as molecules that contain carbon, an extremely versatile element in terms of its chemistry. (Prerequisites: CHEM120 & CHEM120L)

CHEM 220 Organic Chemistry II (3 cr)

A continuation of CHEM210 that expands upon organic reactions, organic synthesis, and biomolecules relevant to biology and medicine. (Prerequisites: CHEM210)

CHEM 220L Organic Chemistry II Laboratory (2 cr)

Companion laboratory course to be taken concurrently with CHEM220 lecture course. (Prerequisites: CHEM220 if not taken concurrently)

CHEM 220R Organic Chemistry II Recitation (1 cr)

A companion course to the second semester of a two semester course in organic chemistry. The recitation course will focus on reinforcing the conceptual frameworks and developing a greater understanding of the topics covered in CHEM 220. In addition, emphasis will be placed on improving approaches to studying and exam taking strategies. (Prerequisite: CHEM 210; co-requisite of CHEM 220)

CHEM 310 Biochemistry (3 cr)

The science of biochemistry is focused on chemistry specific to living organisms. Beginning with a detailed description of the structure of biomolecules and macromolecules such as DNA, amino acids, proteins, carbohydrates, and lipids, major topics of the course include enzyme mechanism and kinetics, metabolic pathways of biosynthesis and catabolism, and physical methods of analysis used in biochemical research. (Prerequisites: CHEM220 or instructor approval)

COLL 100 Student Success Seminar (2 cr)

The purpose of this course is to guide first-year students in a successful transition from high school to college. Topics include review of academic policies, university services, copyright laws and plagiarism, university etiquette, strategies for studying and test-taking, career advising, help resources, and balancing social life with academics. (Prerequisite: none)

COLL 105 Healthcare Student Success Seminar (1 cr)

The purpose of this course is to guide first-year combined program students in a successful transition from high school to college. Students will: participate in several self-reflection activities; acquire college learning skills; examine careers in the healthcare industry; learn about resources available to them and policies that affect them. (Prerequisite: none)

COLL 110 Medical Terminology (2 cr)

COLL110 is an online course which is a basic review of medical terms and technical jargon commonly encountered in medical school and in the health science workplace. *Students will spend approximately 30 hours using computer-based instruction via learning software *Instruction delivery will be either hybrid (in-class and online) or fully online. (Prerequisite: none)

COLL 210 Foundations of Service Learning (2 cr)

The course provides frameworks, theories, experiential learning, and models for to prepare students for service learning experiences with community organizations. Students achieve learning outcomes through critical reflection and interactive activities meant to prepare students for social accountability and cultural competence development. (Prerequisites: none)

COLL 220 Service Learning Practicum (2 cr)

The course provides support for students in conjunction with their service-learning placement with a previously identified community partner. Some discussions will review frameworks, theories, experiential learning, and models in order for them to integrate these into their service-learning experience. Student work addresses the needs of the community, as identified through collaboration with community partners, while meeting learning outcomes through critical reflection meant to prepare students for social accountability and cultural competence development. Students who do not fulfill

the volunteer requirement for any reason, including but not limited to tardiness, work ethic, or absenteeism, will not receive credit for the course. (Prerequisite: COLL210)

COLL 310 Scholarly Project I / Research Methods (3 cr)

This class introduces students to methodology used in scholarly research. Topics include the scientific method of hypothesis formulation and experimental design, information literacy, database sources and library skills, experimental design, data collection and analysis, reading and writing professional journal articles, and scholarly presentations in poster and seminar format. (Prerequisite: junior year standing or year two of 3+4 pathway)

COLL 320 Scholarly Project II (3 cr)

Research methods introduced in COLL310 are used to design and execute an independent research project. (Prerequisites: COLL310)

COLL 420 Leadership (3 cr)

Students will learn about tools needed to be a leader and to exercise leadership effectively in a variety of circumstances. Teaching methodology will be in the form of inquiry-style discussions and thought-provoking conversation. (Prerequisites: junior year standing or completion of 57 credits; and good academic standing.)

COLL 490a Peer-Assistant Learning (1-3 cr)

Formerly titled "Teaching Assistant") Students may elect to receive official credit on their transcripts for work as teaching assistants in laboratory courses or for tutoring other students who need additional support. Students electing this course must be approved by a faculty member who will supervise the teaching activity. Three hours of work must be completed per week for the semester to earn the equivalent of 1 credit unit. Course may be taken more than once, but no more than 2 units may be applied to the degree or program requirement. (Grading: P/NP only. Prerequisites: instructor approval)

COLL 490b Research Experience (1-3 cr)

COLL 490b provides students with training and engagement in academic research. Students receive official credit on their transcripts for work as research assistants in faculty research groups. Students electing this course must be approved by a faculty member who will supervise the research activity. The course may be taken more than once, but no more than 2 units may be applied to degree or program requirements. Over the course of the semester, 45 hours of work must be completed during the semester to earn the equivalent of 1 credit unit. (Grading: P/NP only. Prerequisites: instructor approval)

COLL 490c Student Services Assistant (1-3 cr)

Students will receive official credit on their transcripts for work performed as a Student Services Assistant. Students must be approved by a faculty member who will supervise them. Hours are variable. Course may be taken more than once, but no more than 2 units may be applied to the degree or program requirement. (Grading: P/NP only. Prerequisites: Approval of the supervising faculty member)

COLL 430 Service Learning for Health Care Professionals (2 cr)

(Formerly COLL530 and titled Community Outreach Project) This course provides frameworks, theories, experiential learning, and models for students to understand their service learning experience and support them during their placement with a community partner. Student work addresses the needs of the community, as identified through collaboration with community partners, while meeting learning outcomes through critical reflection meant to prepare students for social accountability and cultural competence development. A background check (fee varies) may be required by community partners. (Prerequisites: Passage of background check if required by community partner)

COLL 440 Service Learning Practicum for Health Care Professionals (2 cr)

(Formerly COLL540) This service learning course is a continuation of COLL430. (Prerequisites: None)

COMM 110 Oral Communication (3 cr)

This course allows student to learn and practice the art of oral communication in a variety of formats commonly encountered in professional settings: small group discussion and conferences, teaching, presentations accompanied by visual information, and formal speeches. Practice exercises with feedback from the instructor and student peers will help each student to improve delivery and confidence in speaking before groups. (Prerequisites: none)

ECON 210 Macroeconomics (3 cr)

Macroeconomics is concerned with the behavior of the whole economy at a national or global level. The significance of broad measures of economic activity and the influence of governmental policies such as monetary policy, fiscal policy, spending, and taxation are a few of the topics covered in this course. (Prerequisites: none)

ECON 220 Microeconomics (3 cr)

Microeconomics deals with the economic relationships of supply and demand for goods and services within a limited market. Sound understanding of the impact of microeconomic factors such as pricing and competition is important to the normal operation of any business as well as the healthcare marketplace. (Prerequisites: none)

ENGL 110 English Composition I (3 cr)

This purpose of this course is to ensure that all students develop the ability to write lucid and logically structured prose that meets accepted standards of business correspondence and professional publications and are able to effectively use word processing software and online writing tools. Diagnostic writing exercises will be used to assess students' basic skills of English grammar and vocabulary in order to customize instruction to level of skill. Increasingly complex assignments on topics relevant to health science will be used to establish and refine writing competency. (Prerequisites: Passing score on English placement exam, or satisfying SAT or ACT score)

ENGL 115 Research and Writing (1 cr)

A one unit writing course, English 115 invites students to explore contemporary issues through critical thought, reasoning, and research. Students will learn to use the CNU

library, develop research skills, critical analysis skills, and engage in the research writing process. Students will craft a college-level research paper and develop a professional oral presentation based on a topic of their choice.

ENGL 120 English Composition II (3 cr)

A continuation of ENGL110 that emphasizes originality, definition of and avoidance of plagiarism, proper methods of source citation, and further development of clarity, presentation, and writing style. (Prerequisites: ENGL110 or High Passing score on English placement exam)

ENGL 120L English 120 Composition II Writing Lab (1 cr)

English 120 Composition Writing Lab gives students the opportunity to strengthen their academic writing skills in a supportive and interactive environment. Students will focus on creating coherent and organized prose through review and application of grammar, sentence and paragraph construction, thesis formulation, and vocabulary development. Enrollment in ENGL120L is required of all students who did not meet the Developed Category of the English 120 Writing Assessment Rubric. (Co-requisite: ENGL120)

ENGL 310 Professional Communication Seminar (2 cr)

This course is an elective option for students who wish to improve written and oral communication skills useful for advancement in the health professions. The course focuses on building reading, writing, and oral skills in a variety of contexts, including written composition of personal statements for medical school applications, interview techniques, and critical reasoning skills applicable to reading comprehension of literature on standardized tests such as the MCAT exam. (Prerequisites: ENGL110 or ENGL120, or instructor approval)

GOVT 110 US Government (3 cr)

This course reviews the organization and principles of U.S. government at the federal, state, and local levels. It also takes an in-depth look at governmental agencies responsible for oversight and administration of matters related to health science and healthcare. (Prerequisites: none)

HIST 310 History of Medicine (3 cr)

Beginning with crude concepts of how the body works as developed by Hippocrates, this course will follow the story of how medicine evolved from myth and superstition into a modern science. (Prerequisites: sophomore year standing or instructor approval)

HUMN 210 Still Human: Science, Technology, and Culture (3 cr)

In this course, students critically engage two sprawling, dominant drivers of individual, cultural, and societal changes: science and technology. Students will explore the manifold ways that individuals and institutions, as well as sciences and technologies, shape one another. Humanities 210 students will not merely be passive observers of such changes; they will parse the normative fine print of scientific developments and emerging technologies to understand where and how to add their voices and perspectives. The aims will be arguments; the products will be essays, debates, and multi-media presentations. (Prerequisites: ENGL110 or instructor approval)

HUMN 220 Critically Engaging Contemporary Concerns (1 cr)

This course provides students with the opportunity to discuss and debate dissimilar, spirited, and considered perspectives, HUMN 220 invites critical engagement on significant contemporary topics. The themes will relate to current events, matters of regional, cultural, and international significance, subjects of moral import, scientific controversies, and issues that draw from the health sciences but have import far beyond the classroom. Course may be taken more than once, but no more than 3 units may be applied to the degree or program requirement. 3-5 hours of work must be completed per week for the semester to earn the equivalent of 1 credit unit. (Prerequisites: ENGL110 or instructor approval)

HUMN 410 Critical Analysis and Reasoning Contemporary Issues in Science and Technology (3 cr)

This course invites critical engagement on significant contemporary topics through textual analysis of academic literature from the humanities and social sciences. Readings draw from current, and sometimes controversial, topics related to health sciences, bioethics, medical ethics, medicine, pharmacology, and culture. Students will refine their reading comprehension skills and further develop their abilities to reason within and beyond the texts themselves. Through journal responses, short essays, discussions and debates, and multi-media presentations, students will demonstrate their abilities to engage critically with contemporary issues in science, technology, and culture. (Prerequisites: ENGL110 & ENGL120, or instructor approval; recommended courses: introductory philosophy, history, or sociology courses.)

MATH 120 Applied Statistics (3 cr)

This course provides a comprehensive overview of basic statistics concepts and their application to biomedical sciences. It explains general principles of data analysis and statistical terminology. At the end of the course students will be able to carry out basic statistical analysis and to interpret the results. (Prerequisites: none)

MATH 125 Pre-Calculus (3 cr)

This course reviews and elaborates upon mathematics essential for the study of calculus. Specific topics include polynomials, trigonometric functions, exponential and logarithmic functions, infinite series, and complex numbers. This course is required to be taken by students who need a thorough review of this material as determined by performance on a mandatory math placement exam given to all first-year students before the start of the Fall semester. Students who do well on the placement exam may skip this course and enroll directly in MATH130 Differential and Integral Calculus offered in the Spring. (Prerequisites: none. recommended courses: To be successful in this course, students must have satisfactorily passed the equivalent of Algebra, Geometry, Algebra II, and Trigonometry)

MATH 130 Differential and Integral Calculus (3 cr)

Calculus is a powerful mathematical approach used to solve many complex problems that concern rate of change and multi-dimensional objects. It has numerous applications in diverse fields such as physics, chemistry, biology, economics, and business. Many professional schools in health sciences and business require at least one semester of calculus. (Prerequisites: MATH125 or passing math placement exam)

MEDS 410 Standardized Patients Clinical Experience (2 cr)

(Formerly MEDS500) This course is designed to introduce pre-medical post-baccalaureate students to the clinical experience from the patient's perspective. Students will have the valuable opportunity to interact with medical students, clinical faculty members and community physicians. The course consists of both didactic lectures and experiential learning. The didactic training focuses on communication, ethics, culture competency, related medical terminology and case studies. Experiential learning is in the form of role-play as standardized patients. This unique clinical experience will prepare students to better understand the needs of patients in patient centered health care, and enrich the clinical experience for the premed post baccalaureate students. As an optional elective, participation in this course is offered on a voluntary basis. (Prerequisites: PMPB student; review and agree to participate in lab activities listed on Standardized Patient Consent Form. Consent forms are available through Academic Advising)

MEDS 420 Standardized Patients Clinical Experience (2 cr)

(Formerly MEDS510) This course is designed to introduce pre-medical students to the clinical experience from the patient's perspective, and provide an introduction to the healthcare profession environment. Students will have the valuable opportunity to interact with medical students, clinical faculty members and community healthcare professionals. The course consists of both didactic lectures and experiential learning. The didactic training focuses on communication, ethics, cultural competency, related medical terminology, case studies, the current and future healthcare profession environment, and an introduction to health profession leadership and advocacy. Experiential learning is in the form of role-play as standardized patients, pre-lab medical overviews, and an off campus advocacy in action experience. This unique clinical experience will prepare students to better understand the needs of patient centered health care, provide a foundation of the healthcare environment in the U.S., introduce students to health profession administration, and overall enrich the pre-professional student clinical experience. (Prerequisites: PMPB student; review and agree to participate in lab activities listed on Standardized Patient Consent Form. Consent forms are available through Academic Advising)

PHIL 310 Philosophy and Contemporary Life (3 cr)

Philosophy attempts to elucidate abstract topics at a fundamental level. It uses logic and reason to address big questions such as issues of existence, morality, and ethics that are essentially unanswerable in exact form. The classical work of major historical figures in philosophy is presented and discussed to help students sharpen their intellectual skills and form their own philosophy. (Prerequisites: ENGL120)

PHLT 310 Global Health (3 cr)

This course examines the status of human health and systems of healthcare delivery across the world. Reasons for disparity in availability health services and outcomes are critically analyzed. The role of international organizations dedicated to improvement of global health is also covered. (Prerequisites: junior year standing or instructor approval)

PHLT 320 Healthcare Policy (3 cr)

Current healthcare policy is examined in light of recent research and debate and the following question is asked: What policies and procedures work best to keep the human population healthy? (Prerequisites: junior year standing or instructor approval)

PHLT 410 Mental Health Services (3 cr)

The tragedy and realities of mental illness require special health services. This course covers issues specific to this field of health care including psychiatric treatment, depression, suicide, drug addiction, alcoholism, and neurodegenerative diseases such as Alzheimer's disease. (Prerequisites: senior year standing or instructor approval)

PHYS 210 Physics I (3 cr)

Physics describes universal laws of nature that underlie the workings of the universe. The first part of the two-semester course describes the theory and quantitative relationships of motion, force, energy, gravity, light, optics, and sound. (Prerequisites: MATH130 or instructor approval)

PHYS 210L Physics I Laboratory (1 cr)

Companion laboratory course to be taken concurrently with PHYS210 lecture course. (Prerequisites: PHYS210 if not taken concurrently)

PHYS 220 Physics II (3 cr)

A continuation of PHYS210 that covers electromagnetism, electronics, solid-state physics, quantum theory, nuclear physics, particle physics, and relativity. (Prerequisites: PHYS210 or instructor approval)

PHYS 220L Physics II Laboratory (1 cr)

Companion laboratory course to be taken concurrently with PHYS220 lecture course. (Prerequisites: PHYS220 if not taken concurrently)

PSYC 110 General Psychology (3 cr)

The science of human psychology is presented in broad survey. The focus is on perception, cognition, personality and social psychology, and biological aspects of behavior. This introductory course provides a comprehensive introduction and overview of the field which facilitates study of more specialized topics. (Prerequisites: none)

PSYC 220 Social Psychology (3 cr)

Social psychology is concerned with the influence of society or other people on the thoughts, feelings, and behavior of any given person. Topics of social behavior include interpersonal attraction and relationship development, social perception, social cognition, personal attitudes, persuasion, social identity, gender identity, as well as prejudice and discrimination. (Prerequisites: PSYC110)

PSYC 310 Developmental Psychology (3 cr)

Developmental psychology is concerned with the description and understanding of distinct human behavior at various stages of life such as infancy, adolescence, and adulthood. Specific topics include emotional development, moral development, stereotype development, and personality development. (Prerequisites: PSYC 110)

PSYC 320 Health Psychology (3 cr)

Health psychology is the study of how health influences mental function and behavior and vice versa. The effect of illness, stress, and exercise are examples of external influences and controllable behaviors that can influence a person's psychological profile. The course will also explore factors affecting health maintenance and illness recovery. (Prerequisites: PSYC110)

PSYC 410 Abnormal Psychology (3 cr)

Abnormal psychology is concerned with the basis of altered behavior associated with mental illness. Relevant topics include psychiatric conditions such as mania, depression, psychosis, obsessive-compulsive behavior, and autism. Theories of causation and strategies of various therapies will also be presented. (Prerequisites: PSYC110)

PSYC 420 Cognitive Psychology (3 cr)

Cognitive psychology is concerned with information processing by the brain. This field of research studies how humans make decisions and behave according to the influence of sensory input, experience, memory, and belief. It also addresses complex cognitive phenomena such as imagery, attention, memory, learning, language, problem solving and creativity. (Prerequisites: PSYC110)

PSYC 430 Psychology for Healthcare Practitioners (3 cr)

This course examines the discipline of health psychology as it relates to the practice of healthcare. Students will reinforce foundational concepts in general psychology and further investigate the psychological impact of disease. Emphasis will be placed on a biopsychosocial and cross-cultural perspective in the examination, prevention, etiology, diagnosis, and treatment of illness. As appropriate for the condition being discussed, students will focus on stress and health, and coping strategies. Finally, students will determine the roles of health care systems as well as health policy formation and implementation in affecting healthcare practice.

SEMR 410 Health Professions Seminar I (1 cr)

(Formerly titled "COLL510 Health Professions Seminar Course") This undergraduate seminar is designed as a career-

building workshop in the form of a professional lecture series. The 1-hour sessions cover a variety of topics of interest to pre-medical students such as research seminars, career talks by CNU faculty and administrators, group discussions on pertinent research articles and recent editorials published in medical journals. (Prerequisites: None)

SEMR 420 Health Professions Seminar II (1 cr)

(Formerly titled "COLL520 Health Professions Seminar and Workshop") Health Professions Seminar II is a continuation of SEMR410. It is designed as a career-building workshop in the form of a professional lecture series. The 1-hour Friday sessions cover a variety of topics of interest to pre-medical students such as research seminars, career talks by CNU faculty and administrators, group discussions on pertinent research articles and recent editorials published in medical journals. (Prerequisites: None)

SOCL 110 Sociology (3 cr)

Sociology uses scientific methods to investigate the logical basis of human social behavior. The effect of gender, family upbringing, and education on a person's social behavior are typical examples of sociological inquiry. The conceptual framework of sociology is very useful in addressing issues of health disparity and effectiveness of health care delivery.

SOCL 410 Sociology for Health Practitioners (3 cr)

Sociology for Healthcare Professionals undertakes a detailed examination of the biopsychosocial contributions to the health sciences. Through lectures, readings, and class discussions, students will engage and reflect on health and illness as it is portrayed in the U.S. This course critically examines how health and illness are defined and socially constructed, experiences of illness, training and hierarchies of health care workers, medicalization and social control, and the ethical issues surrounding such topics. Application of theories and concepts to real life situations and practical applications are emphasized. (Prerequisites: instructor approval.)

CHS 2018-2019 Academic Calendar

California Northstate University College of Health Sciences		
2018-2019 Academic Calendar		
Description	Start Date	End Date
SUMMER 2018		
Student Orientation	Monday, June 11, 2018	Friday, June 15, 2018
Summer Academic Term	Wednesday, June 13, 2018	Friday, August 3, 2018
Instructional Period	Wednesday, June 13, 2018	Wednesday, August 1, 2018
Admission Drop Deadline	Monday, June 18, 2018	
Midterm Exam	Wednesday, July 4, 2018	
Final Exams	Thursday, August 2, 2018	Friday, August 3, 2018
Final Grades Due	Monday, August 6, 2018	
Remediation Period	Tuesday, August 7, 2018	Thursday, August 23, 2018
Spring Remediation Grades Due	Friday, August 24, 2018	
FALL 2018		
Student Orientation	Thursday, August 23, 2018	Friday, August 24, 2018
Fall Academic Semester	Monday, August 27, 2018	Friday, December 14, 2018
Instructional Period	Monday, August 27, 2018	Friday, December 7, 2018
Holiday — Labor Day	Monday, September 3, 2018	
Admission Drop Deadline	Monday, September 10, 2018	
Holiday — Thanksgiving Break	Thursday, November 22, 2018	Friday, November 23, 2018
Final Exams	Monday, December 10, 2018	Friday, December 14, 2018
Final Grades Due	Wednesday, December 19, 2018	
Winter Break	Monday, December 17, 2018	Friday, January 11, 2019
Remediation Period	Monday, December 17, 2018	Wednesday, January 2, 2019
Fall Remediation Grades Due	Friday, January 4, 2019	
SPRING 2019		
New Student Orientation	Thursday, January 17, 2019	Friday, January 18, 2019
Holiday — Martin Luther King Jr.	Monday, January 21, 2019	
Spring Academic Semester	Tuesday, January 22, 2019	Friday, May 17, 2019
Instructional Period	Tuesday, January 22, 2019	Friday, May 10, 2019
Admission Drop Deadline	Monday, February 4, 2019	
Holiday — President's Day	Friday, February 16, 2019	
Spring Break	Monday, March 18, 2019	Friday, March 22, 2019
Graduation Ceremony	Saturday, May 11, 2019	
Final Exams	Monday, May 13, 2019	Friday, May 17, 2019
Final Grades Due	Wednesday, May 22, 2019	
Remediation Period	Monday, May 20, 2019	Friday, May 31, 2019
Spring Remediation Grades Due	Tuesday, June 4, 2019	

FINANCIAL SERVICES & DISCLOSURES

Financial Aid

Financial Aid Contact Information

Student Financial Aid Office
 9700 West Taron Drive, Elk Grove, CA 95757
 Phone: (916) 686-8784
 Fax: (916) 686-8145
 E-mail: jhansana@cnsu.edu
 URL: <http://www.cnsu.edu/student-financial-aid-offices>

What is Financial Aid?

Financial Aid is defined as assistance provided for the purpose of paying educational expenses. Assistance may come from various sources, and be of varying types:

- **Grants:** generally, monies from a government program that do NOT require repayment.
- **Scholarships:** generally, monies from an institution, private organization, or government programs that do NOT require repayment.
- **Loans:** generally, monies from private lenders or government programs that MUST BE repaid.

Financial Aid Eligibility?

Eligibility for financial aid is determined by three important factors:

1. **Enrollment Status:** an eligible financial aid recipient is one that is enrolled and attending at a minimum of 6 credits per semester, or otherwise considered to be enrolled at least half-time. This is subject to verification with the Office of the Registrar.
2. **Satisfactory Academic Progress:** an eligible financial aid recipient is one that continues to meet the academic progression requirements of the program. This is subject to verification with the Office of the Registrar.
 - a. Verification of adherence to progression requirements is completed as the end of each academic year, or more frequently on a case-by-case basis.
3. **Cost of Attendance:** an eligible financial aid recipient is one who's total financial aid award package does not exceed his/her applicable cost of attendance for the period of enrollment.

How to Apply for Financial Aid?

Ensure all required forms and applications are received by the appropriate departments.

1. **Financial Options Statement:** the Financial Aid department requires this form from all enrolled students each semester to identify his/her preferred financing method for payment of tuition and fees.
2. **Student Financial Aid Application:** the Financial Aid department requires this form from all enrolled students each academic year who are financing tuition and fees with a private educational loan.
3. **Private Educational Loan Promissory Note:** the Financial Aid department requires completion of this application for all enrolled students who desire to use

a private educational loan to assist with financing of educational expenses, **OR**

4. **Installment Payment Plan Contract:** the Business Office requires completion of a contract for all enrolled students who desire to use an installment payment plan to pay tuition and fees.

The [CNU Student Financial Aid Tools](#) webpage provides a wealth of information to manage finances, understand loan repayment options, learn about types of loans available, and much more.

Types of Financial Assistance

California Northstate University offers the following competitive educational financing options for students:

- Private Educational Loans
- Payment Plan Options
- Grants and Scholarships

Private Educational Loans

There are many private loan lenders available for students. The Student Financial Aid Office provides available programs listed on the ELM Select website at:
<https://www.elmselect.com/link/query?schoolId=473>

Payment Plan Options

CNU offers assistance to any student who is interested in paying semester tuition and fees over a series of months.

- [TuitionEase Payment Plan](#)

Grants and Scholarships

Grants and scholarships are monies that do not require payment – they are free money. Grants are often need-based, while scholarships are usually merit-based.

List of some scholarship databases:

- [CareerOneStop](#)
- [FinAid!](#)
- [Peterson's](#)
- [fastweb!](#)
- [Scholarship Search by Sallie Mae](#)
- [Scholarship Search by Best Colleges](#)

In the past, several companies have helped California Northstate University students finance their education through scholarships. Some of these companies include: Albertson's, CVS, Pharmacist Mutual Insurance Company, Safeway, SuperValu Drug Stores, and Walgreen's. These scholarships range from \$500 to \$2,000. Criteria for scholarships vary by the specific donor and are usually awarded in the late fall and early spring.

Financial Disclosures

Payment and Prerequisite Due Dates and Options

All tuition and fees described in the Tuition and Fees sections of this catalog, are due in full in accordance with the respective notification as identified below:

- New incoming students: Payment schedule is identified on the last page of the Student Enrollment Agreement;
- Continuing students: Payment is due 10 days prior to the first official day of class or the date listed on the Tuition and Fee Notification from the Business Office.

As an alternative to payment in cash, the student may (1) provide satisfactory written creditor approved loan documentation to the University, or (2) apply for one of the installment payment plans offered by the University, either of which the University may within its complete discretion accept as an alternative to cash payment for the above tuition and fees, excluding the nonrefundable enrollment fee deposit and the student health insurance premium. If either of these two alternative payment options is chosen by the student and approved by the University instead of payment in cash, the student must make the appropriate arrangements with the University for payment in accord with these options no later than thirty (30) days before the applicable due date described on the last page of the Enrollment Agreement. Failure to make full payment, or alternative loan or installment payment arrangements, by the due dates described in the Enrollment Agreement will subject the defaulting incoming student to forfeiture of the student's seat and the defaulting continuing student to dismissal or interest on the balance due at 10% per year until paid.

Student's Right to Cancel and Refund

You have the right to cancel the Student Enrollment Agreement until 12:01 AM on the first calendar day after the first classroom instruction session attended, or until 12:01 AM on the eighth calendar day after a student has signed the Enrollment Agreement, whichever is later.

If a student cancels the Enrollment Agreement, the University will refund the amount of tuition that was paid; not including nonrefundable enrollment fees identified in the Tuition and Fees table for each college, within forty five (45) days after a notice of cancellation is received by the University. The student health insurance premium in the estimated amount of \$3,200.00 is set by the health plan, which is an outside provider, and will not be refunded unless the health plan provides a refund and, if so, then only according to the plan's terms.

Cancellation shall occur when you give written notice of cancellation to the University at the University's address shown at the top of the first page of the Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of cancellation sent by hand delivery, email, or facsimile is effective upon receipt by the University. Written notice of cancellation sent by mail is effective when

deposited in the mail properly addressed with postage prepaid.

Student's Right to Withdraw and Refund

After the cancellation period described above in "Student's Right to Cancel and Refund," you have the right to withdraw from the University at any time. Withdrawal shall occur when you give written notice of withdrawal to the Registrar at the University's address shown at the top of the first page of the Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of withdrawal sent by hand delivery, email, or facsimile is effective upon receipt by the Registrar. Written notice of withdrawal sent by mail is effective when deposited in the mail properly addressed with postage prepaid.

The written notice of withdrawal should be on the Official College Withdrawal Form provided by the Office of the Registrar, but may also be in any writing that shows you wish to withdraw from the University. Please include your student ID number on your notice. A withdrawal may also be effectuated by the student's conduct showing intent to withdraw, including but not necessarily limited to the student's continuing and unexcused failure to attend all classes.

If you withdraw before or at completion of 60% (and no more) of the current term, you will be eligible for a pro-rata refund for such term. The University will perform a pro-rata calculation of current term tuition as follows:

Step A) Total calendar days* in current term** – Calendar days in current term completed = Total Calendar days Not Completed

Step B) Total calendar days not completed/Total calendar days in current term = % of pro-rata refund

Step C) Institutional charges*** x % of pro-rata refund = Total refund owed

* Total calendar days include weekends and holidays, except:

- Scheduled break of five or more consecutive days when no classes are offered.
- Days of leave of absence are not included in total days.

**Current term generally means the current semester, but when tuition is charged for the entire period of enrollment rather than by semester, then the current term shall mean that period of enrollment.

***Institutional charges excluded from the pro-rata refund are: (1) non-refundable registration fee (applicable to first year, first semester students only), (2) all other non-refundable fees as described in the current General Catalog, (3) Student Tuition Recovery Fund fee, and (4) Student Health Insurance premium estimated at \$3,200.00, if applicable; institutional charges included in the pro-rata refund include: (1) current term tuition.

There is no refund for students who withdraw after completing more than 60% of the current term.

If the amount of the current term payments is more than the amount that is owed for the time attended, then a refund of

the difference will be made within 45 days after the notice of withdrawal is received by the Office of the Registrar. Refunds owed to the student as a result of a pro-rata calculation will be done in the following order:

- Private Educational Loan(s);
- To the student.

If the amount of the current term payments is less than the amount that is owed for the time attended, it is the sole responsibility of the student to contact the University to make appropriate payment arrangements.

Financial Aid and Loan Obligations

California Northstate University offers financing options to meet the needs of its students. For a detailed description of the financing options, please visit the Financial Aid Office webpage, <http://cnsu.edu/student-financial-aid-offices>.

If the student has received federal student financial aid funds, upon cancellation or withdrawal and subject to the conditions for refund described above, the student is entitled to a refund of moneys not paid from federal student financial aid program funds.

If the student obtains a loan to pay for an educational program, then the refund upon cancellation or withdrawal, subject to the conditions for refund described above, will be sent to the lender or to the loan guarantee agency, up to the amount of the loan; the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund paid to the lender. If the student owes money to the lender after the refund, then the student will need to make arrangements with the lender for payment of the amount remaining owed. If there is a refund amount remaining after payment to the lender, it will be paid to the student as described above.

If the student is eligible for a loan guaranteed by the federal or state government and the student defaults on the loan, both of the following may occur: (1) the federal or state government or a loan guarantee agency may take action against the student, including applying any income tax refund to which the person is entitled to reduce the balance owed on the loan; (2) the student may not be eligible for any other federal student financial aid at another institution or other government assistance until the loan is repaid.

Student Tuition Recovery Fund (STRF) Disclosures

The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, (916) 431-6959 or (888) 370-7589

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, an you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for the STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4)

year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number

Statement of Nonparticipation in Government Financial Aid Programs

California Northstate University does not accept or otherwise participate in any federal direct student loan program (Title IV) funding, any federal veterans benefits program (Title 38) funding, or any other federal or state government student loan/ financial aid funding.

STUDENT RECORDS

Office of the Registrar

The Registrar retains official enrollment, registration, and academic information for students and alumni. Downloadable request forms related to academic transcripts, enrollment/degree verifications, contact and personal information changes, grade changes, duplicate diploma requests, FERPA release authorization, emergency contact updates, leave of absences, and college withdrawals are available from the Office of the Registrar website.

Students are strongly encouraged to become familiar with the Office of the Registrar website.

Contact Information

Office of the Registrar
9700 West Taron Drive
Elk Gove, CA 95757
(P) 916-686-7400
Email: CNRegistrar@cnsu.edu
Website: <http://www.cnsu.edu/office-of-the-registrar/>

The main office is located on the second floor of the Elk Grove campus. A Registrar Office staff member is available on the Rancho Cordova campus on various days during the week during normal business hours. Please contact the Office for specific availability dates or to make an appointment.

Student Records

The academic transcript is a permanent student record maintained by the Office of the Registrar. Other student records as prescribed by California Code of Regulations 71920, are maintained by the institution for a minimum of five years from completion of or withdrawal from the CNU academic program. For assistance in accessing a record, please contact the Office of the Registrar or the department responsible for maintaining the record. Access to student records are governed by the Family Education Rights and Privacy Act of 1974 (FERPA). Please see the [Directory Information and Access to Student Records](#) section of this catalog or contact the Registrar for more information

CAMS Student Portal

Some records can be reviewed and updated online through the CAMS Student Portal.

The Portal allows the student to:

- Update contact information;
- View official grades, print unofficial transcripts, and review course narratives;
- Register for classes;
- View course schedules;
- Track submitted documents.

Students access the Student Portal with unique credentials provided by the CNU IT department prior to matriculation to the college.

To access the Student Portal, go to:

<http://www.cnsu.edu/office-of-the-registrar/student-portal>.

A PDF users guide is available on the website. Technical issues related to CAMS Student Portal should be directed to CAMSSUPPORT@cnsu.edu.

Please note that the Student Portal is different than and is not related to Canvas. Canvas is the learning management system (LMS) used by CNU. Grades displayed in Canvas are not official. Students use Canvas to participate in courses. Questions regarding Canvas should be directed to CNU IT department.

Changes or Corrections to Personal Information

Students are responsible for immediately report any change in their personal information (e.g. name, address, telephone number, etc.) to the Office of the Registrar. CNU will not be held responsible for any mail sent to the wrong address due to an incorrect address on file. The postage cost for remailing may be at the expense of the student.

Corrections to date of birth, social security number, and sex/gender require submission of the Change of Personal Information form and supporting legal documentation to the Office of the Registrar.

The request form is available at <http://www.cnsu.edu/office-of-the-registrar/registrar-services>.

Legal Name Change Request

Official CNU records and academic transcripts must reflect the student's name as it appears on government issued photo identification, such as a driver's license or U.S. Passport.

A student may request an official name change for school documents and records by submitting the following information to the Office of the Registrar:

1. A completed Change of Personal Information request form the Office of the Registrar's Service and Forms web page.
2. Government-issued photo ID showing new legal name
3. Acceptable proof of name change (marriage certificate or court order)
4. Current student identification card

Once the information has been verified and approved all official school documentation will be updated. The Registrar will then forward the name change to the following departments:

1. Business Office
2. Experiential Education
3. Financial Aid Office
4. Library - All library resources
5. OSAA
6. IT Department – The LMS (Canvas), new student identification badge, new email address

7. Student Records - Official Academic file, Student roster, academic advisor

The request form is available at <http://www.cnsu.edu/office-of-the-registrar/registrar-services>.

Change of Address

Current students should update their address, phone number and email through the **Student Portal** or by submission of the Change of Address Request form.

Former students must submit the request form to update their contact information. The request form is available on the Office of the Registrar website and in the forms display near the Office.

Submitted forms typically take 5 to 7 business days to process. Updates submitted through the Student Portal are reflected immediately, but may take 5-7 business days to be reflected in all University systems. This change will not update your W-9. To update the address on your W-9 you must submit a new W-9 to the Business Office.

Enrollment and Degree Verifications

The Office of the Registrar provides confirmation of student enrollment status to financial institutions, organizations, or agencies in writing at the student's request. Students may request proof of enrollment or degree by completing an Enrollment, Degree, & Good Standing Verification Request form located on the Office of the Registrar's web page.

The student must complete the form and submit it to the Registrar. Complete requests are typically processed within 5 business days. Verification letters are printed on official letterhead and include the Registrar's signature as well as the University seal. Requests are typically processed within 5 business days.

Information about verifications and the request form are available at: <https://www.cnsu.edu/office-of-the-registrar/enrollment-degree-verification-request>.

Transcript Request

A student's academic transcript is a permanent record. Students and former students may request an official transcript through the Office of the Registrar by:

- A) Submission of the Transcript Request Form
 - The Transcript Request form is available on the Office of the Registrar website and in the display case outside of the Office. The ordering fee is posted on the order form and payment is due at time of order submission.
 - Complete requests are typically processed within 5 business days.
- B) Order Online: www.parchment.com.
 - Official transcripts may be ordered through Parchment's online record ordering service. Credit card is required and additional service fees are applicable.

Unofficial transcripts can be viewed online through the Student Portal or ordered free-of-charge using the Transcript Request form.

All delinquent financial and business obligations with the University must be cleared before transcripts are released. The University will withhold official transcripts if the University has knowledge that the student has any default on loans or service obligations.

Ordering instructions and request form are available at: <https://www.cnsu.edu/office-of-the-registrar/registrar-request-a-transcript>.

Application for Graduation

Students applying for graduation must meet all academic and financial requirements prior to submitting the Petition to Graduate. Students who have completed all the requirements to graduate are required to submit the Petition to Graduate to the Office of the Registrar for processing prior to the graduation application deadline. The Petition to Graduate form is available on the Office of the Registrar Services and Forms web page.

Application Deadline for conferment of degree is as follows:

Graduation Application Deadline	Filing Period
Spring	February 1 through April 1

In addition, students must complete and submit the Graduation Clearance Form before their diploma will be mailed. The Clearance Form verifies that the student has no outstanding balances or University requirements.

Diplomas

The Office of the Registrar oversees the release of CNU diplomas. The student's degree must be awarded and posted to the Official Transcript before a diploma can be sent. Diplomas will include any applicable CNU honors (cum laude, magna cum laude, and summa cum laude).

Students must complete and submit the Graduation Clearance Form before their diploma will be mailed. The Clearance Form verifies that the student has no outstanding balances or University requirements. A diploma will not be provided until all student account requirements are met.

Diplomas are typically mailed first class to the permanent address listed on the Petition to Graduate approximately 6-8 weeks following graduation/degree conferral for students who have met all clearance requirements. CNU uses a third-party vendor to print and mail all diplomas. CNU is not responsible for lost, stolen, or returned diplomas.

Diplomas returned to the school as undeliverable will be held for five (5) years. Repeat shipping is at the cost of the student.

Duplicate Diplomas

A student may request a duplicate diploma that has been lost or damaged by completing a Duplicate Diploma Request Form and submitting the form to the Office of the Registrar.

The fee for a duplicate diploma is posted on the form and must be paid at the time it is submitted. When possible, the original diploma must be returned to the Office of Registrar. The request for a duplicate diploma is kept in the student's file.

Diplomas will be mailed first class to the address indicated on the Duplicate Diploma Request Form. Diplomas and official transcripts will not be released if there is a financial hold. CNU is not responsible for lost, stolen, or returned diplomas.

In the event that your diploma is lost or stolen and degree verification is needed, please submit the Enrollment and Degree Verification Request form.

Directory Information and Access to Student Records

Student Rights Under FERPA

The Family Educational Rights and Privacy Act (FERPA) afford eligible students certain rights with respect to their education records. An "eligible student" is a student who is 18 years of age or older or who attends a postsecondary institution. These rights include:

1. The right to inspect and review the student's education records within 45 days after the day California Northstate University receives a request for access. A student should submit to the Registrar a written request that identifies the record(s) the student wishes to inspect. The Registrar will make arrangements for access and notify the student of the time and place where the records may be inspected.
2. The right to request the amendment of the student's education records that the student believes is inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.
3. A student who wishes to ask the school to amend a record should write the Registrar, clearly identify the part of the record the student wants changed, and specify why it should be changed.
4. If the school decides not to amend the record as requested, the school will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
5. The right to provide written consent before the university discloses personally identifiable information (PII) from the student's education records, except to the extent that FERPA authorizes disclosure without consent.
6. The school discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by California Northstate University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person serving on the board of trustees; or a student serving on an official committee, such as a disciplinary or grievance

committee. A school official also may include a volunteer or contractor outside of California Northstate University who performs an institutional service of function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of PII from education records, such as an attorney, auditor, or collection agent or a student volunteering to assist another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for California Northstate University.

7. The right to file a complaint with the U.S. Department of Education concerning alleged failures by California Northstate University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:
Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901

Institutional Student Procedures for FERPA

FERPA does not cover employment, medical or police records, confidential letters of recommendation if the student has waived the right to review them, professors or administrator's personal records for their own use about students, parent's financial records, and other FERPA excluded records.

Additional information regarding FERPA can be viewed online at
<http://www.ed.gov/policy/gen/guid/fpco/ferpa/index.html>.

Student Directory Information Disclosure and Access

California Northstate University reserves the right to disclose certain directory information. Personally identifiable information such as student directory information (student name, address, telephone number, email address, field of study, cohort classification, enrollment status, dates of University attendance, club and/or organization memberships, degrees, honors and awards received, photograph, and the most recent educational agency or institution attended) is considered public information and may be disclosed by the University without prior written consent. The student may request that directory information be withheld from sources outside the University, excluding law enforcement, or within the University to anyone who does not have a need to know status.

Parents have no inherent rights to inspect their child's educational records after age 18. Students requesting that directory information not be disclosed should submit the Directory Opt-Out Request Form to the Registrar before the last day to add a class in a semester.

The University is not responsible for inadvertent release of directory information.

Upon placement at a clinical rotation site, the student's University email address and name will be given to the company in which they are placed.

Annual Disclosure and Record Access

Students receive an annual FERPA notification from the Office of the Registrar prior to or following the start of each Fall semester. The FERPA notice will be sent to all CNU student email addresses in addition to being posted in the following locations: student information boards, inside and outside the Office of the Registrar, and online at: [http://www.cnsu.edu/shareddocs/Registrar/CNU FERPA Notice.pdf](http://www.cnsu.edu/shareddocs/Registrar/CNU_FERPA_Notice.pdf).

STUDENT SERVICES

Alcohol & Drug Prevention; Dependency Referral

The Office of Student Affairs & Admissions (the "OSAA") offers many resources and programs to promote alcohol and drug prevention awareness and dependency referral services, as well as individualized assistance and support for all CNU students.

If you feel you may be experiencing an alcohol or drug problem, we encourage you to contact the OSAA staff. The OSAA staff are available for confidential referral assistance on a walk-in basis or by appointment. The OSAA office is open Monday through Friday from 8:00am – 5:00pm. Confidentiality will be maintained unless authorized by the student or a threat to life occurs. The OSAA will be able to provide you with information with regards to local agency, treatment facility, or clinical professional, or to assist in making an appointment to a local agency, treatment facility, or licensed clinical professional.

The Assoc./Asst. Dean for the OSAA is listed in the Directory of this catalog and on the CNU website. Students may contact any of the staff in the OSAA for assistance. For any emergency, please call 911.

For additional assistance, you are encouraged to enlist the help and support of family and friends who would be supportive of your sobriety. Also, look in the yellow pages of your telephone directory under mental health, community services, social and human services, alcoholism, or drug abuse. You may be surprised to learn how many organizations there are that can help.

Career Services, Planning, and Counseling

The Career Services Coordinator directs professional career planning and career counseling services. Information about career opportunities at various companies can be found in the Career Resource section of the library or on the CNU website.

In-class and extracurricular workshops are conducted throughout the program to assist students in analyzing their strengths and weaknesses, and documenting their educational and practical experiences in the E*Value portfolio.

An internship and job expo is hosted on campus during the Fall semester to provide students with direct contacts for obtaining part-time employment and internships at local pharmacies.

Students have the opportunity to attend seminars and workshops in writing resumes, developing interview skills, and preparing for career placement.

During the final year of the program, students have the opportunity to talk with employers and share their portfolios during the graduating student Career Fair.

The Career Services Coordinator in collaboration with the Alumni Coordinator follow-up with graduates for the first five (5) years after graduation through phone interviews and surveys to monitor how graduates' careers are progressing and to solicit suggestions for improvement in the respective program or the University and College service offerings.

Disability Accommodation Services

Any student requiring disability assistance may apply for services through the Assistant Dean of Student Affairs. The University is committed to promoting equal access to programs and facilities, thereby insuring that students with disabilities experience the opportunity to participate fully in all academic experiences. Specialized services and academic accommodations are provided to meet the individual needs of students with disabilities to help them achieve successful completion of their professional degree.

Students with disabilities, whether hidden or visible, who wish to seek special accommodations must make a request for accommodations in writing and submit appropriate documentation listed in this section. If the disability develops during the school year and accommodations are requested, the student must notify the Assistant Dean of Student Affairs or designee in writing as soon as he/she becomes aware of the disability. The Assistant Dean of Student Affairs serves as the advisor to students with disabilities and as a liaison between students with disabilities and the faculty.

Eligibility for Services

The federal definition of "disability" encompasses a physical or mental impairment which substantially limits one or more major life activities such as walking, breathing, seeing, hearing, learning, working, and performing manual tasks.

Types of Disabilities

Some common types of disabilities include, but are not limited to, physical disabilities, learning disabilities, psychiatric disabilities, and attention deficit hyperactivity disorders (ADHD).

Students Responsibility

Students enrolled at CNU are required to self-identify if they are seeking services on the basis of a disability. Students are required to meet with the Assistant Dean of Student Affairs or designee for an initial intake and are required to provide appropriate documentation of the disability. Students must provide documentation, at the student's expense, of the disability before the provision of services is reviewed. Since medical conditions change reapplication for accommodation services must be submitted annually and may require submission of updated documentation.

Documentation Guidelines

Both medical and functional elements of the disability must be explicitly documented. Documentation must be printed on appropriate letterhead and prepared by a qualified health care provider who has professional training and practice to diagnose and treat the impairment that led to the disability.

Documentation of the disability should include, but is not limited to:

- A diagnostic statement identifying the disability
- Date of the current diagnostic evaluation (must be within the past three (3) years)
- Date of the original diagnosis
- A description of the diagnostic criteria used

- A description of the current functional impact of the disability
- Treatments and medications, assistive devices currently prescribed or in use
- A description of the expected progression or stability of the disability over time
- Specific recommendations for accommodations and an explanation of why each recommendation is needed
- Impact the disability has on specific major life activities
- Credentials of the diagnosing professional

In addition to the above documentation, students are required to submit additional documentation based on the specific disability.

Documentation Guidelines for Learning Disabilities

Students applying for services and accommodations on the basis of a learning disability should submit a comprehensive report of a psycho-educational assessment performed by a licensed psychologist. The assessment, usually performed in the junior or senior level of high school, should contain the following:

- A complete intellectual assessment with all subtests and standard scores reported
- A comprehensive academic achievement battery with subtests, standard scores, current levels of academic functioning in reading, mathematics, and oral and written language
- Short and long-term memory, sequential memory, auditory and visual processing, processing speed, executive functioning, and motor ability
- A clinical summary of the supported judgment of the health care provider conducting the assessment justifying the diagnosis and suggested accommodations that would be appropriate to strengthen the students relative learning deficits.

Students applying for services and accommodations on the basis of a psychiatric disability should submit a comprehensive report completed by a psychiatrist or licensed psychologist who has experience diagnosing and treating the student's condition.

The assessment should include the following:

- DSM-IV diagnosis
- Psychological test(s) and all scores used to support the diagnosis
- Medications needed, side effects affecting academic performance, and compliance with the therapeutic plan
- Any accommodation(s) that may jeopardize therapeutic interventions

Students applying for services and accommodations on the basis of ADD/ADHD should submit a comprehensive report of a psycho-educational assessment performed by a psychiatrist, licensed psychologist, and/or licensed medical doctor who has expertise in diagnosing and treating ADD/ADHD.

The assessment should include the following:

- DSM-IV diagnosis
- Description of supporting past and present symptoms
- Summary of assessment procedures
- Fluctuating symptoms and prognosis
- Medications needed, side effects affecting academic performance

- Recommendations for reasonable accommodations

Recommendations for Accommodations

The student's request for accommodations will be assessed by the Assistant Dean for Student Affairs who will determine eligibility for available services and accommodations. Approval of the recommendations requested are based on the diagnostic report submitted by an appropriate health care provider rather than the student's request alone. Prior history of accommodations does not guarantee provisions of a similar accommodation.

Accommodations are not retroactive and begin only after appropriate documentation is received and a reasonable time for accommodation development exists.

Once registered, the Dean of Student Affairs will work collaboratively with the student, and faculty to provide the best reasonable accommodations for the student to achieve academic success.

Disability Services and Accommodations

1. Academic Accommodations
 - Large print materials
 - Extended exam times
 - Exams in distraction-free environment
 - Modified exams (in certain circumstances)
2. Disability Services
 - Note takers
 - Readers
 - Help with ordering taped texts
 - Help with ordering text to speech texts for Kindle

Health Insurance

All Students are required to maintain health insurance while enrolled at CNU (Policy of Mandatory student Health Insurance). Students not participating in the Student Health Plan must obtain private insurance and submit evidence of coverage to their online health records tracker. Evidence not submitted to the online health records tracker will not be accepted. Failure to provide evidence of insurance coverage may result in cancellation of registration. Questions relating to this requirement should be directed to your college's Student Affairs Office (if you are a current student) or Admissions Office (if you are an incoming student).

To help students meet this requirement, CNU offers a student health plan (SHP) through Western Health Advantage (WHA). The policy allows full-time students to have continuous health coverage throughout the year, including break periods. To be eligible for this option, you must be a CNU student who is enrolled full-time.

If you plan to enroll in the WHA SHP option, please be sure to include the SHP cost in your estimated cost of attendance when filing for financial aid and budget planning. The fee for this policy is paid directly to the school and is billed on a bi-annual basis.

For more information regarding the Student Health Insurance Plan through WHA including enrollment instructions and benefit information, please visit: website:

<http://www.cnsu.edu/office-of-the-registrar/student-health-plan>.

Information on other individual health plans in California can be found at:

- Blue Cross of California: www.bluecrossca.com
- Blue Shield of California: www.blueshieldcaplans.com
- Covered California: www.coveredca.com
- Health Net: www.healthnet.com
- Kaiser Permanente: <https://healthy.kaiserpermanente.org/>
- Western Health Insurance (non-CNU affiliated options): <https://www.westernhealth.com/>

This list is neither complete nor in any way an endorsement or recommendation by California Northstate University.

Healthy Lifestyle Services and Programming

The OSAA provides programming, guest presentations from health practitioners, and referral information to assist students with healthy lifestyle practices throughout the year. Information regarding programming will be sent by campus email to all students at least two weeks in advance or posted to campus information boards. Examples of programming include time management skills, nutrition guidance, stress reduction strategies, and work/life balance practices. Brochures offering guidance and tips for managing and understanding student focused problems are available from the OSAA.

Housing

Information on off-campus housing can be obtained from CNU's website and the OSAA. There is currently no on-campus housing available.

A wide variety of apartment housing is available within Elk Grove and Sacramento. Elk Grove offers housing accommodations ranging from apartments, condominiums, or single family homes within a 10 minute commute. Sacramento itself borders Elk Grove and several housing options in south western Sacramento are within 15 minutes of campus. Rental prices can range from \$600 - \$1,600 for apartments depending on the number of bedrooms and amenities offered. Single family homes for rent and for sale vary considerably within these areas; the most current listings available through real estate websites such as <http://www.sacbee.com/classified-ads/category/Real+Estate+For+Rent>.

Maternity/Childbirth/Adoption Accommodations

This policy is intended to provide an accommodation for the temporary academic disruption that pregnancy, childbirth, adoption, and the care of a newborn may place on the student. It is designed to make it possible for the student to maintain the "enrolled student status", and to facilitate return

to full participation in classwork, and, where applicable, research, and clinical/experiential training in a seamless manner.

All matriculated/registered students anticipating or experiencing a birth or adoption, are eligible to receive the following:

- An excused absence per College policy;
- A leave of absence* for an academic accommodation around the time of the birth, during which the student may postpone course assignments, examinations, and other academic requirements. Students requesting this accommodation may be placed into an extended program. Students considering this alternative must discuss the maximum allowable completion time with their academic advisor, the Office of Academic Affairs, and the Office of Student Affairs and Admissions;
- Access to CNU facilities, student services, and CNU student health insurance plan; and
- Parking accommodations.

*Students may opt to use a leave of absence in lieu of the benefits provided by the accommodation policy. Depending on the stage in their academic career, the timing of the birth or adoption and the level of assistance the student will receive from others in caring for the child, the student may find it more advantageous or feasible to take one or more semesters of a leave of absence. This may especially be the case for healthcare professional students because of the highly structured and sequential curriculum.

Mental Health Counseling Referral Services

Mental health counseling is available to students through the school's student health insurance program, the county of Sacramento, and private counselors in the area (by referral only). A list of referrals is available in the OSAA. Students may schedule an appointment with the Associate Dean for Student Affairs & Admissions for more detailed information and assistance for mental health counseling. Students who have elected to use the student health plan offered by the school and administered Western Health Advantage (WHA), have access to mental health counseling as part of the WHA insurance policy.

Tutor Services

Students experiencing difficulty in any course are urged to seek the help and assistance of the course coordinator or their academic advisor before the problem becomes unmanageable. If academic problems arise, school funded tutoring services are available through the OSAA. Students requiring this assistance must be referred by the faculty of the course or by their academic advisor. Additional tutoring is offered for a nominal fee by students who have successfully completed courses. These tutors typically post their contact information on campus bulletin boards. The OSAA keeps a list of recommended tutors and can provide insight into selecting a suitable student to hire. Additional tutoring is offered free of charge and is provided by faculty volunteers in the form of review sessions.

Alumni Services

The primary goal of Alumni Services is to maintain our graduates' on-going relationship with the faculty, staff, and student body at California Northstate University by building lifelong connections to their alma mater community. We are very proud to share the history of our alumni's major accomplishments as students and as alumni. Our office recognizes that our alumni will be distributed throughout the United States and the challenge of keeping all alumni in touch with classmates, resources, and institution news. CNU Alumni Services is committed to updating graduates with alumni social events, continuing education course information, career resources and services, fundraisers, speaking engagements, e-newsletters, news about what fellow classmates are doing, and the buzz on faculty, and support services to help alumni continue to grow as professionals.

Information Technology Services

The Information Technology department provides computer, Canvas, email, and system assistance to all faculty, staff and students.

Canvas

Canvas is the University's learning management system which contains course information, assignment grades, and class documents/assignments. A brief introductory session to Canvas is provided to new students during orientation.

Email accounts & service

All students are assigned a unique campus email address for use during enrollment in the program. The IT department offers assistance to students who experience problems with their account during normal business hours. Students are responsible for reading and responding, as appropriate, email messages sent to their CNU email. Please refer to the Student Handbook for additional information specific to each college.

ID Badge and Turning Point Clicker

If you lose your ID Badge, please notify IT as soon as possible so that it can be disabled. To replace a lost or damaged badge or clicker, complete the Loss form and include the payment amount indicated on the form.

Library/Learning Resources

Library Facilities

The Learning Resource Center is available for students, faculty, staff, preceptors, as well as local pharmacists and is located on the second floor of the CNU Elk Grove campus. This program includes 8000 square feet of space devoted to the following resources:

- Library Facility and Collection

- Library Computer System
- CNU Electronic Library
- Computer Lab
- Classroom Resources
- Interlibrary Loan Program

Facility Hours

The library facility is a significant part of the Learning Resources Center. It houses the library collection and provides space for individual and group study. Students may use the facility during University operational hours. The hours of operation when the school is not in session, including holidays and spring break, will vary. Students can receive assistance from library staff members 9:00 a.m. to 5:00 p.m. Monday through Friday. Operational hours can be directed by phone to 916-686-7400.

Library Staff

The Learning Resource Center is managed and operated by a full-time health sciences librarian and a part-time librarian assistant. The librarian will provide training and consultation to students and faculty on how to access good information and efficiently use electronic resources. The librarian holds an academic appointment on the faculty and participates in all faculty functions and meetings.

An IT specialist works with the librarian to update, maintain, and operate electronic systems in the resource center.

Learning Resource Center Programs

The Learning Resource Center provides both students and faculty with support as well as sufficient research references. The following programs are offered to educate students and faculty on the availability of resources and the process of their uses.

Students Resource Center Orientation Session

At the beginning of each semester, a Resource Center Orientation session is scheduled to accommodate all interested students. The attendance is mandatory for all first year students and optional for other students. During this orientation, students are introduced to the learning resources available as well as to policies and procedures relevant to their usage.

Interlibrary Loan Program

With the large number of universities in the Sacramento valley, CNU is developing affiliation agreements with the libraries at other institutions in order to facilitate interlibrary loans. Please see the librarian for details.

Library Computer System & Lab

A designated area of the learning resource center is dedicated as a computer lab. The computers in the lab are available to students, where they can access the electronic resources as well as electronic library materials. Additionally, the lab provides students with general PC software, access to the Internet, and the ability to print desired materials.

Student Access

Students may access Library materials in several ways. Physical books (including reserve books) for the College of

Pharmacy and College of Medicine are located in room 202, the Library Book Room and Quiet Study Area. The books are in locked cabinets with clear doors and arranged in call number order so that the student may determine if the material is available. The Library's web page provides a link to an online card catalog for those materials. The Librarian or Library Assistant retrieves and checks out the materials to the students. Other physical materials such as calculators, stethoscopes, models, etc. are located in the Library Director's Office. They are listed in the online catalog and can be retrieved for check out by the Library Director or the Library Assistant.

Electronic Learning Resources

The Learning Resource Center maintains an Electronic Learning Resources System. Its purpose is to provide library and learning resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs. The library subscribes to approximately 1,000 scholarly electronic journals.

Electronic journals and databases are available through links from the Library's webpages. Students authenticate themselves using their school e-mail logon and password in order to access the electronic materials but may access these materials anywhere they have a computer and internet access.

All CNU students can access electronic resources by entering their college log-in credentials at <https://ezproxy.cnsu.edu/login>.

The username and password, are the same credential that you use for cnsu.edu email.

For step-by-step instructions on how to access the Library Databases for each college, see below:

College of Pharmacy

1. From the home page www.cnsu.edu, click on **Pharmacy** drop down and then click Home
2. Now you are at the Pharmacy's home page, click on Current Students drop down and then click Library & Learning Resources
3. On Library & Learning Resources' page, click on "Click here to access the databases" which will bring you to the login page
4. For username and password, this will be the same credential that you use for cnsu.edu email

College of Medicine

1. From the home page www.cnsu.edu, click on **Medicine** drop down and then click Home
2. Now you are at the Medicine's home page, click on Current Students drop down and then click Library/Learning Center
3. On Library & Learning Resources' page, click on "Click here to access the databases" which will bring you to the login page
4. For username and password, this will be the same credential that you use for cnsu.edu email

Past lectures for the College of Medicine may be retrieved for viewing through the Mediasite link on the College of Medicine website under "Current Students". Students can access this site using their CNU credentials.

College of Health Sciences

1. From the home page www.cnsu.edu, click on **Health Sciences** drop down and then click Home
2. Now you are at the Health Sciences' home page, click on Research drop down and then click Library/Learning Resources Center
3. On Library & Learning Resources' page, click on "Click here to access the databases" which will bring you to the login page
4. For username and password, this will be the same credential that you use for cnsu.edu email

EDUCATIONAL AND RESEARCH EQUIPMENT

California Northstate University utilizes the following research laboratories and facilities in conjunction with the delivery of instruction for all CNU Colleges.

Research Laboratories: The dedicated research labs at the Elk Grove campus are fully equipped for molecular, cellular and microbiological investigations. Equipment includes multiple high-capacity freezers (-80°C, -20°C and LN₂) and refrigerators, autoclaves, fume hoods, water purifiers, centrifuges and ultra-centrifuges, light and fluorescent microscopes, fluorescent plate readers, vacuum pumps, balances, scales, pH meters, ice machine, transilluminators. Small equipment include vortexers, hot plates, stirrers, rockers, shakers, variable temperature water baths, refrigerated and non-refrigerated microcentrifuges. All equipment necessary for protein, DNA and RNA electrophoresis, and RT-PCR, including a Li-COR, photoDoc and other imaging systems for quantification. Separate cell culturing suites are equipped with annually certified biosafety cabinets, CO₂ incubators and dedicated storage and refrigerators. Additional equipment for pharmacologic research include multiple chromatography systems (automated, liquid, HPLC), disintegration tester, dissolution tester, autosamplers, spectrophotometers, fractionators. The compounding lab is fully equipped and supplied for its purpose. All small equipment and tools, from automated and manual pipettors, glassware, cylinders to magnetic stir bars and label makers are abundantly available. All plastics and disposables (tubes, tips etc) as well as required reagents are available. Safety equipment, including spill kits, goggles, face shields, fire blankets, extinguishers, PPE, and sharps disposal are stored in easily accessible locations. Safety cabinets are in place for flammables, acids and oxidizers. Eye-washers and chemical showers are routinely inspected. All signage, safety information, protocols and training records, along with engineering controls are established for biosafety level 2 research. Additional equipment of interest include a 500MHz NMR and a 3D printer.

Medical Education Facilities: are fully equipped with furniture, exam tables, computers and storage for simulated and actual patient exams, with vital sign monitors (sphygmomanometers with multiple BP cuffs, otoscope, ophthalmoscope, automated thermometers), PPE, sanitation equipment, gowns drapes and all required disposables. Located in the vicinity are crash carts, resuscitators, EKG workstation, spirometer and other supplies. The hospital Simulation Center is equipped with all necessary supplies and equipment, including state-of-the-art SimMan patient simulators with monitors, repair kits, tools and simulation fluids/supplies/equipment, rolling vital signs monitors, motorized hospital beds, privacy curtains and dividers, crash cart, aortic scan machine, a weight scale, wheelchairs and walkers, IV pole with dispensers, computers workstations, phlebotomy trays, tracheotomy equipment and a myriad of other supplies and equipment as required. The IDL lab is fully equipped with all essential equipment and disposables, including student microscopes and a projecting Olympus CX31 microscope, cell staining paraphernalia, cell counters,

alcohol burners, all safety supplies and ergonomic furniture. Additional equipment onsite include training equipment and simulators for suturing, injections, lumbar punctures, cardiac, breast, airway, IV, catheterization models, and all other essentials. The anatomy lab is fully equipped with 20 dissection tables with hoods, equivalent numbers of body trays for storage, a cadaver hydraulic lift, all required powered and non-powered saws, blades, shears, chisels, etc; complete arrays of surgical instrument with trays, multiple skeletal models, ultrasound equipment, endoscopy machine, mobile microscope, PPE including disposable respirators, liquid waste disposal systems.

Pharmacology Training Facilities: Additional equipment for pharmacologic research and training include multiple chromatography systems (automated, liquid, HPLC), including a Hitachi HPLC with auto-sampler and sample collection as well as photo diode array detector for quantification of organic molecules and identification of bioactive molecules. Additional equipment includes a disintegration tester, dissolution tester, autosamplers, spectrophotometers, fractionators and a microfluidics microfluidizer 110L. The sterile compounding lab is fully equipped and supplied for its purpose, with 13 clean room hoods.

College of Health Sciences Educational Facilities: Fully equipped with A/V systems, computers, lab benches (plumbed and gas lined) and all furniture, safety supplies and other accoutrements required for state-of-the-art physics, chemistry, biology, biochemistry, anatomy, biotechnology and liberal arts education, the CHS campus also houses an array of scientific instrumentation for instruction and research. These include dissection trays, neurodiagnostic equipment, LED zoom lamp, tactile sensory evaluators, stethoscopes, electrode digital caliber, breathing tubes with tubing adapter, disposable respiratory kit, spirometer pod, , performance monitor, ECG monitor, ECG electrodes, eye occluder, blood pressure kits, hemacytometer, 9L student wet spirometer, black frame clear xTR lense high impact protector, human biological fluid simulators. Chemistry equipment includes heating water bath, 12 hot/stir plates, 3 UV-Vis spectrophotometers w/ PCs, pH meters, multimeters, Bunsen burners, portable gas burners, precision and analytical balances, standard and digital thermometers, a variety of centrifuges, rockers and shakers, a biotech cytation 5 image reader, all equipment necessary for PCR and immunoblotting, microscopes, a water filtration system, refrigerators, freezers, CO₂ incubators, cell culture hoods, and fume hoods. All supplies, reagents and disposables are on-hand.

UNIVERSITY POLICIES AND PROCEDURES

Admissions

Admissions - Legacy

The University recognizes the enormous amount of good will, commitment, dedication and resources in its formation and the need of intergenerational sustaining effort in maintaining and fulfilling its education mission. The University recognizes rightfully that legacy be included in the collective definition of diversity and inclusion, much like but not limited to socioeconomic status, life experiences, contributions to the community, cultural identity, gender and other gender related elements.

The University reveres the integration of legacy into the collective definition of diversity and inclusion as part of the multi-factorial approach towards admission decisions. Legacy by itself does not guarantee admission.

This policy is applicable to all colleges within the University and applies to all constituents who have advanced the education mission of the University. The constituents include but are not limited to alumni, faculty, staff, administrators, volunteers, trustees, donors, financial sponsors, and founding members of the University.

Procedure

1. An applicant who meets all four of the following categories of criteria shall be deemed eligible for diversity and inclusion consideration in the second-look admission process:
 - Criterion 1: Applicant meets the published minimum test score requirement for admission, e.g. SAT, ACT, MCAT etc;
 - Criterion 2: Applicant has completed all required courses for admission prior to matriculation;
 - Criterion 3: Applicant has achieved the GPA required for admission;
 - Criterion 4: Applicant must meet one of the following criteria:
 - a. An immediate family member of an alumni, employee, or founding member of the institution;
 - b. An immediate family member of a significant contributor to the support and/or advancement of the mission of the University, as described in Section V of this policy.
2. The Vice President of Admissions upon notification by an eligible constituent will request the Chair of the Admission Committee of the College to conduct a second-look evaluation of applicant.
3. The Chair of the Admission Committee for the College will call for a Subcommittee meeting per Bylaws (e.g., Article V of the College of Medicine Admission Committee Bylaws.)
4. The Subcommittee is responsible for performing all of the following:
 - Ensure that the applicant has met the published minimum GPA, standardized test(s) [MCAT, SAT, ACT or etc.] and would have completed all required courses;
 - Schedule the applicant for interview or review the interviewer's note of the applicant;
 - Make a recommendation regarding admission with diversity and inclusion consideration.
 - Notify the Office of the Dean of the College regarding the Subcommittee's findings.
5. The Dean will act on the Subcommittee's recommendation.
6. Upon enrollment, the student is subject to the conditions, codes, standards, and requirements as described in the Student Handbook.

(2200-Legacy Admission Review Policy)

International Students (Visa Services)

CNU is authorized by the United States U.S. Department of Homeland Security (DHS) to accept and enroll non-immigrants students. The University is approved to issue documents that support the issuance of F-1 Visas and F-1 Visa transfer to qualified international students. The college admission office to which the international student is admitted will work the students to complete the I-20 and will report the student's status to SEVIS. There is no fee for CNU to vouch for student status.

CNU complies with the Department of Immigration Services regulations that govern the financial eligibility of international students. International students must provide evidence of sufficient financial support for their studies while in the U.S.

International students must submit a current bank statement or a letter on bank letterhead indicating the applicant's and/or sponsors have sufficient funds available balance in U.S. dollars with original signature of an authorized bank official. Students are issued an I-20 after they have confirmed their enrollment and demonstrated in their Financial Certification Statement that they have the funds necessary to cover their living and education expenses. Financial Support and Documentation Forms will be sent to international students by the Financial Aid Office.

Steps to obtain a US Visa:

1. Once the Enrollment Agreement and Financial Certification Statement is received by the college, the college admissions office will issue the Form I-20 to the student;
2. The student must pay the I-901 SEVIS fee;
3. The student must apply for a Visa;
 - a. Fees for the Visa application vary depending on the student's home country.
 - b. Student should check with their U.S. consulate or U.S. embassy for other possible requirements.
4. Prepare for the trip
 - a. Carry your original passport, visa, and Form I-20 with you at all times.

- b. It is recommend that the student leave a copy of each document with his/her family before departure.
5. The student will be issued a Form I-94 at arrival in the U.S. airport from a U.S. Customs and Border Protection officer.
6. Students may enter the U.S. 30 days prior to the official program start date. The student must report to CNU by the program start date listed on the Form I-20.
7. The student must maintain status by attending and passing classes at CNU as a full-time student.

International students are not charged additional fees or charges associated with vouching for student status.

Please see the International Student Handbook available on the CNUCOP website for detailed instructions and timeline.

Language Rights

An enrollment agreement shall be written in language that is easily understood. If English is not the student's primary language, and the student is unable to understand the terms and conditions of the enrollment agreement, the student shall have the right to obtain a clear explanation of the terms and conditions and all cancellation and refund policies in his or her primary language. If the recruitment leading to enrollment was conducted in a language other than English, the enrollment agreement, disclosures, and statements shall be in that language. If any of the circumstances described in this paragraph apply to you, please contact the Assistant Dean of Student Affairs and Admissions so that your rights described in this paragraph may be applied.

Academic Freedom

Academic Freedom is integral to an institution of higher education. It is the right of students to express their opinions without concern for their grades and the right of faculty to teach and to express their opinions without fear of retribution. With academic freedom comes a responsibility to respect other's opinions. Academic honesty is demanded of faculty and students alike.

Awards: Non-Academic

CNU bestows certain honors to faculty, staff and students for non-academic achievement, community service, student organization activity, and other noted involvement in promoting CNU and the community. Notification of criteria, nomination information, and deadlines will be made throughout the year. The Scholarship and Awards Committee coordinates selection of recipients for all honors and awards, as well as a limited number of diversity and financial need-based scholarships. Student recipients of scholarships and awards are invited by formal invitation to attend an annual ceremony that recognizes student achievements. The annual Scholarship and Award Ceremony is a joint collaboration of the CNU's Scholarship & Award Committee and the Northern California Pharmacy Education Foundation (NCPEF). The majority of the scholarships received by students are awarded by the Foundation. Criteria for each scholarship are determined by the Foundation's Board. For more

information about the Foundation and a list of previous awards, please visit their website, <http://northerncaliforniaeducationfoundation.com/>. Faculty and staff awards are delivered during the annual faculty retreat that is held in the summer.

Non-Discrimination

California Northstate University is committed to cultivating a diverse community that recognizes and values inherent worth in individuals, fosters mutual respect, and encourages individual growth. The University believes that diversity enhances and enriches the quality of our academic program. CNU provides equal opportunity in education and employment and does not discriminate on the basis of race, color, creed, religion, national origin, ethnicity, gender identity, gender expression, age, sexual orientation, political affiliation, veteran status, or disability.

Alcohol/Chemical Dependence/Impairment Policy

CNU is a drug-free academic environment consistent with federal and state laws. Any person within CNU community may be disciplined for violation of these policies and tested for suspected use of an illegal drug. The possession, use, consumption, manufacturing or distribution of any form of alcohol or any illegal substance, is prohibited on CNU campus as well as any off-site location while the student is involved in academic learning experiences.

Any student who is under the influence of alcohol or drugs during class or experiential or clinical rotations is subject to immediate removal from the setting and dismissal. Any student convicted of a drug or alcohol related crime during the time they are enrolled at CNU is subject to dismissal.

Students are also reminded to adhere to the Honor Code and E-Professionalism policy outlined in the Student Handbook of the College indicating students must not present themselves on social media as a person who does not adhere to these policies.

Students dependent on alcohol or other chemical substances should voluntarily seek assistance from a treatment and recovery program identified in the previous section or a similar drug treatment program.

Students with alcohol or substance abuse, or addiction problems may have impaired judgment compromising educational experiences and may be unable to competently function in patient care settings, and may be dangerous to self or others. Therefore, the OSAA may refer the student to his or her physician or to a treatment and recovery program. If the student does not consent to participate or does not comply with a recommended treatment plan/contract, then the student may be suspended, be subject to other disciplinary actions up to dismissal from CNU.

Any violation of this policy may result in disciplinary action. In addition appropriate legal action against the offending individual(s) or organization(s) may also be pursued.

Students experiencing difficulties with alcohol or drug use should take action to improve the situation by seeking

substance abuse referral assistance from the OSAA as soon as possible.

CNU complies with the Drug-Free Schools and Communities Act and the Higher Education Act Section 120A: Drug and Alcohol Abuse Prevention by implementing the following provisions:

1. The annual distribution in writing to each student, regardless of the length of the student's program of study, and to each employee of:
 - a. Standards of conduct that clearly prohibit, at a minimum, the unlawful possession, use, or distribution of illicit drugs and alcohol by students and employees on its property or as part of any of its activities;
 - b. A description of the applicable legal sanctions under local, State, or Federal law for the unlawful possession or distribution of illicit drugs and alcohol;
 - c. A description of the health risks associated with the use of illicit drugs and abuse of alcohol; and,
 - d. Clear statement that the institution will impose disciplinary sanctions on students and employees (consistent with local, State and Federal law), and a description of those sanctions, up to and including expulsion or termination of employment and referral for prosecution, for violators of the standards of conduct. A disciplinary sanction may include the completion of an appropriate rehabilitation program.
2. Conducting a biennial review of the campus drug and alcohol abuse prevention program to:
 - a. Determine its effectiveness and implement changes to the program if they are needed; and
 - b. Ensure that its disciplinary sanctions are consistently enforced.
 - c. A biennial review will be conducted to evaluate the effectiveness of the drug and alcohol prevention program by a review panel. The review panel consists of Administrative representatives from the President's Executive Council (PEC).
 - d. Any recommendation for change will be considered, evaluated, and implemented as deemed necessary to health and welfare of all CNU students.

Violation of Alcohol and Drug Policy – School Sanctions

In the event a student is cited for any combination or violation of campus related alcohol or drug laws, rules or regulations the student will be:

1. Required to attend alcohol, tobacco, or other drug education at a location recommended by Student Affairs.
2. Required to provide additional proof of continued education and alcohol, or other drug assessment after the second violation.
3. Immediately referred to the Honor Board after a third violation of policies.

Federal Laws on Controlled Substances

Under federal law, manufacture, sale, or distribution of Schedule I and II illicit drugs or mixtures containing them (e.g. cocaine, methamphetamines, heroin, Ecstasy, GHB, Ketamine, LSD, PCP, and so-called "designer drugs", as well as "counterfeits" purported to be such drugs) and trafficking in marijuana and hashish are felonies. Depending upon the quantity of drugs involved, penalties for first offenses range from five years to life (20 years to life if death or serious injury involved) and fines up to \$10 million or more, and for second offenses from ten years to life (life if death or serious injury involved) and fines up to \$20 million. Illegal trafficking in over-the-counter or prescription drugs (including anabolic steroids) have maximum terms of 5 years for first offenses and ten years for second offenses, and heavy fines. Illegal possession of controlled substances can trigger federal prison sentences and fines up to \$100,000 for first offenses, more for second offenses; possession of crack cocaine is punishable by 5 to 20 years and fines up to \$250,000.

California Laws on Alcohol and Controlled Substances

Important parts of State law are summarized below:

No person may sell, furnish, give or cause to be sold, furnished, or given away, any alcoholic beverage to a person under the age of 21, and no person under the age of 21 may purchase alcoholic beverages. (California Business and Professions Code, Sec. 25658 (a))

It is unlawful for a person under the age of 21 to possess alcoholic beverages on any street or highway or in any public place or in any place open to public view. (California Business and Professions Code, Sec. 25662).

It is a misdemeanor to sell alcoholic beverages any place in the state of California without a proper license issued by the California State Department of Alcoholic Beverage Control. (California Business and Professions Code, Sec. 23300).

It is a misdemeanor to sell, furnish, or give away an alcoholic beverage to any obviously intoxicated person. (California Business and Professions Code, Sec. 25602).

It is unlawful to issue a license to fraternities, sororities, or other undergraduate organizations to sell alcoholic beverages. (California Penal Code, Sec. 172e).

Any person found in a public place to be under the influence of an intoxicating liquor, drug, or controlled substance and unable to care for his/her own safety or who interferes with the use of a public way is guilty of Campus Policies and Procedures disorderly conduct. Public intoxication is a misdemeanor crime in California. (California Penal Code, Sec. 647f).

California law also prohibits driving a motor vehicle under the influence (a blood alcohol level of .08 percent or higher creates a presumption of intoxication, but can be charged with lower blood alcohol levels); drinking or possessing an open container of alcohol while driving; and operating a bicycle while intoxicated. Drunken driving penalties include

jail or prison, fines of \$1,000 or more, driver's license suspension or revocation, and required drug/alcohol treatment programs. Refusing to submit to a test for blood alcohol can result in suspension of driver's license for up to 3 years.

Laws and Ordinances Governing Marijuana

Cultivation, possession for sale, or sale of marijuana is a felony and may result in a prison sentence and fine (Health and Safety Code sections 11358, 11359, 11360). Possession of less than one ounce of marijuana is an infraction punishable by a fine; determined by the court. (Health and Safety Code section 11357(b)).

Laws and Ordinances Governing Controlled Substances

Manufacture, possession, possession for sale, sale, or distribution: (Health and Safety Code sections 11350, 11351, 11352, 11377, 11378, 11379, 11379.6) and possession of drug paraphernalia is illegal (Health and Safety Code section 11364). All are felony-classified crimes with a possible \$10,000 fine per violation and/or a state prison sentence.

Sale or possession for sale of controlled substances such as cocaine, methamphetamines, heroin, Ecstasy, GHB, Ketamine, LSD, PCP, marijuana, and so-called "designer drugs" is a felony with terms of 7 years or more; manufacture results in terms of 20 years or more; possession alone is punishable by up to 7 years in prison. Sentences are enhanced for previously convicted felons and for distribution within 1,000 feet of a school or University, distribution within 100 feet of a recreational facility, and distribution to a pregnant woman or to someone under 18 by someone over 18. Property may be seized if used in drug transactions.

The convicted party can be excluded from all federal and/or state monetary benefits. If not a U.S. citizen can be deported and prevented from re-entry into the United States. The convicted party may have to give up, as part of a penalty, all personal property traceable to (or gained as a result of) the crime.

Animals on Campus

In order to protect the safety, health, and well-being of students, faculty, staff, and visitors, no animals or pets are to be brought into CNU campus unless certain conditions are met. Any animal that is not a trained service animal is not allowed on University property inside campus buildings. Any animal outside the building must be on a leash. As defined by the U.S. Department of Justice, a service animal is any animal including dogs that has been individually trained to do work or perform tasks to accommodate an individual with a disability. Police dogs accompanied by a police officer or law enforcement officer is permitted for entry.

Service animals are permitted to be anywhere on campus that the animal's handler is permitted to be, including indoor spaces, however, there may be some locations and activities where animals (including service animals) are not permitted for health and safety reasons, including:

- i. Research and teaching laboratories or clinics
- ii. Mechanical rooms/maintenance closets

iii. Food service preparation areas

iv. Areas where there is a danger to the service animal

Access to these and other restricted areas may be granted on a case by cases basis by the VP of Operations.

Students who anticipate bringing a service animal to campus regularly are encouraged to notify Student Affairs and the VP of Operations.

The privilege of the animal to enter the campus is revoked if such animals are considered dangerous or such animals are deemed endangering the health of people or the environment. (1715-Animals on Campus)

Bicycles

Bicycles may not be brought into the classroom or buildings. It is recommended that bicycles be locked securely to prevent theft. Bicycles should be secured in designated areas or in bike lockers provided in designated areas. Bicycles should not be secured in areas that would interfere with pedestrian or vehicular traffic. It is also recommended that students keep information about the bicycle with their records in the event of theft which would include: make, model, color, and serial number. Information on the availability of bike lockers can be obtained from the Facilities Manager or Safety and Security Director. (1705-Bicycles)

Building Access

Student identification cards are programmed with an electronic key access code. The card provides access to the building as well as some of the interior classroom and other spaces designated for student use. The campus building hours will be posted prior to each semester and the hours may be extended prior to exam dates. Student card entry is logged and entry information is monitored by CNU administrators. Professional behavior dictates respect of equipment, furnishings, and building access by all CNU students. Any student not exhibiting professional behavior in regards to building access, including destroying property, allowing unauthorized guest in the building, or compromising building security, will be addressed through the judicial procedures.

The Elk Grove building is open to students from:

- Monday-Thursday: 8:00 a.m. to 11:30 p.m.
- Friday: 8:00 a.m. to 6:00 p.m.
- Saturday-Sunday: 10:00 a.m. to 5:00 p.m.

All doors are automatically locked after 11:30 p.m. Monday through Thursday, 6:00 p.m. on Friday and 5:00 p.m. Saturday and Sunday.

The Rancho Cordova building is open to students from:

- Monday – Friday 7:30 am to 9:00 pm

(1701 After Hours Access)

Cell Phones

Out of courtesy for others, all cell phones must be turned off before entering any classroom, laboratory, and discussion session or on-campus academic/professional event unless

instructed by the course coordinator or CNU Official. Violation procedures for unauthorized use of cell phone by a student include, but are not limited to, the following: a verbal warning for the first offense; removal from the setting for any subsequent occurrences; and dismissal from the course and the possible loss of a full academic year if substantial academic disruption occurs

Children in the Academic Environment Policy

It is recognized that it is important not only to preserve the educational environment for all students but also to make sure that the education of the parent who is responsible for the care of a child is not compromised. In this regard, students are expected to have day care arrangements with back-up plans. Children are not permitted to be in the classrooms or in laboratory settings or patient care settings. The student is responsible for obtaining handouts or lecture notes when class time is missed. Referrals/information for sick child care can be obtained in the Office of Student Affairs and Admissions.

Complaint/Grievance Policy

Non-Academic

While at CNU, students may encounter situations that adversely affect relationships with others within CNU community. General complaints or concerns should be directed to the Associate/Assistant Dean of the Office of Student Affairs and Admissions (OSAA) who will advise students about the appropriate procedures to follow in resolving a general complaint or concern. An informal process of resolution will be sought unless the incidence is severe enough to warrant a formal hearing.

This policy shall also apply to all discrimination, harassment, and sexual harassment reports and complaints that may arise in matters involving rights protected under legislation relating to equal opportunity in Employment and Education or any policy of CNU relating to sexual harassment.

General grievances may also be made anonymously by sending a letter to the Associate/Assistant Dean of the OSAA, or by dropping a letter or note in the Suggestion/Complaint Box located in the classrooms and in the library resource center.

Informal Procedure

Students are encouraged to discuss and resolve non-academic conflicts, including complaints of harassment, and/or discrimination, with the individual involved before filing a formal complaint. The suggested time frame to discuss and resolve informal complaints is 10 days from the date of the incident. If the student is not satisfied with the outcome a formal complaint may be filed with the Associate/Assistant Dean of the OSAA.

Formal Procedure

The complaint must be in writing and should describe: the specific action(s) necessitating the complaint, a statement of facts supporting the complaint, actions sought in an informal

resolution, and information about why the action did not lead to a satisfactory resolution prior to filing a formal complaint, if an informal process was utilized. The complainant must be willing to be identified as the accuser.

The complaint must be signed and dated by the complainant and filed with the Associate/Assistant Dean for the OSAA within fourteen (14) days of the occurrence. A completed Complaint/Grievance form should be included with the letter. The form can be found on the school's website. All complaints will be investigated by a committee appointed by the Associate/Assistant Dean and handled in a confidential manner. Investigations will usually be completed within fifteen (15) business days from the receipt of the complaint. At the conclusion of the investigation, a report shall be provided to the individuals in the situation stating the findings and recommendations. The report will typically be provided within seven (7) business days from the conclusion of the investigation. In unforeseen circumstances, or due to the complexity of the investigation, time limits may need to be modified. If the outcome was not satisfactory, the complainant may appeal the decision of the committee to the Dean of the College.

The written appeal request must be received in the Office of the Dean within five (5) business days from the written recommendation provided by the Associate/Assistant Dean for OSAA. The Dean shall provide a written final decision to the complainant within fifteen (15) business days from the receipt of the request. The decision of the Dean will be final.

A confidential record or log of all complaints filed is kept by the Associate/Assistant Dean for the Office of Student Affairs and Admissions (OSAA).

Anyone wishing to file a report may do so anonymously through the CNU website, <https://californianorthstateuniversity.formstack.com/forms/anonymouseportcnu>. If you are witnessing an emergency or crime, you should make the report to the proper authorities. This form should not be used to report an emergency or crime.

Complaints related to accreditation or licensing standards, please see the Accreditation Information section of this catalog on page 9.

Computer/Technical Support

Every student must have a personal laptop and external access to computer resources to complete academic requirements. CNU provides computing and communications access to faculty, students and staff to support the mission of CNU in teaching, research, learning and service. Students having difficulty accessing the student Learning Management System, Canvas, have access to Technical Support on campus during regular school hours.

Copyright Compliance Policy

It is the policy of California Northstate University to comply with copyright law.

Copyright exists in any original work which exists or is fixed in any tangible medium of expression. Images displayable on

computer screens, computer software, music, books, magazines, scientific and other journals, photographs and articles are some of the things subject to copyright. A copyright notice is not required.

Subject to exceptions contained in 17 U.S.C. §§ 107 and 108 (<http://www.copyright.gov/title17/92chap1.html>), it is a violation of copyright law to copy, distribute, display, exhibit or perform copyrighted works without the authority of the owner of the copyright. Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code). In the file sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement.

Content owners are able to track the sharing and downloading of their copyrighted files via the IP address of the file sharer or downloader. Upon proper notice of infringement from the copyright owner to as the Internet service provider in accordance with the Digital Millennium Copyright Act, CNU investigates, takes down any infringing site or material on the University's network, and blocks access to any infringing sites or material. CNU also investigates to identify the infringing user and takes appropriate action to address misuse in accordance with CNU policies.

Summary of Civil and Criminal Penalties for Violations of Federal Copyright Laws

The unauthorized distribution of copyrighted material, including unauthorized peer-to-peer file sharing, may subject you to civil and criminal liabilities. Penalties for infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than \$750 and not more than \$30,000 per work infringed. For "willful" infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees.

Willful copyright infringement also can result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense. For more information, please see www.copyright.gov and www.copyright.gov/help/faq.

Disciplinary Action for Violations

As set forth in the student honor code a violation of copyright law also constitutes a violation of University policy and the honor code. Students found guilty of such a violation can be subject to disciplinary action including suspension and dismissal from the University in addition to any civil and criminal penalties.

Disability Policy

CNU does not discriminate on the basis of a disability and is committed to self-directed learning by offering qualified students an equal opportunity to attain a degree. CNU will make every effort toward meeting reasonable requests for

accommodations to students with disabilities according to Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA). Information regarding disability services and is located in the [Student Services](#) section of this Catalog.

Disorderly Assembly/Conduct Policy

No person shall participate in or organize any activity for the purpose of creating a disturbance that interferes with the operations of CNU. No person shall use any CNU owned or controlled building or property without authorization. Any conduct on CNU campus or affiliated sites that are disruptive or offensive is prohibited and may be grounds for dismissal from CNU.

Disorderly conduct includes but is not limited to:

- Disrupting a class in progress
- Physically or verbally assaulting another being
- Discriminating, threatening, demeaning another being
- Dishonest behavior

Any violation of this policy will result in disciplinary action. In addition appropriate legal action against the offending individual(s) or organization(s) may also be pursued.

E-Professionalism and Social Media Policy

California Northstate University requires all students to uphold the core principles of the Honor Code which includes E-Professionalism in the use of social media in addition to respect, honesty and integrity, legal and ethical behavior, and professionalism in all aspects of their lives. This policy establishes internet usage guidelines for CNU students to ensure that they are representing themselves and the University professionally on and off campus. Social Media includes social networking sites (e.g., Facebook, Twitter, LinkedIn, etc.); blogs; video sharing sites (e.g., YouTube, Vine, etc.); and photo sharing sites (e.g., Flickr, Instagram, etc.).

Social Media

Students are to maintain a professional demeanor at all times over social media. Students must avoid posting or being tagged in text, photos, or videos that may be professionally compromising. Students should monitor their sites to seek removal of unprofessional public posts by others. Using social media to insult, threaten, defame, harass, disparage or bully another person or entity or to engage in copyright or trademark infringement, misappropriation of trade secrets, discrimination, or related actions, or for any other purpose that is illegal, against University policy, or not in the best interest of the University is prohibited. The use of social media during class time is unacceptable.

Violation of the Social Media and E-Professionalism Policy

Any violation of this policy may result in disciplinary action suspension and other actions up to or dismissal from the

University. In addition appropriate legal action against the offending individual(s) or organization(s) may also be pursued.

Confidential Information (HIPAA)

Students are required to abide by HIPAA (Health Insurance and Portability and Accountability law) and related jurisprudence in treating patient information as confidential. Students are prohibited from:

- Discussing specific patients' online, unless on secure healthcare-related networks, even if all identifying information is excluded.
- Posting pictures of patients online without the specific prior written permission of the patient (or legal guardian, in the case of a minor).
- Disclosing confidential University information including, but not limited to, student records, personal information of students or employees, and non-public strategies.

Representation of University Entities

Representing one's personal opinions as institutionally endorsed by the University or any of its entities is prohibited. Students should maintain the privacy of fellow student colleagues and CNU employees unless they have been given prior written permission to use the person's likeness or name. Students are not allowed to use CNU logos unless they have received prior written permission from authorized University personnel. While students are encouraged to share information about their experiences at the University online, they should be transparent in regard to their relationship with CNU and be truthful, accurate and complete in describing the University programs and services.

Food in Class/Laboratory

Eating food during class or laboratory is not allowed unless permitted by the course coordinator, staff, or other CNU personnel. The only exception to this are during the lunch hour of 12:00 p.m. to 1:00 p.m. or if approved for an authorized University event.

Free Speech

CNU supports the right of students to free speech, to engage in discourse and to listen to others to express views whether expressing approval or disapproval of ideas or issues.

Fundraising

Detailed information regarding fundraising for student organizations can be found in the Student Organization Handbook. CNU recognizes that fundraising is a vital component of a successful professional organization. Therefore, CNU encourages students to seek entrepreneurial ideas for fundraising.

Students/organizations must first obtain permission from the Associate/Assistant Dean of OSAA to sell any items on campus.

Use of CNU insignia or logo is prohibited unless prior authorization for use is granted. Students/organizations soliciting funds from an outside company (such as pharmaceutical companies, medical employers, alumni) is prohibited. A request may be made through the Associate/Assistant Dean for the OSAA. A formal proposal, with the organization's advisors signature, must be submitted with the request to a Student Affairs Coordinator. Once the proposal is deemed complete it is sent to the Associate/Assistant Dean for the OSAA for review and approval. The approved request will be forwarded to the potential sponsor(s) by the Student Affairs Coordinator. Forms and paperwork for organization use can be located on CNU's website under Student Affairs.

Gambling

CNU prohibits any form of gambling for money or stakes representing money on CNU property unless exempted by California state law.

Harassment

Anti-Sexual Harassment/Harassment/Assault & Disruptive Conduct Policy

The University is committed to maintaining a positive learning, working and living environment. In pursuit of these goals, the University will not tolerate acts of sexual harassment or related retaliation against or by any student or employee.

Anti-Harassment Training and Prevention Programs

Students will become familiarized with the Anti-Sexual Harassment/Harassment/Assault and Disruptive Conduct Policy at orientation. Training programs focused on awareness, prevention, and bystander intervention are offered to students and employees at least once a year. Notices and arrangements of these events will be sent to the campus community accordingly.

Definitions of Unaccepted Harassment

Sexual harassment: consists of interaction between individuals of the same or opposite sex that is characterized by unwelcome sexual advances, requests for sexual favors and other verbal or physical conduct of a sexual nature when: (1) submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment, living conditions and/or educational evaluation; (2) submission to or rejection of such conduct by an individual is used as the basis for tangible employment or educational decisions affecting such individual; or (3) such conduct has the purpose or effect of unreasonably interfering with an individual's work or academic performance or creating an

intimidating, hostile or offensive working or educational environment.

Hostile environment sexual harassment: (described in subpart (3) above) is unwelcome sexual conduct that is sufficiently severe or pervasive that it alters the conditions of education or employment and creates an environment that a reasonable person would find intimidating, hostile or offensive. The determination of whether an environment is “hostile” must be based on all of the circumstances. These circumstances could include the frequency of the conduct, its severity and whether it is threatening or humiliating.

Retaliatory acts: It is a violation of this policy to engage in retaliatory acts against any employee or student who reports an incident of alleged sexual harassment or any employee or student who testifies, assists or participates in a proceeding, investigation or hearing relating to such allegation of sexual harassment.

Lesbian, Gay, Bisexual, Transgender, & Questioning (LGBTQ) Non-Discrimination Policy

The University has a no tolerance policy for any type of sexual harassment including harassment or discrimination of LGBTQ students. The policies and protection acts that focus on this non-discrimination stance include:

Equal Protection Clause of the 14th Amendment All students has a federal constitutional right to equal protection under the law. This means that schools have a duty to protect lesbian, gay, bisexual, transgender, and questioning (LGBTQ) students from harassment on an equal basis with all other students.

Title IX of the Education Amendment Acts of 1972 prohibits discrimination based on sex in education programs and activities receiving federal financial assistance. Although Title IX does not prohibit discrimination on the basis of sexual orientation, sexual harassment directed at an LGBTQ student is prohibited by Title IX if it is sufficiently severe and pervasive. Title IX also prohibits gender-based harassment, including harassment on the basis of a student’s failure to conform to stereotyped notions of masculinity and femininity. CNU does not currently receive federal financial assistance but takes a proactive stance in the protection of all students. The Associate/Assistant Dean of Student Affairs and Admissions is the Title IX Coordinator for the University. Any violations of the Title IX Education Amendment Act should be reported to the Associate/Assistant Dean of Student Affairs in a timely manner.

1st Amendment, Equal Protection & Due Process Clauses

A transgender student’s right to dress in accordance with his or her gender identity may be protected under the First Amendment and the Equal Protection and Due Process Clauses of the U.S. Constitution. The First Amendment limits the right of school officials to censor a student’s speech or expression. Students also have a protected liberty interest (under the Due Process Clause) in their personal appearance.

In addition, a transgender student also has a right under the Equal Protection Clause to be treated similarly to other students of the same gender identity.

Conduct Disruptive to the University Community Policy (SaVE Act)

Students should immediately report any acts of violence, threatening behaviors or violations of any of the Anti-Harassment policies or disruptive conduct to the Associate Dean of the Office of Student Affairs, Office of Academic Affairs, campus security or any other school official. This policy defines disruptive conduct as:

Violent Behavior

Violent behavior encompasses a broad range of behaviors that may affect the campus or the workplace, may generate reasonable concerns for personal safety, or may result in physical injury. Violent behavior includes, but is not limited to, aggressive or frightening acts, intimidation, threats, harassing behavior, stalking/unwanted pursuit, physical attacks, domestic violence or property damage.

Intimidation

Intimidation is engaging in actions intended to frighten, coerce, or induce duress. These actions include, but are not limited to, stalking/unwanted pursuit.

Threats

A threat is an expression of intent to cause physical or mental harm. A threat may be direct, indirect, conditional or veiled. Any threat is presumed to constitute a statement of intent to complete the behavior consistent with the threat.

Physical Attack

Physical attack is unwanted physical contact such as hitting, kicking, pushing, shoving, biting, fighting or throwing objects or use of unauthorized weapon against another person.

Domestic Violence

Domestic violence is the use of abusive or violent behavior, including threats and intimidation, between people who have on ongoing or prior intimate or familial relationship, including individuals who are or have been married, living together, or dating.

Stalking

Stalking is the act of harassing somebody with persistent, inappropriate, and unwanted attention.

Harassment, Assault, and Disruptive Conduct Investigations

The Title IX Officer will initiate an investigation after an alleged offense is reported to campus authorities. The focus of the investigation is to collect as much information as possible to substantiate the initial complaint. The accuser and the accused are entitled to the same opportunities to present information, including having others present during any meeting or disciplinary hearing. The accuser and the accused will be informed of the outcome of the investigation and/or disciplinary proceeding. Disciplinary action by the institution may include suspension and/or dismissal from the College/University.

The College/University will make reasonable changes to an alleged victim/victim's academic situation after an alleged offense and provide options for those changes if those changes are requested by the victim.

Reporting Sexual Harassment, Harassment, Assault, or Disruptive Conduct

Students should report sexual harassment or conduct that is disruptive to the OSAA, the Office of Academic Affairs, or other campus administrator. If the situation is an emergency please call the Elk Grove police by dialing 911. If at all possible report the incident immediately. The University campus security and/or administration will assist students in contacting authorities.

In order to assist campus security, administrator's, or other authorities victims are strongly encouraged to preserve as much evidence as possible to support the complaint.

Students may also report non-emergency incidents using the University official Student Complaint/Grievance Form located in the lobby area on the first floor or on the University website. Once the Student Complaint /Grievance Form is completed contact the OSAA to review the complaint. Additional resources and assistance will be provided.

To report off-campus criminal conduct, including sexual assault or other serious allegations in which the complainant believes that his or her safety is threatened contact the Elk Grove Police Department or call emergency personnel by dialing 911. Allegations of serious sexual harassment should also be reported to the local police department if they occur after hours or on weekends. Students are strongly encouraged to notify the Associate/Assistant Dean of Student Affairs of the incident immediately so action can be taken to adjust the education environment. Documentation of the police report should be made available.

Stalking

This is behavior in which a student engages in conduct directed at another individual and makes a creditable threat to place that person in reasonable fear for his or her personal safety, or the safety of his or her family. The University forbids any form of stalking. Please refer to the Conduct Disruptive to the University Community Policy in this handbook for additional information.

Hazing Policy

Hazing in any form for any reason will not be tolerated at California Northstate University and is grounds for dismissal from CNU. Hazing is defined as any act that is likely to cause physical, emotional or social harm, fright or embarrassment to another person. Hazing includes any means of initiation or pre-initiation into a student organization, which causes mental or physical hardship to the person seeking membership. Hazing includes but is not limited to: encouraging or requiring participation in drinking games, creation of excessive fatigue, wearing inappropriate public attire, morally degrading or humiliating activities.

Any student who believes they have been hazed or believe that they may be accused of the same should contact the Associate/Assistant Dean for Student Affairs.

Health Insurance

CNU requires all students to have health insurance coverage meeting certain standards. An active health insurance is required due to the nature of the health care educational programs at CNU, in addition to the wellbeing of the students.

The health insurance coverage must include:

- 1) Inpatient Care and Outpatient Care
- 2) Urgent Care and Emergency Care
- 3) Mental Health Care

International students are required to subscribe to and maintain their enrollment with the school designated health insurance plan.

New enrolled students are required to provide proof of health insurance coverages to the Student Affairs Office no later than **5 calendar days** before the start of orientation. Failure to provide proof of health insurance coverages by the deadline, students will not be allowed to attend orientation, the White Coat Ceremony, and may lose their seats if requirement is not met.

Continuing enrolled students are required to provide proof of health insurance coverages to the Student Affairs Offices no later than **14 calendar days** before the first day of classroom instruction each semester. Failure to provide proof of health insurance coverages by the deadline, students will be subject to the following consequences:

1. Students will be emailed with information of insurance carriers.
2. Failure to enroll and pay the cost of the insurance premium in full will result in transcript hold, progression hold, registration hold, and library hold (student will not be able to check any materials out from the library).

Students are expected to maintain health insurance coverages at all times as a student of CNU. If a student's health insurance coverage is lapsed, the student is required to contact the Student Affairs Office within 72 hours and must provide proof of insurance.

Students will be randomly selected throughout the academic year to provide proof of health insurance coverage verification. When student is selected for health insurance coverage verification, student(s) will have 5 days to provide proof of insurance. (2100-Student Health Insurance Policy)

Medical Emergencies

For life threatening emergencies, call 911. For all other emergencies contact the University Office of Student Affairs or Business Operations at (916) 686-7300. Students should routinely update their Emergency Contact and Medical Information forms on record with the Office of the Registrar.

The ECMI form is available on the Office of the Registrar Services and Forms web page.

Missing Student Policy

This policy provides guidelines and action steps to assist faculty and staff in the event a student fails to report to an academic or clinical site as scheduled or an issue concerning a possible missing student safety situation is brought to their attention.

If a student is reported missing and cannot be located, or a safety concern has been registered with a university official, the following procedures will be followed by the Office of Student Affairs and Admissions (OSAA):

- The student's designated Emergency Contacts will be notified.
- If the student fails to return to the institution, and the student's personal family searches are unsuccessful, and/or at the discretion of the Associate Dean for Student Affairs and Admissions, the police may be contacted and a request made for a "wellness check" at the student's address on record, or last known whereabouts. If the student reports back to the institution, the OSAA will, if necessary, contact the student to inform him or her of support services available. This support will also be offered to any other students affected by the incident as needed.
- If a student has been absent from the institution, without notice, for a period of two academic weeks (10 business days), the institution will assume that the student is not planning to return and will take steps to withdraw the student from the academic program.
- The Associate Dean for Student Affairs will notify the appropriate University and College Administration of the missing student situation.

Definition of a Missing Student

Circumstances that may indicate a student is missing include:

1. Health related problems have been reported and the student has not returned to school on an agreed upon date.
2. The person has not regularly attended classes and has not been seen elsewhere on campus or a clinical site.
3. The student's team members, roommate, parent, spouse, or significant other report such a disappearance due to irregular contact.
4. The Student's Academic Advisor or other University employee reports concern that the student may be missing for circumstances related to situations discussed with the academic advisor or employee.

Outside Work

Students are encouraged to obtain outside employment preferably in a practice environment to enhance their overall academic experience. However, outside employment should not interfere with didactic success and students must arrange their work schedules to accommodate academic schedules. International students must follow the work guidelines established by their visas.

Parking

The University currently charges no fee for parking on campus. Off campus parking for students at experiential education sites must be paid by the student. No refunds or reimbursements will be made by the University. To obtain a parking placard, the student must submit the Vehicle Registration Form to the CNU front desk.

Students receive a college and student-specific parking placard that is good for any student lot, regardless of their CNU college affiliation. Placards must be hung clearly off of the rear-view mirror or be placed on the dashboard area where campus security can easily verify the information. Failure to clearly display their CNU placards will have their vehicle information recorded by security. By default, any vehicle falling under this category may be treated as suspect or unknown until a correct identification reveals otherwise.

Graduating and withdrawing students are expected to surrender their parking placards at the front desk.

Illegal Parking, Warnings, and Fines

Students are allowed to park in spaces marked "Car or Van Pool". Students must not park in spaces marked Visitor, Employee, Exec, VP, Dean, or President. Vehicles that are illegally parked will be towed at the driver or owner's expense. A parking zone map is available from the CNU front desk.

A warning slip will be issued to students who violate the parking policies such as parking in the wrong area, taking up multiple spaces, not displaying a decal or other error of inconsideration.

A second violation of any type related to the parking policy will be issued a \$50.00 fine and a financial hold placed on their student account. Students who display unprofessional behavior with University staff after receiving a penalty ticket will be forwarded to Student Affairs and will be addressed as prescribed by the college's Student Handbook.

Appeals for parking fines may be brought to the attention of the Business Office, and will be handled on a case-by-case basis to determine actual fault/responsibility. Appeals must be filed with the finance group within two (2) business days of receiving the fine. Notice of approval or denial will be issued within two (2) business days of receiving the request for appeal. Please note that Business Office's decision is final; no additional appeals will be granted.
(1706-Parking Policy)

Smoking/Smokeless Tobacco

Healthcare professionals advocate for health and wellness and therefore smoking, vaping, or using smokeless tobacco is not permitted on university property.(1704-Smoking, Smokeless Tobacco Policy)

Student Travel

Student representation at local/state/and national meetings, activities, and events is encouraged by the University. Students must be financially responsible for part of the cost

of travel. Current funding availability does not provide for the full travel funding of any student.

A limited amount of funding is available through the school to help assist students who plan to represent their organization or club at approved meetings. Approved meetings are generally considered to be professional conferences. Other types of meetings, or travel request, must be approved by the organization's advisor, faculty mentor, or other administrative official.

Student Organization Travel

Student organizations, representing a poster, or participating in other activities will be required to submit a proposed travel budget on a Funding request form prior to making any travel arrangements. The request must be approved for reimbursement of expenses. The proposal will be considered and either approved, returned to the organization/student with available travel funding allowance, or returned for revision. All approved travel will be reimbursed to students by the Student Organization treasurer affiliated with the conference within 7-14 days after the receipt of an approved Student Travel Reimbursement form and all receipts showing payment for the expense. Information regarding this process can be discussed with the student organization Treasurer, organization President, or the staff in the OSAA. See the Student Handbook for more information.

Student Competitor and Research Presenter Travel

Student competitors who have won a CNU competition to represent the college and the student organization will receive travel assistance from the Office of Student Affairs and Admissions (OSAA). In order to receive this assistance the following must be completed prior to booking any travel:

1. A Letter or announcement from the student organization or research advisor to the Associate Dean for Student Affairs acknowledging the event representation;
2. A completed Student Travel Application - Competitor or Research Presentation
3. Student Travel Application Documentation
4. A Release Waiver and Participation Agreement
5. Submit items 1-4 to the staff in the OSAA
6. Approval signature from the Associate Dean for Student Affairs & Admission
7. A notification of the approval from the staff in OSAA

Student Travel Reimbursement

Upon return from the conference all pre-approved travel will be reimbursed to students by either the student organization treasurer or the OSAA. The OSAA, as noted above, provides student travel reimbursement for competitors or research presenters only. All other travel reimbursement is provided by the student organization. The reimbursement is usually available within 7-14 days after the receipt of an approved Student Travel Reimbursement form and all receipts showing payment for the expense. Information regarding this process can be discussed with your organization Treasurer or the staff in the OSAA.

Falsification of Travel Documents or Receipts

Students who receive any travel funding from the school in advance and do not attend the meeting, for any reason, must notify their advisor or the OSAA. Any funding received must be returned to the school immediately. Students who knowingly submit falsified documentation for receipts or request reimbursement for travel that has been reimbursed or provided for by the professional organization or the student organization will be in violation of the Honor Code and will be subject to a review of the circumstances by the Professional and Academic Standards Committee (PASC).

Student Record Privacy (FERPA)

CNU adheres to the Family Educational Rights and Privacy Act of 1974 (FERPA). For information regarding FERPA, please see STUDENT RECORDS on page 152.

Theft

Any attempted or actual theft of property of the University, of a member of the campus community or campus visitor, violates the campus honor code and state law.

Vandalism

Any physical abuse, destruction or defacing of The University property or to another's property or the diminishing of its material or aesthetic value is prohibited.

Visitors

Visitors are not permitted on campus without prior authorization. Students wishing to bring visitors on campus must receive prior authorization from the OSAA, a faculty member, or other campus administrator.

Visitors will not be allowed in the classroom or laboratory without prior authorization from the faculty member conducting the lecture/laboratory exercise.

Visitors are generally prohibited from visiting experiential sites. Students are responsible for any misconduct of their guest.

Voter Registration

To register to vote in California, you must be a U.S. citizen, a resident of California, and 18 years of age or older on the day of the election. It is the responsibility of the OSAA to make registration forms available to you. It is important to exercise your right to vote. For additional information and voter registration forms please visit our website at <http://pharmacy.cnsu.edu/student-services/student-affairs>. Register to vote today to make a difference.

Weapons Policy

The University prohibits the possession, display or use of any weapons of any description including air- powered weapons on campus. California Penal Code 626.9 and 626.10

specifically prohibit the possession of firearms, including pellet and BB guns, on The University property, without specific written permission. Violators of this policy are considered a threat to the academic community and are subject to immediate dismissal from the University.

Safety and Security

Who to Call When You Need Help

Campus Security or any Administrative Office on Campus

Direct Contact: Campus Security Officer – Kyree Lomack
Telephone: (916) 432-7615

Elk Grove Police Department

Office: 8400 Laguna Palms Way, Elk Grove, CA 95758
Telephone: (916) 478-8000
Emergency: Emergency: 911

Clery Act

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (20USC §1092(f)) is a federal law, originally known as the Campus Security Act, that requires The University and universities across the United States to disclose information about crime on and around their campuses since 1990. The most up to date information regarding crime statistics for the CNU campus, the immediate campus vicinity, and the City of Elk Grove can be found on the college website.

Megan's Law

For a listing of registered sex offenders in the adjacent community and other pertinent information, please review the law enforcement database at <http://meganslaw.ca.gov/>.

Campus Access Cards

All students who have authorized access to campus will be issued an electronic entry access card that permits entry to the campus main entrances. This type of access to campus facilities helps provide students with a more secure campus environment by restricting campus entry and the possibility of unauthorized visitors. Campus access is tracked and monitored through an electronic security camera system. Access is tracked and monitored

Annual Security Report – Tables and Additional Information

The CNU Annual Security Report contains data for crime information in the immediate area surrounding the campus. The report can be obtained on our website at the following web address: <http://www.cnsu.edu/annual-security-report>. A paper copy is available upon request.

An overview of campus security, emergency alert, and response procedures is provided at the new student orientation. Additional safety and security information, tips, and alerts will be delivered to students through campus email. The school offers safety awareness seminars throughout the year.

Disclosure of Campus & Local Area Crime Statistics

The categories on the chart below show crime statistics for the campus, certain non-campus properties, and certain public property areas which have been reported to local police and campus security authorities must be disclosed for the most recent three calendar years.

College of Dental Medicine

Student Handbook

2020-2021

MISSION

The Mission of the College of Dental Medicine is to advance the art and science of health care through excellence in oral health education, practice, research, service, and social accountability.

Education: Create caring, skilled and knowledgeable clinicians who will constantly advance their capabilities throughout life

Practice: Produce clinical leaders in oral health who will serve in private practice, health systems practice, in interprofessional settings, academia and industry

Research: Promulgate scientific inquiry throughout the curriculum and support student and faculty research that creates an environment of scientific curiosity and an evidence-based foundation for clinical practice

Service: Provide individual patient care services at all clinical sites under the auspices of CNUCDM that produces the very best oral health outcomes and clinical value.

Social Accountability: Advocate for and help build stronger communities in California and globally through improved oral health care, disease prevention, health promotion and protection from oral diseases through community-based approaches.

VISION

The Vision of the College of Dental Medicine is to provide constructive innovation in its education programs, and leadership in integrating oral health care into human health care systems.

The College of Dental Medicine Embraces the California Northstate University WECARE Values of:

- **W**orking as a team
- **E**mbacing diversity and workplace excellence
- **C**aring about our students, our staff, our faculty, and our profession
- **A**dvancing our university, our goals, and our discipline
- **R**esponding to challenges that may impede our Mission
- **E**nhancing communication and partnership

College of Dental Medicine Values:

- Patient-centered didactic and clinical education that always puts improved health outcomes first
- Foster a humanistic and character-developing environment for dental students
- Making better communities and a better world through improved oral health
- Understanding the professional responsibility of the dentist as the head of the oral health care team
- Practicing health promotion and disease prevention and protection
- Advancing California Northstate University through excellence in all we do

WELCOME

Message from the Dean: Leon Assael

Welcome to the California Northstate University College of Dental Medicine. We are America's youngest dental school with a unique mission to gain the benefits of good oral health to the people of Northern California and beyond. We intend to recruit the most committed and capable students, staff and faculty who are devoted to caring for the sick in an integrated health education and delivery environment. We will seek out and serve those who otherwise do not have the means to care for their ailments and by helping them through improved oral health, improve their lives and the sustenance of their families, employers, friends, and their communities. Making a better world through improved oral health truly begins with us.

We will care for those whose conditions are complex and require the care that only an expert faculty in an integrated health care system in an academic health center can provide. We will educate the next great generation of oral health professionals with a forward-thinking curriculum that emphasizes Human Systems, Odontology, Oral/Maxillofacial Studies, and Behavioral/Social Sciences. Our education and our clinical care will emphasize the inter-professional teams and community resources needed to achieve desirable health outcomes.

To achieve this, you will find the College of Dental Medicine to have a remarkable array of students like you who see learning and practicing dental medicine as a life's vocation worthy of the exceptional effort, talent, personal values, and desire to achieve excellence it requires. You will be able to model your growth as a clinician with faculty and staff who will serve as role models in your development. You will have the very best educational resources, clinical environments and faculty with which to care for patients and produce the highest levels of patient care.

Message from the Assistant Dean of Student Affairs and Admissions: Richard Simonsen

The basic curriculum of California Northstate University College of Dental Medicine will be delivered by providing unique scientific, scholarly, interpersonal communication, and precise management skills and experiences to you, as our student, through the use of modified team-based learning. By working on teams and learning the benefits of teamwork, you will be exposed to a diverse population of CNU students from a variety of backgrounds and life experiences. You, as a student in our program, will assume a more proactive role in the program as

you learn to effectively interact with your fellow team members to enhance learning and practical application of the didactic material presented in classes. Team-based learning prepares you, our students, to play a key role in a multidisciplinary team setting, something that will be key to success in the outside world of dental practice, as you work collaboratively with a variety of dental health care specialists, and other health care providers, to improve patient care and enhance patient outcomes.

Since the profession of dentistry is constantly evolving with the discovery of new treatment methods, new dental materials and the tremendous revolution of digital dentistry, it is imperative that dental clinicians stay at the forefront of such developments. Our faculty at California Northstate University College of Dental Medicine is dedicated to providing you, our students, with up-to-date, evidence-based instruction to cultivate competent, empathic and caring dental practitioners and life-long learners in this, your chosen, field. The educational foundation provided to you will prepare you to assume a leadership role in the community and healthcare field as a trusted resource for treatment and advice.

As a dental student, you will assume the great responsibility of providing caring, empathic, evidence-based clinical care to patients. Therefore, it is vital to receive a comprehensive educational experience that offers numerous opportunities for growth on both a personal and professional level. As you and your fellow students undergo the rigors of the dental curriculum, the Office of Student Affairs and Admissions (OSAA) provides a variety of services to support and enable you to be successful in our program. Among the many services provided, the OSAA offers career development programs, disability, health, and counseling services, LGBTQ assistance, academic advising, and tutoring programs. The OSAA also oversees the student clubs and organizations and helps to facilitate outreach events at the local, regional and national level.

I look forward to working with each and every one of you as you pursue your educational goal of becoming a superb dentist, be it in clinical dentistry or one of the many valuable arms of the profession, in industry, education, or administration. California Northstate University College of Dental Medicine welcomes you to our Doctor of Dental Medicine program!

ABOUT CNUCDM

History of the College

California Northstate University (CNU) was founded in 2007 by a group of visionary leaders to meet the needs of our communities. The successful launch of the College of Pharmacy in 2009 led to the consideration of the development of an academic health center to include colleges of medicine, dental medicine, nursing, psychology and other health professions. In addition the baccalaureate programs in the health sciences to educationally guide students towards the health professions went under development. This resulted in the formations of the College of Health Sciences and establishment of the CNU College of Medicine.

A group of local community healthcare providers and leaders realized the growing local and national shortage of primary care physicians and other community health resources and committed to design the College of Medicine in order to meet the need for more physicians and health care providers in the Central Valley, Delta, Mountains and rural north of California.

The local healthcare community provided visionary leadership, funding and resources to develop and run the college. Much of the preliminary design of the structure of the College of Medicine and its curriculum was in place by July 2011.

The College of Medicine successfully completed all necessary planning and accreditation procedures, and in June 2015, received its preliminary accreditation by the LCME. The inaugural class of 60 students matriculated in September 2015.

In 2017 the development of a working group to establish the College of Dental Medicine in a strong relationship with the other health sciences ensued. This resulted in a decision in June 2018 by the CNU Board of Trustees to form the College of Dental Medicine.

Mission, Vision, and Core Values

MISSION

The Mission of the College of Dental Medicine is to advance the art and science of health care through excellence in oral health education, practice, research, service, and social accountability.

Education: Create skilled and knowledgeable clinicians who will constantly advance their capabilities throughout life

Practice: Produce clinical leaders in oral health who will serve in private practice, health systems practice, and in interprofessional settings

Research: Promulgate scientific inquiry throughout the curriculum and support student and faculty research that creates an environment of scientific curiosity and an evidence-based foundation for clinical practice.

Service: Provide individual patient care services at all clinical sites under the auspices of CNUCDM that produces the very best oral health outcomes and clinical value.

Social Accountability: Advocate for and help build stronger communities in California and globally through improved oral health care, disease prevention, health promotion and protection from oral diseases through community-based approaches.

VISION

The Vision of the College of Dental Medicine is to provide constructive innovation in its education programs, and leadership in integrating oral health care into human health care systems.

The College of Dental Medicine Embraces the California Northstate University WECARE Values of:

- Working as a team
- Embracing diversity and workplace excellence
- Caring about our students, our staff, our faculty, and our profession
- Advancing our university, our goals, and our discipline
- Responding to challenges that may impede Mission
- Enhancing communication and partnership

College of Dental Medicine Values:

- Patient-centered didactic and clinical education that always puts improved health outcomes first
- Foster a humanistic and character-developing environment for dental students
- Making better communities and a better world through improved oral health
- Understanding the professional responsibility of the dentist as the head of the oral health care team
- Practicing health promotion and disease prevention and protection
- Advancing California Northstate University through excellence in all we do

Accreditation

WASC

Application was submitted to the Western Association of Schools and Colleges for a substantial change to add the College of Dental Medicine program in February 2019

CODA

Application for initial approval of the DMD program at California Northstate University was submitted to the Commission on Dental Accreditation in March 2019

Complaints Related to CODA Accreditation Status

The Commission on Dental Accreditation (CODA) is required by the U.S. Secretary of Education to require its dental medicine program to record and handle student complaints regarding a school's adherence to the CODA Standards. The college must demonstrate a link between its review of complaints and its evaluation of a program in the accreditation process self-study. Therefore, in order to demonstrate compliance with the U.S. Department of Education Criteria for Recognition, and with the prior review and advice of Department of Education personnel, CODA requires dental schools to provide an opportunity for dental students to provide comments and/or complaints about the school's adherence to CODA's Standards.

Additionally, students, faculty, staff, patients, or the public may file complaints regarding adherence to CODA standards directly to the Commission on Dental Accreditation. As stated in the CODA standards

“The Commission on Dental Accreditation will review complaints that relate to a program’s compliance with the accreditation standards. The Commission is interested in the sustained quality and continued improvement of dental and dental-related education programs but does not intervene on behalf of individuals or act as a court of appeal for treatment received by patients or individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students. A copy of the appropriate accreditation standards and/or the Commission’s policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611-2678 or by calling 1-800-621-8099 extension 4653.

Western Association of Schools and Colleges (WASC)

California Northstate University is fully accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (ACS WASC). The College of Dental Medicine will be accredited by ACS WASC as a new educational program developed within California Northstate University.

For information on WASC: <http://www.wascsenior.org/>

Complaints Related to Accreditation Standards (WASC)

Accreditation by the Accrediting Commission for Senior Colleges and Universities represents the Commission’s judgment that an institution is satisfactorily achieving its mission and educational purposes and that it meets or exceeds the Commission’s standards of quality, integrity, and effectiveness.

The Commission values information provided by students, employees, and others in determining whether an institution’s performance is consistent with the Standards of Accreditation and Commission policies and procedures.

The Commission has two established means for receiving comments from students, employees and members of the public about its member institutions: complaints and third-party comments.

As a general rule, complaints are written by employees and students who have grievances that draw into question the member institution’s adherence to one or more Commission Accreditation Standards or Policies. Third-party comments are usually more general comments of a substantive nature about a member institution.

Individuals should review the [Complaints and Third-Party Comments Policy](#) on the WASC website to ascertain the appropriate means to communicate comments and complaints.

PROGRAM DESCRIPTION

Educational Philosophy

The College of Dental Medicine curriculum is designed to help students become dentists who are self-directed and lifelong learners. The four year curriculum is designed to facilitate and optimize student learning in a progressive and integrated manner both in didactic and experiential courses. CNUCDM recognizes the need to implement varied educational styles in order for students to become competent self-directed, life-long learners. Therefore, there will be a variety of formats for instruction ranging from lecture to completely self-directed.

integrated curriculum. Clinical presentations frame the introductory material in the Foundations of Clinical Dental Medicine. All subsequent courses in the Human Studies curriculum (Year 1 and Year 2) integrate biochemistry, cell biology, embryology, genetics, anatomy, histology, immunology, microbiology, pathology, pharmacology, nutrition, and physiology with the clinical presentations.

The Dental Medicine Skills courses and introductory dental medicine courses run concurrently with the systems-based courses and are designed to integrate dental medicine skills. These include Foundations of Odontology and Dental Anatomy courses in the first year as well as preclinical courses in the first and second year in Operative Dentistry, and Prosthodontics

Masters Colloquium and Junior and Senior seminars is a biweekly course designed to foster professionalism, ethics, and global health knowledge and behaviors throughout the curriculum.

The required clerkships and electives in year 2, 3 and 4 carry our clinical presentation curriculum through completion of the dental medicine education program. CNUCDM has clinical clerkships required in comprehensive care dentistry (including Odontology, Operative Dentistry, Radiology, Prosthodontics, Periodontics and Endodontics), Oral Surgery, Pediatric Dentistry, Orthodontics, Emergency Dental Care, Special Needs Dentistry, and community-based education. Fourth year clerkships incorporate all disciplines into a comprehensive care model. Electives to provide additional experience into the above areas, as well as discipline-specific in oral medicine, sleep dentistry, primary care medicine, public health, among others, are selected. Students will have the opportunity to master the basic sciences and foundational clinical skills associated in clinical care and apply basic sciences in all clinical experiences.

Detailed course descriptions are accessible for students online and in the all syllabi provided prior to the start of each course.

Learning Outcomes

Institutional Learning Outcomes

Students are expected to master the Institutional Learning Outcomes (ILOs), which are the learning outcomes expected of every student at California Northstate University. While the approach and specific outcomes vary in each program, all program and course learning outcomes are derived from these three fundamental institutional outcomes:

- Highly developed critical thinking skills
- Effective oral and written communication skills

- Exemplary professional behavior, attitude, and values

Program Learning Outcomes

Appendix A: CNUCDM PLOs

Upon completion of the CNUCDM the graduating dentist (DMD) will demonstrate:

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

Co-Curricular Learning Outcomes

Upon successful completion of CNUCDM Doctor of Dental Medicine (DMD) program, students will be able to demonstrate the following co-curricular learning outcomes:

- 1. Social Awareness and Cultural Sensitivity.** Demonstrate awareness of and responsiveness to social and cultural differences by adapting behaviors appropriately and using effective interpersonal skills.
- 2. Professionalism and Advocacy.** Demonstrate professional behavior and effective interactions with other healthcare professionals, community members, and/or patients and advocate for initiatives to improve patient care, health outcomes, and the profession of medicine.
- 3. Self-Awareness and Learning.** Demonstrate self-awareness through reflection and the development of appropriate plans for

self-directed learning and development.

4. Innovation and Entrepreneurship. Demonstrate innovation and creativity to develop novel strategies to accomplish professional goals, or students demonstrate an understanding for how innovation and creativity influence the development of novel strategies to accomplish professional goals.

5. Public Health and Education. Apply skills learned in the classroom to create and effectively deliver public health initiatives and health-related education to the community.

6. Service and Leadership. Demonstrate the ability to lead and work collaboratively with others to accomplish a shared goal that improves healthcare.

HONOR CODE

The Honor Code of CNUCDM is a formal code of conduct that emphasizes the core principles of respect, honesty and integrity, legal and ethical behavior, and professionalism, to which all students, faculty, and staff are held responsible for maintaining.

Respect

CNUCDM is dedicated to teaching, scholarly activity, research, and service in a respectful manner. We respect one another, our supporters, our colleagues, and our patients. We extend this respect to all persons, regardless of race, color, national origin, ancestry, citizenship, gender, gender identity, sexual orientation, age, religion, physical or mental disability, or veteran status. We promote good will among our diverse population and uphold the autonomy, dignity, and moral integrity of all persons. We respect the abilities, customs, beliefs, values, and opinions of others. As members of the dental, medical and surgical community, we promote the good health and lives of every patient in a caring, compassionate, and confidential manner, with respect to their right to privacy. We perform our procedures for the primary purpose of improving the health and lives of our patients, and we have respect for their autonomy.

Honesty and Integrity

CNUCDM is dedicated to teaching, scholarly activity, research, and service with honesty and integrity, both on and off campus. Dental students, faculty and staff have a duty to be truthful in professional and professional-patient relationships. We are committed to teaching, scholarly activity, and professional preparation in a team-based learning environment, in which all individuals are personally accountable and adhere to the tenets of honesty and integrity in the classroom and in the community. Cheating, plagiarism, and other forms of academic dishonesty are not tolerated. Individual work is to be based solely on the

effort of the individual. Team work and professional relationships are to be based on individual contributions and collaboration from all team members. All examinations, projects, and in or out of classroom assignments, whether individual or team-based, are expected to be performed and completed with the utmost degree of honesty and integrity.

Cheating in a health care studies environment is particularly egregious in that the knowledge and skills to be learned needs to be applied in the care of another person, the patient. On that basis it is a legal requirement of licensure in most states for dentists to report physical, health, or personal harm to patients under various limits. Similarly, as a student doctor, it is the obligation of dental students to report to the honor code council for investigation, suspected cases of cheating or other violations of the honor code.

Legal Standards and Ethical Behavior

CNUCDM is dedicated to behavior that follows legal and ethical standards in teaching, scholarly activity, research, and service. We are committed to following the law, professional practice standards, and the American Dental Association Code of Ethics. We comply with and adhere to all federal, state, and local laws and regulations.

We encourage all to act ethically in developing and advocating a culture of consideration for codes of ethics, values, and moral convictions of those who could be affected by our decisions. Whenever appropriate, we seek advice and counsel to determine the right course of action and make the best decision on behalf of those who depend on us to do so.

Professionalism

CNUCDM is committed to providing teaching, scholarly activity, research and service in a professional manner. We display professional attitudes, values, and behaviors in the classroom, at clinical clerkship sites, and in the community. We encourage team work and team-based learning, with respect for differing points of views of team members. At the same time, we expect individual competence, performance, and accountability in a professional manner. We serve as positive advocates for our profession by striving for excellence in the performance of our duties, while protecting the health and autonomy of our patients, and serving individual, community, and societal needs.

Personal Accountability and Expectations

All students, faculty, and staff of the CNUCDM community are required to follow all applicable provisions of this Honor Code. We are all personally responsible and accountable for maintaining an environment and culture of respect, honesty, integrity, legal and ethical behavior, and professionalism. This environment and

culture shall be extended off campus when dealing with a CNUCDM related matter or a member of the CNUCDM community, including, but not limited to patients, CNU clinics, and clinical clerkship sites participating in the CNUCDM clinical education program.

It is understood that teamwork is necessary for ensuring and sustaining an environment and culture that support these core principles and related values.

As such, it is expected that all students, faculty, and staff of CNUCDM shall know the Honor Code, uphold the Honor Code in daily life both on and off-campus, promote the Honor Code and an environment and culture of respect, honesty, integrity, legal and ethical behavior, and professionalism, report all known or suspected Honor Code violations to the appropriate personnel, and seek appropriate advice if unsure or in doubt, and cooperate with investigations of Honor Code violations.

Each year prior to and at the white coat ceremony, DMD students are given the opportunity to add their own commitment and accountability statements to the honor code. Each student signs the honor code as a requirement for matriculation at the white coat ceremony.

Consequences of Honor Code Violations

Any and all violations of the Honor Code are processed as appropriate through the Office of Student Affairs and Admissions, or the responsible governing body. Any person accused of academic or non-academic violations will be afforded fair jurisprudence and due process of law. Violations of an academic, professional, or other nature are subject to appropriate disciplinary action, which may include, but is not limited to, warning, probation, remediation, restitution, suspension, dismissal, expulsion, or legal prosecution. For specific information, refer to the CNUCDM policy most relevant to the violation.

Non-Retaliation

CNUCDM does not tolerate retaliation against individuals who report honor code violations particularly hateful, dishonest, illegal, unethical, unprofessional, or otherwise inappropriate acts. Anyone who retaliates against these individuals is in violation of the Honor Code and is subject to disciplinary action for that Honor Code violation.

Rewards

By knowing, understanding, embracing, and following the core principles of this Honor Code, we can ensure that CNUCDM will sustain an environment and culture that supports: an effective learning environment, an effective teaching environment, an effective working environment, and an institution with high quality

members.

Honor Council

The Honor Council hears alleged violations of the Honor Code and Professional Conduct Code, and determines the validity of any allegation of academic dishonesty. The Honor Council establishes bylaws and procedures for conducting hearings.

All alleged Honor Code and Professional Conduct Code violations go before the Honor Council and may result in dismissal from the College.

A representative from the Council introduces the Honor Code and Professional Conduct Code to the student body during new student orientation. Additionally, the Honors Council reviews the Honor Code and Professional Conduct Code in collaboration with a faculty advisor every odd year, and makes recommendations for changes to the Assistant Dean of Student Affairs. The Honor Council is made up of two representatives elected by each class at the time class officers are elected. A student may serve as both a class officer and member of the Honor Council. One third year student is elected by the council as co- chair and a fourth year student is Past co-chair. The faculty representatives include one member from four of the twelve divisions to be rotated through the divisions annually. The Assistant Dean of Student Affairs and Admissions serves ex officio as co-chair. Students interested in serving on this council must be in good academic standing and display qualities of honesty, integrity, and maturity.

Reports and recommendations of the Honor Council are presented to the Dean of the College of Dental Medicine for further action in concert with university administration.

CONDUCT

CNUCDM is committed to guiding students as they seek to attain the highest standards of professional responsibility and adherence to ethical principles. The domains of professionalism are honesty, integrity, responsibility, and accountability, commitment to excellence, altruism, empathy, respect for others and respect for patients. Students are expected to display these professional qualities and uphold the highest level of professional and personal ethical behavior at all times and in all

places while engaged in educational or university activities.

It is the policy of the University to respond in a measured fashion commensurate with the student's breach of professional conduct. The University reserves the right to require the student seek medical/psychological evaluation and receive appropriate treatment, be suspended, and/or be dismissed from the program for any acts that violate the guidelines and spirit of the conduct rules of California Northstate University.

Students arrested for illegal acts may be suspended immediately from the College of Dental Medicine until the resolution of the allegations against the student. It is the responsibility of the student to notify the Assistant Dean of Student Affairs and Admissions as soon as possible if s/he has been arrested for any reason. Regardless of the actions of any third party, CNUCDM reserves the right to dismiss any student for violations of the conduct codes of the University.

Professionalism

Professionalism is very important because it communicates trust. Professionalism can further be defined with respect to responsibilities, relationships, and ethics.

Professional Responsibilities:

- Seek and accept feedback and constructive instruction from teachers, peers, residents and faculty in order to continually improve the student's educational experience, knowledge and clinical skills.
- Commit to the highest standards of competence both for the student and for those with whom they work.
- Recognize the importance of life-long learning and commit to maintaining competence throughout the student's dental career.
- Be mindful of demeanor, language, and appearance in the classroom, in the presence of patients, and in all healthcare settings.
- Be accountable to all members of the CNUCDM community and its affiliates, including students, residents, faculty, and support staff.
- Admit to and assume responsibility for mistakes in a mature and honest manner and develop productive strategies for correcting them.
- Refrain from using federally illegal substances. Refrain from using alcohol, non-prescription or prescription drugs in a manner that may compromise judgment or ability to contribute to safe and effective patient care.
- Be considerate and respectful of others' (teachers, peers, residents, patients and faculty) time, rights, values, religious, ethnic and socioeconomic backgrounds, lifestyles, opinions, and choices, even when they differ from my own.

- Meet the expectations for participation and timeliness that are communicated to me by those who teach me.
- Take an active role in caring for the diverse patient population served by the CNUCDM and its affiliate hospitals and clinics
- Recognize my limitations and seek help when my expertise, knowledge, or level of experience is inadequate to handle a situation in the classroom, hospital, or research setting.

Professional Relationships

- Maintain appropriate relationships with patients, teachers, peers, residents and faculty.
- Treat all members of the CNUCDM community, patients, and their families with respect, compassion, and dignity.
- Be mindful to avoid intentionally embarrassing or deriding others.
- Provide feedback to others (both colleagues and superiors) in a constructive manner, with the goal of helping them to improve.
- Treat those who participate in student education (e.g. standardized patients) with dignity and respect.
- Actively work to create an atmosphere in classrooms, clinical settings and in laboratories that is conducive to optimal, interactive learning.
- Help and support peers during difficult times in their academic, professional, and personal lives.
- Attend to personal physical and emotional well-being.

Professional Ethics

- Maintain the highest standards of academic and scholarly honesty by behaving in a trustworthy manner.
- Recognize and function in a manner consistent with the role of a student on a team.
- Maintain a commitment to patient confidentiality, recognizing the importance of patients' entrustment of sensitive information.
- Place patients' interests and well-being at the center of educational and professional goals.
- Treat cadaveric and other scientific/clinical specimens with respect.
- Adhere to the standards of the dental profession and apply fundamental principles of social justice, patient autonomy, and the primacy of patient welfare.
- Learn how to avoid conflicts of interest while carrying out responsibilities.
- Contribute to dental/medical knowledge through active scholarship and discovery.

Disciplinary Process for Non-Academic Reasons

Students are expected to comply with all regulations and policies of California Northstate University and of the College of Dental Medicine. Students are also expected to conduct themselves in accordance with accepted professional standards as student doctors and as future dentists.

Professionalism Concern Process

In the event that a student is alleged to be in violation of norms of conduct as described in the Student Handbook, or in violation of professional conduct code at an affiliate institution, the allegation is reported to the Assistant Dean of Student Affairs and Admissions via the Professionalism Concern Process using the Professional Concern Report (PCR). The student will need to meet with the Assistant Dean of Student Affairs to review and respond in writing to the unprofessional behavior reported in the PCR. The student has the option to appeal to the Dean of the College of Dental Medicine and/or seek the assistance of the Honor Council. The Assistant Dean of Student Affairs may refer to the Honor Council and/or the Academic Review/Promotion and Graduation Committee for further recommendations or disciplinary action. If a student accumulates two or more PCRs, these will become part of the student's permanent record. If a student accumulates one PCR and not more, it will be destroyed at the time of graduation and will not become part of the permanent record.

If a student has been arrested and has pending legal action against him/her, the Assistant Dean of Student Affairs and Admissions, or the Dean of the College of Dental Medicine may initiate the Professionalism Concern Process. Final action by the Associate Dean of Student Affairs and Admissions or Dean of the College of Dental Medicine may be withheld pending the final outcome of the legal action against the student.

Professionalism Concern Report (PCR)

The Professionalism Concern Report (PCR) can be found on CNUCDM's website or by [clicking here](#).

Absences

Students are required to attend class unless otherwise stated by the course director or in the syllabus. Students are required to attend all mandatory laboratory and clinical sessions and seminars as well as other classes or sessions declared as mandatory by the Course Director, Clerkship Director, or Assistant Dean of the Office of Student Affairs and Admissions.

All summative examinations and competency evaluations are considered mandatory and may only be rescheduled due to an approved excused absence. Students are to remain local and not travel out of the area prior to the end of the semester in the event of needed summative exam retesting.

An absence for any of the following reasons is considered approved and will normally be excused: medical/illness, religious holiday, emergency leave, bereavement, military duty, jury duty, involvement in a traffic accident, or immigration and naturalization. The Office of Student Affairs and Admissions may request documentation to substantiate the nature of the absence.

Special circumstances may be eligible for an excused absence but must be approved by the Assistant Dean of Student Affairs and Admissions at their discretion. Please refer to the Absence Form and Policy for instructions.

Any unexcused absences will be adversely reflected in the Professionalism Performance section of the Dental Student Performance Evaluation (MSPE). Excessive unexcused absences will result in a PCR report and can impact academic progress.

Absence Request Form

The Absence Request Form can be found on CNUCDM's website or by [clicking here](#).

Disorderly Assembly and Conduct

No person shall participate in or organize any activity for the purpose of creating a disturbance that interferes with the operations of University or of the College of Dental Medicine. No person shall use any University- and/or College-owned or controlled building or property without authorization. Any conduct on the college campus or on affiliated sites that is disruptive or offensive is prohibited and may be grounds for dismissal from the College.

Disorderly conduct includes but is not limited to:

- Disrupting a class in progress
- Physically or verbally assaulting another person
- Discriminating, threatening, demeaning another person
- Dishonest behavior

Any violation of this policy will result in disciplinary action. In addition appropriate legal action against the offending individual(s) or organization(s) may also be pursued.

Dress Code Guidelines

Classroom

As representatives of the dental profession, all dental students are expected to maintain an image that conveys credibility, trust, respect, and confidence in one's colleagues and patients. Attire and behavior should promote a positive impression for the individual student, the specific course, and the institution.

For men, a shirt with a collar is preferred. For women, shirts and blouses must extend, at least, to the waistband of the skirt or pants.

Students are permitted to wear casual slacks, jeans, and T-shirts to classroom activities provided they are clean, in good repair, and do not contain any offensive language or pictures.

Clinic

Standards of dress and appearance in a clinical setting, including the OSCE Area and Simulation Lab. Standards are designed to ensure that students present a professional appearance consistent with what is expected in a clinical setting. How students look and act directly affects how provided care is perceived by patients, faculty, staff, and other students.

Clothing

Men should wear a collared shirt, long pants, socks, and closed-toe, non-athletic shoes. Ties, if worn, must be bow ties or tacked to the shirt to prevent the tie coming in contact with the patient.

Women may wear dresses of medium length or professional-style slacks. Dress and skirt hems must be clearly visible below the hem of the white coat. A white coat with the CNUCDM logo and a name badge are required. Clothing should be neat and clean and appropriate for the clinical setting.

While wearing a white coat in the clinical setting, dental students are expected to verbally identify themselves as "student doctors" at all times and must assume responsibility to clarify their role to patients.

Scrubs

Scrubs must be worn in compliance with the policies of the institution in which the dental student is assigned for patient care rotations and according to clerkship preceptor instruction.

Students assigned to CNUCDM clinics will, during clinic days, change into scrubs on site for the clinic day. It is not appropriate to wear CNU scrubs while commuting, at retail/restaurant or other external sites.

Footwear

Shoes and socks/stockings are required in clinical settings. They must be comfortable, clean, in good repair and appropriate to the job functions and duties. Flip-flops, slippers, or open-toed shoes/sandals are not allowed in the patient-care setting. Your shoes should provide sufficient traction for use in a dental clinic setting where there is a distinct possibility of fluid spills.

Personal Grooming

Hair must be neatly groomed and clean. Long hair may neither obstruct vision nor interfere in any way with the student's clinical performance. A hair restraint, i.e., hair net/surgical cap, is required in clinical and simulations settings, to protect against entanglement with clinical equipment and to be part of barrier protection. Also, hair color and style must be appropriate for the clinical work environment.

Facial hair must be neatly groomed, clean, and must not interfere in any way with patient care. For safety and infection control reasons, students working in some areas of the clinics and operatories may be required to wear beard guards.

Fingernails should be short, neat and clean. Nail polish, if used, should be clear and without chips. Long fingernails are a safety hazard to self and others. Artificial nails are not permitted.

Jewelry

Any jewelry worn by students must be of reasonable shape and size, appropriate to the work setting, as defined by the clinical supervisor, and may not interfere with patient care, job performance, or safety. Earrings and small nose studs are the only acceptable forms of visible pierced jewelry. Rings must be small enough to allow for the use of gloves, with no risk of tearing.

Tattoos

Tattoos are to be covered, if practical, at all times when in the clinical setting.

Other

Hair covers, masks, shoe covers, and gowns should be removed before leaving the designated clinical areas and should not be worn while in the outpatient clinics or when making rounds on the inpatient services, unless permitted by the institution or instructed by the clerkship preceptor.

Research Lab

The CNUCDM dress code for the research laboratory is about safety and following OSHA regulations. The basic safety rule is to dress in a manner that will minimize safety risks.

Clothing

Clothing should be comfortable, appropriate for the work, and must be clean, neat, and in good repair. Lab regulations strictly prohibit shorts, skirts, and short dresses. Exposed skin is at risk for contact with hazardous material and burns.

Jeans may be appropriate attire based on the section in which the student works. Jeans, when worn, must be clean, neat, and in good repair.

Jewelry and any hanging article of clothing should be constrained.

Footwear

Shoes worn must meet OSHA safety standards and regulatory requirements relative to the specific work location. Footwear must be clean, in presentable condition, professional, closed-toed, and closed-heeled. Canvas sneakers and flip flops are not appropriate.

Personal Grooming

Hair must be clean and groomed. Long hair must be tied back. Fingernails should be short, neat and clean.

Lab Coats

Research lab coats must be worn inside the laboratory at all times. Lab coats may not be worn out of the working area in the central facility. All non-laboratory employees must wear a lab coat when visiting or conducting business in the laboratory work area. Extra coats are made available for these temporary uses.

Gloves and protective eyewear must be worn in appropriate locations.

Anatomy Lab

Clothing

Shorts or skirts are not permitted. Clothing or personal protective equipment must cover any part of the body that could be contaminated or come in contact with the cadaver or chemical fluids.

Lab Coats

A lab coat or scrubs must be worn when working in the laboratory to protect you from contaminating your clothes. Such clothing should be laundered frequently. Lab coat/scrubs worn in anatomy lab may not ever be worn outside of anatomy lab.

Footwear

No open-toed shoes are allowed. Your shoes should protect your feet from accidental chemical drips and injury from falling sharps. Your shoes should provide sufficient traction for use in a lab setting where there is a distinct possibility of the floor having fluid spills.

Protective equipment

Appropriate personal protective equipment will be provided for you, and it is your responsibility to use it. Gloves must be worn when working in lab, and properly disposed of in the designated receptacles prior to leaving the lab. Particulate masks will be available for use when needed. If you find that you have a chemical sensitivity (respiratory or mucosal irritation), or if you are pregnant, please let an instructor or the Lab Manager know.

Proper protective eyewear is recommended at all times (while eyeglasses provide some protection, they are not considered protective). Protective eyewear is mandatory when using rotary instrumentation and saws in all settings or any other procedure with risk of spatter or aerosol contamination.

Personal Grooming

Hair should be clean and groomed. Long hair must be tied back.

E-Professionalism and Social Media

The following serves as a summary of the e-Professionalism and Social Media Policy.

California Northstate University requires all students to uphold the core principles of the Honor Code which includes E-Professionalism in the use of social media in addition to respect, honesty and integrity, legal and ethical behavior, and professionalism in all aspects of their lives.

Social Media

Students are to maintain a professional demeanor at all times within social media. Students must avoid posting or being tagged in text, photos, or videos that may be professionally compromising. Students should monitor their sites to seek removal of unprofessional public posts by others.

Using social media to insult, threaten, defame, harass, disparage or bully another person or entity or to engage in copyright or trademark infringement, misappropriation of trade secrets, discrimination, or related actions, or for any other purpose that is illegal, against University policy, or not in the best interest of the University is prohibited. The use of social media for non-academic purposes during class time is unprofessional.

Confidential Information

Students are required to abide by HIPAA (Health Insurance and Portability and Accountability Act) and related jurisprudence in treating patient information as confidential. Formal instruction regarding HIPAA is provided prior to the first clinical experiences.

Representation of University Entities

Representing one's personal opinions as institutionally endorsed by the University or any of its entities is prohibited. Students should maintain the privacy of fellow student colleagues and University/College employees unless they have been given prior written permission to use the person's likeness or name.

Students are not allowed to use the University or College of Dental Medicine logos unless they have received prior written permission from authorized University personnel.

For more information regarding the usage of university and college logos, please see the [University Logo Use](#).

Violations

Any violation of these guidelines may result in disciplinary action, suspension, or dismissal from the University. In addition, appropriate legal action against the offending individual(s) or organization(s) may be pursued.

Food on Campus

Food and drinks are not allowed in the laboratory setting, OSCE, or Simulation Lab. Beverage containers with capped and closed bottles are allowed in the classrooms.

Students are responsible for cleaning up any remnants, messes, or spills in classrooms, College Rooms, or hallways. If unable to completely clean, please contact the receptionist to coordinate janitorial assistance.

Refrigerators in the Academic Café are available for student use. All food must be clearly labeled with student's name and date. Students are expected to regularly remove their food from the refrigerators; leftover food and storage containers are regularly discarded at the end of each week.

College Room refrigerators are to be kept clean. Perishables should not be stored in College Room lockers.

Free Speech

CNUCDM supports the right of students to free speech, to engage in discourse and to listen to others, and to respectfully express approval or disapproval of ideas or issues. However, it is inappropriate and unprofessional to be disruptive of the academic or clinical setting when seeking to express an opinion. Unprofessional conduct will be addressed by the Professionalism Concern Process and/or disciplinary action.

Fundraising

CNUCDM recognizes that fundraising is a vital component of a successful professional organization and encourages students to seek entrepreneurial ideas for fundraising.

Dental students and student organizations must first obtain permission from the Assistant Dean of Student Affairs and Admissions to sell any items on campus.

Dental students/organizations may not directly solicit funds from an outside company (such as pharmaceutical companies, medical/dental employers, alumni). However, a funding request may be made through the Assistant Dean of Student Affairs and Admissions. A formal proposal, with the organization's advisors signature, must be submitted with the request to the Assistant Dean of Student Affairs and Admissions for review. Once the proposal is approved by the Assistant Dean of Student Affairs and Admissions the student organization may forward the approved request to the potential sponsor(s).

Detailed information regarding fundraising for student organizations can be found in [CNUCDM's Student Organization Policy and Procedure Manual](#). The CNU Event and Fundraising Form can be found [here](#).

Use of the University or College insignia is prohibited unless prior authorization for use is granted by the Vice President of Operations. Use of the University or College insignia must comply with the Use Guide for the University or College insignia.

For more information regarding the usage of university and college logos, please see the [University Logo Use](#).

Gambling

CNUCDM prohibits any form of gambling for money or stakes representing money on College property unless exempted by California state law.

Hazing Policy

Hazing in any form for any reason is not tolerated at CNUCDM and is grounds for dismissal from the College. Hazing is defined as any act that is likely to cause physical, emotional or social harm, fright or embarrassment to another person. Hazing includes any means of initiation or pre-initiation into a student organization, which causes mental or physical hardship to the person seeking membership. Hazing includes but is not limited to: encouraging or requiring participation in drinking games, creation of excessive fatigue, wearing inappropriate public attire, and morally degrading or humiliating activities.

Any student who believes they have been hazed or believe that they may be accused of the same should contact the Assistant Dean of Student Affairs.

Liability and Malpractice Insurance

All incoming students are enrolled in the California Dental Association and American Dental Association – Student Division at the beginning of the academic year. Professional liability insurance is included for students as part of the care team at CNU clinics and at authorized clinical rotation in community-based education. It is not included for unauthorized activities that are not an official component of the curriculum such as international or regional volunteer work.

Name Badges

Name badges are provided to all students during Orientation and must be worn at all times while on campus, at clinical sites, and during patient-care activities.

CNUCDM identification badges must be worn in all academic and professional environments. Additional identification may be required by other affiliated facilities such as affiliated hospitals, clinics, and doctor's offices. The identification must be worn in plain view, above the waist on a lanyard, clip, or pin.

Replacing Name Badges

Students must report any missing, lost, or stolen identification badges immediately. Additional name tags are provided at a replacement cost of \$25.00 for the first loss and \$60.00 for any second or subsequent loss. The replacement cost is waived if the badge is stolen and a copy of the police report is submitted.

Professional Identification

It is extremely important for students not to identify or introduce themselves as "doctor." To misrepresent oneself as a dentist is a felony, and CNUCDM does not foster or tolerate criminal activity, even if it is unintentional in nature.

Students who have already obtained a doctorate degree are still asked to refrain from introducing themselves as "doctor" in the presence of patients in order to prevent confusion and maintain legal compliance.

Smartphones and Personal Communication Devices

All smartphones, pagers, and headphones (including earbuds) should be turned off before entering any classroom, laboratory, and discussion session or academic/professional event.

Smoking and Smokeless Tobacco

Smoking or using smokeless tobacco is not permitted on the campus. This includes vaporizers and vapor-based cartridges. Dental students are urged not to smoke tobacco or other substances at any time as this adversely impacts on the dental care delivery environment.

University Logo Use

The following serves as a summary of the University Logo use and Branding Policy. To read the complete policy, [click here](#).

Use of Logo

Every use of the CNU marks and logos must be approved by Student Affairs and Apparel Department. Products licensed to use CNU's identifying marks must be of high quality and good taste.

CNU does not authorize the use of marks or logos under any circumstances on the following:

- Alcoholic beverages
- Inherently dangerous products
- Obscene or disparaging products
- Sexually suggestive products

For any questions regarding whether it falls under any of these please see the Office of the General Counsel.

University Entities

CNU colleges, departments, centers, institutes, and organizations are exempt if the merchandise is for internal use and not for resale. CNU entities may use the logo to promote their activities on posters advertising events, programs, brochures, etc. but must adhere to the CNU brand and identity standards. Posters for presentations and scientific use are permitted.

Student Organizations

Registered student organizations are considered CNU entities, and are allowed to use the CNU logo for products that are not for resale. Any use of CNU's logo and brand must be approved by the Apparel Department.

Guidelines for Logo Use on Apparel

Do not stretch the logo. Proportions of the CNU logo must remain the same whether reduced or enlarged. When applied to a T-shirt, sweatshirt, jacket, hat or other apparel, the CNU logo should be placed so it is easily visible, with ample clear zone around it. Always use an approved CNU logo instead of creating your own, and do not use a scanned, recreated, reproportioned

or otherwise modified version of the logo. Do not alter the colors of the logo. Use the approved version of the logo that is most suitable to the background material on which it is placed. The CNU seal is to be used on official University documents and should not be used on apparel.

Request for Logo Use

To request to use the CNU or CNUCDM logos, please complete the [Request to Use University Logo/Branding Form](#) and submit to the Assistant Dean of Student Affairs.

ACADEMIC AND CAREER SERVICES

Career Advising

Choosing a career path in dentistry or a specialty is one of the most significant decisions a student will make during their time in dental school. In order to assist the student in achieving that goal, the Office of Student Affairs coordinates the Careers in Dental Medicine program and career advising. Both are important and designed to help students with specialty and career exploration.

Careers in Dental Medicine Program

The American Dental Education Association (ADEA), graduate programs, and dental specialty organizations, provide excellent assessment tools and resources to help students better understand themselves in light of selecting a career path. Students are introduced to these resources at orientation and encouraged to utilize these tools which can be found on the ADEA website at www.adea.org.

Speaker forums, lunchtime informative sessions, panel discussions and other resources are utilized to expose students to the greatest number of specialty options and career paths and to assist with the student's discovery of their specialty of choice. US armed and uniformed services, the Veteran's Administration, the Indian Health Service, community clinics, and dental health systems employers are welcomed to CNUCDM to provide informational sessions to our students

The ultimate goals of the program are to help each student learn of their options by the spring quarter of their D3 year, prepare their application for employments, or residency, interview, and enjoy a successful Match to the residency of their

choosing.

Dental Colleges and Salons (all four years)

Upon matriculation, the dental student class is subdivided into four groups of twenty students, with each college headed by a College Master(s), a CNU faculty member. The student is assigned a College Master overseeing that college. An important goal of the College Master is to foster a collegial relationship with their advisees that results in the facilitation of a student's learning and successful progression through the first two years of the curriculum. A second goal is to assist the student with career advising.

Each College is named for a leader promoting the art and science of oral health in our history: Revere, Shira, Black and Satcher.

1. The Paul Revere College
2. The General Robert Shira College
3. The GV Black College
4. The Surgeon General David Satcher College

Colleges are encouraged to develop an informal curriculum that fosters professional development and collegiality while advancing the art and science of dental knowledge and capability. These are done through periodic "salons" which are group meetings designed to address a particular problem with informal open discussion.

The student will have an initial meeting with their College Master during the first week of dental school and will continue to meet regularly, at least once per semester, with the purposes of career and academic advising.

Students may request to be assigned a different College Master at any time through the Assistant Dean of Student Affairs and Admissions.

Specialty Specific Advisors

Faculty and community dentists and dental specialists have been identified and are available to provide specialty specific advising to students. These advisors help students better understand the nuances of residency application specific to that specialty and further assist students in the process of dental specialty selection and residency application.

The Office of Student Affairs will make contact information for these advisors available to students at the start of each academic year.

Academic Advising

It is CNUCDM's desire to see that each student has every opportunity to succeed. The goal of the academic advising system is to prevent a student from falling into academic difficulty through early assessment and intervention.

College Masters

In addition to career advising, the College Master has the responsibility for monitoring advisees' academic progress during the student's four years. The College Master can play a valuable role in helping students proactively identify and address evolving academic difficulties and refer the student to appropriate resources.

College Masters will have access to advisees' academic records for the purposes of academic counseling.

Students may request to be assigned a different College Master at any time through the Assistant Dean of Student Affairs.

Office of Student Affairs

The Assistant Dean of Student Affairs and Admissions monitors students' academic progress, meets with individuals who are concerned with their academic progress or who have been identified from performance data or by referral, as potentially needing assistance.

If a student needs to meet with the Academic Review/Promotion and Graduation Committee, he/she may seek counsel from the Assistant Dean of Student Affairs in preparation for the meeting.

Academic Review/Promotion and Graduation Committee

The CDM Academic Review/Promotion and Graduation Committee (PGC) is responsible for the application of effective procedures for the evaluation of student performance, which includes both academic achievement and professional competence.

The committee evaluates the progress of all students and certifies eligibility to advance from one phase of the curriculum to the next, and from one year to the next. It recommends appropriate actions when students do not maintain satisfactory academic progress.

The Academic Review/Promotion and Graduation Committee may formulate a remediation program for the student based on his/or her unique situation. In such cases, the student may be required to submit reports to the Academic Review/Promotion and Graduation Committee concerning the progress they have made in these remediation efforts.

Open Door Policy

Students may consult in-person with any CDM faculty member, Dean or administrator for academic or logistical advice; appointments are encouraged.

Peer Tutoring

The following serves as a summary of the Peer Tutoring Policy. Please refer to the CNUCDM website for the complete policy.

Students experiencing difficulty in any course are urged to seek the help and assistance of the Course Director or their College Master before the problem becomes unmanageable. School-funded peer tutoring services are available through the Office of Student Affairs.

Students may request tutoring for themselves by contacting the Office of Student Affairs directly. Students may also be referred for tutoring by the Course Director, by their College Master, the Assistant Dean of Student Affairs and Admissions or by the Academic Review/Promotion and Graduation Committee.

Tutee Responsibilities

The student requesting tutoring must contact the Office of Student Affairs to be connected with an available peer tutor.

The tutee is responsible for contacting and arranging sessions with the tutor.

The tutee is required to report any concerns or challenges regarding the tutor or the tutoring sessions to the Office of Student Affairs.

Tutor Responsibilities

The tutor must have a grade of 80% or above on the most recent summative exam and on any subsequent formative exams.

Tutoring is normally limited to three hours per week. The tutor must obtain approval from the Office of Student Affairs for additional tutoring hours.

The tutor must record all tutoring session on the Peer Tutoring Agreement & Tutor Report/Payment Form and submit it to the Office of Student Affairs for payment processing.

The tutor is required to report any concerns or challenges regarding the tutee or the tutoring sessions to the Office of Student Affairs.

CLERKSHIP POLICIES

Required Background Checks

Admission to California Northstate University College of Dental Medicine (CNUCDM) as well as retention in the Doctor of Dental Medicine (DMD) program requires that all candidates undergo criminal background checks. The criminal background check is in accordance with California state law, which requires that all individuals who have access to children less than 16 years of age, those with developmental disabilities, or vulnerable adults, must disclose background information concerning crimes and offenses against these populations. Candidates must disclose, in writing, any criminal history involving drug-related crimes, proceedings related to vulnerable populations, Medicare/Medicaid/healthcare-related crimes and any other general conviction information (excluding parking tickets and traffic citations). Commission of such crimes may prevent a student from completing the experiential education requirements for graduation. In addition, students must report any actions taken by a licensing authority (Dental Board or other agency) against a professional license (Dental intern or other health-related license). Such actions taken prior to admission to the College must be disclosed at the time of offer of admission. Any such actions taken while a current student is enrolled in the Doctor of Dental Medicine program must be immediately disclosed. Such actions could, depending on the circumstances, be grounds for revocation of an offer of admission or for dismissal from the College.

The College's policies as well as California state laws and regulations prohibit the synthesis, manufacture, distribution, sale, illegal possession, or diversion to one's own use of controlled substances or other illicit or illegal drugs. Dental students are held to California state law regarding the health professions as defined in the Uniform Disciplinary Act.

CNUCDM requires a background check on at least two separate occasions. The first background check is a requirement for admission and is conducted prior to entering the program. The College's second background check will occur prior to progression to the clinical clerkships (3rd year). Students not receiving a cleared background check at this stage will not progress to the clinical clerkships and may be disqualified from the program. The Associate Dean of Academic Affairs will notify students of any additional requirements needed prior to clinical clerkships. Additional requirements may include, but are not limited to, a blood panel for drug testing.

California Northstate University College of Dental Medicine complies with **The Dental Board of California** reporting requirements of criminal convictions. As stated The Dental Board

of California's [website](#), "You must disclose all convictions as well as all cases in which you pled guilty or nolo contendere, even if they have been expunged pursuant to Section 1203.4 of the Penal Code. This includes every citation, infraction, misdemeanor and/or felony, including traffic violations. Convictions that were adjudicated in the juvenile court or convictions under California Health and Safety Code sections 11357(b), (c), (d), (e), or section 11360(b) which are two years or older should NOT be reported. Convictions that were later expunged from the record of the court or set aside pursuant to section 1203.4 of the California Penal Code or equivalent non-California law MUST be disclosed."

Clinical Log Policy

Students are required to log clinical experiences. Please refer to specific clerkship handbooks for information on how to submit logs to Clerkship Directors. These experiential logs must be HIPAA compliant and not disclose any health protected information.

Clerkship Grade Assignment

For all clerkships performed in health systems and community clinics, the Clerkship Director or preceptor for clerkships not listed in the Course Selection Book is responsible for completing the student's final narrative evaluation and assignment of grade within five days (please check that this time is in line with other preclinical courses) after the clerkship ends. It is the responsibility of the preceptors to submit their evaluations of the student in a timely manner such that the Course Director can complete the evaluation and grading. The course director is also responsible for reporting the final grade to the Registrar within 21 days (please check time with other courses) after the clerkships ends. Students have the right to appeal their grade but must follow the Grade Appeal Policy.

Clerkship Assignment Policy

California Northstate University College of Dental Medicine assigns students to clinical clerkship sites. Students may request alternative clerkship site assignments due to extenuating circumstances based on the judgment of clerkship director and availability of alternative sites.

- Specific extenuating reasons include, but are not limited to:
- Family circumstances (location of spouse/partner/dependents)
- Health conditions, such as pregnancy
- Delayed entry to third year or fourth year
- Hardship

Any third year and fourth year dental students with specific extenuating circumstances can contact the Office of Student Affairs before or during the assigned clerkship. Student may request for an alternative rotation site, or sequence, or both.

Students must discuss the issues with the specific Clerkship Director. Students must submit a formal request to the Senior Chair of the Department of Clinical Sciences with narrative and supportive evidence to outline the details of the specific extenuating circumstance.

All requests are reviewed by the Assistant Dean of Student Affairs. The decision will be made based on validity of the extenuating circumstance and the availability of alternative site, sequence or both.

The student will be notified of a decision by the Clerkship Director within five business days. If the student is not satisfied by the decision reached by this process, the student may appeal to the Assistant Dean of Student Affairs within two business days. The Assistant Dean of Student Affairs will make final decision within two business days.

Process for Dental Student Clinical Clerkship Assignment

There are currently two required clerkship each of 8 weeks, differing in sequence of the specialty rotations. Majority of clerkships all take place in the Greater Sacramento Valley area. Students will individually rank the clerkship tracks in order of their own preferences. Each student's first choice is then placed into their respective tracks. Using a computerized randomization lottery process, students are chosen from the pool for each respective track, thus providing many students with their first choices. Those students who were not picked for their first choices are then entered into the second round using their second ranked choices. Again, using the computerized

randomization lottery process, students are chosen for each respective track using their second choice rankings. This process continues until all students are assigned to one clerkship track.

Once the lottery has been completed, the students will be given ten (10) days to negotiate an exchange of track assignments with their peers. Both parties must be in complete agreement with the exchange. Once this ten-day period expires, no further exchanges or changes can be made to the specific track assignments without specific extenuating reasons.

If a dental student is experiencing an extenuating circumstance, such as illness/medical condition, family emergency, delayed entry to third year, undue hardship stemming from their assigned clerkship site or mentor, that student must discuss the issue with the clerkship site leader and/or the specific Clerkship Director and/or the Assistant Dean of Student Affairs. The dental student will need to provide details and specific information justifying their request to transfer to a different site and/or a different mentor.

Clerkship Duty Hours Policy

Duty hours are defined as all clinical and academic activities related to the program; i.e., patient care (both inpatient and Ambulatory), administrative duties relative to patient care, the provision for transfer of patient care, time spent in-house during call activities, and scheduled activities, such as conferences. Duty hours do not include reading and preparation time spent away from the duty site.

Duty hours must be limited to 80 hours per week, averaged over a four-week period, inclusive of all in-house call activities.

In-house call must occur no more frequently than every third night.

Continuous on-site duty, including in-house call, must not exceed 24 consecutive hours.

Students may be on site for up to 6 additional hours in order to participate in didactic activities.

Students must be provided with one day (24 consecutive hours) in seven, free from all educational and clinical responsibilities, averaged over a four-week period.

Students will have a minimum of 10 hours' break between shifts.

The number of hours will be tracked by rotation student schedules, student's personal electronic portfolio, written feedback from student evaluation of rotation and preceptor, as well as observation of the student's clinical team.

California Northstate University College of Dental Medicine (CNUCDM) is committed to always act in its students' best interest. Each student's physical and psychological wellness will be a priority. This policy addresses an important face of student wellness: clerkship duty hours.

The following is intended to mandate acceptable duty hours for dental students participating in clinical clerkships.

Responsibility of the Supervising Faculty: Clinical Setting

If a student in a clinical setting has violated duty hours, the faculty supervising the student should immediately release the student from further clinical duties and responsibilities. If the student exhibits signs of excessive fatigue, the supervising faculty should follow the policies outlines in the Policy on Stress and Fatigue Management.

The faculty and/or supervising resident should privately discuss with the student the possible causes of the duty hour violation in order to identify ways to mitigate such violations in the future.

The faculty and/or supervising resident must immediately notify the Clerkship Director of the decision to release the student from further clinical duties.

A student who is released from further clinical duties due to violation of duty hours cannot resume clinical duties without permission by the Clerkship Director.

Student Responsibility

Students who perceive they are experiencing violations of duty hours have the professional responsibility to immediately notify their attending faculty and Clerkship Director without fear of reprisal. If deemed necessary, students may make a confidential report via the online confidential grievance form.

Students who recognize a peer student violating duty hours should report their observations and concerns to the attending/presenting faculty and the Clerkship Director.

Clerkship Director Responsibility

Upon removal of a student from duties, the Clerkship Director must determine the need for immediate change in duty assignments for peer students in the clerkship and/or the clinical site.

The Clerkship Director will notify the departmental chair, as necessary, to discuss methods to manage clerkship duty hours.

The Clerkship Director will meet with the student in person, as necessary, to discuss methods to manage clerkship duty hours.

The Clerkship Director will follow up with the faculty supervising the clinical setting as necessary.

Clerkship Directors should provide students assigned schedules for on-site clinical and educational activities.

Clerkship Directors will monitor the academic and clinical workload of students within individual clerkships by the virtue of clerkship design and student scheduling.

Clerkship directors will include relevant excerpts from the policy on duty hours in the clinical clerkship handbooks and will discuss this policy with students at clerkship orientation

FORMS, POLICIES, AND PROCEDURES

Leave of Absence Policy

CNUCDM grants approved leaves of absence (LOA) to dental students for remediation purposes, or for other personal or professional reasons. It is the responsibility of the student to review the LOA policy. Students should consult with their College Master in addition to the Assistant Dean of Student Affairs prior to any planned LOA to ensure that the procedural requirements for a LOA are correctly followed.

It is ultimately the responsibility of the student to fully comprehend the potential financial and professional implications of a LOA.

It is the responsibility of the student to ensure that a LOA request form is submitted in a timely manner. Non-attendance does not constitute notification of intent to apply for LOA status. It is the responsibility of the student to continue coursework (barring an emergency) until the LOA is approved.

In order to request a planned absence, students should first contact their individual College Master, and also immediately contact the appropriate course director(s) or clerkship director(s). After consultation with the College Master, an official LOA request must be submitted that specifically states the reason for the request. The LOA request must also be signed by both the Director of Student Financial Aid and the Registrar prior to being submitted to the Assistant Dean of Student Affairs and Admissions. The Assistant Dean of Student Affairs and Admissions will review the academic standing of the student in determining whether a LOA will be granted. Final approval of a LOA is required by the Assistant Dean of Clinical Education. LOA forms can be found on the CNUCDM website and in the CNUCDM Student Handbook. All requests for planned absences must be submitted to the Assistant Dean of Student Affairs at least two months prior to the planned absence.

A LOA is approved for a specific period of time, not to last more than one calendar year. Due to the integrated curriculum at CNUCDM, a LOA causing a student to miss more than one course during the first two years of instruction will result in the student needing to repeat the entire year.

Likewise, a single clinical rotation missed due to a LOA may result in the student repeating that year. In general, a student is eligible for one LOA request during their tenure at CNUCDM. Requests for a second LOA are highly discouraged and unlikely to be approved due to the disruption it would cause to the student's chances of progression through the curriculum.

Students considering leaves of absence should consider the fact that an LOA can have a significant financial impact, and that the timing of the leave is therefore critical. A student may not receive a full refund of tuition if a LOA is submitted after the first day of instruction. A leave may affect financial aid, health insurance and malpractice insurance coverage.

Leave of Absence Form

The Leave of Absence Form can be found on CNU's website or by [clicking here](#).

Returning from a Leave of Absence

A student may apply for readmission if they have been on Leave of Absence (LOA) or have withdrawn from CNUCDM. The Office of the Student Affairs will contact a student on LOA approximately 90 days before the LOA expires via certified U.S. mail. The student will receive a request of intent, readmission form and readmission procedures. The student has 30 days to reply to the Office of Student Affairs with their intent to return to the College or officially withdraw. If a student intends to return, they must complete and return the Intent to Return Form within 30 days. They must also meet with the Assistant Dean of Student Affairs at least 30 days prior to the first day of class to review and sign a Readmission Contract. This contract outlines the courses that are required for the remainder of the student's educational career at CNUCDM.

If a student has withdrawn from the University, the student may reapply to the College. If accepted, the student may be required to return as a first year student.

Complaint and Grievance Policy

The following serves as a summary of the Complaint and Grievance Policy. To read the complete policy, [click here](#).

A grievance is defined as a matter not falling under the progression policy for academic or non-academic due-process. CNUCDM is committed to a policy of fair treatment of its students in their relationships with the administration, faculty, staff and fellow students.

Should a student wish to submit a complaint or grievance, the student should file a written complaint using the Student Complaint/Grievance Form.

The completed Student Complaint/Grievance Form may be submitted to any member of the CNUCDM Office of Student Affairs and Admissions in a sealed envelope.

The Assistant Dean of Student Affairs and Admissions will handle the complaint in accordance with the policies of CNUCDM, review the facts surrounding the issue, and address the complaint in a timely fashion.

A record of the student complaints is kept on file in the Assistant Dean of Student Affairs' office. All aspects of student complaints shall be treated as confidential.

Complaint and Grievance Form

The Complaint and Grievance Form can be found on CNUCDM's website or by [clicking here](#).

Copyrighted Material

The following serves as a summary of the Policy for Use of Copyrighted Material. To read the complete policy, [click here](#).

Students, faculty and staff may not act as distributors of copyrighted material to others, including the dissemination of copyrighted material by any means without written permission from the copyright holder.

Students may not act as distributors of copyrighted material to others, including the dissemination of copyrighted material by any means without written permission from the copyright holder. Students shall not transfer copyrighted material onto a computer for any use other than personal study. Some of the material provided to the student by CNUCDM via electronic means may be "printable" from student's personal computer for student's use only. Any charges of violation of the copyright policy will be brought before the Honor Council.

Credit Hours Assignment

For each course, the following credit hour assignments are used:

- 1 credit hour for every 15 lecture hours and 30 preparation/homework hours.
- 1 credit hour for every 25 workshop hours and 25 preparation/homework hours.
- 1 credit hour for every 30 laboratory hours and 30 preparation/homework hours.
- 1 credit hour for every week with scheduled at least 40 hours in an integrated curriculum, including (a) mixed methods of teaching [e.g., lecture, small group, TBL, PBL, flipped classroom, clinical skills, patient encounter, etc.] and (b) assigned self-preparation time.
- 1 credit hour for every week with assigned at least 36 clinical hours during clerkship or other clinical rotations.

Course syllabi are reviewed every semester by the Assistant Dean of Curriculum, in collaboration with the Curriculum Committee to ensure that course credits remain consistent with course content and course schedules have the appropriate amount of class time, including the appropriate amount of out-of-class (self-study or homework) time.

Disability Policy

The following serves as a summary of the [Disability Policy](#). Please refer to the CNUCDM website for the complete policy.

CNUCDM does not discriminate on the basis of a disability and is committed to self-directed learning by offering qualified students an equal opportunity to attain a Doctor of Dental Medicine degree. The College will make every effort toward meeting reasonable requests for accommodations to students with disabilities according to the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA).

Students with disabilities, whether a hidden or visible disability, who wish to seek special accommodations from the College must notify the Assistant Dean of Student Affairs or designee in writing before the beginning of the school year. If the disability develops during the school year and accommodations are requested, the student must notify the Assistant Dean of Student Affairs or designee in writing as soon as he/she becomes aware of the disability.

Student Responsibility

Students enrolled at CNUCDM are required to self-identify if they would like to request services on the basis of a disability. Students are required to meet with the Assistant Dean of Student Affairs or designee for an initial intake and are required to provide appropriate documentation of the disability. Students must provide documentation, at the student's expense, of the disability before the provision of services is reviewed.

Documentation

Both medical and functional elements of the disability must be explicitly documented. Documentation must be printed on appropriate letterhead and prepared by a qualified health care provider who has professional training and practice to diagnose and treat the impairment that led to the disability.

Recommendations for Accommodations

Once registered, the Assistant Dean of Student Affairs works collaboratively with the student and faculty to provide the best reasonable accommodations for the student to achieve academic success.

Infection and Environmental Hazards Exposure Control Policy

The following serves as a summary of the [Infection and Environmental Hazards Exposure Control Policy](#). Please refer to the CNUCDM website for the complete policy.

CNUCDM provides a safe and healthy workplace for all dental students, faculty, staff and volunteers by establishing, implementing, and maintaining an effective exposure control plan as required by the blood borne pathogens regulation in California Code of Regulations, Title 8 (8 CCR), Section 5193. Students will receive training appropriate to their current level of responsibility. Those with risk of exposure to pathogens receive training on the epidemiology, symptoms, and the prevention of transmission of pathogens.

Infection and Environmental Hazards Post-Exposure Policy

The following serves as a summary of the [Infection and Environmental Hazards Post-Exposure Policy](#). Please refer to the CNUCDM website for the complete policy.

At CNUCDM, safety training session on preventing needle stick injuries, handling sharps, proper scrubbing and research safety is mandatory prior to clinical clerkships and research assignments. Competency and compliance are reinforced at CNUCDM.

If a dental student experiences a biological or chemical occupational exposure at CNUCDM or while studying away, the student must follow CNUCDM Infection and Environmental Hazards Exposure Control Policy to properly contain, report, and seek medical evaluation and treatment for the exposure.

Any treatment needed post-exposure or for a clinical condition that develops as a result of the exposure or injury should be covered by the individual's health insurance policy.

If a student becomes disabled as the result of an occupational exposure or injury, CNUCDM Disability Policy provides coverage.

The students should be allowed to continue their educational activities without disruption if that is the professional recommendation from the clinicians who treat the students.

after exposure.

If the recommendation is to seek additional diagnosis and follow-up treatments, CNUCDM allows dental students to get excused absence to seek required additional medical care.

Non-Discrimination

CNUCDM is committed to cultivating a diverse community that recognizes and values inherent worth in individuals, fosters mutual respect, and encourages individual growth. The College believes that diversity enhances and enriches the quality of our academic program. CNUCDM provides equal opportunity in education and employment and does not discriminate on the basis of race, color, creed, religion, national origin, ethnicity, gender, age, sexual orientation, political affiliation, veteran status, or disability.

CNUCDM has a no tolerance policy for any type of sexual harassment including harassment or discrimination of LGBT students.

Equal Protection Clause and Due Process Clause

A transgender student's right to dress in accordance with his or her gender identity may be protected under the First Amendment and the Equal Protection and Due Process Clauses of the U.S. Constitution. The First Amendment limits the right of school officials to censor a student's speech or expression. Students also have a protected liberty interest (under the Due Process Clause) in their personal appearance. In addition, a transgender student also has a right under the Equal Protection Clause to be treated similarly to other students of the same gender identity.

Title IX

Title IX of the Education Amendment Acts of 1972 prohibits discrimination based on sex in education programs and activities receiving federal financial assistance. Although Title IX does not prohibit discrimination on the basis of sexual orientation, sexual harassment directed at an LGBT student is prohibited by Title IX if it is sufficiently severe and pervasive.

Title IX also prohibits gender-based harassment, including harassment on the basis of a student's failure to conform to stereotyped notions of masculinity and femininity. CNUCDM does not currently receive federal financial assistance but takes a proactive stance in the protection of all students. Any violations of the Title IX Education Amendment Act should be reported to the Assistant Dean of Student Affairs and Admissions.

Professionalism and Ethics Policy

The following serves as a summary of the [Ethics and Professionalism Policy](#). Please refer to the CNUCDM website.

CNUCDM is committed to guiding students as they seek to attain the highest standards of professional responsibility and adherence to ethical principles. Students are expected to display professional qualities including compassion, patient confidentiality, cultural sensitivity, academic integrity, adherence to relationship boundaries, honesty, and professional behavior at all times and in all places while engaged in educational or university activities.

Professional Meetings

A goal of CNUCDM is to graduate competent dentists who will improve health care to a diverse population through dental expertise. CNUCDM appreciates the value, and encourages the participation of all its students in professional organizations. The College recognizes that attendance at professional meetings is beneficial but may also interfere with the students' pursuit of academic excellence. Students desiring to attend professional meetings must obtain a written approval at least three weeks prior to the meeting from the Assistant Dean of Student Affairs and Admissions. Any student on academic probation will not be allowed to attend.

Scheduling Guidelines

D1 and D2 year students receive all University holidays as time off; D3 and D4 year student schedules will be determined in part by clerkship directors and preceptors in conjunction with scheduling policies at the individual clinical sites.

There should be a 10-minute break between classes. Class sessions two hours or longer should incorporate a 10-minute break for every hour of instruction.

No questions regarding content will be answered during exams.

Class and clinic hours are from 8 AM to 5 PM daily. Lunch will be 12:00 PM to 1:00 PM every day.

Sexual Harassment Policy

The following serves as a summary of the [Sexual Harassment Policy](#). Please refer to the CNUCDM website.

CNUCDM is committed to maintaining a positive learning, working and living environment. In pursuit of these goals, the college does not tolerate acts of sexual harassment or related retaliation against or by any employee or student.

Reporting Sexual Harassment

If you need to report sexual harassment, have any questions regarding sexual harassment, or the policy above please contact the Assistant Dean of Student Affairs. If the situation is an emergency please call the Elk Grove police by dialing 911. If at all possible, try to report the incident immediately.

Student Mistreatment

The following serves as a summary of the Student Mistreatment Policy. To read the complete policy, [click here](#).

CNUCDM is committed to assuring a safe and supportive learning environment that reflects the institution's values of professionalism, respect for individual rights, and appreciation of diversity, altruism, compassion, and integrity. Mistreatment of dental students is prohibited.

Examples of Mistreatment

CNUCDM defines mistreatment as behavior that is inconsistent with the values of the university and that unreasonably interferes with the learning process. When assessing behavior that might represent mistreatment, students are expected to consider the conditions, circumstances, and environment surrounding such behavior.

Examples of mistreatment include, but are not limited to:

- Verbally abusing, belittling, humiliating or bullying a student
- Intentionally singling out a student for arbitrary treatment that could be perceived as punitive rather than corrective
- Unwarranted exclusion from reasonable learning opportunities
- Assignment of duties as punishment rather than education

- Pressuring students to exceed established restrictions on work hours
- Exploitation of students in any manner, e.g. performing personal errands
- Directing students to perform an unreasonable number of non-educational "routine hospital procedures" on patients not assigned to them or where performing them interferes with a student's attendance at educational activities, e.g. rounds, teaching sessions, lectures, etc.
- Pressuring a student to perform dental procedures for which the student is insufficiently trained (i.e. putting a student in a role that compromises the care of patients)
- Threatening a lower or failing grade/evaluation to a student for inappropriate reasons
- Committing an act of physical abuse or violence of any kind, e.g. throwing objects, aggressive violation of personal space
- Making unwelcome sexual comments, jokes, or
- Taunting remarks about a person's protected status.

Reporting Concerns of Mistreatment

Dental students who themselves experience or observe other students experiencing possible mistreatment are encouraged first to discuss it with someone in a position to understand the context and address the necessary action(s). Such individuals include the student's College Master, the Assistant Dean of Student Affairs and Admissions, Clerkship Director, or Course Director.

The individual considering a formal report of mistreatment may attempt to resolve the matter directly with the alleged offender, although he/she is not required to do so.

The options for filing a formal mistreatment report include:

- File a formal report with the Vice President of Institutional Effectiveness and Assessment
- File an [Anonymous Report](#) on the CNUCDM website

Anonymous Reports filed on the CNUCDM website are sent to the Department of Student Affairs and Admissions.

Dental students desiring anonymity should be made aware that doing so may interfere with the university's ability to investigate the concern and their ability to receive information about the follow-up investigation.

No Retaliation

CNUCDM does not tolerate retaliation against individuals who report hateful, dishonest, illegal, unethical, unprofessional, or

otherwise inappropriate acts that constitute student mistreatment. Every effort is made to respond to concerns of mistreatment in a professional manner to minimize the risk of retaliation.

Individuals who believe they are experiencing retaliation are strongly encouraged to contact the Vice President for Institutional Effectiveness and Assessment. Alleged retaliation will be subject to investigation and may result in disciplinary action up to and including termination or expulsion.

Student Religious Observance Policy

The following serves as a summary of the Student Religious Observance Policy. To read the complete policy, [click here](#).

Students from various religious faiths are afforded the opportunity to participate in the major religious observances of that faith, when reasonable accommodations of such requests are possible. Such accommodations cannot be guaranteed in circumstances where granting the request would create an undue burden on faculty, negatively affect other students who are participating in the scheduled educational activity, or jeopardize patient care.

Requesting Accommodations

The student's request must be made in writing using the CNUCDM [Absence Request Form](#).

Students must notify the Course or Clerkship Director(s) by the end of the first week of the semester, or at least 2 weeks before the holiday to be observed, whichever comes first, of their request to be absent from class on their day(s) of religious observance.

Students who are excused from class, specific work assignments, clerkship duties, or other academic or educational activities for the purpose of observing a religious holiday will be responsible for the material covered in their absence and may be required to complete work in lieu of missed sessions, etc.

A plan for completing the missed academic or educational activity is to be decided upon by the student and the involved faculty member (typically Course Director or Clerkship Director) and determined in advance of the missed work. The student must obtain signatures for both plan approval and then upon completion of the make-up work. The form must be submitted the Office Student Affairs.

Requests for absences from clinical activities must comply

with the excused absences limitations for each clerkship or clinical rotation.

LIBRARY AND LEARNING RESOURCES

CNUCDM Learning Resource Center is available for students, faculty, and staff. This program includes an initial 5000 square feet of space devoted to the following resources:

- Library Facility and Collection
- Computer resources
- CNUCDM Electronic Library
- Classroom Resources
- Interlibrary Loan Program
- Career Resource Center

Facility

The library facility is a significant part of the CNUCDM Learning Resources Center. It houses the library collection and provides space for individual and group study.

The California Northstate University College of Dental Medicine's Library and Learning Resource Center is managed and operated by a combination of a full-time health sciences librarian and a library assistant.

The medical/dental librarian provides training and consultation to students and faculty on how to access effective information and efficiently use electronic resources. The medical/dental librarian holds an academic appointment on the faculty and participates in all faculty functions and meetings.

The medical/dental librarian works to update, maintain, and operate electronic systems in the resource center.

Library Resource Center Programs

The Library Resource Center provides both students and faculty with support as well as sufficient research references. At the beginning of each semester, a Resource Center Orientation session is scheduled to accommodate all interested students. The attendance is mandatory for all first semester students and optional for other students. During this orientation, the students are introduced to the learning resources available as well as to policies and procedures relevant to their usage.

Electronic Learning Resources

CNUCDM Resource Center maintains an Electronic Learning

Resources System. Its purpose is to provide library and learning resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Library Collection

The library subscribes to approximately 1,000 scholarly electronic journals.

Interlibrary Loan Program

With the large number of colleges and universities in the Northern California and across the United States, CNUCDM is developing affiliation agreements with the libraries at other institutions in order to facilitate interlibrary loans. Please see the medical/dental librarian for details.

SAFETY AND SECURITY

Security

The Director of Safety and Security in consultation with the Elk Grove Police Department and third party vendors, will provide an overview of campus security, emergency alert, and response procedures.

All students who have authorized access to CNUCDM campus are issued an electronic entry access card that permits certain entry. All access is tracked and monitored.

The Jeanne Cleary Disclosure of Campus Security Policy and Campus Crime Statistics Act (20 USC §1092(f)) is a federal law, originally known as the Campus Security Act, and it requires that University/Colleges and universities across the United States disclose information about crime on and around their campuses since 1990. All Title IV funding recipient University/Colleges and universities are subject to its requirements.

Although CNU is not a Title IV institution, CNU adheres to the Cleary Act principles for reporting regional crimes and addressing student protection issues.

Annual Security Report

Crime statistics for the campus, certain non-campus properties, and certain public property areas which have been reported to local police and campus security authorities must be disclosed for the most recent three calendar years. These reports are posted on our website at

The [CNU Annual Security Report](#) data regarding crime statistics for the immediate area surrounding the campus can be found on

CNUCDM's website.

An overview of campus security, emergency alert, and response procedures will be provided at orientation. Additional safety and security information, tips, and alerts will be delivered to students through campus email throughout the year.

Meagan's Law

For a listing of registered sex offenders in the adjacent community and other pertinent information, please review the law enforcement database at <http://meganslaw.ca.gov>

Weapons

California Northstate University prohibits the illegal manufacture, sale, transportation, possession, concealment, display, or use of any weapons of any description such as firearms, cutting instruments, explosives, incendiary devices, or other deadly weapons including air-powered devices on campus. California Penal Code 626.9 and 626.10 specifically prohibit the possession of firearms, including pellet and BB guns, on College property, without specific written permission. Violators of this policy are considered a threat to the academic community and are subject to immediate dismissal from the College and any pertinent state or federal criminal charges.

Vandalism

Any physical abuse, destruction or defacing of College property or to another's property or the diminishing of its material or aesthetic value is prohibited.

Theft

Any attempted or actual theft of property of the College, of a member of the campus community or campus visitor, violates the campus honor code and state law and will be dealt with accordingly. The institution has a responsibility to report crimes to local authorities. Perpetrators are therefore subject to state and federal criminal charges and sanctions which may include fines and imprisonment.

Building Access Hours

Student identification cards are programmed with an electronic key access code. The card provides access to the building as well as some of the interior classroom and other spaces designated for student use. Student card entry is logged and entry information is monitored by the University. Professional behavior dictates respect of equipment, furnishings, and building access by all dental students. Any student who does not exhibit professional behavior in regards to building access,

including destroying property, allowing unauthorized person's access to the building, or compromising building security, is subject to disciplinary procedures.

The campus building hours are posted prior to each semester and the hours may be extended to accommodate student study needs prior to summative final exam week. This request can be made to the Office of Student Affairs and Admissions at least 2 weeks in advance.

Campus Parking

The College currently charges no fee for parking on campus. Students must not park in spaces marked Visitor or Faculty. Parking designated as Carpool is reserved for vehicles that carpool with two or more persons. Students must comply with any signs regarding parking that have been posted. Vehicles that are illegally parked are towed at the owner's expense.

Bicycles

Bicycles may not be brought into the classroom or buildings. It is recommended that bicycles be locked securely to prevent theft. Bicycles should be secured in designated areas or in bike lockers provided in designated areas. Bicycles should not be secured in areas that would interfere with pedestrian or vehicular traffic. It is also recommended that students keep information about the bicycle with their records in the event of theft, which would include: make, model, color and serial number.

Animals on Campus

Pets should not be brought on campus and may not be brought into University buildings. Service animals (which include guide dogs, signal dogs or other animals) individually trained to do work or perform tasks for the benefit of another individual with a disability are permitted to be on campus but must be on a leash or guide rail at all times.

Housing

California Northstate University College of Dental Medicine (CNUCDM) does not provide housing to students. In the immediate vicinity, there are several fairly-priced apartment units which students may find adequate. The area surrounding the campus is very safe and nearby apartment complexes are highly rated within the Sacramento Region.

Visitors

Visitors are allowed to visit a student in the common area of the building entrance. For further access, prior permission must be obtained through the Office of Student Affairs and Admissions.

No visitors are allowed in the classroom or laboratory without prior authorization from the Office of Student Affairs and Admissions and the faculty member conducting the lecture/laboratory exercise. No visitors are allowed in the gross anatomy laboratory unless authorized by the Director of Gross Anatomy.

Visitors are prohibited from visiting clinical sites.

Students are responsible for any misconduct of their guests.

GRADING AND EXAMS

Utilizing a competency based grading system, all students must reach a threshold for clinical competency in knowledge and skill set at 75%. Structured remediation activities for each didactic course will ensure a higher level of knowledge for the cohort of students earning a Y, 60-75%. Students earning below 60% receive an F requiring repeat of the course or further academic action. Students earning 90%-95% will earn a grade of Honors and students earning 96-100% will earn Highest Honors.

Clinical courses will be graded Pass/Fail with the opportunity to earn EPR's (exceptional performance reviews) that can be offered to up to 1/3 of enrollees to each course director at the conclusion of each term. EPR's will be recorded numerically in each transcript according to the course in which they were earned. EPR's are based upon patient-centered care and patient outcomes as well as application of the program learning outcomes. Each clinical course will develop defined rubrics for the achievement of EPRs.

Class rank will be based upon the students' performance in LAL, SIM and LAB courses for 60% of the class rank value and by rank based upon clinics EPRs for 40% of class rank value.

LAL, SIM AND LAB GRADING

HH	PASS WITH HIGHEST HONORS (96-100%)
H	pass with honors (90-95%)
P	pass (75-89%)
y	no pass, requires remediation (60-74%) to earn P (Y is temporary grade)
F	fail (less than 60%)
I	Incomplete, course work at satisfactory quality but assignments completion delayed by circumstance (temporary grade)

IP In progress grade given for multiple semester courses where final grade given in subsequent semester

W Official withdrawal

CLIN grading

P Clinical care demonstrates knowledge and skills and values commensurate with achieving the defined competencies of the curriculum. Clinical course outcomes will be linked to both Program learning outcomes and CODA defined clinical competencies through Competency Evaluations (CEs). Passing of CEs integrated into a clinical course is required for a P in the course.

Y No pass, requires remediation to earn a P (Y is temporary grade)

EPRs Exceptional performance reviews based upon rubrics defined by the program learning outcomes as accommodated in the clinical course

End-of-Course Evaluations

Class grade for a course will not be released by the Course Director until at least 90% of students enrolled in the course have completed the end-of-course evaluation. End-of-course evaluations will be scheduled for the last Friday of instruction, and it is expected that a minimum of 90% of enrolled students will complete the evaluation.

Narrative

Where possible (e.g. small group activities), all grades should be accompanied by a narrative.

Grade Appeal Policy

The following serves as a summary of the [Grade Appeal Policy](#). Please refer to the general catalog on page 36.

The purpose of this policy is to provide an academic system for the students at CNUCDM to contest alleged academic injustice relating to a final course grade, clerkship grade or evaluation of a professional activity.

Change to the final grade will occur only when there is evidence of arbitrary or incorrect academic evaluation. In some cases, however, the grade process involves the faculty member's judgment of student academic performance.

The grade appeal process requires a student to present clear evidence that the assignment of a grade was based on factors other than the academic judgment of the faculty member. Grade appeals must be based on problems of process and not on difference in judgement or opinion concerning academic performance. The students take responsibility to demonstrate that one or more of the following occurred:

- The student believes that the grade was based on prejudice, discrimination, arbitrary or other reasons not related to academic performance.
- The grading decision was based upon standards unreasonably different from those which are applied to other students in the same course.
- Mathematical/ clerical error

A student can file an appeal if s/he is unsatisfied with a final course grade. The appeal must be submitted within ten (10) CNU work days of the official notification of the grade. The student must follow the formal grade appeal process by initially presenting the appeal to the course director in writing.

GRADUATION

Graduation Requirements:

- A. Maximum of six years to complete the DMD is allowed without extenuating circumstances based upon the competency assessment model of clinical education
- B. Students must complete a minimum of 240 credit hours in the dental program, including all didactic, laboratory and clinical experiential courses and successful completion of all competency assessments.
- C. Students must pass the NBDE integrated format examination or traditional step 1 and 2 examinations (in phase out from 2021-2024)
- D. Students are not required to pass the state sanctioned licensing examination as this is based upon residency and career plans.
- E. Failure to meet these requirements will result in review by the Academic Review/Promotion and Graduation Committee.
- F. Students must attain the knowledge and skills, and develop capacity and behaviors required of a dentist.
- G. Students must attain a level of clinical judgment which warrants entrustment by the Faculty as required for entry to residency or practice.
- H. Students must demonstrate a sense of responsibility and social accountability to patients and the community.
- I. Students must comply with the School's standards of conduct, professionalism, and academic integrity.
- J. Students must comply with the laws of the United States; the laws of the State of California; local city, county, and municipal ordinances; the policies, rules and regulations of the California Northstate University and the CDM.
- K. All academic requirements must be completed at least 10 days before the date of graduation. Failure to comply may lead to delayed graduation.
- L. Only students in good academic standing are eligible for graduation. Students must have satisfied all conditions for resolution of probation before graduation.

Exit Interviews

Exit interviews will be conducted during the last academic year. The College of Dental Medicine does not issue grades, grant degrees or furnish academic transcripts until all financial obligations have been met and all University property has been returned.

Licensure

Acceptance to CNUCDM does not guarantee dental licensure in any jurisdiction. Successful completion of the College of Dental Medicine program meets the academic requirements for dental licensure in the State of California and in all states and jurisdictions for which graduation from a CODA accepted program are required.

Commencement

Every student is strongly encouraged to attend commencement and required to wear traditional academic regalia consisting of cap, gown, and academic hood. Hoods are conferred upon the graduates at commencement by faculty. The hood is lined with the California Northstate University colors of blue and gold and the velvet is adorned with Violet, denoting Doctor of Dental Medicine.

11% of the class out of the top 20% of the class is eligible for admission to OKU (omicron kappa upsilon) the academic honorary organization for dental medicine. The CNU chapter will submit those names to the Academic Review/Promotion and Graduation Committee and a hood shawl denoting admission to OKU will be worn by recipients.

Any ornamentation must signify recognized College organizations and must be approved in advance of commencement by the Assistant Dean of Student Affairs.

STUDENT RECORDS (REGISTRAR)

Office of the Registrar

The Registrar retains official enrollment, registration, and academic information for students and alumni. Downloadable request forms related to academic transcripts, enrollment/degree verifications, contact and personal information changes, grade changes, duplicate diploma requests, FERPA release authorization, emergency contact updates, leave of absences, and college withdrawals are available from the Office of the Registrar website.

Students are strongly encouraged to become familiar with the Office of the Registrar website.

Contact Information

Office of the Registrar
9700 West Taron Drive
Elk Grove, CA 95757

(P) 916-686-7400

Email: CNRegistrar@cnsu.edu

Website: <http://www.cnsu.edu/office-of-the-registrar/>

The main office is located on the second floor of the Elk Grove campus. A Registrar Office staff member is available on the Rancho Cordova campus on various days during the week during normal business hours. Please contact the Office for specific availability dates or to make an appointment.

Student Records

The academic transcript is a permanent student record maintained by the Office of the Registrar. Other student records as prescribed by California Code of Regulations 71920, are maintained by the institution for a minimum of five years from completion of or withdrawal from the CNU academic program. For assistance in accessing a record, please contact the Office of the Registrar or the department responsible for maintaining the record. Access to student records are governed by the Family Education Rights and Privacy Act of 1974 (FERPA). Please see the Directory Information and Access to Student Records section of this handbook or contact the Registrar for more information

CAMS Student Portal

Some records can be reviewed and updated online through the CAMS Student Portal.

The Portal allows the student to:

- Update contact information
- View official grades, print unofficial transcripts, and review course narratives
- Register for classes
- View course schedules
- Track submitted documents

To access the Student Portal: <http://www.cnsu.edu/office-of-the-registrar/student-portal>. Be sure to use either Internet Explorer, Firefox, Mozilla, or Safari. You must allow pop-ups in your browser so using Chrome will cause issues in using the Portal.

Students access the Student Portal with unique credentials provided by the CNU IT department prior to matriculation to the college. If you do not know your password, you can reset your

password from the log-in screen. If you do not know your username, contact CAMSSupport@cnsu.edu and IT staff will assist you.

A PDF users guide is available on the website. Technical issues related to CAMS Student Portal should be directed to:

CAMSSUPPORT@cnsu.edu.

Please note that the Student Portal is different than and is not related to Canvas. Canvas is the learning management system (LMS) used by CNU. Grades displayed in Canvas are not official. Students use Canvas to participate in courses. Questions regarding Canvas should be directed to CNU IT department.

Viewing Letter and Narrative Grades in the Student Portal

First, log into the Student Portal using either Internet Explorer or Firefox/Mozilla. Please do not use Chrome as you must allow pop-ups within your browser.

1. Log into the correct term/semester (e.g. COM M1 FA 18, COM M2 SP 18, etc.)

If you need to change semesters once logged in, click Change next to the current term in the upper left hand corner under your name.

Current term: COM M1 FA 18 (Change)

2. You will work in these two areas to access your grades:

a. Narrative Grades, Under My Grades> click Letter Grades> Grade Type = Narrative Grades. Your narrative grades for the term selected will be displayed. At this time you can only view your narrative grades by term.

b. Letter Grades: Under My Grades>click Letter Grades>Grade Type = Final Grades. Your final grades for the term selected will be displayed.

c. View your unofficial transcript without narratives: Go to My Transcript> click Letter Transcript.

For a printer-friendly version of your unofficial transcript click the printer icon in the top left corner of the transcript page.

Note: If you require a printed transcript that includes your letter and narrative grades, please submit the [CNU Transcript Request form](#) to the Office of the Registrar.

Changes or Corrections to Personal Information

Students are responsible for immediately report any change in their personal information (e.g. name, address, telephone number, etc.) to the Office of the Registrar. CNU will not be held responsible for any mail sent to the wrong address due to an incorrect address on file. The postage cost for remailing may be at the expense of the student.

Corrections to date of birth, social security number, and sex/gender require submission of the Change of Personal Information form and supporting legal documentation to the Office of the Registrar.

The request form is available [online](#).

Legal Name Change Request

Official CNU records and academic transcripts must reflect the student's name as it appears on government issued photo identification, such as a driver's license or U.S. Passport.

A student may request an official name change for school documents and records by submitting the following information to the Office of the Registrar:

1. A completed Change of Personal Information request form the Office of the Registrar's Service and Forms web page.
2. Government-issued photo ID showing new legal name
3. Acceptable proof of name change (marriage certificate or court order)
4. Current student identification card

Once the information has been verified and approved all official school documentation will be updated. The Registrar will then forward the name change to the following departments:

1. Business Office
2. Experiential Education
3. Financial Aid Office
4. Library - All library resources
5. OSAA
6. IT Department – The LMS (Canvas), new student identification badge, new email address
7. Student Records - Official Academic file, Student roster,

academic advisor

The request form is available [online](#).

Change of Address

Current students should update their address, phone number and email through the Student Portal or by submission of the Change of Address Request form. Former students must submit the request form to update their contact information. The request form is available on the Office of the Registrar website and in the forms display near the Office.

Submitted forms typically take 5 to 7 business days to process. Updates submitted through the Student Portal are reflected immediately, but may take 5-7 business days to be reflected in all University systems. This change will not update your W-9. To update the address on your W-9 you must submit a new W-9 to the Business Office.

Enrollment and Degree Verifications; Letter of Good Standing

The Office of the Registrar provides confirmation of student enrollment status to financial institutions, organizations, or agencies in writing at the student's request. Students may request proof of enrollment or degree by completing an **Enrollment, Degree, & Good Standing Verification Request** form located on the Office of the Registrar's web page.

The student must complete the form and submit it to the Registrar. Complete requests are typically processed within 5 business days. Verification letters are printed on official letterhead and include the Registrar's signature as well as the University seal. Requests are typically processed within 5 business days.

Information about verifications and the request form are available [online](#).

Transcript Requests

A student's academic transcript is a permanent record.

Unofficial transcripts can be viewed online through the Student Portal or ordered free-of-charge using the Transcript Request form.

All delinquent financial and business obligations with the University must be cleared before transcripts are released. The University will withhold official transcripts if the University has knowledge that the student has any default on loans or service obligations.

Students and former students may request an official transcript through the Office of the Registrar by:

1. Submission of Transcript Request Form

The Transcript Request form is available on the Office of the Registrar website and in the display case outside of the Office. The ordering fee is posted on the order form and payment is due at time of order submission.

Complete requests are typically processed within five business days.

2. Order Online

Order Online: www.parchment.com

Official transcripts may be ordered through Parchment's online record ordering service. Credit card is required and additional service fees are applicable.

Ordering instructions and request form are available at: <https://www.cnsu.edu/office-of-the-registrar/registrar-request-a-transcript>.

Application for Graduation

Students applying for graduation must meet all academic and financial requirements prior to submitting the Petition to Graduate. Students who have completed all the requirements to graduate are required to submit the Petition to Graduate to the Office of the Registrar for processing prior to the graduation application deadline. The Petition to Graduate form is available on the Office of the Registrar Services and Forms web page.

Application Deadline for Conferment of Degree:

Graduation Application	Filing Period
Spring 1	Feb 1 through April

Diplomas

The Office of the Registrar oversees the release of CNU diplomas. The student's degree must be awarded and posted to the Official Transcript before a diploma can be sent. Diplomas will include any applicable CNU honors (cum laude, magna cum laude, and summa cum laude).

Students must complete and submit the Graduation Clearance Form before their diploma will be mailed. The Clearance Form verifies that the student has no outstanding balances or University requirements. A diploma will not be provided until all student account requirements are met.

Diplomas are typically mailed first class to the permanent address

listed on the Petition to Graduate approximately 6-8 weeks following graduation/degree conferral for students who have met all clearance requirements. CNU uses a third-party vendor to print and mail all diplomas. CNU is not responsible for lost, stolen, or returned diplomas.

Diplomas returned to the school as undeliverable will be held for five (5) years. Repeat shipping is at the cost of the student.

Duplicate Diplomas

A student may request a duplicate diploma that has been lost or damaged by completing a Duplicate Diploma Request Form and submitting the form to the Office of the Registrar. The fee for a duplicate diploma is posted on the form and must be paid at the time it is submitted. When possible, the original diploma must be returned to the Office of Registrar. The request for a duplicate diploma is kept in the student's file.

Diplomas will be mailed first class to the address indicated on the Duplicate Diploma Request Form. Diplomas and official transcripts will not be released if there is a financial hold. CNU is not responsible for lost, stolen, or returned diplomas.

In the event that your diploma is lost or stolen and degree verification is needed, please submit the Enrollment and Degree Verification Request form.

Directory Information and Access to Student Records

Student Rights Under FERPA

The Family Educational Rights and Privacy Act (FERPA) afford eligible students certain rights with respect to their education records. An "eligible student" is a student who is 18 years of age or older or who attends a postsecondary institution. These rights include:

1. The right to inspect and review the student's education records within 45 days after the day California Northstate University receives a request for access. A student should submit to the Registrar a written request that identifies the record(s) the student wishes to inspect. The registrar will make arrangements for access and notify the student of the time and place where the records may be inspected.
2. The right to request the amendment of the student's education records that the student believes is

inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.

3. A student who wishes to ask the school to amend a record should write the Registrar, clearly identify the part of the record the student wants changed, and specify why it should be changed.
4. If the school decides not to amend the record as requested, the school will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
5. The right to provide written consent before the university discloses personally identifiable information (PII) from the student's education records, except to the extent that FERPA authorizes disclosure without consent.
6. The school discloses education records without a student's prior written request under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the California Northstate University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person serving on the board of trustees; or a student serving on an official committee, such as a disciplinary or grievance committee. A school official also may include a volunteer or contractor outside of California Northstate University who performs an institutional service or function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of PII from education records, such as an attorney, auditor, or collection agent or a student volunteering to assist another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for California Northstate University.

7. The right to file a complaint with the U.S. Department of Education concerning alleged failures by California Northstate University to comply with the requirements of FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901

Institutional Student Procedures for FERPA

FERPA does not cover employment, medical or police records, confidential letters of recommendation if the student has waived the right to review them, professors or administrator's personal records for their own use about students, parent's financial records, and other FERPA excluded records.

Additional information regarding FERPA can be viewed [online](#).

Student Directory Information Disclosure and Access

California Northstate University reserves the right to disclose certain directory information. Personally identifiable information such as student directory information (student name, address, telephone number, email address, field of study, cohort classification, enrollment status, dates of University attendance, club and/or organization memberships, degrees, honors and awards received, photograph, and the most recent educational agency or institution attended) is considered public information and may be disclosed by the University without prior written consent. The student may request that directory information be withheld from sources outside the University, excluding law enforcement, or within the University to anyone who does not have a need to know status.

Parents have no inherent rights to inspect their child's educational records after age 18. Students requesting that directory information not be disclosed should must submit the Directory Opt-Out Request Form to the Registrar before the last day to add a class in a semester.

The University is not responsible for inadvertent release of directory information.

Upon placement at a clinical rotation site, the student's University email address and name will be given to the company in which they are placed.

Annual Disclosure and Record Access Students receive an annual FERPA notification from the Office of the Registrar prior to or following the start of each Fall semester. The FERPA notice will be sent to all CNU student email addresses in addition to being posted in the following locations: student information boards, inside and outside the Office of the Registrar, and [online](#).

Course Registration; Deadlines

Registration is conducted by the Registrar prior to the start of each semester for new and continuing students. Students with business, financial, or other registration holds on their account will not be registered until the Registrar is notified that the hold has been cleared. Students who are in compliance with institutional requirements, including but not limited to health insurance and/or immunization documentation, or who have a registration hold on their student account at the time of registration are required to satisfy the requirement and may also be required to submit the Course Add/Drop form by the end of the Add/Drop period to register or make schedule changes. A student should not be attending class for which he or she is not registered. Course registration can be viewed through the Student Portal.

The Registrar performs block registration for all Phase A students (D1 & D2). D3 and D4 rotation placement is provided to the Registrar by the CDM experiential department.

Students are encouraged to review their semester registrations through the Student Portal on a regular basis to ensure accuracy. At minimum, students should check their Portal at the beginning of the semester, after any requested course/rotation changes; and shortly before the end of the course and/or semester.

Elective Course Registration

Students who meet the course prerequisites may register for elective courses each semester. Instructions for elective course registration are emailed.

Course Add/Drop Deadline

The COM course add/drop deadline is the fifth business day of the course, or by 5:00 p.m. the day after the 2nd class meeting, whichever is later. To make schedule changes, the Course Add/Drop request form must be submitted to the Office of the Registrar for processing. The form is available from the [Registrar's Website](#), and paper copies are available from the form display outside of the Registrar's Office.

College Withdrawal

Cancellation shall occur when you give written notice of cancellation to the Admission Office at the College's address

shown at the top of the first page of the Enrollment Agreement prior to 12:01am on the second day of instruction of the semester. After the cancellation period, a college withdrawal shall occur when you give written notice of withdrawal. Please submit the Official College withdrawal form to the Registrar at the College's address shown at the top of the first page of the Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of cancellation or withdrawal sent by hand delivery, email, or facsimile is effective when received by the College, provided that such receipt can be verified. Written notice of cancellation or withdrawal sent by mail is effective when deposited in the mail properly addressed with postage prepaid. The written notice of cancellation or withdrawal need not take any particular form and, however expressed, is effective if it shows that you no longer wish to be bound by the Enrollment Agreement in the case of a cancellation, or that you wish to withdraw from the College in the case of a withdrawal.

STUDENT GOVERNMENT AND INTEREST GROUPS

Students have representation on a number of committees and councils at California Northstate University College of Dental Medicine (CNUCDM) and are encouraged to develop leadership skills by serving on a College committee or council. The Assistant Dean of Student Affairs requests nominations of students desiring to serve on CNUCDM committees or councils.

Student Government

The Student Government establishes bylaws for governing its operations. The Assistant Dean of Student Affairs serves as a faculty advisor to the Student Government. Within their capacity as representatives of the student body, student government may fulfill a range of responsibilities, such as:

- Class officers are dedicated to promoting class unity and school spirit through class-based programming
- Representing the interests and concerns of the student body and serving on college-wide committees
- Sponsoring college-wide programs (professional development, speakers, workshops, etc.)
- Chartering and regulating student organizations.
- Participating in hearings of the honor council

Student Interest Groups

Students have the freedom to organize and join professional organizations that promote and advance the profession of

dental medicine and further the goals of the College. The Assistant Dean of Student Affairs provides guidance to students seeking to develop new professional organizations as well as re-registering of existing organizations at CNUCDM.

All organizations must register with the Office of Student Affairs, Admissions and Outreach to be recognized by CNUCDM. [CNUCDM's Student Organization Policy and Procedure Manual](#) is available through the Office of Student Affairs that provides policy and suggestions for starting an organization. [Click here](#) to be directed to the registration application.

Registration Procedures

Professional Student Organizations must meet the following requirements to attain registered status:

- Membership must be open to all CNUCDM students regardless of race, color, ethnicity, national origin, age, gender, political affiliation, religion, creed, sexual orientation, veteran status, or disability.
- The professional organization must not associate with any local, state or national organizations which require its members to support positions contrary to CNUCDM policies.
- A copy of the current constitution and bylaws that govern the professional organization must be on file with the Assistant Dean of Student Affairs. If the professional organization is associated with any local, state or national organizations, a current copy of their constitution and bylaws must be on file with the Assistant Dean of Student Affairs.
- The professional organization must have a faculty advisor.
- Student professional organizations must have a minimum of five (5) members, including two (2) officers.
- Student officers must be in good academic standing.
- Meeting dates and events should be reported to the Assistant Dean of Student Affairs and placed on the professional affairs yearly calendar.
- Officers or designated representatives from all professional student organizations are required to attend an organization orientation at the beginning of the fall semester.

Responsibilities

All registered professional student organizations must act within the context of College policies, the organization's bylaws, and conduct operations in a fiscally sound manner. It is the

responsibility of each organization, its officers and members to abide by all policies and procedures in the Student Organization Policy & Procedure Manual.

Student Officers and the group's advisor are responsible for submitting any forms or other required paperwork required by the policies and procures outlined in the manual.

Rights and Privileges

Professional student organizations may use the College facilities for meeting or events. Request for reservations of facilities must be made to the Office of Student Affairs and Admissions within seven (7) days of the scheduled meeting or event. Forms are located online. Completed forms should be returned to the Office of Student Affairs, Admissions and Outreach.

Recognized student organizations may use the College name, address, and insignia in organization correspondence and outreach. Use of the University or College insignia must comply with the Use Guide for the University or College insignia.

Loss of Recognition

Any professional dental organization may be instructed to cease and desist for not abiding by California Northstate University College of Medicine (CNUCDM), local, state or national policies.

Any organization that has lost its recognition may not engage in any College event or activity nor use the college name, insignia or other College assets.

Professional organizations alleged to have violated any College or organization policy will go before the Honor Council.

Professional Student Organizations

[American Dental Association - California Dental Association Student Section](#)

The American Dental Association (ADA) is the principle organization representing dentistry and oral health in the United States. The California Dental Association is a component society for which there is vertical membership in the ADA.

Every dental student should inaugurate a lifelong commitment to organized dentistry and join the student section of the CDA and ADA.

[American Student Dental Association \(ASDA\)](#)

The American Student Dental Association is an organization that advocates for students needs in legislation, advocacy and

camaraderie. It is the voice of dental students in policies ranging from student debt, to licensure issues.

American Dental Education Association (ADEA)

Student chapters of ADEA promote future dental educators through engagement with dental faculty nationally and regionally and provide a voice for students to influence dental education.

Student National Dental Association (SNDA)

The Student National Dental Association is focused on supporting minority students who are preparing to enter the field of dentistry. SNDA provides opportunities for camaraderie, efforts to diversify the oral health workforce, and mentorship.

Hispanic Dental Association Student Chapters

The Hispanic Dental Association and its student chapters have the goal of addressing oral health disparities in Hispanic communities, while providing opportunities for mentorship and camaraderie among its members.

STUDENT HEALTH AND WELLNESS

Student Wellness Program

CNUCDM recognizes the intense nature of the dental school curriculum and the importance of ensuring that students adjust to the demands of the dental school environment. It is not uncommon for dental students to experience fatigue, low mood, sleeplessness, anxiety, etc. Therefore, it is important that the skills, knowledge and attitudes necessary for a long term successful work-life balance have their foundation in the student's dental school years. More importantly, it is imperative for a student to understand when he or she needs help and where to turn for that assistance.

The Student Wellness Program is designed to support the well-being of students as they progress through their dental education and into their professional careers. By integrating wellness programming into various aspects of the curriculum, sustaining a student-led wellness committee, and promoting on-campus activities, the wellness program aims to facilitate a positive sense of individual well-being physically, mentally, emotionally, and socially.

Office of Student Affairs

The Office of Student Affairs and Admissions functions to

provide individual counseling to students if they have issues and concerns of a personal nature. That office has professional staff that will be able to assist students in determining the type of support or resource that they should access. The Assistant Dean of Student Affairs and the staff involved who deal with these types of issues do not have a role in assessing academic performance.

Personal Counseling

To assist students at times of need, the College of Dental Medicine has on-site licensed mental health providers. Neither provider teaches in classes nor has any evaluative academic role in the student's curriculum.

All discussions shared with the counselors are confidential and will not be shared with anyone else at the school or outside of the school without the student's expressed, written permission. Nothing disclosed to the counselors will appear in any student records.

CNUCDM's counselors are prepared to discuss with students any topics including, but not limited to: school stress, anxiety, time management, relational stress, depression, suicidal thoughts, creating positive coping strategies, life transition issues, and substance use concerns.

Students should feel free to come in with any concerns and the providers are available for one-time meetings or ongoing therapy. No concern is too small or too big.

Students are encouraged to make appointments ahead of time to ensure that one of the counselors is available to talk. However, students are also welcome to drop in to see if either counselor is available.

Contacting the Counselors

Counseling Office – 2525 West
Taron Court, Suite 100
(916) 686-8549

Katelyn Shields: Katelyn.shields@cnsu.edu

Student Wellness Committee

The Student Affairs and Wellness Committee, more commonly known as the Wellness Committee, in the College of Dental Medicine is comprised of faculty, staff, and students who all have diverse passions for engaging in and supporting student wellness. It liaises with the wellness committees of the other professional schools of CNU. The committee meets on the second Tuesday of every month and encourages input from all students, staff, and faculty members to help enhance the well-being of

students throughout their dental school journey and beyond.

The Wellness Committee is open to student members, seven faculty members, and three staff members. Student members serve on student-created and student-led subcommittees. The following are planned as initial committees for CDM:

- Arts and Music
- New Student Outreach
- Nutrition
- Outdoor Activities
- Service and Community Outreach
- Resiliency

The Wellness Committee hosts weekly, monthly, and annual events for CNUCDM students, staff, and faculty to participate in to learn more about how to support their own wellness and practice self-care.

Peer Mentoring

First year students will be assigned a peer who is an upperclassman in academic good standing. The purpose of this program is to provide first-year students with the opportunity to work with an upperclassman that has a firm understanding of the curriculum and the requisite skills for its successful navigation.

Faculty

One of the key features of CNUCDM is that faculty have a close professional relationship with students and an open door policy. A student may seek out a faculty member or their College Master for counsel regarding personal or academic issues. The student's College Master will be well versed in resources to which the student can be referred.

Stress and Fatigue Management

The following serves as a summary of the Stress and Fatigue Management Policy. To read the complete policy, [click here](#).

Responsibility of the Supervising Faculty – Classroom

In the classroom setting, if a faculty recognizes a student is demonstrating evidence for excess fatigue and/or stress, the faculty should notify the student's College Master, who, in turn, should discuss the possible reasons and opportunities for support.

The College Master may recommend that the student meets with the Director of Student Affairs and Admissions for identifying available support.

Responsibility of the Supervising Faculty – Clinical Setting

If a student in a clinical setting demonstrates evidence of excessive fatigue and/or stress, faculty supervising the student should immediately release the student from further clinical duties and responsibilities.

If the student exhibits signs of excessive fatigue, the supervising faculty should advise the student to rest for at least a 30-minute period before operating a motorized vehicle. The student may also call someone to provide transportation back home.

A student who is released from further clinical duties due to stress or fatigue cannot resume clinical duties without permission by the Clerkship Director.

Student Responsibility

Students who perceive they are manifesting excess fatigue and/or stress have the professional responsibility to immediately notify their attending faculty and Clerkship Director without fear of appraisal.

Students who recognize a peer student exhibiting excess fatigue and/or stress must immediately report their observations and concerns to the attending/presenting faculty and the Clerkship Director.

Clerkship Director Responsibility

Upon removal of a student from duties, the Clerkship Director must determine the need for immediate change in duty assignments for peer students in the clerkship and/or the clinical site.

The Clerkship Director will notify the departmental chair to discuss methods to manage fatigue and stress.

Healthcare Insurance Requirement

It is mandatory for students to have medical insurance while enrolled in the program. Registration for classes is not authorized until a student provides proof of insurance and coverage. CNUCDM has obtained a Student Health Insurance Policy through Western Health Advantage. The fee for this policy is paid directly to the school and is billed on a bi-annual basis. This allows students to have continuous health coverage throughout the year including break periods. Students requiring medical care would need to access the appropriate providers available through their insurance option. Students may use their parent's or spouses insurance, by providing proof of coverage.

Drug Test Requirements

Drug testing is required prior to matriculation and again prior

the start of the D3 year. Clinical Clerkship site partners who are accredited or seeking accreditation from The Joint Commission are required to screen students according to the same standards as employees.

Students must pass all drug test requirements prior to D3 clerkship placement.

Drug Testing

The testing may include a urine toxicology screening, a blood panel screening, or other screenings and tests mandated by the hospital or clinic.

Students must pass all drug tests or screenings.

If a student tests positive, they have 10 days to meet with a Medical Review Officer (MRO) to see if the positive test is due to legal medication that the student is taking. If so, the MRO clears the student as negative.

A Medical Review Officer is a physician named by the Associate Dean of Academic Affairs to review medical issues and reports related to students.

The school uses a 10 panel drug test. If a student tests positive for any illegal substances, and is not cleared by the MRO, the student may be required to make adjustments to his/her academic program. If a student consistently tests positive for illegal substances and is unable to meet the requirements of the Program, they may be dismissed from the College.

On campus screening for all students is generally held prior to the semester of the scheduled hospital or clinic rotation.

Vaccination Requirements

Students are required to present proof of vaccinations before registration. Documentation of required immunizations must be completed by a licensed healthcare provider. A health care provider is a physician licensed to practice (MD or DO), a Licensed Nurse, or a Public Health Official. Forms for documenting immunization requirements are provided in the acceptance packet sent to the student. All immunization forms and copies of laboratory reports must be submitted in English.

Students that are allergic to some vaccines will need to provide medical evidence of that condition. They will then be required to adhere to a very strict protection regimen as required by the clerkships.

Equivocal antibody titers are not considered sufficient to protect from infection and a complete vaccine series will be administered as recommended by the CDC-ACIP.

Alcohol or Chemical Dependence or Impairment

The following serves as a summary of the [Alcohol or Chemical Dependence Policy](#). The full policy can be found on page 164.

CNUCDM is a drug-free academic environment consistent with federal and state laws. Any person within the College community may be disciplined for violation of these policies and may be tested for suspected use of an illegal drug.

The possession, use, consumption, manufacturing, or distribution of any form of illegal substance, or alcohol is prohibited on the College campus as well as any off-site location while the student is involved in academic learning experiences.

Any student who is under the influence of alcohol or drugs during class or clinical experiences is subject to immediate counsel and possible diversion into a therapeutic recovery system. Those who fail to participate or fail to follow through with treatment guidelines are subject to immediate removal from the setting and dismissal from the University.

TUITION AND FEE, FINANCIAL AID, AND SCHOLARSHIPS

Tuition and Fees

Information on tuition, fees, charges and expenses will be updated each year and posted on the website. Please see this resource for further information.

Tuition and fees may increase on an annual basis. This program is designed to allow a student to graduate after successfully completing four (4) years of coursework consisting of 226 semester credit hours while attending the College on a full-time basis. All fees are therefore charged on an annual basis, with no proration available for part-time study based on the number of units taken or based on any other method of calculation. Tuition and fees for remediating or repeating a course or courses as the result of a failing grade in the course, including when an additional year is required for this purpose, are described in the College Catalog.

The Student Tuition Recovery Fund (STRF) amount is based on the Regulations in effect on May 11, 2011.

Payment Due Dates and Options

All tuition and fees described on the first page of the Student Enrollment Agreement are due in full in accord with the schedule "Total Charges You Are Obligated to Pay upon Enrollment and Required Scheduled Payment Dates" set forth on the last page of the Enrollment Agreement. As an alternative to payment in cash, the student may (1) provide satisfactory written creditor approved loan documentation to the College, or (2) apply for one of the installment payment plans offered by the College, either of which the College may within its complete discretion accept as an alternative to cash payment for the above tuition and fees, excluding the enrollment confirmation fee and the student health insurance fee. If either of these options is chosen by the student, the student must make the appropriate arrangements with the College no later than thirty (30) days before the applicable due date described on the last page of the Enrollment Agreement.

Failure to make full payment, or alternative loan or installment payment arrangements, by the due dates described in this Enrollment Agreement subject the defaulting incoming student to forfeiture of the student's seat and the defaulting returning student to dismissal or interest at the then current rate under the College's direct pay installment program, which is presently 12% per year.

Student's Right to Cancel and Refund

You have the right to cancel this Student Enrollment Agreement. Please refer to the Enrollment Agreement for all details regarding student's right to cancel and refund. You may also contact the Admissions Department for more details at (916) 686-7300.

Student's Right to Withdraw and Refund

After the cancellation period described above in "Student's Right to Cancel and Refund," you have the right to withdraw from the University at any time.

Withdrawal shall occur when you give written notice of withdrawal to the Registrar at the University's address shown at the top of the first page of this Student Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of withdrawal sent by hand delivery, email, or facsimile is effective upon receipt by the Registrar. Written notice of withdrawal sent by mail is effective when deposited in the mail properly addressed with postage prepaid.

The written notice of withdrawal should be on the official College Withdrawal Form provided by the Office of the Registrar, but

may also be in any writing that shows you wish to withdraw from the University. A withdrawal may also be effectuated by the student's conduct showing an intent to withdraw, including but not necessarily limited to the student's continuing and unexcused failure to attend all classes.

If you withdraw before or at completion of 60% (and no more) of the current term, you will be eligible for a pro-rata refund for the current term. The University will perform a pro-rata calculation of current term tuition and refund as follows:

Step A) Total days in current term* – Days in current term completed = Total

Step B) Total days not completed/Total days in current term % of pro-rata refund

Step C) Institutional charges* x % of pro-rata refund = Total refund owed

*Current term generally means the current semester, but when tuition is charged for the entire period of enrollment rather than by semester, then the current term shall mean that period of enrollment.

*Institutional charges excluded from the pro-rata refund are: (1) all non-refundable fees as described in the current General Catalog, (2) Student Tuition Recovery Fund fee, and (3) student health insurance premium estimated at \$3,200.00, if applicable; institutional charges in the pro-rata refund include: (1) current term tuition.

If the amount of the current term payments is more than the amount that is owed for the time attended, then a refund of the difference will be made within 45 days after the notice of withdrawal is received by the Office of the Registrar. Refunds owed to the student as a result of a pro-rata calculation will be done in the following order:

- I. Private Educational Loan(s); and
- II. To the student

Required Notice of Cancellation or Notice of Withdrawal

Cancellation or withdrawal shall occur when you give written notice of cancellation or withdrawal to the Registrar at the College's address shown at the top of the first page of the Enrollment Agreement. You can do this by hand delivery, email, facsimile, or mail. Written notice of cancellation or withdrawal sent by hand delivery, email, or facsimile is effective when received by the College, provided that such receipt can be verified. Written notice of cancellation or withdrawal sent by mail is effective when deposited in the mail properly addressed

with postage prepaid. The written notice of cancellation or withdrawal need not take any particular form and, however expressed, is effective if it shows that you no longer wish to be bound by the Enrollment Agreement in the case of a cancellation, or that you wish to withdraw from the College in the case of a withdrawal.

Refund Policy in the Event of Dismissal

Refund of paid tuition and fees for students who are dismissed follows the same timelines as in the event of withdrawal from enrollment.

Financial Aid and Loan Obligations

If a student obtains a loan to pay for an educational program, then the refund upon cancellation or withdrawal, subject to the conditions for refund described in the Student's Right to Withdraw and Refund section will be sent to the lender or to the loan guarantee agency, up to the amount of the loan. The student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund paid to the lender. If there is a refund amount remaining after payment to the lender, it shall be paid to the student as described above. If you owe money after the refund, then you will need to make arrangements for payment of the amount remaining owed.

NOTICE: YOU MAY ASSERT AGAINST THE HOLDER OF THE PROMISSORY NOTE YOU SIGNED IN ORDER TO FINANCE THE COST OF THE EDUCATIONAL PROGRAM ALL OF THE CLAIMS AND DEFENSES THAT YOU COULD ASSERT AGAINST THIS INSTITUTION, UP TO THE AMOUNT YOU HAVE ALREADY PAID UNDER THE PROMISSORY NOTE.

Scholarships

In the past, several companies have helped University students finance their education with Scholarships. Scholarship amount varies. Criteria for scholarships vary by the specific donor and are usually awarded in the late fall and early spring. The University awards various scholarships to students during the academic year. The scholarships are awarded on the basis of financial need, academic performance, leadership, and promoting diversity in the profession.

SCHEDULES

The academic calendar and holiday schedule is posted to the CNUCDM website.

Students are to remain local and not travel out of the area until the end of each semester term.

BASIC LIFE SUPPORT

All students are required to be certified in Basic Life Support for Health Care Providers (BLS). All matriculating students and students completing the second year will be offered the BLS course at CNUCDM, first in Foundations of Odontology (Odont 511) and at the end of the second year in Local Anesthesia (OMFS 632). It is the student's responsibility to provide the signed BLS certification card to myrecordtracker.

APPENDIX A: CNUCDM PLOs

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

PROGRAM CLINICAL CARE OUTCOMES

Patients experience:

1. Patient-centered highest quality diagnostic, preventive and treatment services at the most reasonable cost with the best patient experience and treatment outcomes
2. Comprehensive oral health care in a dental medicine model integrated with overall health
3. Minimally invasive care utilizing the latest technology

STRATEGIC GOALS

Tactics, development plan, critical success factors, and evidence of achievement

Goal 1. Educate effective practitioners of dental medicine

Recruit, retain, educate, and train the highest quality of DMD students

Goal 2. Develop a high quality faculty and staff

Develop and distribute resources to recruit, retain and promote the effective activities of faculty and staff. Promote research and scholarship in the college.

Goal 3. Achieve effective leadership in oral health care delivery

Provide patient care that becomes recognized as some of the best oral health care available anywhere. Gain the benefits of good oral health for the patients served and in our communities beyond.

Goal 4. Promote a diverse and inclusive environment in dental medicine and in the communities we serve

Create and sustain an environment that respects all its students, staff and faculty and the patients we serve. Promote multiculturalism and American values of equality and inclusiveness in the college and for community oral health.

Goal 5. Create exceptional facilities and infrastructure

Build an efficient infrastructure to support and sustain learning, teaching, communication, research and scholarship while keeping education affordable.

Goal 6. Ensure financial sustainability and growth

Build a financially sustainable budget that will provide effective support of existing programs while being poised for expansion through strategic growth of programs

APPENDIX B: CODA TABLE 2

The cycle of continuous improvement based upon the strategic plan

STRATEGIES AND TACTICS FOR OUR GOALS

Goal 1. Educate effective practitioners of dental medicine

Recruit, retain, and train the highest quality of DMD students

Strategy 1.1. Provide excellence in teaching.

Tactics:

- Develop and deliver an exceptional curriculum
- Work with the CNU Institute for Teaching and Learning Excellence to develop contemporary pedagogy
- Develop a student faculty mentorship program to promote professionalism and ethics

Tactic	February 2019 status	Development Plan	Critical Success Factors	Party responsible for report	Evidence of Achievement
Develop and deliver an exceptional curriculum	A curriculum with four themes (human studies, odontology, oral and maxillofacial studies, behavioral and social sciences) has been presented to the planning committees. 226 course hours and course names have been identified and course directors have	Spring 2019: Completion of syllabi, development of course materials in Canvas . selection of source materials 2019-2020: presentation of D1 courses with assigned auditors and 360 degree course assessment Repeat this cycle for D2, 2021, D3, 2022, and D4 2023	Positive assessment of courses at 360 degrees: students auditor, faculty, course director, academic Dean, Dean Pass or remediation to pass for all courses (for academic reasons) with competency-based grading policy Performance at or above national average on National Board Exam	Associate Dean of Academic Affairs	1. Student course evaluations 2. Student engagement dashboard 3. Faculty self-assessment 4. Course auditors report

	been selected				
Work with the Institute for Teaching and Learning Excellence (ITLE) to develop contemporary pedagogy	The center is an emerging organization for which was launched in October 2018 by the College of Medicine, Pharmacy, and Psychology	Participate fully in all activities of the ITLE with a broad engagement of full and part time faculty	Demonstrated participation resulting in incorporation of ITLE directed advance pedagogy in CODM courses	Associate Dean of Academic Affairs	Implementation of active learning in CODM courses Reports of course directors on implementation of ITLE training
Develop a student faculty mentorship program to promote professionalism and ethics	No mentorship program has been established as of February 2019	Train faculty in mentorship through faculty development program. Create assessment rubric for faculty to individually assess mentorship performance Assign each faculty member mentees Apply CDM resources to support mentorship activities Perform annual review of program and participants	Improved student life Improved faculty staff and student satisfaction. 		Engage Sacramento community in population health initiatives to improve oral health	community standards in patients with premalignant disease and high risk factors. Increased utilization and decreased disease as outcome of community engagement		
--	--	---	--	--	--

Goal 4: Promote a diverse and inclusive environment in dental medicine and in the communities we serve

Tactics

- Create and sustain an environment that respects all its students, staff and faculty and the patients we serve.
- Promote multiculturalism and American values of equality and inclusiveness in the college and for community oral health

Tactic	Status February 2019	Development Plan	Critical Success Factors	Party Responsible for report	Evidence of achievement
Create and sustain an environment that respects all its students, staff and faculty and the patients we serve.	Consistent CNU values and applied environment in student affairs admissions and academic affairs are present to create a community of respect.	The humanistic environment for dental education will be addressed by the appointed Dean of academic affairs to interface with extant CNU activities. Both curricular and faculty development	Faculty and students demonstrate a respectful and inclusive culture in plenary activities, interest group development, and individual assessment.	Dean	<ul style="list-style-type: none"> • Engagement survey • Interviews with community of students staff and faculty
					51 Page

		program will be initiated to promulgate a dental college culture of respect for diversity in all aspects			
Promote multiculturalism and American values of equality and inclusiveness in the college and for community oral health	CNU is established as a remarkably multicultural academic health center in one of the most diverse communities in California.	Promote multicultural activities that engage the CNU community and the larger regional community	<p>Achieve broad multicultural engagement with students, faculty and staff. Examples Celebracion de Salud, Indian dentistry day, Asian dental society activity, National Dental Association</p> <p>Engage Multicultural programs in the Northstate community: California state fair, other community events,</p> <p>International engagement with Asia for dental education and practice</p>	Dean Dean of student affairs and admissions	<p>Assess CNU activities and outcome assessments for these activities</p> <p>Assess in engagement survey</p>

Goal 5. Create exceptional facilities and infrastructure

Tactics:

Build an efficient infrastructure to support and sustain learning, teaching, communication, research and scholarship while keeping education affordable.

Tactics	Status February 2019	Development Plan	Critical Success Factors	Party responsible for reporting	Evidence of achievement
Build an efficient infrastructure to support and sustain learning, teaching, communication, research and scholarship while keeping education affordable.	<p>Sites are under consideration for development of clinical and preclinical facilities</p> <p>Library, anatomy, general labs and contemporary classroom access at CNU are being positioned for use by the CDM</p>	<p>Phase 1: Identify space for two clinics and one type 1 and 2 laboratory and simulation clinic</p> <p>Create plans with A-dec for the lab, simulation and first clinic.</p> <p>THIS WILL BE DEVELOPED TO ENROLL A CLASS OF 2023 LATE IN 2019 OR EARLY IN 2020/</p> <p>Complete construction in 2019 of lab and preclinical lab and in 2019-2020 for the first clinic</p>	<p>Completion of phase one of infrastructure plan in 2019</p> <p>Completion of phase 2 of infrastructure plan in 2021</p>	<p>Dean</p> <p>Dean of academic affairs</p> <p>Dean of clinical affairs</p>	<p>Timely enrollment of class</p> <p>Timely opening of clinics</p> <p>Effective operation of all facilities</p>

		Phase 2: Initiate construction on the second clinic in 2020 with vendor to be named for completion in 2021			
--	--	--	--	--	--

Goal 6. Ensure financial sustainability and growth

Tactics:

Build a financially sustainable budget that will provide effective support of existing programs while being poised for expansion through strategic growth of programs

Tactic	Status February 2019	Development Plan	Critical Success Factors	Party responsible for	Evidence of Achievement
					54 Page

				reporting	
Build a financially sustainable budget that will provide effective support of existing programs while being poised for expansion through strategic growth of programs	The proforma and budget for the school of dentistry has been completed with the Chief Financial Officer accounting for sufficient funding and scaling up of programs for the next 10 years	<p>Expend funds for personnel, faculty and staff, for facilities, equipment and educational materials sufficient to enroll a class in late 2019 or 2020.</p> <p>Gain tuition funds during the first matriculation and growing to 4 classes of 80 student each</p> <p>Gain clinical income, grants, gifts and other sources of income to support programs.</p>	A balance sheet and annual closing statement demonstrating the COD in the black within the proposed return on investment.	<p>Dean</p> <p>President</p> <p>Chief financial officer.</p>	<p>Budget</p> <p>Balance sheets</p> <p>Annual report</p> <p>Audit results</p>

CURRICULUM STRUCTURE AND COURSE CATALOG:

Students will be engaged in a 45 week curriculum for the first 3 years, beginning in September for each year, and culminating in a DMD degree granted in June of the 4th year making the fourth year curriculum 40 weeks. Total curriculum weeks are 175.

A continuous series of didactic, small group learning, laboratory and clinical courses in:

Human Systems: Developing applied knowledge in the normal function and structure of human biology and the pathophysiology of diseases of human systems at all stages of life. Understanding and applying the implications for oral health exerted by these human systems and their associated diseases.

Odontology: In depth knowledge of the normal structure and function of the teeth, alveolar bone, and masticatory system at all stages of life. In-depth knowledge of the diseases of teeth, including caries, periodontal disease and masticatory disorders, the methods to diagnose, prevent, and treat odontologic diseases. Obtaining primary and advanced skills in the treatment of odontologic diseases.

Oral and Maxillofacial Studies: In-depth knowledge of the normal structure and function of the oral and maxillofacial region at all stages of life. In-depth knowledge of the diseases of this region including those of growth and development, neoplasia, degenerative diseases, infectious diseases, and trauma. Emphasis on OMS systems include oral mucosa, cutaneous diseases, the jaws, neurologic disorders, salivary gland disorders, paranasal sinuses, airway, and musculoskeletal diseases.

Behavioral and Social Sciences: Developing knowledge in human psychology and behavior impacting oral health and the interventions that positively and negatively impact oral health. Understanding the economic, regulatory and political environment for oral health practice. Understanding the sociologic, cultural, economic determinants of health and how to positively influence the health of communities and societies.

The 4 track diagonal curriculum:**Human Systems**

Case-based biomedical sciences: For the following Common Pathways courses (labeled CP Course) with the College of Medicine (COM), the clinical case presentations will include those oral cases presented by the CDM faculty, in addition to selected common cases with the COM. The supporting basic science with each courses will be Common Pathway anatomy, histology, embryology, biochemistry, immunology, microbiology, nutrition, pathology, pharmacology and physiology.

Course #	Course Title	Credits	Year	Term
HS 511	Hematology (CP Course)	4	DS 1	Fall

As described in COM curriculum with clinical case correlation by dental faculty. Correlated clinical cases related to oral health sciences will include: dental care in the hemophilia patient, acquired bleeding disorders in the dental patient, oral effects of anemia, and dental care for the hematology oncology patient.

Course #	Course Title	Credits	Year	Term
HS 521	Integumentary and Musculoskeletal Systems (CP Course)	7	DS 1	Fall

As described in COM curriculum with clinical case correlation by dental faculty. Correlated clinical cases related to oral health sciences will include vesiculobullous disease of the oral mucosa, oral manifestations of muscular dystrophy, oral cancer, myofascial pain dysfunction syndrome, arthritis in dental practice, osteoporosis and oral health.

Course #	Course Title	Credits	Year	Term
HS 512	Neuroscience (CP Course)	9	DS 1	Spring

As described in COM curriculum with clinical case correlation by dental faculty. Correlated clinical cases related to oral health sciences will include maxillofacial nerve injury, oral manifestations of Parkinson's disease, oral and maxillofacial movement disorders, trigeminal neuralgia, migraine and facial migraine, oral care of the stroke and spinal cord injured patient.

Course #	Course Title	Credits	Year	Term
HS 522	Cardiovascular and Pulmonary Systems (CP Course)	9	DS 1	Spring

As described in COM curriculum with clinical case correlation by dental faculty. Correlated clinical cases related to oral health sciences include: prevention, diagnosis, and immediate treatment of acute myocardial ischemia in dental practice, oral health aspects of obstructive sleep apnea, managing asthma in dental practice, congestive heart failure implications in oral health care, valvular heart disease implications in dental practice, Marfan's syndrome.

Course #	Course Title	Credits	Year	Term
HS 611	Renal System (CP Course)	5	DS 2	Fall

As described in COM curriculum with clinical case correlation by dental faculty. Correlated clinical cases related to oral health sciences include oral manifestations of renal failure/renal osteodystrophy/HPTH, dehydration and oliguria in odontogenic infection, acid/base considerations in fever and dental infection.

Course #	Course Title	Credits	Year	Term
HS 621	Gastroenterology (CP Course)	5	DS 2	Fall

As described in COM curriculum with clinical case correlation by dental faculty. Correlated clinical cases related to oral health sciences include oral effects of chronic liver failure, oral surgical considerations in Vitamin K dependent factor depletion in chronic hepatitis, oral manifestations of bulimia, Salivary gland disorders, concomitant disorders of the GI and oral microbiome, effects of mastication/salivary health on GI health, oral manifestations of patients with colonic polyps.

Course #	Course Title	Credits	Year	Term
HS 631	Endocrine System (CP Course)	5	DS 2	Fall

As described in COM curriculum with clinical case correlation by dental faculty. Correlated clinical cases related to oral health sciences include , oral health considerations in obesity, oral health impact of type 1 and type 2 diabetes, oral findings in endocrine disorders, e.g. multiple endocrine neoplasia, hyperthyroidism/hypothyroidism.

Course #	Course Title	Credits	Year	Term
HS 641	Clinical Pharmacology LAL	3	DS 2	Fall

This course will review the basics of pharmacokinetics and drug development and review the important clinical characteristics of the major drug categories including cardiac, pulmonary, GI, GU, endocrine, musculoskeletal, psychotropic, neurologic, dermatologic drugs, antibiotics,

Course #	Course Title	Credits	Year	Term
HS 642	Clinical Pharmacology 2/Oral Pharmacology LAL	3	DS 2	Spring

This course will review the major drugs used in dental practice. Emphasis on analgesics, pain and anxiety control, antibiotics. Other drugs of oral diseases including oral mucosal diseases, diseases of the dental pulp and periodontium, paranasal sinuses, and those for musculoskeletal problems of the head and neck. Correlation of drugs in the general pharmacopeia with oral health impact for HS 641 will concentrate on side effects of the oral region including examples of xerostomia, superinfection with thrush, tardive dyskinesia, among others.

Course #	Course Title	Credits	Year	Term
HS 721	Junior Year Medicine Seminar <i>SEM</i>	2	DS 3	Fall

Weekly case-based seminars presenting existing dental and comprehensive care patients and their medical comorbidities. Cases will be selected from existing active patients as well as from standardized patients, for the D3 class with evidence based review of relevant medical findings and their impact on oral health and clinical interventions. This will be done with a purpose to mitigate risk and improve patient care outcomes.

Course #	Course Title	Credits	Year	Term
HS 722	Junior Year Medicine Seminar <i>SEM</i>	2	DS 3	Spring

Complex cases will be selected beyond the level of HS 721 including those commonly requiring medical surgical intervention in concurrence with oral health care. Examples such as oncology patients, obstetric patients, and transplant patients will be examined. Weekly case-based seminars presenting existing dental and comprehensive care patients and their medical comorbidities will be continued in the seminar as well.

Course #	Course Title	Credits	Year	Term
HS 821	Senior Year Medicine Seminar <i>SEM</i>	2	DS 4	Fall

Weekly case-based seminars presenting existing dental and comprehensive care patients and their medical comorbidities. Continued development of advanced case-based patient presentations including those on hospitalized patients.

Course #	Course Title	Credits	Year	Term
HS 822	Senior Year Medicine Seminar <i>SEM</i>	2	DS 4	Spring

Weekly case-based seminars presenting existing dental and comprehensive care patients and their medical comorbidities. Development of advanced knowledge of cases presenting for medical treatment for which dental consultation is needed in the preanesthetic presurgical patient and in concurrence with major systemic disease including trauma, stroke, myocardial infarction.

Odontology

Course #	Course Title	Credits	Year	Term
Odont 511	Foundations of Odontology <i>LAL, LAB and CLIN</i>	6	DS 1	Fall

This course will introduce students to infection control, the dental office and clinical care site, and provide initial skill in interaction with the patient and the patient's oral cavity. Students will enter the clinical setting with faculty and upper level students to provide limited aspects of oral care and join the oral health care team.

Course #	Course Title	Credits	Year	Term
Odont 521	Dental Anatomy <i>LAL and LAB</i>	6	DS 1	Fall

Anatomy of the teeth and associated structures is presented including the masticatory apparatus. Clinical correlations affecting function such as sleep disorders, temporomandibular disorders and growth and development anomalies are clinical correlates to explain function and structure in dental anatomy.

Course #	Course Title	Credits	Year	Term
Odont 522	Cariology <i>LAL</i>	3	DS 1	Spring

The biology, phenotype, epidemiology, anatomical changes from caries is presented. The prevention of caries through CAMBRA is developed as well as strategies for management at all stages of the disease. The course introduces the pathways of caries as a regional and systemic disease.

Course #	Course Title	Credits	Year	Term
Odont 611	Operative Dentistry <i>LAL and LAB</i>	6	DS 2	Fall

The surgical treatment of caries and degenerative and congenital diseases of the enamel and dentin is presented through the development of technical skills to remove diseased portions of the teeth and to provide anatomical functional direct restorations of teeth. Prevention and minimally invasive procedures for caries management is emphasized. Laboratory session focus on the development of procedures and psychomotor skills using surgical armamentarium in a simulated clinical setting for the treatment of caries and other diseases of the enamel and dentin.

Course #	Course Title	Credits	Year	Term
Odont 621	Periodontology <i>LAL and LAB</i>	3	DS 2	Fall

The normal structure and function of the periodontium is presented. The pathology, microbiology, immunology, and pathophysiology of diseases of the periodontium is presented. Prevention, chronic disease management, and nonsurgical/minimally invasive procedures for periodontal diseases is emphasized. Laboratory session focus on the development of procedures and psychomotor skills using surgical armamentarium in a simulated clinical setting for the treatment of diseases of the periodontium.

Course #	Course Title	Credits	Year	Term
Odont 622	Periodontology <i>LAL and LAB</i>	3	DS 2	Spring

In-depth understanding of the etiology and progression of chronic periodontal diseases is developed in this course. The influence of systemic diseases such as HIV, diabetes mellitus, and obesity on the health of the periodontium is explored. Surgical interventions for the treatment of diseases of the periodontium is presented. The laboratory is focused on advanced techniques including flap surgery, guided tissue regeneration, socket preservation among others, as well as continued development of skills in curettage.

Course #	Course Title	Credits	Year	Term
Odont 632	Prosthodontics and Implant Dentistry: Removable Prosthodontics <i>LAL and LAB</i>	6	DS 2	Spring

The anatomic and pathophysiologic aspects of partial and full edentulism is presented. Development, construction, placement and maintenance of full and partial removable prosthodontic restorations is presented. The laboratory will include impressions, jaw occlusal registrations, gnathology, cast development and mounting, development of wax rims and occlusal scheme and teeth mounting.

Course #	Course Title	Credits	Year	Term
Odont 642	Endodontology: Diseases of the Pulp and Pathways of Odontogenic Infection, Endodontic Therapy and Technique <i>LAL and LAB</i>	3	DS 2	Spring

The diagnosis and treatment of the diseases of the dental pulp throughout life is presented. The biologic basis for treatment of diseases of the pulp is developed as well as the rationale for these methods. The laboratory will introduce students to the ortho-endodontic therapy methods including the use of magnification, access the pulp canals, instrumentation of the canals and obliteration of the pulpectomy site to clinical standards.

Course #	Course Title	Credits	Year	Term
Odont 662	Comprehensive Care Family Dentistry <i>CLIN and LAB</i>	3	DS 2	Spring

Treatment of caries and periodontal disease with discipline based faculty from operative dentistry, prosthodontics, endodontology and periodontology is carried out with the DS 2 as an active participant in the care team that includes a DS 3 and DS 4. Students will participate in case presentations, medical record assessment and recording, and other aspects of the clinic activities. The laboratory will include a simulated clinic visit including OSCE record and electronic health record.

Course #	Course Title	Credits	Year	Term
Odont 741	Prosthodontics and Implant Dentistry: Fixed Prosthodontics <i>LAL and LAB</i>	6	DS 3	Fall

The indirect restoration of teeth and the indirect replacement of missing teeth with crowns and bridges is presented. Treatment planning for these restorations including occlusal, periodontal, caries assessment is presented. Other methods for indirect restoration including partial coverage indirect restoration is presented. The introduction of digital techniques for impression and CadCam restoration development is presented. The laboratory will provide practice with the surgical armamentarium for tooth preparation for fixed prosthetic restoration, for impressions with analog and digital methods and for the construction of fixed indirect restorations. The laboratory will also teach methods for provisional restoration of the fixed prosthodontic patient.

Course #	Course Title	Credits	Year	Term
Odont 761	Comprehensive Care Family Dentistry <i>CLIN</i>	8	DS 3	Fall

This daily clinic will focus on students developing their family of patients in conjunction with other members of their team headed by the faculty team leader. Emphasis on diagnosis and treatment planning and completion of initial urgent procedures will be carried out.

Course #	Course Title	Credits	Year	Term
Odont 752	Periodontology Seminar <i>SEM</i>	2	DS 3	Spring

Using a case-based format, the treatment planning, outcome assessment, management of medical and dental comorbidities among others of the patient with diseases of the periodontium is presented. Patient-centered, health systems informed, and culturally aware aspects of care are discussed through the case-based format.

Course #	Course Title	Credits	Year	Term
Odont 762	Comprehensive Care Family Dentistry <i>CLIN</i>	8	DS 3	Spring

This daily clinic will further develop the completion of Phase 1 therapy, disease control mitigation of risk and initiation of preventive care in the patient family. The student will develop this under the leadership of the team leader. The student will also begin aspects of Phase 2 therapy, reconstructive dentistry and address other comorbidities in patient care.

Course #	Course Title	Credits	Year	Term
Odont 841	Periodontology Seminar <i>SEM</i>	2	DS 4	Fall

Using case-based format, interdisciplinary problems especially with orthodontics, endodontics and prosthodontic consideration will be developed through patient presentations of patients of record or via the OSCE format. Further exploration of comorbidities in periodontal diseases will be developed.

Course #	Course Title	Credits	Year	Term
Odont 851	Prosthodontics and Implant Dentistry: Implant Surgery and Prosthodontic Reconstruction <i>LAL and LAB</i>	3	DS 4	Fall

The replacement of missing teeth utilizing dental implants is presented. This course includes the biomechanics of implants, concepts of osseointegration, restoration options for implants, implant systems and the placement of implants. The laboratory will teach the placement of implants including appropriate assessment and osteotomies, and the restoration of implants using indirect and direct techniques.

Course #	Course Title	Credits	Year	Term
Odont 861	Comprehensive Care Family Dentistry <i>CLIN</i>	8	DS 4	Fall

This clinical practicum will focus on the daily clinical activities of a practicing dentist including all intake, comprehensive care, case management issue extant under the leadership of the team leader. The DS 4 will also demonstrate leadership of the oral healthcare team including DS2 and 3 students and the dental assisting and dental hygiene staff through cooperation and assessment of outcomes of care.

Course #	Course Title	Credits	Year	Term
Odont 862	Comprehensive Care Family Dentistry <i>CLIN</i>	8	DS 4	Spring

The final semester of comprehensive care family dentistry will focus on the completion of phase 2 care for patients of record, increasing facility in providing initial evaluation and care of the dental patient, and addressing complex issues in care including those associated to overall health, stages of life, cultural awareness among others.

Oral and Maxillofacial Studies

Course #	Course Title	Credits	Year	Term
OMFS 511	Foundations of Dental Medicine <i>LAL</i>	3	DS 1	Fall

This course will focus on introduction to the patient/doctor relationship, the role of dental medicine in health care, the scientific basis of the pathophysiology, diagnostic methods, and treatment modalities of major oral diseases. Examples will include congenital diseases such as cleft lip and palate, degenerative diseases such as rheumatoid arthritis, neoplastic disease such as oral squamous cancer, traumatic diseases such as facial fracture, and infectious disease such as HPV. This course includes a review of biochemistry relevant to the medical school first and second year HS courses to match the coursework provided to the MD students in foundations of medicine.

Course #	Course Title	Credits	Year	Term
OMFS 512	Oral Microbiology/Immunology <i>LAL</i>	3	DS 1	Spring

The oral microbiome in health and disease is presented including the ecologic niches of the oral region: periodontium, teeth, mucosa, nasopharynx, and salivary glands. The virology of the upper airway mouth and pharynx is presented including HPV, HIV, and acute viral diseases. The presence of prions and their potential role in disease is presented. The host response resulting in homeostasis or the initiation of infection is reviewed

Course #	Course Title	Credits	Year	Term
OMFS 532	Surgical Anatomy of the Head and Neck <i>LAL and LAB</i>	2	DS 1	Spring

The structures of the viscerocranium are presented including osteology, myology, cranial nerve peripheral anatomy, salivary glands, lymphatics, arterial supply and venous drainage. In-depth understanding of fascial planes, infratemporal fossa, triangles of the neck, myology of the mandible and maxilla will be presented with clinical illustrations as to their utility in dental medicine practice.

Course #	Course Title	Credits	Year	Term
OMFS 621	Dental Medicine at All Stages of Life <i>LAL</i>	3	DS 2	Fall

Growth, development, function and the human experience from birth to death will be presented including the impact of oral health and oral health interventions, prevention, disease promotion and treatment at all stages. This topic is developed from the biologic, social, economic and cultural aspects of the human experience.

Course #	Course Title	Credits	Year	Term
OMFS 631	Dental Anesthesiology 1: Local Anesthesia <i>LAL and LAB</i>	3	DS 2	Fall

The pharmacology of local anesthesia, armamentarium for administration and technique for administration is presented. Local and systemic complications of administration, contraindications and comorbidities are presented. The laboratory will demonstrate and practice technique of local anesthesia administration on analogy and haptic simulators.

Course #	Course Title	Credits	Year	Term
OMFS 641	Oral Radiology 1 <i>LAL and LAB</i>	3	DS 2	Fall

The physics of ionizing radiation and the development of Roentgen's methods are presented. The components of clinical equipment to emit radiation and sensors, both analog and digital are presented. The interpretation of oral radiographs, periapical and bite wing radiographs is developed. Intraoral radiographs using a simulator are performed in the laboratory.

Course #	Course Title	Credits	Year	Term
OMFS 632	Dental Anesthesiology 2: Pain and Anxiety Control, Analgesia, Medical Management of Local Anesthesia Patients <i>LAL and LAB</i>	3	DS 2	Spring

The risks of local anesthesia detection and management are presented. Understanding pain and anxiety in dental practice through assessment methods is presented. The pharmacologic and nonpharmacological means of mitigating pain and anxiety in dental care is presented. This includes the use of nitrous oxide, oral anxiolysis, and parenteral drugs.

Course #	Course Title	Credits	Year	Term
OMFS 642	Oral Pathology/Oral Medicine 1 <i>LAL and LAB</i>	3	DS 2	Spring

The significant tumors, anomalies, oral manifestations of systemic disease and other pathologies of the oral and maxillofacial region are presented. The laboratory will focus on the gross pathology and microscopic pathology of the oral and maxillofacial region

Course #	Course Title	Credits	Year	Term
OMFS 652	Orthodontics and Craniofacial Growth and Development <i>LAL and LAB</i>	3	DS 2	Spring

Principles of craniofacial growth and development will be presented. Abnormalities leading to malocclusion and dentofacial deformities will be shown. Methods of diagnosing disorders of dental facial growth and development will be understood and utilized by students. Orthodontic interventions for these conditions including methods, and outcomes will be shown. The laboratory will concentrate on diagnosis and orthodontic treatment methods.

Course #	Course Title	Credits	Year	Term
OMFS 751	Oral Radiology 2 <i>LAL and LAB</i>	3	DS 3	Fall

The understanding of Panoramic, planar films, CT, MRI. Nuclear medicine, and non-ionizing methods of image acquisition is presented. Comparison of these methods and appropriate case selection for these studies is presented. The utility in treatment planning and integration with other digital treatment planning methods is shown. The diagnosis of pathology via these methods is developed.

Course #	Course Title	Credits	Year	Term
OMFS 761	Principles of Oral Surgery <i>LAL and LAB</i>	3	DS 3	Fall

The principles of aseptic technique, flap design, surgical access, surgical hemostasis, infection prevention, and wound healing are presented. Technique for the removal of erupted and non-erupted teeth, both surgically and via forceps and elevator is presented. Preprosthetic surgical technique and minor soft tissue surgery including biopsy is presented. The laboratory will focus on the surgical and nonsurgical removal of teeth and on soft tissue surgery and biopsy.

Course #	Course Title	Credits	Year	Term
OMFS 771	Pediatric Dentistry <i>LAL and LAB</i>	3	DS 3	Fall

Child development and child management in the clinical setting will be developed from a holistic and family based perspective. Major diseases in growth and development of the oral cavity will be elucidated. The development of the deciduous and mixed dentition along with craniofacial development is presented. Caries diagnosis, treatment and prevention in the deciduous dentition is shown. The laboratory will provide simulated clinical experiences in caries treatment, deciduous crowns, space maintenance, and care of the pediatric patient.

Course #	Course Title	Credits	Year	Term
OMFS 742	Oral Pathology/Oral Medicine 2 <i>LAL</i>	3	DS 3	Spring

Further development of the oral manifestations of systemic disease is presented with emphasis on diabetes, hematologic bleeding disorders, hematologic malignancies, lymphomas, myeloma, xerostomic diseases, autoimmune disease, maxillofacial movement disorders, other neurologic diseases such as Parkinson's, with oral manifestations.

Course #	Course Title	Credits	Year	Term
OMFS 752	Clinical Clerkship: Pediatric Dentistry <i>4 weeks, 30 hours per week plus call</i> <i>CLIN</i>	8	DS 3	Spring

The student will engage in clinical experiences in the pediatric dentistry clinic as a member of the care team, treating patients under the supervision of pediatric dentistry faculty. Consultation on pediatric patients referred for oral conditions via pediatric medicine will occur.

Course #	Course Title	Credits	Year	Term
OMFS 762	Advanced Topics in Oral and Maxillofacial Surgery <i>LAL</i>	2	DS 3	Spring

Understanding of major conditions of the oral and maxillofacial region requiring surgical intervention is presented. This includes diagnostic features, techniques for corrective surgery and outcome assessment. Categories include the treatment of facial trauma, ablative tumor surgery of the head and neck, cleft lip and palate surgery, craniofacial surgery, orthognathic surgery, reconstructive surgery of the jaws and face, and surgical treatment of temporomandibular disorders.

Course #	Course Title	Credits	Year	Term
OMFS 772	Clinical Clerkship: Oral and Maxillofacial Surgery <i>4 weeks, 30 hours per week plus call</i> <i>CLIN</i>	8	DS 3	Spring

The students will enter the oral and maxillofacial surgery care team for this clerkship including the care of patients for dentoalveolar surgery, major maxillofacial surgery and complex conditions of the head and neck. Clinical experience in ambulatory oral surgery and anesthesia and assisting for maxillofacial surgery in the operating room including emergency and trauma care occurs. Participation in hospital rounds and conferences occurs.

Course #	Course Title	Credits	Year	Term
OMFS 851	Oral Radiology Seminar <i>SEM</i>	2	DS 4	Fall

This case-based seminar will present findings using all methods in OMFS 641 and OMFS 751 to demonstrate through active learning the radiographic findings in key diseases of the oral and maxillofacial region.

Course #	Course Title	Credits	Year	Term
OMFS 862	Oral Pathology/Oral Medicine Seminar <i>SEM</i>	2	DS 4	Spring

Concentration on oral medicine will include the risk assessment and management of complex systemic diseases related to dental medicine care in dental practice. Case-based discussion on the dental medicine patient with HIV, ongoing chemotherapy for malignancy, osteoporosis/osteopenia among others will be presented by students in seminar format.

Course #	Course Title	Credits	Year	Term
OMFS 872	Clinical Clerkship: Orthodontics <i>4 hours per week for 8 weeks</i> <i>CLIN</i>	2	DS 4	Spring

Students will enter the orthodontic care team providing diagnostic and treatment services for patients undergoing orthodontic care under the auspices of orthodontic faculty in College of Dental Medicine clinics.

Behavioral and Social Sciences

Course #	Course Title	Credits	Year	Term
BSS 501	Managing Student Life <i>LAL and Lab</i>	1	DS 1	Fall

Resilience, sustainability as a student and future health professional will be presented. Managing student debt, stress management, effects of social media, interpersonal relationships, and ethics in student practice will be discussed. The problems of drug and alcohol abuse will be shown. Respect in the University including cultural, gender, and sexual conduct issues will be presented. Students will be made aware of resources to promote student wellbeing.

Course #	Course Title	Credits	Year	Term
BSS 522	Ethics in Dental Medicine and Health Care <i>LAL</i>	2	DS 1	Spring

The fundamentals of dental and medical ethics are presented including beneficence and non-maleficence. The Helsinki statement and other aspects of human research guidelines are presented including the role of Human Studies committees. The care of animals in biomedical research is discussed as well as the ethical use of human tissue in clinical care, transplant medicine etc. Ethical financial relationships and the underlying law behind them in clinical practice is discussed. The role of the criminal, tort system, the Board of Dentistry of California, and the ADA in dental ethics is presented.

Course #	Course Title	Credits	Year	Term
BSS 662	Behavioral Medicine (CP Course) <i>LAL, Clinical</i>	3	DS 2	Spring

In this course aspects of clinical psychology of importance in dental practice is presented. Case based learning will include: minor and major psychiatric illnesses impacting on oral health and the provision of oral health care; elder, spousal and child abuse; dental fear; and, dental phobias.

Course #	Course Title	Credits	Year	Term
BSS 701	Dental Public Health <i>LAL</i>	2	DS 3	Fall

The fundamentals of public health are presented including health and public health measures for health protection, protection from disease and health promotion. The surgeon general's report, 2000, updated 2019, on the status of oral health in America is presented. WHO assessment of oral health globally is presented. Population based initiative to improve oral health are discussed with a focus on clean water and fluoride exposure.

Course #	Course Title	Credits	Year	Term
BSS 721	Practice Management 1 <i>LAL</i>	2	DS 3	Fall

Addressing issues of student debt, career path, and modes of practice will be presented. Operating a dental practice via solo or group practice model and in health systems based practice will be discussed. Issues including human resources management, the actions of the care team in practice and financial responsibility and accounting will be presented.

Course #	Course Title	Credits	Year	Term
BSS 861	Clinical Clerkship: Community-based Education <i>4 weeks, 30 hours per week plus call</i> CLIN	8	DS 4	Fall

Affiliated health systems based practices will accept CNU students into their care teams where senior students will provide clinical care under the supervision of Volunteer Community-Based Faculty in those sites. Suitable transportation and housing will be arranged for where needed. The purpose of the course is to provide community engagement with the constituencies served, to gain experience in community-based clinical care and to interact with the interprofessional and intraprofessional care team

Course #	Course Title	Credits	Year	Term
BSS 871	Seminar in Dental Public Health SEM	2	DS 4	Fall

This weekly seminar develops through cased based discussions led by student teams the public health issues in oral health in California and globally including access to care, social determinants of oral health, scope of practice issues, insurance and payment systems for oral health, access to fluoride, immunizations especially for HPV, and health protection for vulnerable populations such as children and elderly.

Course #	Course Title	Credits	Year	Term
BSS 822	Practice Management 2 SEM and LAB	2	DS 4	Spring

The simulation of dental practices in various models will be developed by students in groups including addressing issues of hiring, overhead, interaction with vendors, staff development, marketing, accounting and all operations in dental practice. The regulatory environment for pricing, dental insurance, health insurance will be reviewed as well as all aspects of the operation of dental practices.

Course #	Course Title	Credits	Year	Term
BSS 862	Clinical Clerkship: Community-based Education <i>4 weeks, 30 hours per week plus call</i> CLIN	8	DS 4	Spring

This course will be at a second community-based rotation site to elaborate on the activities of the first rotation and engage a new community and a new clinic. In addition to comprehensive care experience, the student will compare and contrast communities and clinical care entities and provide a reflective essay on their community care experience.

Course #	Course Title	Credits	Year	Term
BSS 872	Senior Elective Clinical Clerkship <i>CLIN</i>	6	DS 4	Spring

D4 students will select from additional clerkships available at clinical sites either discipline based or comprehensive care in odontology, oral and maxillofacial studies or human studies. Examples include comprehensive care at a remote clinic (odontology), dental specialty clerkship in oral maxillofacial surgery (OMFS), clerkship in internal medicine (Human Studies), or population health study abroad or in the United States (BSS).

Credit Hours and Student Contact Hours

Curriculum Theme	Credit Hours	Year	Credit Hours	Contact Hours
Human Systems	58	Year 1	55	1140
Odontology	84	Year 2	66	1380
OMFS	62	Year 3	60	1590
BSS	36	Year 4	59	1470
Total	240		240	5580

California Northstate University College of Medicine

Academic Calendar: 2019 - 2020

09/06/2018

MS1 – Phase A

Event	Start Date	End Date
Orientation – M1	07/24/2019	07/26/2019
White Coat Ceremony – M1	08/17/2019	
Fall Semester: 07/29/2019 – 12/20/2019		
Course	Start Date	End Date
Foundations of Clinical Medicine	07/29/2019	09/20/2019
Hematology	09/23/2019	10/25/2019
Integumentary and Musculoskeletal Systems	10/28/2019	12/20/2019
Spring Semester: 01/06/2020 – 05/29/2020		
Neuroscience	01/06/2020	03/13/2020
Cardiovascular and Pulmonary Systems	03/23/2020	05/29/2020

MS2 – Phase A

Fall Semester: 08/05/2019 – 12/20/2019		
Course	Start Date	End Date
Renal System	08/05/2019	09/13/2019
Gastrointestinal System	09/16/2019	11/01/2019
Endocrine System	11/04/2019	12/13/2019
Spring Semester: 01/06/2020 – 06/24/2020		
Reproductive System	01/06/2020	02/14/2020
Behavioral Medicine	02/17/2020	03/13/2020
Stages of Life	03/23/2020	05/01/2020
CBSE Review/Study; Elective Period	05/02/2020	06/24/2020

Longitudinal Courses – M1 & M2

FALL 2019

SPRING 2020

Course	Start Date	End Date	Start Date	End Date
Medical Skills – M1	07/29/2019	12/20/2019	01/06/2020	05/29/2020
Medical Skills – M2	08/05/2019	12/20/2019	01/06/2020	05/01/2020
Masters Colloquium – M1	07/29/2019	12/20/2019	01/06/2020	05/29/2020
Masters Colloquium – M2	08/05/2019	12/20/2019	01/06/2020	05/01/2020
SDSSP – will start in the Spring 2020 semester for M1 students and continues into the Fall 2020 semester of their M2 year.				

California Northstate University College of Medicine

Academic Calendar: 2019 - 2020

09/06/2018

MS3 – Phase B - Clinical Clerkships

Fall Semester: 07/01/2019 – 12/31/2019		
Event	Start Date	End Date
Clerkship Orientation – M3	06/27/2019	06/28/2019
Start of Clinical Clerkships – M3	07/01/2019	12/31/2019
M3 Clerkship Schedule - TBD		
Spring Semester: 01/01/2020 – 05/29/2020		
Clinical Clerkships – M3	01/01/2020	05/29/2020
M3 Clerkship Schedule - TBD		

MS4 – Phase C – Elective Rotations

Fall Semester: 06/08/2019 – 12/31/2019		
Event	Start Date	End Date
Elective Rotations – M4	06/08/2019	12/31/2019
M4 Elective Rotation Schedule - TBD		
Spring Semester: 01/01/2020 – 05/15/2020		
M4 Elective Rotation Schedule - TBD	01/01/2020	05/15/2020
Graduation Clearance Day – M4	05/15/2020	
Graduation Ceremony – M4	05/16/2020	

*M3 & M4 Elective Rotations are continuous throughout the 2019-2020 calendar year.

*Add/Drop deadline for Elective courses is 5 days from the start of instruction.

Rising M3: Summer Session

05/20/2019 – 06/26/2019		
Event	Start Date	End Date
CBSE Review/Study*; Elective Period – M2 & M3	05/20/2019	06/26/2019

*see Exam/Review schedule for specific dates.

Exams/Review/Research Day Schedule

Event	Start Date	End Date	EXAMS	Start Date
CNU Research Day	12/13/2019		CBSE #1 – M2	03/28/2020
Kaplan Assessment Exam	12/16/2019		CBSE #2 – M2	05/02/2020

CNU CDM ASSESSMENT PLAN

Assessment	Instrument Used/ Administrator/Deadline	Assessment Committee Liaison	Action Plan Responsibility	Action Plan Deadline for Reporting	Action Plan Implementation Deadline
Admissions					
Interview Survey (Interview Day Experience)	Results from the survey reported by Student Affairs by end of May, annually, for Admissions Cycle just ended.	Dean of Student Affairs	Admissions Office and Admissions Committee	Beginning of September	Action plan to be implemented September through May Action Plan to be completed by May
Analysis of Applicant Pool	Results from spreadsheet reported by Jason McDowell by beginning of September, annually, for Admissions Cycle just ended.	Dean of Student Affairs	Admissions Office to use for recruitment	End of September	Action plan to be implemented September through May Action Plan to be completed by May
Demographics of Entering Class	Information from WebAdmit to be retrieved by Dean of Student Affairs by end of October or beginning of November, annually.	Dean of Student Affairs	Admissions Office to use for recruitment	End of September	Action plan to be implemented September through May Action Plan to be completed by May
Survey of Students Declining Admissions Offer (Post Candidate Interview Survey)	Results from the survey reported by Dean of Student Affairs by beginning of September, annually, for Admissions Cycle just ended.	Dean of Student Affairs	Admissions Office to use for recruitment	End of September	Action plan to be implemented September through May Action Plan to be completed by May
Student Affairs					
Success of Tutoring on Student Achievement	Information to be reported by Dean of Academic Affairs by end of June, annually.	Dean of Academic Affairs	Student Affairs Office (in collaboration with Academic Affairs Office)	End of July	Action plan to be implemented September through May Action Plan to be completed by May
CODA Student Survey – Alumni Survey	Results from survey reported by the CODM Program by Dean of Academic Affairs annually.	Dean of Academic Affairs	Assessment & Curriculum Committees	August	Action plan to be implemented August through May Action plan to be completed by May
CODA Student Survey – Graduating Student Survey	Results from survey reported by the CODM program by Dean of Academic Affairs, annually.	Dean of Academic Affairs	Assessment & Curriculum Committees	August	Action plan to be implemented August through May Action plan to be completed by May
Graduating Exit Survey	Results from SurveyMonkey reported by the CODM program the end of June, annually.	Dean of Academic Affairs	DMD Program	August	Action plan to be implemented August through May Action plan to be completed by May
Faculty & Staff Development					
Faculty Development Activities	Results from Faculty development survey	Dean of Faculty Affairs	Chair of the Faculty Development Committee	End of April this year, Then Sep of every other year.	End of April this year, should have annual plan starting Sep of every year
Faculty Development Activity Completion Form (Mega Link)	Report of Faculty Development Activities	Dean of Faculty Affairs	Chair of the Faculty Development Committee	End of April	End of April

	(survey monkey collected data)				
	Report of Faculty Development Organized in house Seminars (with evaluations)	Dean of Faculty Affairs	Dean of Faculty Affairs	September	September
CODA Survey - Faculty Survey	Results from survey submitted by the DMD program through the office of Academic Affairs by June, annually.	Dean of Faculty Affairs	Office of Academic Affairs	December	January
Staff Development Activities Staff Development Activity Completion Form (Mega Link)	Results from staff development survey administered by Faculty Development Committee in August, every two years	Dean of Faculty Affairs	Faculty Development committee	September	October
Curriculum					
Interprofessional Education	Grading rubric uploaded into ExamSoft	Dean of Faculty Affairs	Rubric uploaded into ExamSoft	End of July	End of September
Supervisor Evaluation of Faculty	Self-evaluation form/meeting to review the form by Dean of Faculty Affairs	Dean of Faculty Affairs	Individual Faculty	End of July	Beginning of the semester (August or January)
Peer Review of Faculty	Peer Evaluation forms by Faculty selected by Dean of Faculty Affairs	Dean of Faculty Affairs	Individual Faculty	End of each course	By next time course is offered
Student Evaluation of Course & Instructor	Survey Monkey\Administered by Department Administrative Assistant	Administrative Assistant	Course coordinator as well as other Instructors for the course	End of each course	By next time course is offered
CODA Survey - Practicum/Internship Evaluation	CODA Survey - Practicum/Internship Evaluation	Dean of Clinical Training	Dean of Clinical Training	End of August	Action plan to be implemented August through August
Student-Supervisor Evaluations	Mutual student-supervisor midpoint and final evaluation; student evaluation of the site; preceptor evaluation	Individual students/Supervisors	Dean of Clinical Training	End of August	Action plan to be implemented August through August
Student Learning and Progress					
Course Learning Outcomes Report	Summative Exam mapped to learning outcomes and direct assessment of student learning using CLO rubrics: Project, Paper, Presentation, Performance, case study, etc. Results from ExamSoft Reports by Dean of Academic Affairs every December and June, Time2Track results by Dean of Clinical Training	Dean of Academic Affairs/Dean of Clinical Training	Assessment Committee	January and May	Next cycle
Program Learning Outcomes Report	Direct assessment of student learning using PLO rubrics: Project, Paper, Presentation, Performance, case study, etc. Results from ExamSoft	Dean of Academic Affairs/Dean of Clinical Training	Assessment Committee	May	Beginning of the academic year
Institutional Learning Outcomes Report	Direct assessment of student learning using ILO rubrics: Project, Paper, Presentation, Performance, case study, etc. Results from ExamSoft	Dean of Academic Affairs/Dean of Clinical Training	Assessment Committee	May	Beginning of the academic year

Co-curricular Learning Outcomes	Direct assessment of student learning using CoCuLO rubrics: Project, Paper, Presentation, Performance, case study, etc. Results from ExamSoft	Dean of Academic Affairs/Dean of Clinical Training	Assessment Committee	May	Beginning of the academic year
Grade Distribution Reports	Shared by Dean of Academic Affairs every Summer (Office of Academic Affairs)	Dean of Academic Affairs	Office of Academic Affairs	July	Beginning of the academic year
College					
Full Program Review including analysis of academic alerts, student progression (# on 5 year plan, # dismissed)	Program review conducted every 5 years by the College in conjunction with Institutional Effectiveness	Dean of Academic Affairs	Dean of the CODM program	2024-2025 (every 5 years)	Fall

DMD Co-Curricular Learning Outcomes (CoCuLOs)

CoCuLO	Initial	Developing	Developed	Proficient
1. Social Awareness and Cultural Sensitivity Students demonstrate awareness of and responsiveness to social and cultural differences by adapting behaviors appropriately and using effective interpersonal skills	<ul style="list-style-type: none"> Does not demonstrate awareness of others' feelings in relation to social or cultural differences Does not adapt behaviors to current social or cultural situations 	<ul style="list-style-type: none"> Demonstrates some demonstrate awareness of others' feelings in relation to social or cultural differences Demonstrates ability to adapt behaviors to current social or cultural situations 	<ul style="list-style-type: none"> Generally demonstrates awareness of others' feelings in relation to social or cultural differences Frequently demonstrates ability to adapt behaviors to current social or cultural situations 	<ul style="list-style-type: none"> Consistently demonstrates awareness of others' feelings in relation to social or cultural differences Consistently demonstrates ability to adapt behaviors to current social or cultural situations, as displayed by use of all of the following: appropriate language, use respectful tone, verification of understanding
2. Professionalism and Advocacy Students demonstrate professional behavior with other healthcare professionals and advocate for initiatives to improve patient care	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes or behaviors Does not advocate for initiatives to improve patient care 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors Occasionally advocates for initiatives to improve patient care 	<ul style="list-style-type: none"> Generally demonstrates professional attitudes and behaviors Often demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates professional attitudes and behaviors Consistently demonstrates ability to use these behaviors and values to improve healthcare
3. Self-Awareness and Learning Students demonstrate self-awareness through reflection and	<ul style="list-style-type: none"> Does not demonstrate self-awareness of own biases impacting ability to work with others 	<ul style="list-style-type: none"> Demonstrates minimal self-awareness of own biases impacting ability to work with others 	<ul style="list-style-type: none"> Often demonstrates self-awareness of own biases impacting ability to work with others 	<ul style="list-style-type: none"> Consistently demonstrates self-awareness of own biases impacting ability to work with others

DMD CoCuLo Proficiency Rubric

appropriate planning of self-directed learning and career advancement	<ul style="list-style-type: none"> • Does not show ability to reflect on own knowledge, skills, abilities, and experiences • Does not seek opportunities for personal growth and self-directed learning 	<ul style="list-style-type: none"> • Demonstrates rudimentary ability to reflect on own knowledge, skills, abilities, and experiences. • Occasionally seeks opportunities for personal growth and self-directed learning 	<ul style="list-style-type: none"> • Demonstrates some ability to reflect on own knowledge, skills, and experiences • Often seeks opportunities for personal growth and self-directed learning 	<ul style="list-style-type: none"> • Demonstrates ability to reflect on own knowledge, skills, and experiences • Regularly seeks opportunities for personal growth and self-directed learning
4. Innovation/ Entrepreneurship Students demonstrate innovation and creativity in accomplishing professional goals	<ul style="list-style-type: none"> • Does not demonstrate innovation and creativity in accomplishing professional goals 	<ul style="list-style-type: none"> • Demonstrates minimal innovation and creativity in accomplishing professional goals 	<ul style="list-style-type: none"> • Demonstrates innovation and creativity but professional goals may not be feasible or appropriate 	<ul style="list-style-type: none"> • Consistently demonstrates innovation and creativity in accomplishing professional goals
5. Public Health and Education Students apply learned skills to deliver public health initiatives and education to the community	<ul style="list-style-type: none"> • Does not apply learned skills to deliver public health initiatives and education to the community 	<ul style="list-style-type: none"> • Demonstrates difficulty applying learned skills to deliver public health initiatives and education to the community 	<ul style="list-style-type: none"> • Demonstrates sufficient application of learned skills to deliver public health initiatives and education to the community 	<ul style="list-style-type: none"> • Demonstrates appropriate and effective application of learned skills to deliver public health initiatives and education to the community
6. Service and Leadership Students demonstrate the ability to lead and work collaboratively with others to accomplish shared goals	<ul style="list-style-type: none"> • Functions to satisfy personal needs rather than those of the healthcare team 	<ul style="list-style-type: none"> • Demonstrates minimal ability to contribute toward shared goals 	<ul style="list-style-type: none"> • Generally contributes toward shared goals 	<ul style="list-style-type: none"> • Consistently contributes toward shared goals

DMD Institutional Learning Outcomes (ILOs)

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues within the field of oral health	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the dental factors that contribute to the diagnosis 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible dental factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most dental factors that contribute to the diagnosis 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible dental factors that contribute to the diagnosis
1.2. Demonstrates identification of resources in the field of oral health	<ul style="list-style-type: none"> Does not identify appropriate resources in the field of oral health 	<ul style="list-style-type: none"> Identifies a few resources needed in the field of oral health 	<ul style="list-style-type: none"> Identifies most of the resources needed in the field of oral health 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources in the field of oral health
1.3. Finds and interprets data needed for critical thinking and decision making regarding oral health	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making relating to oral health 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to interpret data relating to oral health 	<ul style="list-style-type: none"> Demonstrates the ability to interpret data relating to oral health 	<ul style="list-style-type: none"> Demonstrates an advanced ability to correctly interpret oral health data
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions

1.5. Proposes and selects appropriate oral health solutions	<ul style="list-style-type: none"> Does not propose solutions to the patient's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action regarding oral health treatment plans and decisions.	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid, supporting evidence from available dental literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision with appropriate and relevant supporting case evidence, and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate oral health knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates an advanced ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of oral health 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience of constituencies	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates an advanced ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought in discussing aspects of oral health	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques when addressing questions relating to oral health	<ul style="list-style-type: none"> Does not acknowledge other viewpoints Has great difficulty answering questions 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> Recognizes and carefully weighs other viewpoints Adequately answers patient questions 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative viewpoints Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning of oral healthcare to audience	<ul style="list-style-type: none"> Vocal delivery is too soft or too fast Long, unintended silences and/or speech disruptions frequently distract audience Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> Vocal delivery is audible Speech rate or volume disruptions occasionally distract from comprehension Attempts to engage audience 	<ul style="list-style-type: none"> Vocal delivery is varied and dynamic Speech rate, volume, and tone enhance listener interest and facilitate understanding Generally engages audience 	<ul style="list-style-type: none"> Vocal delivery is varied and dynamic Speech rate, volume, and tone enhance listener interest and facilitate understanding Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors expected from a dentist	<ul style="list-style-type: none"> Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> Does not demonstrate an awareness of patients' customs, beliefs, or perspectives Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates awareness of customs and beliefs Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates awareness of customs, beliefs, or perspectives in patients Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> Appears inattentive and impatient Uses inappropriate body language Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> Appears unfocused and distracted Uses acceptable body language Dresses in attire that is not offensive 	<ul style="list-style-type: none"> Appears composed and focused Uses appropriate body language Dresses in attire that is professional 	<ul style="list-style-type: none"> Uses articulate, tactful, and diplomatic speech Uses professional body language Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply mathematical principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic mathematical calculations but does not know how to apply mathematical principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most mathematical calculations accurately and to apply mathematical principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform mathematical calculations accurately and to appropriately apply mathematical principles to solve problems

5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to generate conclusions based on current scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to generate conclusions using scientific data 	<ul style="list-style-type: none"> Demonstrates an advanced ability to accurately generate conclusions using appropriate scientific data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references relating to oral health 	<ul style="list-style-type: none"> Incorporates references from dental sources that do not clearly support ideas 	<ul style="list-style-type: none"> Incorporates relevant oral health references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant oral health references from respected sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in correct style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited oral health references and includes all necessary information in reference list

DMD Program Learning Outcomes (PLOs)

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for understanding or rephrase when confusion occurs. Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding and generally asks questions. Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding and asks appropriate questions. Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities. 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities) 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> Does not demonstrate understanding of oral healthcare delivery systems parts Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<ul style="list-style-type: none"> Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care Demonstrates understanding of some challenges that can affect delivery of oral healthcare Demonstrates some understanding of how to work with different subsystems and how they 	<ul style="list-style-type: none"> Demonstrates understanding of most major components of oral healthcare systems and their respective relationships Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic 	<ul style="list-style-type: none"> Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly

		function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> Demonstrates minimal understanding of population-based care and how it influences patient-centered care Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> Demonstrates sufficient understanding of population-based care and how it influences patient-centered care Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<ul style="list-style-type: none"> Demonstrates superb understanding of population-based care and how it influences patient-centered care Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> • Does not demonstrate logical reasoning in oral communications in patient care. • Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> • Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. • Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> • Generally demonstrates logical reasoning in oral communications in patient care. • Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> • Consistently demonstrates logical reasoning in oral communications in patient care. • Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> • Does not demonstrate logical reasoning in written communications in patient care. • Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> • Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. • Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> • Generally logical reasoning in written communications in patient care. • Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> • Consistently demonstrates logical reasoning in written communications in patient care. • Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action. 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level. 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. • Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or

				decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	--	---

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

CNUCDM Graduation Competencies

The CNUCDM DMD graduate will:

1. Demonstrate patient interaction that provides able and personable communication with the patient that addresses all clinical issues and addresses concerns in an empathetic and culturally aware fashion
2. Provide verbal and written patient presentation that demonstrates the ability to present key findings and organize them in a fashion to make appropriate care decisions.
3. Utilize all pertinent biomedical knowledge to influence and optimize the care of the patient
4. Apply knowledge with critical thinking developed in the care of patients across all pertinent multiple domains.
5. Demonstrate the ability to comfortably apply clinical skills for dental procedures in a fashion that promotes the continued development of skills, patient confidence, and consideration for applying more advanced skills when needed.
6. Apply the tenets of ethical behavior and professionalism with exemplary leadership empathy, clinical behavioral understanding customized to the patient's needs.
7. Integrate all aspects of the practice management, systems-based practice, legal and regulatory requirements of practice and consistently applies this knowledge as a skill in clinical practice.

(Note each of these is measured in the Competency Evaluation grading rubrics for clinical competencies with the following titles in Appendix 2-24 competency evaluation general rubric for clinical dentistry CE as follows)

Patient interaction
Patient presentation
Application of biomedical knowledge
Critical thinking
Clinical skills

Ethical behavior/ professionalism
Practice management/systems based practice/ Legal regulatory

Odontogenic Infections and Exodontia in dental practice Calibration of CNU protocols

Leon A. Assael DMD

What is the status of oral health in America? David Satcher MD

- a “silent epidemic” of dental and oral diseases is affecting some population groups. This burden of disease restricts activities in school, work, and home, and often significantly diminishes the quality of life. Those who suffer the worst oral health are found among the poor of all ages, with poor children and poor older Americans particularly vulnerable. Members of racial and ethnic minority groups also experience a disproportionate level of oral health problems. Individuals who are medically compromised or who have disabilities are at greater risk for oral diseases, and, in turn, oral diseases further jeopardize their health.

Burden of Oral Disease in US

- Dental caries, >50% of preschoolers and 280 million americans
- Periodontal disease: active in >50%
- Oral cancer: 30,000 new cases per year with 40% five year survival
- Cleft lip and palate: 1/600 births
- Temporomandibular disorders: 30-40% of adult population

Evaluation of the patient with odontalgia

- History
- What is VAS pain scale
- How long
- What qualities
- What relieves pain
- What worsens pain
- Fever, malaise, loss of PO intake

Recent cases

Infection

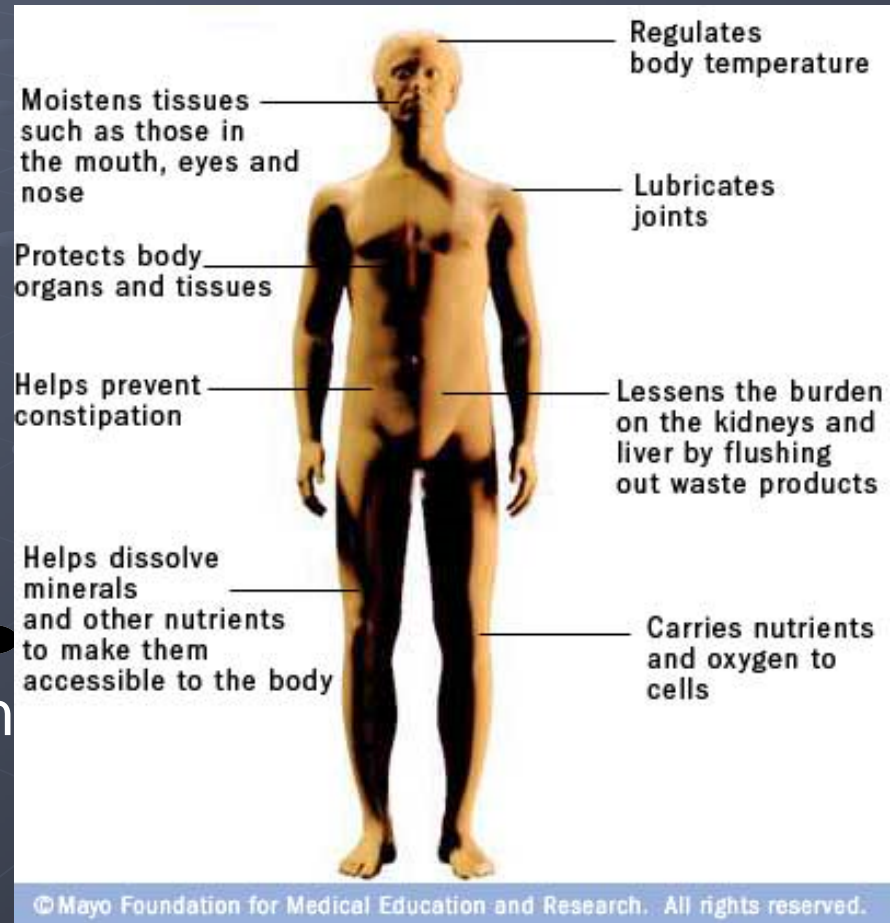

- 32 year old man with infected #31 extracted, neck swelling postoperatively
- Place on oral antibiotic
- Drainage from socket
- Fever, sepsis
- Hospitalization
- Mediastinitis
- Death

Bleeding

- Full mouth extraction 52 yr old
- Undiagnosed/not worked up Hepatitis C
- Postoperative bleeding
- Eventual INR of 10
- Bleeding continues
- GI bleed
- Stroke
- Death

dehydration

- Less than 2 liters intake per day
- Heat, no air conditioning
- Fever
- Xerostomia
- Dark low volume urine
- Tachycardia, hypotension

Differential diagnosis of odontalgia

- Caries
- Periodontal disease
- Sinusitis
- Bells palsy
- Other herpetic or nonherpetic virus
- Neuralgia
- Myogenous Pain
- Vascular pain/headache

Be suspicious of atypical
appearance

Exam in odontalgia

- Rubor
- Dolor
- Calor
- Tumor
- Vital signs
- Tenderness
- Swelling
- Trismus
- Dysphonia
- Dysphagia
- Dyspnea
- Eye signs

Thorough head and neck exam

● Photos eliminated here

Dental/Osseous Exam

- Inspection
- Palpation
- Percussion
- Fetor

Photos eliminated here

Salivary Gland Exam

- Submandibular gland and duct
- Sublingual gland and duct
- Parotid Gland and duct
- Palpate for masses and assess flow should be clear and easily expressed

Neck Exam

- Lymph nodes
- Submandibular gland
- Trachea
- Thyroid
- Carotids

● Photos eliminated here

Dental Caries

Caries, an infectious disease

- 70-90% of children by the second grade
- Over 1 million lost school days each year due to odontalgia
- Developing pain behavior/subsequent drug use?
- The MOST common unmet health need

Pit and Fissure vs. Smooth Surface Caries

Early childhood (milkbottle) caries

- Diet
- Hygiene
- Exposure to pathogens
- Fluoride dose
- Vitamin D dose
- Aluminum and heavy metal exp.

● Photos eliminated here

Meth mouth

- Smooth surface rapidly advancing caries associated with Methamphetamine use
- Xerostomia, immunosuppression, diet
- Psychosocial aspects of addiction

Stages of Caries

Swelling

- How much
- Where
- Changes over how many hours/days
- Look for secondary findings especially difficulty handling secretions, “grandpa sitting in the chair posture”
- Assess fever, hydration

Assessing swelling

Photos eliminated here

Caries and head and neck infection

- Catastrophic potential
 - Airway obstruction
 - Sepsis
 - Necrotizing fasciitis
 - Cavernous sinus thrombosis

● Photos eliminated here

Periodontal Disease

- Most common oral disease
- Mixed anaerobic infection
- Most common reason for tooth loss
- Linked to systemic disease especially atherosclerotic diseases

Some Systemic causes of Rapid progression of PD

- HIV
- Cigarettes
- Osteopenia
- Osteomalacia/rickets
- Scurvy
- Betel nuts
- Leukemia

Medical or surgical management of Abscess?

● Medical

- Patient not medically fit for procedure
- Needs STAT referral due to complexity
- Tooth will be opened and saved

● Surgical

- Never let the sun set on undrained pus!
- Only vestibular drainage is done properly in the office
- Exodontia if the tooth can be extracted without significant surgical trauma e.g.
- Elevator and forceps!

NOT third molars:
too much anticipated trauma

Eliminate pericoronitis BEFORE extraction

Photos eliminated here

Management

- Osseous injuries

- Management – multiple, dictated by specific problem

- Tooth – bone removed together with tooth

- If clean morselize and replace

- Fracture of tuberosity

- Reposition and restore contour

Oro-antral communication

- Preventive – preoperative evaluation
 - Root – sinus relation
 - History of pre-existing sinus disease
- Diagnosis
 - Look and listen
 - Nose blow test NOT generally recommended
- Sequelae
 - Oro-antral (O-A) fistula
 - Acute to chronic sinusitis

Oro-Antral Communication Treatment

- Small hole, less than 3 mm.
 - Obturation with bone, suture
- Medium size
 - Obturation with bone, gelfoam, primary closure
- Large
 - Flap surgery

Most Prevalent Dental Misadventures

Pregnancy, Aging and other complicating factors

Photos eliminated here

- Premature low birth weight babies
- Myocardial Infarction
- Senile dementia
- Stroke

Always Consider other pathology: all uninitiated HCP's e.g. physicians will think this is an infections

- SCC dx Nearly all by dental professionals
- Most likely dental hygienest
- None by physicians

The mouth is a mirror

- A thorough oral examination can detect signs of nutritional deficiencies as well as a number of systemic diseases, including microbial infections, immune disorders, injuries, and some cancers. Indeed, the phrase *the mouth is a mirror* has been used to illustrate the wealth of information that can be derived from examining oral tissues.

Systemic disease in oral cavity

Extranodal B cell lymphoma

Graft v. Host

Antibiotic Considerations in the Dental Surgery Patient

Antibiotic Considerations

Antibiotics

Surgery

Immune
System

Antibiotic Considerations

- Oral Contraceptives
- Antibiotic Failures
- Antibiotic Theory
- Antibiotic Prophylaxis
- Immunocompromised Patients & Antibiotics
- Pregnancy & Antibiotics

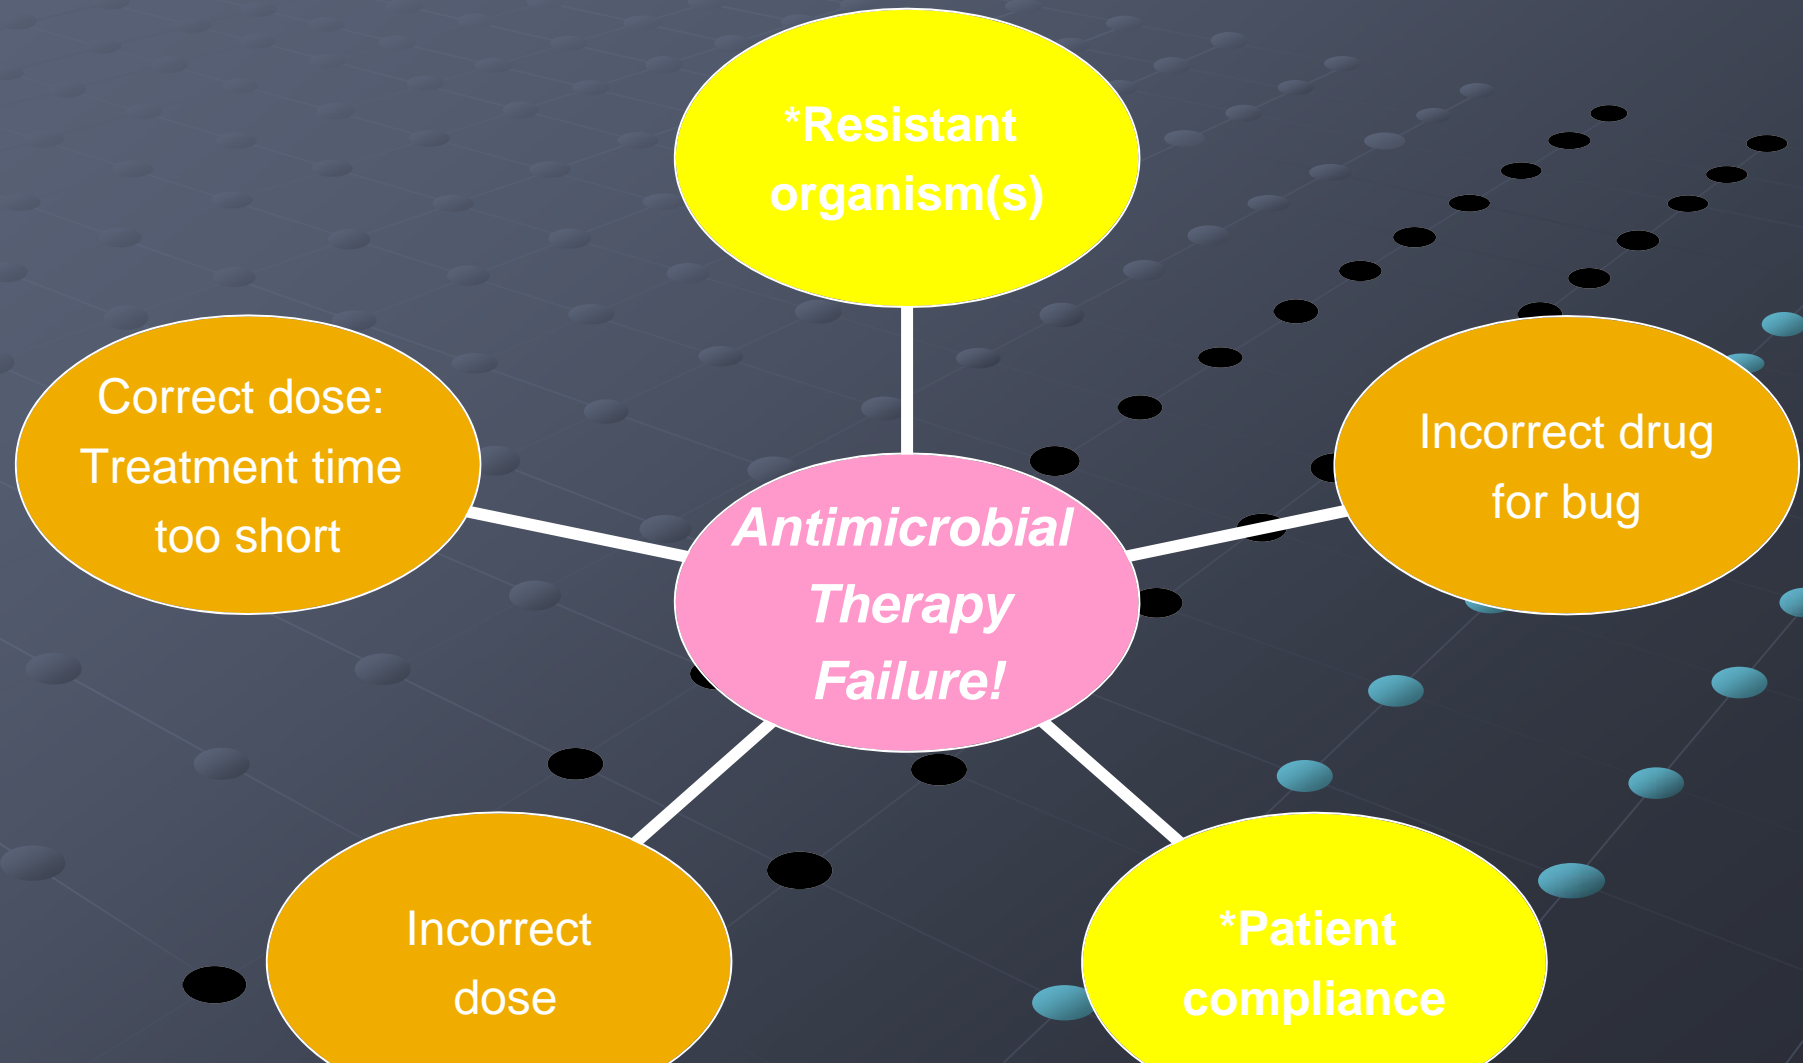

Antibiotic Considerations

● Oral contraceptives

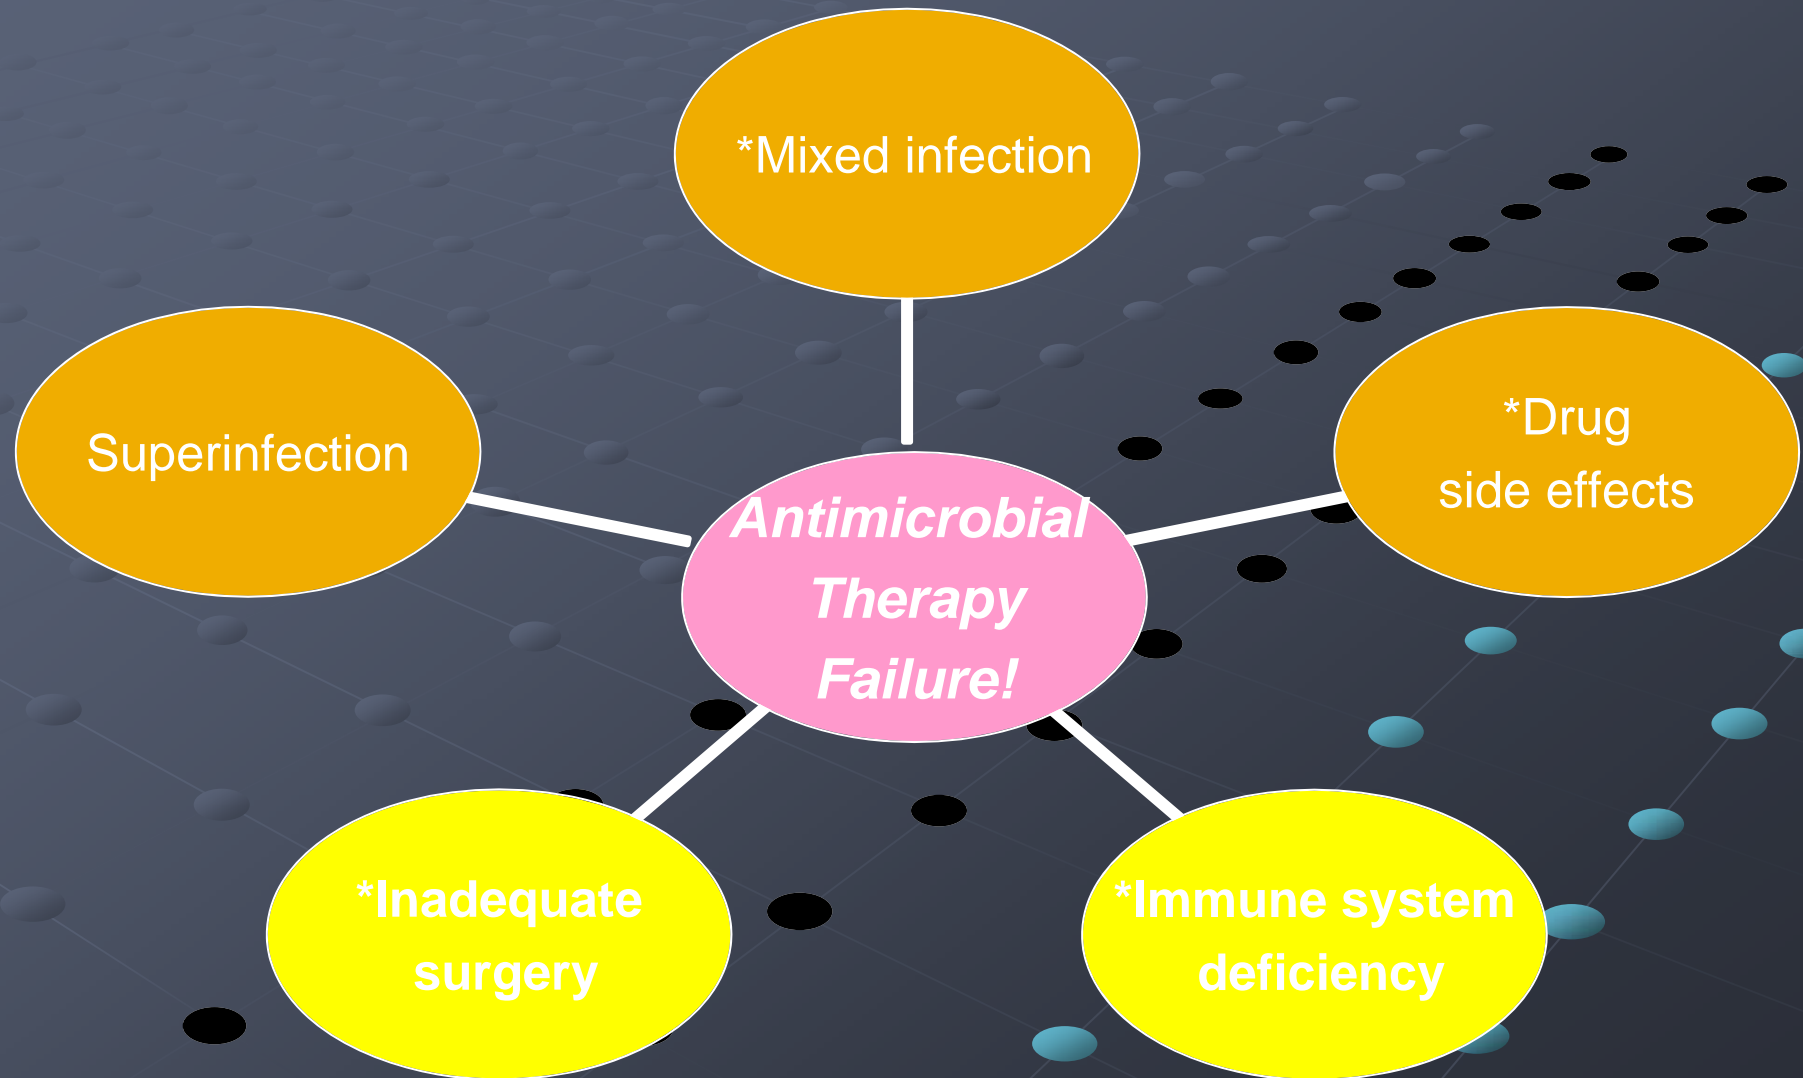

- >99% effective if used properly
- Contraceptive failure (? due to antibiotic killing bacteria needed for proper birth control pill absorption)
- Ampicillin, Tetracycline, Penicillin, Flagyl, Erythromycin have case reports

Antibiotic Considerations

Antibiotic Considerations

Antibiotic Considerations

<u>Bactericidal</u> Antibiotics	<u>Bacteriostatic</u> Antibiotics
Penicillin(s)	*Clindamycin
Cephalosporin(s)	Tetracycline(s)
Metronidazole	Erythromycin
Vancomycin	Clarithromycin
Aminoglycosides	Azithromycin
Ciprofloxacin	Sulfa

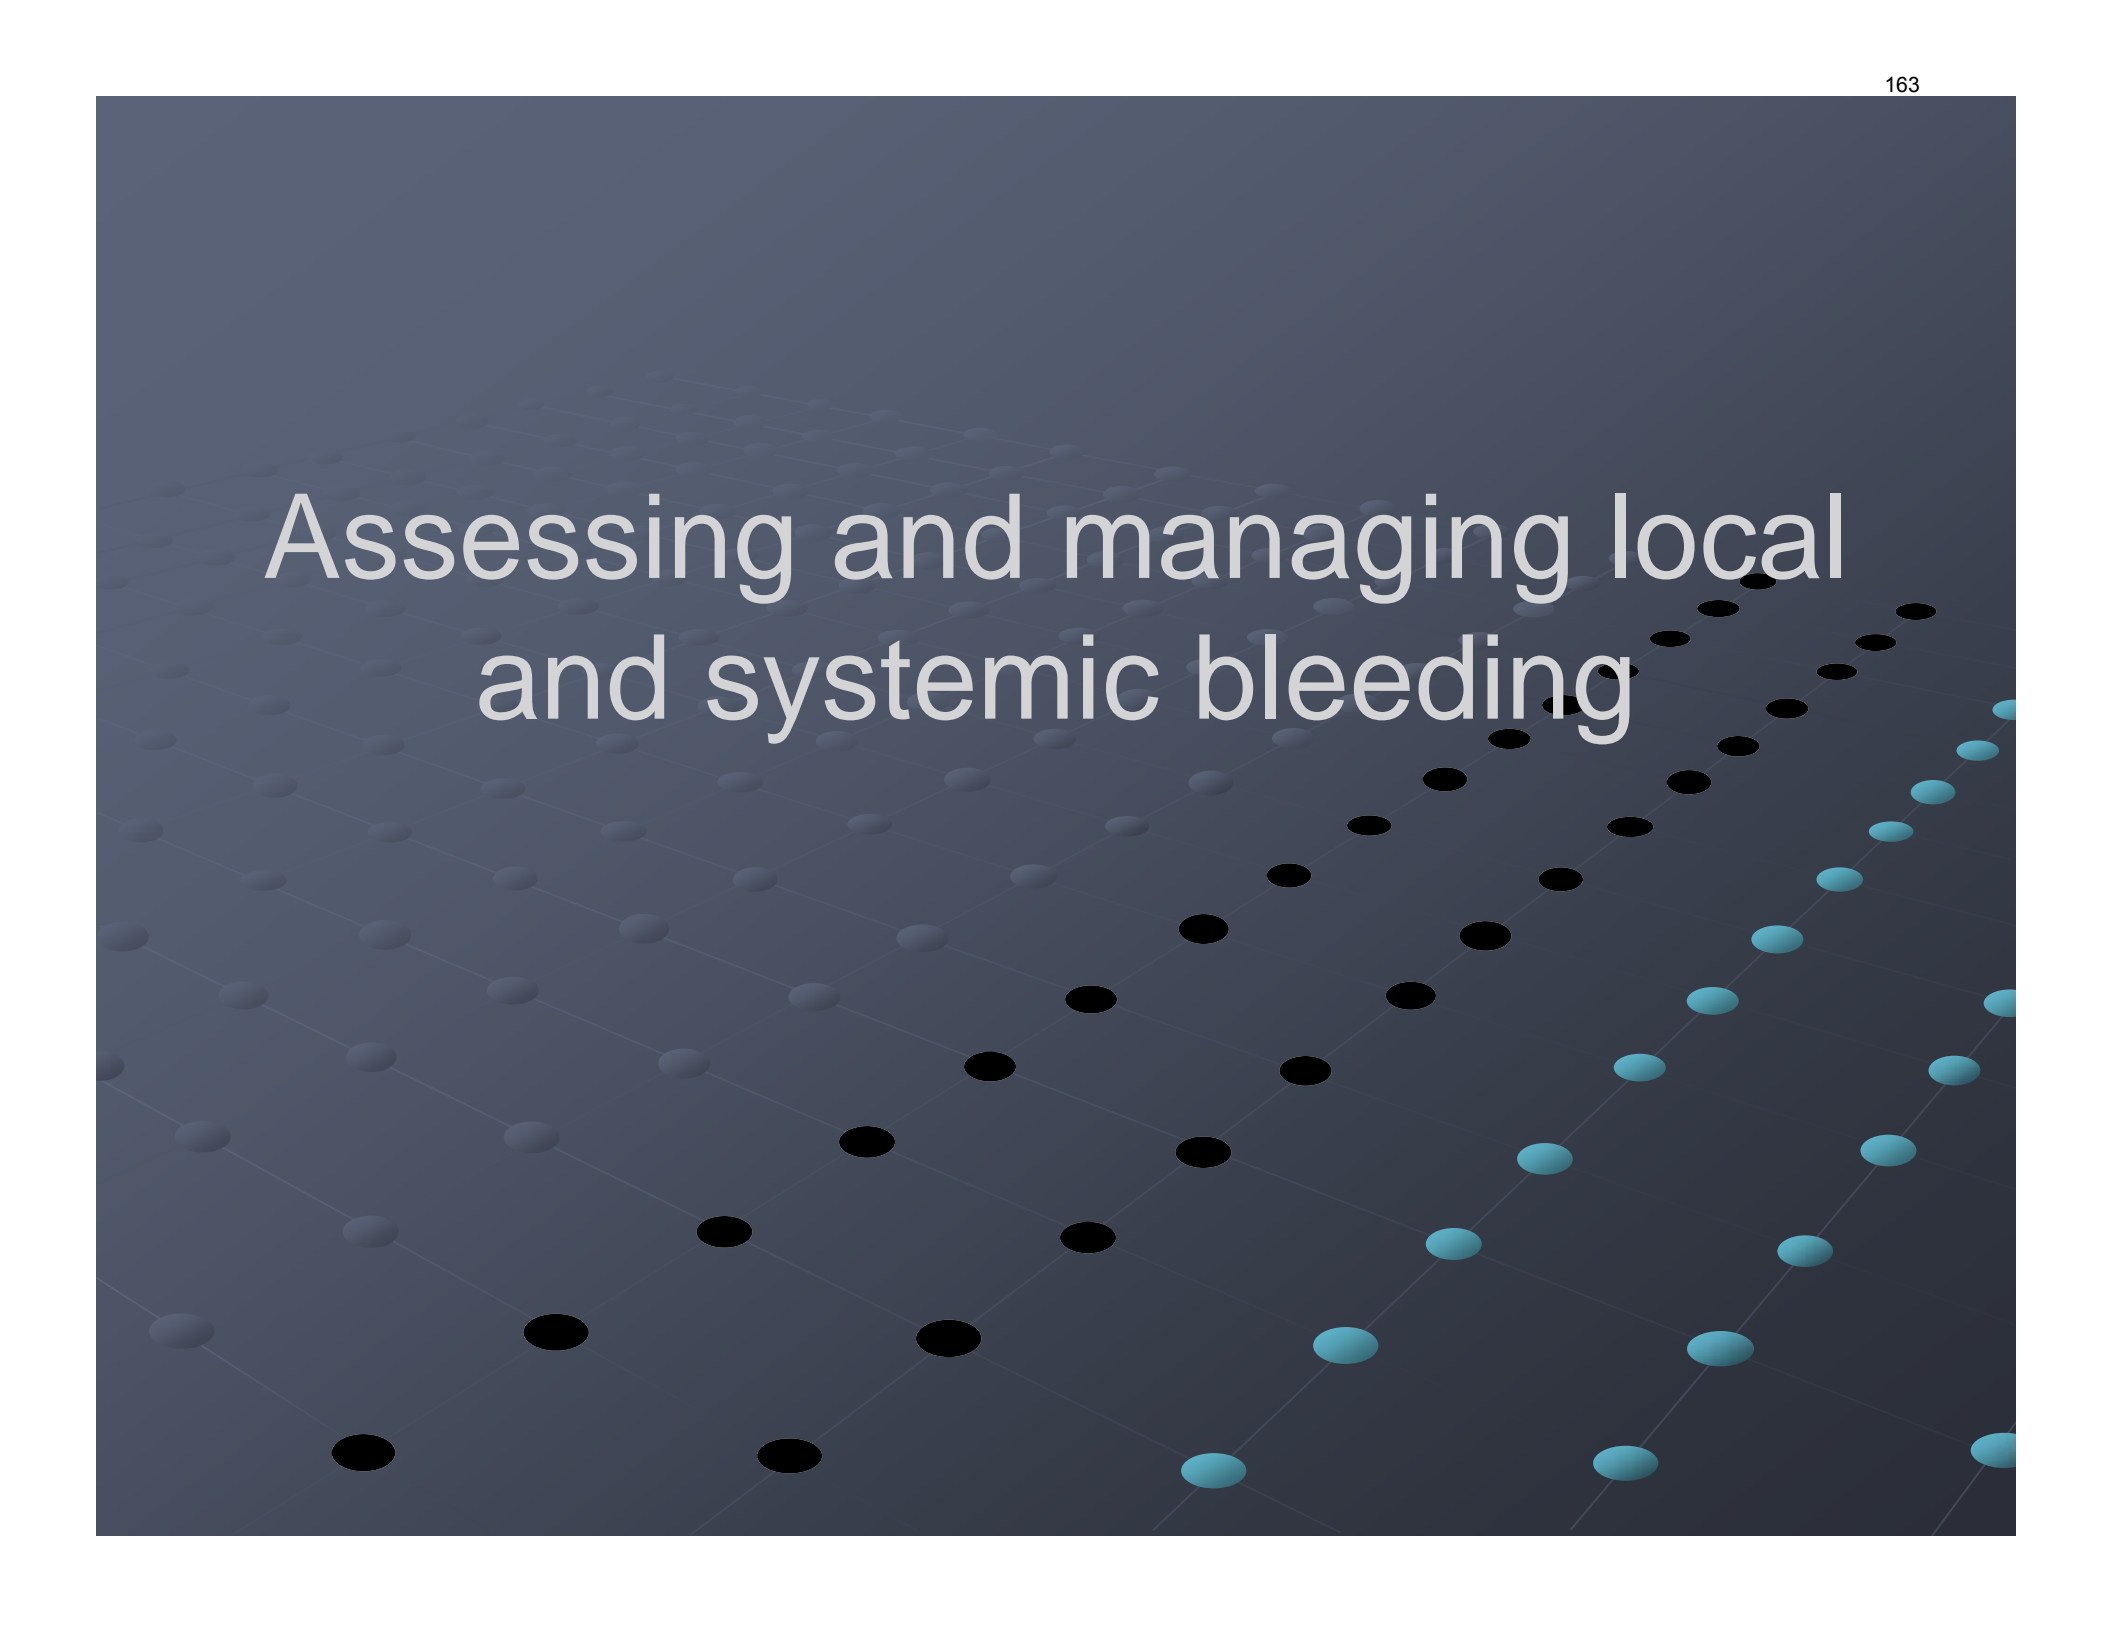

Odontogenic Infection

- Pen VK 500 mg qid for 7 days
- Clindamycin 300 mg. Tid
- LESS EFFECTIVE AT MORE THAN 10 TIMES THE COST

Antibiotic Considerations

Antibiotic Use During Pregnancy and Breast Feeding				
Drug	FDA Cat.	Pregnancy	Risk	Breast Feeding
Penicillin	B	Yes		Yes
Erythromycin	B	Yes (avoid estolate)		Yes
Cephalosporin	B	Yes		Yes
Tetracycline	D	Avoid	Tooth discoloration Inhibits bone formation	Avoid
Flagyl	B	?	Carcinogenic?	?
Clindamycin	B	Yes		Yes (?)

Assessing and managing local and systemic bleeding

The background of the slide is a dark blue-grey color. It features a faint, light-grey grid pattern. Overlaid on this grid are numerous small, semi-transparent dots. The dots are primarily grey, but there are also black dots and a diagonal line of teal dots that runs from the bottom right towards the center of the slide.

Local Factors

- Blood Supply
 - Anatomy
 - Pre-existing disease
 - Infection
 - Injury
 - Tumor/vascular malformation
- Mean Wound Blood Pressure
 - Patient position
- Vasodilation/vasoconstriction
 - (e.g. xylocaine, epinephrine)
- Tamponade
- Patient Compliance

Systemic Factors

- Mean Systemic Blood Pressure
- Platelets, number and function
- Clotting factor function
 - Anticoagulant drugs
- Clotting factor amounts
- Liver function
- Tissue/serum PH
- Body temperature
- Medications
- Diet

Prevention

Assessing Risk of Bleeding

- What procedure
- What illnesses/history
- What Drugs
- Assess organ function

What procedure

- If extractions how many?
- Is it a “closed space” procedure?
- “open space” procedures, will it ooze?
- Full mouth extraction =250-500cc,. Blood loss
- Floor of mouth, infratemporal fossae bleeding can be extensive
- E.g. Open extraction sockets

What Illnesses/ medical history

- History of bleeding after surgery
- Easy bruising
- Heavy menses
- Anemia/pancytopenia
Fatigue/asthenia
- Drug abuse
- Liver disease
- ?undetected von willebrands
- Collagen diseases
- Thrombocytopenia
- Iron deficiency, hemolytic anemias
- Bone marrow supp.
- Vit K dependent factor depletion

Occult bleeding disorders

- Von Willebrands Disease
- Idiopathic thrombocytopenic purpura:
Cyclical thrombocytopenia
- Occult Salicilate use: herbs
- Mild hemophilias

What Drugs

- Aspirin
 - 20-25% increase
- Lovenox
 - No increase in bleeding
- Coumadin
 - Generally acceptable in therapeutic range, reduce if low risk for thromboembolic event, assess risk of consumptive coagulopathy
 - More elevation of INR with antibiotics!

Drugs (cont)

- Antibiotics enhance absorption of coumadin and will raise INR!
- Consumptive coagulopathy will occur if existing clotting factors are depleted by the surgical insult, worsened by fever and infection.

Drugs (cont)

- Patients on coumadin with high risk for thromboembolic catastrophe include
 - Peripheral vascular disease,
 - lost leg
 - Atrial fibrillation,
 - stroke
 - History of pulmonary embolism,
 - fatal lung embolism

Assess organ/clotting function

- Prothrombin time/INR
- Bleeding time
- LFT's
- CBC with platelets

Primary and Secondary Hemostasis

● Primary Hemostasis

- “Platelet plug”
- Minutes to hours

● Secondary Hemostasis

- “coagulation cascade”
- Hours to days
- Formation of fibrin

Primary Hemostasis

- Collagen exposed at injury site
- Platelets adhere to collagen
 - Vessel spasm
- von Willebrand's factor released
- Platelet aggregation
- Platelet plug stabilized
 - Fibrin

Secondary Hemostasis: The coagulation cascade

Photos eliminated here

Vascular lesions of the jaws

● Neoplasms

- Hemangiomas
- Hemangiopericytoma, hemangioendothelioma
- Giant Cell/aneurysmal bone cyst

● Hemartomas

- Venous
- Mixed
- Arterial

Photos eliminated here

Secondary Bleeding

● SEE PATIENT!

- Identify source/site
- Anesthetize area – blocks preferred
 - Crush – bone
 - Clamp & tie
 - Pack
 - Suture – “stick tie”

Photos eliminated here

Local hemostatic tools

- Gelfoam
- Surgicel
- Topical Thrombin
- Avitene
- Collacoat
- Bone wax
- Cyanoacrylate glue

Other local measures

- Amicar
- Fibrin glue
- Platelet rich plasma (PRP)

Local Hemostasis Tools

	Disorder	Rationale	Tool
Coumadin therapy	INR, secon hemostasis	Bypass clot cascade	Topical thrombin
Thrombocytopenia	Primary hemostasis	Initial clot matrix	Avitene
Slow open wound ooze	Wound surface	Matrix for wound surface	Gelfoam Surgicel
Arterial bleed from bone	Blood pressure	tamponade	Bone wax

Local tools (cont)

	Disorder	Rationale	Tool
Classic hemophilia	Intrinsic syst, fact VIII	Prevent fibinolysis	Amicar Topical thrombin
Facial trauma ooze	Vasodilation Contusion	Wound adhesion	Fibrin glue

Systemic Control

Depends on the underlying problem

- Platelets
 - DDAVP
 - Humate P
 - FFP
 - Vitamin K
 - Factors
 - Activated factor VIIa
 - Blood
- Thrombocytopenia
 - von Willebrand's disease
 - DIC
 - INR 10
 - Hemophilia
 - Ongoing blood loss despite surgical/medical control measures
 - Massive bleeding from trauma

Hemostasis is a Shared Responsibility

Assael, LA. Journal of Oral and
Maxillofacial Surgery 61.12: 2003

Postoperative analgesia axioms

- Ibuprofen as effective as narcotic
- Patients should not get new Rx if not used as instructed.
- No narcotics by phone for patient not of record in your practice.
- Patients prefer narcotics combinations
- Drug abusers prefer non-combination narcotics
 - Street value from 1-5 dollars per miligram!
 - Non combination pills can be melted and injected.

Postoperative Instructions (a process, not a form alone)

● Patient understands

- Procedure performed
- Activity
- Supervision
- Diet
- Hygiene
- Wound care
- Medications
- Precautions
- Call me for
- Form includes Recapitulation of above items
- 24/7 contact information

Must see postops.

- Swelling
 - Trismus
 - Difficulty handling oral secretions
 - dyspnea
 - Lack of po
 - Fever
- Have local hospital and OMS resources in place before you need them

Primary Tooth Pulp Therapy

Treatment Planning Considerations in Primary Dentition

- Prevention and Caries Risk Status
- Types of Restorations
 - Composites, crown types (SSC vs. zirconium)
- Pulp Therapy
 - Pulp capping: indirect & direct
 - Pulpotomy
 - Pulpectomy
- Alternatives
 - No treatment
 - Extractions
- Behavior Management (not in this course)

Why Preserve Primary Teeth?

Answers for Parents

- Primary reason: Premature loss of primary teeth may lead to changes in arch length
- Mesial drift of permanent teeth → leads to malocclusion
 - Translation: Crowding & possible need for expensive orthodontics in future
- Enhancement of mastication & possibly minimizing developing periodontal issues
- Prevents the potential for psychological effects of premature tooth loss – teasing by peers
- Possibly aids in speech development, maintenance and production**

Primary Diagnostic Processes & Considerations

- Clinical History
- Clinical Assessment
 - Caries – extent and type
 - Delay treatment in uncooperative or very young children (e.g., silver diamine txmt)
 - Need for pulp therapy?
 - Arch evaluation
- Radiographs

Clinical History: Issue of Pain & Possible Pulp Therapy

Type, Timing, and Periodicity of Pain	Recommended Treatment
Usually specific stimuli Thermal Chemical <u>Variously Intermittent & of short duration</u>	Reversible pulpitis → vital therapy (e.g., pulpotomy) Sometimes children do not report pain, especially very young children
Spontaneous Nocturnal “Constant”, dull, throbbing	Irreversible pulpitis → nonvital therapy (e.g., pulpectomy or extraction)

Clinical Assessment of Pulpal Status – Other Clinical Signs/Symptoms

- Extent & depth of lesion
- Color of lesion
- Mobility of tooth
- Soft tissue swelling
 - parulis
- Lymphadenopathy
- Sensitivity to percussion
- Pulp testing
 - Electrical
 - Thermal
 - Percussion
- Pulp exposure –
hemorrhagic vs. necrotic

Radiographic Examination

- Bitewings best for visualization of furcation (lots of accessory canals)
- Follow-up with periapicals of affected teeth
- Compare lamina dura and furcal area of questionable teeth with contralateral and

Radiographs give clues...

- Deep caries with possible or definite pulp involvement
- Deep restorations close to pulp horn
- Pulp changes (calcification or obliteration)
- Successful or failing pulpotomy or pulpectomy
- Periapical or inter-radicular radiolucencies
- Pathologic resorption
 - Internal—inflammation of vital pulp
 - External—nonvital pulp with extensive inflammation

What Are Our Choices For Pulp Therapy?

Vital & Non-Vital Pulp Treatment

- Vital Pulp
 - Indirect pulp cap (IPC)
 - Direct pulp cap (DPC)
 - Pulpotomy
 - Partial Pulpotomy/Cvek
- Non-vital pulp
 - Pulpectomy
 - Extraction

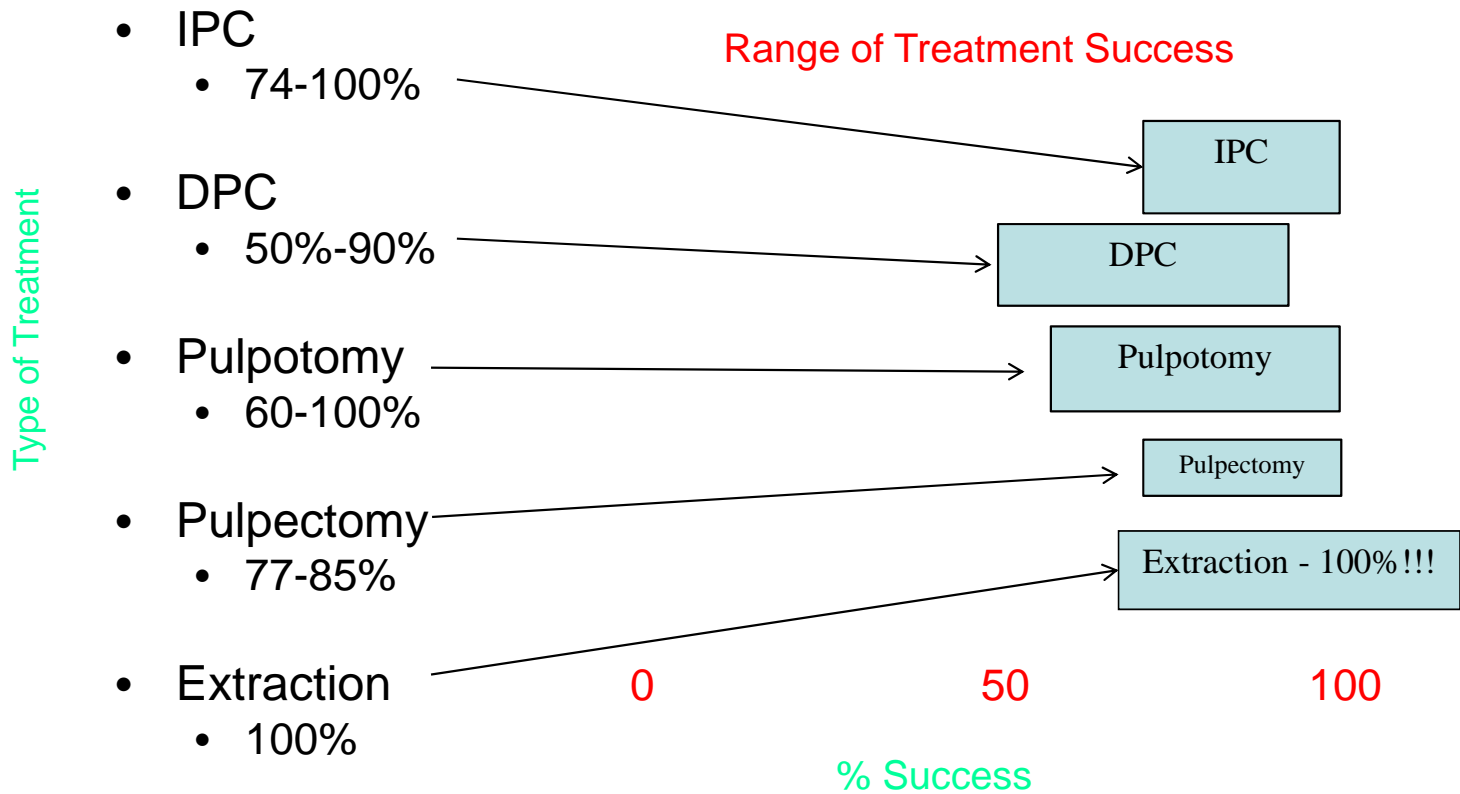

Things to Consider

- Patient caries risk implications
- Patient's medical condition
 - Healthy versus immunocompromised
- Radiographic pathology
 - Resorption—internal or external
- Value of involved tooth in child's development
 - Primary 1st molar
 - Primary 2nd molar
- Restorability of teeth
- Near exfoliation date

Reported Success Rates

Vital Pulp: Option 1

The Indirect Pulp Cap (IPC)

This type of treatment is NOT new, but it is the latest rage in pediatric dentistry

Indirect Pulp Cap: What it is?

- Minor amount of carious dentin near pulp preserved to avoid pulp exposure
- Covered and sealed with biocompatible material (e.g. MTA, Vitrebond)

Indirect Pulp Capping

Objectives:

- Arrest caries process
- Promote dentin sclerosis
- Stimulate tertiary dentin formation
- Remineralizing affected dentin

Indirect Pulp Capping

Indications:

- Tooth with deep carious lesions
- No signs/symptoms of irreversible pulpitis
- High possibility of pulp exposure if continue prepping (but dentin is less affected & more “hard”)
- No pulp exposure during preparation

How to do it

- Remove gross caries
 - Large round bur is best
- Leave caries over pulp horn to avoid exposure
- Extend walls of cavity to sound tooth structure
 - To achieve adequate seal
- Cover affected area with agent (e.g., MTA, Vitrebond)
- Restore
 - Interim vs. definitive
 - Re-enter in 6-8 weeks vs 6-8 months?

Agents used for IPC

- Calcium
- RMGI
- Mineral aggregates

therapy for
primary dentition

Vital Pulp: Option 2

The Direct Pulp Cap

Direct Pulp Cap: What is it, exactly?

- Application of medicament or dental material in direct, intimate contact with mechanically exposed pulpal tissue.
- Generally contraindicated in carious pulp exposures
 - Microorganisms present or introduced into pulp and lead to inflammation

Direct Pulp Capping Agents

- Ca(OH)_2
 - pH 12
 - Has been shown to cause internal resorption in carious exposures
- MTA
 - Excellent non-toxic choice for pulp capping
 - More dentin bridging in shorter time and less inflammation than calcium hydroxide
 - Some brands are expensive – but quality outcome!!
 -
- Glass ionomer cement 
 - Vitrebond™ is a RMGI base/liner and is **NOT** recommended for direct contact with pulpal tissue

Prognostic Indicators

- Size of exposure
- Bleeding
 - Inverse relationship between amount of bleeding and DPC success
- Keep pulp moist!!!
 - Do not desiccate, but instead irrigate with saline or LA solution (i.e. sterile solution)
- Success
 - 80-90% in absence of inflammation

Vital Pulp: Option 3

The Pulpotomy

Pulpotomy

Contraindications

- Mechanical or carious exposure
 - Absence of spontaneous pain
 - Absence of swelling or abscess
 - Restorable tooth
- Presence of fistula or swelling
 - Evidence of necrotic pulp
 - Uncontrolled pulpal hemorrhage
 - PA or furcal radiolucency
 - Pathologic resorption of pulp
 - Less than 1/3 of root remaining

Medicaments

- Fixatives
 - Formocresol ; gluteraldehyde
- Mineralizing & bacteriostatic
 - Calcium hydroxide
- Palliative/sealers
 - ZOE
- Bioactive agents
 - MTA
- Coagulants
 - Ferric sulfate
 - Aluminum chloride
 - Epinephrine
- Antibiotics/antimicrobials
 - Sodium hypochlorite
 - Chlorhexidine
- Glucocorticoids
 - Corticosteroids
- Bone and osteogenic proteins

MTA is used successfully for everyday dental procedures

Vital Pulp Therapy for Primary and Permanent teeth

- Pulp-capping
- Cavity Liner
- Base Material
- Pulpotomy
- Perforation repair

MTA seen in yellow

Documented Complications of Pulpotomy Medicaments

- Formocresol
 - Internal resorption
 - Decreased success over time
 - Mutagenicity concerns
- MTA – “the growing rage”
 - Pulp canal obliteration
- Ferric Sulfate
 - Can achieve hemostasis prior to clinical assessment and character of pulp→failure.
Therefore apply moist cotton pellet to pulp stumps for 1 min prior to application of FS
- Calcium Hydroxide
 - Internal resorption

Pulpotomy: How to do it

- Pulpal access
 - 330 burr to remove roof of pulp chamber (man hole cover)
 - High speed w/H₂O ??
- Pulpal debridement
 - 6-round
 - Slow speed
 - Stay away from inter-radicular floor area
 - Spoon excavator as needed

Definitely need a rubber dam!!!!

Pulpotomy Illustrations

What is wrong with this picture?

Pulpotomy How-to

- Pulpal hemostasis
 - Moist cotton pellet
 - Chlorhexidine or NaOCl
- Pulpal medicament
 - Chlorhexidine or NaOCl (4-5 min)
 - FC very dry (1-5 min)
 - FS (15 sec)
- Pulpal coverage
 - **MTA (only with Chlorhexidine or NaOCl)**
 - ZOE/IRM (fortified ZOE)
 - VITRABOND
- Fit, trim, crimp, cement SSC

Be sure to take out the cotton balls before placing IRM/ZOE

Formocresol Future & Its Replacement

- Formocresol – banded in California; likely has questionable future in US despite lack of evidence-based harmful effects on body
- MTA (Mineral Trioxide Aggregate) – the new “king”
 - Mixture of Portland cement, dicalcium silicate, tricalcium silicate, tricalcium aluminate, gypsum, and tetracalcium aluminoferrite
 - Has excellent biocompatibility, alkaline pH, radiopacity, high sealing capacity, can induce formation of dentin, cementum and bone

Option 4: Non-Vital Pulp Therapy

Pulpectomy
or
Extraction + Space Maintenance

Pulpectomy Indications

- Necrotic pulpal tissue or...
- Coronal tissue and tissue entering the pulp canals are apparently vital but hyperemic
- May have history of pulpitis

Pulpectomy Contraindications

- Non-restorable tooth
- Radiographic internal resorption of roots
- Teeth with mechanical or carious perforations of pulpal floor
- Excessive pathologic root resorption involving more than one third of the root
- Loss of bony support and loss of PDL attachment
- Dentigerous or follicular cyst

Pulpectomy Medicaments

- Zinc Oxide Eugenol
- Calcium Hydroxide
- Diapex/Vitapex
 - Calcium Hydroxide 30% + 40% iodoform

Pulpectomy How-to

- Remove coronal pulp as in pulpotomy
- Remove pulp remnants from root canals with broach
- Instrument 2-3mm short of radiographic apex
 - NiTi files
 - Use RC Prep + NaOCl
- Irrigate with NaOCl
- Irrigate with sterile saline
- Dry canals with sterile paper-point

Pulpectomy How-to

- Apply medicament
 - Use thick mix of ZOE rolled into point to fill canal
 - Syringe Diapex/Vitapex into canal
- Condense with pluggers or with blunt paper points
- Take radiograph
- Restore

FOLLOW UP IS OF UTMOST IMPORTANCE!

Radiographs at least every year!

Possible Complications

- Failure
 - Radiographic pathology
 - Clinical pathology (mobility, symptoms, fistula)
- Over-retention of tooth
 - Ectopic eruption of premolar → crossbite
- Retention of obturation material in tissue
 - ZOE

Last Option: Extraction

- Definitive treatment
 - 2-3 week healing period
- Possible space maintenance needs
 - Band & loop(s)
 - Lower lingual holding arch
 - Transpalatal arch

Extraction – Possible Complications

- Root fracture
 - Significant elevation decreases this likelihood
- Root tip difficult to visualize and/or remove
 - Depending on its closeness to developing premolar – can be left & is likely resorbed
- Possible deflection of erupting premolar with cross-bite/scissor

Questions?

California Northstate University

College of Dental Medicine

Site Evaluation Checklist: This is reviewed upon initiation and continuously with every site for which DMD students will have clinical rotations associated to BSS courses at CNUCDM.

Externship Site's Recommended Characteristics

1. Provide chair side assisting for students
2. Rotation needs to accommodate minimum of 1 student per week (as usual M-F) continuously
3. Ability to have 8 week rotations, with no clinic on the last Friday of the rotation so students can travel back to campus for mandatory debriefing session
4. Work in the E*Value to document clinical activity
5. Appointing, training, Calibration of supervising faculty, preferably 2 per site. Initial one day calibration exercise, then annual CE and twice yearly site visit for calibration.
6. Students will require site orientation per individual clinic
7. Students will be experienced in all procedures they provide. CNU will provide a status report on Competency evaluations and student experience before each rotation.
8. Need current, valid TAA (Teaching Affiliate Agreement) as per College of Dental Medicine and CODA (Commission on Dental Accreditations) requirements
9. Housing must be available and provided if site is more than 1 hour away
10. Internet access for students
11. Clinically adequate equipment
12. VCF (Volunteer Clinic Faculty) appointment for supervising faculty
13. Site needs to have credentialing program that satisfies National Committee for Quality Assurance standards
14. Desirability and capability to supervise student clinical care and provide ongoing assessment
15. Diverse patient population that provides broad general dentistry experience
16. Reviewed during site visit: (imaging equipment; facility; operatories, including patient, doctor and assistant chairs; delivery system; sterilization; instruments & materials). For

distant sites, must ensure housing; availability of storage for food, personal items, etc.; laundry service if students are likely to stay at site for entire 8 week rotation).

17. Safety and security assessment
18. Transportation assessment
19. Assessment of quality clinical staff and operations
20. Opportunity for interprofessional education and among the oral health professions including dental hygiene and dental assisting.

Assessment of Student Learning Outcomes' Handbook

Table of Contents

Preface: Overview of Learning Outcomes Assessment at CNU	1
Section I: Developing Learning Outcomes	4
Section II: Designing Outcome Measures	7
Section III: Collecting Data	13
Section IV: Analyzing Assessment Data	19
Section V: Reporting Assessment Results	23
Section VI: Planning for the Next Assessment and Closing the Assessment Loop	27
Appendix B: Executive Summary	33
Appendix C: Report	34
Appendix D: Assessment Committee Review Form	35
Appendix E: Glossary	38

Learning Outcomes' Assessment at CNU

Learning Outcomes' Assessment

Learning outcomes assessment is the purposeful, systematic measurement of student learning at various levels of learning. The goal is a cycle of continued improvement of academic quality for the institution. Effective learning outcomes' assessment is always responsive to the following questions:

- What knowledge, skills, and attitudes will successful students have acquired upon graduation?
- How well do students perform relative to these learning outcomes?
- How can programs improve to provide a stronger academic experience to students?

Purpose of the Handbook

The purpose of this handbook is to assist CNU faculty, program chairs, and Directors of Assessment, and Assessment Committee Chairs in conducting learning outcomes' assessment. It is a step-by-step guide that expounds the basic concepts and processes, provides examples and strategies for meeting the specific requirements, and offers approaches for making assessment a useful tool in curricular renewal.

Learning Outcomes Assessment and Academic Quality

CNU has two processes for assessing academic quality: *Program Review* and *Learning Outcomes' Assessment*. Learning outcomes' assessment is an annual process by which faculty assess student mastery of program-level outcomes. Program review occurs every five years and examines programs' overall functioning by studying administrative data, graduate outcomes, and other measures of effectiveness. In addition, the program review also provides an opportunity for academic program faculty to examine learning outcomes data collected through the annual learning outcomes assessment.

Benefits of Learning Outcomes Assessment

When conducted properly, learning outcomes' assessment has benefits for the entire institution. It benefits students by ensuring they master the material of their degree program and by providing academic and professional programs that are responsive to both their own (and society's) needs. It benefits faculty by providing the tools necessary to lead curricular development. Finally, it benefits the entire institution by giving the institution documented evidence of student learning and achievement, thereby validating the institution is achieving its mission and goals.

Learning Outcomes' Assessment at CNU

At CNU, there are four primary groups directly involved with assessment activity.

- Faculty develop learning outcomes, assess student performance, and provide the necessary analysis to understand learning outcomes in their programs.
- Directors of Assessment manage the assessment process within their programs and submit yearly assessment reports that provide evidence of the activity.
- The Directors of Assessments work with the Vice President of Institutional Research and

Effectiveness to plan for appropriate assessment methodology and practices and provides support throughout the process. The Director of Assessment for each college coordinates the overall effort for the college's assessment activities with assistance from the Assessment Committee and Assessment Committee Chair.

- The University's Assessment Committee, consisting of representatives from all the schools and divisions in the University, reviews and advises assessment activity to keep the university aligned with requirements of regional accreditation. The college's Assessment Committees review student learning results from which specific recommendations for improvement are generated to be addressed program faculty. The student learning outcomes' reports are used to provide evidence, where appropriate, in the budget process.

Six steps of learning outcomes assessment

There are six steps of learning outcomes' assessment: develop/revise learning outcomes, design outcome measures, collect data, analyze and evaluate data, create assessment report, and plan for the next assessment cycle. The Assessment Handbook is divided into six sections addressing each of these steps. Each section provides a basic overview of the goals and purpose of the step, lists the specific activities for departments associated with the step, and offers suggestions and potential strategies for effectively completing the step.

SIX STEPS OF LEARNING ASSESSMENT

- 1. Develop/revise learning outcomes**
- 2. Design outcome measures**
- 3. Collect data**
- 4. Analyze and evaluate assessment data**
- 5. Write action plans and create annual assessment report**
- 6. Plan for next assessment cycle**

The ideas and suggestions for completing the steps are intended to provide useful information for faculty and department chairs. Since each academic department differs in terms of size, approach, and outlook, it is important to ensure that the assessment approach matches the needs of the program. Staff from the Office of Institutional Effectiveness are available to discuss ideas and plan for programs to build a learning outcomes' assessment program that meets its needs.

Cyclical nature of learning assessment

Since the primary goal of learning outcomes program assessment is continued improvement of the quality of education offered by CNU; the process is cyclical in nature. Assessment is an ongoing process that should grow and change as programs evolve and develop.

Section I: Developing Learning Outcomes

The first step in learning outcomes' assessment is the creation of outcomes, which reflect the core knowledge and material of the program. Most programs have previously developed learning outcomes, so this step of the process allows for reexamination and potential

Checklist of Needed Activity for Developing Learning Outcomes:

- ☐ Key learning outcomes developed
- ☐ Evidence of faculty participation in developing learning outcomes
- ☐ Verification that outcomes are; being performed by students, observable, and measurable⁴

revision. The development of learning outcomes should capitalize on the depth of knowledge of the faculty and thereby help shape the nature and direction of the program.

This section describes characteristics of strong learning outcomes, provides suggestions on how to develop outcomes, and discusses a process by which programs can scrutinize learning outcomes to ensure their strength.

Effective learning outcomes

Learning outcomes are statements that specify what students will be able to do or demonstrate as a result of earning their degrees. Effective outcomes are usually expressed as knowledge, skills, or abilities that students will possess upon successful completion of a program. They provide guidance for faculty regarding content, instruction, and evaluation, and serve as the basis for ensuring program effectiveness. Because we evaluate student performance in terms of specific actions, the strongest learning outcomes are measurable and observable.

Tool 1: Key questions to consider when drafting learning outcomes

- What is the most essential knowledge students need to have acquired upon successful completion of the program?
- Are there specific skills or abilities students need? What are they?
- How does the program attempt to shape students' attitudes or views regarding the discipline or profession?

Selecting the right verb

Given that learning outcomes focus on observable and measurable actions performed by students, the selection of an action verb for each outcome is crucial. Determining the best verb to use in a learning outcome can be challenging because of its need to accurately reflect the knowledge, skills and abilities being studied. *Tool 2: Common learning outcome action verbs* provides a brief list of verbs that are used in writing learning outcomes at the collegiate level.

Tool 2: Common learning outcome action verbs

Analyze	Demonstrate	Prepare
Apply	Design	Rate
Compare	Develop	Revise
Compile	Discuss	Select
Compute	Evaluate	Use
Create	Explain	Utilize
Critique	Predict	Write

Certain verbs are unclear and subject to different interpretations in terms of what action they are specifying. Verbs/verb phrases such as know, become aware of, appreciate, learn, understand, and become familiar with should be avoided; they frequently denote behavior that is not easily observed or measured.

Strengthening weak learning outcomes

Tool 3: Evaluating learning outcomes

5

- Is the action done by the students?
- Is the specified action observable?
- Can the specified action be measured?

The process for strengthening learning outcomes re-examines the original characteristics used of strong outcomes. By asking the three questions in *Tool 3: Evaluating learning outcomes*, weaknesses in learning outcomes emerge.

Revising learning outcomes

The process of writing learning outcomes is not simple. Determining the outcomes a program wants to examine can pose the first challenge. In addition, drafting the outcome often takes several revisions to develop a strong one that reflects the intentions of the faculty. However, the effort put into drafting strong outcomes will be returned through an easier time developing measures, collecting data, analyzing the results, and ultimately making recommendations for improvement. Strong outcomes will help to focus the entire process and allow for the most useful results from the assessment process.

Section II: Designing Outcome Measures

After developing learning outcomes, the second step in the assessment process is to select outcome measures. While learning outcomes describe the knowledge, skills and abilities that students should possess after instruction (or completion of the program), outcome measures are the specific tools and methods that generate data and information about students' performance relative to learning outcomes.

There are two types of outcome measures: direct measures and indirect measures. Each serves an important function in assessment, and when used together they provide a richer perspective on student learning by providing direct evidence and context to understand student performance.

Checklist of Needed Activity for Developing Outcome Measures:

- ☐ At least one direct measure for each learning outcomes
- ☐ Indirect measures that will facilitate understanding of the assessment data, when appropriate
- ☐ Evidence of faculty participation in the development of measures
- ☐ Established performance standards for each measure being used
- ☐ Expected results for each measure being used

→ **Direct measures** are methods for assessing actual samples of student work to provide evidence of student performance relative to the learning outcomes.

→ **Indirect measures** are methods for assessing secondary information on student learning that do not rely on actual samples of student work.

Each type of outcome measure serves a particular purpose. Direct measures assess the extent to which students' work meets the learning outcome performance standards. Indirect measures compliment direct measures by providing supportive evidence, information, and student perspective. Together they provide a richer perspective on student learning by providing direct evidence and context to understand student performance.

Outcome measures should meet three criteria

Regardless of the type of measure used, strong measures share three basic qualities:

- Provide sufficient data and information to measure the learning outcome
- Are not overly burdensome departments to collect
- Have established performance standards and expected results to help guide the analyses

Selecting direct measures

There are many issues to consider when selecting direct measures of learning. Programs should be creative in determining the most useful way to measure student performance, but at the same time ensure that the methods allow for meaning from interpretation and results. *Tool 1: Sample direct measures* provides a list of some of the more common methods within higher education and can help foster ideas for developing measures.

Tool 1: Sample direct measures

- Student Portfolio Evaluation
- Student Performances or OSCEs
- Tests and Examinations
- Thesis Evaluation
- Course-Embedded Assessments
- Pre-test/Post-test Evaluation

Course-embedded assessments are direct measures which use student work in specific courses to assess student learning. Students are already motivated to do their best on these assessments because they are conventionally graded on them. For example, if one learning outcome requires students to synthesize the literature on a topic in the field, student research papers may be evaluated using a rubric to assess how well they meet the learning outcome. Many classroom assignments can be used for course-embedded assessment as long as they assess a program's student learning outcome. Course-embedded assessment measures are often selected because they take place in the classroom, take advantage of student motivation to do well, and directly assess what is taught in the classroom.

Examinations: Many course-level learning Outcomes can be assessed by examinations given within the course. In some cases the outcomes measured by the examinations will be identical to the program's student learning outcomes and, the exam questions will assess both course and program outcomes. With some creativity, exam questions can also be written to cover broader Program Learning Outcomes (PLOs) without losing their validity for course grading. In programs without capstone courses, it might be possible to write a coordinated set of exam questions that provide a fuller picture of student learning when administered in exams across a series of courses.

Analysis of course papers: Course papers can be used as measures for student learning outcomes. Because students create these papers for a grade, they are motivated to do their best and these papers may reflect the students' best work. This process typically requires development of a rubric that focuses on program learning outcomes. Faculty groups read these same papers to assess the attainment of PLOs. This second reading should be done by someone other than the instructor or by others along with the instructor, as the purpose for the assessment is different from grading. Scoring rubrics for the papers, based on the relevant learning outcomes should be developed and shared with faculty raters prior to rating to promote inter-rater reliability.

Analysis of course projects and presentations: Products other than papers can also be assessed for attainment of program learning outcomes. For example, if students are required to give oral presentations, other faculty and even area professionals can be invited to these presentations and can serve as outside evaluators using the same rubric as other raters.

Student performances: In some areas, such as teaching or counseling, analysis of student classroom teaching, mock counseling sessions or other performances can provide useful measures of student learning. A standardized evaluation form is necessary to ensure consistency in assessment. One advantage of using performances is that they can be videotaped for later analysis.

Cross course measures are direct measures of student work across the program. Cross course measures examine students' work that incorporates multiple dimensions of knowledge, skills and abilities developed throughout the entire program. The most common types of cross course measures are capstone course papers and projects, and student portfolios.

Capstone courses: Capstone courses provide an opportunity to measure student learning, because this is where students are most likely to exhibit their cumulative understanding and competence in the discipline. One of the purposes of capstone courses is to provide an opportunity for students to "put it together," which typically requires students to integrate the knowledge, skills and abilities found in the program's learning outcomes.

Student portfolios: Compilations of students' work in their major can provide a rich and well-rounded view of student learning. The program usually specifies the work that goes into the portfolio or allows students to select examples based on established guidelines. By compiling a range of student work, portfolios can be used as the measure for more than one learning outcome. Portfolios can also be valuable for the student by providing a reflection of their skills and abilities. Portfolios do require strong, well-constructed rubrics to make the process of extracting assessment data manageable.

Internship supervisor evaluations: If the program has a number of students who are doing relevant internships or other work-based learning, standard evaluations by supervisors using a rubric designed to measure a particular learning outcome across the duration of the internship may provide data on attainment of learning outcomes. In addition, when programs exercise control over the content of internships, those settings can serve as capstone experiences where students can demonstrate their knowledge skills and abilities.

Selecting indirect measures

Like selecting direct measures, there are many issues to consider when selecting indirect measures of learning. Programs should be creative in determining the most useful way to measure student performance, but at the same time ensure that the methods allow for meaning from interpretation and results. *Tool 2: Sample indirect measures* provides a list of some of the more common methods within higher education and can help cultivate ideas for developing indirect measures.

CNU conducts two surveys each year that can be analyzed as indirect measures of learning. The Alumni Survey and the Graduating Student Survey both contain questions regarding the learning experience at CNU.

Tool 2: Sample indirect measures

- Graduating student and alumni surveys
- Employer and internship supervisor surveys
- Exit interviews and focus groups

In addition, programs are able to add supplemental questionnaires to the Alumni Survey that can be used to answer specific questions and issues of the program. The benefits of including these types of measures into department assessment plans are that they have built in comparisons by examining the program's responses relative to the University or school and they require limited work by chairs and faculty in collecting the data.

While University surveys may provide some insights into students learning experience, they sometimes lack the specificity needed by programs in their assessment activity. Accordingly the programs may need to conduct their own primary research to address the issues. These methods may be quantitative or qualitative in nature, but should still address the key issues of strong measures.

Internship Supervisor Survey: Internship supervisors may provide general feedback to programs regarding the overall performance of a group of students during the internship providing indirect evidence of attainment of learning outcomes. This should not be confused with internship supervisors' evaluation of student performance on specific learning outcomes.

Focus Groups: Focus Groups provide in-depth, qualitative interviews with a small number of carefully selected people who are thought to represent the population of interest (students in the program). For program assessment, students are brought together to discuss their perceptions of how well they achieved the program's learning outcomes.

Exit Interviews: Graduating students are interviewed individually to obtain feedback on the program. Data obtained can address strengths and weaknesses of the program and/or assess relevant concepts, theories or skills related to the program's learning outcomes.

Area Expert Comments: Comments made by area experts can be useful in gaining an overall understanding of how students will be judged in a given field. This differs from having experts use the same rubric faculty raters use, and instead focuses on their opinion of the quality of students' work and the program in general. This should not be considered a direct outcome measure but it can serve as a valuable indirect measure.

Establishing performance standards: When interpreting assessment results, it is useful to set a performance standard that specifies the acceptable level of student work or response. For each learning outcome the program should ask "What is an acceptable performance standard for this learning outcome?" This performance standard may be a passing score on an exam, a rubric rating of "meets program standards" on a student paper or another indicator of the quality of student work.

Establishing expected results: By setting expected results for the percentage of students meeting or exceeding performance standards before data collection begins, the program can gauge its effectiveness in helping students meet the learning outcomes. For example: Seventy-five percent of students met the performance standard set by the department for the outcome measure on ethical reasoning. This can be compared to the expected result of 80% meeting the performance standard which reveals an area for improvement.

Evaluating measures

It is possible to evaluate outcome measures by asking the three questions found in *Tool 3*:

Questions for evaluating outcome measure. If faculty and chairs are able to answer “yes” to all of three questions, it is likely that a strong set of measures has been developed.

Tool 3: Questions for evaluating outcome measures

- Does the measure provide sufficient data and information to analyze the learning outcome?
- Does the measure require a reasonable amount of work to collect?
- Does the measure establish performance standards to help guide the analysis?

Section III: Collecting Data

Data collection is the next step in the assessment process. This section will cover the process of collecting student work and indirect measures, rating work, and storing data. The collection process may seem like a daunting task, but with planning, it can move more smoothly and provide quality data and information about the programs learning outcomes.

The data collection process consists of three basic steps: **gathering** necessary student work and other information, **evaluating** the results, and **storing** the data. The **Gathering, Evaluating, and Storing** (GES) process is used for both direct and indirect measures; however some of the specific steps will vary. The key to simplifying the data collection process is planning. *Tool 1: Questions to ask in planning data collection* provides a number of questions to think about before gathering data.

Checklist of Needed Activity for Collecting Data:

- ☐ Direct data collected for each learning outcome and measure
- ☐ Indirect data collected, if appropriate
- ☐ Secure electronic database of both direct indirect measures
- ☐ Examples of the student work for each performance standard in either paper or electronic form.

Tool 1: Questions to ask in planning data collection	
Direct Measures	Indirect Measures
<ul style="list-style-type: none"> Where is the student work coming from? How will the student work be organized and stored for evaluation? When will it be evaluated? Who will be responsible for evaluating? How will the performance data be stored? How will it be secured? How will examples of student work be stored? Paper? Electronically? Are there FERPA issues to consider? 	<ul style="list-style-type: none"> Who will conduct the research for the measure? When will research be done? In a class? How will the results be tabulated or a categorized? If you are using institutional data, will special data analysis need to be done?

Step 1: Gathering

The process of gathering materials for direct measures varies greatly depending on the measures used. For course-embedded measures or capstone experiences, it is necessary to coordinate with the faculty member teaching the course to ensure the student work is collected and forwarded for assessment. If a portfolio is being used, it will be necessary to determine who is responsible for putting the portfolio together.

When using indirect measures, the gathering phase consists of conducting the necessary research (survey, focus group, or other measures). Indirect measures based on secondary analysis of

material (e.g. course syllabi) need these materials to be compiled. Programs should set a schedule that outlines the materials needed to simplify follow up and ensure all student work is collected.

Step 2: Evaluating

The evaluation phase for direct measures includes the examination of student's work by faculty to determine the level to which it meets the learning outcome. Because assessment looks to evaluate specific aspects of the student work, rubrics are often used as guidelines in the process.

Effective rubrics, standardized evaluation forms used to assess student work toward meeting learning outcomes, can be developed in many different ways to assist the evaluation process. They can describe qualitative as well as quantitative differences; and are often used to assess assignments, projects, portfolios, term papers, internships, essay tests, and performances. They allow multiple raters to assess student work effectively by increasing the consistency of ratings and decreasing the time required for assessment. The development of rubrics is covered in Appendix A: Rubric Toolbox.

Regardless of the type or style of rubric used, there are a few general principles to ensure they are effective. *Tool 2: Steps for using a rubric to evaluate student work* outlines the basic process of using rubrics.

Tool 2: Steps for using a rubric to evaluate student work

- Review the rubric with all raters to ensure it is consistently understood.
- Use the descriptors in each performance level to guide ratings
- Assign the rating that best represents the student's work

The key to achieving consistency between raters is conducting a “norming” session to allow faculty raters to reach consensus on the levels of student work at each level of the performance standard. *Tool 3: Steps to “norming” a rubric* provides the basic process of a norming session.

Tool 3: Steps in “norming” a rubric

- Explain to the raters how to use the rubric
- Provide samples of student work
- Discuss each sample and determine how raters determine scores
- Reach a general consensus on each level of the performance standard

For indirect measures that the department is conducting, the evaluation phase consists of the compiling of the results into a form that are meaningful to those doing the assessment. For survey data, this will generally include entering the data into a data set for analysis and generating the descriptive statistics. For more qualitative work such as focus groups, this part of the process maybe the extraction of any themes or ideas.

Step 3: Storing

There are two different storage issues which departments need to address. The first is an electronic storage system of all the data that are compiled from students' work and results from indirect measures.

For tracking direct (and some indirect) measures programs may create an electronic database/Excel spreadsheet to store all of their assessment data for later analysis.⁵ The database will typically list all students and their performance on the measure. *Tool 4: Example of a program database* illustrates how to compile the database of assessment data.

Tool 4: Example of a program database			LO 1: Portfolio Rating	LO 1: Senior Exit Interview	LO 2: Paper Rating from 300-level course
Last Name	First Name	Year			
Allan	Jane	Senior	4	More writing needed	4
Miller	Larry	Senior	5	Not present	5
Smith	Bob	Senior	3	More writing needed	3
Bloom	Desmond	Junior			
Jones	Robin	Junior			3
Smith	Troy	Junior			1

Because this database will have individual student information, it is very important to ensure it remains secure and that only faculty and staff involved in the assessment activity have access to the contents.

Many times, however, indirect measures may not be trackable by specific students. For these types of measures a descriptive report of the results will be useful as the program reviews the direct measures.

The second storage issue facing the department revolves around copies of student work and responses to questionnaires. It is generally advisable to retain copies of or access to the direct measures until the University Assessment Committee has reviewed the final report. If these examples contain either students' names or student id numbers, it will be necessary to maintain a secure filing system. *Tool 5: Protecting student identification* provides a procedure to limit inappropriate access to student information. While this requires a bit of work upfront, it can help the program avoid thorny issues later.

Additionally, it is recommended that samples of students' work be stored to document the assessment process. Generally for each direct measure, an example at each level of the performance standard should be saved. Electronic copies of student work can reduce space required for storage and allow the original work to be returned to the students. These documents can be scanned and stored as PDF files to help limit the amount of storage space necessary.

Tool 5: Protecting Student Identity

- Assign a unique numeric code to all students enrolled in program (Do not use student ID or Social Security Number)
- Store number in secured database
- Collect student work with name
- Print appropriate code on each example of student work
- Redact work to eliminate evidence of authorship

Student awareness of assessment activity and privacy issues

Students should be aware that their work may be used in the assessment purposes. *Tool 6: Syllabi statement regarding student work in assessment* provides an example of a statement that departments may want to use. By incorporating the statement on select or all program courses the department informs students about its assessment work.

Tool 6: Syllabi statement regarding the retention of student work

Notice:

Copies of your coursework including any submitted papers and/or portfolios may be kept on file for institutional research, assessment and accreditation purposes.

As noted in the section about keeping data work secure, student work is protected by The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99). To comply with FERPA regulations, student work should either be maintained in a secure system with access limited to those involved in assessment or should have all personally identifiable information removed. Even without a name, some student work is considered identifiable if it contains sufficient information about the student to enable the author to be identified.

Strategies for collecting data

By reviewing the original planning questions in *Tool 1: Questions to ask in planning data collection* before collecting data, programs can avoid many potential roadblocks in the data collection process. The following example lists three common roadblocks that can occur during this process and illustrates an effective plan for data collection.

Section IV: Analyzing Assessment Data

Analysis of data is the next step in the assessment process. Analysis is a process that provides better understanding of data and allows inferences to be made. It summarizes the data, enhances the value of information gathered and provides direction for decisions regarding program improvement. While data analysis can be relatively complex, for the purpose of assessment it is usually basic.

Checklist of Needed Activity for Analyzing Assessment Data:

- ☐ An indication of the number students participating in the assessment activity for each outcome measure
- ☐ The percentage of students who met or exceeded the performance standard for each outcome measure

This section discusses the core elements of data analysis and provides strategies for and examples of analysis. The underlying theme of this section is to illustrate how to link data to the learning outcomes and provide a basis for using data to improve student learning.

Before analyzing data

Two important steps should be completed before analyzing data. The first step is to review the data visually. Reviewing data has two benefits: It allows for the identification of outliers and possible mistakes, and it enables basic patterns or trends to emerge. For example, it may be clear that all students who took a particular class had difficulty with a particular outcome.

The second step of the process is to determine the appropriate method for analyzing the data. This can range from simply counting the number of successful students to higher powered statistical analyses. The two key factors are first to make sure the analysis method fits the data; and second, to ensure that method aligns with the program's needs. There are two types of data used in assessment each with different methods of analysis.

Categorical data are based on groupings or categories for the evaluation of student performance. For example a simple passed/failed score is categorical because there are two groups into which students can be placed. Often rubrics generate categorical data by using a scale of “exceeding expectations,” “meeting expectation,” and “failing to meet expectations”.

Numerical data are based on scales that reflect student performance. Tests which are scored based on the percentage of questions answered correctly generate numeric data.

Direct measures can generate either categorical or numerical data. Student's papers rated on an assessment rubric may be categorized as “meeting standard” or “failing to meet standard”. However the papers may be scored on a numerical scale indicating the overall quality of the paper with respect to the learning outcome.

Indirect measures can also generate either categorical or numerical data. By asking students on a questionnaire: “Did you have sufficient writing in the program?” a program would compile categorical data based on those saying “yes” and those saying “no.” However, by asking students to indicate how strongly they agree with a statement like “there was sufficient writing required in

my program”, numeric data could be generated by applying an agreement scale. (5 – Strongly agree, 4 – Agree, 3 – Neither, 2 – Disagree, 1 – Strongly disagree).

Analyzing assessment data

Once the data have been reviewed and the type determined, the process of analyzing data follows. *Tool 1: Methods for analyzing data* provides a brief overview of the basic methods used to analyze assessment data.

Assessment’s focus on student achievement of learning outcomes typically requires the determination of counts and percentages. Together they show clearly the number of students involved in the activity and the rate of successful display of the outcome. All data, regardless of type can be analyzed using counts and percentages. Numeric data has the additional benefit of being able to be analyzed using descriptive statistics. Mean, median, and mode provide useful information to interpret data by allowing for easier comparison between groups and tests for significant differences.

Tool 1: Methods for analyzing data

- **Percentage:** Proportion of total cases falling into a category
- **Mean:** Average of a set of scores
- **Median:** Middle value in an ascending list of scores
- **Mode:** Most frequent score
- **Standard Deviation:** Average distance of scores from the mean
- **Percentile:** Percentage of a distribution of scores that is equal to or below a specified value.

The impact of dispersion

By examining how data are distributed around measures of central tendency, particularly the mean and median, a richer understanding of the data emerges. The standard deviation represents the average deviation of scores about the mean. Small standard deviations in student performance indicate that performance levels varied little across students in the sample. Large standard deviations indicate a greater variability in levels of student performance. Standard deviations are commonly reported with the mean. Percentiles represent the percentage of a distribution of scores that are at or below a specified value. They are calculated by the formula $\text{Percentile} = S_b/n \times 100$, where S_b is the number of scores below the score of interest, and n is the total number of scores. They are often reported with the median which by definition is the 50th percentile. For example: a median score of 75 on a final exam would be the 50th percentile indicating 50% of students scored above 75 and 50% scored below. By examining the 25th, 50th, and 75th percentiles one can gain a sense of a student’s performance relative to the group.

Missing data and valid responses

Working with assessment data, there are many instances when data will not be available for every student. As a general rule, missing data should be excluded from calculations of percentages and descriptive statistics. If a program has ten (10) students, and eight (8) submit a needed paper for the assessment of an outcome; then eight (8) submitters become the basis of the analysis. Extending the example, if six (6) of the submitted papers meet or exceed the performance standard, then a program would indicate 75% of students submitting papers showed mastery of the outcome rather than 60% of all students in the program.

Presenting analysis

Tables and graphs are useful in presenting analysis because they focus attention to specific results. Tables are useful for reporting multiple percentages and frequencies, comparison of student performance with stated performance standards and some descriptive statistics. They provide an ordered way for readers to see results quickly for each outcome measure without having to search through text to find a particular result. Graphs can further enhance the visual impact of assessment. Graphical representations of results show differences in variables, which makes graphs highly effective in showcasing assessment results.

When sharing the results of program assessment it may be useful to report each learning outcome and outcome measure paired with the corresponding results of the analyses, which joins the multiple outcome measures (direct and indirect) for each learning outcome. Next, compare the results with the specified performance standard and discuss the implications of the data as they relate to the program. Both strengths and areas for improvement are discussed, because showcasing program success is just as important as identifying areas for improvement, when it comes to making data based decisions about the program.

When comparing student performance to specified performance standards, a table with the counts and percentages may be useful to summarize the data. The example in *Tool 2: Example of table of counts and percentages* shows data collected from 20 student portfolios for two learning outcomes. It indicates the number of students completing the portfolio component and the percentage who were below, met and above the performance standard. While 70% of students in the sample achieved or exceeded the standard, 30% were below the performance standard.

Tool 2: Example of table of counts and percentages				
	# of students evaluated	% of students		
		Below Performance Standard	Meeting Performance Standard	Above Performance Standard
Demonstrate critical thinking and writing skills within the discipline	20	30	50	20
Apply specialized knowledge within Trans Psych and related fields	18	5	5	90

The role of advanced statistical analysis

As a program's assessment activity and data increase, more advanced analysis may be useful in understanding student learning. It is possible to

- Study differences in performance to examine the effects of curricular change
- Conduct pre and post assessments to evaluate effect of specific learning experiences
- Compare program students to national performance on certification examinations

The Office of Institutional Effectiveness will work with programs looking to incorporate these and other types of analysis into their assessment activity.

Section V: Reporting Results

The next step of the cycle is reporting results of program assessment. This phase focuses on interpreting strengths, areas for improvement, and identifying recommendations to enhance student learning. There are two steps in writing the assessment report:

1. Working with faculty to understand assessment results
2. Writing the final assessment report

Working with faculty to understand assessment results

Including program faculty in all steps of the assessment process is important to ensure its meaningfulness and effectiveness. The inclusion of faculty insights is probably most important in interpreting results and identifying strategies for improving student learning. The methods used for sharing results is driven by character of the department, with some pouring over all the data generated and others simply reviewing summary analysis outlined in Section IV of the handbook. Using summary reports of assessment results, and the University Assessment Committee's review of the previous year's report will typically facilitate rich discussion and generate useful interpretation for the assessment report.

Checklist of Needed Activity for Reporting Assessment Results:

- ☐ One completed outcome-specific report for each learning outcome assessed during the year which includes results, interpretation, and implications
- ☐ An executive summary including a list of student learning outcomes, description of the overall findings, any challenges the program faced in its assessment activity, and Assessment Committee recommendations.
- ☐ An appendix of materials used in the assessment process including direct and indirect measures

Writing the assessment report

The assessment report is the document which summarizes a program's assessment activities, program decisions, and future directions. The report is reviewed by the University's Assessment Committee, and used by the academic program to evaluate its effectiveness. This report also serves as the principle evidence of learning outcomes assessment for institutional accreditation. It is typically compiled by the program chair and faculty based on the work outlined earlier in this Handbook. The report contains three components: Outcome Reports, Executive Summary, and Appendix of Supporting Material.

Outcome reports examine each learning outcome individually (see Appendix C). This section of the report is divided into three sections: Outcome and Past Assessment, Assessment Activity, and Interpretation of Results.

Outcome and Past Assessment gives an overview of past assessment activity with this learning outcome. This section gives a brief description of trends and general findings.

Assessment Activity describes each component of the assessment process. It includes the following sections:

Outcome measures includes a description of each measure used for this outcome by identifying how the measure was created, when it was implemented, and who used it. The description also indicates if it is a direct or indirect measure.

Performance standard defines the assessment criteria and how well students (overall) are expected to perform on this measure. This section also includes a justification for the expected performance level. For example, if a new outcome was added to the program, students may not be expected to perform at 80%, but rather 50%. It is important to explain the justification for this standard not only for the reviewers, but also to create and maintain a record for the program.

Data collection explains the collection procedures. A clear description of this process will also allow for easy replication in the future. *Tool 1: Data collection questions* gives a list of three basic questions to address when completing this section of the report.

Tool 1: Data collection questions

- *How were data collected?*
Did each professor ask students to submit 2 copies of papers so that one copy could be used for the assessment? Did the chair ask each faculty member to submit papers to him/her?
- *When was data collection?*
Fall semester? Spring semester?
- *Which students were included?*
Students in a specific course? Seniors? Juniors?

Analysis section describes results and how data were analyzed. The following questions should be addressed:

What approach was used to analyze data?

Average scores on a multiple-choice test? Percent rated in each category on a rubric?

What did you find?

What are your results?

Did you have the level of participation expected?

Did you receive data from all courses who should have contributed? How many participants are missing? Does the work received provide a good sample to determine if the learning outcome was or was not achieved?

Interpretation of results provides meaning to the data collected in the assessment process and includes the following three sections:

Extent this Learning Outcome has been achieved by students discusses how well students performed on each measure (direct and indirect) by summarizing information from **Analysis** section for each measure. In this section, the outcome

is viewed as a whole entity and not in its component parts as in the *Assessment Activity* section.

Program strengths and opportunities for improvement relative to assessment of outcome requires the program to define where students are performing at the highest and lowest, and what this means for the program. How do results indicate that the department is adequately supporting (or not supporting) this learning outcome?

Discuss planned curricular or program improvements for this year based on assessment of outcome.

This section describes the plan for action for the next year. Planned improvements usually address one of the following areas:

- Courses supporting learning outcomes
- Learning outcomes
- Measures (rubrics, tests, surveys)

Executive summary through its different sections provides a brief history of previous assessment activities and linkages to school and university mission. This section includes the following components:

Description of where documents are stored provides direction for finding assessment data. It is advisable for programs to retain (or have access to) student work generating assessment data for one year. This allows for easy reference while the University Assessment Committee is reviewing the report. This can be done either in paper form or electronically. Programs should maintain samples of student work for each level of performance standards used in the assessment activity (e.g. exceeding the standard) as part of the report to make future examination possible.

Lists of all outcomes past and present provides an ongoing history of learning outcomes for the program. All learning outcomes should be included in this list.

Description of linkage to departmental and university mission refers to specific aspects of the school and

university mission that relate to the program. Completing this section requires an explanation of how the program connects to the university mission and school plan. See *Tool 2: University Mission and Link to Strategic Plan* for further information.

Describe how the program implemented its planned improvements from last year
It is important to provide the program and reader an understanding of what occurred and why. The following information needs to be included in this section:

Tool 2: University Mission and Link to Strategic Plan

University Mission

To advance the Art and Science of Healthcare

See University portal for Strategic Plan

- Description of the specific planned improvement for each outcome
- How the program concluded that improvements needed to be made
- Who was involved in the implementation
- When the completion occurred

Tool 3: Example of Documentation of Implemented Planned Improvements

Outcome	Planned Improvement	Update (<i>Indicate when, where, and how planned improvement was completed. If planned improvement was not completed, please provide explanation.</i>)
Apply ethical reasoning in discussing applied issues.	Add a case-study assignment to course that reinforces ethical theories learned in previous course	The professor who primarily teaches course X reviewed the course syllabus and decided to add a homework assignment to week 5 in which students reflect on the ethical consideration of a research project.
Write a coherent argument using primary sources	Invite the library faculty to course X to review finding primary sources	We decided against this planned improvement because starting in the fall course X is no longer a requirement for the major. Instead we have decided to work with the library faculty to develop an online refresher that will be targeted to a series of elective courses

Response to University Assessment Committee Recommendations

Each program will receive a report from the Assessment Committee with one of the following boxes selected:

Report accepted as submitted – If this box was selected, indicate that your report was accepted as submitted.

Revisions required to accept report this year – If this box was selected, describe what actions taken to have report accepted.

Recommendations for next year's assessment process – If this box was selected, list each recommendation and if it was or was not implemented. A thorough response to this item gives context for why recommendations were or were not acted on.

Appendix of supporting materials is a compilation of materials that aids in the understanding of the outcome reports and the executive summary. *Tool 3: Items often included in assessment report appendices* lists the types of materials that are most commonly included. Appendices should include copies of all assessment instruments including rubrics. By including items such as rubrics and other measures in the appendices, those who read the assessment report will have a better understanding of how the results were achieved and a context for interpreting recommendations for improvement.

Tool 4: Items often included in assessment report appendices

- Notes from meetings with faculty
- Examples of outcomes measures
- Rubrics used to score student work
- Questionnaires used in indirect measures
- Charts and graphs illustrating results of data analyses
- Reports from institutional surveys

Section VI: Planning for the Next Assessment and Closing the Assessment Loop

Assessment is a cyclical process that builds on previous work and activity. The “assessment loop” is closed once a program takes findings from its assessment results, and implements changes based on those findings. Generally, assessment findings indicate a need to modify the assessment process or the academic program.

Checklist of Needed Activity for Planning and Implementing Changes:

- ☐ Results from current assessment cycle
- ☐ Draft of assessment report

Making any change also requires consideration of resources and developing a plan of action. The following section provides a framework for thinking about taking action to close the assessment loop.

Changes in the assessment process

When reviewing the assessment results, it is also important to evaluate the assessment process. This involves considering all aspects involved in creating the assessment report. Reviewing learning outcomes as well as approaches to gathering data will provide direction on improving the assessment process.

Learning outcomes

Tool 1: Re-assessing learning outcomes provides a structure for reviewing student learning outcomes. Based on findings from the student learning outcome assessment results, a program may want to retain, modify, or eliminate an outcome.

Tool 1: Re-assessing learning outcomes	
<u>Results from assessment activity</u>	<u>Likely use of outcome during next cycle</u>
Students not performing adequately relative to outcome	→ If recommendations impact student learning immediately, re-assess outcome using same measure during next cycle.
	→ If recommendations impact student learning over an extended timeframe; schedule re-assessment for later
Students performing adequately relative to outcome	→ If same results for the past 3 years, consider replacing this outcome. Potentially schedule re-assessment at an appropriate interval (e.g. three years)
Students performance relative to outcome yields unclear current results	→ If difficulty in determining appropriate level relates to outcome; re-write outcome and reassess during next cycle
	→ If difficulty relates to measures; retain outcome; revise measure; and re-assess during next year

Measures

In addition to changing outcomes, there might be a need to change the type of data collected. If results obtained were not as expected, it is also important to know if better information could be collected to demonstrate student learning. This change could vary from modifying items on a multiple-choice test to creating a new rubric for reviewing essays.

Data collection procedures

In addition to having the correct measures, it is also important to consider how data were collected in previous student learning assessments. Knowing who was included in the assessment data, and when data were collected are important to understanding if changes need to be made in data collection procedures.

Changes in the academic program

Results from the student learning assessment may indicate that program curricula need to be reviewed and adjusted. Mapping learning outcomes to the curriculum is the first step to understanding if changes are necessary. Changing how concepts are introduced and the timing of that introduction to students are two common findings from student learning assessments.

Mapping outcomes to the curriculum

Results may indicate a need to understand where students are introduced to concepts defined in the learning outcomes. Mapping learning outcomes to program courses is the first step in understanding where students are introduced to the material they need to master.

Examining concept reinforcement

Often programs will discover that students are introduced to the concept in the curriculum, but course assignments and planned experiences are not sufficient to help students master those concepts. This may lead to considering modifications in assignments, readings, or general teaching approaches to reinforce concepts with students. A program may also discover that a new course needs to be created to sufficiently address a learning outcome.

Examining course sequencing

Sometimes faculty will discover that the course provides sufficient support for the student to master the material, but course sequencing should be adjusted so that students are introduced to concepts that build on and complement each other. The student learning assessment process can be used as an audit of the programmatic educational experience.

Taking Action

Opportunities to improve the assessment process and curriculum may emerge from assessment results, but will not be realized without planning and implementation. The assessment loop is only closed if actions are taken to make modifications where necessary. Answering who, what, when, and where questions about assessment modifications are helpful to planning and implementing any changes. *Tool 2: Questions for planning change* provides a few questions to assist with mapping and implementing changes.

Tool 2: Questions for planning change

- Who will implement the changes?
- Who needs to be involved to make these changes successful?
- What will be changed?
- What needs to occur in order for things to change?
- When will the changes be put in place?
- Where will they be implemented?
- How will they be implemented?

Course Review Flowchart

The following chart outlines the activities and sequence associated with course review. Every course, after the first, third, and fifth year of CNUCDM operation will undergo full course review. This is needed to optimize course content and engage faculty in the evolution of the academic program. The current plan is for full course review every 4 years thereafter.

While this flowchart is for the scheduled course reviews, the curriculum committee can enact an interim review as beneficial at any time.

COURSE REVIEW SCHEDULE

YEAR 1

Course Title	Semester	Units	Course review first cycle	Course review second cycle
Hematology	1	4	Winter 2021-22	Winter 2023-24
Integumentary and Musculoskeletal Systems	1	7	Winter 2021-22	Winter 2023-24
Foundations of Odontology	1	6	Winter 2021-22	Winter 2023-24
Dental Anatomy	1	6	Winter 2021-22	Winter 2023-24
Foundations of Dental Medicine	1	3	Winter 2021-22	Winter 2023-24
Managing Student Life	1	1	Winter 2021-22	Winter 2023-24
Neuroscience	2	9	Winter 2021-22	Winter 2023-24

Student Self-Assessment Form

CNUCDM

Odontology 611

Self-assessment/peer assessment/faculty assessment in the laboratory of Class 2 caries removal, tooth preparation, restoration.

Course #	Course Title	Credits	Year	Term
Odont 611	Operative Dentistry <i>LAL and LAB</i>	6	DS 2	Fall

The surgical treatment of caries and degenerative and congenital diseases of the enamel and dentin is presented through the development of technical skills to remove diseased portions of the teeth and to provide anatomical functional direct restorations of teeth. Prevention and minimally invasive procedures for caries management is emphasized. Laboratory session focus on the development of procedures and psychomotor skills using surgical armamentarium in a simulated clinical setting for the treatment of caries and other diseases of the enamel and dentin.

Self-assessment/peer assessment/faculty assessment in the laboratory of Class 2 caries removal, tooth preparation, restoration.

For each domain, utilize the course materials for comparison with ideal clinical procedural activities.

Process:

A: Self assess according to the following scale 1-4

1. Under development of knowledge and skill
2. Performing with few errors
3. Consistently achieving goals of intervention needing more practice
4. Proficient in the laboratory and capable of clinical care transition

B: Have peer assess according to the same scale

C: Faculty assessment according to same scale

D: Identify learning needs and create personal learning plan: Write notes in form

DOMAIN	Self-assessment	Peer assessment	Faculty assessment	Learning needs	Personal learning plan
Caries removal					
Understanding preparation concept					
Preparation completion					
Restoration completion					
Detection of deficits					
Problem solving, identifying reasons for deficits					

Competency Evaluation Grading Rubric

Including application of biomedical sciences, behavioral sciences, ethics and professionalism

Stage of life of patient (circle one)

1. Birth
2. Infant
3. Childhood
4. Adolescence
5. Adulthood
6. Old age
7. Moribund

	1: Inadequate performance	2: Deficient performance	3: Minimal competency	4: Capable clinician knowledge, skills, values	5: Entrusted Professional Activity	Grade 1-5
Patient interaction	Non-communicative, poor listening skills	Gaps in patient/doctor interaction that created obstacles in care	Able to communicate and patient accepted care and had questions addressed	Able and personable communication with patient that addressed and allayed concerns;	Strong empathic and knowledgeable patient interaction, both verbal and nonverbal;	

				culturally aware	culturally competent	
Patient presentation	Unable to present patient findings in coherent fashion	Major gaps in presenting key findings	Able to demonstrate key findings but needs assistance prioritizing them	Demonstrates ability to present key findings and organize them in a fashion to make appropriate care decisions	Can independently evaluate and prioritize all key findings to comprehensively and without error, carry out safe and effective care through integrated medical, surgical and oral health evaluation	
Application of biomedical knowledge	Unable to apply biomedical knowledge to the care of the patient	Applies some aspects of biomedical knowledge to the care of the patient but with notable deficiencies	Demonstrates that key findings are taken into account to direct care based upon biomedical findings	Utilizes all biomedical findings to influence and optimize the care of the patient	Applies in a comprehensive and interactive fashion, with follow-up information and questions, all biomedical aspects of care in real time and associated to the patient's immediate and long term needs.	
Critical thinking	No self-reflection or	Demonstrates some ability to	Able to utilize all necessary	Applies knowledge	Thoroughly able to synthesize,	

	ability to apply knowledge critically	utilize empiricism and logic in patient care	tools of critical thinking in patient care but continues to synthesize the utilization of biomedical knowledge	critically developed in the care of patients across multiple domains of biomedical knowledge	reflect and apply biomedical knowledge broadly with inquisitive spirit and capability	
Ethical behavior/ professionalism	Demonstrates unprofessional and/or unethical behavior in the clinical setting	Thorough lapses or lack of self-awareness, a noncritical lapse in professionalism or ethical behavior is noted	Carries out all treatment in an ethical and professional manner	Shows leadership, empathy, clinical behavioral understanding customized to the patient's needs to assure both perception and reality of demonstrating ethical behavior and professionalism	Is an exemplar in applying the tenets of ethical behavior and professionalism to the patient and all members of the care team and is emulated within the team for those qualities

Managing Student Life Course Syllabus

Course #	Course Title	Credits	Year	Term
BSS 501	Managing Student Life	1	DS 1	Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
August 12, 2020	First day of Fall term for all DMD 1 students
September 30, 2020	Group project selection: one for each college of 20 students
December 1, 2020	Group projects, groups 1 and 2
December 8, 2020	Group projects, groups 3 and 4
December 15	Final reflective essay exam

Course description

Resilience, sustainability as a student and future health professional will be presented. Each session will provide a mix of lecture and small group discussions. Managing student debt, stress management, effects of social media, interpersonal relationships, and ethics in student practice will be discussed. The problems of drug and alcohol abuse will be shown. Respect in the University including cultural, gender, and sexual conduct issues will be presented. Students will be made aware of resources to promote student wellbeing.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

1. *ASDA managing student debt* <https://www.asdanet.org/index/get-involved/advocate/issues-and-legislative-priorities/Dental-Student-Debt>
2. *Dangers and opportunities for social media in medicine* <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3863578/>
3. Assael, L and McCormick, SS, *Ethical Decision Making in Dentistry* <https://books.google.com/books?id=6dItAwAAQBAJ&pg=PR6&dq=dental+ethics+suzanne+mccormick&hl=en&sa=X&ved=0ahUKEwjflqan2bnhAhWEop4KHbSKBqwQ6AEIKDAA#v=onepage&q=dental%20ethics%20suzanne%20mccormick&f=false>

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software
7. Dental operator

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	50%
Reflective essay exam	50%

Team Components	50%
Group PCS projects X1	40%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such

a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group Projects cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).
Presentation of PCS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing. The teams will each have 30 minutes for presentation which is ample time for participation of each member
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Date	Topics	Readings*	Instructor	Notes
Week 1 LAL	Axioms of success in dental school		Simonsen	
Week 2 LAL	Academic success in dental school		Wu	
Week 3 LAL	Managing student debt		Feng	
Week 4 LAL	Time management, exercise and wellness in dental school		Simonsen	
Week 5 LAL	Drug abuse in health professionals		Keating	videos
Week 6 LAL	Ethical and life affirming activity during the clinical practicum	McCormick/Assael	Assael	
Week 7 LAL	Cultural and gender boundaries in professional life		Simonsen	
Week 8 LAL	OSCE interview		Clinical faculty	
Week 9 LAL	Resiliency in didactic and clinical education		Dental faculty	
Week 10 LAL	The public health “gene”. How to apply it in your education		Glassman	
Week 11 LAL	Applying axioms of success in your education and practice		Simonsen	

Week 12 LAL	Clinical experience with patient history		Clinical faculty	
Week 13 LAL	Project presentations group 1 and 2		Dental faculty	
Week 14 LAL	Project presentations group 3 and 4		Dental faculty	
Week 15 LAL	Final reflective essay exam		Simonsen	

Course Learning Outcomes and links to Program Learning Outcomes (Appendix A) and Institutional Learning Outcomes (Appendix B)

No.	Course Learning Outcome	DMD PLO	DMD ILO	Learning Hierarchy ^b	Assessment Method
1	Develop an initial understanding of the parameters and the capability to succeed in dental school	1,2,3,4,7,8	1,3,4,6	1,2, 3	Group projects
2	Understand the impact of external forces of patient care, faculty inputs, debt and work life balance on individual dental education success	1,2,3,5,6,7,8	1,4,	2, 3	Final exam Reflective essay

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. LAL: Lecture and active learning

CLO Rubrics

CLO 1: Develop an initial understanding of the parameters and the capability to succeed in dental school

Indicators	Initial	Developing	Developed	Proficient
Demonstrates an understanding of the parameters and the capability to succeed in dental school	Does not understand managing student debt, stress management, effects of social media, interpersonal relationships, and ethics in student practice drug and alcohol abuse, respect in the University including cultural, gender, and sexual conduct issues or resources to promote student wellbeing.	Demonstrates rudimentary understanding of these domains but with evolving demonstration this knowledge	Has detailed understanding of their role as a successful dental student	Consistently demonstrates the ability participate at the level of their knowledge and skill as a dental student and can assist other students in these domains

CLO 2: Understand the impact of external forces of patient care, faculty inputs, debt and work life balance on individual dental education success

Indicators	Initial	Developing	Developed	Proficient
Understands the impact of external forces of patient care, faculty inputs, debt and work life balance on individual dental education success	Has no or limited knowledge of the effectors of student life and curriculum on success in dental school	Begins to exhibit knowledge of these domains and applies this knowledge in their student life	Is capable of managing the impact of these domains to effectively navigate student life	Is an exemplar and a mentor to others in understanding the external forces that must be adapted to in student life to promote success

Appendix A: Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> • Does not appropriately counsel patients • Does not check for understanding, ask questions, and/or asks inappropriate questions. • Does not demonstrate the 	<ul style="list-style-type: none"> • Counsels patients but leaves out pertinent information needed by patient • Communicates with basic level of clarity but does not always check for understanding or 	<ul style="list-style-type: none"> • Generally demonstrates empathy, communicates accurate information clearly, checks for understanding • Seeks to ensure understanding and 	<ul style="list-style-type: none"> • Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding • Ensures understanding and

	ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education	rephrase when confusion occurs. • Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education	generally asks questions. • Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education	asks appropriate questions. • Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	• Does not demonstrate the ability represent a patient's best interest	• Demonstrates awareness of issues that impact a patient • Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf	• Demonstrates sufficient awareness of issues that impact a patient • Demonstrates ability to articulate these issues • Demonstrates ability to sufficiently advocate on a patient's behalf	• Demonstrates full awareness of the most important issues that impact a patient • Demonstrates ability to clearly and effectively articulate these issues • Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations,	• Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize,	• Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and	• Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and	• Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements,

implement, monitor and adjust plans, and document activities)	formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	recommendations, implement, monitor and adjust plans, and document activities	recommendations, implement, monitor and adjust plans, and document activities)	monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of 	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent

			one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> Demonstrates minimal understanding of population-based care and how it influences patient-centered care Does not demonstrate awareness of how these notions influence the 	<ul style="list-style-type: none"> Demonstrates sufficient understanding of population-based care and how it influences patient-centered care Demonstrates sufficient understanding of how population-based care influences the 	<ul style="list-style-type: none"> Demonstrates superb understanding of population-based care and how it influences patient-centered care Demonstrates superb understanding of how population-based care influences the

		development of practice guidelines	development of practice guidelines and best practices for patient care	development of practice guidelines and demonstrates knowledge of best practices for patient care
--	--	---------------------------------------	---	---

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of patients; either does not or only attempt 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of

		to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	---

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. • Proposes a solution that is entirely

		supporting evidence. Is unable to defend decision or course of action.	Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	---	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological

		factors that contribute to current patient state	factors that contribute to the current patient state	factors that contribute to the current patient state
1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience

	the document is intended			
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking

3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> • Does not know professional psychological language or uses jargon • Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> • Demonstrates inaccurate use of psychological language or uses jargon in professional communications • Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> • Demonstrates appropriate use of professional language and minimal jargon • Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> • Demonstrates use of appropriate, professional language • Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> • Does not acknowledge other viewpoints • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Demonstrates little attempt to recognize other viewpoints • Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> • Recognizes other viewpoints but has difficulty incorporating them into case conceptualization • Adequately answers patient questions 	<ul style="list-style-type: none"> • Listens to questions with a consideration of alternative viewpoints • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist

4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> Does not demonstrate an awareness of patients' customs, beliefs, or perspectives Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates awareness of customs and beliefs Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates awareness of customs, beliefs, or perspectives in patients Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> Appears inattentive and impatient Uses inappropriate body language Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> Appears unfocused and distracted Uses acceptable body language Dresses in attire that is not offensive 	<ul style="list-style-type: none"> Appears composed and focused Uses appropriate body language Dresses in attire that is professional 	<ul style="list-style-type: none"> Uses articulate, tactful, and diplomatic speech Uses professional body language Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question

5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> • Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> • Attempts to interpret scientific data 	<ul style="list-style-type: none"> • Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> • Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> • Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> • Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> • Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> • Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited references and includes all necessary information in reference list

California Northstate College of Dental Medicine

Ethics in Dental Medicine and Health Care Course Syllabus

Course #	Course Title	Credits	Year	Term
BSS 522	Ethics in Dental Medicine and Health Care	2	DS 1	Spring

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
January 10, 2021	First day of Spring Term all DMD 1 students
March 1, 2021	Assignment of first group case scenario
May 15, 2021	First 4 case scenarios presentation
May 22, 2021	Second 4 case scenarios presentation
May 30, 2021	Ethics Salons
June 8, 2021	Final Exam

Course Coordinator, Instructors and Contact Information

Richard Simonsen DDS (course co-director)

Room:

E mail

Office hours

Leon Assael DMD (course co-director)

Room:

E-mail: leon.assael@cnsu.edu

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

Holly Jacobson BA (course administrator)

Room: xxx

E mail: holly.jacobson@cnsu.edu

Classroom and Meeting Times

Room: Classroom xxxx

Time: xxxx 2 hours per week

Course Description

The fundamentals of dental and medical ethics are presented including beneficence and non-maleficence. The Helsinki statement and other aspects of human research guidelines are presented including the role of Human Studies committees. The care of animals in biomedical research is discussed as well as the ethical use of human tissue in clinical care, transplant medicine etc. Ethical financial relationships and the underlying law behind them in clinical practice is discussed. The role of the criminal, tort system, the Board of Dentistry of California, and the ADA in dental ethics is presented.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

McCormick, Suzanne Stucki, *Ethical Decision Making in Dentistry*, PMPH USA, 2017
electronic reserve CNU

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint

5. Epic electronic health record
6. PACS, DICOM compatible imaging software
7. Dental operator

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	70%
Salon presentation	20%
Final exam	50%

Team Components	30%
Group case based	20%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency.

In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group case-based projects are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).
Presentation of PCS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing.
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

EACH SESSION IS 2 HOURS

Date	Topics	Readings*	Instructor	Notes
Week 1	Fundamentals of dental ethics		Simonsen	
Week 2	Ethical Dilemmas in the education of dentists	McCormick, chapter 1	Assael	
Week 3	Ethics in licensure	McCormick, chapter 3	Keating	
Week 4	Ethics in treatment planning		Simonsen	

Week 5	Ethics in informed consent	McCormick, chapter 15	Cadra	videos
Week 6	First case based ethics salon		Clinical faculty	
Week 7	Patient autonomy, justice, veracity, Beneficence and nonmaleficence in dental practice		Simonsen	Project 1 case assignment to groups
Week 8	OSCE ethics patient interview		Clinical faculty	
Week 9	Ethics Cases Group 1		Clinical faculty	
Week 10	The ethical dilemmas of group practice, systems based practice, and individual practice.	McCormick chapter 4 and 6	Assael	
Week 11	Second case based ethics salon		Clinical faculty	
Week 12	Ethical business practices in dental practice		Chang	
Week 13	Ethics cases group 2		Keating	
Week 14	Summative session dental ethics		Simonsen	
Week 15	Final exam		Simonsen	

Course Learning Outcomes and links to Program Learning Outcomes (Appendix A) and Institutional Learning Outcomes (Appendix B)

No.	Course Learning Outcome	DMD PLO	DMD ILO	Learning Hierarchy ^b	Assessment Method
1	Understand the fundamental of ethics in dental education and practice	1,2,3,4,7,8	1,3,4,6	1,2, 3	Clinical evaluation Group projects
2	Be able to apply didactic knowledge of dental ethics to address clinical problems in dental practice.	1,2,3,5,6,7,8	1,4,	2, 3	Clinical assessment Quizzes Final exam

^a plo's appendix A

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. Didactic: lectures, required readings
2. Learning Activities: laboratory practice, OSCE, laboratory assignments/exercises, group project

CLO Rubrics

CLO 1: Understand the fundamental of ethics in dental education and practice

Indicators	Initial	Developing	Developed	Proficient
Understand the fundamental of ethics in dental education and practice	Only prior practical knowledge of ethics	Demonstrates rudimentary ability to relate ethical standards	Has detailed understanding of ethical responsibilities and can relate fundamentals	Consistently demonstrates the ability to apply ethical knowledge into practice

CLO 2: Be able to apply didactic knowledge of dental ethics to address clinical problems in dental practice

Indicators	Initial	Developing	Developed	Proficient
Apply didactic knowledge of ethics into clinical practice	Has no or limited knowledge of application of ethics into practice	Begins to exhibit application of didactic knowledge of ethics into practice	Consistently applies didactic knowledge of ethics into dental practice	Complete knowledge and skill in application of ethical standards and is able to reflect on these and augment them through integration and consideration of consequences of actions.

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. Does not demonstrate the ability to find and utilize appropriate 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for understanding or rephrase 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding and generally asks questions. Frequently demonstrates 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding and asks appropriate questions.

	resources and references necessary for providing accurate counseling, consultation and education	when confusion occurs. <ul style="list-style-type: none"> • Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education	<ul style="list-style-type: none"> • Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> • Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> • Demonstrates awareness of issues that impact a patient • Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> • Demonstrates sufficient awareness of issues that impact a patient • Demonstrates ability to articulate these issues • Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> • Demonstrates full awareness of the most important issues that impact a patient • Demonstrates ability to clearly and effectively articulate these issues • Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect	<ul style="list-style-type: none"> • Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect 	<ul style="list-style-type: none"> • Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and 	<ul style="list-style-type: none"> • Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret 	<ul style="list-style-type: none"> • Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence,

and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly

		deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> • Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of	<ul style="list-style-type: none"> • Does not demonstrate awareness of 	<ul style="list-style-type: none"> • Demonstrates minimal understanding of population-based 	<ul style="list-style-type: none"> • Demonstrates sufficient understanding of population- 	<ul style="list-style-type: none"> • Demonstrates superb understanding of population-

how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	population-based care.	care and how it influences patient-centered care <ul style="list-style-type: none"> • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	based care and how it influences patient-centered care <ul style="list-style-type: none"> • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	based care and how it influences patient-centered care <ul style="list-style-type: none"> • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	------------------------	---	---	---

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness

		cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	---	---	---

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads

	<p>rationale for selected alternative or decision</p>	<p>issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.</p>	<p>demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.</p>	<p>to sound, logical, and “best” decision or course of action.</p> <ul style="list-style-type: none"> Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular / Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking

2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques	<ul style="list-style-type: none"> Does not acknowledge other viewpoints 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them 	<ul style="list-style-type: none"> Listens to questions with a consideration of

when addressing questions	<ul style="list-style-type: none"> • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Answers are simplistic and lack intellectual depth 	into case conceptualization <ul style="list-style-type: none"> • Adequately answers patient questions 	alternative viewpoints <ul style="list-style-type: none"> • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients

4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment
---	--	--	--	---

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> • Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> • Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> • Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> • Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> • Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> • Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> • Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> • Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> • Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> • Attempts to interpret scientific data 	<ul style="list-style-type: none"> • Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> • Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> • Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> • Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> • Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> • Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine

Behavioral Medicine Course Syllabus

Course #	Course Title	Credits	Year	Term
BSS 662	Behavioral Medicine (CP Course) <i>LAL, Clin</i>	3	DS 2	Spring

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
	First day of Spring Term for all DMD 2 students

Course Coordinator, Instructors and Contact Information

Bret McLaughlin D. Psych. (course co-director)

Room:

E mail: bret.mccaughlin@cnsu.edu

Office hours

Leon Assael DMD (course co-director)

Room:

E-mail: leon.assael@cnsu.edu

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

Holly Jacobson BA (course administrator)

Room: xxx

E mail: holly.jacobson@cnsu.edu**Classroom and Meeting Times**

Room: Classroom xxxx

Time: xxxx 2 hours per week

Clinic and meeting times

Room: Stone Lake Psychology Clinic

Time: 4 hours per week for 3 weeks per student

Course Description

In this course aspects of clinical psychology of importance in dental practice is presented. Cased base learning will include: minor and major psychiatric illnesses impacting on oral health and the provision of oral health care; elder, spousal and child abuse; dental fear; and, dental phobias.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

1. *Bates guide to physical examination and history Taking- 11th edition*, Bickley, Lynn, Wolters Kluwer
2. Yagiela, *Pharmacotherapy and therapeutics for Dentistry*, Elsevier, 2018

3. Casamassimo, *Pediatric Dentistry, infancy through adolescence*, Elsevier 2017
4. Barlow, D. *Clinical Handbook of Psychological disorders*, the Guilford Press, 2014

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software
7. Psychology clinic

Evaluation Components
