In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
First quiz	10%
Second Quiz	10%
Final exam	30%
Clinical evaluation practical	30%

Team Components	20%
Group PCS projects X2	10%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass

60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group PCS cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late). Presentation of PCS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing.
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

Date	Topics	Readings*	Instructor	Notes
Week 1 LAL	Introduction to behavioral sciences		McLaughlin/ Assael	

1: Clinic assignment	Groups 1,2,3,4 (4 students per day mon/tues/wed/thurs)		Clinical faculty and staff	
Week 2	Behavioral issues in dental practice		Assael	
2: Clinic assignment	Groups 5,6,7,8		Clinical faculty and staff	
Week 3 Psychological disorders 1	Panic disorder, phobias, PTSD	Barlow Chapter 1,2,3	McLaughlin	
Week 3: clinic assignment	Groups 9,10,11,12		Clinical faculty and staff	
Week 4: psychological disorders 2	OCD, anxiety disorder, depression	Barlow chapter 4,5,6,7,8	McLaughlin	
Week 4 Clinic assignment	Groups 13,14,15,16		Clinical faculty and staff	
Week 5: Psychological disorders 3	Borderline personality, bipolar disorder, schizophrenia and other psychoses	Barlow chapter 10,11,12,13	McLaughlin	Case assignments X4 to groups
Week 5 clinic assignment	Groups 17,18,19,20		Clinical faculty	
Week 6	Dental fear and anxiety		Assael	
Week 6 clinic	Groups 1,2,3,4 (4 students per day mon/tues/wed/thurs)		Clinical faculty	
Week 7	The patient behavioral history in dental practice.	Bates, chapter 3	Clinical faculty	
Week 7 clinic	Groups 5,6,7,8	Bates chapter 2 UCSD practical guide to clinical medicine	Keating	

Week 8	Psychotropic Pharmacopeia in dental practice	Yagiela, chapter 12	Cadra	
Week 8 clinic	Groups 9,10,11,12		Clinical faculty	
Week 9	Managing dental phobias, pain and anxiety in dental practice		Keating Assael Oral surgery fac	
Week 9 clinic	Groups 13,14,15,16		Clinical faculty and staff	
Week 10	Opioids use in dental patients and prescription opioids		Harold Tu	
Week 10 clinic	Groups 17,18,19,20		Clinical faculty	
Week 11	Other drug/alcohol abuse in dental practice		Harold Tu	
Week 11 clinic	Groups 1,2,3,4 (4 students per day mon/tues/wed/thurs)		Clinical faculty	
Week 12	Working with the behavioral health interprofessional team in collaborative practice models		Huong Le	
Week 12 clinic	Groups 5,6,7,8		faculty	
Week 13	Case presentations groups 1 and 2		Clinical faculty	
Week 13 clinic	Groups 9,10,11,12		Clinical faculty and staff	
Week 14	Case presentations groups 3 and 4		Clinical faculty	
Week 14 clinic	Groups 13,14,15,16		Clinical faculty	
Week 15	Final exam		Faculty	
Week 15 clinic	Groups 17,18,19,20		Clinical faculty	

**Course Learning Outcomes and links to Program Learning Outcomes (Appendix A)
and Institutional Learning Outcomes (Appendix B)**

No.	Course Learning Outcome	DMD PLO	DMD ILO	Learning Hierarchy ^b	Assessment Method
1	Develop an initial understanding and capability to assess behavioral issues in dental practice	1,2,3,4,7,8	1,3,4,6	1,2, 3	Clinical evaluation Group projects
2	Communicate with the behavioral science clinical team with regard to interprofessional collaborative practice issues	1,2,3,5,6,7,8	1,4,	2, 3	Clinical assessment Final exam

^a plo's appendix A

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. Didactic: lectures, required readings
2. Learning Activities: laboratory practice, OSCE, laboratory assignments/exercises, group project

CLO Rubrics

CLO 1: Develop an initial understanding and capability to assess behavioral issues in dental practice

Indicators	Initial	Developing	Developed	Proficient
Has an understanding and capability to assess behavioral issues in dental practice	Begins to apply behavioral sciences knowledge to the attendance of clinical issues in dental practice	Demonstrates ability be a clinical team member but with evolving demonstration of understanding their own role and the role of others in behavioral sciences	Has detailed understanding of behavioral sciences issues in dental practice and has the capability to apply that knowledge in the care of dental patients	Consistently demonstrates the ability participate at the level of their knowledge and skill as a clinical team member.

CLO 2: Communicate with the behavioral science clinical team with regard to interprofessional collaborative practice issues to improve patient care

Indicators	Initial	Developing	Developed	Proficient
Can communicate with the behavioral sciences team with regard to collaborative practice issues to improve patient care	Has no or limited knowledge of behavioral health professionals and their role in oral health care	Begins to exhibit knowledge of the capability of the behavioral health team as a resource in oral health practice	Can implement team approach to care with behavioral health in patient care with uncommon non critical errors	Creates features of a collaborative practice team in oral health and behavioral health

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Seeks to ensure understanding and generally asks questions. Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Ensures understanding and asks appropriate questions. Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered

patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete 	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare

	subsystems to deliver oral healthcare	with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare

<p>2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices</p>	<ul style="list-style-type: none"> • Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> • Demonstrates minimal understanding of population-based care and how it influences patient-centered care • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> • Demonstrates sufficient understanding of population-based care and how it influences patient-centered care • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<ul style="list-style-type: none"> • Demonstrates superb understanding of population-based care and how it influences patient-centered care • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	--	---	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness

		cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	---	---	---

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads

	<p>rationale for selected alternative or decision</p>	<p>issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.</p>	<p>demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.</p>	<p>to sound, logical, and “best” decision or course of action.</p> <ul style="list-style-type: none"> • Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	---	--	--	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular / Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking

2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques	<ul style="list-style-type: none"> Does not acknowledge other viewpoints 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them 	<ul style="list-style-type: none"> Listens to questions with a consideration of

when addressing questions	<ul style="list-style-type: none"> • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Answers are simplistic and lack intellectual depth 	into case conceptualization <ul style="list-style-type: none"> • Adequately answers patient questions 	alternative viewpoints <ul style="list-style-type: none"> • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients

4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources

		clearly support ideas		
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> • Does not use citations 	<ul style="list-style-type: none"> • Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> • Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> • Uses properly cited references and includes all necessary information in reference list

THE HONOR CODE OF CALIFORNIA NORTHSTATE UNIVERSITY COLLEGE OF DENTAL MEDICINE

The Honor Code of California Northstate College of Dental Medicine (CNUCDM) is a formal code of conduct that emphasizes the four core principles of respect, honesty and integrity, legal and ethical behavior, and professionalism, to which all students, faculty, and staff are held responsible for maintaining:

- **RESPECT**

CNUCDM is dedicated to teaching, scholarly activity, research, and service in a respectful manner. We respect one another, our supporters, our colleagues, and our patients. We extend this respect to all persons, regardless of race, color, national origin, ancestry, citizenship, gender, gender identity, sexual orientation, age, religion, physical or mental disability, or veteran status. We promote good will amongst our diverse population and uphold the autonomy, dignity, and moral integrity of all persons. We respect the abilities, customs, beliefs, values, and opinions of others. As members of the dental medicine and healthcare professions community, we promote the good of every person in a caring, compassionate, and confidential manner, with respect to their right to privacy.

The following examples include, but are not limited to, acts that violate the respect principle of the Honor Code and will be subject to non-academic disciplinary action: assault, battery, or other act of physical violence against any person including patients, staff and faculty or those beyond CNU that reflect on the ethics and professionalism of the student, faculty or staff member; theft or destruction of property owned by or in the possession or control of CNUCDM or a member of the CNU community; slander, libel, or defamation (slander, libel, and defamation all involve lying) against CNU or a member of the CNU community; a hate crime against a member of the CNU community.

The acts described in the preceding sentence and other acts in violation of the respect principle will be subject to disciplinary action if they occur on or off campus. Such acts pertain to activities affecting any person in any location as they reflect upon the ethics and professionalism of a health profession.

- **HONESTY AND INTEGRITY**

CNUCDM is dedicated to teaching, scholarly activity, research, and service with honesty and integrity, both on and off campus. Dental medicine students have a duty to be truthful in professional and professional-patient relationships. We are committed to teaching, scholarly activity, and professional preparation in a team-based learning environment, in which all

individuals are personally accountable and adhere to the tenets of honesty and integrity in the classroom, in patient care, in research, and in the community. Cheating, plagiarism, and other forms of academic dishonesty are violations of this policy. Individual work is to be based primarily on the effort of the individual with outside resources credited where utilized. Team work and professional relationships are to be based on individual contributions and collaboration from all team members. All examinations, projects, and in or out-of-classroom assignments, whether individual or team-based, are expected to be performed and completed with the utmost degree of honesty and integrity.

The following examples include, but are not limited to, acts that violate the honesty and integrity principle of the Honor Code and will be subject to academic disciplinary action: cheating; plagiarism; claiming authorship of written material not so authored; claiming credit for research not so performed; claiming participation on a team project while not participating in the project; any form of academic dishonesty; theft or destruction of academic materials owned by CNUCDM or a member of the CNU community; theft or destruction of research materials owned by CNU or a member of the CNU community. The acts described in the preceding sentence and other acts in violation of the honesty and integrity principle will be subject to disciplinary action if they occur on or off campus.

- **LEGAL STANDARDS AND ETHICAL BEHAVIOR**

CNUCDM is dedicated to behavior that follows legal and ethical standards in teaching, scholarly activity, research, and service. We are committed to following the law, professional practice standards, and the ADA, and CDA Code of Conduct. We comply with and adhere to all federal, state, and local laws and regulations. We encourage all to act ethically in developing and advocating a culture of consideration for codes of ethics, values, and moral convictions of those who could be affected by our decisions. Whenever appropriate, we seek advice and counsel to determine the right course of action and to make the best decision on behalf of those who depend on us to do so.

The following examples include, but are not limited to, acts that violate the legal standards and ethical behavior principle of the Honor Code and will be subject to academic disciplinary action or non-academic disciplinary action as appropriate: any behavior which violates federal, state or local laws, or the policies or rules of any College or formal affiliate; violation of the pharmacy and health care related laws and regulations of the State of California and the California Board of Dentistry violation of the written standards of practice of the preceptors and practice sites participating in the CNUCDM experiential education program. The acts described in the preceding sentence and other acts in violation of the legal standards and ethical behavior principle will be subject to disciplinary action if they occur on or off campus.

- **PROFESSIONALISM**

CNUCDM is committed to providing teaching, scholarly activity, research, patient care, and service in a professional manner. We display professional attitudes, values, and behaviors in the classroom, at preceptor sites, and in the community. We encourage team work and team-based learning, with respect for differing points of views of team members. At the same time we expect individual competence, performance, and accountability in a professional manner. We serve as positive advocates for our profession by striving for excellence in the performance of our duties, while protecting the health and autonomy of our patients, and serving individual, community, and societal needs. We embrace the ADA Dentists Oath, the Dentists Prayer, the Hippocratic Oath, and the principles embodied within.

The following examples include, but are not limited to, acts that violate the professionalism principle of the Honor Code and will be subject to academic disciplinary action or non-academic disciplinary action as appropriate: any behavior which violates federal, state, or local laws, or the policies or rules of any College or formal affiliate; lewd, obscene or indecent conduct on any College owned or controlled building or property; unauthorized manufacture, sale, possession or use of any substance that causes chemical dependence or impairment; hazing; harassment; possession of a deadly weapon on campus or practice site. The acts described in the preceding sentence and other acts in violation of the professionalism principle will be subject to disciplinary action if they occur on or off campus. Violations of patient confidentiality or trust, unwanted social relationships/encounters with patients, quid pro quo actions directed at patients, or CNU community members are additional examples of possible demonstrations of unprofessional behavior.

Personal Accountability and Expectations

All students, faculty, and staff of the CNUCDM community are required to follow all applicable provisions of this Honor Code. We are all personally responsible and accountable for maintaining an environment and culture of respect, honesty, integrity, legal and ethical behavior, and professionalism. This environment and culture shall be extended off campus when dealing with a CNU related matter or a member of the CNU community, including, but not limited to patients, preceptors and practice sites participating in the CNU experiential education program.

It is understood that teamwork is necessary for ensuring and sustaining an environment and culture that support these core principles and related values.

As such, it is expected that all students, faculty, and staff of CNUCDM shall:

- Know the Honor Code,
- Uphold the Honor Code in daily life both on and off-campus,
- Promote the Honor Code and an environment and culture of respect, honesty, integrity, legal and ethical behavior, and professionalism,
- Report Honor Code violations to the appropriate personnel,
- Seek appropriate advice if unsure or in doubt, and
- Cooperate with investigations of Honor Code violations.

Consequences

Any and all violations of the Honor Code shall be processed as appropriate through the Honor Board, the Office of Academic Affairs, Office of Student Affairs, or the responsible governing body. Any person accused of academic or non-academic violations will be afforded fair jurisprudence and due process of law. Violations of an academic, professional, or other nature will be subject to appropriate disciplinary action, which may include, but is not limited to, warning, probation, remediation, suspension, dismissal, expulsion, or legal prosecution.

Reporting

Since dental faculty are licensees responsible for patient care and students are future licensees, it is the responsibility of all to report violations of the honor code appropriately and in a timely fashion.

Non-Retaliation

CNUCDM does not tolerate retaliation against individuals who report hateful, dishonest, illegal, unethical, unprofessional, or otherwise inappropriate acts. Anyone who retaliates against these individuals is in violation of the Honor Code and is subject to disciplinary action for that Honor Code violation.

Rewards

By knowing, understanding, embracing, and following the core principles of this Honor Code, we can ensure that CNUCDM will sustain an environment and culture that supports:

- An effective learning environment,
- An effective teaching environment,
- An effective working environment, and
- An institution with high quality members.

I have read, understand, and will embrace and follow the Honor Code of CNUCDM in teaching, scholarly activity, research and service.

Which of the following unprofessional behaviors has the student exhibited? (Check all that apply):

Professional Responsibilities

- ☐ Uses illicit substances
- ☐ Uses alcohol, non-prescription or prescription drugs in a manner that compromises ability to contribute to patient care
- ☐ Fails to accept and internalize criticism and feedback
- ☐ Is unwilling to expand knowledge or competence
- ☐ Has inappropriate demeanor or appearance in the classroom or in the health care setting
- ☐ Fails to complete required tasks or requires constant reminders from staff or faculty
- ☐ Fails to notify appropriate staff in a timely manner of absences
- ☐ Fails to accept responsibility for own errors
- ☐ Consistently arrives late to commitments
- ☐ Repeatedly fails to respond to communications with student, staff, residents, faculty, or course/clerkship directors

Professional Relationships

- ☐ Engages in inappropriate relationships with patients
- ☐ Engages in inappropriate relationships with students, staff, residents, or faculty, disrupting the learning environment
- ☐ Acts disrespectfully towards others
- ☐ Treats standardized patients disrespectfully
- ☐ Engages in disruptive behavior in class or with health care team

Professional Ethic

- ☐ Behaves in a dishonest manner
- ☐ Misrepresents self, others, or members of the team to others
- ☐ Breaches patient confidentiality
- ☐ Acts in disregard for patient welfare
- ☐ Misuses cadavers or other scientific specimens
- ☐ Violates official course or clerkship policy
- ☐ Other:

Describe in detail the incident which prompted the completion of this form (attach additional pages, if needed).

If person being reported is a student, please also complete page 2 and return to Assistant Dean of Student Affairs.

Describe previous feedback and remediation which took place prior to the completion of this form (attach additional pages, if needed).

Student Comments:

I acknowledge that I have reviewed this evaluation with the course or clerkship director or Dean of Student Affairs and have the following comments:

California Northstate University College of Dental Medicine
Foundations of Odontology Course Syllabus

Course #	Course Title	Credits	Year	Term
Odont 511	Foundations of Odontology <i>LAL, LAB and CLIN</i>	6	DS 1	Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
August 12, 2020	First day of Fall term for all DMD 1 students
September 28, 2020	First quiz: patient intake
October 15, 2020	Submission of first Patient Case Study (PCS) performed on patient of record/Team activity
November 28, 2020	Submission of second PCS/Team activity
December 8, 2020	Second quiz: patient assessment
December 14, 2020	Final Clinical Evaluation: Practical
December 20, 2020	Final Examination: Didactic

Course Description

This course will introduce students to infection control, the dental office and clinical care site, and provide initial skill in interaction with the patient and the patient's oral cavity. Students will enter the clinical setting with faculty and upper level students to provide limited aspects of oral care and join the oral health care team. Students will gain initial understanding of the clinical encounter including history of present illness, social history, family history, medical history. Students will perform oral examination. Students will gain initial understanding of the electronic health record.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

1. *Bates guide to physical examination and history Taking- 11th edition*, Bickley, Lynn, Wolters Kluwer
2. *Cottone, Practical infection control in dentistry*, Molinari J, Hare, J, 3rd edition, Wolters Kluwer
3. Epic Wisdom dental module training: www.epic.com
4. Maryland Mighty Tooth: School based dental sealant training program
5. https://www.mightytoothcurriculum.com/module4/mod4_0.html
6. Infection Prevention and Control in Dental Settings, Centers for Disease Control and Prevention, Atlanta, GA, 2019 <https://www.cdc.gov/oralhealth/infectioncontrol/index.html>
7. Laheij, A, Kistler, J, Belibasakis G, Valimaa, H, de Soet JJ, Healthcare associated viral and bacterial infections in dentistry, J Oral Microbiol doi 10.3402/jom.v4i0.17659
8. Assael L, nosocomial infection and fomites in oral and maxillofacial surgery, J oral maxillofac surg 63: 889-890, 2005
9. UCSD Practical Guide to clinical medicine, <https://meded.ucsd.edu/clinicalmed/head.htm>

Optional Textbook(s) and Material(s)

- *Sturdevant's Art and Science of Operative Dentistry*, Heymann, Swift, Ritter, Elsevier, 6th ed. (as a pre-read prior to DMD2 operative dentistry Odont 621)

Technology

- Computer-assisted instruction (Clickers) and SCANTRON Sheets
- Web-based course management (Canvas) and Examsoft
- Audio/Video recordings where applicable
- PowerPoint
- Epic electronic health record
- PACS, DICOM compatible imaging software
- Dental operator

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
First quiz	10%
Second Quiz	10%
Final exam	30%
Clinical evaluation practical	30%

Team Components	20%
Group PCS projects	10%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the

Total individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to

the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group PCS cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).
Presentation of PCS cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing.
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Date	Topics	Readings*	Instructor	Notes
Week 1 didactic	CDC guidelines for infection control	CDC infection control in dentistry	Assael	
Week 1 lab	Barrier technique, dental operatory components	CDC infection control in dentistry	Keating	
Week 1 clinic	Apply clinician infection control protocols		Clinical faculty and staff	
Week 2 didactic	Nosocomial Infection in dental practice	Health care associate viral and bacterial infections Laheij Assael, nosocomial infection	Keating	
Week 2 lab	Demonstration of aerosol and surface contamination, water lines, handpieces		Keating	videos
Week 2 clinic	Performance of equipment infection control in the clinic		Clinic staff	
Week 3 didactic	Introduction to the patient: interviewing	Bates: Chapter 1	Assael	Project 1 PCS assignment to groups
Week 3 lab	OSCE interview		Clinical faculty	
Week 3 clinic	Clinical experience with patient interviews		Clinical faculty	
Week 4 didactic	History of Present Illness Dental history Family and social history, past medical history, review of systems	Bates chapter 3	Assael	

Week 4 lab	Eliciting the history Quiz 1		Clinical faculty	Quiz 1
Week 4 clinic	Clinical experience with patient history		Clinical faculty	
Week 5 didactic	Initial oral and head and neck examination	Bates chapter 2 UCSD practical guide to clinical medicine	Keating	
Week 5 lab	Oral head and neck exam		Clinical faculty	
Week 5 clinic	Clinical experience with patient exam		Clinical faculty	
Week 6 didactic	Project presentations		Keating Assael	PCS 1 presentations
Week 6 lab	Project presentations			
Week 6 clinic	Clinic participation			
Week 7 didactic	Sealants 1	Maryland manual	Chan	
Week 7 lab	Sealant 1 lab	Maryland manual	Clinical faculty)	
Week 7 clinic	Sealant 1 clinic	Maryland manual	Clinical faculty	
Week 8 didactic	Sealants 2		Chan	
Week 8 LAB	Sealant 2 lab		Clinical faculty	
Week 8 Clinic	Sealant 2 clinic		Clinical faculty	
Week 9 didactic	In depth: history of present illness, family history, Social history, PMH, ROS	Bates Ch 1	Assael	PCS 2 ASSIGNMENT

Week 9 lab	Practice Patient interviews in OSCE format		Clinical faculty	
Week 9 clinic	Patient intakes		Clinical faculty	
Week 10 didactic	The electronic health record, introduction	EPIC manual	Assael	
Week 10 lab	Using the electronic health record		Clinical faculty	
Week 10 clinic	Observing the electronic health record in clinic		Clinical faculty	
Week 11 didactic	Dental assisting	PPT only	Keating	
Week 11 lab	Dental assisting lab		Clinical faculty	
Week 11 clinic	Assist in clinic		Clinical faculty	
Week 12 didactic	PCS presentations		Class	Pcs 2 presentations
Week 12 lab	PCS presentations		Class	
Week 12 clinic	Clinical experience		Clinical faculty	
Week 13 didactic	The electronic health record: compliance and business issues	Epic manual	Keating	Quiz 2
Week 13 lab	Clinical billing simulation, case based compliance module		Keating	
Week 13 clinic	Business office		Clinical faculty and staff	
Week 14 didactic	Integrating intake history, exam, electronic record and initial clinical encounters		Assael Keating	
Week 14 lab	Clinical encounter simulations		Clinical faculty	
Week 14 didactic	Participate in team care in clinic		Clinical faculty	
Week 15 didactic	Final exam didactic		Assael Keating	
Week 15 lab	Final exam practical		Clinical faculty	
Week 15 clinic	General clinic experience in team care		Clinical faculty	

Course Learning Outcomes and links to Program Learning Outcomes (Appendix A) and Institutional Learning Outcomes (Appendix B)

No.	Course Learning Outcome	DMD PLO	DMD ILO	Learning Hierarchy ^b	Assessment Method
1	Develop an initial understanding and capability to participate in the patient encounter as a clinical team member	1,2,3,4,7,8	1,3,4,6	1,2, 3	Clinical evaluation Group projects
2	Thoroughly implement all infection control measures in the dental setting to meet CDC standards	1,2,3,5,6,7,8	1,4,	2, 3	Clinical assessment Quizzes Final exam
3	Demonstrate ability to complete and record a thorough medical and dental medicine patient history	1,2,3,5	1,2,4,6	1,2	Clinical assessment Quizzes Final exam
4	Perform initial oral examination, place dental sealants in pediatric patients. Assist in dental care as a member of the care team.	1,2,3,4	1,2,4,5	2,3	Clinical assessment Quizzes Final exam
5	Demonstrate professionalism/ development of a professional identity as a dentist while participating as a student dentist in the patient care team	1,3,4	1,2,4,6	1,2,	Clinical assessment Quizzes Final exam

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. Didactic: lectures, required readings
2. Learning Activities: laboratory practice, OSCE, laboratory assignments/exercises, group project

CLO Rubrics

CLO 1: Develop an initial understanding and capability to participate in the patient encounter as a clinical team member

Indicators	Initial	Developing	Developed	Proficient
Participates with understanding and capability at an initial encounter level in patient care as clinical team member	Unable participate in clinical care effectively.	Demonstrates rudimentary ability be a clinical team member but with evolving demonstration of understanding their own role and the role of others	Demonstrates detailed understanding of their role as a team member and is usually effective in that role	Consistently demonstrates the ability participate at the level of their knowledge and skill as a clinical team member.

CLO 2: Thoroughly implement all infection control measures in the dental setting to meet CDC standards

Indicators	Initial	Developing	Developed	Proficient
Implements all criteria for infection control according to CDC standards	Demonstrates no or limited knowledge of infection control in health care	Begins to exhibit knowledge of infection control and understands general principles of disease transmission and its prevention	Implements barrier, sterilization, clean surgical technique consistently in patient care with uncommon non critical errors	Demonstrates complete knowledge and skill in infection control, able to perform all infection control tasks without error and able to teach and lead the oral health care team in infection control.

CLO 3: Demonstrates ability to complete and record a thorough medical and dental medicine patient history

Indicator	Initial	Developing	Developed	Proficient
Performs medical and dental medicine patient history to elicit information essential to completion of safe and effective clinical care.	Does not demonstrate an understanding of the patient history components or their importance.	Demonstrates a developing understanding of the patient history and its utility in guiding patient care	Demonstrates a comprehensive understanding of the role of the patient history and is able to capably elicit the history with few noncritical omissions	Consistently elicits, interprets and synthesizes the patient history as a guide to treatment decisions

CLO 4: Perform initial oral examination, place dental sealants in pediatric patients. Assist in dental care as a member of the care team

Indicators	Initial	Developing	Developed	Proficient
Performs exam for sealant placement and place sealants as a care team member.	Unable to assess the need for sealants, ability to place and skills to complete procedure.	Begins to develop skills in assigned tasks including assessment, isolation and use of materials.	Demonstrates adequate assessment, and placement of dental sealants with uncommon critical errors resulting in repeat procedures	Consistently demonstrates thorough ability to assess and use sealants without error at the time of placement

CLO 5: Demonstrate professionalism/ development of a professional identity as a dentist while participating as a student dentist in the patient care team

Indicators	Initial	Developing	Developed	Proficient
Functions collaboratively & effectively as a member of the team of DMD1	Unable to function collaboratively and effectively as a member of the team.	Functions somewhat collaboratively and effectively as a member of the team.	Functions collaboratively and generally effectively as a member of the	Consistently functions collaboratively and effectively as a member of the team.
Understands and exhibits the proper role of the dentist in clinical care	Unable to ascertain the role of the dentist in patient care	Demonstrates a developing understanding of the role of the dentist in improving patient health and well being	Demonstrates strong understanding of the value of oral health care as led by	Thoroughly can demonstrate and teach to the team the role of the dentist in health care
Demonstrates the highest level of ethics, empathy and cultural sensitivity in health care as a member of the team	Does not exhibit empathy, not guided by sound ethical principles and/or is not culturally sensitive	Demonstrates empathy and a developing understanding of the nuances of the ethical relationship between patient and doctor and has developing understanding of the role of culture and its role in improving health outcomes.	Demonstrates strong commitment to ethical patient care and strong motivation driven by empathy toward those afflicted with illness and those who need health care. Has cultural competence guiding care decisions.	Can consistently demonstrate understanding and exhibits all the features of medical ethics in the care of all patients. Can promote empathy in all team members and has a lifelong learning action plan implemented to address cultural and societal norms and expectations to optimize patient care and improve health

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Seeks to ensure understanding and generally asks questions. Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Ensures understanding and asks appropriate questions. Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and

assessments and recommendations, implement, monitor and adjust plans, and document activities)	interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and 	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems

		healthcare delivery system	demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> Demonstrates minimal understanding of population-based care and how it influences patient-centered care Does not demonstrate awareness of how these notions 	<ul style="list-style-type: none"> Demonstrates sufficient understanding of population-based care and how it influences patient-centered care Demonstrates sufficient understanding of how population- 	<ul style="list-style-type: none"> Demonstrates superb understanding of population-based care and how it influences patient-centered care Demonstrates superb understanding of how population-

		influence the development of practice guidelines	based care influences the development of practice guidelines and best practices for patient care	based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
--	--	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of patients; either does not or only attempt 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of

		to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	---

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> • Is not able to correctly identify the problem or issue being considered. • Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. • Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. • Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. • Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> • Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. • Identifies a few, but not all, resources needed for decision making. • Demonstrates ability to interpret some information and data but not all. • Does not fully or effectively evaluate alternative solutions. • Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with 	<ul style="list-style-type: none"> • Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. • Identifies most of the resources needed. • Demonstrates ability to interpret most information and data. • Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. • Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). 	<ul style="list-style-type: none"> • Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. • Identifies all appropriate resources. • Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. • Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. • Proposes a solution that is entirely

		supporting evidence. Is unable to defend decision or course of action.	Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	---	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience

2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking

3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> • Does not know professional psychological language or uses jargon • Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> • Demonstrates inaccurate use of psychological language or uses jargon in professional communications • Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> • Demonstrates appropriate use of professional language and minimal jargon • Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> • Demonstrates use of appropriate, professional language • Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> • Does not acknowledge other viewpoints • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Demonstrates little attempt to recognize other viewpoints • Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> • Recognizes other viewpoints but has difficulty incorporating them into case conceptualization • Adequately answers patient questions 	<ul style="list-style-type: none"> • Listens to questions with a consideration of alternative viewpoints • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist

4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> Does not demonstrate an awareness of patients' customs, beliefs, or perspectives Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates awareness of customs and beliefs Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> Demonstrates awareness of customs, beliefs, or perspectives in patients Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> Appears inattentive and impatient Uses inappropriate body language Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> Appears unfocused and distracted Uses acceptable body language Dresses in attire that is not offensive 	<ul style="list-style-type: none"> Appears composed and focused Uses appropriate body language Dresses in attire that is professional 	<ul style="list-style-type: none"> Uses articulate, tactful, and diplomatic speech Uses professional body language Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question

5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> • Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> • Attempts to interpret scientific data 	<ul style="list-style-type: none"> • Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> • Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> • Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> • Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> • Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> • Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> • Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> • Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> • Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> • Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> • Does not incorporate references 	<ul style="list-style-type: none"> • Incorporates references from psychological sources that do not clearly support ideas 	<ul style="list-style-type: none"> • Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> • Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> • Does not use citations 	<ul style="list-style-type: none"> • Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> • Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> • Uses properly cited references and includes all necessary information in reference list

**2018 – 2019 Academic Year
Stages of Life Course Syllabus
Course #: COM 591
Year: 2
Semester: Spring**

Course Dates: 3/25/19 to 5/3/19

Credits Hours: 5 credits

Course Director:

Dr. Louise Glaser, MD, Associate Clinical Professor
Louise.Glaser@cnsu.edu

Coordinator:

Ms. Samantha Xiong

Disclaimer about changes in Syllabus and Course Calendar

Every effort will be made to adhere to the contents of this syllabus. However, this document is subject to changes in the event of unforeseen, extenuating circumstances. Students will be notified as soon as possible if changes in the syllabus become necessary.

Course Teaching Faculty

Name/Degree	Rank/Title
Louise Glaser, MD	Associate Clinical Professor
Guy DiSibio, MD	Associate Professor of Pathology and Medical Genetics
Martin Rubin, MD	Associate Professor of Psychiatry
Susan Ely, PhD	Professor of Molecular Biology, Immunology and Microbiology
Valerie Gerriets, PhD	Assistant Professor of Pharmacology
Floyd Culler, MD	Professor of Pediatrics, Endocrinology and Clinical Skills
Nazila Hejazi, MD	Assistant Professor of Pathology
Rudolph Holguin, MD	Associate Professor of Emergency Medicine
Jason Wong	PharmD
Peter Yip, MD	Associate Professor of Internal Medicine & Occupational Medicine
Nehad El-Sawi, PhD	Professor of Molecular Biology, Immunology and Microbiology
Ishwarlal Jialal, MD, PhD	Professor of Physiology, Metabolism and Pathology
Claire Baranov, MD	Assistant Professor of Medical Skills
Thura AlKhayat, MD	Assistant Professor of OBGYN and Medical Skills
Ghaith Aleyd, MD, PhD	Associate Professor Pathology

Open Door Policy: Course faculty have an open door policy and encourage contact from students by e-mail and in person to share impressions, concerns and/or ideas at any time

Volunteer Community Faculty Name/Degree
Victoria Akins, MD PhD, Pediatrics
Schery Mitchell, MD, Pediatrics
John Belko, MD, Pediatric Infectious Disease
Billur Moghaddam, MD, Pediatric Genetics
Thomas Russell, MD, Emergency Medicine
Nichole Tyson, MD, Obstetrics and Gynecology, Adolescent
Michael Sim, MD, Nephology
Anne Hsii, MD, Pediatrics, Adolescent fellowship
Howard Slyter, MD, Neurology, Ethics and Medicolegal
Michael Gunther-Maher, MD, Geriatrics, Palliative Care
Jean Struthers, MD, Pediatric Developmental Specialist

Communication with volunteer community faculty must be channeled through the course director.

Course Description:

- This course spans the human life cycle beginning with birth and infancy and concluding with the dying patient and elders. We will discuss normal growth and development at each stage as well as common challenges.
- Course Content is intended to be high yield both for important basic science and medicine of the first two years of medical school as well for entering clerkships and caring for patients. Material will be presented via a variety of formats including but not limited to: Clinical presentations, Clinical cases, CCBLs, faculty – student interactive sessions, and small and large group activities.
- The Stages of Life contains clinical case sessions focused on the most frequently encountered clinical presentations for an emergency room or primary care physician.
 - **Clinical Presentations/Clinical Cases - weeks 2 and 4**
Students will be introduced to the age of the week in the **Clinical Presentation session**. **Clinical Case sessions** on Friday, from 8-10 am, are required. Students will meet in their colleges to go through and discuss the case for the week. Each small group will review the case following the standard format including pertinent history information, labs, differential diagnosis, and case management. Each student will write a Case Summary and several students will be asked to present their summary orally to the group. Each student will email a written summary to their college master. **We will convene together in Classroom 1 B at 920 to review possible differential diagnoses for the case.**
 - **Clinical Case Based Learning CCBLs – weeks 1, 3, and 5**
These cases feature a complex patient, consistent with the age for the week, and will include both clinical and basic science. Students work in small groups, with a facilitator, and go through the case together during the 3 sessions in the week. Students will also have an opportunity to practice their oral presentations of a patient on Wednesdays and Fridays. **All of these sessions are Mandatory.**
 - **Basic scientific concepts** are interwoven within each CCBL/CC and CP providing the necessary basis for understanding relationships and causal entities. Clinical relevance and appropriate application of basic scientific knowledge is reinforced with these case examples.
- **Medical Skills** runs concurrently and will be coordinated as much as possible with the course content. Sessions will be engaging and valuable to students.

Course Objectives: By the conclusion of this course, the student will demonstrate the ability to

#	Course Learning Objectives (CLOs)	Program Learning Objectives (PLOs)
1	Distinguish normal growth and development throughout the different stages of life, from birth to death, including common challenges, changes and concerns at the physical, emotional, and behavioral levels in each stage.	PLO-2 (MSK1, MSK2)
2	Explain how exogenous (e.g., infections and nutrition) and endogenous (e.g., hormonal and immunological) factors may affect growth as well as pediatric and geriatric diseases, and how early immunization and adequate nutrition may prevent some of these problems.	PLO-2 (MSK1, MSK2)
3	Explain how genetic and teratogenic mechanisms may alter normal growth and produce physical and chemical abnormalities including tumors, dysmorphic features, developmental delay, and neurochemical imbalances.	PLO-2 (MSK1, MSK2)
4	Integrate the etiopathogenesis in the diagnosis and management of growth and developmental diseases and those associated with aging to predict their risks and prognoses, and identify appropriate preventive strategies.	PLO-2 (MSK1, MSK2, MSK3, MSK4)
5	Apply knowledge of non-pharmacological and pharmacological principles to tailor safe and effective treatments for pediatric and geriatric diseases in addition to palliative care of the dying patient	PLO-1 (PC5, PC7, PC8); PLO-2 (MSK1, MSK2, MSK3)
6	Demonstrate level-appropriate skills in communication, professionalism and medical/procedural related abilities in dealing with patients, and includes environmental, cultural and societal factors in clinical decision making.	PLO-1 (PC1, PC2, PC3, PC4, PC5, PC6, PC7); PLO-3 (C1, C2, C3); PLO-4 (P1, P2, P3)

Please Note: All session objectives listed in the individual sessions (by date and time) are mapped to the course objectives.

Key: PLO = Program Learning Objective (#1=Patient Care; #2=Medical & Scientific Knowledge; #3=Communication and Interpersonal Skills; #4=Professionalism; #5=Health Care Systems; #6=Reflective Practice and Personal Development)

Session Locations:

One large lecture hall with a seating capacity of 100 students, will be used for the most sessions. CCBLs (MWF), Clinical Cases sessions (Fridays), and Group Summative Midterm sessions will be held in colleges rooms.

Lecture/Session Duration: All lectures on the calendar as one hour sessions will be 50 minutes long with 10 minutes break at the end for questions and preparation for the next session. Any session/lecture longer than one hour will have 10 minutes break between every two hours.

Course special assignments: Details to follow during the course.

Teaching/Learning Methodology:

- Case-Based instruction/Learning
- Discussion, Large group (>12)
- Discussion, Small Group (<12)
- Independent Learning
- Lecture
- Patient Presentation – Faculty
- Patient Presentation – Learner
- Peer Teaching
- Reflection
- Self-Directed Learning

Online Materials – Canvas: Canvas is California Northstate University's Learning Management System.). Use your CNU NETID and password.

Turning Point: Every Phase A student was given a Turning Point Clicker during Orientation. Please bring the Clicker to class at all times.

Library/Learning Resources

The CNUCOM Library and Learning Resource Center is available for students, faculty, and staff. This program includes an initial 4200 square feet of space and seating for 100 devoted to the following resources: Library Facility and Collection, Computer resources, CNUCOM Electronic Library, and Interlibrary Loan Program. CNUCOM Resource Center maintains an Electronic Learning Resources System to provide information resources to students, faculty, and staff, and serve as an entry point for all users to meet their academic and research needs.

Recommend Textbook(s), Material(s) and Equipment:

Subject	Author	Title
Geriatric Medicine	Jeffrey B. Halter, Joseph G Ouslander, et al	Hazzard's Geriatric Medicine and Gerontology
Geriatrics Medicine	Robert L. Kane, Joseph G. Ouslander, et al.	Essentials of Clinical Geriatrics
Pediatric Medicine	William W. Hay Jr., Myron J. Levin, Robin R Deterding, Mark J Abzug	Current Diagnosis and Treatment: Pediatrics
Microbiology	Engleberg	Schaechter's Mechanisms of Microbial Disease 5e
Pharmacology	Trevor, Anthony J., et al	Basic & Clinical Pharmacology, 12th Edition
Genetics	Lynn B. Jorde, John C. Carey, Michael J. Bamshad	Medical Genetics: 5th Edition

Lecture/Learning Activity Attendance:

Mandatory sessions include: Course Introduction, CCBL sessions, Clinical Case sessions, Medical Skills/Stat Lab, Masters Colloquium sessions, Exams, and CBSE

NOTE: **Week 1 Masters is split into 2 sessions** (half in week1 and half in week 2)

Week 5 Masters Colloquium Session is on Thursday

All Lectures/Sessions are recommended to attend. We have designed them intentionally to be high yield for your Step1 exam and or for your third year rotations and future practice.

Sign-in sheets will be provided at all mandatory activities. Students will be responsible for signing in themselves. The sign-in sheets will be collected 5 minutes after the activity begins. Only certain excused absences are allowed (please see Student Affairs Absence Policy).

The following procedure(s) will be employed for breeches of these course requirements.

1. Administrative/Support staff will notify the course director(s) and Assistant Dean of Academic Affairs
2. A note will be placed in the student's file
3. Lapses in attendance fall under the COM's Professionalism Policy and are subject to inclusion in the student's MSPE.

4. Persistent lapses in attendance will require the student to appear before the Student Promotions Committee.

Exams and Grading/Assessment:

The successful completion of the course is based on a total course score of 70% or higher including a final exam score of 70% or higher, successful completion of 2 Nutrition modules and an Elders assignment, full attendance and participation in CC and CCBL sessions as well as demonstrating a high standard of ethical and professional behavior.

Failure to reach the passing mark in the final exam will result in a retake examination on Friday of exam week.

▪ Total Course Score:

The total numeric score for the course will be measured as follows, which translates to recording a **passing grade of 70% or above**, and **an honors grade if 90% or above**.

#	Components	%	Notes/Explanation
1	Midterm Hybrid Summative Exam	30 (75% individual and 25% group)	50 NBME questions
2	Final Summative exam	65	100 NBME questions
3	Clinical-Case-Based Learning	n/a	Full attendance and participation required
4	Clinical Cases	n/a	Full attendance and participation required
5	Nutrition Modules (2)	n/a	Completion required to pass
6	Elder Interview (2)	5 (2.5% each)	Completion required to pass
7	Formative Weekly Quiz or online module	n/a	Formative

- **Hybrid Summative Midterm Exam (mandatory)**
 - One USMLE Step 1 format exam, comprised of 50 multiple-choice questions will be held on **Monday** morning of week 4, **April 15, 2019**.
 - The first two hours will be an individual test in classroom 1B.
 - The second two hours will be a group test in smaller rooms to be announced prior to the exam.
 - The Hybrid exam will comprise 30% of the course grade (75% individual and 25% group score)
- **Summative Final Exam (mandatory)**
 - One USMLE Step 1 format exam, 100 multiple-choice question final examination at the end of the course. This will be held Week 6 on **Monday April 29, 2019**.
 - The Final Exam grade will comprise 65% of the course grade.

- **Clinical Cases:** Week 2 and 4, with review and discussion of the week's Clinical Case. **Attendance, satisfactory individual work and contribution to group work at these Friday sessions is required/mandatory.**
- **Clinical Case Based Learning CCBLs – Weeks 1, 3, and 5**
Full attendance and participation is required/mandatory at all sessions.
- **Elders Interview** (Content related to Week 5 Masters Colloquium Session)
Graded Complete/Incomplete, 2.5% value each, **completion required to pass course**
- **Nutrition Online Modules:**
Students are expected to **successfully complete** 2 assigned Nutrition in Medicine modules in order **to pass the course**. Students must register for nutrition in medicine via "nutritioninmedicine.org".
 1. "Nutrition during infancy"
 2. "Nutrition and aging: chronic disease"
- **Weekly Modules/Quizzes (Formative):** Designed to support students in confirming/expanding knowledge from the week's content. These will be posted in Canvas by 5 pm Wednesday and due Friday at noon.
- **Student Evaluations of Course and Faculty**
I highly value your feedback and take it seriously. Students are required to complete these evaluations during their last Clinical Case Based Learning activity. Your CCBL small group faculty facilitator will monitor compliance. Please provide your thoughtful and constructive comments here. Thank you.

Remediation:

- Failure of the midterm summative exam will be addressed by offering optional individual and/or group review/tutoring sessions
- Failure of the final summative examination will result in a retest, on Friday of exam week.
- Students who miss mandatory sessions are required to make up the session. Make up options/assignments vary by type of session missed. Specifics to be determined by the course director.

Students will be expected to comply with all CNU and COM policies. Please refer to student handbook.

Competency Assessment: Grading Rubric

General 2-24 Structure

California Northstate University

Note patient stage of life:

1. Birth
2. Infant
3. Childhood
4. Adolescence
5. Adulthood
6. Old age
7. Moribund

	1: Inadequate performance	2: Deficient performance	3: Minimal competency	4: Capable clinician knowledge, skills, values	5: Entrusted Professional Activity	Grade 1-5
Patient interaction	Non-communicative, poor listening skills	Gaps in patient/doctor interaction that created obstacles in care	Able to communicate and patient accepted care and had questions addressed	Able and personable communication with patient that addressed and allayed	Strong empathic and knowledgeable patient interaction, both verbal and nonverbal;	

				concerns; empathetic culturally aware	culturally competent	
Patient presentation	Unable to present patient findings in coherent fashion	Major gaps in presenting key findings	Able to demonstrate key findings but needs assistance prioritizing them	Demonstrates ability to present key findings and organize them in a fashion to make appropriate care decisions and referrals to other health professionals when appropriate	Can independently evaluate and prioritize all key findings to comprehensively and without error, carry out safe and effective care through integrated medical, surgical and oral health evaluation	
Application of biomedical knowledge	Unable to apply biomedical knowledge to the care of the patient	Applies some aspects of biomedical knowledge to the care of the patient but with notable deficiencies	Demonstrates that key findings are taken into account to direct care based upon biomedical findings	Utilizes all pertinent biomedical findings to influence and optimize the care of the patient	Applies in a comprehensive and interactive fashion, with follow-up information and questions, all biomedical aspects of care in real time and associated to the patient's immediate and long term needs.	

Critical thinking	No self-reflection or ability to apply knowledge critically	Demonstrates some ability to utilize empiricism and logic in patient care	Able to utilize all necessary tools of critical thinking in patient care but continues to synthesize their utilization	Applies knowledge critically developed in the care of patients across all pertinent multiple domains	Thoroughly able to synthesize, reflect and apply knowledge broadly with inquisitive spirit and capability	
--------------------------	---	---	--	--	---	--

Clinical skills	No knowledge or capability of instrumentation, application of instruments towards the clinical task and is unable to perform	Understands instrumentation, fundamentals of dental anatomy, and has didactic knowledge of technique but is not consistently able to apply these elements	Demonstrates the proper use of instruments and achieve appropriate outcome, fundamentals of dental anatomy, and has didactic knowledge of technique and is consistently able to apply these elements	Demonstrates the ability to comfortably apply clinical skills to dental procedure in a fashion that promotes continued development of skills, patient confidence and consideration for applying more advanced skills when needed	Is fully capable to perform nonsurgical exodontia in a variety of clinical situations, with a diverse patient pool and complex clinical needs.	
Ethical behavior/ professionalism	Demonstrates unprofessional and/or unethical behavior in the clinical setting	Thorough lapses or lack of self-awareness, a noncritical lapse in professionalism or ethical behavior is noted	Carries out all treatment in an ethical and professional manner	Shows leadership, empathy, clinical behavioral understanding customized to the patient's needs to assure both perception and reality of demonstrating ethical behavior and professionalism	Is an exemplar in applying the tenets of ethical behavior and professionalism to the patient and all members of the care team and is emulated within the team for those qualities	

Practice management/systems based practice/ Legal regulatory	Does not understand or apply fundamentals of legal and regulatory aspects of patient care in the oral health setting	Demonstrates basic didactic knowledge but does not apply it appropriately in the clinical setting but is developing experience	Consistently but not universally applies appropriate compliance with HIPAA, documentation billing, informed consent and risk management aspects of practice	Integrates all aspects of the regulatory environment and consistently applies this knowledge as a skill in clinical practice	Is able to reflect on regulatory issues, teach them, apply them proactively and develop supporting policies to assure compliance and improve quality.	
---	--	--	---	--	---	--

Comments: (Comments are required for all 1 or 2 grades components)

Mapping of all Competency Assessments

Each of these competency assessments is linked numerically to the appropriate CNUCDM competency statements as follows:

1. Demonstrate patient interaction that provides able and personable communication with the patient that addresses all clinical issues and addresses concerns in an empathetic and culturally aware fashion
2. Provide verbal and written patient presentation that demonstrates the ability to present key findings and organize them in a fashion to make appropriate care decisions.
3. Utilizes all pertinent biomedical knowledge to influence and optimize the care of the patient
4. Able to apply knowledge with critical thinking developed in the care of patients across all pertinent multiple domains.
5. Demonstrates the ability to comfortably apply clinical skills for dental procedures in a fashion that promotes the continued development of skills, patient confidence, and consideration for applying more advanced skills when needed.
6. Applies the tenets of ethical behavior and professionalism with exemplary leadership empathy, clinical behavioral understanding customized to the patient's needs.
7. Integrates all aspects of the practice management, systems-based practice, legal and regulatory requirements of practice and consistently applies this knowledge as a skill in clinical practice.

In addition, the following key is used to reflect on the utilization of the requested domains for Standard 2-5 response in the table below

- a. **Clinical Procedures, (CP)**
- b. **Problem Solving (PS)**
- c. **Clinical Reasoning (CR)**
- d. **Professionalism (P)**
- e. **Ethical Decision Making (EDM)**
- f. **Communication Skills (CS)**

Appendix 2-24 Mapping of all Competency Assessments

Human Studies Summative Competency Assessment (HSSCA)

Each of these competencies in HS will include the assessment of the medical condition noted, apply oral health treatment planning in an evidence-based way, applying clinical reasoning, and demonstrating ethics, professionalism and good communication skills.

HS SCA	Course number	Assessment Method Domains	Prerequisites	Comments And Competency Statement Numerical links
Bleeding disorder	HS 526	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Leukemia	HS 526	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Anemia	HS 526	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Arthritis	HS511	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Osteoporosis	HS511	OSCE PS,CR,CS	Didactic material HS526	2,3,4,6,7
Stroke	HS551	OSCE PS,CR,CS,EDM	Didactic material HS551	2,3,4,6,7
Parkinson's Disease	HS551	OSCE PS,CR,CS,EDM	Didactic material HS551	2,3,4,6,7
Renal failure	HS 641	OSCE PS,CR,CS	Didactic material HS641	2,3,4,6,7
Acid/base acute infection	HS 641	OSCE PS,CR,CS	Didactic material HS641	2,3,4,6,7
Chronic hepatitis	HS 621	OSCE PS,CR,CS	Didactic material HS 621	2,3,4,6,7

Appendix 2-24 Mapping of all Competency Assessments

Type 2 diabetes	HS 671	OSCE PS,CR,CS	Didactic material HS 671	2,3,4,6,7
Hyperthyroidism	HS 671	OSCE PS,CR,CS	Didactic material HS 671	2,3,4,6,7
Poly pharmacy	HS 632	OSCE PS,CR,CS, EDM	HS 632 and other HS courses	2,3,4,6,7
Complex medical case assessment: Cardiovascular/pulmonary	HS 721	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from student's existing patients
Complex medical case assessment: Endocrine/oncology/OB/GI or transplant	HS 722	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from student's existing patients
Complex medical case assessment: Interdisciplinary/ hospital based	HS 821	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from hospital consults while on rotation
Complex medical case assessment: preanesthetic/presurgical consult	HS822	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from preop pool evaluated by student
Complex medical case assessment: Special Needs Patient	HS 821 HS 822	Patient based PS,CR,CS, P, EDM	Concurrent medicine seminar	2,3,4,6,7 Patient selected from preop pool evaluated by student

Odontology Summative and Formative Competency Assessment (OSFCA)

Appendix 2-24 Mapping of all Competency Assessments

OSFCA	Course number	Assessment method	Prerequisites	Comments
Infection Control	Odont501	Operatory based CP, PS,CR,CS, P, EDM	Didactics and Lab on infection control	1,2,3,4,5,6,7 While comp assessment is in first year each clinical comp continues to assess

California Northstate College of Dental Medicine

Foundations of Dental Medicine Course Syllabus

Course #	Course Title	Credits	Year	Term
OMFS 511	Foundations of Dental Medicine <i>LAL</i>	3	DS 1	Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

This course begins in the summer term and is the major educational component of the first year Summer term.

Date	
August 6, 2020	First day of term for all DMD 1 students
October 10, 2020	Group project selection: one for each college of 20 students
December 1, 2020	Group project groups 1 and 2
December 8, 2020	Group project groups 3 and 4
December 15, 2020	Final Exam

Course Coordinator, Instructors and Contact Information

Michael Cadra DDS MD (course co-director)

Room:

E mail

Office hours

Leon Assael DMD (Course co-director)

Room:

E-mail: leon.assael@cnsu.edu

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

Holly Jacobson BA (course administrator)

Room: xxx

E mail: holly.jacobson@cnsu.edu

Classroom LAL and Meeting Times

Room: Classroom xxxx

Time: xxxx 3 hours per week

Course description

This course will focus on introduction to the patient/doctor relationship, the role of dental medicine in health care, the scientific basis of the molecular basis, pathophysiology, diagnostic methods, and treatment modalities of major oral diseases. These are reviewed to provide the basis for case based learning in Human Studies. Examples will include congenital diseases such as cleft lip and palate, degenerative diseases such as rheumatoid arthritis, neoplastic disease such as oral squamous cancer, traumatic diseases such as facial fracture, and infectious disease such as HPV.

This course includes a review of biochemistry relevant to the medical school first and second year HS courses to match the coursework provided to the MD students in foundations of medicine. It will review the critical thinking, evidence based medicine, research modalities and analysis of scientific literature to apply in clinical education and practice

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

1. *Medical Biochemistry*, Baynes and Dominiczak, 4th Ed, Elsevier 2014
2. *The CONSORT Statement*, www.consort-statement.org
3. *The PRISMA Statement*, www.prisma-statement.org
4. *The STROBE statement*, www.strobe-statement.org

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software
7. Dental operatory

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	50%
Final Exam	50%

Group Components	50%
CCBL Participation and Project	20%
Biochemistry Boot Camp	10%
Dental Medical Skills	10%
Final Exam	50%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group Projects cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).
Presentation of group cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing. The teams will each have 30 minutes for presentation which is ample time for participation of each member
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Foundations of Dental Medicine DS1 - CDM 511 – Summer Fall 2020-21				
8/6/2018 - 9/21/2018				
Weeks	Date	Time	Title	Faculty
Week 1				
	Monday, 8/6/18	8:00 - 9:00 am	Introduction to Foundations	Assael
	Monday, 8/6/18	9:00 - 10:00 am	Body & Fluid Compartments	Yarbrough
	Monday, 8/6/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 1	Cadra
	Monday, 8/6/18	12:00 - 1:00 pm	LUNCH	
	Monday, 8/6/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 2	CADRA
	Monday, 8/6/18	3:00 - 5:00 pm	SELF STUDY	
	Tuesday, 8/7/18	8:00 - 10:00 am	Microbiota & Infectious; Agents: Biology & Ways of Life	El-Sawi
	Tuesday, 8/7/18	10:00 - 12:00 pm	Enzyme Function & Kinetics	Krig
	Tuesday, 8/7/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 8/7/18	1:00 - 2:00 pm	Introduction to Histology	Ramsamooj
	Tuesday, 8/7/18	2:00 - 4:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 8/7/18	4:00 - 5:00 pm	SELF STUDY	
	Wednesday, 8/8/18	8:00 - 10:00 am	Masters Colloquium	
	Wednesday, 8/8/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 1	Ely
	Wednesday, 8/8/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 8/8/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 2	Ely
	Wednesday, 8/8/18	3:00 - 5:00 pm	SELF STUDY	

	Thursday, 8/9/18	8:00 - 10:00 am	Cell Growth & Communication	Krig
	Thursday, 8/9/18	10:00 - 12:00 pm	Dental/Medical Skills Group A / Self Study	
	Thursday, 8/9/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 8/9/18	1:00 - 3:00 pm	Dental/Medical Skills Group B / Self Study	
	Thursday, 8/9/18	3:00 - 5:00 pm	Dental/Medical Skills Group C / Self Study	
	Friday, 8/10/18	8:00 - 10:00 am	Introduction to Pharmacokinetics	Gerriets
	Friday, 8/10/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 1	Ely
	Friday, 8/10/18	12:00 - 1:00 pm	LUNCH	
	Friday, 8/10/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 2	Ely
	Friday, 8/10/18	3:00 - 4:00 pm	SELF STUDY	
	Friday, 8/10/18	4:00 - 5:00 pm	Release of CCBL Genetics Learning Objectives & Bradbury slides set(s)	
Week 2				
	Monday, 8/13/18	8:00 - 10:00 am	Introduction to Pharmacodynamics	Gerriets
	Monday, 8/13/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 3	Ely
	Monday, 8/13/18	12:00 - 1:00 pm	LUNCH	
	Monday, 8/13/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 4	Ely
	Monday, 8/13/18	3:00 - 5:00 pm	SELF STUDY	
	Tuesday, 8/14/18	8:00 - 10:00 am	MANDATORY FORMATIVE EXAM	Ely
	Tuesday, 8/14/18	10:00 - 11:00 am	Drug-Patient Factors	Gerriets
	Tuesday, 8/14/18	11:00 - 12:00 pm	Human Immune Response Overview	Ely
	Tuesday, 8/14/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 8/14/18	1:00 - 2:00 pm	Cellular Adaptation & Inflammation	Ramsamooj
	Tuesday, 8/14/18	2:00 - 4:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 8/14/18	4:00 - 5:00 pm	SELF STUDY	
	Wednesday, 8/15/18	8:00 - 10:00 am	Masters Colloquium	
	Wednesday, 8/15/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 3	Ely
	Wednesday, 8/15/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 8/15/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 4	Ely
	Wednesday, 8/15/18	3:00 - 5:00 pm	SELF STUDY	

	Thursday, 8/16/18	8:00 - 9:00 am	Pharmacogenomics	Gerriets
	Thursday, 8/16/18	9:00 - 10:00 am	Innate Immune Response	Ely
	Thursday, 8/16/18	10:00 - 12:00 pm	Dental/Medical Skills - Group C / <u>MANDATORY</u>: Biostatistics LAB Group A	MS / Puglisi & Jialal - IDL Lab
	Thursday, 8/16/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 8/16/18	1:00 - 3:00 pm	Dental/Medical Skills - Group A / <u>MANDATORY</u>: Biostatistics LAB Group B	MS / Puglisi & Jialal - IDL Lab
	Thursday, 8/16/18	3:00 - 5:00 pm	Dental/Medical Skills - Group B / <u>MANDATORY</u>: Biostatistics LAB Group C	MS / Puglisi & Jialal - IDL Lab
	Friday, 8/17/18	8:00 - 10:00 am	<u>MANDATORY</u>: Complement Workshop	Ely
	Friday, 8/17/18	10:00 - 12:00 pm	<u>MANDATORY</u>: CCBL Group 3	Ely
	Friday, 8/17/18	12:00 - 1:00 pm	LUNCH	
	Friday, 8/17/18	1:00 - 3:00 pm	<u>MANDATORY</u>: CCBL Group 4	Ely
	Friday, 8/17/18	3:00 - 4:00 pm	SELF STUDY	
	Friday, 8/17/18	4:00 - 5:00 pm	Release of CCBL Genetics Learning Objectives & Bradbury slides set(s)	

Week 3				
	Monday, 8/20/18	8:00 - 10:00 am	Carbohydrate Metabolism	Gerriets
	Monday, 8/20/18	10:00 - 12:00 pm	<u>MANDATORY</u>: CCBL Group 5	
	Monday, 8/20/18	12:00 - 1:00 pm	LUNCH	
	Monday, 8/20/18	1:00 - 3:00 pm	<u>MANDATORY</u>: CCBL Group 6	
	Monday, 8/20/18	3:00 - 5:00 pm	SELF STUDY	
	Tuesday, 8/21/18	8:00 - 10:00 am	<u>MANDATORY</u>: Mid Exam Part A	
	Tuesday, 8/21/18	10:00 - 12:00 pm	<u>MANDATORY</u>: Team Test Groups 6-10	
	Tuesday, 8/21/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 8/21/18	1:00 - 3:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 8/21/18	3:00 - 5:00 pm	SELF STUDY	
	Wednesday, 8/22/18	8:00 - 9:00 am	TCA Cycle & Oxidative Phosphorylation	Gerriets
	Wednesday, 8/22/18	9:00 - 10:00 am	Protein Targeting & Trafficking	Krig
	Wednesday, 8/22/18	10:00 - 12:00 pm	<u>MANDATORY</u>: CCBL Group 5	Ely
	Wednesday, 8/22/18	12:00 - 1:00 pm	LUNCH	

	Wednesday, 8/22/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 6	Ely
	Wednesday, 8/22/18	3:00 - 5:00 pm	SELF STUDY	
	Thursday, 8/23/18	8:00 - 9:00 am	Lipid Metabolism Overview	Krig
	Thursday, 8/23/18	9:00 - 10:00 am	Antigen Presentation	Ely
	Thursday, 8/23/18	10:00 - 12:00 pm	Dental/Medical Skills - Group B / Self Study	
	Thursday, 8/23/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 8/23/18	1:00 - 3:00 pm	Medical Skills - Group C / Self Study	
	Thursday, 8/23/18	3:00 - 5:00 pm	Medical Skills - Group A / Self Study	
	Friday, 8/24/18	8:00 - 9:00 am	Cholesterol Metabolism & Transport	Krig
	Friday, 8/24/18	9:00 - 10:00 am	Antigen Receptors & V(D)J Recombination	Ely
	Friday, 8/24/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 5	Ely
	Friday, 8/24/18	12:00 - 1:00 pm	LUNCH	
	Friday, 8/24/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 6	Ely
	Friday, 8/24/18	3:00 - 4:00 pm	SELF STUDY	
	Friday, 8/24/18	4:00 - 5:00 pm	Release of CCBL Genetics Learning Objectives & Bradbury slides set(s)	
Week 4				
	Monday, 8/27/18	8:00 - 9:00 am	Introduction to Embryology & Gametogenesis	Vanguri
	Monday, 8/27/18	9:00 - 10:00 am	Introduction to Bacteriology, Part 1	El-Sawi
	Monday, 8/27/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 7	Ely
	Monday, 8/27/18	12:00 - 1:00 pm	LUNCH	
	Monday, 8/27/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 8	Ely
	Monday, 8/27/18	3:00 - 5:00 pm	SELF STUDY	
	Tuesday, 8/28/18	8:00 - 9:00 am	Embryology: Fertilization, Cleavage, Early Implantation	Vanguri
	Tuesday, 8/28/18	9:00 - 10:00 am	Introduction to Bacteriology, Part 2	El-sawi
	Tuesday, 8/28/18	10:00 - 12:00 pm	T-Cell Development & Function	Ely
	Tuesday, 8/28/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 8/28/18	1:00 - 2:00 pm	Reversible/Irreversible Cell Injury, Apoptosis & Necrosis	Al-eyd

	Tuesday, 8/28/18	2:00 - 4:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 8/28/18	4:00 - 5:00 pm	SELF STUDY	
	Wednesday, 8/29/18	8:00 - 10:00 am	Masters Colloquium	
	Wednesday, 8/29/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 7	Ely
	Wednesday, 8/29/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 8/29/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 8	Ely
	Wednesday, 8/29/18	3:00 - 5:00 pm	SELF STUDY	
	Thursday, 8/30/18	8:00 - 10:00 am	B-cells: Development & Function	Ely
	Thursday, 8/30/18	10:00 - 12:00 pm	Medical Skills - Group A / Self Study	
	Thursday, 8/30/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 8/30/18	1:00 - 3:00 pm	Medical Skills - Group B / Self Study	
	Thursday, 8/30/18	3:00 - 5:00 pm	Medical Skills - Group C / Self Study	
	Friday, 8/31/18	8:00 - 9:00 am	Introduction to Antibiotics	Gerriets
	Friday, 8/31/18	9:00 - 10:00 am	Embryology: Germ Layer Formation	Vanguri
	Friday, 8/31/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 7	Ely
	Friday, 8/31/18	12:00 - 1:00 pm	LUNCH	
	Friday, 8/31/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 8	Ely
	Friday, 8/31/18	3:00 - 4:00 pm	SELF STUDY	
	Friday, 8/31/18	4:00 - 5:00 pm	Release of CCBL Genetics Learning Objectives & Bradbury slides set(s)	

Week 5				
	Monday, 9/3/17	HOLIDAY - Labor Day		
	Tuesday, 9/4/18	8:00 - 10:00 am	MANDATORY: Mid Exam Part B	
	Tuesday, 9/4/18	10:00 - 12:00 pm	MANDATORY: Team Test Groups 1-5	
	Tuesday, 9/4/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 9/4/18	1:00 - 3:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 9/4/18	3:00 - 5:00 pm	SELF STUDY	

	Wednesday, 9/5/18	8:00 - 9:00 am	Clinical Presentation: Well Visits	Glaser
	Wednesday, 9/5/18	9:00 - 12:00 pm	MANDATORY WORKSHOP: Introduction to the Autonomic Nervous System & Autonomic Pharmacology	Yarbrough & Gerriets
	Wednesday, 9/5/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 9/5/18	1:00 - 2:00 pm	Neoplasia	Hejazi
	Wednesday, 9/5/18	2:00 - 5:00 pm	SELF STUDY	
	Thursday, 9/6/18	8:00 - 9:00 am	Introduction to Vaccines	Ely
	Thursday, 9/6/18	9:00 - 10:00 am	Physiological Control of Temperature	Yarbrough
	Thursday, 9/6/18	10:00 - 12:00 pm	Dental/Medical Skills - Group C / MANDATORY: Biostatistics LAB Group B	Puglisi & Jialal / IDL Lab
	Thursday, 9/6/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 9/6/18	1:00 - 3:00 pm	Dental/Medical Skills - Group A / MANDATORY: Biostatistics LAB Group C	Puglisi & Jialal / IDL Lab
	Thursday, 9/6/18	3:00 - 5:00 pm	Dental/Medical Skills - Group B / MANDATORY: Biostatistics LAB Group A	Puglisi & Jialal / IDL Lab
	Friday, 9/7/18	8:00 - 10:00 am	Introduction to Virology	El-Sawi
	Friday, 9/7/18	10:00 - 12:00 pm	MANDATORY: Clinical Cases	Glaser
	Friday, 9/7/18	12:00 - 1:00 pm	LUNCH	
	Friday, 9/7/18	1:00 - 5:00 pm	SELF STUDY	
Week 6				
	Monday, 9/10/18	8:00 - 10:00 am	Introduction to Mycology & Parasitology	El-Sawi
	Monday, 9/10/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 9	Ely
	Monday, 9/10/18	12:00 - 1:00 pm	LUNCH	
	Monday, 9/10/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 10	Ely
	Monday, 9/10/18	3:00 - 5:00 pm	SELF STUDY	
	Tuesday, 9/11/18	8:00 - 10:00 am	Pharmacokinetics & Pharmacodynamics - Wrap-up & Review	Gerriets
	Tuesday, 9/11/18	10:00 - 11:00 am	Clinical Presentation: Allergy - Hypersensitivity Reactions & Allergy	Ely
	Tuesday, 9/11/18	11:00 - 12:00 pm	Pharmacological Management of Allergic Reactions	Gerriets
	Tuesday, 9/11/18	12:00 - 1:00 pm	LUNCH	
	Tuesday, 9/11/18	1:00 - 3:00 pm	BIOCHEM BOOTCAMP	
	Tuesday, 9/11/18	3:00 - 5:00 pm	SELF STUDY	

	Wednesday, 9/12/18	8:00 - 10:00 am	MANDATORY: Masters Colloquium	
	Wednesday, 9/12/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 9	Ely
	Wednesday, 9/12/18	12:00 - 1:00 pm	LUNCH	
	Wednesday, 9/12/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 10	Ely
	Wednesday, 9/12/18	3:00 - 5:00 pm	SELF STUDY	
	Thursday, 9/13/18	8:00 - 10:00 am	MANDATORY - CCBL WORKSHOP: GROUPS 1-10 Presentations	
	Thursday, 9/13/18	10:00 - 12:00 pm	Dental/Medical Skills - Group B / Self Study	
	Thursday, 9/13/18	12:00 - 1:00 pm	LUNCH	
	Thursday, 9/13/18	1:00 - 3:00 pm	Dental/Medical Skills - Group C / Ask The Expert! Pathology Slam	
	Thursday, 9/13/18	3:00 - 5:00 pm	Dental/Medical Skills - Group A / Ask The Expert! Pathology Slam	
	Friday, 9/14/18	8:00 - 9:30 am	FACULTY-LED COURSE CONTENT REVIEW (excludes Pharm) GUIDANCE ON TEST COMPOSITION	
	Friday, 9/14/18	9:30 - 10:00 am	MANDATORY: COURSE EVALUATION	
	Friday, 9/14/18	10:00 - 12:00 pm	MANDATORY: CCBL Group 9	Ely
	Friday, 9/14/18	12:00 - 1:00 pm	LUNCH	
	Friday, 9/14/18	1:00 - 3:00 pm	MANDATORY: CCBL Group 10	Ely
	Friday, 9/14/18	3:00 - 4:00 pm	SELF STUDY	
	Friday, 9/14/18	4:00 - 5:00 pm	Release of CCBL Genetics Learning Objectives & Bradbury slides set(s)	
Week 7	Monday, 9/17/18	8:00 - 12:00 pm	Comprehensive Summative Exam	
EXAM				
	Tuesday, 9/18/18	1:00 - 5:00 pm	N/A	
	Wednesday, 9/19/18	8:00 - 5:00 pm	N/A	
	Thursday, 9/20/18	8:00 - 5:00 pm	Dental/ MEDICAL SKILLS SUMMATIVE EXAM	
	Friday, 9/21/18	8:00 - 12:00 pm	Biochem review exam	

Biochemistry Bootcamp Sessions

1. Amino Acids/proteins/carbohydrates/lipids
2. Blood plasma/oxygen transport/hemostasis
3. Energy/ membranes/oxidative metabolism
4. DNA/RNA/protein synthesis
5. Absorption/transport and utilization of nutrients
6. Gene expression/proteomics

Clinical Case Based Learning: CCBL sessions (divided into 3 sessions each for 3 groups)

Development of understanding of etiopathogenesis, treatment and outcomes in case-based format in small group learning with clinician educator

- Session 1: Embryology of cleft lip and palate and other craniofacial disorders
- Session 2: Bacterial and Viral diseases of the oral cavity
- Session 3: Tumors of the head and neck

Dental/Medical Skills Lab

1. Vital signs, head and neck exam
2. Specimen collection and parenteral administration: saliva, venipuncture, IM, SC and SM injections
3. Oroscopic mucosal, endoscopic, laryngoscopy, otoscopy, ophthalmoscopy,
4. Clinical photography and digital surface scanning
5. Auscultation of the carotid, trachea heart and lungs
6. Ultrasound of the oral and maxillofacial region

Course Learning Outcomes

1. Review fundamentals of biochemistry
2. Introduce basic science underpinnings of clinical practice in preparation for systems based basic medical science HS curriculum
3. Develop initial clinical skills in oral and maxillofacial studies
4. Apply basic science knowledge in CCBL sessions to clinical cases

Course Learning Outcomes and links to Program Learning Outcomes (Appendix A) and Institutional Learning Outcomes (Appendix B)

No.	Course Learning Outcome	DMD PLO	DMD ILO	Learning Hierarchy ^b	Assessment Method
1	Review fundamentals of biochemistry	2,3,4,7,8	1,3,4,6	1,2, 3	Biochem Exam
2	Introduce basic science underpinnings of clinical practice in preparation for systems based basic medical science HS curriculum	1,2,3,5,6,7,8	1,4,	1,2, 3	Final exam
3	Develop initial clinical skills in oral and maxillofacial studies	1,2,3,5,6,7,	1,4	1,2	Skills formative assessment in lab
4	Apply basic science knowledge in CCBL sessions to clinical cases	1,2,3,5,6,7,	1,4	2,3	Group and peer assessment

^a plo's appendix A

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. LAL: Lecture and active learning **CLO Rubrics**

CLO 1: Review fundamentals of biochemistry

Indicators	Initial	Developing	Developed	Proficient
Demonstrates an understanding of the elements of biochemistry to apply in HS courses	Does not understand the elements of biochemistry to apply in HS courses.	Demonstrates rudimentary understanding of these elements	Has detailed understanding the component of biochemistry applied to human systems	Consistently demonstrates the ability to apply knowledge and skill as a dental student and can assist other students in these domains

CLO 2: Introduce basic science underpinnings of clinical practice in preparation for systems-based basic medical science HS curriculum

Indicators	Initial	Developing	Developed	Proficient
Develop an understanding of the underpinnings of basic science applied to clinical practice	Has no or limited knowledge of the basic science underpinnings of clinical practice	Begins to exhibit knowledge of these underpinnings	Is capable of applying basic science to clinical examples effectively	Consistently applies biomedical science to clinical situations utilizing innovation and analysis

CLO 3: Develop initial clinical skills in oral and maxillofacial studies

Indicators	Initial	Developing	Developed	Proficient
Develop initial clinical skills in oral and maxillofacial studies	Has no or limited knowledge or experience with these skills	Begins to exhibit capability of applying clinical skills in practice	Is capable of applying fundamental skills in oral and maxillofacial studies to clinical diagnostic procedures	Is utilizing these skills in a integrated fashion to begin to address clinical problems

CLO 4: Apply basic science knowledge in CCBL sessions to clinical cases

Indicators	Initial	Developing	Developed	Proficient
Apply basic science knowledge to clinical cases in the CCBL format	Has no or limited ability	Begins to exhibit ability to apply basic science knowledge to a clinical question	Is capable of applying basic science to clinical examples effectively	Consistently applies biomedical science to clinical situations utilizing innovation and analysis

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. Does not demonstrate the ability to find and utilize appropriate resources and 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but does not always check for understanding or rephrase when confusion occurs. 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure understanding and generally asks questions. 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures understanding and asks appropriate questions.

	references necessary for providing accurate counseling, consultation and education	<ul style="list-style-type: none"> • Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> • Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> • Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> • Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> • Demonstrates awareness of issues that impact a patient • Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> • Demonstrates sufficient awareness of issues that impact a patient • Demonstrates ability to articulate these issues • Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> • Demonstrates full awareness of the most important issues that impact a patient • Demonstrates ability to clearly and effectively articulate these issues • Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor)	<ul style="list-style-type: none"> • Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and 	<ul style="list-style-type: none"> • Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor 	<ul style="list-style-type: none"> • Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor) 	<ul style="list-style-type: none"> • Demonstrates ability to provide sufficient patient-centered care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and

and adjust plans, and document activities)	recommendations, does not sufficiently monitor and adjust plans nor document activities.	and adjust plans, and document activities	and adjust plans, and document activities)	documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral healthcare 	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare 	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with

			delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> • Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> • Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> • Demonstrates minimal understanding of population-based care and how it influences patient-centered care • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> • Demonstrates sufficient understanding of population-based care and how it influences patient-centered care • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines 	<ul style="list-style-type: none"> • Demonstrates superb understanding of population-based care and how it influences patient-centered care • Demonstrates superb understanding of how population-based care influences the development of practice guidelines

			and best practices for patient care	and demonstrates knowledge of best practices for patient care
--	--	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and linguistic needs of patients; either does not or only attempt 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to cultural and linguistic needs of

		to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	---

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> Is not able to correctly identify the problem or issue being considered. Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or decision 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. Identifies a few, but not all, resources needed for decision making. Demonstrates ability to interpret some information and data but not all. Does not fully or effectively evaluate alternative solutions. Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with 	<ul style="list-style-type: none"> Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. Identifies most of the resources needed. Demonstrates ability to interpret most information and data. Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). 	<ul style="list-style-type: none"> Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. Identifies all appropriate resources. Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or course of action. Proposes a solution that is entirely

		supporting evidence. Is unable to defend decision or course of action.	Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	---	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

1.2. Demonstrates identification of resources	• Does not identify appropriate resources	• Identifies a few resources needed	• Identifies most of the resources needed	• Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	• Does not demonstrate understanding of the data needed for critical thinking and decision making	• Demonstrates ability to interpret some data but not all	• Demonstrates ability to interpret most data	• Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	• Does not evaluate possible alternatives for treatment or diagnosis	• Does not effectively evaluate alternative treatment or diagnostic solutions	• Evaluates possible treatment and diagnostic solutions leading to a logical decision	• Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	• Does not propose solutions to the client's needs	• Proposes solutions without consideration of alternatives	• Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision	• Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	• Does not adequately provide rationale for treatment decision	• Provides rationale for decision but does not integrate into mental health treatment plan	• Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors	• Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	• Does not demonstrate knowledge or awareness of audience for which the document is intended	• Demonstrates some ability to craft a document appropriate for its audience	• Demonstrates ability to craft a document appropriate for its audience	• Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	• Does not demonstrate clear or logical thought	• Writing does not sufficiently conceptualize case	• Demonstrates general clear or logical thought in	• Research and clinical documentation

	in their documentation	variables or analyze subject under discussion	their documentation	demonstrates clear and focused thinking
2.3. Demonstrates support for and development of ideas	• Does not explain or develop ideas	• Demonstrates minimal support for ideas	• Writing contains examples that generally support ideas	• Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	• Demonstrates an attempt to use proper citations to support ideas	• Uses credible and relevant sources to support ideas appropriate in the study of psychology	• Consistently uses credible and relevant sources to support ideas	• Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	• Has excessive or severe errors in language usage	• Generally conveys meaning to readers with clarity, though writing may include some errors	• Language conveys meaning to readers and writing contains very few errors	• Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	• Does not demonstrate knowledge or awareness of audience for which the communication is intended	• Demonstrates some ability to communicate in a manner appropriate to the audience	• Demonstrates ability to communicate appropriate to the audience	• Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	• Does not demonstrate clear or logical thought in their communication	• Communication does not sufficiently conceptualize case variables or analyze subject under discussion	• Demonstrates general clear or logical thought in their communication	• Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> • Does not know professional psychological language or uses jargon • Does not know the proper technical language regarding 	<ul style="list-style-type: none"> • Demonstrates inaccurate use of psychological language or uses jargon in professional communications • Utilizes scientific language that is 	<ul style="list-style-type: none"> • Demonstrates appropriate use of professional language and minimal jargon • Utilizes generalized language to 	<ul style="list-style-type: none"> • Demonstrates use of appropriate, professional language • Utilizes generalized language to interact with patients

	mental health treatment	incomprehensible to patients	interact with patients	
3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> Does not acknowledge other viewpoints Has great difficulty answering questions 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them into case conceptualization Adequately answers patient questions 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative viewpoints Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> Vocal delivery is too soft or too fast Long, unintended silences and/or speech disruptions frequently distract audience Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> Vocal delivery is audible Speech rate or volume disruptions occasionally distract from comprehension Attempts to engage audience 	<ul style="list-style-type: none"> Vocal delivery is varied and dynamic Speech rate, volume, and tone enhance listener interest and facilitate understanding Generally engages audience 	<ul style="list-style-type: none"> Vocal delivery is varied and dynamic Speech rate, volume, and tone enhance listener interest and facilitate understanding Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> Consistently demonstrates personal accountability and responsibility for work completed

4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none"> Does not use citations 	<ul style="list-style-type: none"> Uses citations but they are not formatted in APA style 	<ul style="list-style-type: none"> Demonstrates use of appropriate citations in context 	<ul style="list-style-type: none"> Uses properly cited references and includes all necessary information in reference list

Clinical Clerkship: Oral and Maxillofacial Surgery

Summative Competency Evaluation in Medically Affected Patient (ASA 2 or 3)

Exodontia for Medically Affected Patient

Course #	Course Title	Credits	Year	Term
OMFS 772	Clinical Clerkship: Oral and Maxillofacial Surgery <i>4 weeks, 30 hours per week plus call</i>	8	DS 3	Spring

Narrative: In this competency evaluation the DMD student will provide a full intake evaluation of a patient requiring exodontia with a medically affecting condition to ASA level 2 or 3. The student will provide a coherent assessment that takes into account basic medical science issues regarding the affecting systemic disease including relevant pathology, pathophysiology, pharmacology, biochemistry, behavioral and social sciences. The student will as well recommend a treatment protocol that takes into account the compromises and interventions required to produce safe care. The student will present the case unaided to the faculty member who will present additional questions relevant to the care of the patient. The student will present the plan to the patient using PARQ (explanation of procedure, alternatives, once a safe plan is presented and accepted by faculty and patient, the student will perform exodontia. Provide postoperative instructions customized to the biomedical conditions and surgical intervention. Ethics and professionalism for all activities is assessed as well.

Competent: Gains competency for the evaluated procedure

Exceptional: Earns EPR (exceptional performance review) for the CE if in 2 or more domains

Scoring Rubric

ASSESSMENT DOMAIN	Not proficient	Developing	Competent	Exceptional
Biomedical Knowledge	Unable to correlate	Understands basics of	Understands and applies	Uses thorough knowledge and

Parameters and Scope of General Dentistry at CNUCDM

The parameters of the practice of dental medicine

The parameters of the general practice of dental medicine include the ability to prevent, diagnose and develop treatment plans for the control and cure of diseases of the oral cavity and associated structures within the scope of the Dental Practice Act of California. The parameters include the performance of procedures of the oral soft and hard tissues to competently restore diseased teeth, replace missing teeth, address diseases of the periodontium, and assess diseases of the oral mucosa, maxillofacial region and jaws. Parameters for prevention include population-based oral health measures, homecare, and medical management of caries and periodontal diseases. The scope of practice of dentistry as defined by CNUCDM respects the eclectic and broad nature of dental practice in California as well as the general access to dental specialists. Competency at the time of graduation is meant to demonstrate a safe initial practitioner of dental medicine for whom additional training and experience in areas of need and interest will be promulgated through formal and informal graduate and continuing education, and lifelong learning.

Definition of the scope of general dentistry

The scope of the practice of general dentistry at CNUCDM is for the general dentist to be the key resource for patients to gain the benefits of good oral health. The state of oral health is defined as the optimal contribution of the oral and maxillofacial complex to the wellbeing of the patient. The general dentist applies a scope of practice to achieve the goal of oral health with the necessary, knowledge, skill and values to make complete and holistic diagnoses of conditions, to administer/deliver care within appropriate skill sets as credentialed in practice, to refer to dental and medical/surgical specialists appropriately for care beyond the capacity and credentialing of the general dentist, and to effectively lead/participate in interprofessional/intraprofessional teams to achieve the best oral health outcomes, at the lowest cost and with the best patient/clinical team experience.

Appendix 3-1 Faculty and Staff Retention Policies and Procedures

Faculty and Staff Retention Initiatives Policy and Procedure

I. Policy Statement

California Northstate University ("CNU" or "University") is committed to retaining highly successful employees whose values, interests, and priorities are in alignment with those of the University in fulfilling the mission of education.

II. Purpose

To define the options that may be applied to encourage personnel retention and to describe the process of approval and the administration of the retention initiatives.

III. Scope/Coverage

This policy applies to all current employees (faculty, staff, and administrators) who have sustained a record of job performance that meets or exceeds the established criteria of highly successful rating in the employee's annual performance evaluation.

IV. Procedure

A. Retention initiative and eligibility requirements:

- i. **Tuition subsidy for full-time employees** who wish to attain an advanced degree in seeking position of greater responsibility or different skill set within CNU:
 - a. Tuition subsidy is not an employee benefit. It is selectively awarded.
 - b. The amount of subsidy is subject to availability of funds, academic performance while receiving the tuition subsidy, and a ten-year limit of no more than \$60,000 total subsidy in the aggregate per employee.
 - c. The subsidy application must be completed with course grade report for fund disbursement of no more than \$24,000 per year.
 - d. Only employees working full-time for at least 2 years are eligible to apply for tuition subsidy. An employee may request to take on a 32-hour position while receiving tuition subsidy for course work study; such request will be considered at the discretion of the employee's supervisor and the Human Resources Office, with no assurance or implication that the request will be granted.
 - e. At the time of applying for tuition subsidy, the employee must be in good standing at CNU with no adverse or pending adverse personnel action.
 - f. A course grade with a letter grade of "B" or above will be given consideration for approval of subsidy. For certain courses that offer "Pass" or "Fail" grading policy, a "Pass" grade is required for consideration of approval of subsidy.

- Page 2 of 5

- f. The second-look review will be conducted under confidentiality per FERPA policy. The result of the review will be purged.

B. The Process To Apply:

- i. For Tuition Subsidy: Employee must submit to the Human Resources Office a completed Employee Tuition Subsidy Application form with a grade report, tuition invoice, and payment receipt for tuition subsidy consideration.
- ii. For Tuition Discount: Employee must submit to the Human Resources Office a completed Tuition Discount Application form for tuition discount consideration. The employee will be notified in time for the discount to take effect in the current semester when all requirements for discount are met.
- iii. For Second-look Admission Review: Employee must send an email request for second-look to the University Office of Admissions. Once the form is sent, no further action is needed on the part of the employee.

C. The Approval Procedure:

- i. Tuition Subsidy and Tuition Discount Evaluation: The Human Resources Office will review the employee's personnel file and annotate the recommendation. The recommendation will be sent to the Dean's Office for endorsement and additional remark. The final decision is rendered by the Human Resources Office in consultation with the CFO.
- ii. Second-look Admission Review: A specially constituted Admission Subcommittee appointed by the Associate Dean of Admissions for the respective college will perform the review and render a recommendation.

D. The Discount or Reimbursement Process:

- i. Tuition Subsidy Reimbursement: Once the application is approved, employee may submit the following for reimbursement not to exceed guidelines in section IV(A)(i):
 - a. a grade report;
 - b. tuition invoice; and
 - c. payment receipt for tuition
- ii. Tuition Discount: The tuition discount rate of 10% may be awarded towards the current semester immediately provided that all criteria in section IV(A)(ii)(c) are met.

Associated forms:

Approval record:

Issued: 5/31/17

Revised:

APPROVED: 4/25/17

REVIEW: Every three years (or more often if required)

Full-Time Employee Tuition Subsidy Application Form

Terms and Conditions:

Tuition Subsidy is for a full-time employee who wishes to attain an advanced degree in seeking position of greater responsibility or different skill set within CNU.

- A. Tuition subsidy is not an employee benefit. It is selectively applied as an award.
- B. The amount of subsidy is subject to availability of funds, academic performance, and a ten-year limit of no more than \$60,000 total, and annual limit of no more than \$24,000 per year.
- C. Only employees working in full-time positions are eligible to apply for tuition subsidy.
- D. The employee must be in good standing at CNU (i.e. has a sustained record of exceptional or highly successful performance rating and is under no adverse or pending adverse personnel action).
- E. A course grade with a letter grade of "B" or above will be given considerations for approval of subsidy. For certain courses that offer "Pass" or "Fail" grading policy, a "Pass" grade is required for consideration of subsidy.

Name of Employee: _____

Name of institution of enrollment: _____

Intended degree and field of study: _____

Duration of program: _____

Cost of program (Please specify: per degree, per unit, or per semester): _____

Amount of subsidy request: _____

Grade report attached: Yes [☐] No [☐]

I understand that if I resign voluntarily at any time within two years after receiving the last tuition subsidy payment, I am required and obligated to reimburse CNU the amount of tuition subsidy paid to and received by me in the two years preceding such resignation.

Employee signature: _____ Date: _____

Human Resource Use only:

CNU Tuition Discount Application Form for Current Full-time Employee's Child or Dependent

Terms and Conditions:

Tuition discount for CNU enrolled children of current full-time employees:

- A. Tuition discount is not an employee benefit and is selectively awarded.
- B. A tuition discount rate of 10% may be awarded towards the semester that immediately begins after the completion of three years of continuous service at CNU by a current full-time employee. An additional 10% tuition discount may be awarded for each year of service at CNU by the employee. The total discount is limited to a maximum discount of 50% of the tuition only. All fees and other expenses are excluded from discount. (e.g., an employee with nine years of continuous successful service and performance will receive a 50% discount of the tuition for the child enrolled in CNU.)
- C. Tuition discount is a voluntary program by CNU and the continuation of this program is subject to availability of funds.
- D. The tuition discount program is subject to discontinuation without any advance notice.
- E. Decision is final and is not subject to appeal or grievance.
- F. An incomplete form will not be considered for approval.

1. INTRODUCTION TO FACULTY HANDBOOK

1.1 Mission, Vision, Values

- A. **Mission:** *To advance the art and science of healthcare.*
- B. **Vision:** *To provide innovative education and healthcare delivery systems.*
- C. **Core Values (WECARE)**

Working as a team

Embracing diversity and workplace excellence

Caring about our students, our staff, our faculty and our profession

Advancing our university, our goals, and our discipline

Responding to challenges that may impede our Mission

Enhancing communication and partnership

1.2 Core Principles

Education is our business.

Education is about teaching and learning.

Education is effective when students can solve problems, pass the board exam, and have gainful careers.

Educational affordability is about the least time and cost to obtain the degree.

Education is delivered by faculty who are committed to high-yield teaching, low-stress/stress-free learning, and outcome-based SLOs (CLOs, PLOs, ILOs, and CoCLOs) assessment.

Education is delivered with a relevant curriculum characterized by integration of basic and clinical sciences, supported by technology, and taught by responsible and qualified faculty and staff who are loyal to the CNU's values, interests, and priorities.

Education should encompass not only cognitive and intellectual growth, but also social and emotional growth, moral development and character building.

Educational quality is maintained through governance oversight, program review, judicious use of resources, accountability, and administrative leadership.

1.3 Faculty Handbook and Integration with Other University Handbooks and Policies

Your California Northstate University Faculty Handbook ("Handbook") summarizes policies and practices in effect for University faculty at the time of publication. This Handbook supersedes all previously issued faculty handbooks. Various University policies and procedures are appended to this Handbook and should be treated as fully incorporated into this Handbook.

Each College within California Northstate University ("University") may also have its own College Appendix to summarize faculty policies and practices with specific application to the unique circumstances of that particular College. The College Appendices are intended to augment and

supplement rather than supersede the provisions of this Handbook. Where an apparent conflict exists, this Handbook shall supersede the Appendices of the Colleges.

The University Employee Handbook explains the terms and conditions of employment of all University employees, including faculty. Some employment conditions specific to faculty described in the University Faculty Handbook may be different than as described in the Employee Handbook. Since this Faculty Handbook is specific to faculty, its provisions supersede those of the Employee Handbook in apparent conflict; otherwise the Employee Handbook governs all other terms of employment.

Written employment contracts between some faculty members and the University may supersede some of the provisions of this Faculty Handbook. Where there is conflict between the faculty member's employee contract and this Faculty Handbook, the terms of the employee contract, properly entered into in accordance with University policy, shall prevail. Nothing in this Faculty Handbook shall supersede or otherwise limit At-Will Employment Status sections and other at-will provisions of the Employee Handbook.

1.4 Academic Freedom

California Northstate University assures academic freedom to all members of the faculty. The Statement of Principles on Academic Freedom and Tenure formulated in 1940 by the Association of American Colleges and the American Association of University Professors states, in part:

"Institutions of higher education are conducted for the common good...." [The Common good of the institution is grounded upon the primacy of student success, upon which the mission, vision, and values of the institution are based.]

"Academic freedom is essential to these purposes and applies to both teaching and research. Freedom in research is fundamental to the advancement of truth. Academic freedom in its teaching aspect is fundamental for the protection of the rights of the teacher in teaching and of the student to freedom in learning. It carries with it duties correlative with rights.

"(a) Teachers are entitled to full freedom in research and the publication of the results, subject to the adequate performance of their other academic duties; but research for pecuniary return should be based upon an understanding with the authorities of the institution.

"(b) Teachers are entitled to freedom in the classroom in discussing their subject, but they should be careful not to introduce into their teaching controversial matter which has no relation to their subject. Limitations of academic freedom because of religious or other aims of the institution should be clearly stated in writing at the time of the appointment.

"(c) College and university teachers are citizens, members of a learned profession, and [faculty members] of an educational institution. When they speak or write as citizens, they should be free from institutional censorship or discipline [when acting lawfully and in accordance with accepted professional standards,] but their special position in the community imposes special obligations. As scholars and [members of their learned professions], they should remember that the public may judge their profession and their institution by their utterances. Hence, they should at all times be accurate, should

exercise appropriate restraint, should show respect for the opinions of others, [should be sensitive to their audience and timing,] and should make every effort to indicate that they are not speaking for the institution."

California Northstate University is firmly committed to the tradition of academic freedom in American colleges and universities and seeks to maintain conditions which are conducive to open inquiry and free search for truth. In teaching, research, and scholarly activity, faculty have not only the right but the obligation to share their thought processes and resulting opinions and conclusions in analysis of educational material without fear that in doing so they are placing their job in jeopardy and without fear of retribution. Faculty shall at all times make it clear when they are expressing such an opinion or conclusion and that they are not representing the views of the institution. It is the right of students to express their opinions without concern for their grades and to express their opinions without fear of retribution. With academic freedom comes a responsibility to respect others' opinions. Academic honesty is demanded of faculty and students alike.

(Reference: CNU Administrative Policy 2101)

2. Appointment, Rank, and Promotion

2.1 Introduction

Promotion of faculty at California Northstate University is based largely on the achievements of the candidate while a n employee of the University and not on those achievements attained while employed by previous private or public institutions or other organizations. Criteria for evaluation for promotion for all faculty are as follows: the period of employment by California Northstate University; an understanding and acceptance of and commitment to the purpose and objectives of the College; *quality* of performance; *quality* and *quantity* of assignments; evidence of cooperation, positive outlook, and maturity; proficiency as an educator; a record of scholarly accomplishments; evidence of ongoing professional development; availability to individual students for advisement and willingness to share in their concerns; involvement and participation in campus, professional, and community activities; and demonstrated competency in the professional discipline of the faculty member. In addition, a faculty member worthy of promotion demonstrates intellectual competence, integrity, independence, enthusiasm, and a spirit of scholarly inquiry. The Rank and Promotion Committee recognizes that faculty in the clinical areas have additional responsibilities in terms of service to a clinical practice site(s).

The Rank and Promotion Committee of each College will examine the dossier/portfolio of the candidate for examples of accomplishments in the areas of teaching, scholarly activity, and professional service. Assessment of *quality* of the material and examples of the accomplishments provided by the candidate in their dossier/portfolio will be at the discretion of the Rank and Promotion Committee. However, the Rank and Promotion Committee will use the criteria for promotion given in Appendix A as a *guide* in assessing the accomplishments of candidates applying for consideration for promotion. These criteria should be used by faculty and Chairs when evaluating the preparedness of a faculty member for consideration for promotion.

2.2 Instructor

1. Definition: faculty who possess the Doctoral degree in his/her field but has limited

postgraduate experience. The requirement for possession of a Doctoral degree may be waived for a faculty member with documented professional accomplishments in the three academic areas of teaching, scholarship/research activities, and professional service.

2. Time in previous rank: no minimum.
3. Since this is an entry level rank there can be no promotion to this rank.

2.3 Assistant Professor

1. Definition: faculty who possess the Doctoral degree in his/her discipline and shows promise in the three academic areas of teaching, scholarship/research activities, and professional service. The requirement for possession of a Doctoral degree may be waived for a faculty member with documented professional accomplishments in the three academic areas.
2. Time in previous rank (this would apply only to faculty previously appointed at the level of Instructor): promotion of an Instructor who has a Doctoral degree: a minimum of one (1) year.
3. Academic areas considered for promotion to this rank: demonstrates promise in the areas of teaching, scholarship/research activities, and professional service.

2.4 Associate Professor

1. Definition: faculty who possess a Doctoral degree in his/her discipline, meets the criteria for rank of Assistant Professor, and demonstrates a sustained and significant record of accomplishments in teaching, scholarship/research activities, and professional service.
2. Time in previous rank: a minimum of five (5) years must be spent at the rank of Assistant Professor at CNU before consideration can be given to promotion to the rank of Associate Professor; however, the candidate may have the opportunity to apply early for consideration for promotion based on previous time and service credit recommended by the Rank and Promotion Committee, endorsed by the Dean, and awarded by the President under the authority granted by the Board of Trustees.
3. Academic areas considered for promotion to this rank: *excels* in two of the three areas of teaching, scholarship/research activities, and professional service, while *demonstrating satisfactory* activity in the third area.

2.5 Professor

1. Definition: faculty who possess a Doctoral degree in his/her discipline, meets the criteria for rank of Associate Professor and demonstrates continued sustained and significant record of accomplishments in teaching, scholarship/research, and professional service. The rank of Professor is among the highest honors that the college can bestow upon a faculty member. Therefore, this rank is granted only to faculty members who have distinguished themselves in their discipline at national and/or international levels. The faculty member must demonstrate a sustained record of outstanding achievements in teaching, scholarship/research activities, and professional service. The faculty member must *excel* in two of the three academic areas, and demonstrate *significant activity* and *accomplishment* in the third area. Although other factors will be considered, consultantships, publications in peer-reviewed journals, invited "editorialships" and lectureships, and the holding of a professional societal office will be important factors considered in assessing a faculty candidate's accomplishments.
2. Time in previous rank: a minimum of five (5) years must be spent at the rank of Associate Professor at CNU before consideration can be given to promotion to the rank of

Professor; however, the candidate may have the opportunity to apply early for consideration for promotion based on previous time and service credit recommended by the Rank and Promotion Committee, endorsed by the Dean, and awarded by the President under the authority granted by the Board of Trustees.

3. Academic areas considered for promotion to this rank: sustained record of *outstanding achievements* in two of the academic areas of teaching, scholarship/research activities, and professional service, while *maintaining excellence* in the third area.

2.6 Criteria for Positive Recommendation for Promotion of a Faculty Member at the Rank of Instructor to the Rank of Assistant Professor

The advancement of a candidate from the rank of Instructor to Assistant Professor will be based on the potential the candidate has shown to be a productive and contributing member of the faculty. The candidate will need to demonstrate his or her potential in the dossier/portfolio provided to the chair of their department prior to submission of the request for promotion to the Rank and Promotion Committee. If the Department Chair agrees that the candidate is ready for promotion to the rank of Assistant Professor, the Chair will forward the petition for promotion, the dossier/portfolio, and a letter supporting the candidate's application for promotion to the Associate Dean for Faculty Affairs and Experiential Education. The Associate Dean for Faculty Affairs will forward the petition for promotion to the chair of the Rank and Promotion Committee along with a letter indicating approval or disapproval of the promotion. A candidate at the rank of Instructor is eligible to apply for promotion no earlier than one (1) year following appointment at the rank of Instructor.

2.7 Criteria for Positive Recommendation for Promotion of a Faculty Member to the Rank of Associate Professor

A faculty member at the rank of Assistant Professor will be eligible to apply for promotion to the rank of Associate Professor no earlier than five (5) years following the time of appointment to the rank of Assistant Professor at CNU, or no earlier than indicated in the letter of appointment. A candidate applying for promotion from the rank of Assistant Professor to the rank of Associate Professor must *excel* in two of the three areas of: 1) teaching, 2) scholarship/research, and 3) professional service, while demonstrating *satisfactory activity* in the third area.

2.8 Criteria for Positive Recommendation for Promotion of a Faculty Member to the Rank of Professor

A faculty member at the rank of Associate Professor will be eligible to apply for promotion to the rank of Professor no earlier than five (5) years following the time of appointment or promotion to the rank of Associate Professor at CNU, or no earlier than indicated in the initial letter of appointment at the rank of Associate Professor. A candidate applying for promotion from the rank of Associate Professor to Professor must demonstrate a sustained record of *outstanding achievements* in two of the three areas of: 1) teaching, 2) scholarship/research, and 3) professional service, while demonstrating *sustained excellence* in the third area.

A. Teaching

A productive faculty member should possess the following attributes: an ability to express himself/herself clearly and concisely; an ability to make each learning activity an exciting experience; an ability to inspire interest and to secure from students a high degree of individual effort; an appreciation and a respect for students; an appreciation of student viewpoints; and a sympathetic understanding of student problems. It is expected that the teaching record of the candidate will reflect a continuous increase in knowledge of the subject taught, an ability to effectively transmit knowledge to students, and an ability to arouse curiosity and stimulate creative thinking in beginning as well as advanced students. A list of indicators of accomplishments in teaching that the Rank and Promotion Committee will use as a *guide* in determining the level of success of the faculty applicant is shown in Appendix B.

B. Scholarly/Research Activity

A productive faculty member is expected to be engaged in scholarly activities. A key component of the definition of scholarly activity is that it results in publications or other products or services that can be readily evaluated. The nature of the scholarship is not critical and can take several forms including discovery (creation of new knowledge), integration (comprehensive and analytical review of current literature), application (applying new knowledge to improved health), and teaching (development of critically reviewed innovative teaching methods). Publication of the results of these types of scholarly activity demonstrates mastery in the field of inquiry, and documents the process and outcomes of the work so that peers have the opportunity to evaluate these efforts and incorporate the findings into their own activities. As a result, the Rank and Promotion Committee will examine the dossier/portfolio for examples of sustained accomplishment in scholarship. The dossier/portfolio provides faculty members a venue through which they can demonstrate their ability to be a leader in peer-reviewed publications, as well as demonstrating sustained *contributions* to the academic community with work that reflects their roles and responsibilities as faculty. A list of indicators of success in scholarly/research activity that the Rank and Promotion Committee will use as a *guide* in determining the level of success of the faculty applicant is shown in Appendix B. The evaluation by the Rank and Promotion Committee of the scholarly activity demonstrated by the candidate will focus on the *quality* of the work presented in the dossier/portfolio rather than simply on the quantity of work presented.

C. Professional Service

Recognition will be given to faculty who make significant service contributions to the following: 1) student welfare through service to the college and their department; 2) student organizations; 3) scientific organizations; and 4) community, state and national organizations in their special capacities or discipline. For faculty in the Clinical and Administrative Sciences, the Rank and Promotion Committee will give consideration, when appropriate, to clinical service. For faculty in all departments, a strong record of professional service at the national or international level will strengthen the recommendation for promotion, particularly to the rank of Professor. Activity at the levels of Assistant and Associate Professor should represent a distribution of service to the College, Department, and Professional organizations. Faculty are expected to do the following: 1) work energetically as a member of their department; 2)

participate in faculty and campus activities; 3) provide effective academic counseling and guidance to students; and 4) participate in the activities of professional, scientific, or community organizations. Clinical and Administrative Sciences faculty should also demonstrate successful participation in clinical service. A list of indicators of success in professional service that the Rank and Promotion Committee will use as a *guide* in determining the level of success of the faculty applicant is shown in Appendix B.

2.9 Multi-Year Reappointment

Multi-year reappointments may be considered for eligible and qualified faculty. See the multi-year appointment policy (Appendix C).

2.10 Resignation of Appointment by the Faculty Member or Termination of Appointment

Faculty members are expected to give due notice of their intentions if they wish to terminate their appointment with the college. A faculty member may terminate his/her appointment within an appropriate time period, and not during the ongoing academic year, so as not to jeopardize course assignments, student learning, negatively impact their colleagues work or the mission and goals of the College; failure to meet this requirement will be treated as a material breach of the appointment agreement. Faculty initiated termination, should be at the end of an academic year and within 1 month after receipt of notification of the terms of his/her reappointment for the coming year, or if this is not possible, at the earliest possible date thereafter. At the earliest possible opportunity the faculty member must give written notice to the Dean and his/her Department Chair.

Termination of an appointment before the end of the appointment term (as opposed to nonrenewal of appointment) may be effected by the institution only for adequate cause. See Faculty Termination Policy in Appendix D.

3. Faculty Requirements and Development

3.1. Faculty Office Hours

Individual office hours for advising and student consultations should be listed in the course syllabus and posted on the learning management system. Faculty have the option of listing specific hours and/or to state “by appointment”. All faculty teaching within a course must have a minimum of one hour per course unit hour each week dedicated to office hours. When not teaching in a course, all faculty should have a minimum of three hours each week reserved for office hours. Office hours should not conflict with course schedules, and should be within normal business hours.

3.2 Faculty Development

Faculty development is an ongoing process designed to enhance the teaching and research

skills of academics throughout the careers of University faculty. The goal is to increase both teaching effectiveness and scholarly productivity. The success of the program is highly dependent on the sustained commitment of the administration to provide the appropriate space and resources and the faculty's commitment to continuous development of their skills. The purpose is to provide an academic environment that stimulates innovation in teaching, research, and scholarly activity, and encourages University faculty to develop and grow intellectually and professionally and maximize their academic productivity.

Basic resources needed for a successful faculty development program include:

- Encouragement and support from administration for developmental activities
- Release time away from certain faculty and patient care responsibilities when necessary and appropriate subject to the discretion of the Dean
- Funds for travel, research expenses, and equipment consistent with the University's policies and budget
- Appropriate space and routine equipment to conduct research

Programmatic responsibility for the Faculty Development Program is shared between the Department Chairs and the individual faculty. It is the responsibility of the Department Chair to provide the guidance and counseling necessary to assist the faculty member in focusing on specific needs and facilitating activities to address those needs. Ultimate success of a Faculty Development Program rests with the individual faculty member. Each faculty member should address his or her own needs, and through discussions with the Department Chair, focus on and address those needs through the Faculty Development Program.

3.3 Faculty Travel

California Northstate University will refund all reasonable travel expenses for any invited presentations, papers, or posters accepted, if the professional organization or other sponsor does not reimburse expenses, up to a total annual reimbursement of \$2500. The faculty or staff member seeking reimbursements must receive written approval and authorization in advance of travel. The papers and posters presented are an important component of scholarly activity that represent and provide recognition for the College as well as the individual members of the faculty and staff.

Faculty serving as official representatives of the college (e.g., AAMC, AMSA, AMA, ACP, AHA, ACC, ACG, etc.) will have reasonable expenses reimbursed once approved by his/her supervisor.

Faculty serving on professional committees will have reasonable expenses paid when approved in advance by their supervisor. Attendance at selected professional meetings that will enhance the faculty member's teaching and/or research will be considered as Faculty Development and reimbursed as approved by the Department Chair or Dean.

Travel expenses will not be reimbursed for practice faculty traveling between their primary service site and the University.

The process of receiving approval for travel is to complete a Travel Authorization Request Form, which is available from the department Administrative Assistant. The form should be completed with dates of travel, explanation of travel (attach notice for invited presentation, presenting paper or poster, etc.), and an estimate of expenses. The faculty member will resolve any conflicts with teaching or service responsibilities during the leave and prior to submitting the request for leave. The Department Chair must approve the travel. A copy of the approved and signed request form will be forwarded to the faculty member. Faculty should make every effort to minimize expenses (e.g., on-time registration, early booking of airfare). Rental cars will be approved only if necessary to attend a meeting and if equivalent or less than commercial travel (e.g., taxi, etc.). The University does not reimburse for alcoholic beverages or pay-for-TV movies out of its operational budget. Expenses reimbursed by an outside agency must be deducted from the amount billed to the University.

Faculty may be required to submit documentation from the outside agency outlining expenses and/or honoraria received. The approved amount should be considered an expense cap.

Funds from grants for travel can only be spent on behalf of the faculty member.

All reimbursements for travel from University funds must be submitted and detailed on a Travel Expense Voucher. Receipts must be attached to the expense voucher. This form is reviewed and approved for reimbursement by the Department Chair and Dean before being forwarded to the Business Office for processing.

3.4 Faculty Evaluation

Each faculty member will discuss and document achievement of goals for the previous academic year, as well as projected goals for the current academic year, in an evaluation conference with the Department Chair during their annual review.

3.5 Peer Review of Teaching

a. Purpose

The purpose for peer review of teaching is to assist individual faculty members in identifying strengths and weaknesses in their teaching. Peer review of teaching, along with student evaluations of teaching, provides a documented record of performance and contributions to teaching.

b. Procedure

Each full-time teaching faculty member is reviewed by a peer designated by the Department Chair. Department Chairs will be excluded from peer review. For review of Department Chairs, the Associate Dean for Academic Affairs will select the peer reviewer.

- i. The peer reviewer will personally attend one class of the faculty being reviewed.
- ii. In the case of classroom teaching, the peer reviewer will inform the

1. "Training the trainers": planning and designing an on-going staff-training and professional

Following a review, the faculty member should submit to the reviewer any applicable materials the reviewer may not have received during the class period including objectives, test questions, and handouts.

- iii. In the case of clinical /experiential teaching, the peer reviewer will visit the clinical site for review. The individual faculty member being reviewed will be informed of the date of the review (site visit) one week in advance.
- iv. After the peer reviewer has completed the evaluation, the reviewer will prepare a report summarizing the findings and offering suggestions for development. The report will then be submitted to the Department Chair.
- v. The report will be discussed with the individual during the next regularly scheduled evaluation meeting or earlier if necessary. Plans for development will be made accordingly.

3.6 Mentoring Program

Purpose

The mentoring program of each college at CNU provides a structured relationship between a faculty member with experience (mentor) and a faculty member with less experience (e.g., new faculty or mentee). The purpose of a mentoring program is for the mentee to capitalize on the mentor's experience and enhance the probability of success. The Mentoring Program is part of the faculty member's overall academic development in the areas of teaching, research, and service.

Goals of the Mentoring Program

1. Assist new faculty (mentee) to adjust to their new environment while learning about, balancing and executing their academic responsibilities.
2. Assist faculty (new or interested established faculty) to meet high standards of rigor, depth and innovation in scholarship and to realize their full potential as scholars, teachers, and members of the academic community.
3. Provide role models of scholarly excellence in the areas of teaching, research, and service.
4. Provide the mentee with regular feedback regarding his/her development.
5. Assist the mentee in planning their careers and in attaining their academic goals.

Desired Outcomes

The success of a mentoring program is evaluated by measuring the level of success the mentee reaches in achieving professional and personal goals, such as:

1. Reaching an effective/efficient balance between academic, service and personal responsibilities.
2. Showing excellence in the areas of teaching, scholarship/research, and service.
3. Attaining explicit professional goals such as promotion and/or continuous long-term contracts and national/international recognition.
4. Capability of obtaining funding for grants and contracts.
5. Demonstrating effective participation in the governance and obligations of a citizen in the profession, College and University, including service as a mentor to those that follow or who are in need of mentorship.

Responsibilities of the Mentoring Advisory Committee

A "Mentoring Advisory Committee" has the following responsibilities:

1. "Training the trainers": planning and designing an on-going staff-training and professional

- development process on mentoring.
2. Establishing policies and procedures that reflect program decisions and practices.
 3. Maintaining all records of mentor-mentee encounters and acting as liaisons between them.
 4. Coordinating mentoring activities and documenting ongoing development of the mentoring program.
 5. Checking-in regularly with mentors and offering ongoing support.
 6. Developing and enforcing guidelines documenting the responsibilities of the Mentor and the Mentee.
 7. Evaluating the efficacy of the program on an annual basis (primarily through questionnaire surveys of mentors and mentees) and tracking program statistics on short-term and long-term results.
 8. For mentoring relationships to grow and last, the staff responsible for the Mentoring Program ("Mentoring Advisory Committee") will need to be in touch with mentors and mentees on a regular basis in order to assess how well each relationship is progressing and offer guidance and advice along the way.
 9. Regular contacts between (selected) staff of the "Mentoring Advisory Committee" and mentors and mentees can help avoid conflicts, get relationships back on track, and help the program accomplish its goals.

The Mentoring Advisory Committee, with the active support of the Dean and Department Chair, should provide the environment and resources for effective mentoring to occur. Administrators' responsibilities include time allocations that allow for proper faculty development. Additional time and resources in the form of additional training may also be required.

Criteria for Selection as a Mentor

1. Experienced faculty members will be selected by the Mentoring Advisory Committee to mentor new faculty. The mentor must have demonstrated an ability to be an effective faculty and professional role model.
2. The mentor must be willing to meet with the mentee at regularly scheduled intervals and provide feedback regarding the mentee's progress.
3. The mentor must be willing to serve for a minimum of one academic year.
4. The mentor must be willing to collaborate with the mentee to write a professional development plan with measurable and obtainable endpoints. This should be done in consultation with the mentee's Department Chair.

Appointment of Mentors

1. A temporary Mentor will be assigned to each new faculty member. The assignment will take into consideration the best possible match based on scholarly and professional interests as well as common personal characteristics.
2. Following completion of the first year, the mentee may remain with the originally assigned mentor or may change (without the need to state a reason) by selecting a mentor (from a list of available mentors) that match his/her interests in teaching, research, or service.
3. A mentee may choose more than one mentor in order to enrich his/her exposure to different opinions and experiences (mentees should contact the Mentoring Advisory Committee to ensure that the chosen mentor is willing/able to work with the mentee)

Responsibilities of the Mentor

Serving as a mentor is voluntary and must be entered into willingly and with commitment. The

responsibilities of the mentor include, but are not limited, to the following:

1. They must be willing and have the resources to make a commitment to the mentee.
2. They should serve as an advisor, teacher, role model, advocate, counselor, and sponsor of a mentee.
3. They should be able to provide direct assistance or identify others who can provide the mentee with:
 - a. Clinical and didactic teaching and learning strategies, including preparation of materials such as handouts, objectives, slides, and test questions.
 - b. Identification and successful development of clinical practice site, if appropriate.
 - c. Identification of grant sources for research; discuss ideas for research; review research proposals; review the written results of research; discuss and assist with poster presentation/oral communication of research; and assist with review for publication of research.
 - d. Understand their service responsibilities to the College, the department, and the profession.

Responsibilities of the Mentee

The mentee must be willing to spend the necessary time and energy to develop as a faculty member. This program is mandatory for faculty in their first academic position and it is recommended for other faculty in their first year of appointment at CNU. It should be emphasized that nothing prevents any faculty from requesting a mentor at any time.

Determining the Meeting Content/Parameters

1. The mentee is expected to contact the mentor to set up the first meeting in the course of which the following topics should be discussed:
 - a. Both parties should reach a clear understanding of what they expect from each other.
 - b. Frequency, duration, time and place of future meetings.
 - c. Decision as to whether the mentor will have an “open door” policy making himself/herself available at any time.
 - d. Establish how issues of confidentiality will be handled.
 - e. The mentor/mentee relationship should agree to a “no-fault” conclusion of the relationship if either party feels that the intended goal is not being achieved, without reciprocal blaming of one another.
2. Mentees should be encouraged to formulate their career goals clearly, define any problems they perceive and bring specific problems to meetings for discussion.
3. Official contacts should take place at least once/month even if no specific problems exist.
4. If the mentor-mentee relationship proves to be unsatisfactory the mentor or mentee may alert the “Mentoring Advisory Committee” and request a new mentor.

Evaluation of the Mentoring Program

1. The Mentoring Advisory Committee has the responsibility to evaluate the efficacy of the program on an annual basis (primarily through questionnaire surveys of mentors and mentees) and tracking program statistics on short-term and long-term results.
2. The outcome of the mentoring process between mentor and mentee should be discussed, and final reports written individually by the mentor and mentee should be consigned to the Mentoring Advisory Committee.
3. The Mentoring Advisory Committee’s annual evaluation of the mentoring program should be communicated in writing to the Department Chair.

3.7 Faculty Recruitment

Procedures for Selecting New Faculty

Following the Dean's request and the President's approval to hire a faculty replacement or additional faculty members, the Dean in consultation with the appropriate Department Chair will structure an ad hoc Search Committee that will conduct a faculty search and make recommendations to the Dean for appointment. The Dean will appoint the Chair of the Committee. The Search Committee will consist of at least three faculty from the respective Department.

The Committee will conduct a national search for candidates, screen all applications and select appropriate candidates for interviews, the names and credentials of which will be sent to the Dean for comment. An interview will be arranged which will provide an opportunity for all faculty especially those of the respective department to meet the candidate and attend the candidate's presentation. After and during the interview the Search Committee members will seek opinions of the faculty in developing a recommendation to the Dean concerning each candidate interviewed. The Dean shall include the advice of the Search Committee concerning the offering of a position to a candidate.

Search Committee records shall be confidentially maintained in Human Resources Department for a minimum of five years.

Interview and Itinerary Procedure for Faculty

It is recommended that the candidate have either breakfast, lunch, or dinner with two members of the Search Committee on the first day of the interview. This will impart a comfortable, non-threatening, social atmosphere where the committee representatives and the candidate can converse. During this time the candidate should be made aware of the mission, vision and goals of the College and the expected competencies of its graduates. The conversation must remain focused on the University, the College, and the job role.

It is recommended that formal interviews of approximately 30 minutes in length be scheduled with at least the following (others included when necessary):

Dean

Associate Dean for Academic Affairs

Department Chair

Search Committee

Collective Faculty of the candidates department

New Candidate Presentation

It is recommended that the prospective faculty member provide a presentation on his/her scholarly endeavors. While the candidates' personal and professional teaching philosophies are very important, these are to be evaluated during individual faculty and Search Committee interviews.

3.8 Part-Time Faculty

Part-time faculty are used for specific courses and lectures when full-time faculty are unavailable. They are selected based on their expertise in the subject area. The Department Chair in the Department that is responsible for the course evaluates the credentials of the faculty member. A recommendation to appoint the faculty member part-time is then presented to the Dean. The requirements for teaching the course/lecture are discussed with the Department Chair or course coordinator. The teaching effectiveness of the part-time faculty is evaluated in the same manner as full-time faculty.

Part-time faculty that perform a service on a regular basis should be added to the payroll. The Chairs will furnish the part-time faculty with an appointment letter that provides salary information and teaching responsibilities. If they provide a service occasionally (class, practice experience, etc.) they should be paid using a Request for Payment (RFP).

4. Academic Policies and Procedures

4.1 Student Advising Program

The Student Advising Program is under the direction of your College's Assistant Dean for Student Affairs and Admissions. This program provides information for successful matriculation and professional development of our students and key faculty members are utilized as resource personnel.

All students will be assigned a faculty advisor during orientation who will serve as their advisor through the entire academic program.

This program requires a coordinated effort between the following:

A. Assistant Dean for Student Affairs and Admissions - The responsibilities of this office are to:

1. Provide faculty-training programs
2. Assign students to individual faculty advisors
3. Monitor the advising process

B. Faculty Members - The responsibilities of faculty advisors are to:

1. Participate in training programs provided by the Assistant Dean for Student Affairs and Admissions
2. Approve student registration forms
3. Advise and/or refer students as appropriate
4. Meet with advisees at least twice per semester
5. Monitor student academic progress and assist the student in seeking appropriate help
6. Provide status reports on each advisee to the Assistant Dean for Student Affairs and Admissions at the end of each semester
7. Monitor the advisee's academic portfolio

C. Student Advisees - It is the student's responsibility to be aware of all College degree

requirements as published in the academic catalog, and to insure that such requirements have been met or that appropriate waivers have been secured and filed in the Office of the Registrar. The specific responsibilities of the advisees under this program are to:

1. Obtain registration approval from their faculty advisor
2. Meet with advisor at least twice per semester
3. Evaluate the faculty advisor annually

4.2 Responsibilities of Course Coordinators

A. Develop Course Policies and Procedures in Cooperation with Course Faculty

It is the responsibility of the course coordinator to ensure the faculty in the course are in agreement on course procedures. All faculty should have a sense of commitment to the entire course, not limited to the areas in which they teach. To build this commitment the coordinator should do the following:

1. Prior to the course, meet with the course faculty to reach consensus on the course structure including: teaching and exam schedule, use of active learning components, number of exams, exam construction (format of questions, plan for the cumulative component of all exams, deadline for submission of exam questions and answers), content of course pack (if applicable), deadline/timelines for any other materials or activities required of course faculty, point distribution for exams and other activities, and changes to any policies or procedures on the syllabus (if applicable).
2. In the event consensus cannot be reached regarding the above elements of the course, the final decision should be based upon the majority opinion of the course faculty.
3. Review exam questions for consistency with determined format, grammatical errors and appropriate length. Contact individual faculty regarding any edits to their questions other than grammatical and reach agreement.
4. Provide the item analysis of the entire exam to all faculty members who wrote questions for the exam. If the item analysis indicates a question should be dropped from an exam, the course coordinator should contact the faculty member who wrote the question and reach agreement.
5. Contact individual course faculty regarding any issues from the focus group or other enrollees in the course that pertain directly to that faculty member to achieve joint resolution.
6. Following each examination, provide a copy of the grade roster from the exam to those course faculty members who desire a copy. Furthermore, make the complete grade book available to all course faculty members at their request.
7. Calculate final grades in the course according to the grading scale on the syllabus. Provide these grades to the course faculty who desire a copy. Enter the grades on the official grade roster and submit to the registrar.
8. At the conclusion of the course, meet with the course faculty to discuss successes and changes for future offerings of the course.

B. Maintain the Course Syllabus

It is the responsibility of the course coordinator to maintain the course syllabus and ensure the

syllabus used reflects what was approved by the curriculum committee. The course coordinator should adhere to the following policies established by the curriculum committee:

1. All syllabi should contain the information on the curriculum committee's "Checklist for Syllabus Content."
2. Minor changes in course content are permissible and the syllabus should reflect these changes.
3. Major changes in the course content must be approved by the Curriculum Committee (e.g. removal of a disease state topic). The syllabus should reflect these changes.

C. Implement Course and School Policies and Procedures

1. Provide the examination dates to the Associate Dean for Academic Affairs or other designated Associate/Assistant Dean prior to the start of the semester.
2. Provide a copy (paper or electronic) of the final course schedule (including teaching and exam dates) and syllabus to the course faculty, Curriculum Committee Chair, Department Chairs, and Associate Dean for Academic Affairs and Research prior to the first day of class.
3. Post the final course schedule and syllabus to ASAP before the first day of class.
4. Arrange for course shells in CAMS (if applicable) in coordination with the College's Instructional Technology Center adhering to deadlines.
5. Remind course faculty they are responsible for following copyright law including proper referencing of sources, posting copyright notices and obtaining copyright permissions as needed.
6. Get approval from course coordinator's Department Chair to pay honoraria for outside lecturers.
7. Monitor the final course schedule for adherence by course faculty. In the event faculty do not need all allotted time, seek, if possible, utilization of the time for other course activities aimed at enhancing learning in lieu of canceling class.
8. Schedule periodic meetings with the focus group and address concerns.
9. Ensure there are cumulative components to all examinations within and at the end of the course.
10. Administer examinations (or arrange for the administration of examinations by other course faculty) including makeup examinations (if applicable).
11. Return results of examinations to the students in a timely manner. The examination return policy should reflect the policy of the course coordinator's academic department.
12. Maintain ultimate responsibility for the grade book, the student's final grade, or changing a student's grade.
13. Meet deadline for submission of the student's final grade to the Registrar's Office.
14. Respond to formal grade appeals and honor code violations in a timely manner according to the College's Policy.
15. Review of the Course within four weeks of its completion and submit a report to the Curriculum Committee, Department Chair, and/or Associate Dean for Academic Affairs or other designated Associate/Assistant Dean.

4.3 Responsibilities of Course Faculty

1. Meet the deadlines for submission of handouts, exam questions and answers, and other course materials.

2. Follow copyright law including proper referencing of sources, posting copyright notices and obtaining copyright permissions as needed.
3. Based on consensus reached regarding administration of examinations, be prepared to administer an examination in which the faculty member has a significant number of questions.
4. Adhere to the course schedule. Obtain approval from the course coordinator for scheduling of any outside activities beyond those indicated in the final schedule. Obtain approval from the course coordinator for any desired changes to the final teaching schedule. Inform the course coordinator if allotted time will not be used in its entirety, so that the time can be used for other course related activities to enhance learning.

4.4 Submission of New Courses/Course Changes

All submissions of new courses or changes in existing courses must be initiated at the departmental level before being submitted to the College Curriculum Committee. The Curriculum Committee will submit its recommendation to the entire College faculty for discussion and faculty vote. The remainder of this process will be in accordance with University and College policy and procedure.

4.5 Honor Code

California Northstate University operates under an Honor Code that is intended to serve as a guideline for ethical behavior. Students and faculty alike are bound by this Code and are expected to uphold the articles of the Code. Faculty members are urged to report all violations of the Code to the College's Honor Council. The Council, observing strict confidentiality, decides on the guilt or innocence of an accused individual and suggests an appropriate punishment for each infraction. The faculty member in whose class an infraction occurs will be consulted if the punishment includes lowering of a grade or failure in a course.

The Bylaws of the College's Honor Council are published in the Student Handbook. Faculty members are advised to become familiar with Honor Council procedures, either by reading the Articles or by consulting with the faculty advisor.

4.6 Academic Integrity

Mutual trust is a basic component of any community. California Northstate University expects students, as members of the academic community, to take seriously their position in that community. Students are expected to ensure the continuing responsibility for their own work. The University and its Colleges consider breaches of this trust and responsibility to be serious offenses.

Academic offenses that constitute violations of the Honor Code include, but are not limited to, plagiarism, cheating, lying, and, academic theft.

Plagiarism is the copying of words, facts, or ideas, belonging to another individual, without proper acknowledgment. Failure to reference any such material used is both ethically and legally improper.

Cheating includes the deliberate submitting of work that is not one's own and that violates the professor's instructions for the work; the use of testing materials from past testing periods as a study guide, unless authorized by a professor; possession of written materials, not expressly authorized by the professor during an examination or test, that contain matter relevant to the course in which the examination is being taken; discussion of examination contents with any other student while taking an examination or test; and divulging or receiving any information on the content or form of any examination that either student has not yet taken. A student who knowingly aids another student to plagiarize or cheat will be considered as responsible as the plagiarizing or cheating student.

Lying is defined as making a statement that one knows is false or is intended to deceive. Academic theft is the removal of academic materials, depriving or preventing others from having equal learning opportunities.

4.7 Research and Publication

Faculty are encouraged to pursue scholarly activities including research publications. Please refer to the Intellectual Property Policy labeled as Appendix E.

5. Confirmation of Receipt

I confirm my receipt of my copy of the California Northstate University's Faculty Handbook. I understand that it is my responsibility to read, familiarize myself with, and follow the policies and procedures contained in the Faculty Handbook.

6. Appendices to Faculty Handbook

6.1 Appendix A: President's Office Review of Request of Promotion

The Office of the President shall review the recommendation by the Dean and the Chair of the Rank and Promotion Committee and the dossier/portfolio of the faculty candidate.

The President's Office will render a decision based on the following criteria:

1. The promotion policy is followed.
2. There exists a described quantifiable process to access the candidate's dossier/portfolio.
3. The strength of the evidence supporting the request for promotion is described.
4. The integrity of the review process is maintained throughout review process from the Human Resource perspective.

The Office of the President may render the following action:

1. Grant approval for promotion
2. Denial request for promotion
3. Request further information or clarification before rendering a decision

Criteria	Met/ Not Met	Comment
1. Years of employment met		
2. An understanding and acceptance of, and commitment to, the purpose and objectives of the College		
3. Quality of performance		
4. Quality and quantity of assignments		
5. Evidence of cooperation, positive outlook, and maturity		
6. Proficiency as an educator		
7. A record of scholarly accomplishments		
8. Evidence of ongoing professional development		
9. Evidence of availability to individual students for advisement and willingness to share in their concerns		
10. Evidence of involvement and participation in campus, professional, and community activities		
11. Demonstrated competency in the professional discipline of the faculty member		
12. Demonstrates intellectual competence, integrity, independence, enthusiasm, and a spirit of scholarly inquiry		
13. Faculty in the clinical areas have additional responsibilities in terms of service to a clinical practice site		
14. Appendix A-A: Teaching indicators are reviewed		
15. Appendix A-B: Scholarly/Research Activity are reviewed		

16. Appendix A-C: Professional Service are reviewed		
---	--	--

The Office of the President has reviewed the recommendation based on the Policy:

ASSOCIATE PROFESSOR

1. Definition: faculty who possess a Doctoral degree in his/her discipline, meets the criteria for rank of Assistant Professor, and demonstrates a sustained and significant record of accomplishments in teaching, scholarship/research activities, and professional service.
2. Time in previous rank: a minimum of five (5) years must be spent at the rank of Assistant Professor at CNU before consideration can be given to promotion to the rank of Associate Professor; however, the candidate may have the opportunity to apply early for consideration for promotion based on previous time and service credit recommended by the Rank and Promotion Committee, endorsed by the Dean, and awarded by the President under the authority granted by the Board of Trustees.
3. Academic areas considered for promotion to this rank: *excels* in two of the three areas of teaching, scholarship/research activities, and professional service, while *demonstrating satisfactory* activity in the third area.

PROFESSOR

1. Definition: faculty who possess a Doctoral degree in his/her discipline, meets the criteria for rank of Associate Professor and demonstrates continued sustained and significant record of accomplishments in teaching, scholarship/research, and professional service. The rank of Professor is among the highest honors that the college can bestow upon a faculty member. Therefore, this rank is granted only to faculty members who have distinguished themselves in their discipline at national and/or international levels. The faculty member must demonstrate a sustained record of outstanding achievements in teaching, scholarship/research activities, and professional service. The faculty member must *excel* in two of the three academic areas, and demonstrate *significant activity and accomplishment* in the third area. Although other factors will be considered, consultantships, publications in peer-reviewed journals, invited "editorialships" and lectureships, and the holding of a professional societal office will be important factors considered in assessing a faculty candidate's accomplishments.
2. Time in previous rank: a minimum of five (5) years must be spent at the rank of Associate Professor at CNU before consideration can be given to promotion to the rank of Professor; however, the candidate may have the opportunity to apply early for consideration for promotion based on previous time and service credit recommended by the Rank and Promotion Committee, endorsed by the Dean, and awarded by the President under the authority granted by the Board of Trustees.
3. Academic areas considered for promotion to this rank: sustained record of *outstanding achievements* in two of the academic areas of teaching, scholarship/research activities, and professional service, while *maintaining excellence* in the third area.

President of the University

6.2 Appendix B: Indicator/Criteria of Accomplishments for Promotion

Indicators that the Rank and Promotion Committee will take into consideration when deliberating on the merits of a faculty member who has applied for promotion are, but not limited to, the following:

A. Teaching

Examples of indicators for accomplishments in the area of teaching are, but not limited to, the following:

1. Demonstration of yearly update of educational materials and teaching activities consistent with new knowledge and the application of that knowledge to practice.
2. The creation, development, and implementation of a new course, such as, but not limited to, an elective course
3. The creation, development, and implementation of a new teaching laboratory or practice exercise.
4. The creation, development, and implementation of an innovative teaching approach, or unique and new teaching aids.
5. The creation, development, and implementation of innovative grading or testing procedures.
6. Teaching competence as determined by teaching evaluation performed by peers and/or formal commendations received from faculty of higher rank in team-taught courses.
7. Receiving formal recognition for *quality* of classroom teaching activities.
8. Serving as an effective mentor for students in directed study courses or projects such as, but not limited to, laboratory work (research) or an elective course that involves self study.
9. Collaborating with other faculty to achieve effective integration of instruction.
10. Overall teaching ability as perceived by students and documented by their responses on periodic student course evaluation surveys.
11. Serving as course coordinator for a core course.
12. Attending professional workshops or conferences that advance the development of the candidate as an instructor.
13. Demonstration of proficiency in teaching in the experiential program.

B. Scholarly/Research Activity

Examples of indicators for accomplishments in the area of scholarship/research are, but not limited to:

Quality and number of publications, as defined by a published paper that meets the following criteria:

1. Book, primary author;
2. Book, secondary author;
3. Book, editor;
4. Primary author of a refereed Review article;
5. Primary author, patent – work is not otherwise published;
6. Publication of results of research in peer-reviewed journals or other professional publications;
7. Publication of other scholarly work in peer-reviewed journals and other professional publications;

8. Writes and submits as principal investigator research proposal or grant application to appropriate extramural or intramural funding agency that *receives funding*;
9. Primary author of original, peer-reviewed work not included in the above nine (9) items.
10. Book chapter, primary author;
11. Invited poster or platform presentation as primary author or principal investigator;
12. Publication of a peer-reviewed abstract as primary, secondary or senior author in which results of research or other scholarly work presented as a poster or platform presentation at a professional meeting;
13. Primary author of a refereed Case report;
14. Secondary author of a Book chapter;
15. Peer-reviewed review article as secondary or senior author;
16. Primary, secondary or senior author of a Continuing Education article;
17. Primary author of a peer-reviewed letter to the editor;
18. Secondary author of a peer-reviewed original work.

Additional Scholarly Activities that can be included in the dossier/portfolio include, but are not limited to:

1. Writes on average one (1) high quality research proposal or grant application that does not receive funding every two years and submits the proposal or grant application to an appropriate intramural, extramural, private or public agency or board;
2. Publication as primary, secondary or senior author of a non-peer-reviewed abstract in which results of research or other scholarly work is presented as a poster or platform presentation at a professional or scientific meeting;
3. Receiving an award and/or a commendation recognizing scholarly accomplishments;
4. Numbers of citations of papers published (impact factor) while a faculty member of CNUCOP.
5. Scholarly/research activities also includes the development, demonstration, documentation and evaluation of innovative methods that increase effective teaching as long as such work results in the publication of the results of the innovation.

C. Professional Service

Specific professional service that the Rank and Promotion Committee will consider includes, but is not limited to, the following:

1. To College and/or Department:

- a. Serves on committees of the Department or College;
- b. Effectively carries out committee assignments and related responsibilities;
- c. Serves on committees of the department or College as chairperson;
- d. Serves as faculty advisor to student groups/organizations;
- e. Represents the college at regional or national levels as an elected delegate or other officially recognized representative;
- f. Received an award or commendation for these areas of service;
- g. Performs administrative or service duties for the department or College (e.g., prepared special projects and performed special assignments made by the Department Chair, Assistant or Associate Dean, or Dean);
- h. Performs activities to benefit the College not described elsewhere in this section.

i. Development of a postgraduate program.

2. To Professional and/or Community Organizations:

- a. Serves or has served on a committee for a professional, scientific or community organization, association or society;
- b. Serves or has served as an officer of a professional, scientific or community organization, association or society;
- c. Serves or has served as a consultant in their area of expertise to non-college agencies, professional, scientific or community organizations, associations or societies, or industry;
- d. Has received awards or commendations for any of the above three (3) items (2a, 2b or 2c);
- e. Reviews or has reviewed manuscripts for scholarly publications, organizations, associations or societies;
- f. Reviews or has reviewed grant proposals and/or written applications for extramural granting agencies;
- g. Reviews or has reviewed, as an external reviewer, the dossier/portfolio submitted as an application for promotion and/or tenure by a candidate from another institution;
- h. Serves or has served as an external reviewer for the program review of another institution.
- i. Serves or has served as an editor, associate editor or on the editorial board of a journal.

3. To Clinical Practice Sites

The Rank and Promotion Committee will also take into consideration for faculty in the Clinical and Administrative Sciences Department, when appropriate, service to clinical practice sites in the areas of, but not limited to:

- 1. Clinical service through use of scientific principles in the detection, assessment, and resolution of drug therapy problems.
- 2. Provision of quality, patient-centered programs and services with responsibility for outcomes.
- 3. Practice competence as reflected in practice site evaluations.
- 4. Presenting on subjects relating to pharmacy practice.
- 5. Receiving a practice development grant.
- 6. Directing an experiential practice program.
- 7. Participating as an invited contributor in a national symposium or workshop on pharmacy practice.
- 8. Receiving a widely recognized or national practice award.
- 9. Receiving board certification or a specialty certification in the area of expertise (i.e., BCPS, Geriatrics, etc.).
- 10. Presents or provides written continuing education programs to practitioners.
- 11. Plans, creates develops and presents continuing education programs to practitioners.
- 12. Plans, creates develops and provides written continuing education programs to practitioners.
- 13. Develops and presents certification programs to practitioners.
- 14. Other documentary evidence of achievement of a professional nature as provided by the candidate.
- 15. Working with the Director of Residency Program to develop a new residency program.

6.3 Appendix C: Multi-Year Appointment Policy and Procedures

Multi-Year Re-Appointment Policy and Procedures

I. Policy Statement

The purpose of this procedure is to establish a process for the multi-year reappointment of eligible and qualified full-time faculty of California Northstate University College of Pharmacy (“CNUCOP”). Multi-year reappointment shall be determined and made on the bases outlined below. The term of the reappointments shall not exceed five (5) years and faculty must be given an appropriate notification of non-renewal of appointment prior to the appointment expiring, consistent with the policy and procedures for non-renewal of faculty members

II. Purpose

The purpose of this procedure is to establish a process for the multi-year reappointment of eligible and qualified full-time faculty of California Northstate University College of Pharmacy (“CNUCOP”).

III. Scope/Coverage

This procedure applies to all full-time faculty members of CNUCOP and California Northstate University’s other Colleges and Programs beginning when opened for the first class of students.

IV. Procedure

- a. Eligibility for consideration for a multi-year reappointment is established by a faculty member’s annual performance evaluations. Once eligible, the respective faculty member will be reviewed and recommended for reappointment or non-reappointment by the respective department Chair and the Dean, based on approved qualitative and quantitative standards and factors, with final institutional approval by the President.
- b. New faculty members are hired on a one-year appointment. All full-time faculty members have the opportunity to receive consideration for a multi-year renewal appointment after the successful completion of the first year appointment. If successful, the initial reappointment will be for a two-year term of renewal. After the successful completion of the first three years with CNUCOP, faculty members can be considered to receive an additional two-year term of renewal. Upon the successful completion of the first five years with the college, faculty members may be considered for up to a five-year renewal appointment.
- c. All faculty members must undergo an annual performance evaluation regardless of the duration of their appointment. To be eligible for reappointment, a faculty member must receive certain minimum ratings on his or her annual performance evaluations, as described below. Specifically, a minimum overall performance rating of “successful” must be achieved at each annual evaluation for a faculty member to be eligible to receive consideration for a two-year renewal appointment. To receive a five-year renewal

appointment, a faculty member must achieve at least an overall rating of “successful” annually and at least one “exceptional” in one of the three areas: teaching effectiveness, scholarly activity and services during the previous five years. To maintain and be eligible to receive consideration for an additional five-year renewal appointment, a faculty member must maintain a minimum overall performance rating of “successful” annually, with at least one “exceptional” rating over the previous five years. Faculty members who are not eligible for a five-year reappointment may be considered for successive two-year appointments if eligible for the latter. Faculty members who are not eligible for reappointment because they do not meet the eligibility standards for a two-year reappointment shall be notified at least 3.5 months prior to the expiration of their respective appointments. Faculty members who are on a five-year appointment shall be notified at least 5.5 months prior to the expiration of their respective appointments.

- d. The respective Chair will make recommendations for reappointment and non-reappointment to the Dean. These recommendations will include recommendations regarding any appropriate salary adjustments. The Dean will then submit recommendations regarding reappointment and non-reappointment, including any appropriate salary adjustments as well as the Dean’s modifications to the Chair’s recommendations, to the President of the University. The President shall review the recommendations and provide the final institutional approval or disapproval, including salary. The President’s final approval or disapproval will be based on institutional needs such as budgetary, University policy, and legal considerations, and other extenuating circumstances.
- e. The final decision on reappointment shall be communicated to each faculty member by the respective department Chairs, in consultation with Human Resources. All notices of non-renewal shall be delivered in writing to each faculty member prior to the expiration of their respective appointments. For those serving a two-year appointment, at least 3.5 months’ notice is required. For those serving a five year appointment, at least 5.5 months’ notice is required. Notices of renewal shall state the length of the renewal period, the salary and other conditions of the reappointment.
- f. All faculty members must adhere to the Faculty Code of Conduct, and are subject to discipline up to and including dismissal, at any time, notwithstanding a term appointment. Faculty terminations are subject to the procedures outlined in the Faculty Termination Policy.

Associated forms:

Faculty Termination Policy

Approval record:

APPROVED: BOT: 10/23/14

REVIEW: every two years (or more often if required)

6.4 Appendix D: Faculty Termination Policy

Faculty Termination Policy

I. POLICY AND GENERAL STATEMENT

Adherence to the faculty Code of Professional Ethics and to the Conduct Regulations set forth by the California Northstate University (the “**University**”) is the responsibility of the individual faculty member. The principles implicit in these procedures are for the benefit of all faculty who are involved with or are affected by the rules and regulations of the University.

II. PURPOSE

The purpose of this document is to provide a process for addressing and ensuring that a faculty member’s rights, during the termination process, are adequately protected.

III. SCOPE/COVERAGE

This policy applies to all University faculty who are dismissed during the period of his/her appointment. It is the overall goal of the University to resolve any concerns, issues or problems which may result in termination at the lowest possible administrative level prior to such occurrence.

IV. PROCEDURE

The procedures contained herein adhere to the requirements of the California Administrative Procedure Act, as well as to ensure that each faculty member’s constitutional due process rights are protected. Accordingly, a faculty member will not be subjected to termination, absent his or her agreement, unless s/he has been provided:

- written notice for basis of termination against him/her;
- the opportunity to be heard by an initial committee of peers randomly selected;
- the opportunity to appeal the decision to an appeal committee, which will be comprised of a minimum of three (3) members randomly selected;
- the right to be accompanied to all termination hearings by an advisor of his/her choice; and
- the opportunity for a recording of the hearings.

The procedures set forth herein identify checks and balances to protect the rights of each faculty member during the termination process. For example, no termination action may be imposed absent a review by the President of such a recommendation, absent a review by a committee of the faculty member’s peers, nor absent notification of the Board of Trustees by the President as to all stages of a termination process.

The Faculty Termination Procedures enumerate timelines that shall be followed at each stage of the termination process to ensure that any concerns pertaining to the termination are resolved in as timely a manner as possible. Timely resolution of the termination process protects the rights of all participants to the process.

6.5 Appendix E: Intellectual Property Policy

CALIFORNIA NORTHSTATE UNIVERSITY INTELLECTUAL PROPERTY POLICY

Purpose

The purpose of this Intellectual Property Policy (“Policy”) is to set forth the general policies that define the rights and obligations of California Northstate University (“University”); all persons employed by the University including its faculty, staff, students; and, all persons and entities using the University’s funds, space, facilities, materials, personnel, or other resources.

Definitions

For the purposes of the Policy, the following terms are defined as follows:

University: California Northstate University, LLC, its colleges, its departments and offices, and any related foundation or other related entity formally associated with the University.

Copyrightable Work: An original work of authorship which has been fixed in any tangible medium of expression from which it can be perceived, reproduced, or otherwise communicated, either directly or with the aid of a machine or device, such as a book, magazine, journal, software, computer program, pictorial or graphic work, video, sound recording, multimedia product, dramatic work, musical work, etc. A Copyrightable Work may be the product of a single author or a group of collaborating authors.

Creator: Any faculty, staff, and other persons employed by the University, whether full time or part time, visiting faculty and researchers, students, and any other persons who create or discover Intellectual Property at the direction of the University or using University resources. A Creator may be a single person or entity, or a group of collaborating persons and entities. A Creator of an Invention, however, must be an inventor of the Invention as defined by the United States patent laws or, if protection is sought outside of the United States, by the legal standards of the country in which rights are sought.

Institutional Works: Works created at the instigation of the University, under the specific direction of the University, for the University’s use, by persons, entities, or both acting within the scope of their employment or otherwise subject to a written contract with the University.

Intellectual Property: All forms of intellectual property, including but not limited to Copyrightable Works, Inventions, Tangible Research Property, Trademarks, and Trade Secrets.

Invention: The legal construct of an Invention is defined by the United States patent laws or, if protection is sought outside of the United States, by the laws of the country in which patent rights are sought. In the United States, an Invention can be any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof. Intellectual Property can be considered an Invention, for example, if it reasonably appears to qualify for protection under the law of the country in which protection is sought, whether or not the Intellectual Property is determined to be actually patentable. An Invention may be the product of a single inventor or a group of collaborating inventors.

Patent: A set of exclusive rights granted by a government to an inventor or assignee for a limited period of time in exchange for a public disclosure of an Invention.

Policy: This Intellectual Property Policy of California Northstate University as set forth herein.

Software: Written programs or procedures or rules and associated documentation pertaining to the operation of a computer system and that are stored in read/write memory. Software includes computer programs, computer databases, documentation, source code, source code listings, design details, algorithms, processes, flow charts, formulae, and any related materials that would enable software to be produced, reproduced, recreated, or recompiled.

Tangible Research Property: Tangible items include any items produced in or derived from the course of research such as, for example, chemicals, materials, small molecules, large molecules, biological materials, amino acids, peptides, proteins, nucleic acids, oligonucleotides, polynucleotides, DNA, probes, vectors, cells, transfected cells, antibodies, pharmaceuticals, drug delivery systems, medical devices, therapeutic apparatus, therapeutic interventions, in vitro assays, in vivo assays, data, databases, computer databases, algorithms, computer software, engineering drawings, prototypes, equipment, charts, graphs, tables, research methods, business methods, other records or information, etc. Individual items of Tangible Research Property may be associated with one or more items of Intellectual Property, such as Copyrightable Works, Inventions, Trademarks, and Trade Secrets.

Trademark: A distinctive word, design, or graphic symbol, or a combination of any word, design, or graphic symbol, that identifies and distinguishes the goods and services of a particular person or entity.

Trade Secret: Information that is not generally known to the public and confers some sort of economic benefit on its holder and derived specifically from its not being generally known rather than just from the value of the information itself. Trade Secrets must be subject to reasonable efforts to maintain secrecy.

Objectives

The mission of the University is to advance the art and science of healthcare. In accord with this mission, the objectives of the Policy are: (1) to encourage the development of Intellectual Property for the best interest of the University, the public, and the Creator of the Intellectual Property; (2) to provide timely disclosure and protection of Intellectual Property; (3) to allow faculty, staff, and students of California Northstate University maximum academic, scientific, and professional freedom in developing Intellectual Property, consistent with any obligations of employment and sponsored research; and (4) to protect California Northstate University's interest in Intellectual Property.

Applicability

This Policy applies to (1) all persons employed by the University; and (2) all persons and entities using the University's funds, space, facilities, materials, personnel, or other resources, including but not limited to adjunct faculty, visiting faculty and researchers, and students, except to the extent the University and such persons or entities enter into a separate written agreement relating to specific Intellectual Property and related work by such persons and entities. University employees shall not enter into intellectual property agreements related to outside employment, such as consulting or summer employment agreements, and shall not collaborate with others on the conception, research, development, production, or other creation or reduction to practice of Intellectual Property, without first providing written notice to all prospective employers and collaborators that the Intellectual Property rights of the University cannot be subordinated to a third party employment, consulting, or collaboration agreement, and without first disclosing such employment, consulting agreement, or collaboration to the University and providing copies of any related written agreements to the University.

Copyrightable Works

5.1 General: Except for Institutional Works and Works Developed with Significant Use of University Resources as described in Sections 5.4 and 5.5 below, and notwithstanding the work for hire doctrine, the ownership of textbooks, manuscripts for publication in books, articles for publication in academic journals, trade publications, popular magazines or newspapers, or other mediums of expression, scholarly monographs, charts, maps, works of nonfiction, novels, artistic works, supporting materials, and like works shall be held by the Creator.

5.2 University's Royalty-Free Use of Works: Except for textbooks, the University shall have royalty-free use of the scholarly and artistic works described in Section 5.1 above within the University, unless agreed otherwise in writing. If the work is to be published, the Creator shall diligently request that the University be provided with a

royalty-free right to use the manuscript within the University in its teaching, research, and service programs, but not for external distribution, and, if successful, the Creator shall grant such right to the University.

5.3 Student Academic Creations: The ownership of student works submitted in fulfillment of academic requirements shall be with the Creator. The student by enrolling in the University gives the University a nonexclusive royalty-free license to use, mark on, modify, and/or retain the work as may be required by the process of instruction, or otherwise handle the work as described in the course syllabus. The University shall not have the right to use the work in any other manner without the written consent of the Creator. Where the creation is part of any ongoing research or development project, the involved faculty or staff shall have the right to use and to modify the creation for use within that project and related research projects without additional consent of the Creator. Students working on a project governed by a written agreement to which the University is a party shall be bound by the terms of that written agreement. Students who are hired to perform specific tasks that contribute to a Copyrightable Work will ordinarily have no rights to ownership of that work, regardless of the source of funds from which they are paid; in such cases, the party who owns the copyright of the rest of the work will ordinarily retain copyright ownership of the portion contributed by the student. Students working collaboratively with academic employees on projects that result in a Copyrightable Work may be granted the same rights and obligations of copyright ownership as would academic employees working collaboratively on the project; students and academic employees should establish these rights at the outset of their collaboration through written authorization from the academic dean or his delegated associate dean, assistant dean, department chair, or director.

5.4 Institutional Works: The University shall retain sole ownership of Institutional Works. Institutional Works are defined in Section 2 above and include, by way of example and not by way of limitation, (1) manuals, brochures, CDs, videos, and training programs prepared by hired staff members or by persons hired for that purpose, (2) software developed for the University, and (3) work assigned to programmers. The University owns all rights, title, and interests in such Institutional Works and the Intellectual Property related thereto, except as provided in prior written agreements between the University and Creator of such works.

5.5 Works Developed with Significant Use of University Resources: Copyrightable Works that are not Institutional Works but are works that are developed with significant and integral use of funds, space, facilities, materials, personnel, or other resources administered by the University, where such use was substantial and essential rather than incidental, shall be owned by the University. In addition, Copyrightable Works that are not Institutional Works but are works that are developed in the course of or

resulting from research supported by a grant or contract with the federal government (or an agency thereof) or a nonprofit or for-profit nongovernmental entity, or by a private gift or grant to the University, shall be determined in accordance with the terms of the sponsored grant or contract, or in the absence of such terms and to the extent consistent with copyright law, shall be owned by University. The University recognizes and affirms the traditional academic freedom of its faculty and staff to publish scholarly, pedagogical, and artistic works without restriction. In keeping with this philosophy, the University will not construe the provision of offices or library facilities as constituting significant use of University resources, except for those instances where the resources were furnished with the specific purpose of supporting the development of such Copyrightable Works.

5.6 Disclosure, Assignment, and Protection: Creators of Copyrightable Works that are not owned by the University under this Policy own the copyrights in their works and are free to publish them, register the copyright, and to receive any revenues which may result therefrom. Notwithstanding the immediately preceding sentence, Creators of Copyrightable Works must nevertheless promptly disclose to the University any work of their authorship, any part of which was created during their time of employment by the University, including but not limited to any Copyrightable Works made under sponsored research or cooperative arrangements. Disclosure shall be made on a disclosure form prescribed by and available from the University. Such persons shall cooperate with the University to the best of their ability in protecting Intellectual Property rights in their works of authorship. Furthermore, upon request by the University to perfect Intellectual Property rights, such persons shall (1) warrant that, to the best of their knowledge, the work does not infringe upon any existing copyright or other legal rights, that work not identified as quotation is the expression or creation of the author, and that necessary permission for quotation and the use of third party works has been obtained; and (2) execute such documents and perform such other things as the University may reasonably require to perfect the University's rights in such works. Notwithstanding the foregoing, the University will process federal registration for University owned Copyrightable Works when the University concludes that such University owned Copyrightable Works should be licensed for commercial exploitation or when registration is required under terms of a sponsored agreement.

5.7 Software: All software is copyrighted, may be federally registered as such, and may also be patentable. Rights to Software developed by a Creator shall vest in the University, when there was any support of the Creator's efforts through use of funds, space, facilities, materials, personnel, trade secret information, or other resources administered by the University. A grant or contract between a sponsor and the University usually contains specific provisions with respect to the disposition of rights to Software, and such prior contractual obligations may define the disposition of Software developed during the project; in the absence of any such provisions, rights to Software developed by a

Creator shall vest in the University. In those cases in which Software ownership rights are vested in the University, or in cases in which income is shared between the sponsor and the University, the Creator will share in income earned by the University as set forth in Section 8. In recent years, the United States Patent and Trademark Office has determined that software which meets certain technical and legal criteria may be patentable. In the case that Software originally disclosed as a Copyrightable Work subsequently is determined to be patentable subject matter, and the University chooses to seek patent protection for the Software, then such Software shall thereafter be managed under this Policy as an Invention.

Inventions and Patents

6.1 General: All Inventions conceived, researched, developed, produced, or otherwise created or reduced to practice, that result from an individual's employment responsibilities or that result from support from funds, space, facilities, materials, personnel, trade secrets, or other resources administered by the University shall belong to the University and the inventor shall assign all rights in the Invention to the University. For purposes of this Policy, researching an Invention includes all scholarly research conducted in the course of the Creator's University employment, including but not limited to performance of research sponsored by the University or by an external agency/corporation or with University funds, space, facilities, materials, personnel, trade secrets, or resources. The University shall have the sole right to determine the disposition of such Inventions. In making such a determination, the University will act in a manner, which in the sole judgment and discretion of the University, is in the best interests of the University, the Creator, the Invention's research sponsors, and the public.

6.2 Sponsor Supported Efforts: Ownership of an Invention developed in the course of or resulting from research supported by a grant or contract with the federal government (or an agency thereof) or a nonprofit or for-profit nongovernmental entity, shall be determined in accordance with the terms of the sponsored grant or contract, or in the absence of such terms, shall be owned by the University. In the case of government supported research, the Bayh-Dole Act and subsequent amendments and federal regulations provide the basis for current University technology transfer practices. Accordingly, while the University is assigned the rights to Intellectual Property generated during the course of federally-sponsored research activities, the government retains the option to claim ownership under certain circumstances. In the event that the government does not exercise its option (the usual circumstance) and regardless of ownership, the government retains a non-exclusive, non-transferable, irrevocable, royalty-free, worldwide license to the Intellectual Property produced under government sponsorship. In those cases in which all patent rights are vested in the University, or in cases in which income is shared

between the sponsor and the University, the Creator will share in income according to the allocation formula set forth herein in Section 8.

6.3 Institutional Works: The Creator of Institutional Works shall exercise no rights in such works and shall receive no proceeds from the licensing, sale, assignment, or use of such works, except as provided by prior written agreement between the Creator and University.

6.4 Tangible Research Property: To the extent allowed by law, where any Tangible Research Property is not within the scope of the claims of a patent, patent application, or copyright, ownership of such Tangible Research Property shall be determined as set forth herein, and the Creator of such Tangible Research Property will share in income according to the allocation schedule set forth in Section 8.

6.5 Individual Efforts: An Invention unrelated to an individual's employment responsibilities that is developed on his or her own time without University support or use of funds, space, facilities, materials, personnel, or other resources administered by the University is not owned by the University. In such cases the University will make no claim for royalties or income from the Invention.

6.6 Disclosure and Assignment: All persons subject to this Policy shall promptly disclose to the University any Invention conceived by them, as well as any part of which that was conceived, researched, developed, produced, or otherwise created or reduced to practice during their time of employment by the University. The only disclosure of any invention shall be made on a disclosure form prescribed by and available from the University, unless otherwise authorized by the University in writing in order to preserve worldwide rights to any such invention. All persons subject to this policy recognize that unauthorized disclosures can create an irreversible loss of rights and revenue and, thus, shall use their best efforts to cooperate with the University to protect all Intellectual Property rights in the Invention, as well as any rights otherwise associated with the invention. All Creators shall execute appropriate assignments and/or other documents as necessary to legalize and enable the proper distribution of ownership and rights to any Invention as set forth herein throughout this Policy.

6.7 University Decisions on Disclosed Inventions: A Patent Committee, appointed by the President and whose membership will represent both faculty and administration, will make recommendations on whether to seek intellectual property protection on disclosed Inventions. This Committee will use commercially reasonable efforts for prompt decisions, consistent with faculty publication and other obligations. The Committee will establish procedures which allow the University to meet time contingencies through the use of provisional applications and other appropriate measures. This Policy recognizes, however, that invention evaluation procedures can be complicated

by a wide variety of factors. The Committee will keep the Creator reasonably informed of the status of the disclosure and shall make recommendations to the University's Board of Directors regarding the appropriate measures to take in regard to protecting the Invention. The Board of Directors' decision will be the final decision on this matter and shall be completed within 9 months after the disclosure is submitted to the University. Should the Board of Directors decide not to pursue patent protection, upon request the University will assign to the Creator the rights to the Invention, subject only to sponsor restrictions. In all cases in which the Invention is assigned to the Creator, the University will retain the rights to a non-exclusive, non-transferable, irrevocable, royalty-free, worldwide license to the Invention for its teaching, research, and service programs.

Trademarks

Trademarks associate a good or a service with the source of the good or service. In most situations, a Trademark identifies an item of Intellectual Property, such as a computer program or a plant variety. In other situations, a Trademark may identify an educational, training, research, service, or public relations program of the University. Regardless, the University owns all rights, title and interests in Trademarks related to an item of Intellectual Property owned by the University such as, for example, a program of education, training, research, service, or public relations of the University. All income from the licensing of a Trademark shall belong to the University.

Distribution of Revenue

8.1 Schedule of Distribution: Except as otherwise provided in this Policy, any revenue received by the University generated through University owned Intellectual Property will be distributed in a manner that recognizes the efforts and contributions of the Creator and as set forth by this Policy. The University will maintain a detailed accounting for all expenditures and receipts associated with the Intellectual Property and will manage the distribution of the revenue ("the annual gross income") as follows:

- (a) 100% of the annual gross income shall go to the University until the University's Costs of Development have been recovered. The "Costs of Development" include costs associated with legal services, and other expenses that include the costs of materials, equipment (an allocated percentage of total cost based on total expected use), and staffing that were incurred during the development of the Intellectual Property.
- (b) after Costs of Development have been recovered, 20% of the annual gross income shall go to the University to ensure a sufficient reserve to pay for ongoing "Costs of Commercialization," such as legal services, government maintenance fees for the Intellectual Property, and other

commercialization efforts that include marketing expenses and insurance and exclude internal technology transfer staff time;

(c) the remaining 80% of the annual gross income shall be defined as annual Net Revenue and distributed annually, paid in its entirety in a single annual payment or structured over the annual period, according to the following tiered distribution system based on total Net Revenue accumulated from year to year by adding all of the annual Net Revenue amounts together:

<u>Total Net Revenue Accumulated From Year To Year</u>	<u>Proportion Of Distribution</u>
First Tier: First \$0 - \$100,000.00	50% to Creator 50% to University
Second Tier: After first \$100,000.00 is distributed in First Tier, next \$150,000.00	25% to Creator 75% to University
Third Tier: After first \$250,000.00 is distributed in First and Second Tiers, next \$250,000.00	15% to Creator 85% to University
Fourth Tier: After first \$500,000.00 is distributed in First, Second, and Third Tiers, the remaining amount	10% to Creator 90% to University;

(d) in the event the University takes equity in a company that is not founded by the Creator, the distribution of the equity will be 25% to the Creator and 75% to the University, and the distribution of shares to the Creator will occur at the same time and at the same share price of the initial distribution of equity to the University; and,

(e) in the event the University elects not to commercialize an Intellectual Property and allows the Creator to commercialize the Intellectual Property, the distribution of revenue will be 75% to the Creator and 25% to the University where the Creator assumes the costs of procuring Intellectual Property and Costs of Commercialization.

8.2 Distribution for Multiple Creators: Multiple Creators may enter into an agreement that reflects an agreed-upon percent contribution of each of the individual Creators to the as-filed application for rights to the Intellectual Property. The lead Creator shall (i) obtain an agreement signed by each Creator and identifying the percent contribution of each Creator to the as-filed application, and (ii) submit the agreement to the University. The agreed-upon percent contribution of each Creator will be used as the revenue distribution formula. If such an agreement is not submitted to the University

within ninety (90) days of the filing date of the Intellectual Property application, the University will determine the revenue distribution formula.

8.3 Right to Change Distribution: The University reserves the right to change the distribution of revenue annually and agrees to provide timely notice of any such change to all persons employed by the University including its faculty, staff, students; and, all persons and entities using the University's funds, space, facilities, materials, personnel, or other resources.

Dispute Resolution

If there is a dispute relating to any matter addressed by this Policy, those persons to whom the Policy applies as described in Section 4 above shall present the dispute to the University's Board of Directors for the Board of Directors' consideration before taking any legal action through the courts or any governmental administrative body.

California Law

This Policy shall be interpreted according to California Law, including but not limited to the provisions of the Labor Code (including, but not by way of limitation, Sections 2860, 2870, 2871, and 2872 thereof) relating to ownership of Inventions, except as otherwise provided in this Policy. Any and all Inventions that relate to the employer's business, research, or development shall be governed by the provisions of this Policy.

Not Assignable

Those persons to whom this Policy applies as described in Section 4 above may not assign or delegate any of their rights, duties, or obligations as set forth in this Policy without the prior written consent of the University's Board of Directors.

Severability

If a court or arbitrator of competent jurisdiction holds any provision of this Policy to be illegal, invalid, or unenforceable, in whole or in part for any reason, the validity and enforceability of the remaining provisions will not be affected, unless an essential purpose of this Policy would be defeated by the loss of the illegal, invalid, or unenforceable provision.

Agreement of the Parties

This Policy is binding on the (1) all persons employed by the University; and (2) all persons and entities using the University's funds, space, facilities, materials, personnel, or other resources. Such persons include, but are not limited to, adjunct faculty, visiting faculty and researchers, and students as a condition for their association with the

University. Such association can include, but is not limited to, teaching, research, and service programs, as well as use of University resources. Furthermore, to avoid any potential for a conflict of interest, members of the University may not enter into an employment, consulting, or collaborative agreement that is in conflict with the policies described herein. Affirmative written notice must be provided to any outside prospective employer or collaborator that the Intellectual Property rights of the University cannot be subordinated to any third party employment, consulting, or collaborative agreement. All persons bound by this Policy must first disclose such employment, consulting agreement, or collaboration to the University and provide copies of any related written agreements to the University before accepting the terms of any such agreement.

STATEMENT OF AGREEMENT:

1. I agree to abide by the terms, conditions, and procedures set forth in this Policy.
2. I will not enter into any agreement creating Intellectual Property, patent, copyright, trademark, or trade secret interests or obligations that is in conflict with this Policy.

Appendix 3-1 Faculty Hiring Plan

California Northstate University College of Dental Medicine

Administration and Faculty Hiring Plan

The College of Dental Medicine at CNU will provide didactic, laboratory and simulation education and experiential patient care education with a team of full and part time faculty. While the part time faculty will include the administrative team and content experts across the spectrum of dental medicine, its disciplines and its specialties, part time clinical educators from the Northstate region will provide clinical preceptorship/education, mentorship, lecture and small group learning seminars at the primary campus and in community based education sites.

A planning group of 47 future faculty associated to the Sacramento District Dental Society has met several times to develop curriculum. The 12 original members of the planning group for the College of Dental Medicine will also serve in part time faculty capacity. The hiring plan for 42.5 full time faculty provides a comprehensive mix to accommodate instructional, clinical, service and scholarly needs of the college.

Note that FTE from initial BMS and preclinical and clinical educators will be divided among more than one hire each of whom will consume .1 to .2 FTE

Administration

Position	FTE Salary	Initial FTE	FTE w/ full enrollment
Dean	295,000	1.0	1.0
Associate Dean, Academic Affairs and Faculty Development	175,000	1.0	1.0
Associate Dean, Curriculum and Clinical Education	165,000	1.0	1.0
Assistant Dean, Clinical Affairs	150,000	1.0	1.0
Assistant Dean, Student Affairs	150,000	0.5	1.0

Appendix 3-1 Faculty Hiring Plan

Assistant Dean, Research	150,000	0.67	0.67
-----------------------------	---------	------	------

Faculty

Basic Medical Sciences Faculty*	130,000	6	6
Preclinical Education Faculty	130,000	0.5	6.0
Clinical Education (general) Faculty	130,000	1.0	12.0
Clinical Education (specialty) Faculty	145,000	1.0	12.0
Part-time Clinical	90,000	0	6.0
Volunteer Clinical (general and specialty) Faculty	0	6.5	18.0
TOTALS		15	60

*These are primarily College of Medicine faculty teaching in Common Pathway courses

**California Northstate College of Dental
Medicine**

**Senior Leadership
Team**

Dean, College of Dental Medicine

Associate Dean of Academic Affairs and Faculty Development

Assistant Dean of Curriculum and Clinical Education

Assistant Dean of Clinical Affairs

Assistant Dean of Student Affairs and Admissions

Assistant Dean of Research

Appendix 3-1 Faculty Hiring Plan

Faculty**Basic Medical Sciences educators (in addition to COM common pathway educators = 6 FTE)**

These faculty will be DMD, DDS, MD, D. Psych, DPharm, or PhD terminal degrees with engagement for case based education in the common pathway curriculum, and in the teaching of head and neck anatomy, dental anatomy, and behavioral sciences

Preclinical educators = 6 FTE

These faculty will hold DMD, BDS or DDS and have appropriate postdoctoral certificate or degree education in operative dentistry, prosthodontics, periodontology, pediatric dentistry or oral and maxillofacial surgery.

Clinical educators general dentistry = 12 FTE

These are general dentists holding the DMD or DDS or BDS who will serve as student preceptors, team leaders, in comprehensive care. Some will serve in discipline based faculty in special needs, emergency care, and oral diagnosis among others

Clinical educators dental specialties = 12 FTE

These are full time positions in dental specialties for board certified specialists holding the DMD, MD, or DDS including specialists in prosthodontics, periodontology, endodontology, pediatric dentistry, orthodontics, oral and maxillofacial pathology, oral and maxillofacial radiology, and oral and maxillofacial surgery

Part time clinical educators = 12 FTE

These are ½ to 1 day a week positions for general dentists and specialists holding the DMD or BDS or DDS degree for clinical or preclinical assignments as educators.

Volunteer Clinical Adjunct Faculty (no cost)

Faculty salaried by health entities with whom CNU has affiliation agreements for clinical education will be given faculty appointments to provide clinical education. These faculty will hold a terminal degree such as DMD, DDS, MD, PhD, DPharm

CALIFORNIA NORTHSTATE UNIVERSITY FACULTY RETENTION REPORT, 2019

CALIFORNIA
NORTHSTATE
UNIVERSITY

CALIFORNIA NORTHSTATE UNIVERSITY FACULTY RETENTION REPORT, 2019

Foreward

The following is the California Northstate University Faculty Retention Report 2019 year. The purpose of this report is to provide data relating to faculty retention, and to further examine how to retain faculty.

This report was prepared by California Northstate University Institutional Research Analyst, Justin Martin, and the Vice President for Institutional Research, Quality, and Assessment, Dr. Karen McClendon.

If you have any questions pertaining to the information presented within the report, please feel free to contact Justin at justin.martin@cnsu.edu, or at (916) 686-7879.

ITEM RESULT GRAPHS

- The following graph indicates that hiring increased at the beginning of the year of 2018, slowed until picking back up again in July and August. The trajectory is within the normal hiring trends for CNU employees.

- The turnover rate at CNU peaked at around August in the 2018 year, with a dramatic decrease that continued for the rest of the year. Over the past year, the university has implemented the following retention initiative programs in an effort to allow our employees to maximize their full potential while employed at CNU:
 - Tuition discount for CNU enrolled children of full-time employees
 - Tuition subsidy for full-time employees who wish to attain an advanced degree in seeking position of greater responsibility or different skill set within CNU.
 - Innovation proposal program allowing employees to submit project proposal with reasonable potential for innovation award (contributing to CNU mission fulfillment)
 - Rewarding employees for their great work and contribution to CNU mission by providing three additional days off for all employees during the holiday in December paid by CNU.
 - An advanced recruitment training for search committees and hiring managers
 - Increased numbers of faculty to ensure greater balance of research and teaching duties
 - A systematic annual review of staff benefits
 - The creation and use of a task force focus group for employee satisfaction
 - An increase in research support
 - A new faculty development seminar series

Historical Head Count

- CNU has sharply increased the amount of employees at the university, indicating a low ending turnover rate in the latter half of 2018. The upward trajectory is expected to continue into the 2019 year.

Appendix 3-1 Hiring Plan for Faculty Years 1 and 2

**Hiring Plan for Course Directors CDM Faculty: 2020-21 and 2021-22**

Academic Year	Position	Course director	Name	Hire Date
2020-21	*Assistant Professor of Pathology	Hematology	Nazila Hejazi	5-1-2020
	*Associate Professor of Anatomy	Integumentary and Musculoskeletal	Nripendra Dhillon	5-1-2020
	Professor	Foundations of Odontology	Kevin Keating	9-1-2020
	Professor	Dental Anatomy	Wai Chen	5-1-2020
	Professor	Foundations of Dental Medicine, Surgical Anatomy of the Head and Neck	Leon Assael	12-1-2018
	Professor	Managing Student Life Ethics in Dental Medicine and Health Care	Richard Simonsen	2-14-2019
	*Professor of Clinical Neurology	Neuroscience	Forshing Lui	5-1-2020
	*Associate Professor of Emergency Medicine	Cardiovascular and Pulmonary Systems	Darilyn Falck	10-1-2020
	*Associate Professor of Physiology	Cardiovascular and Pulmonary Systems	Tracy Yarbrough	10-1-2020
	Professor	Cariology	Kevin Keating	3-1-2019
	Assistant Professor	Oral Microbiology/Immunology	Pending	10-1-2020

Appendix 3-1 Hiring Plan for Faculty Years 1 and 2

Academic Year	Position	Course	Name	Hire Date
2021-22	*Associate Professor of Physiology	Renal System	Tracy Yarbrough	5-1-2021
	*Professor of Molecular Biology, Immunology and Microbiology	Gastroenterology	Nehad El-Sawi	5-1-2021
	*Associate Professor of Physiology, Endocrinology and Clinical Skills	Endocrine System	Mark Sheffield	5-1-2021
	Assistant Professor	Clinical Pharmacology 1	Hieu Tran	5-1-2021
	Assistant Professor	Operative Dentistry	Wai Chan	5-1-2020
	Assistant Professor	Periodontology	Rosemary Wu	5-1-2021
	Assistant Professor	Dental Anesthesiology 1: Local Anesthesia Dental Anesthesiology 2: Pain and Anxiety Control, Analgesia, Medical Management of Local Anesthesia	Michael Cadra	5-1-2021
	Assistant Professor	Oral Radiology 1	Shikha Rathi	5-1-2021
	Assistant Professor	Clinical Pharmacology 2/Oral Pharmacology	Jagdev Heir	5-1-2021
	Associate/Assistant Professor	Prosthodontics and Implant Dentistry: Removable Prosthodontics	Jeff Nordlander	10-1-2021
	Professor	Comprehensive Care Family Dentistry Endodontology, Diseases of the Pulp and Pathways of Odontogenic Infection	Kevin Keating	3-1-2019
	Associate/Assistant	Oral Pathology/Oral	Pending	10-1-2021

Appendix 3-1 Secretarial and Clerical Support for CDM

**Secretarial and Clerical Support for CDM**

As reprised in Standard 3.1, the hiring plan includes secretarial and clerical staffing in administration, clinical affairs and technical/buildings and grounds as follows. This does not include the other 39 staff positions which are for administration, clinical activities, technical, building and grounds.

Academic secretarial	Operative	
	prosthodontics	
	Public health/community based education	
	Pediatric dentistry	
	Oral medicine/oral path/oral radiology	
	orthodontics	
	Periodontology/endodontics	
	Oral surgery	
	Human studies behavioral social sciences	9 total
Clinic secretarial	Registration and billing	4 total
Clinic clerical	Coordinators	8 total
TOTAL clerical		21

Faculty Mentoring Program

The goal of the Mentoring Program is to assist faculty in becoming accomplished, productive, and successful in their chosen endeavors of teaching, research, patient care, or administration. Mentoring relationships have proven to be an excellent way to enhance professional growth and the University strongly supports such activities. When you meet with your supervisor throughout the year, we encourage you to use these activities as a resource to assess your mentoring needs as they relate to your professional development.

CNU departments support the mentorship process. When faculty are first hired they will be assigned a mentor. This relationship may remain, but after three months the mentee has attended University functions and interacted with other faculty enough to make their own selection. During these initial three months of mentoring, all new faculty should meet with their mentor monthly and document their interaction at each meeting. It is the mentee's responsibility to keep and maintain the Mentoring Form as it may be reviewed during their annual evaluation.

The Associate Dean of Faculty Affairs for the PsyD program will be reviewing the mentor/mentee pairings using two forms for the evaluation: the assessment form for mentees and the assessment form for mentors. They will also periodically provide faculty with the "Could I Benefit or be a Mentor?" form to monitor need and demand of the program.

The mentoring program helps faculty to:

- Determine if they are in a position to be a mentor
- Describe the rewards associated with mentoring
- Offer direction on how and why to seek a mentor
- Provide a checklist of qualities to look for when seeking a mentor or a mentee
- Offer alternatives to traditional mentoring
- Offer suggestions for colleges, departments, and divisions in devising mentoring programs
- Point out potential obstacles to mentoring
- Provide template forms to assess need and monitor mentoring relationships
- Offer additional resources for more detailed information on mentoring

Importance of Mentoring

The following are possible relationships between a junior and a senior professional in an academic setting:

- Advisor, tutor, or preceptor (assigned by the institution)
- Role model or mentor (chosen by the learner)

Institutionally assigned roles are professional: the senior ensures that the junior completes institutional requirements, is progressing appropriately in his or her field of study, and has the knowledge necessary to achieve career success. Relationships chosen by the learner often involve a personal element in addition to professional guidance: a role model or a practicing professional who may not be at a senior level but can provide a perspective of professional employment. A role model can be a professional

equal, but mentors are senior representatives in their fields. They are chosen specifically for their positions and experience in developing early careers.

Benefits to Mentors:

Mentoring is a developmental stage in one's professional life and by becoming a mentor you have the opportunity to affect the future. Mentors often gain:

- A sense of self-worth
- An opportunity to shape careers
- A deeper connection with colleagues
- A further contribution to the school
- An increase in future Productivity
- Career satisfaction and rejuvenation
- Organizational recognition

Although there are a number of benefits to be gained from the role of a mentor, there are also quite a few responsibilities. Before entering such a relationship it is important that faculty consider the following expectations.

Mentors Will:

- Encourage and demonstrate confidence in mentee
- Recognize mentee as an individual with a private life
- Value them as a person
- Recognize own limitations
- Provide feedback
- Encourage independent behavior
- Provide accessibility and exposure to mentee
- Stress importance to mentee of networking
- Allow mentee to assist in projects
- Give appropriate credit to mentee
- Make sure the mentee has your contact information
- Tell mentee about your expectations
- Ask mentee what they expect from you
- Develop a checklist concerning mentee career goals
- Set up a regular time to meet
- Write out one and three year goals
- Facilitate mentee's membership in committees
- Offer assistance in publications
- Never see the mentee as a threat

Characteristics That Should be Sought in a Mentee

When trying to determine if a mentee is ready to begin the mentoring relationship, consider the following traits and interests:

- Eagerness to learn
- Understanding of the seriousness required in a mentoring relationship
- Flexibility and an understanding
- Acceptance in giving and receiving feedback

- Interest in the process
- Mutual respect
- Ability to maintain confidentiality
- Ability to seek out additional mentors as needed
- Willingness to explore new areas of interest

As a mentor, you need to ensure that your mentee maintains productivity; has protected research time; understands the requirements for promotion; and receives exposure via local, national, and international organizations. You also need to be aware and sensitive to obstacles that may be present in the mentee's life and have the potential to interfere with his/her professional demands.

When Mentees are Seeking a Mentor

When Mentees are deciding whom to approach as a potential mentor, they should keep the following questions in mind:

- Of those in my department junior to me, who is pursuing work or has strengths similar to my own?
- Who appears to be struggling in an area that is my strength?
- To whom do I gravitate before and after staff meetings or at social functions?
- The most effective mentoring experience occurs where the seeker and the sought mutually agree to the relationship
- Familiarize yourself with the department's senior faculty, their publications, their practice, and research areas
- Closely observe the senior staff during department meetings
- Match the professional expertise you admire with the personal qualities that would make for a collegial relationship
- Personal "fit" should be considered
- The mentor – mentee relationship is always a dynamic one

Evaluate the Relationship

Both the mentor and mentee should monitor and evaluate the relationship to ensure that it is mutually beneficial to both parties.

- Has your mentor continued to be academically successful?
- Are you still interested in their areas of research or teaching?
- Is the mentor easy to approach and have a conversation?
- Does your mentor advise and encourage your independent goals?
- Do you meet regularly?
- Do you receive feedback and constructive criticism?
- Does the mentor facilitate professional opportunities?
- Does the mentor facilitate opportunities within the university?

The following three forms can assist in the evaluation process and should be used both as a record of the relationship's progress and as a tool to facilitate further conversation.

Assessment Form for Mentees

Must be completed after first year of mentoring relationship or as needed.

Complete as follows:

1 – Strongly Agree, 2 – Agree, 3 – Neutral, 4. –Disagree, 5– Strongly Disagree

- | | |
|---|-----------|
| • I believe that mentoring is a good idea. | 1 2 3 4 5 |
| • I have benefitted from the mentoring relationship. | 1 2 3 4 5 |
| • My mentor is readily available. | 1 2 3 4 5 |
| • My mentor and I meet on a regular basis. | 1 2 3 4 5 |
| • My mentor and I are congruent on our goals. | 1 2 3 4 5 |
| • My mentor and I have similar values. | 1 2 3 4 5 |
| • My mentor respects me as a person. | 1 2 3 4 5 |
| • My mentor believes in work/life balance. | 1 2 3 4 5 |
| • My mentor always gives appropriate credit. | 1 2 3 4 5 |
| • My mentor has involved me in University committees. | 1 2 3 4 5 |

The most rewarding elements of the mentoring relationship are:

I would suggest the following improvements:

Assessment Form for Mentors

Must be completed after first year of mentoring relationship or as needed

Complete as follows:

1 – Strongly Agree, 2 – Agree, 3 – Neutral, 4. –Disagree, 5– Strongly Disagree

- I think mentoring is a good idea. 1 2 3 4 5
- I believe that my mentee has benefited from the relationship. 1 2 3 4 5
- My mentee and I have similar values. 1 2 3 4 5
- My mentee respects me as a person. 1 2 3 4 5
- The relationship requires too much of my time. 1 2 3 4 5
- I have the support of the University for my mentoring activities. 1 2 3 4 5
- I have referred my mentee to other faculty for help. 1 2 3 4 5
- My mentee does not need a mentor. 1 2 3 4 5

1. The best thing about mentoring is:

2. I would suggest the following changes/modifications:

Could I Benefit or be a Mentor?

Circle your level of expertise for the position duties listed:

1 – I feel competent in this area and am willing to be a mentor

2 – I feel somewhat competent in this area, but am not willing to be a mentor

3 – I need mentoring in this area.

- | | |

**College of Dental Medicine****Professional Development 2019**

Name	Dates	Title	Course Objectives
Leon Assael	February 21-22	Sacramento District Dental Society Midwinter Convention	An array of sessions to assist dentists in improving skills and clinical practices.
Leon Assael	March 16-19	American Dental Education Association Annual Session	An array of sessions developed to assistant dental educators and administrators in improving their individual skills to ensure the success of students and dental colleges.
Kevin Keating	March 17-22	Harvard Macy Institute: A Systems Approach to Assessment in Health Professions Education	Apply systems thinking in designing assessment programs to support the continuous quality improvement of students/trainees, faculty, and curricula at their academic health science institutions.

College of Dental Medicine Bylaws

PREAMBLE

UNIVERSITY MISSION, VISION, AND CORE VALUES

Mission: To advance the art and science of healthcare

Vision: To provide innovative education and healthcare delivery systems

Core Values (WE CARE):

- Working as a team
- Embracing diversity and workplace excellence
- Caring about our students, our staff, our faculty and our profession
- Advancing our university, our goals, and our discipline
- Responding to challenges that may impede our Mission
- Enhancing communication and partnership

CNU COLLEGE OF DENTAL MEDICINE MISSION STATEMENT

MISSION

The Mission of the College of Dental Medicine is to advance the art and science of health care through excellence in oral health education, practice, research, service, and social accountability.

Education: Create caring, skilled and knowledgeable clinicians who will constantly advance their capabilities throughout life

Practice: Produce clinical leaders in oral health who will serve in private practice, health systems practice, in interprofessional settings, academia and industry

Research: Promulgate scientific inquiry throughout the curriculum and support student and faculty research that creates an environment of scientific curiosity and an evidence-based foundation for clinical practice.

Appendix 3-3 CNUCDM Bylaws

Service: Provide individual patient care services at all clinical sites under the auspices of CNUCDM that produces the very best oral health outcomes and clinical value.

Social Accountability: Advocate for and help build stronger communities in California and globally through improved oral health care, disease prevention, health promotion and protection from oral diseases through community-based approaches.

VISION

The Vision of the College of Dental Medicine is to provide constructive innovation in its education programs, and leadership in integrating oral health care into human health care systems.

College of Dental Medicine Values:

- Patient-centered didactic and clinical education that always puts improved health outcomes first
- Foster a humanistic and character-developing environment for dental students
- Making better communities and a better world through improved oral health
- Understanding the professional responsibility of the dentist as the head of the oral health care team
- Practicing health promotion and disease prevention and protection
- Advancing California Northstate University through excellence in all we do

ARTICLE I

FUNCTIONS

The faculty of California Northstate University College of Dental Medicine (CNUCDM), herein after referred to as the College, shall have the responsibility to:

1. Recommend the requirements for student admission into the Doctor of Dental Medicine (DMD) program offered by the College
2. Recommend and implement the necessary evaluative tools to determine the readiness of the candidates to be awarded the respective degree
3. Recommend to the Dean student candidates for graduation who have completed the requirements for the degree
4. Supervise all courses and curricula for DMD students and the postgraduate training of residents and fellows
5. Organize and develop the programs and resources necessary for the professional development of faculty and staff
6. Advise the Dean on the resources necessary to implement the curricula, develop programs, and develop/train faculty

ARTICLE II

MEMBERSHIP OF FACULTY

The Faculty shall consist of the Dean, the Assistant/Associate Deans, the Department Chairs, Directors, and all those members (preceptors included) who hold academic appointments with the College of Dental Medicine.

ARTICLE III

OFFICERS OF THE FACULTY

1. The Officer of the faculty is the Dean's Administrative Assistant who is responsible for tallying all votes and recording the faculty meeting minutes.

2. The Officer shall enforce Robert's Rules of Order and ensure a quorum exists in order to conduct faculty business.

ARTICLE IV

MEETINGS OF THE FACULTY

1. Meetings of the faculty will be held at least once each month as time permits, and when the circumstances deem appropriate, or upon the request of the Dean.
2. All faculty members shall be invited to attend all meetings of the faculty and allowed to participate in discussion.
3. The Dean or a designated member shall preside at all faculty meetings.
4. The Dean's office shall provide notice to the faculty at least five business days in advance of any routine meeting.
5. The Dean's office shall set the agenda. Any faculty member may recommend items for addition to the agenda.
6. The number equal to or greater than 51% of the eligible voting faculty shall constitute a quorum.
7. The Officer of the faculty shall have no voting privileges and shall be responsible for recording and distributing the minutes to faculty and any other administrative functions that may be required.

ARTICLE V

VOTING

Voting within all meetings within the College shall be carried out in the following manner unless otherwise specified within the committee or departmental structure:

Voting rights:

- I. Voting privileges will be granted to faculty members holding at least a 50% full-time employment contract at the College.
- II. All-faculty meeting voting:

- a. The faculty, by a simple majority (51%) vote of voting members in attendance (in person or by phone), may vote on any documents presented for voting.

III. Committee and departmental meeting voting:

- a. Voting shall be carried out as above.

Voting types:

I. Voting shall follow one of these methods:

- a. Voice vote, a show of hands, electronic voting or written secret ballot.
- b. The Dean or committee chairperson shall select a method of voting, but the membership can propose to call for a secret ballot on any motion.

Recording:

- I. Voting shall be recorded.

ARTICLE VI

COLLEGE ORGANIZATION

The College shall be organized into at least three academic departments:

1. The Department of Pharmaceutical and Biomedical Sciences: The Department of Pharmaceutical and Biomedical Sciences will include faculty holding an academic appointment in a field related to pharmaceutical and biomedical sciences.
2. The Department of Clinical and Administrative Sciences: The Department of Clinical and Administrative Sciences will include faculty holding an academic appointment in a clinical discipline in fields related to clinical and administrative sciences.
3. Department of Experiential Education: The Department of Experiential Education will include faculty holding an academic appointment in a clinical discipline in fields related to their experiential education responsibilities.

Each department shall establish a departmental mission statement and formulate and comply with goals supporting that mission, as well as the mission and goals of the College.

Each department shall operate independently under the guidance of a chairperson appointed by the Dean, with the recommendation and support of the departmental faculty.

The Department Chair will serve at the discretion of the Dean and carry out the responsibilities of the academic department including, but not limited to:

1. Provide leadership and governance to all faculty and staff appointed to the Department.
2. Recommend academic appointment and recruitment of departmental faculty as indicated by the departmental faculty search committee.
3. Assign teaching responsibilities to optimally deliver the professional curriculum.
4. Provide opportunities for and assisting each member of the faculty to achieve his/her professional development goals related to teaching, scholarly activity, and professional service.
5. Conduct annual and special evaluations of departmental faculty and staff as required by CNUCOP policy, and make recommendations pertaining to salary adjustments and personnel actions to the Dean.
6. Review the departmental pool of applicants for promotion and formulate recommendations for academic promotion to the Promotion Review Committee in the College.
7. Manage the departmental budget as directed by the Dean in accordance with CNUCOP policies.

The Department Chair may be assisted in his/her responsibilities by other faculty members appointed to serve as vice chair, program directors, or coordinators with other specific administrative functions. Such appointments are through approval by and action of the Dean and will be limited as described in the Bylaws.

ARTICLE VII

EXECUTIVE COMMITTEE

Duties:

1. Advise the Dean about matters related to the College and delivery of the curriculum.
2. Promote College success.

3. Provide input on financial decisions.
4. Develop and review policies.
5. Establish short and long-term goals that align with the strategic plan of the College and University.
6. Monitor and assess the College's level of performance in meeting its goals.

The Executive Committee shall consist of:

1. The Dean, who serves as chairperson.
2. Assistant or Associate Deans.
3. The Chair from each academic department.
4. Directors, who are invited on an 'as needed' basis.
5. One elected COP member of the Faculty Senate.
6. Additional members as assigned.

Minutes of each meeting shall be recorded and distributed to the faculty.

ARTICLE VIII

STANDING COMMITTEES

All standing committee appointments shall be effective at the beginning of each academic year.

The Dean, Assistant/Associate Deans, as well as Department Chairs, shall serve as non-voting ex-officio members on relevant committees, and the Dean shall nominate all chairs and vice chairs for standing committees.

Department chairs will solicit the interest of each faculty member within their department prior to committee assignments; faculty interest in serving on committees will then be taken into account when committee appointments are made. The appointments shall be reviewed by the Dean's Executive Committee and presented to the Dean for approval.

Standing committees shall report meeting minutes to the Dean's Executive Committee. A summary of committee activities will be reported to faculty on a monthly basis.

Appointments to each committee shall be for two years, and members shall not serve for more than two consecutive terms. However, if a current member expresses a desire to continue service on a committee, he/she may be reappointed from the pool of candidates.

Each standing committee shall consist of:

- a. Up to three members of the faculty from each academic department.
- b. A committee chair as appointed by the Dean from members of the committee. The Chair may not be the Dean, Assistant/Associate Deans, Department Chairs, or chair any other standing College committees. Appointment as chair shall be for one year.
- c. A committee vice chair, as appointed by the Dean, from members of the committee. The vice chair may not be the Dean, Assistant/Associate Deans, Department Chairs, or a vice chair for any other standing College committees. Appointment as vice chair shall be for one year. The vice chair may be appointed as chair of the same committee at the end of the one year term.

1. Admissions Committee

I. Duties:

- a. Screen, interview, and select qualified applicants for admission to the College.
- b. The Dean of the College of Dental Medicine will review the recommendations for acceptance, along with related materials from the Admissions Committee, to ensure the Code of Federal Regulations (Title 34 – Education), the State of California Code of Regulations, Commission on Dental Accreditation and WSCUC accreditation standards, as well as College admission policies, have been followed before approving applicants for acceptance to the College.

II. The Admissions Committee shall consist of the following additional members:

- a. A member from the University Admissions Office or other University representative.

Assessment Committee

I. Duties

- a. Develop and apply assessment methods to evaluate curricular outcomes.

- b. Propose recommendations to the Dean's Executive Committee concerning methods by which the quality of the program and its graduates may continually be evaluated.
- c. Review assessment methods currently employed and evaluate data obtained from both the didactic curriculum and experiential rotations.
- d. Evaluate student progress in achieving the educational outcomes of the College.

II. The Assessment Committee shall consist of the following additional members:

- a. A member from the Curriculum Committee.
- b. A second and third-year DMD student (D2 and D3). The committee chair will solicit for second and third-year DMD student members, and subsequently appoint student members to the committee.
- c. A member from the University's Office of Institutional Research, Quality, and Assessment.

Curriculum Committee

I. Duties

- a. Provide ongoing evaluations of the current curriculum in compliance with regulatory agencies (i.e., CODA).
- b. Continually appraise and evaluate the current dental medicine curriculum and outcome statements to identify opportunities for curricular revisions, additions, and/or other alterations to ensure optimal student learning and the achievement of learning outcomes.
- c. The Dean of the College of Dental Medicine will review the recommendations from the Committee to assure that the content of the curriculum and its delivery meet CODA and WSCUC accreditation standards and are consistent with program learning outcomes, and NABP competency expectations.

II. The Curriculum Committee shall consists of the following additional members:

- a. A member from the Assessment Committee.
- b. A member from Interprofessional Education (IPE) Committee.

- c. One non-faculty preceptor.
- d. A second and third-year DMD student (D2 and D3). The committee chair will solicit for second and third-year DMD student members, and subsequently appoint student members to the committee.

Faculty Development, Orientation, and Mentoring Committee

I. Duties:

- a. Make recommendations to the Dean regarding faculty development needs.
- b. Develop and implement special programs intended to promote faculty development.
- c. Develop a Faculty Development Program in accordance with the strategic goals of the College.
- d. Arrange a series of faculty development seminars and workshops at least four times annually.
- e. Create a list of faculty mentors and encourage junior faculty members to select a mentor from the College's faculty.
- f. Identify external mentoring programs or courses offered outside the college or university.

Professional and Academic Standards Committee

I. Duties:

- a. Monitor the academic progress, performance, and professional behavior of students to ensure student compliance with the Honor Code in the Doctor Dental Medicine degree program.
- b. Make recommendations to the Dean regarding any of the following courses of action relating to the student's standing in the program:
 - i. Remediation
 - ii. Academic Progression
 - iii. Academic Probation
 - iv. Leave of absence
 - v. Dismissal from the College

College of Dental Medicine By-Laws – April 2019

6. Promotion Review Committee

I. Duties:

- a. Review the criteria, standards and guidelines that are considered when determining if a faculty member is eligible for promotion.
- b. Provide an annual workshop on promotion guidelines and procedures for the faculty.
- c. The Promotion Review Committee decision process will conform to the Promotion and Tenure Policy and the Faculty Handbook.

7. Research Committee

I. Duties

- a. Develop policies for:
 1. Research initiatives
 2. Use of shared laboratories and equipment
 3. Allocation of equipment
- b. Make recommendations to the Dean for the purchase of laboratory equipment, space allocation, and design of laboratories.
- c. Help organize annual CNU Research Day
- d. Contribute to the review and the selection of Summer Research Fellows

8. Scholarship and Award Committee

I. Duties:

- a. Develop criteria for all student, faculty, preceptor, and staff awards.
- b. Solicit for and receive nominations for various student scholarships and awards.
- c. Make annual recommendations to the faculty on student credentials in satisfying the requirements for sponsored awards.
- d. Review nominations and select the scholarship and/or award recipients

- e. Make recommendations to the Dean on additional scholarship funding and awards.

ARTICLE IX

BYLAWS AMENDMENTS

Review of the College Bylaws shall occur at least every three years.

Ratification or Approval

- I. Amendments of Bylaws shall require two-thirds majority vote of the voting faculty.

Other College-level committees:

- I. Faculty Search Committee
- II. Seed Grant Committee

Other CNU committees:

- I. Please refer to individual bylaws of CNU committees.

Appendix 3-3 Diagram Outlining CDM Decision Making

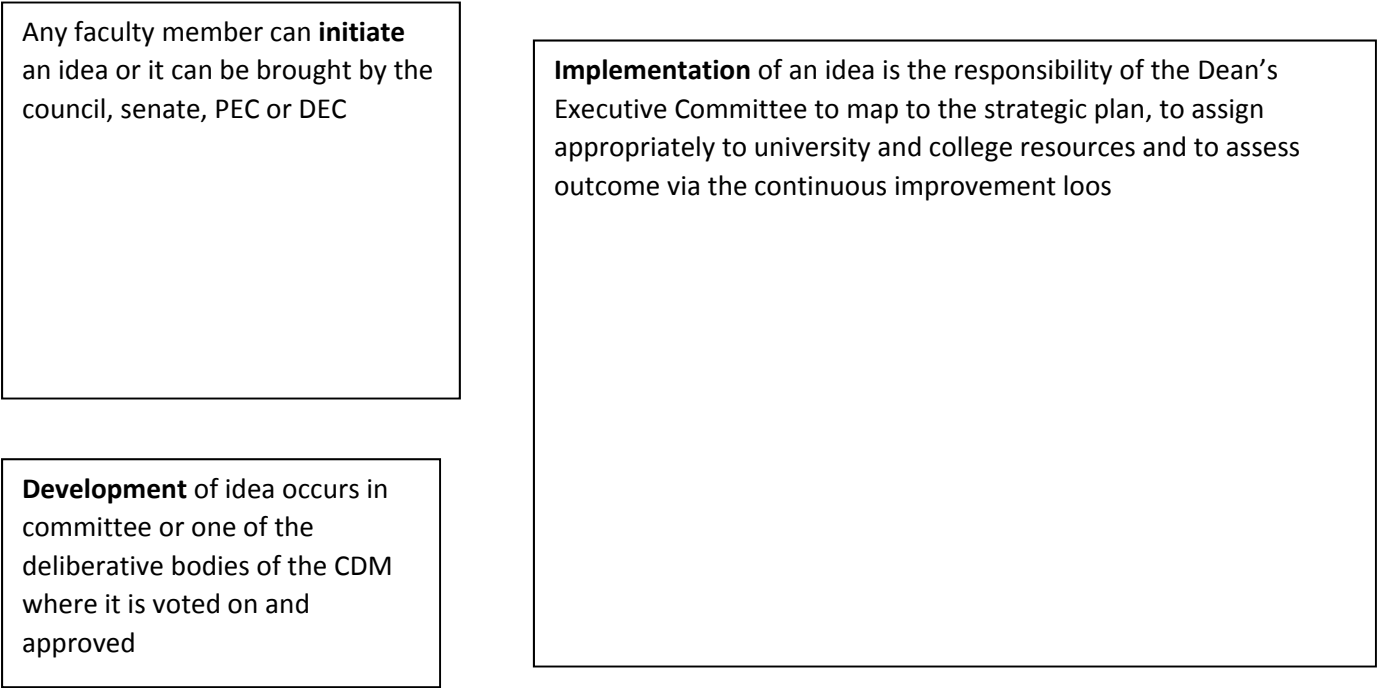

**Decision Making Diagram for College of Dental Medicine**

Action consists of:

1. Initiation
2. Development
3. Implementation

Below represents how this flowchart is implemented to produce faculty governance

CALIFORNIA NORTHSTATE UNIVERSITY

FACULTY SENATE BYLAWS

ARTICLE 1 - NAME OF ORGANIZATION

Section 1.1 Name.

The name of the organization shall be California Northstate University Faculty Senate ("Faculty Senate").

ARTICLE 2 - PURPOSE

Section 2.1 Purpose.

The Faculty Senate will participate in shared governance in matters that affect the institution's academic operations of teaching, scholarship, and service. The Faculty Senate will also have an advisory role in other matters concerning the mission, vision, welfare, and performance of the institution. The Faculty Senate serves as a representative voice for the Faculty.

"Shared governance" as applied to the University community in general is defined as the process of the council, committee, or person responsible for making a decision obtaining input and feedback when appropriate from various other constituencies of the University community, so that an informed decision can be made; shared governance does not necessarily mean that a particular constituency is part of the actual final decision making process.

The Faculty Senate's role in shared governance will be to review academic and faculty policies, procedures, and regulations, and seek consensus, provide input, or recommend actions regarding these issues as they affect the Faculty in the following areas:

- Educational standards
- Academic standards and student achievement
- Faculty qualifications

- Faculty recruitment, rank and promotion, and retention
- Faculty development and career progression
- Academic resources and staffing
- Scholarly activities including research
- Policies relating to standing committees, *ad hoc* committees, task forces, and faculty search committees
- Long range strategic planning and development regarding the University

ARTICLE 3 - MEMBERSHIP AND ELECTION

Section 3.1 Membership.

The Faculty Senate shall consist of a maximum of three (3) Members from each College of California Northstate University. Due to differences in the size of the Colleges, a guideline for membership number for Senate based on full-time employment (FTE) totals in a given College is provided below (the maximum number of members from any College will be three (3)):

- i) At least one (1) member for Senate if the College has 1 to 10 FTE.
- ii) At least two (2) members for Senate if the College has 11 to 20 FTE.
- iii) Three (3) members for senate if the College has 21 or more FTE.

Section 3.2 Qualifications.

To be eligible to be a member of the Faculty Senate, an individual:

- a. Shall hold a faculty appointment in one of the Colleges of California Northstate University; and
- b. May not hold the position of President, Vice-President, Senior Vice-President, Executive Vice-President, Assistant Vice-President, Dean, Vice-Dean, Associate Dean, Assistant Dean, Department Chair, or Trustee, or a position equivalent to or higher than any of these positions.

Section 3.3 Selection for Membership.

Members of the Faculty Senate must be selected by their respective College and meet the eligibility requirements set forth in Section 3.2 of these Bylaws. Selection can be done by a majority vote of the faculty body of the respective College or can be done by the appointment by the Dean of the respective College. The selection process should occur between June 1 and June 30 so members can start their term July 1.

Section 3.4 Term of Office.

Members of the Faculty Senate shall serve terms of two (2) years. A member's term shall begin on July 1 following the member's election, and shall continue until June 30 of the calendar year two (2) years after the member's election. A member shall hold office until the member's successor is elected, or until the member's earlier resignation, removal, or other inability to continue to serve.

Section 3.5 Staggered Terms.

The terms of the members of the Faculty Senate shall be staggered such that one or two members shall be elected by each College in June of each year. Notwithstanding the provisions of this Section 3.5, the initial members of the Faculty Senate shall modify their initial terms by agreement, shortening the terms of one member from each College in order to accomplish the staggering of terms required by this Section.

Section 3.6 Term Limits.

A member of the Faculty Senate may serve for no more than two (2) consecutive terms.

Section 3.7 Resignation, Removal, and Filling, Vacancies.

A position on the Faculty Senate shall be declared vacant upon the member's resignation, removal, incapacity, disability, or death. A member may resign at any given time by giving written notice to the Chair of the Faculty Senate, except the Chair's resignation shall be given to the Faculty Senate as a whole. A member of the Faculty Senate may be removed by a two-thirds (2/3) majority of a quorum of a meeting of the faculty body of the College that elected such member. Any vacancy occurring on the Faculty Senate shall be filled by nomination and election by the faculty body of the departing member's College as set forth under Section 3.3 of these Bylaws, without regard to the timing thereunder. The newly elected member shall complete the unexpired term of the predecessor. A member elected to complete the term of a departing member shall be considered to have served a complete term if the remaining term of office at time of election is one and a half years or more in length.

ARTICLE 4 - OFFICERS

Section 4.1 Designation.

The officers of the Faculty Senate shall be the Chair and Vice-Chair.

Section 4.2 Election and Selection.

The Chair and Vice-Chair shall be elected by the members of the Faculty Senate from among the members of the Faculty Senate at the first Faculty Senate meeting of each academic year, with the academic year beginning on each July 1. The offices of Chair and Vice-Chair shall rotate each year among the Colleges of California Northstate University. The Vice-Chair in any given year shall be from a different College than the Chair.

Section 4.3 Term of Office.

The term of office for the Chair and Vice-Chair is one (1) year. The Chair and Vice-Chair shall hold office until their respective successors are elected, or until the Chair or Vice-Chair's earlier resignation, removal, incapacity, disability, or death.

Section 4.4 Resignation, Removal, and Vacancies.

The offices of Chair or Vice-Chair shall be declared vacant upon their respective resignation, removal, incapacity, disability, or death. The Chair or Vice-Chair's resignation shall be given to the Faculty Senate as a whole. The Chair or Vice-Chair may be removed by a two-thirds (2/3) majority of a quorum of the Faculty Senate. A vacancy of the Chair shall be filled by the Vice-Chair. A vacancy of the Vice-Chair shall be filled by election as set forth under Section 4.2 of these Bylaws, without regard to the timing thereunder. The newly elected Chair or Vice-Chair shall complete the unexpired term of the predecessor.

Section 4.5 Duties of Chair.

The Chair shall:

- a. Preside over meetings of the Faculty Senate;
- b. Set the agenda for meetings of the Faculty Senate;
- c. Cause the minutes of the Faculty Senate to be taken and published to all Faculty of the University;
- d. Cause members of the Faculty Senate to be notified of meetings; and
- e. Serve as the principal representative of the Faculty to the Administration and other bodies.

Section 4.6 Duties of Vice-Chair.

The Vice-Chair shall:

- a. Preside over meetings of the Faculty Senate at which the Chair is absent;
- b. Perform the other duties of the Chair in the Chair's absence or other inability to do so;
- c. Perform additional duties as requested by the Chair; and
- d. Complete the term of the Chair in the event of a vacancy as set forth in Section 4.4 of these Bylaws.

It is anticipated that the Vice-Chair perform these duties in a manner that would allow the Vice-Chair to be a qualified candidate to succeed the Chair in the following academic year.

ARTICLE 5 - FACULTY SENATE MEETINGS

Section 5.1 Regular and Additional Meetings.

The Faculty Senate shall meet at least four times per year. Additional meetings may be called by the Chair of the Faculty Senate or by a majority of the members of the Faculty Senate.

Section 5.2 Notice of Meeting.

Written notice of each meeting of the Faculty Senate stating the date, time, and place of the meeting, and in the case of an additional meeting, the purpose(s) for which the meeting is called, shall be given to members of the Faculty Senate at least 10 business days before the meeting. Notice may be delivered either personally, by email or other electronic transmission, by facsimile, by United States mail, or by private carrier. Such notice shall be deemed completed when given, or in the case of delivery by United States mail or private carrier, on the business day after it is deposited for delivery.

If a particular matter of immediate urgency requires the calling of an additional meeting before the end of the 10 business day notice period described in the preceding paragraph, then the additional meeting shall be set promptly and in a manner that affords the most notice possible, and such notice must be given promptly and no later than 24 hours after the setting of the additional meeting.

A member may in writing waive notice of any meeting before, at, or after such meeting. The attendance of a Member at a meeting shall constitute a waiver of notice of such meeting, except where a Member attends a meeting for the express purpose of objecting to the meeting as not lawfully called or convened.

Section 5.3 Quorum.

A meeting of the Faculty Senate, in order to transact business, requires a quorum of attendance by: (1) a simple majority of the Members; and (2) at least one Member from each College. If a particular College has only one member on the Faculty Senate, the requirements of this Section may be satisfied by a proxy.

Section 5.4 Leadership of Meetings of the Faculty Senate.

The Chair of the Faculty Senate shall preside at meetings of the Faculty Senate. In the event that the Chair is absent from a meeting, the Vice-Chair shall serve as acting Chair.

Section 5.5 Agenda.

The Chair of the Faculty Senate shall set the agenda for meetings of the Faculty Senate. Any member of the Faculty Senate shall be permitted to request items for inclusion on the agenda of meetings of the Faculty Senate.

Section 5.6 Action at Meeting.

Meetings shall be conducted pursuant to *Robert's Rules of Order* or such other procedural rules as may be determined by the Chair. Any member at a meeting may request that an action be taken by vote of the members. Resolutions and motions for action shall be passed by a majority of those present, except when a higher percentage is required for such passage by these Bylaws.

Section 5.7 Action Outside of or Without Meeting.

Any vote required or permitted to be taken at a meeting of the Faculty Senate may be taken outside of or without a meeting if such vote is in writing delivered by the member to the Chair in accordance with the methods of delivery set forth in Section 5.2 of these Bylaws.

ARTICLE 6 - COMMITTEES

Section 6.1 Designation.

The Faculty Senate may nominate members to standing committees and other institutional committees of California Northstate University as specified in the governing documents of the University and the Bylaws of the various institutional committees.

Section 6.2 University Committee Membership.

Membership on committees of California Northstate University as set forth in the governing documents of the University is made upon appointment by the President of the University, the Board of Trustees of the University, the Deans of the Colleges of the University, or the Faculty Senate of the University, as set forth in the governing documents of the University and the Bylaws of the various institutional committees.

ARTICLE 7 - RECORDS

Section 7.1 Minutes.

The Faculty Senate shall keep as permanent records minutes of all meetings. A record of all actions taken with or without meetings shall also be included. The Chair of the Faculty Senate shall be responsible for designating a member of the Faculty Senate to take the minutes at each meeting. Final approved minutes shall be provided to an

individual designated by California Northstate University as the records keeper.

The Faculty Senate shall inform the faculty of important actions taken. The agenda, minutes, and supporting documentation of the Faculty Senate shall be considered open to inspection by all members of the University Faculty and shall be maintained in a place convenient for their inspection.

ARTICLE 8 - FIDUCIARY MATTERS

Section 8.1 Discharge of Duties.

Each member of the Faculty Senate shall discharge his or her duties: (i) in good faith, (ii) with the care a reasonably prudent person in a comparable position would exercise under similar circumstances, and (iii) in a manner that the individual reasonably believes to be in the best interests of California Northstate University and its faculty.

ARTICLE 9 - MISCELLANEOUS PROVISIONS

Section 9.1 Savings Clause.

Failure of literal or complete compliance with any provision of these Bylaws with respect to dates and times of notice, or the sending or receipt of the same, or errors in phraseology of notice of proposals, do not invalidate the actions or proceedings of the members at any meeting, as long as the members judge by majority vote that no substantial injury to the rights of members has occurred.

Section 9.2 Severability.

The invalidity of any provision of these Bylaws shall not affect the other provisions of these Bylaws, and in such event these Bylaws shall be construed in all respects as if such invalid provision were omitted.

Section 9.3 Interpretation with Law and Other Bylaws.

All Bylaws, policies, and actions of the Faculty Senate are intended to be, are believed to be, and shall be conducted in a manner that is in accordance with applicable federal, state, and local law; the Bylaws of the University, the Board of Trustees of the University, and the President's Executive Council; and the Bylaws of any other applicable governing organizations within the University.

Section 9.4 Authority.

The authority of the Faculty Senate is delegated from the University, and actions of the Faculty Senate reflect actions or recommendations to the University, in accordance with Section 2.1 herein.

ARTICLE 10 - AMENDMENTS OF BYLAWS

Section 10.1 Amendments.

The Bylaws of the Faculty Senate may be amended, repealed, or otherwise modified, in whole or in part, and new Bylaws may be adopted, by a vote of two-thirds (2/3) of all then current members of the Faculty Senate. The Faculty Senate approved amendment to the Bylaws shall then be approved by a collective two-thirds (2/3) of the faculty bodies (by a simple majority vote of all members within each respective faculty body) of the Colleges of California Northstate University.

Section 10.2 Approval of Amendments.

Any and all amendments, repeals, other modifications, and new Bylaws pursuant to Section 10.1 of these Bylaws require the approval of the President and the Board of Trustees of the University in order to take effect.

Appendix 3-4 Faculty Evaluation Form

THIS FORM IS TO BE USED ANNUALLY FOR ALL FACULTY FULL AND PART TIME AND FOR ALL ADMINISTRATORS.

Annual review of faculty will be based upon the following rubric using a Likert scale and the rubric below for assessment.

ADEA/AADSAS APPLICATION FORM

<https://www.adea.org/aadsas/>

CNUCDM is a member of the American Association of Dental School Application Service (AADSAS), the centralized application service for all dental schools. Applicants are able to apply electronically through the web. The application is processed, verified and forwarded to each college designated by the applicant. Once all the required elements of the application are received by the office of admissions the application is reviewed for a possible interview invitation based on the scores from the weighted Simplified Applicant Ranking for Interview Selection form. The invited applicants are then able to schedule an interview.

Interviews typically begin in August/September and continue through April/May of each application year. Many factors are considered in the CDM interview selection process. The best predictor of success in dental school is academic success in basic science courses. Therefore, the science GPA is the highest weighted factor in applicant evaluation. The Science GPA is linked with Cumulative GPA, DAT score and an evaluation of academic program score to create a total academic score for each applicant. Determining interview invitations requires the evaluation of all aspects of the application including; patient contact experience, community involvement, extra-curricular activities, personal statements, letters of recommendation, the student essay, and motivation.

The minimum requirement for admission to the CDM must be no less than 75% of the credits needed for a baccalaureate degree from a college or university accredited by an agency recognized by the United States Department of Education.

The CDM Catalog indicates the minimum academic requirement for admission.

Recruitment and selection of students for admission to CDM will not discriminate on the basis of race, color, gender, sexual orientation, religion, creed, national origin, age or handicap.

California Northstate University provides equality of opportunity in its educational programs for all persons, maintains nondiscriminatory admission policies, and considers for admission all qualified students regardless of race, color, gender, sexual orientation, religion, national or ethnic origin, citizenship status, disability, status as a veteran, age, or marital status.

Credits may be transferred only from dental schools and colleges accredited by CODA.

California Northstate University College of Dental Medicine Admissions Requirements

Minimum Requirements:

California Northstate University College of Dental Medicine prefers a baccalaureate degree from a regionally accredited, four-year institution within the United States; or a non-U.S. equivalent institution. Required minimum coursework:

- ☐ 2 semesters, 3 quarters, or 1 year of college level English (*IB or AP credits may be considered if they are accepted by the undergraduate program*)

*IB or AP credits not accepted for the
following:*

- ☐ 2 semesters, or 3 quarters, or 1 year of Biology with Laboratory
- ☐ 2 semesters, or 3 quarters, or 1 year of Inorganic (General) Chemistry with Laboratory
- ☐ 2 semesters, or 3 quarters, or 1 year of Organic Chemistry with Laboratory
- ☐ 2 semesters, or 3 quarters, or 1 year of Physics
- ☐ 2 semesters, or 3 quarters, or 1 year of college level Math (*Statistics and/or Calculus preferred*)
- ☐ 1 semester, 1 quarter, or 3 units of Biochemistry

Recommended Coursework, but not required:

	GPA	DAT
Preferred, Competitive Candidate	3.2	19
Minimum Accepted Requirements	2.8	17

Technical Standards:

The Technical Standards describe the essential abilities required of all candidates. Reasonable accommodation in achievement of the standards is defined under U.S. federal statutes applied to individuals with disabilities. Such accommodations are intended to support the successful completion of all components of the DMD degree.

Standards in five areas must be met by all candidates: Observation, Communication, Motor Function, Cognitive, and Professional.

1. Observation. Candidates are reasonably expected to:
 - ☐ Observe demonstrations and participate in experiments in the basic sciences.
 - ☐ Observe patients at a distance and close at hand.
 - ☐ Demonstrate sufficient use of the senses of vision, hearing, and smell and the somatic sensation necessary to perform a physical examination.
 - ☐ Integrate findings based on these observations and to develop an appropriate diagnostic and treatment plan.
2. Communication. Candidates are reasonably expected to:
 - ☐ Communicate in verbal and written form with health care professionals and patients, including eliciting a complete medical history and recording information regarding patients' conditions.
 - ☐ Perceive relevant non-verbal communication such as changes in mood, activity, and posture as part of a physical examination of a patient.
 - ☐ Establish therapeutic relationships with patients.
 - ☐ Demonstrate reading skills at a level sufficient to individually accomplish curricular requirements and provide clinical care for patients using written information.
3. Motor Function. Candidates are reasonably expected to:
 - ☐ Perform physical examinations and diagnostic procedures, using such techniques as inspection, perfusion, palpation and auscultation.
 - ☐ Complete routine invasive procedures as part of training, under supervision, using universal precautions without substantial risk of infection to patients.
 - ☐ Perform basic laboratory tests and evaluate routine diagnostic tool such as x-rays.
 - ☐ Respond in emergency situations to provide the level of care reasonably required of dentists.
 - ☐ Participate effectively in physically taxing duties over long hours and complete timed demonstrations of skills.
4. Cognitive. Candidates are reasonably expected to:
 - ☐ Measure, calculate, analyze, synthesize, extrapolate, and reach diagnostic and therapeutic judgments.
 - ☐ Recognize and draw conclusions about three-dimensional spatial relationships and logical sequential relationships among events.

Appendix 4-1 DMD Admission Requirements

- ☐ Formulate and test hypotheses that enable effective and timely problem-solving in diagnosis and treatment of patients in a variety of clinical modalities.
 - ☐ Understand the legal and ethical aspects of the practice of medicine.
 - ☐ Remain fully alert and attentive at all times in the clinical settings.
5. **Professionalism.** Candidates are reasonably expected to:
- ☐ Demonstrate the judgement and emotional stability required for full use of their intellectual abilities.
 - ☐ Possess the perseverance, diligence, and consistency to complete the College of Dental Medicine Curriculum and prepare to enter the independent practice of dentistry.
 - ☐ Exercise good judgement in the diagnosis and treatment of patients.
 - ☐ Complete all responsibilities attendant to the diagnosis and care of patients within established timelines.
 - ☐ Function within both the law and ethical standards of the dental profession.
 - ☐ Work effectively and professionally as part of the health care team.
 - ☐ Relate to patients, their families, and health care personnel in a sensitive and professional manner.
 - ☐ Participate effectively in physically taxing duties over long work hours, function effectively under stress, and display flexibility and adaptability to changing and uncertain environments.
 - ☐ Maintain regular, reliable, and punctual attendance for classes and clinical responsibilities.
 - ☐ Contribute to collaborative, constructive learning environments, accept constructive feedback from others, and respond with appropriate modification.

Letters of Recommendation

CNUCDM requires three letters of recommendation, including one (1) from a professor in the sciences (i.e., Biology, Chemistry, Physics), one (1) from a professor not in the sciences, and one (1) from someone who has known the applicant for a substantial amount of time (e.g., research principal investigator, shadowed dentist, volunteer coordinator, organization leader, work supervisor, etc.).

Admissions Committee Membership Criteria/Qualifications

Potential Admissions Committee members are presented to the Dean's Executive Council for their consideration and recommendation to the Dean. All admissions committee members are appointed by the Dean to an annual term that is renewable. Any person may be qualified to serve on the admissions committee including full and part time faculty, staff, students, and community members.

The committee makeup can vary, but will include

Assistant Dean of Student Affairs and Admissions (faculty) Chair

Admissions Officer (staff)

Full time faculty: 3 members

Part time faculty: 3 members

Community dentist/non faculty: 1 member

Student: 2 members

Staff/non-designated: 1 member

Community lay persons: 1 member

All appointees will attest to the following to determine their qualifications:

1. Commitment to confidentiality in all matters pertaining to admissions and with regard to all applicants.
2. Commitment to the recruitment of a diverse class of DMD students according to all policies and goals of CNU
3. Disclosing all general and specific conflicts of interest in the admissions process and the admission of individual students.

Appendix 4-4 Admissions Committee Membership Criteria

4. Recusal from any decision regarding an applicant for which there is a conflict of interest
5. Agreement to read all application materials completely
6. Agreement to not retain any notes or materials outside of the meetings of the committee
7. Ability and desire to attend all scheduled meetings of the admissions committee in person or via electronic means
8. Will not accept any item of value, gift, meals or other that could be construed as potentially associated to admissions to the CDM

Appendix 4-4 List of planned outreach

Outreach to Underserved Minority High School and College Students

Developing a continuous pipeline of qualified and diverse candidates for dental school and the health professions that begins with exposure in elementary school, and continues to foster and support interested participants through high school and college has always been one of the top priorities of CNUCDM Pipeline programs on which we will model the CNUCDM program. We are committed to build and expend the pipeline programs across racial, economic, ethnic, socio-demographic, and geographic lines that show potential upon graduation to improve delivery of health care services to under-served and minority populations. Based on its mission to serve the needs of the community in which it resides, CNUCDM has focused its diversity efforts, as will CNUCDM, on populations including:

- Latino/Chicano/Hispanic
- African-American/Black
- Samoan/Cambodian/Hmong/Laotian
- Students with U.S. military service experience
- Students with disadvantage socio-economic background

CNUCDM will develop extensive pipeline programs, including elementary schools, middle schools, high schools, community colleges, undergraduate programs, Prehealth clubs, community pipeline programs, reaching out to all diversity populations. CNUCDM believes that implementation of the pipeline programs will ultimately lead to enrollment of a diverse student population in the future that will provide a benefit to society of greater representation of minorities, not only among practicing dentists, but also among health professions educators, scientists, public health officials, health services researchers, health insurance executives, and health care policy makers.

Goals of CNUCDM Pipeline Programs:

- To provide early exposure and awareness of health care professions in underserved communities;
- To provide supportive educational and mentoring programs to promote diversity, inclusion;
- To foster interest and motivation to pursue Health Care Profession;
- To create learning environment and education pathways that foster cultural competency and opportunities for individuals of all backgrounds.

Appendix 4-4 List of planned outreach

To achieve the pipeline program goals, CNUCDM faculty, staff and student volunteers will model themselves on the successful CNUCOM program.

Mission Statement and Goals of the CNUCDM Admissions Committee

Mission Statement:

The mission of the CNUCDM Admissions Committee is to provide a diverse and highly qualified group (class) of students each year for matriculation into the student body of the CNUCDM, who will become competent, compassionate, and caring clinical dentists of strong character and high ethical standards who will serve the public and improve the health and well-being of society.

The CDM will have effective policies and practices in place, and will engage in ongoing, systematic, and focused recruitment and retention activities, to achieve mission-appropriate diversity outcomes among its students, faculty, senior administrative staff, and other relevant members of its academic community. These activities include the use of programs and/or partnerships aimed at achieving diversity among qualified applicants for medical school admission and the evaluation of program and partnership outcomes.

California Northstate University does not discriminate on the basis of race, color, national and ethnic origin, gender, sexual preference, or handicap in the administration of educational policies, admissions policies, financial aid, employment, or any other University program or activity.

California Northstate University admits qualified students with all the rights, privileges, programs and activities generally accorded or made available to students. All applicants must meet the criteria stated in the Student Handbook in order to be considered for admission. The Office of Admissions will implement a nationwide recruitment plan to attract and maintain a qualified and diverse applicant pool. Recruitment events include predoctoral career fairs, graduate fairs, and presentations to predental students and visiting health care advisors. During each academic year, the Office of Admissions plans to host Open Houses in the fall and spring. Recruitment is a vital component of the admissions process.

Ongoing efforts will be made to recruit applicants from minority groups by visiting schools and programs with a high percentage of students from minority groups.

Goals:

The goal of the CNUCDM Admissions committee is to recruit a highly-qualified and

Appendix 4-4 Mission Statement Admissions

diverse group of students who reflect the ethnic background of the state of California, particularly Northern California, and who possess integrity with the necessary empathy and caring attitudes for the provision of optimal dental healthcare.

Diversity must start by inclusion in our schools and universities. It is clear that people of different life experiences can enhance the life-learning opportunities of fellow students with different backgrounds. It is of extreme importance that diversity is a recognized benefit for our College of Dental Medicine. Diversity on a university campus benefits all students and research has shown that the overall academic and social effects of increased racial diversity on a university campus are likely to be positive, ranging from higher levels of academic achievement to the improvement of near- and long-term intergroup relations. Multiculturalism helps our students prepare for the real world. Students exposed to classmates, professors and mentors from different backgrounds are exposed to new viewpoints and perspectives, resulting in them becoming global thinkers and more open-minded.

Complaint/Grievance Policy Non-Academic

While at CNU, students may encounter situations that adversely affect relationships with others within CNU community. General complaints or concerns should be directed to the Associate/Assistant Dean of the Office of Student Affairs and Admissions (OSAA) who will advise students about the appropriate procedures to follow in resolving a general complaint or concern. An informal process of resolution will be sought unless the incidence is severe enough to warrant a formal hearing. This policy shall also apply to all discrimination, harassment, and sexual harassment reports and complaints that may arise in matters involving rights protected under legislation relating to equal opportunity in Employment and Education or any policy of CNU relating to sexual harassment. General grievances may also be made anonymously by sending a letter to the Associate/Assistant Dean of the OSAA, or by dropping a letter or note in the Suggestion/Complaint Box located in the classrooms and in the library resource center.

Informal Procedure

Students are encouraged to discuss and resolve nonacademic conflicts, including complaints of harassment, and/ or discrimination, with the individual involved before filing a formal complaint. The suggested time frame to discuss and resolve informal complaints is 10 days from the date of the incident. If the student is not satisfied with the outcome a formal complaint may be filed with the Associate/Assistant Dean of the OSAA.

Formal Procedure

The complaint must be in writing and should describe: the specific action(s) necessitating the complaint, a statement of facts supporting the complaint, actions sought in an informal resolution, and information about why the action did not lead to a satisfactory resolution prior to filing a formal complaint, if an informal process was utilized. The complainant must be willing to be identified as the accuser. The complaint must be signed and dated by the complainant and filed with the Associate/Assistant Dean for the OSAA within fourteen (14) days of the occurrence. A completed Complaint/Grievance form should be included with the letter. The form can be found on the school's website. All complaints will be investigated by a committee appointed by the Associate/Assistant Dean and handled in a confidential manner. Investigations will usually be completed within fifteen (15) business days from the receipt of the complaint. At the conclusion of the investigation, a report shall be provided to the individuals in the situation stating the findings and recommendations. The report will typically be provided within seven (7) business days from the conclusion of the investigation. In unforeseen circumstances, or due to the complexity of the investigation, time limits may need to be modified. If the outcome was not satisfactory, the complainant may appeal the decision of the committee to the Dean of the College. The written appeal request must be received in the Office of the Dean within five (5) business days from the written recommendation provided by the Associate/Assistant Dean for OSAA. The Dean shall provide a written final decision to the complainant within fifteen (15) business days from the receipt of the request. The decision of the Dean will be final. A confidential record or log of all complaints filed is kept by the Associate/Assistant Dean for the Office of Student Affairs and Admissions (OSAA). Anyone wishing to file a report may do so anonymously through the CNU website, <https://californianorthstateuniversity.formstack.com/forms/anonymousreportcnu>. If you are witnessing an emergency or crime, you should make the report to the proper authorities. This form should not be used to report an emergency or crime. Complaints related to accreditation or licensing standards, please see the Accreditation Information section of this catalog on page 9. Computer/Technical Sup

Financial Aid Information

2019-2020

College of Dental Medicine

2019-2020 Estimated Student Financial Aid Budget – Dental program*

	First year
Cost Estimate	DM1
Tuition	\$76,000.00
Student Association/ Support Fee	\$500.00
Student Disability/Liability Coverage Fee	\$54.00
Technology Fee	\$700.00
Books and Supplies	\$1,000.00
Orientation Fee	\$75.00
ADA/ASDA/ADHA Membership	\$143.00
Dental Lab Fee (Anatomy, Medical Skills, and Research)	\$500.00
CPR Fee	\$40.00
Instrument Management Fee	\$3,200.00
Optical Loupes	\$1,195.00
Tuition and Fees Only	\$83,407.00
Estimated other/optional Educational Related Costs	
Health Insurance	\$3,200.00
Laptop	\$1,100.00
Room and Board	\$20,230.00
Transportation	\$4,410.00
Cost of Attendance	\$112,347.00

The cost of attendance is the cornerstone of establishing a student's financial need, as it sets a limit on the total aid a student may receive for a given period of enrollment. The cost estimates provided above are subject to change and are not binding.

COSTS COVERED BY FINANCIAL AID

- Tuition and Fees
- Books and Supplies
- Health Insurance
- Room and board
- Transportation

COSTS NOT COVERED BY FINANCIAL AID

- Car purchase/payments
- Credit card payments
- Non-educationally related expenses
- Travel for job interviews/residency

- All students should live within a reasonable budget and eliminate unnecessary/spontaneous spending.
- Be mindful of the impact consumer debt while attending school may have on your ability to qualify for private financial aid.
- Pay bills on time and maintain a clean and clear credit report.
- Be conservative in borrowing for expenses beyond tuition and fees and borrow only what you really need

Financial Aid 101

What is Financial Aid?

Financial Aid is defined as assistance provided for the purpose of paying educational expenses. These expenses are described on page 1 of this packet. Assistance may come from various sources, and be of varying types:

- * *Grants*: generally, monies from a government program that do NOT require repayment.
- * *Scholarships*: generally, monies from an institution, private organization, or government programs that do NOT require repayment.
- * *Loans*: generally, monies from private lenders or government programs that MUST BE repaid.

What Financial Aid is available to me?

Types of assistance offered through CNU College of Dental Medicine are described in detail on the CNU Dental program website under the section entitled “Student Financial Aid Office” and then “Types of Assistance”. You may also access this site at <http://www.cnsu.edu/student-financial-aid-office/types-of-assistance/types-of-assistancem>

How is Financial Aid eligibility determined?

Eligibility for financial aid is determined by three important factors:

1. *Enrollment status*: an eligible financial aid recipient is one that is enrolled and attending at a minimum of 6 credits per semester, or otherwise considered to be enrolled at least half-time. This is subject to verification with the Office of the Registrar.
2. *Satisfactory Academic Progress*: an eligible financial aid recipient is one that continues to meet the academic progression requirements of the Dental program. This is subject to verification with the Office of the Registrar.
 - a. Verification of adherence to progression requirements is completed as the end of each academic year, or more frequently on a case-by-case basis.
3. *Cost of Attendance*: an eligible financial aid recipient is one who’s total financial aid award package does not exceed his/her applicable cost of attendance for the period of enrollment.

How do I apply for Financial Aid at CNU College of Dental Medicine?

Ensure all required forms and applications are received by the appropriate departments.

1. *Financial Options Statement*: the Financial Aid department requires this form from all enrolled students each semester to identify his/her preferred financing method for payment of tuition and fees.
2. *Student Financial Aid Application*: the Financial Aid department requires this form from all enrolled students each academic year who are financing tuition and fees with a private educational loan.
3. *Private educational loan promissory note*: the Financial Aid department requires completion of this application for all enrolled students who desire to use a private educational loan to assist with financing of educational expenses, **OR**
Installment payment plan contract: the Business Office requires completion of a contract for all enrolled students who desire to use an installment payment plan to pay tuition and fees

Features of Private Loans

- Low rates (variable and fixed based on credit scores).
- Most lenders have no fees.
- Many lenders offer additional options to reduce total loan costs.
- Repayment period: The loan repayment period varies by lender. A six-month grace period is available after graduation, enrollment drops below half time, or upon withdrawal from school.
- Loan repayment periods can range from 5 to 20 years.

Letter of Recommendation Request

Office of the Registrar
9700 West Taron Drive | Elk Grove, CA 95757
916-686-7400 | CNRegistrar@cnsu.edu

INSTRUCTIONS Save this PDF to your computer, open using Adobe Reader, complete, print, sign & submit to the recommender.

Family Educational Rights and Privacy Act (FERPA) requires the University to collect the student's written consent to release non-directory information (e.g. grades, rank, GPA, academic performance, etc.) from a student's education record. This form may be used to authorize the release of information for the purposes of a letter of recommendation, application to an educational institution, scholarship application, employment, etc. Students may also waive their

right to review the letter of recommendation. The waiver is permanent and may not be withdrawn.

To the student: This form should be completed and presented to the individual from whom you are requesting the recommendation.

To the recommender: This form must be fully completed and include the student's signature. It is recommended that you keep this form on file for at least one (1) year.

Appendix 4-9 Student Records (FERPA) Policy

Student Records (FERPA) Policy

I. Policy Statement

The Family Education Rights and Privacy Act of 1974 (FERPA), is a federal law which allow students access to their educational records while maintaining a certain degree of confidentiality. The purpose of FERPA is to keep students' records confidential, allow limited access of student records by third parties, and allow the student to challenge the accuracy of those records that are misleading or inaccurate.

In accordance with the Family Education Rights and Privacy Act 1974 (FERPA), students who are currently enrolled or who have been previously enrolled at California Northstate University are permitted to inspect certain aspects of their educational records, and/or withhold from release certain personally identifiable information.

The policy regarding student access to educational records does not include employment, medical or police records, confidential letters of recommendation if the student has waived the right to review them, professor's or administrator's personal records for their own use about students, parent's financial records, and other FERPA excluded records.

II. Purpose

California Northstate University, in accordance with the Family Education Rights and Privacy Act 1974 (FERPA), have established procedures for students to access their education records and for maintaining confidentiality of student records.

III. Scope/Coverage

This policy is applicable to all students, staff, and school officials as defined by this policy and FERPA.

IV. Procedure

- 1) To inspect and review the student's personal education records within 45 days after the day California Northstate University receives a request for access.
 - A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The use of the Request to Inspect Educational Records is preferred. If the records are not maintained by the school official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
 - The school official will make arrangements for access and notify the student of the time and place where the records may be inspected. A student is guaranteed a copy of the requested documents and arrangements will be made at a location within 50 miles of the student if the student is not within a reasonable distance to view the records at the University.

- 2) To request the amendment to the student's educational records that the student believes is inaccurate, or otherwise in violation of the student's privacy rights under FERPA
 - The student must submit a written statement clearly identifying the sections of the record that are being disputed and why it should be amended to the school official responsible for the record
 - If the school does not amend the record, the student will be notified in writing of the outcomes and the right of the student to a formal hearing regarding the proposed amendments.
 - If the outcome is still not resolved the student may place a personal statement within the record outlining the contested information.
- 3) To provide written consent to, before disclosure of, personally identifiable information (PII) from the student's record, except to the extent that FERPA authorizes disclosure without consent.
 - The school discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests or upon request from another school in which the student is seeking enrollment. A school official is a person employed by California Northstate University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee. A school official also may include a volunteer or contractor outside of California Northstate University who performs an institutional service or function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of PII from education records, such as an attorney, auditor, or collection agent or a student volunteering to assist another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for California Northstate University.

A complete listing, section 99.31 can be found at:

<https://ed.gov/policy/gen/guid/fpco/ferpa/index.html>.

- 4) To file a complaint with U.S. Department of Education concerning alleged non-compliance of the College to abide by FERPA requirements at the following address:

Admissions Advisory
CDMAdmissions@cnsu.edu

Fall 2018 CNU Counseling Usage

Policy of Mandatory Student Health Insurance

I. Policy Statement

California Northstate University (CNU) requires all students to have health insurance coverage meeting certain standards. An active health insurance is required due to the nature of the health care educational programs at CNU, in addition to the wellbeing of the students.

II. Purpose

To state the requirements of student health insurance coverage as a condition of enrollment for CNU.

III. Scope/Coverage

This policy is applicable to all enrolled CNU students.

IV. Procedure

- A. The health insurance coverage must include:
 1. Inpatient Care and Outpatient Care
 2. Urgent Care and Emergency Care
 3. Mental Health Care
- B. International students are required to subscribe to and maintain their enrollment with the school designated health insurance plan.
- C. New enrolled students are required to provide proof of health insurance coverages to the Student Affairs Office no later than **5 calendar days** before the start of orientation. Failure to provide proof of health insurance coverages by the deadline, students will not be allowed to attend orientation, the White Coat Ceremony, and may lose their seats if requirement is not met.
- D. Continuing enrolled students are required to provide proof of health insurance coverages to the Student Affairs Offices no later than **14 calendar days** before the first day of classroom instruction each semester. Failure to provide proof of health insurance coverages by the deadline, students will be subject to the following consequences:
 1. Students will be emailed with information of insurance carriers.
 2. Failure to enroll and pay the cost of the insurance premium in full will result in transcript hold, progression hold, registration hold, and library hold (student will not be able to check any materials out from the library).
- E. Students are expected to maintain health insurance coverages at all times as a student of CNU. If a student's health insurance coverage is lapsed, the student is required to contact the Student Affairs Office within 72 hours and must provide proof of insurance.

- F. Students will be randomly selected throughout the academic year to provide proof of health insurance coverage verification.
- G. When student is selected for health insurance coverage verification, student(s) will have 5 days to provide proof of insurance.

REVIEW: every two years (or more often if required)

Immunization Policy

The CNUCDM immunization policy was developed based on current CDC vaccination guidelines. The following requirements, related to conditions and/or immunizations, must be satisfied for matriculation.

To achieve academic success and be an active advocate for health, students should strive to achieve good physical and mental health themselves. It is expected that all routine medical, dental, and surgical care will be completed prior to matriculation. Students will be required to present proof of vaccinations before matriculation.

Documentation of required immunizations must be completed by a licensed health care provider. A health care provider is defined as a physician licensed to practice (MD or DO), a Licensed Nurse, or a Public Health Official.

Forms for documenting immunization requirements will be provided in the acceptance packet sent to the student. All immunization forms and copies of laboratory reports must be submitted in English.

Translations of documents must be certified. It will be acceptable to have an English translation of the documents certified as accurate by a member of the University community who is fluent in the document's original language.

Measles Mumps Rubella (MMR)

If you were born in 1957 or later and have not had the MMR vaccine, or if you don't have an up-to-date blood test that shows you are immune to measles or mumps (i.e., no serologic evidence of immunity or prior vaccination), get 2 doses of MMR (1 dose now and the 2nd dose at least 28 days later).

Varicella

If you have not had chickenpox (varicella), if you haven't had varicella vaccine, or if you don't have an up-to-date blood test that shows you are immune to varicella (i.e., no serologic evidence of immunity or prior vaccination) get 2 doses of varicella vaccine, 4 weeks apart.

Hepatitis B

Appendix 4-12 Immunization Policy

If you don't have documented evidence of a complete hepB vaccine series, or if you don't have an up-to-date blood test that shows you are immune to hepatitis B (i.e., no serologic evidence of immunity or prior vaccination) then you should

- Get the 3-dose series (dose #1 now, #2 in 1 month, #3 approximately 5 months after #2).
- Get anti-HBs serologic tested 1–2 months after dose #3.

Polio

Adults who are healthcare providers, who have never been vaccinated against polio, should get 3 doses of IPV:

- The first dose at any time,
- The second dose 1 to 2 months later,
- The third dose 6 to 12 months after the second.

Adults who are healthcare providers who have had 1 or 2 doses of polio vaccine in the past should get the remaining 1 or 2 doses. It doesn't matter how long it has been since the earlier dose(s).

Adults who are healthcare providers and are at increased risk of exposure to poliovirus and who have previously completed a routine series of polio vaccine (IPV or OPV) can receive one lifetime booster dose of IPV.

Influenza

Get 1 dose of influenza vaccine annually.

Tdap (Tetanus, Diptheria and Pertussis)

Get a one-time dose of Tdap as soon as possible if you have not received Tdap previously (regardless of when previous dose of Td was received).

Get Td boosters every 10 years thereafter.

Pregnant HCWs need to get a dose of Tdap during each pregnancy.

Meningococcal

Those who are routinely exposed to isolates of *N. meningitidis* should get one dose.

Additional Vaccines/Testing

Appendix 4-12 Immunization Policy

Clinical sites where students will be rotating may require additional vaccines. Students will be expected to comply with the clinical site's policy if it is in addition to what the College of Dental Medicine requires. Immunization status will be monitored by an outside agency that will maintain the student's medical record and inform the College of Dental Medicine's registrar if the student enters a non-compliant status.

Students allergic to some vaccines will need to provide medical evidence of that condition. They will then be required to adhere to a very strict protection regimen as required by the clerkship.

The immunization status of students will be maintained and monitored by an outside clinic with which the College of Dental Medicine will have contracted services. Students will be immediately notified of any upcoming dates when their immunizations expire and will be expected to be in full compliance in order to participate in the curriculum.

Patient Rights Policy

CNU College of Dental Medicine

CNU College of Dental Medicine’s Strategic Plan addresses clinical care outcomes with the following goals for patients:

Patients experience:

1. Patient-centered highest quality diagnostic, preventive and treatment services at the most reasonable cost with the best patient experience and treatment outcomes
2. Comprehensive oral health care in a dental medicine model integrated with overall health
3. Minimally invasive care utilizing the latest technology

To operationalize these Strategic Plan goals, the Patient Rights Policy ensures any patient of the CNU College of Dental Medicine can expect to have the right to the following hallmarks of quality care:

Considerate, respectful and confidential treatment: The relationship between patients, students, faculty, and staff is the first hallmark of quality care. Considerate, respectful care and confidential treatment are an inherent right associated with treatment at CNU College of Dental Medicine.

Patients have access to complete and current information about their condition: In order to make informed decisions regarding care and the progression of treatment, patients are entitled access to any and all information about their condition and their care. Patients who wish to have a copy of their treatment record and dental radiographs can request so in writing by completing an “*Authorization of Release of Protected Health information*” form.

Advance knowledge of the cost of treatment: There may be multiple treatment options to solve a specific dental need. Each option has a cost based on the complexity of care associated with that option. Patients have the right to know the cost of their preferred treatment option prior to initiation of treatment.

Explanation of recommended treatment, alternate treatment, the option to refuse treatment and the risk of no treatment: For an informed decision for one's treatment to be made, it is necessary to understand the various options of treatment available, including no treatment, and the risks associated with each option.

Informed consent: In order to begin treatment, a clear understanding of the patient's condition, the various treatment options available, the cost of each treatment option, and the risks associated with the options must be clear in order for an informed consent to be given prior to the start of treatment. It is a right of the patient to expect to have enough information provided in order to make an informed decision to give an Informed Consent for treatment.

Continuity and completion of treatment: Patients can expect every effort will be made to work to complete treatment in accordance with the treatment plan.

Emergency, incremental and total patient care: A patient can expect to receive care based on their needs and expectations whether it be only emergency care, incremental care to solve only a specific limited dental need, or total comprehensive oral health care.

Treatment that meets the standard of care in the profession: A patient has the right to receive care that meets the standards of care of the profession.

Access to a patient advocate: In the event there is some misunderstanding or challenge encountered during treatment, a patient can expect to have access to a patient advocate to help facilitate a resolution to that misunderstanding or challenge.

Each patient will be given a copy of their rights which will also be posted in the clinics as follows:

AS OUR PATIENT AT CALIFORNIA NORTHSTATE UNIVERSITY, YOU HAVE THE RIGHT TO:

Considerate, respectful and confidential treatment: Considerate, respectful care and confidential treatment are your inherent right associated with treatment at CNU College of Dental Medicine.

Access to complete and current information about your condition: In order to make informed decisions regarding care and the progression of treatment, you are entitled access to any and all information about your condition and your care. If you wish to have a copy of your patient record and dental radiographs you can request so in writing by completing an "Authorization of Release of Protected Health information" form.

Advance knowledge of the cost of treatment: There may be multiple treatment options to solve a specific dental need. Each option has a cost based on the complexity of care associated with that option. You have the right to know the cost of your preferred treatment option prior to initiation of treatment.

Explanation of recommended treatment, alternate treatment, the option to refuse treatment and the risk of no treatment: For you to make an informed decision regarding your health, you have a right to learn the options of treatment available, including no treatment, and the risks associated with each option.

Informed consent: Before any treatment, a clear understanding of your condition, the various treatment options available, the cost of each treatment option, and the risks associated with the options must be clear in order for an informed consent to be given prior to the start of treatment. You have a right to have your questions answered regarding treatment. It is your right as the patient to expect to have enough information provided in order to make an informed decision to give an Informed Consent for treatment.

Continuity and completion of treatment: You can expect every effort will be made to work to complete treatment in accordance with the treatment plan.

Emergency, incremental and total patient care: You can expect to receive care based on your needs and expectations whether it be only emergency care, incremental care to solve only a specific limited dental need, or total comprehensive oral health care. You have a right to be seen if you have a dental emergency.

Treatment that meets the standard of care in the profession: You have the right to receive care that meets the standards of care of the profession.

Access to a patient advocate: *In the event there is some misunderstanding or challenge encountered during treatment, you can expect to have access to a patient advocate to help facilitate a resolution to that misunderstanding or challenge.*

CNU College of Dental Medicine

Patient-Centered Care Policy

CNU College of Dental Medicine Clinical Care Outcome Goals:

Patients experience:

- Patient-centered highest quality diagnostic, preventive and treatment services at the most reasonable cost with the best patient experience and treatment outcomes
- Comprehensive oral health care in a dental medicine model integrated with overall health
- Minimally invasive care utilizing the latest technology

Clinic Mission Statement

To provide patient-centered, evidence-based, oral healthcare in a humanistic educational environment.

The purpose of the Clinic Mission Statement is to ensure the focus of faculty, staff and students is on the delivery of excellent patient care. It is the College's goal to strive to provide excellent care to patients and an exceptional education experience for students. The focus on excellent patient care provides the foundation of an excellent clinical learning opportunity for our students. At any time when faced with the a difficult decision regarding care and teaching effectiveness, the guiding principle will be that whatever is best for that patient facing the difficult decision will take precedence.

The foundations of the Clinic Mission Statement are built on the following principals of patient care and quality education:

Patient-centered care requires that the interaction between the patient, student, faculty and staff be conducted in a considerate and respectful fashion while maintaining appropriate confidentiality. Patient-centered care also requires continuity of care and completion of treatment. In order for the patient to make a well informed decision, we will strive to provide current and complete information about his/her condition and their

treatment needs. Treatment decisions will be based in large part on the patient's values and expectations for their care.

Evidence-based care involves the use of scientific evidence to help make treatment decisions. It is used in conjunction with the patient's values to determine the best course of action for each patient.

Quality oral healthcare involves providing treatment for our patients that meets the standards of care for all procedures provided. It also means providing care to patients who have different wants, needs, and expectations. To help inform those wants, needs and expectations involves providing a clearly presented and full discussion of the treatment options, the risks and benefits of the various options including the option of no treatment, and expected outcomes of the different options.

Humanistic education is a health care educational model based on positive interactions and honest communication between faculty, staff, and students that sets clear expectations and rewards diligent effort. The educational environment will be structured to be intellectually challenging, evidenced-based, and progressive in content. There is the expectation that faculty and staff will provide positive support for diligent efforts made by each student. Humanistic education involves treating all people with dignity and respect. Faculty and staff are expected to model the highest professional standards for both patients and students. Students are expected to set equally high standards for their behavior and efforts as well.

Policy

The actions and decisions made by students, faculty, and university employees will be the result of the interactions between the patient, and the students, and university employees (faculty, managers, and staff). The actions and decisions relative to each patient will focus on the provisions of patient-centered care as described in the Clinic Mission Statement.

Appendix 5-2 Quality Assessment Committee

The Quality Assessment Committee will be comprised of the following members of the faculty and staff:

Charge:

The Quality Assessment Committee will be charged with developing the assessment directly or through subcommittees for

1. Infection and biohazard control assessment,
2. Patient record quality and safety assessment,
3. Development of and compliance with standards of care
- 4 Concurrent case review
5. Appointment and credentialing of faculty dentists
6. Systematic review of quality measures
7. Other assessment duties it deems necessary
8. Make recommendations to the Institutional Effectiveness Committee regarding the needed areas for annual assessment
9. Make recommendations to the Dean's Executive Committee regarding policies and resources to improve quality patient care.

Chair: Associate Dean of Clinical Affairs

Committee members:

Ex officio

Associate Dean of Curriculum and Clinical Education,
Clinic manager,
Dental Director of Clinic Operations,
Dental Director of Quality Assurance and Infection Control,

Additional members

Discipline Representatives for Radiology, Restorative Dentistry, Endodontics, Periodontics, Oral and Maxillofacial Surgery, Pediatric dentistry, Orthodontics, and other committee members as needed.

Two clinical staff representatives

Appointment and Terms:

Ex officio membership is continuous. All other members are for 3 year terms with unlimited renewal.

Meetings: Monthly as directed by the Dean of Clinical Affairs

Appendix 5-3 Standards of Care

The Clinical Quality Assessment Committee will be charged with the development of the schools standards of care and the implementation of those standards. The Clinical Quality Assessment Committee's composition of members was described earlier in Standard 5. This committee will be working under the leadership of the Assistant Dean of Clinical Affairs to fully define the college's standards of care. Standards of Care are established based on the standards of the general professional community in which one practices. The committee will utilize many sources to develop its criteria for assessing quality of care relative to the standards of care in the community. One resource for the committee will be the Guidelines for Assessment of Clinical Quality and Professional Performance of California Dental Association's Peer Review Council. The CNU Clinical Quality Assessment Committee will also rely on the expertise of the committee members and local community experts to help develop the CNU College of Dental Medicine standards of care guidelines and assessment criteria.

The Standards of Care guidelines will be implemented into its preclinical and clinical educational planning. The utilization of the standards of care in course planning ensures the educational outcomes lead to a patient-centered quality clinical care outcomes. The standards of care guidelines set clear goals and expectations for faculty, staff and most importantly our CNU students. As clinical care is being delivered, the standards of care define the expectations for clinical faculty in their assessment of the care delivered to patients on an ongoing basis. In addition, a clear understanding of the standards of care provides the basis for regular assessment of the quality of patient care as the College develops its program of Periodic Review of Care relative to the standards of care.

To summarize, there are several layers to the implementation and use of the CNU College of Dental Medicine's Standards of Care Guidelines once they are developed. The standards of Care guidelines will include the following:

- a. Development of preclinical and clinical educational course work
- b. Development and implementation of clinical outcome assessment and grading by clinical faculty in an ongoing and contemporaneous fashion on a daily basis during patient care.
- c. Development and implementation of periodic review and assessment of clinical outcomes in both episodic or regular focused reviews by staff or the Clinical Quality Assurance Committee

A Standard of Care for dental care, including dental surgical interventions, disease management must include the following elements:

Diagnosis	Planned Therapeutic Intervention	Risks	Factors effecting risk	Anticipated outcome	Quality measures

Documentation of findings associated with each Standard of Care will be presented to the Clinical Quality Assessment Committee to assure compliance with the standard and make recommendations regarding its utilization and improvement.

Herein is an example of application of a Standard of Care

Diagnosis	Planned Therapeutic Intervention	Risks	Factors effecting risk	Anticipated outcome	Quality measures
Impacted mandibular third molars	Odontectomy	Neurosensory deficit Osteomyelitis Osteitis Periodontal defect Fracture mandible Pain Edema Bleeding	Age Winter classification of impaction Smoking Substance abuse Antiosteoclastic drugs	Safe removal of third molar	Rate of adverse outcomes below reported standards including NS deficit < 1%

Appendix 5-6 BLS policies

Basic Life Support: It is required that all faculty involved in patient care at the CNU College of Dental Medicine must possess a current license to practice in the state of California. The Dental Practice Act of California mandates biannual certification of Basic Life Support as a requirement of licensure. It is required that all faculty maintain licensure including BLS certification.

It is required that all clinic staff directly involved in patient care maintain BLS certification.

Records of certification in BLS are maintained in the dental staff office.

Students will be required to be BLS certified in Year 1 as a component of the curriculum. All matriculating students and students completing the second year will be offered the BLS course at CNSU, first in Foundations of Odontology (Odont 511) and at the end of the second year in Local Anesthesia (OMFS 632). It is the student's responsibility to provide the signed BLS certification card to *myrecordtracker*.

CNUCDM will sponsor a BLS certification course each semester at CNU available to students faculty and staff at no cost.

CNU College of Dental Medicine

Dental Radiographic Imaging

Policy and Procedures

Proposed Feb. 2019

Not yet presented, reviewed, and adopted by Clinical Quality Assurance Committee

Recognizing that the College plays a significant role in maintaining radiation exposure of patients and staff, it is paramount to ensure training of dental students, staff and faculty and to have clear guidelines to keep radiation exposures As Low As Reasonably Achievable (ALARA). The College is committed to ensuring the health and safety of patients, students, staff, and faculty who may be subject to radiation exposure. This training ensures that exposures taken will meet the following criteria:

- a. Any exposures are justified in relationship to their potential benefits,
- b. Necessary exposures are kept as low as reasonably possible (ALARA).
- c. Doses received by patients, students, or staff are kept below the allowable limits
- d. Those trained will policy will demonstrate an understanding of the criteria for patient selection for radiographic exposure, the recommended frequency of exposing radiographs on patients, and the guidelines for retaking of radiographs utilizing the current accepted dental practice.

PATIENT PROTECTION

- A. Dental personnel are responsible for requiring that all individuals unnecessary to the dental radiographic examination leave the X-ray room prior to making an exposure.
- B. Anyone who is in the X-ray room at the time of exposure must be behind a protective barrier. If someone must also be in the room to assist or maintain patient safety, then this individual must wear a protective apron. The apron should be preferably 0.5 mm of lead or lead-equivalent but not less than 0.25 mm of lead or lead-equivalent thickness. Mobile protective barriers or shields should be available for dental personnel protection and should be used as indicated.
- C. A specially designed lead-impregnated thyroid collar can be used to protect the thyroid gland from excessive and/or unnecessary radiation during intraoral X-ray exposures. It is also highly recommended for panoramic, skull and CBCT exposures if the Velcro straps can be secured and kept out of the way of the primary beam or it does not cover an area of primary interest (e.g., if cervical vertebrae need to be included in an extra-oral image.)

Appendix 5-7 Ionizing Dental Radiation Safety Proposed Policy

- D. Lead Protective Aprons must be used to cover the reproductive organs of all patients, including pregnant patients, who undergo dental X-ray examinations. The American College of Obstetricians and Gynecologists recommends (August 2013) that those obtaining dental radiographs reassure patients that prevention, diagnosis, and treatment of oral conditions, including dental X-rays (with shielding of the abdomen and thyroid) and local anesthesia (lidocaine with or without epinephrine), are safe during pregnancy.
- E. Protective Aprons should be evaluated periodically (at least yearly) for tears and cracks. Seriously compromised aprons may have lead sheeting that is bunched up. This can be detected by feeling the lower portion of the apron.
- G. Proper storage of protective aprons prolongs their life and effectiveness. Aprons should be properly hung because creases eventually become cracks which allow radiation to penetrate.
- H. Protective aprons are primarily designed to protect the wearer from scatter radiation. They do not totally protect against the primary X-ray beam to provide enough protection. This is the reason why small beam (rectangular) collimation is preferred. The reduction in exposure resulting from placing 0.25 mm lead-equivalent apron material in a primary X-ray beam of 100 kVp would only be 60% as compared to 0.50 mm lead-equivalent apron that will attenuate the beam by 85%.

Responsibilities of Dental Personnel Operating X-ray Equipment

- A. Protect Patient from Unnecessary Radiation Exposure
 - a. Use appropriate radiation protective devices
 - b. For CCD and CMOS receptors (digital x-ray sensors) prepare the computer and imaging software prior to placement of the sensor to minimize errors and risk of unnecessary exposure
 - c. Retakes of images should be approved by a faculty supervisor and should be taken only for a valid clinical reason, not for the purpose of improving the esthetics of the radiograph
- B. Ensure proper infection control safety barriers, disinfection and sterilization protocols have been utilized prior to and during each patient's imaging session
- C. Recording of Radiographic Procedures
 - a. An entry which would include the date and type of exposure will be made in the patients dental record.
- D. Use Fast Image Receptors
- E. Pre-plan Dental Radiographic Procedures Carefully to avoid unnecessary Retakes
 - 1. The five of the most important factors relating to the production of quality radiographs are:
 - a. Patient positioning and instruction prior to taking the image
 - b. Alignment of the x-ray beam, film or sensor, and the area to be radiographed
 - c. Use of a collimating device
 - d. Selection of appropriate exposure factors (mA, kV, distance and time)
 - e. Proper and appropriate image processing (film or digital)
 - 2. As much as practical, the long axis of the body part being radiographed should be perpendicular to the main X-ray beam (called central ray or CR) and parallel to the image receptor (paralleling technique).

Appendix 5-7 Ionizing Dental Radiation Safety Proposed Policy

3. Use proper immobilization methods to assure that the patient does not move during exposure. Receptor holding instruments with beam alignment devices should be used instead of the patient retaining the image receptor with fingers.
4. Use an exposure time that is as short as possible to minimize the radiation dose and motion artifact during exposure.
6. All patient exposures procedures must be documented in the patient's record and the images should be properly labeled and the diagnostic information obtained from the radiographic images also should be recorded in the patient's record.

F. Protection of the Operator from Unnecessary Radiation Exposure

1. Operators of the imaging equipment are not permitted to hold patients or image receptors during exposure.
2. Operators should stand behind a protective barrier if less than 6 feet away from the patient and x-ray tube or must stand at least 6 feet away from the patient and x-ray tube not in the path of the primary beam.
3. Hand-held radiographic machines must have a backscatter shield provided by the manufacturer installed and in place (not broken, loose or missing) to be safe. While not required, the operator may choose to wear a lead apron for the purpose of added protection.

G. Upon completion of imaging session and prior to initiation of subsequent imaging session, perform the appropriate disposal of infection control barriers, apply the recommended disinfection procedures of the imaging equipment, and prepare any items to be sent for processing by Central Sterilization Department.

Selection of Patients for Dental Radiographic Examinations

American Dental Association and U.S. Food and Drug Administration

Revised 2012

These recommendations are subject to clinical judgment and may not apply to every patient. They are to be used by dentists only after reviewing the patient's health history and completing a clinical examination. Even though radiation exposure from dental radiographs is low, once a decision to obtain radiographs is made it is the dentist's responsibility to follow the ALARA Principle (As Low as Reasonably Achievable) to minimize the patient's exposure.

TYPE OF ENCOUNTER	PATIENT AGE AND DENTAL DEVELOPMENTAL STAGE				
	Child with Primary Dentition (prior to eruption of first permanent tooth)	Child with Transitional Dentition (after eruption of first permanent tooth)	Adolescent with Permanent Dentition (prior to eruption of third molars)	Adult, Dentate or Partially Edentulous	Adult, Edentulous
New Patient* being evaluated for oral diseases	Individualized radiographic exam consisting of selected periapical/occlusal views and/or posterior bitewings if proximal surfaces cannot be visualized or probed. Patients without evidence of disease and with open proximal contacts may not require a radiographic exam at this time.	Individualized radiographic exam consisting of posterior bitewings with panoramic exam or posterior bitewings and selected periapical images.	Individualized radiographic exam consisting of posterior bitewings with panoramic exam or posterior bitewings and selected periapical images. A full mouth intraoral radiographic exam is preferred when the patient has clinical evidence of generalized oral disease or a history of extensive dental treatment.		Individualized radiographic exam, based on clinical signs and symptoms.
Recall Patient* with clinical caries or at increased risk of caries**	Posterior bitewing exam at 6-12 month intervals if proximal surfaces cannot be examined visually or with a probe.			Posterior bitewing exam at 6-18 month intervals	Not applicable
Recall Patient* with no clinical caries and not at increased risk of caries**	Posterior bitewing exam at 12-24 month intervals if proximal surfaces cannot be examined visually or with a probe.		Posterior bitewing exam at 18-36 month intervals	Posterior bitewing exam at 24-36 month intervals	Not applicable
Recall patient* with periodontal disease	Clinical judgment as to the need for and type of radiographic images for the evaluation of periodontal disease. Imaging may consist of, but is not limited to, selected bitewing and/or periapical images of areas where periodontal disease (other than nonspecific gingivitis) can be demonstrated clinically.				Not applicable

Appendix 5-7 Ionizing Dental Radiation Safety Proposed Policy

TYPE OF ENCOUNTER	PATIENT AGE AND DENTAL DEVELOPMENTAL STAGE				
	Child with Primary Dentition (prior to eruption of first permanent tooth)	Child with Transitional Dentition (after eruption of first permanent tooth)	Adolescent with Permanent Dentition (prior to eruption of third molars)	Adult, Dentate or Partially Edentulous	Adult, Edentulous
Patient (New and Recall) for monitoring of dentofacial growth and development, and/or assessment of dental/skeletal relationships	Clinical judgment as to need for and type of radiographic images for evaluation and/or monitoring of dentofacial growth and development or assessment of dental and skeletal relationships.		Clinical judgment as to need for and type of radiographic images for evaluation and/or monitoring of dentofacial growth and development, or assessment of dental and skeletal relationships. Panoramic or periapical exam to assess developing third molars	Usually not indicated for monitoring of growth and development. Clinical judgment as to the need for and type of radiographic image for skeletal relationships.	
Patient with other circumstances including, but not limited to, proposed or existing implants, other dental and craniofacial pathoses, restorative/endodontic needs, treated periodontal disease and caries remineralization	Clinical judgment as to need for and type of radiographic images for evaluation and/or monitoring of these conditions.				

***Clinical situations for which radiographs may be indicated include, but are not limited to:**

A. Positive Historical Findings

1. Previous periodontal or endodontic treatment
2. History of pain or trauma
3. Familial history of dental anomalies
4. Postoperative evaluation of healing
5. Remineralization monitoring

Appendix 5-7 Ionizing Dental Radiation Safety Proposed Policy

6. Presence of implants, previous implant-related pathosis or evaluation for implant placement
- B. Positive Clinical Signs/Symptoms**
1. Clinical evidence of periodontal disease
 2. Large or deep restorations
 3. Deep carious lesions
 4. Malposed or clinically impacted teeth
 5. Swelling
 6. Evidence of dental/facial trauma
 7. Mobility of teeth
 8. Sinus tract (“fistula”)
 9. Clinically suspected sinus pathosis
 10. Growth abnormalities
 11. Oral involvement in known or suspected systemic disease
 12. Positive neurologic findings in the head and neck
 13. Evidence of foreign objects
 14. Pain and/or dysfunction of the temporomandibular joint
 15. Facial asymmetry
 16. Abutment teeth for fixed or removable partial prosthesis
 17. Unexplained bleeding
 18. Unexplained sensitivity of teeth
 19. Unusual eruption, spacing or migration of teeth
 20. Unusual tooth morphology, calcification or color
 22. Unexplained absence of teeth
 23. Peri-implantitis

****Factors increasing risk for caries may be assessed using the ADA Caries Risk Assessment forms (0-6 years of age and over 6 years of age).**

Guidelines for Prescribing Cone Beam CT imaging:

Cone beam CT imaging should be considered for cases in which intraoral or panoramic imaging are inadequate for proper diagnosis and/or treatment. The following position statements serve as guidelines for CBCT use in dentistry:

1. The use of cone-beam computed tomography in dentistry: An advisory statement; American Dental Association, JADA August 2012: [jada.ada.org/issue/S0002-8177\(14\)X6067-8](http://jada.ada.org/issue/S0002-8177(14)X6067-8)
2. Use of cone beam computed tomography in endodontics 2015 update; A joint position statement of the American Association of Endodontists and the American Academy of Oral and Maxillofacial Radiology: aae.org/specialty/wp-content/uploads/sites/2/2017/06/conebeamstatement.pdf
3. Position statement of the American Academy of Oral and Maxillofacial Radiology on selection criteria for the use of radiology in dental implantology with emphasis on cone beam computed tomography, June 2012: ncbi.nlm.nih.gov/pubmed/22668710
4. Clinical recommendations regarding use of cone beam computed tomography in orthodontics. Position statement by the American Academy of Oral and Maxillofacial Radiology In Oral Surg Oral Med Oral Pathol Oral Radiol 2013; 116:238-257: oooojournal.net/article/S2212-4403%2813%2900280-0/.

Bio-Hazard Exposure Incident Report

California Northstate University College of Dental Medicine

This report is to be completed by the clerkship faculty or supervising healthcare professional.

Name of Student _____

Name of Healthcare Facility _____

Location of Healthcare Facility _____

Date of Incident _____ Name of Clerkship/Preceptorship _____

Describe the incident:

CNU College of Dental Medicine

Exposure to Infectious or Environmental Hazards Policy

Mandatory educational sessions of standard and precautions for blood and airborne pathogens are provided during Orientation within the first week of the first year. Students will receive additional training in proper techniques and patient policies for procedures that involve potential exposure to blood prior to the clinical aspects of the program. The appropriate use of personal protective equipment such as gloves, face shields, gowns, masks, and hand washing will also be presented at these times. Additionally, all students will be expected to adhere to California Northstate University College of Dental Medicine's vaccination policy available in the student handbook.

Students must immediately report any occupational exposure incident to their supervising faculty member, Treatment Group Supervisor, or Dean of Clinical Affairs who will assist them in contacting the appropriate entities to follow the established protocol of that facility regarding occupational exposure incidents. In some circumstances, the costs incurred in dealing with occupational exposure incidents (such as testing) will be covered by the healthcare facility at which the exposure occurred. In some circumstances, the healthcare facility may refuse to bear financial responsibility for the exposure. For these cases, the College of Dental Medicine's supplemental policy that covers blood and bodily fluid exposure/needle-still will take effect.

Students should also be aware that if, in the course of the testing required by occupational exposure incident protocols, they test positive for potentially infectious agents such as AIDS, HIV, or TB, the Occupational Safety and Health Officer is required by law to report this information to the County Health Department.

In the event of an infectious and/or environmental disease or disability, the Director of Student Affairs, Admissions and Outreach will work with the student, on a case-by-case basis, to ensure student wellness and minimize time lost in educational activities.

Policy 4001
February 22, 2019

INFECTION AND ENVIRONMENTAL HAZARDS EXPOSURE CONTROL POLICY

I. Policy Statement

This policy is designed to prevent or minimize occupational exposure to blood and other potentially infectious materials as required by the blood borne pathogens regulation in California Code of Regulations, Title 8 (8 CCR), Section 5193.

II. Purpose

The purpose of this policy is to:

- A. Establish, implement, and maintain an effective exposure control plan for infectious and environmental hazards.
- B. Provide a safe and healthy learning and training environment for dental students, faculty, staff and volunteers.
- C. Minimize or prevent potential exposure, or transmission to infectious and environmental hazards.

III. Scope/Coverage

This policy applies to all students, faculty, staff and volunteers.

IV. Procedure

- A. All individuals who have potential occupational exposure to infectious bodily fluids and other potential infectious materials receive training on the epidemiology, symptoms, and transmission of blood borne pathogen diseases. The training program will also cover:
 - i. A copy and explanation of the Cal/OSHA blood borne pathogen standard.
 - ii. An explanation of methods to recognize tasks and other activities that may involve exposure to blood and other potentially infectious materials (OPIM), including what constitutes an exposure incident.
 - iii. An explanation of the use and limitations of engineering controls, work practices, and Personal Protective Equipment (PPE).
 - iv. An explanation of the types, uses, location, removal, handling, decontamination, and disposal of PPE.

- v. Information on the hepatitis B vaccine, including information on its efficacy, safety, method of administration, the benefits of being vaccinated, and that the vaccine will be offered free of charge.
- vi. Information on the appropriate actions to take and persons to contact in an emergency involving blood or OPIM.
- vii. An explanation of the procedure to follow if an exposure incident occurs, including the method of reporting the incident and the medical follow-up that will be made available.
- viii. Information on the post-exposure evaluation and follow-up that the employer is required to provide for the employee following an exposure incident.

Needle Stick or Blood-Borne Exposure Policy

In the event of a needle-stick incident or blood-borne exposure, the incident will be reported on an incident report form and to the supervising dentist. The student, faculty member or staff member exposed will immediately clean the skin and wound sites with soap and water, then report to the Emergency Department of a designated hospital associated to the clinical rotation. The Director of Student Affairs and Admissions must be informed by the student within 24 hours about the incident.

The Emergency Department staff will evaluate the type and severity of exposure and counsel the student on the risk of transmission to HIV, HBV and HCV. Post-exposure prophylaxis to HIV and HBV will be recommended in accordance with CDC guidelines.

The follow-up for the exposure will be provide by an appropriate health care Provider. The student will then follow up with the Director of Student Affairs, Admissions and Outreach.

Exposed individuals will be educated on these protocols as described as noted below. Visiting students will need to complete a required test based on CNUCDM's preventative techniques and post-exposure protocols before the clinical clerkship begins.

Visiting persons who are exposed will be informed about and will follow the same procedures and precautions as CNUCDM personnel.

Preventing exposure to infectious diseases and contaminated body fluids, and procedures to be followed in the event of exposure (e.g., universal precautions), will be a part of the Year 1 Orientation. It will then be covered in more detail in the Foundations of Dental Medicine course. As applicable, students will receive comprehensive training in laboratory safe practices including exposure to contaminated body fluids and tissues. Procedures to be followed and appropriate contact numbers in case of accidental exposure will be clearly posted in the research laboratory. Additionally, these topics will be reviewed with a special emphasis on standard precautions and the exposure protocols during the Comprehensive Care Family Dentistry courses. Finally, these topics will be reinforced in all clinical clerkships and clinical site orientation activities.

Staff and faculty will be informed during orientation regarding the parenteral exposure policies and their implementation.

The clinical affairs committee will monitor all parenteral exposures to contaminated fluids and perform a structured assessment of each case to determine the continuous use of appropriate policies and their modifications as needed to mitigate risk of further exposure.

Hazardous and Universal Waste Management and Disposal Plan

California Northstate University College of Dental Medicine 9700 West Taron Drive, Elk Grove, CA

This document describes the hazardous waste management and disposal procedures of this dental practice and all its locations. This dental practice is a small quantity generator, that is, it generates less than 1000 kg/month of non-acute/non-extremely hazardous waste.

Notes: (1) A local enforcement agency may provide forms which require the same information as contained in this plan. (2) Medical waste management is described in a separate plan.

☐ This dental facility has a Hazardous Waste ID Number: _____

Go to the state Department of Toxic Substances Control Web site for an application form, <http://dtsc.ca.gov/IDManifest/index.cfm>. In general, a dental practice will apply for a permanent state ID number because the practice does not generate greater than 100 kg of RCRA hazardous waste and/or one kg of acutely hazardous waste per calendar month. State ID numbers are owner and site-specific. A state ID number is not required if all hazardous waste is managed as universal waste.

The local enforcement agency: _____

Use this website, <http://cersapps.calepa.ca.gov/Public/Directory>, to identify your local enforcement agency.

This plan is reviewed at least annually and updated as needed. The local enforcement agency will be notified within 30 days of when this dental practice moves to another location or closes. The individual in this dental practice who is responsible for hazardous waste management is:

(Print name and title):

Dates plan reviewed:

_____	_____	_____
_____	_____	_____
_____	_____	_____

I. Hazardous Waste in a Dental Practice

A dental practice may generate the items/solutions listed below which can be categorized as hazardous waste.

- Solutions containing chromium
- Solutions containing greater than 2.9% formaldehyde
- Solutions containing glutaraldehyde or ortho-phthaldehyde (OPA) as main active ingredient
- Items/solutions containing mercury (for example, dental amalgam, fluorescent lamps, batteries, gauges)
- Items/solutions containing silver (spent fixer, patient x-ray films ready for disposal)
- Universal wastes such as electronic devices and non-empty aerosol cans

The law requires all businesses to determine whether the wastes that they generate are hazardous wastes. If you are uncertain, look to the item's safety data sheet and to these regulatory resources:

- Dental, Medical and Veterinary Offices: Managing Your Hazardous Waste, DTSC Fact Sheet, 2009, <http://bit.ly/2u2Xijq>
- Department of Toxic Substances Control – Generators web site, <http://bit.ly/2u3w8Jy>

II. Types and Management of Hazardous and Universal Waste

To the extent possible, a dental practice should manage hazardous waste as universal waste and recycle it. Universal waste is a category of hazardous waste that is commonly generated by households and businesses and has more relaxed regulatory requirements. Many of the hazardous waste generated by dental practices may be recycled and managed as universal waste. Refer to the following web site for a list of universal waste.

- Universal Waste, DTSC Fact Sheet, 2010, <http://bit.ly/2u39O2x>

Check appropriate boxes and fill in the blanks in sections A – G.

A. Solutions containing chromium

This dental practice ☐ does ☐ does not generate this waste.

The estimated average quantity of this waste generated monthly is _____ .

This waste stream cannot be managed as a universal waste. It must be disposed using a licensed hazardous waste hauler or a local household hazardous waste program.

B. Solutions containing greater than 2.9% formaldehyde

This dental practice ☐ does ☐ does not generate this waste.

The estimated average quantity of this waste generated monthly is _____ .

This waste stream cannot be managed as a universal waste. It must be disposed using a licensed hazardous waste hauler or a local household hazardous waste program.

C. Solutions containing glutaraldehyde or ortho-phthalaldehyde (OPA) as main active ingredient

This waste stream may be treated. State law (Health and Safety Code section 25123.5(c)) allows healthcare facilities to use glycine to neutralize waste glutaraldehyde and OPA disinfectant solutions onsite, without a permit or other authorization prior to disposal to the sanitary sewer.

If the dental practice wants to dispose of the solution as non-hazardous, it should have on file tests or other documentation that indicates it is not a hazardous waste in California.

This dental practice (*check the applicable boxes*):

- ☒ does not generate this waste.
- ☐ does generate this waste and:
 - ☐ treats it with glycine and disposes it to the sewer.
 - ☐ has documentation that the solution is not hazardous waste.
 - ☐ disposes it using a licensed hazardous waste hauler or a local household hazardous waste program.

The estimated average quantity of this waste generated monthly is _____ .

D. Items/solutions containing mercury

This dental practice (*check the applicable boxes*):

- ☐ does not generate this waste.
- ☒ does generate this waste and:
 - ☒ disposes it using a recycler or universal waste transporter.
 - ☐ disposes it using a household hazardous waste program.
 - ☐ disposes it using a licensed hazardous waste hauler.

Types of items/solutions containing mercury generated in this practice include:

- ☒ scrap amalgam, amalgam spills (capsules)
- ☒ chair traps and vacuum filters
- ☒ fluorescent lamps
- ☒ batteries
- ☐ other (*list*): _____

The estimated average quantity of this waste generated monthly is _____ .

E. Items/solutions containing silver

This dental practice (*check the applicable boxes*):

- ☐ does not generate this waste.
- ☒ does generate this waste and:
 - ☒ disposes it using a recycler or universal waste transporter.

- ☐ disposes it using a household hazardous waste program.
- ☐ treats spent fixer with silver recovery unit; ensures solution meets local POTW limit for silver before discharge to sewer; and disposes cartridge using a recycler or universal waste transporter.
- ☐ uses an xray film recycler to recover the silver.
- ☐ disposes it through a licensed hazardous waste hauler.

The estimated average quantity of this waste generated monthly is _____ .

F. Universal Waste

Types of universal waste not containing mercury generated in this practice: *(list mercury-containing universal wastes, such as lamps and batteries, in section D)*

- ☒ batteries
- ☒ computer hardware
- ☐ television, video or dvd player
- ☒ telephone equipment and cell phones
- ☐ non-empty aerosol cans
- ☐ other *(list)*: _____

Dental practices that are small quantity hazardous waste generators and manage all such waste as universal waste are not subject to rules for employee training, accumulation time, recordkeeping, or labeling.

G. Other Hazardous Waste

List other types of hazardous waste and estimate amount generated by this dental practice. Refer to the DTSC document, *Defining Hazardous Waste*, at <http://bit.ly/2vbOpTi>

III. Storage

A. Containers

Each type of waste has its own container and the containers are:

- Leak-resistant
- Rigid
- Non-reactive with the waste
- Closeable with tight-fitting lids
- If managed as hazardous waste, labeled with the following information:
 - the words “Hazardous Waste” and type of waste;
 - name and address of this dental practice; and
 - date waste accumulation in the container started
- If managed as universal waste, labeled with the following information:
 - the words “Universal Waste” and type of waste and
 - name and address of this dental practice
- Kept clean and in good repair
- Inspected weekly
- Stored in a secure area away from the public and potentially hazardous areas

Containers holding liquids are placed in secondary containers.

If using a hazardous waste hauler, this office follows additional instruction provided by the hauler.

Universal waste that is large in size, for example computer equipment or televisions, do not have to be placed in containers.

B. Accumulation and Storage Time

- California Hazardous Waste Generator Summary Chart, <http://bit.ly/2u3i02Q>

This dental practice generates non-acute, non-extremely hazardous waste in an amount less than 100 kg (220.5 lb) per month.

Once 100 kg of non-acute, non-extremely hazardous waste is accumulated, this dental practice disposes of the waste within 180 days. Whether or not 100 kg of non-acute, non-extremely hazardous waste is generated, this dental practice disposes of the waste within one year of the date waste accumulation started.

A dental practice with more than one location can designate one location as the consolidation point for the universal wastes from all of its locations.

Check box if applicable and provide information.

- ☒ This dental practice has more than one location and consolidates universal waste at this address:

C. Transportation

Only DTSC-registered hazardous waste transporters may transport hazardous waste from the dental practice.

The dental practice may ship universal waste to recyclers or transport universal waste to a recycler or local household hazardous waste program. When shipping or transporting universal waste, this dental practice ensures the waste is in appropriate containers and packaging to prevent breakage and leaks. This dental practice only transports the universal waste it generates.

Transportation of other generators' waste is prohibited except if this dental practice is registered as a waste transporter.

IV. Waste Vendors and Household Hazardous Waste

This dental practice disposes of hazardous waste through:

Check applicable boxes and complete information.

☐ **DTSC-registered hazardous waste transporter**

Company name _____

Company address _____

Company telephone number _____

Types of waste disposed: _____

☐ **DTSC-registered universal waste transporter**

Company name _____

Company address _____

Company telephone number _____

Types of waste disposed: _____

☐ **Mail or transport to a recycler or universal waste collection site**

Company name _____

Company address _____

Company telephone number _____

Types of waste disposed: _____

- ☐ **Transport to a local household hazardous waste program** (*not all programs accept waste from businesses*)

Agency name _____

Agency address _____

Agency telephone number _____

Types of waste disposed: _____

V. Other Requirements

A. Spills

This dental office keeps spill kits appropriate for use on spills of hazardous waste. Staff are trained on how to clean spills. Staff wear personnel protective equipment when cleaning a spill.

B. Closure Plan

The dental practice, upon closure or sale of the practice, will ensure all hazardous wastes are properly disposed.

VI. Documentation

Shipping and tracking documentation are retained for a minimum of five years.

Employee training on hazardous waste management is documented and the documentation is retained for up to one year after individual leaves employment.

These documents are located:

Checklist for Hazardous Waste Disposal

Equipment

- x Appropriate containers for individual hazardous wastes.
- x Secondary containers for liquid hazardous wastes.
- x Personal protective equipment.
- x Spill kits.

Employee Training Checklist

- x Informed of the person responsible for hazardous waste management in the office.
- x Instructed on what wastes are managed as hazardous or universal waste.
- x Instructed on labeling and use of containers.
- x Instructed on use of appropriate personal protective equipment when handling hazardous waste.
- x Instructed on how to clean up spills of hazardous waste.
- x Informed on how the practice disposes of waste. Provide additional training as needed.

Medical Waste Management and Disposal Plan

California Northstate University College of Dental Medicine
9700 West Taron Drive, Elk Grove, CA

This document describes the medical waste management and disposal procedures of this dental practice, a small quantity generator (*generates less than 200 pounds of regulated medical waste per month*). This document contains information required by the California Medical Waste Management Act, Health and Safety Code Sections 117600-118360. The MWMA is enforced by the California Department of Public Health (CDPH) and by designated local enforcement agencies. (*The local enforcement agency may provide forms which require the same information as contained in this plan.*)

(Go to the state Department of Public Health Web site for application form and list of local enforcement agencies, <http://www.cdph.ca.gov/certlic/medicalwaste/Pages/Generators.aspx>. Please refer to the "Waste Management Guide" and "Frequently Asked Questions" sections of the CDA Regulatory Compliance Manual for additional information on the management of regulated medical waste. This information is available on cda.org.)

This dental practice is registered as a small-quantity medical waste generator with: (*check appropriate box*)

☐ CDPH

☐ Local enforcement agency: _____

This plan is reviewed at least annually and updated as needed. The enforcement agency will be notified within 30 days of when this dental practice moves to another location or closes. The individual in this dental practice who is responsible for medical waste management is:

 (*Print name and title*)

I hereby certify that the information provided in this medical waste management plan is complete and correct.

 (*Signature of person named above and date*)

Plan reviewed:

_____	_____	_____
_____	_____	_____
_____	_____	_____

I. Definitions

Medical waste means any biohazardous, pathology, pharmaceutical, sharps, or trace chemotherapy waste not regulated by the federal Resource Conservation and Recovery Act of 1976. See Section 117690 of the MWMA for a detailed definition of medical waste.

A. **Biohazardous waste in a dental practice** includes:

- Waste material derived from the treatment of a human that is suspected of being infected with a highly communicable disease.
- Laboratory waste such as human specimen culture that are infected with pathogens that are infectious to humans.
- Waste that, at the point of transport from the dental practice or at the point of disposal contains recognizable fluid human blood, fluid human blood products, containers, or equipment containing human blood that is fluid.
- Waste containing discarded materials contaminated with excretion, exudate, or secretions from humans or animals that are required to be isolated by infection control staff, the attending dentist or the local health officer to protect others from highly communicable diseases.

B. **Pathology waste in a dental practice** means human body parts, with the exception of teeth, removed at surgery and surgery specimens or tissues removed at surgery or autopsy that are suspected by the dentist of being contaminated with infectious agents known to be contagious to humans or having been fixed in formaldehyde or another fixative.

C. **Pharmaceutical waste in a dental practice** does not include controlled substances. Disposal of controlled substances must be managed through a “reverse distributor” registered with the DEA.

D. **Sharps waste** means a device that has acute rigid corners, edges, or protuberances capable of cutting or piercing, including, but not limited to, hypodermic needles, hypodermic needles with syringes, blades, needles with attached tubing, acupuncture needles, root canal files, and broken glass items used in health care such as Pasteur pipettes and blood vials contaminated with biohazardous waste.

Medical waste does not include (1) disposal items, such as gauze or cotton, soiled with nonfluid blood or saliva, (2) teeth not meeting the definition of biohazardous waste, or (3) urine, feces, saliva, sputum, nasal secretions, sweat, tears, or vomitus, unless it contains visible or recognizable fluid blood. These items are not considered “regulated medical waste” as defined above and may be disposed as regular solid waste. Such items should be disposed in regular solid waste containers. (MMWA §§ 117690, 117700)

Note: With respect to extracted teeth, neither Cal/OSHA or the MWMA prohibit dentists from giving patients back their own extracted teeth. ***Teeth containing amalgam or other heavy metal should managed either as universal waste or hazardous waste and never be discarded as regulated medical waste or solid waste.***

Criteria D and Standard 1-5 (Financial Resources): The long and short-term financial commitment of the institution to the program is documented.

The reviewers noted that the financial information provided in the application does not match with what was stated in the application. For example, the sum of the tuition revenue does not appear to align with the application information; additionally, clinic revenue does not appear accurate since students will not be significantly participating in the clinical setting in the first two years of the program. Additionally, the reviewers request clarification on the details of student tuition and fees, and information on how the instrument program will be funded.

Response:

There has been many revisions of the tuition revenue and the latest version was not reflected in the reports. The revised budget is displayed below. As shown in the Cost Estimate table, tuition in year 1 is set at \$76,000.00. The College of Dental Medicine is on a calendar cycle. As indicated in the budget below, total tuition revenue for Year 1 is \$3,040,000 (\$76,000/2=\$38,000 * 80 students) as outlined in red below. Year 1 has an anticipated start date in September 2020 upon CODA approval.

The clinical revenue is projected to generate revenue in year 2022 as outlined in blue below. By year 2022, students in their third year would be participating in the clinical setting along with faculty through the Faculty Practice Plan.

The table below presents the tuition and fees associated with the Dental Medicine program with projected estimated costs for Year 1 through Year 4. The College of Dental Medicine is going to purchase the instrument dental kit and lease it to students. The dental instrument lease and maintenance fee will be amortized over 4 equal payments as outlined in green below. Students will own these dental instrument kits upon graduation.

The estimated cost of study table below will be posted on the college's website for prospective applicants after the college has received CODA approval to begin instruction. Further, potential students on interview day will be briefed on the total cost of study as part of the Financial Aid presentation to ensure full disclosure.

	Year 1	Year 2	Year 3	Year 4
Cost Estimate	DM1	DM2* (estimated in inflation factor 2%) (range 0-5%)	DM3* (estimated in inflation factor 2%) (range 0-5%)	DM4* (estimated in inflation factor 2%) (range 0-5%)
Tuition	\$ 76,000	\$ 77,520	\$ 79,070	\$ 80,652
Student Association/ Support Fee (pass through fee)	\$ 500	\$ 500	\$ 500	\$ 500
Student Disability/Liability Coverage Fee (pass through fee)	\$ 54	\$ 55	\$ 56	\$ 57
Technology Fee	\$ 700	\$ 714	\$ 728	\$ 743
Books and Supplies (pass through fee)	\$ 1,000	\$ 1,020	\$ 1,040	\$ 1,061
Orientation Fee	\$ 75	\$ -	\$ -	\$ -
ADA/ASDA/ADHA Membership (pass through fee)	\$ 143	\$ 146	\$ 149	\$ 152
Dental Sim Lab Fee	\$ 500	\$ 510	\$ 520	\$ 531
CPR Fee (pass through fee)	\$ 40	\$ 40	\$ 40	\$ 40
Instrument Lease and Maintenance Fee (pass through fee) (total lease and fee amortized over 4 equal payments - student will own the instrument kit upon graduation)	\$ 4,000	\$ 4,000	\$ 4,000	\$ 4,000
Optical Loupes (pass through fee)	\$ 1,195	\$ -	\$ -	\$ -
Total Estimated Tuition and Fees	\$ 84,207	\$ 84,505	\$ 86,104	\$ 87,736
Total Estimated Cost for 4 year CDM degree Tuition and Fees:				\$ 342,552
Estimated other/optional Educational Related Costs	DM1	DM2	DM3	DM4
Health Insurance	\$ 3,200	\$ 3,200	\$ 3,200	\$ 3,200
Laptop	\$ 1,100	\$ 1,100	\$ 1,100	\$ 1,100
Room and Board	\$ 20,230	\$ 20,230	\$ 20,230	\$ 20,230
Transportation	\$ 4,410	\$ 4,410	\$ 4,410	\$ 4,410
Total Estimated Cost of Attendance per year	\$ 113,147	\$ 113,445	\$ 115,044	\$ 116,676
Total Estimated Cost of Attendance for 4 year CDM Degree Program				\$ 458,312

Criteria E: Contractual agreements are drafted and signed providing assurance that a program dependent upon the resources of a variety of institutions and/or extramural clinics and/or other entities has adequate support.

The reviewers request additional information on how the shared basic sciences content is managed between departments within the University. It was noted that the dental program will compensate the medical program \$400,000 per year for support of basic sciences. If an agreement or memorandum of understanding is in place, please provide the supporting documentation.

Response:

We have realized by your question that the method of reporting the potential participation of faculty in delivering CDM curriculum and the \$400,000 set aside for this purpose created some confusion. We have addressed this in two ways that should better describe what was intended. First we have provided the MOU between CDM, the University, and all the college deans demonstrating the combined willingness between the colleges to assist CDM's delivery of integrated health curriculum. The specific areas of interest specific to the interrelationship of the whole body on the orofacial complex are being identified and addressed in the curriculum syllabi that have been developed since the Commission asked for more specificity that was previously provided. These syllabi are included in the Exhibits. (See Exhibit D)

Secondly, the CDM budget has been adjusted to reflect projected spending for 60 faculty by year 4 of the program. As it was previously written as "at least 42 of 60 FTEs will be faculty responsible for the curriculum in dental medicine..." created the concern for how the other faculty or their colleges might be compensated for their contribution to the CDM curriculum delivery. The details by for how best to allocate faculty time identified responsible for curriculum delivery, and compensation are still being identified. At the time of the site visit we anticipate better clarity and can report at that time the further development and decisions in this regard. (See Exhibit B)

Criteria I: The first-year curriculum with general course and specific instructional objectives, learning activities, evaluation instruments (including, as applicable, laboratory evaluation forms, sample tests, quizzes, and grading criteria) is developed.

- The reviewers noted that courses are under development; however, tests and quizzes were lacking.

Tests and quizzes are currently under development for the integrated curriculum. Tests and quizzes will be available as an on-site exhibit, and will be case-based, in the INBDE format. With the change in Leadership at the School, there have been some changes in the direction of the curriculum, which now represents a traditional dental school curriculum with a biomedical sciences stream that is integrated with clinical dentistry.

- The course syllabi appeared to be from the medical school with no references to the dental school, and no evidence of a dental component. Please provide further evidence of the program's ability to comply with Dental Standard 2-13 related to the biomedical sciences curriculum.

The biomedical sciences stream is fully integrated with the dental school curriculum. The D1 curriculum schedule is attached: (See Exhibit C)

- Additionally, the reviewers request supplemental in-depth information for the first and second year curriculum in advance of the site visit. Please submit the final comprehensive and detailed course syllabi, including the course dates and times, designated instructors, overall curriculum and course schedules, etc. for years one and two.

Course syllabi and schedules are attached: (See Exhibit C2 and D)

Course Directors and instructors are attached: (See Exhibit D2)

Criteria J: As applicable, courses for the subsequent years of the curriculum are developed, including general and specific course objectives.

Related to Criteria and J, the reviewers noted that courses are under development; however, tests and quizzes were lacking. The course syllabi appeared to be from the medical school with no references to the dental school, and no evidence of a dental component. Please provide further evidence of the program's ability to comply with Dental Standard 2-13 related to the biomedical sciences curriculum.

Additionally, the reviewers request supplemental in-depth information for the first and second year curriculum in advance of the site visit. Please submit the final comprehensive and detailed course syllabi, including the course dates and times, designated instructors, overall curriculum and course schedules, etc. for years one and two.

Response:

Courses for the subsequent years of the curriculum are being finalized and will be available as an onsite exhibit.

Criteria K and Standard 4-5 (Facilities and Resources): If the capacity of the facility does not allow all students to be in laboratory, pre-clinical laboratory and/or clinic at the same time, a plan documenting how students/residents will spend laboratory, pre-clinical and/or clinical education sessions has been developed and is included.

The reviewers request verification that the program will have adequate facilities to support the proposed enrollment. 1. The program plans to admit 80 students per year with a facility that includes 60 dental treatment units and 44 simulation units. It was unclear to the reviewers how the program's facilities will accommodate the projected enrollment. 2. Please submit schedules for use of the facilities for each course in the curriculum, including a plan for facility usage when the program has enrolled students in all years. 3. Please also provide information on the facility construction and completion dates as well as any alternate plans to address delays in construction. 4. The reviewers request information on the timeline for construction of the additional clinic of 48 units that will be built.

Summary of Response

This response is divided to 3 sections.

- The first describes the facilities present and under development, including the number of simulation station and clinical chairs that will be available
- The second is a facilities description timeline
- The third is the conclusion that the number of chairs available will be adequate to provide the clinical experiences needed by students

Facility development planning and construction overview

California Northstate University has two campuses located in the Sacramento region - the College of Health Sciences is located on the campus in Rancho Cordova, and the Elk Grove Campus contains the Colleges of Medicine, Pharmacy, Psychology and Dental Medicine.

The currently existing facilities in Elk Grove to be used by the CDM are identified below as 9700 W. Taron Drive and 2400 Maritime Drive. The third facility planned for the CDM scheduled to come online in year three is identified as the “new CDM facility”. The new CDM facility will be constructed on one of two Elk Grove campus locations being considered by the University's architect to fit into their master plan.

Following the initial application submission, a number of modifications have occurred which resulted in an increase in the number of simulation units and dental treatment units. These modifications include an increase in the simulation laboratory size to include 81 simulation units comprised of 80 student and 1 faculty demonstration units. The plan for the clinical facilities has been modified to increase the number of dental treatment units to be built on the Elk Grove Campus to 128 dental treatment units - 28 units in the initial clinical site at 2400 Maritime Drive and 100 dental treatment units in the new CDM facility to be built on campus. The simulation laboratory experiences will be completely delivered within the 2400 Maritime building. In total, the facilities for clinical training will be delivered in a multi-phased construction plan utilizing 2400 Maritime Drive and the second location on the CNU Elk Grove campus, which in this

report is identified as the “[new CDM facility](#)”. For the first two years the facilities to be used for simulation and clinical education will occur at the 2400 Maritime Drive building and the didactic education will occur at 9700 W. Taron Drive. The 9700 W. Taron Drive building is located on Campus and houses the Colleges of Medicine, Pharmacy, and Psychology. The 9700 W. Taron Drive facility is in the process of planning and remodeling to provide two additional classrooms for the College of Dental Medicine. The Maritime Drive facility is being remodeled to house the simulation lab and a dental clinic. The new CDM facility’s architectural design is currently under development and envisioned to be a 5-story, 85,000 square foot building.

Facility Descriptions

9700 W. Taron Drive facility located on the Elk Grove Campus

Currently this facility houses the Colleges of Medicine and Pharmacy and will house the College of Dental Medicine during the initial years of its development. This facility currently has sufficient didactic, seminar, small group learning rooms, basic science, and anatomy laboratory availability to support the College of Dental Medicine for the first two to three years of operation. This facility is available now and has the following components:

- Both existing lecture halls on first floor can be split by retractable room dividers to provide 2 lecture halls for 80-100 students dedicated for use by CDM. Spring break 2020 installation of additional room dividers
- There is an existing Anatomy lab which will be used by CDM
- There are existing basic science laboratory facilities which will be used by CDM

2400 Maritime Drive facility located on the Elk Grove CNU Campus:

The facility at 2400 Maritime Drive is currently undergoing remodeling. When completed, it will provide a simulation laboratory and a clinical facility. In the initial two years of operation, this facility along with 9700 W Taron Drive (above) will serve the needs of the College of Dental Medicine. This building will have the following components:

- There is a total of 16,000 sq. ft.
- [First floor](#)
 - 8,000 sq. ft.
 - It will house phase 1 of Clinical facility with 28 dental treatment units and clinical operations support space using A-Dec dental equipment. Following completion of the new CDM facility (below), the clinical facilities in the Maritime building will likely be utilized for a faculty practice. Initially, this clinical facility will be used for screening and faculty treatment clinics to build an adequate patient base for clinical training starting in year 3. It is necessary to begin building a patient base or patient population to support the needs of the future D3 class’ transition into full comprehensive clinical care, and to develop the soft or interpersonal skills and clinical skill of the students prior to their transition into the D3 year and full comprehensive care of patients.
 - Timeline:
 - Demolition and construction is in process.
 - Anticipated completion is August/Sept 2020

- **Second floor**
 - 8,000 sq ft
 - It will house the 81 seat simulation laboratory stations with equipment provided by A-Dec along with other space to support the simulation lab and clinical experience.
 - Timeline:
 - Demolition and construction is in progress now.
 - A-Dec simulation and lab benches contract has been signed
 - Anticipated completion is April/May 2020

New CDM Facility to be built on the Elk Grove Campus:

This new CDM facility is expected to be completed by Year 3. At that point, it, along with the 2400 Maritime Drive facility, will be the main facilities of the College of Dental Medicine that provide the didactic, science lab, simulation lab, and clinical training.

The architectural plans for this facility have been and continue to be under development. There are two properties on Campus being considered for this facility by the architect as most suitable from a design and location standpoint. The University is using the same architectural firm for CDM that is designing the hospital and ambulatory care facility. The two campus locations under consideration for CDM include a site adjacent to the 2400 Maritime Drive building and one identified as 140 Stonelake Drive. Both locations are on the Elk Grove campus on land owned by the University. A conceptual draft of the proposed building is included with this response. The building will have the following components:

- This facility is envisioned to be a 5-story, 85,000 – 100,000 square foot building which will serve as the primary location for the clinical and didactic facilities for the College of Dental Medicine. At the time of the site visit, architectural plans will be available to be shared with the site visit team.

Current vision for new CDM Facility

- **First floor** – reception, student life & staff support space, possible faculty practice
- **Floors two and three** – will contain a combined total of 100 dental treatment units and clinical operations support space. Clinical operation support space such as sterilization, reception, dispensary, office space, reception, etc.
- **Fourth floor**- office space and space for growth of clinical treatment associated with program expansion for increases in class size, residency programs, faculty practice, etc.
- **Fifth floor** – academic space (lecture halls (3)), seminar and small group learning rooms, and offices for administration/faculty/staff.
- Timeline:
 - Site engineering and soil analysis for the land have been completed
 - Architectural planning for the 5-story building is under development by the San Francisco architectural firm of Fong and Chan
 - Henry Schein is the preferred vendor and will provide assistance to the architect for clinical design and the integration of all vendor supplied clinical equipment - currently under development

- Architectural plans to be completed for construction permitting June 2020 if not earlier
- Construction will begin in Summer/Fall 2020
- Occupancy permit will be issued in Spring 2022
- Clinical care will start in this facility in Fall 2022

Facilities Transition Timeline

The use of the three CNU buildings and facilities will evolve over the next four years as follows:

Year 1

- 9700 W. Taron Drive
 - D1 will have unrestricted the use of the two existing lecture halls (4,200 sq. ft. each) being are planned to be split, providing 4 classrooms (2,100 sq. ft. each), suitable for 80-100 students per classroom. These splits will be accomplished with soundproof, moveable walls, which allow for flexibility in class size. (See Exhibit E, F, G)
 - D1 will have access to anatomy lab using a pro-section study of head and neck and thoracic lab instruction. Interdisciplinary lab has capacity for schedule availability for D1 class on a rotational basis with COP (College of Pharmacy) and COM (College of Medicine). (See Exhibit H)
- 2400 Maritime Drive
 - D1 will have unlimited access to both pre-clinical and clinical space
 - Simulation facility (second floor)
 - Spring 2021- projected completion and occupancy permitting
 - Clinical facility (first floor)
 - Fall 2020- projected completion of clinical construction and occupancy permitting
 - Fall 2020 and Spring 2021- Advertising and promotion of the opening of the College of Dental Medicine. Marketing and advertisement to begin for the purpose of developing patient base for both student experiences and faculty practice.
 - Spring 2021- D1 students - Scheduling of patient screenings and other initial entrustable professional activities for students to gain experience and to build a patient base in preparation for year three of the program
 - Assuming a first class of 80: the class will be split into 3 groups of 26 or 27 students. Two students will be involved with every patient encounter with one student serving as the primary care giver and the other will serve as a chair side assistant. Rotations will be crafted allowing each group of students the experience of serving as care giver, assistant, or observer for each patient encounter.
 - Projection on patient needs is up to 3 patients per student

Year 2

- 9700 W. Taron Drive

- D1 and D2 will have access to two CDM dedicated lecture halls available to support didactic training
 - D1 will spend 4 days per week in didactic training
 - D2 will spend 1-2 day per week in didactic training
- Science laboratory access schedules will have been further developed to ensure adequate access for the additional class
- 2400 Maritime Drive
 - Simulation facility: D1 and D2 classes rotate through simulation lab
 - D1 will use sim lab 1 day per week
 - D2 will use sim lab up to 3 days per week
(See Exhibit I-J)
 - Clinical facility
 - D1 students begin to rotate in the spring semester with clinical encounters as described above in Year 1
 - Projection on patient needs is up to 3 patients per D1 student
 - D2 students will continue clinical experiences sessions for up to 1 day per week with patient screenings each semester to develop skills in patient interaction skills, such as health history, clinical oral examination, treatment planning, local anesthesia, oral prophylaxis, and impressions
 - Projection on patient needs for D2 students is 5-8 patients per D3 student
 - These activities serve to continue to develop patient management and clinical skills and to build the clinic's patient base in preparation for year 3 when full clinical experiences begin for the D3 class
(See Exhibit I-J)

Year 3

- 2400 Maritime Drive
 - Simulation laboratory: D1 and D2 classes rotate though the simulation laboratory as describe previously
 - Clinical facility: faculty practice development
- New CDM facility
 - Clinical facilities – Are envisioned to be 100 dental operatories. The first class of D3 students will transition into the newly completed main CDM facility using the dental treatment units on the second and third floor clinics for clinical experiences necessary to develop required clinical competencies. Students will be assigned to a Treatment Group Leader, a faculty supervisor serving as the primary attending. Each Treatment Group Leader will oversee 10 dental operatories and the students assigned to that Treatment Group.
 - Clinical usages schedule
 - D1 students begin to rotate in the spring with clinical encounters as previously described
 - D2 students continue clinical rotations as previously described to prepare for full comprehensive care
 - D3 students begin full comprehensive care

- Didactic and Basic Science Lab facilities – Transitioning to new facility for providing didactic and laboratory instruction in new CDM facility.

Year 4

- New CDM Facility
 - Clinical facilities - By the 4th year of operation of the College, each clinical Treatment Group should be comprised of 10 D3 and 10 D4 students. Treatment will be provided with one student acting as the assistant and one serving as the primary care giver. D4 student will serve as primary care giver for a minimum 6 of 10 patient encounters per week and the D3 serving as the primary care giver for a minimum of 4 of 10 patient encounters per week. Clinical care credit will be awarded to the student providing the care. Attendance is mandatory. The treatment group coordinator along with clinical faculty will be the attending dentists overseeing the student's treatment of patients. It is anticipated there will be two treatment periods each weekday.
 - Didactic and laboratory facilities – D1 and D2 will have designated lecture halls for didactic instruction

Alternative planning in the event of construction delay of the new CDM facility

2400 Maritime Drive

At the time of the site visit, it should be clear whether the simulation laboratory on the second floor is sufficiently completed to allow the program to start in the Fall 2020. If unanticipated delays occur following the site visit which results in the simulation laboratory not completed at the start of the program, then additional biomedical sciences stream classes will be provided in the first semester, and these will be “If swapped out” for simulation experience time when the simulation laboratories are completed.

New CDM Facility

As indicated, the planning for this facility is under development. It is planned to be completed in the spring of 2023 for the inaugural class that will be transitioning into their 3rd year. This facility at the time of opening is envisioned to provide 100 dental treatment units, plus didactic, laboratory, office space, and more. In the event occupancy permitting should be delayed through the end of the year for 2022, then the 2400 Maritime Drive clinical facility can be used to provide clinical experiences for the 3rd year students. The clinical program CNU-CDM is implementing is similar to the programs at Western University in Pomona, California and Touro College of Dental Medicine in New York. The clinical program will involve 2 students per scheduled patient encounter wherein one student serves as primary care giver and the second student serves as the chairside assistant. With two patient encounters per day, or ten per week, this allows each student to serve as primary care giver for 5 patient encounters per week until such time as the second clinical facility is permitted for occupancy. If the delay extends for the entire third year, then student patient encounters and staff scheduling would be increased by extending scheduling of patient visits to a third appointment period in the evenings or by the addition of appointments on Saturdays.

Should CODA grant Initial Accreditation allowing for acceptance of an inaugural class in September of 2020, it is likely that the timing of the admission cycle for the first class will limit

the size of the first class to something less than the planned class of 80 students. Should construction delays occur, a smaller first class would enable the 28 chair clinic in the 2400 Maritime Drive building to provide sufficient space to proceed with the clinical training requiring only minor modifications in clinical scheduling. If the first class is less than or equal to 56 students, we would utilize the 2400 Maritime Drive clinic of 28 dental treatment units to fully accommodate clinical experiences for up to a year or until completion of construction and permitting of the second CDM facility. The primary reason the clinical training would be little affected by a delay in construction of the second clinical facility is the model of clinical care we plan to use as described above. So, for example, with a class size of up to 56 students, a clinic with 28 dental operatories would be sufficient to provide full clinical experiences with little modification to the curriculum and scheduling of patient treatment appointment blocks. If the class size is 56 to 80 students, then the addition of evening appointment blocks for weekdays and Saturdays would be needed to ensure adequate patient encounter experiences if construction is delayed for up to a year.

Conclusion

The current facility availability and the plans to create new facilities are described above. As the new facilities become available, the student educational experiences will be shifted to the new sites. This plan will allow CMD to start instruction in the fall of 2020 with a D1 class and transition as described to accommodate the addition of the D2, D3 and then D4 classes.

Criteria L: As applicable, evaluation instruments for laboratory, pre-clinical, clinical, and clinical enrichment experiences are developed.

While the application narrative indicates that evaluation instruments are under development, and many instruments/rubrics were provided, the reviewers noted that all evaluation instruments for laboratory, preclinical, clinical and clinical enrichment experience should be available for review at the time of the site visit.

Response:

To our understanding, there is no response required for this section at this time, but will have the materials available for review at the time of the site visit, as stated above.

Criteria N: As applicable, the adequacy of the patient caseload in terms of size, variety, and scope to support required clinical experiences is available.

The number of patients needed within the program appears to be an underestimate. Please provide the program's plan to achieve a sufficient patient load for all students within all types of dental procedures required by the program and Accreditation Standards. Additionally, please document the program's plan should a sufficient patient load not be achieved. Please also provide the program's full patient marketing plan and alternatives for marketing if the program does not achieve a sufficient caseload of patients.

ADEQUACY OF PATIENT CASELOAD

We have looked at the patient caseload from many different perspectives and used a variety of different models to try to project the numbers for patients needed to provide a sufficient number, variety, and scope of opportunities to develop the clinical competencies. In the analysis we relied on consultations with and the experiences gained from other dental schools such as the Universities of Kentucky, Minnesota, Western, Midwestern, Oregon, Touro, and UC San Francisco. Additionally, we used consultants from the Sacramento area for the demographic analysis of communities of need, general patient populations, and those experienced with clinical practice development. This analysis provided several results which gave a range of expectations for patient needs. Our observation of the results are in part dependent on the community the university's dental school is serving and in part dependent on the specific model of clinical care used by the school to educate their students.

For example, Western, Touro, and other dental schools assigned two dental students to every patient encounter wherein one student serves as an assistant to the student providing the care. This model is reported to have the effect of providing a reduction in number of total patients needed to develop the clinical competencies. For example, at Western University with 140 D3 & D4 students (70 per class) in clinic per year, they screen approximately 1500 patients per year and accept up to 90% as patients to provide their clinical competencies. On the other side of the spectrum, UCSF screens roughly 5000 applicants and accepts 50% or 2500 as patients for their 160 D3 & D4 students (80 per class). The total number of patients having been screened and the ratio of patients accepted for care appears to be in part due to the payer mix and complexity of the patients from the communities served by the school. In addition to the numbers of individuals screened and accepted as patients necessary to develop the competencies, once a level of competency is met, many universities then provide additional clinical experiences in community based educational clinics such as a Federally Qualified Health Center, Indian Health Clinic, or university affiliated clinic in a community of need. CNU plans to use this approach. These community-based clinics provide real world clinical experiences in terms of volume, diversity, complexity, and pace of patient care. These experiences serve to further prepare students for practice following graduation. The net effect of the specific model used for clinical education of students, the payer mix of patients, the complexity of care needed in the communities served, and the implementation of a community based clinical education each have an effect on the numbers of patients ultimately needed to develop the clinical competencies and experience necessary for graduation.

We recognize that building a patient base suitable to support a single-operator oral health care practice or a clinical practice in an oral health care institution does take time. Consequently, we plan to start building the patient base of the school starting year 1. This needs to begin in year one to prepare for the start of the D3 year when students transition main clinical facility under development is to open. We believe the following model strategically plans for a pragmatic and achievable patient base sufficient to develop the required clinical competencies and provide an enriched clinic training experience. It is our expectation to be able to begin providing introductory patient experiences as early as the second semester of the D1 year. These experiences would begin with introductory entrustable procedures such as taking medical histories and oral examinations. Each semester, our expectation is continued growth of the patient base in preparation for the semester the D2 class transition into the third year and begin full engagement in clinical training. We have further refined our assessment regarding the number of patients needed and it is below:

Assumptions: Planning is based number of patients per student per year

D1 students: 3 patients/student

D2 students: 5-8 patients/student

D3 students: 20-25 patients/student

D4 students: 20-25 patients/student (assuming community based educational clinics are not fully operational for student clerkship rotations)

80% of applicants screened are accepted as patients

First year:	80 D1 students, 3 patients/student = 240 patients under care	
	screen 300 patients x 80% acceptance =	240
	number patients needed for year 1	240

Second year:	80 D1 students, 3 patients/student = 240 patients under care	
	screen 300 patients x 80% acceptance =	240
	80 D2 students, 5-8 patients/student = 400 to 640 patients	
	screen 800 patients x 80% acceptance =	640
	number patients needed for year 2	880

Third year:	80 D1 students, 3 patients/student = 240 patients under care	
	screen 300 patients x 80% acceptance =	240
	80 D2 students, 5-8 patients/student = 400 to 640 patients	
	screen 800 patients x 80% acceptance =	640
	80 D3 students 20-25 patients/student = 1600 to 2000 patients	
	screen 2000 patients x 80% acceptance =	1600
	number patients needed for year 3	2480

Fourth year:	80 D1 students, 3 patients/student = 240 patients under care	
	screen 300 patients x 80% acceptance =	240
	80 D2 students, 5-8 patients/student = 400 to 640 patients	

screen 800 patients x 80% acceptance =	640
80 D3 students 20-25 patients/student = 1600 to 2000 patients	
screen 2000 patients x 80% acceptance =	1600
80 D4 students 20-25 patients/student = 1600 to 2000 patients	
screen 2000 patients x 80% acceptance =	1600
screen 5100 applicants to identify this number patients needed for year 4	4080

We have developed a marketing plan, below, to attract the number of patients needed as determined by the calculations listed above.

MARKETING PLAN

School of Dentistry- Patient Marketing Plan

Sacramento Demographics- 1.5 million (90.1% own a computer),
6.4% don't have health insurance

PEOPLE	
Population

Value proposition to community and to affiliates (competitive differentiation)?

1. Lower cost alternative
2. World-class faculty

3. Excellent care delivered via faculty-supervised students
4. Innovative curriculum and cutting-edge technology?
5. Convenience for both Central California's San Joaquin Valley and Sacramento Valley farm communities

Marketing Channels:

I. Referrals-

- a. Program Affiliations
 - i. Carrington college – Dental Assisting and Dental Hygiene Programs
 - ii. Sac City College – Dental Hygiene Program
 - iii. FADE Institute – Dental Assisting, Registered Dental Assistant, and RDA Expanded Function II Programs
- b. **Hospital Affiliations? (leveraging existing MOUs from Medical School, FQHC, or others to establish relationships)**
 - i. VA
 - ii. Sutter
 - iii. Kaiser
 - iv. UC Davis Health
 - v. River City Medical Group

II. Local Colleges (generate goodwill in the community)

- a. Services provided through Student Health to:
 - i. CNU Student Health Services by referral
 - ii. [CSUS Student health Services by referral](#)
 - iii. UC Davis Students (<https://hpa.ucdavis.edu/dentistry>)
 1. *Health Professions Advising*
 - iv. Community college students

III. Insurance Mix?

- a. Will develop a listing of insurance plans under contract
 - i. **Denti-Cal Dental (Medicaid delivered dental care in California)**
 1. Senior Care Centers?
 - a. Assisted living facilities
 2. Services to the disabled
 3. Children
 4. Mothers
 5. Welfare
 1. https://www.dhcs.ca.gov/services/Documents/MDSD_Presentation_for_Medi-Cal_Families_10_22.pdf
 - ii. **Managed care- Sacramento County GMC program**
 1. Data on Sacramento utilization:
 <https://www.dhcs.ca.gov/services/Pages/DMCPerformanceMeasures.aspx>
 2. <https://first5sacramento.saccounty.net/Results/Documents/Sac-GMCExecSummUpdate-2015-Final.pdf>

3. An important recent development in the CNU area is the release of the 2020 Governor's Budget proposal. In this proposal, there is a plan to eliminate the current Medicaid Dental Managed Care system and move all current beneficiaries in that system into the fee-for-service system. This will allow an increased choice of providers for almost 500,000 current California Medicaid beneficiaries.

IV. Local community Relationships-

- a. Chambers of commerce (*connecting with the community and small businesses that may not have very good health insurance*):
 - i. Sac Metro Chamber of Commerce
 - ii. Hispanic Chamber of Commerce
 - iii. Black Chamber of Commerce
 - iv. CalAsian Chamber of Commerce
- b. First Five Sacramento Dental: <https://first5sacdentel.org/resources/>
 - i. <https://first5sacramento.saccounty.net/Meetings/Documents/MCDAC/2016/SacDentalResources-Eng-Sp.pdf>
 - ii. Serving on advisory board:
<https://first5sacramento.saccounty.net/Meetings/Documents/Rosters/AdvisoryCommittee.pdf>
- c. Dental Site listing: <http://www.dentalsite.com/dentists/densch.html>
- d. <https://cchcs.ca.gov/wp-content/uploads/sites/60/NR/CCHCS-FactSheet.pdf>
- e. Greater Economic Council: <https://www.selectsacramento.com/>
 - i. PR Stories?
 - ii. Included is information about small business (67% of local businesses have 1-4 people): <https://www.selectsacramento.com/talent/demographics/>
 1. Perhaps services from the school can offset dental costs. Wonder if you can purchase a list of these small business via GSEC to advertise to?

V. Associations (membership in the community to stay abreast of trends etc.), collaborating in the community to generate goodwill:

- i. CDA CARES
 1. Access to care program of the California Dental Association Foundation
 2. faculty and student participation to showcase faculty (story can be written up and testimonials can be utilized for patient and student recruitment)
- ii. California Care Force- free clinic sponsored by California Association of Oral and Maxillofacial Surgeons
 1. faculty and student participation to showcase faculty (story can be written up and testimonials can be utilized for patient and student recruitment)..
 - a. Community goodwill
 2. Following this line of thinking, perhaps an open house event for several hours of free examination services for x amount of people that show by a certain time

- a. Introduction to the community...media/press kit
- 3. https://www.dhcs.ca.gov/services/chdp/Documents/Letters/chdppi_n0505.pdf
- iii. Sacramento District Dental Society: <http://www.sdds.org/>
- iv. American Dental Association: <https://www.ada.org/en>

VI. Channels of communication to drive the value proposition messaging?

- a. Ads in Sac Business Journal
 - i. Print, digital (banner ads, advertorials, and morning and afternoon edition)
 - ii. PR Stories
 - iii. Sponsorships like the Sac Business Review and SBJ?
 - 1. Announcement at event (promo reel about new school) at event
 - a. Over 900 people attend
 - b. Media coverage provided
- b. Sac Bee
 - i. PR Stories
 - ii. News releases regarding opening of dental school
 - 1. Services provided
 - 2. Seeking patients interested in being screened as potential patients
- c. Digital advertising for a wider reach
 - i. Social Media- FB/Instagram (sponsored ads)
 - 1. Also, need a presence of the school to point the call to action to direct attention to CDM
 - ii. Newspaper (online banners ROS (run of site) on news sites, and behavioral advertising/retargeting on geo-fenced, white list websites)
- d. Hispanic community
 - i. Radio, TV, mobile ads
- e. Radio
 - i. NPR- PR/new stories
 - ii. Press about school opening
- f. Email blasts
 - i. Find lists to purchase
- g. Google Adwords
 - i. Key words on website
 - ii. Sponsored ad words

VII. Website

- a. Video Testimonials
 - i. School Breaking ground/buildout
 - ii. Dean and Faculty testimonials to start
 - iii. Student and patients to follow
- b. CRM (Customer Relationship Management) Database to track leads, and manage demographics, communication plans, and email blast repository
 - i. Embedded Appointment system?

Criteria O: Class schedule(s) noting how each class will utilize the facility are developed.

As a supplement to Criteria K and Standard 4-5 (Facilities and Resources), the reviewers request information on how the facility will be used based on the projected enrollment and space capability of the facility. Please submit class schedules, facility usage, etc. to support enrollment of 80 students in the first year, 160 students in the second year, 240 students in the third year, and 320 students in the fourth year. In addition please provide a contingency plan for all facilities utilized.

Response:

This criteria has been responded to in Criteria K response. Please let us know if additional information is needed.

Criteria P: As applicable, diagram or blueprints of the didactic, laboratory, pre-clinical laboratory and clinical facilities, and equipment needs are developed to support the anticipated enrollment date.

As a supplement to criteria K and Standard 4-5 (Facilities and Resources), the reviewers request information to document how the facilities will be used based on enrollment and space availability.

Response:

This criteria has been responded to in Criteria K response. Please let us know if additional information is needed.

Equipment Needs

The College of Dental Medicine has developed and agreed upon the equipment needs of the Simulation lab. The signed and finalized contract has been included as an exhibit.

(See Exhibit K-L)

Standard 6 Research Program: The reviewers noted that opportunities will be provided to engage in research; however, it was unclear whether there will be a budget to support student research. Please provide additional information on the research program and student support for engagement in research.

Response:

As indicated in the self-study, California Northstate University College of Dental Medicine's (CDM) research program will have an emphasis on translational and community service research aimed at addressing the significant disparities in oral health and access to oral health care among residents of California's Northern Central Valley.

The CDM budget includes \$29,000 for research. This budget item is included in the total of the operating expenses line item identified as "Other Operations". (See Exhibit X)

The initial CDM research portfolio is already in place based on grants and contracts brought by Dr. Paul Glassman, Associate Dean for Research and Community Engagement. These grants focus on translation of dental prevention and behavior support science into clinical care, integrated into communities, and using innovative delivery models to demonstrate the ability to improve access to oral health services, improve health outcomes, and lower the cost of care.

Even prior to the formal establishment of the CDM, there have been discussions and interest in supporting the research and community engagement activities with health and social service agencies, government agencies and other members of the dental industry.

Faculty will be expected to engage in scholarly activities. Support for these activities will be provided by the leadership and the Office of Research and Community Engagement. Dr. Glassman, Associate Dean for Research and Community Engagement has obtained over \$30 million in grants and contracts for translational and community service research and is prepared to provide leadership and support in this area.

The structure and function of the Research Committee and research tracking activities are described in the self-study including the availability of IT support and a dedicated Research Coordinator.

Student Research Activities

Students will participate in CDM research activities in multiple ways. As described in the self-study, these include:

- Assignments to community sites where translational and community service research is taking place and where they will directly participate in components of the research activities.
- Specific assignments in the curriculum to review literature, gather data, document findings and receive feedback from course faculty.
- Elective participation in faculty-led projects.

The CDM will have a \$25,000 annual research fund to stimulate and support faculty projects. One requirement of these projects will be involvement of student mentees. Students will have the opportunity to participate in literature search, project design, interventions, data collection and analysis, and developing conclusions.

Summary

The main points of this question response are:

- California Northstate University College of Dental Medicine's (CDM) research program will have an emphasis on translational and community service research aimed at addressing the significant disparities in oral health and access to oral health care among residents of California's Northern Central Valley.
- CDM has planned mechanisms and a support structure for faculty research with an emphasis on the goal listed above.
- CDM will have a \$25,000 annual research fund.
- Students will participate in research activities in multiple ways including being mentees directly involved in faculty research.

Additional Requested Information:

Program Start Date

The commission asked for further information regarding the start date of that was reported in the initial application. It was reported in the initial application that August 6, 2020 as the projected start date. This date was developed early last year and was based on what we now know was a misunderstanding for when we could anticipate a decision on initial accreditation. Now having a better understanding of the accreditation process and timing, we have changed the program's start date to September 28, 2020 should the program receive Initial Accreditation.

Further Program Developments

Faculty Changes

There have been some developments/changes to our faculty.

- Dr. Sheila Brear has been appointed as Dean of Academic Affairs
- Dr. Rosemary Wu has been appointed to interim Dean of Clinical Affairs

Faculty Development Event – 1/22/20

We have also successfully held our first Faculty Development Event that took place on 1/22/20 at California Northstate University. In attendance were 50-60 parties who have expressed interested in becoming part or full time faculty for the College of Dental Medicine. Dr. Suzanne Clark (College of Pharmacy, California Northstate University) gave a talk regarding team based learning along with three class of 2021 PharmD students (Janie Yu, Luis Tolento Cortes, and Elizabeth Ann Browning).

Response to New or Updated Standards

Overview:

There are 4 standards that are new or were updated to take effect July 2019 and will take effect in July 2020. The following describe CNU's plans to address these standards.

Standard 2-8.e.

Standard:

“The dental school must have a curriculum management plan that ensures...” ...
e. “incorporation of emerging didactic and clinical technologies to support the dental education program curriculum. “

Response:

As a new dental school, CNU has an opportunity to ensure that material presented in the education program is modern, evidence-based, and incorporates emerging didactic and clinical understanding and technologies. An important part of the hiring process and faculty development process for CODM will be instruction, training, and coaching for faculty members to ensure that this vision is carried out. As the curriculum is developed and progresses the associate Dean for clinical affairs will conduct ongoing course evaluations which will include review of course material by outside reviewers. The purpose of these reviews will be, in part, to ensure that material being taught supports this vision.

Standard 2-24d

Standard:

At a minimum, graduates must be competent in providing oral health care within the scope of general dentistry, as defined by the school, including:

d. health promotion and disease prevention, including caries management

Response:

The initial self-study responded to standard 2 24.d. as previously written which was “d. health promotion and disease prevention”. The new language refers to “health promotion and disease prevention, including caries management”. The addition is the reference to “caries management”.

Caries management includes multiple topics presented in multiple courses and experiences. In general, topics in caries management include: oral anatomy and physiology, pathophysiology of the caries disease, risk assessment, medical and behavior prevention of caries, and medical and surgical management of the consequences of the caries disease. These topics are presented in the following courses and experiences:

Course #	Course Title	Credits	Year	Term
Odont 521	Dental Anatomy <i>LAL and LAB</i>	6	DS 1	Fall

Course #	Course Title	Credits	Year	Term
Odont 522	Cariology <i>LAL</i>	3	DS 1	Spring

Course #	Course Title	Credits	Year	Term
Odont 611	Operative Dentistry <i>LAL and LAB</i>	6	DS 2	Fall

Course #	Course Title	Credits	Year	Term
Odont 662	Comprehensive Care Family Dentistry <i>CLIN and LAB</i>	3	DS 2	Spring

Course #	Course Title	Credits	Year	Term
Odont 762	Comprehensive Care Family Dentistry <i>CLIN</i>	8	DS 3	Spring

Course #	Course Title	Credits	Year	Term
Odont 861	Comprehensive Care Family Dentistry <i>CLIN</i>	8	DS 4	Fall

Course #	Course Title	Credits	Year	Term
Odont 862	Comprehensive Care Family Dentistry <i>CLIN</i>	8	DS 4	Spring

Course #	Course Title	Credits	Year	Term
BSS 701	Dental Public Health <i>LAL</i>	2	DS 3	Fall

Course #	Course Title	Credits	Year	Term
BSS 861	Clinical Clerkship: Community-based Education <i>4 weeks, 30 hours per week plus call</i> <i>CLIN</i>	8	DS 4	Fall

Course #	Course Title	Credits	Year	Term
BSS 871	Seminar in Dental Public Health <i>SEM</i>	2	DS 4	Fall

Course #	Course Title	Credits	Year	Term
BSS 862	Clinical Clerkship: Community-based Education <i>4 weeks, 30 hours per week plus call</i> <i>CLIN</i>	8	DS 4	Spring

Description:

Managing dental caries disease is fundamental to the scope of general practice. The series of courses and experiences described above build upon one another over the course of the educational program. Fundamentals of the anatomy of oral structure including teeth is initially delivered along with a course dedicated to Cariology. These concepts are then reinforced and put into use in all of the various additional courses which use didactic and clinical experiences to integrate medical behavioral and surgical prevention and management of the dental caries disease. The culmination of these experiences is the clinical application during patient care in both community rotations and the school's clinics.

Standard 2-25

Standard:

Graduates must be competent in assessing and managing the treatment of patients with special needs.

Intent:

An appropriate patient pool should be available to provide experiences that may include patients whose medical, physical, psychological, or social situations make it necessary to consider a wide range of assessment and care options. As defined by the school, these individuals may include, but are not limited to, people with developmental disabilities, cognitive impairment, complex medical problems, significant physical limitations, and the vulnerable elderly. Clinical instruction and experience with the patients with special needs should include instruction in proper communication techniques including the use of respectful nomenclature, assessing the treatment needs compatible with the special need, and providing services or referral as appropriate.

Response:

The initial accreditation self-study responded to the standard as it is written which was “Graduates must be competent in assessing the treatment needs of patients with special needs.”. The revised standard adds the language “...and managing...”.

In addition to the hospital dental program and didactic experiences described in the initial self-study report, CDM will recruit and treat patients with special needs as a part of the patient pool served by the school’s clinics. One of the reasons the expected acceptance rates of patients screened for treatment is expected to be high, is the school intends to recognize the prevalence of people with complicated medical, physical, and mental conditions prevalent in our society. We will ensure that a majority of individuals with those conditions are accepted through the screening process. We consider this essential in order to provide students with experiences that they need to adequately serve the population they will face upon graduation.

CDM intends to recruit and train faculty members to be sure they are comfortable providing and supervising care for people with special needs accepted into the clinical program. This will take the form of specific faculty development programming related to serving people with complicated medical, physical, and mental conditions. The majority of people with these conditions will be served in the normal clinical environment. Those with more complicated conditions may be seen in the hospital dental program described in the initial self-study.

Caseloads for individual students will be monitored to ensure that they have experiences serving patients with a variety of oral health, medical, physical, and mental conditions. This is an explicit goal of the school and tracking mechanisms will be in place to ensure the goal is achieved.

Standard 3-1

Standard:

The number, distribution and qualifications of faculty and staff must be sufficient to meet the dental school's stated purpose/mission, goals and objectives, at all sites where required educational activity occurs. The faculty member responsible for the specific discipline must be qualified through appropriate knowledge and experience in the discipline as determined by the credentialing of the individual faculty as defined by the program/institution.

Intent: Faculty should have knowledge and experience at an appropriate level for the curriculum areas for which they are responsible. The collective faculty of the dental school should have competence in all areas of the dentistry covered in the program.

Response:

The original self-study responded to the standard as it was then written which was "The number and distribution of faculty and staff must be sufficient to meet the dental school's stated purpose/mission, goals and objectives, at all sites where required educational activity occurs." The revised Standard added the sentence, "The faculty member responsible for the specific discipline must be qualified through appropriate knowledge and experience in the discipline as determined by the credentialing of the individual faculty as defined by the program/institution."

In addition to the information in the original self-study, we want to clarify that CODM is in the process of identifying faculty members for the educational program. There is an initial group of designated faculty able to start the program. In addition, we have a roster of approximately 130 individuals from Sacramento District Dental Society who have expressed interest in becoming faculty members at CODM by submitting a CODA BioSketch and CV. Under the direction of the Dean and Associate Dean for Academic Affairs, these faculty members are being screened and plans initiated for hiring. Additionally, a faculty training program has been initiated with the first in the series of meetings scheduled for January 22, 2020. The most important criteria in the hiring process and in assessing potential faculty member's qualifications, is the evaluation of whether they have the knowledge and experience required in the discipline in which they will be teaching.

In addition, the Associate Dean for Academic Affairs is responsible for the process of faculty evaluation and promotion. Through ongoing data gathering and evaluation system, faculty members are evaluated, both for their suitability for promotion as a member of the University Promotion and Advancement Committee, and for the currency of the material they are responsible for teaching.

COLLEGE OF DENTISTRY

PROFIT & LOSS

BUDGET FOR 2020-2024

	2020	2021	2022	2023	2024

MEMORANDUM OF UNDERSTANDING REGARDING
CALIFORNIA NORTHSTATE UNIVERSITY'S COLLEGE OF DENTAL MEDICINE PERSONNEL

The purpose of this Memorandum of Understanding ("MOU") is to formally record the mutual interest of California Northstate University's College of Dental Medicine ("CDM"), and California Northstate University's College of Medicine ("COM") and California Northstate University ("CNU") to enter into an agreement between COM and/or CNU to participate in the delivery of and facilitation of the curriculum at CDM.

CNU and CDM have agreed on the availability and interest of CNU's colleges' faculty to support CDM's curriculum. CNU supports these negotiations and is prepared to provide further support from CNU's other colleges, the College of Medicine ("COM"), College of Psychology ("Psy"), College of Health Sciences ("CHS"), College of Masters of Pharmaceutical Science (MPS), and College of Pharmacy ("COP"), collective referred to herein as "CNU".

CDM has represented that they will need the following at this time, but may be amended as needed:

- The hiring plan for CDM includes 15 Full Time Equivalent ("FTE") pre-enrollment faculty with an increase of 15 FTEs per annum for a mature 60 FTE for CDM by year 4.
- At least 42 of the 60 FTEs will be faculty of CDM responsible for the curriculum in dental medicine.
- The remainder of the FTEs for the health sciences curriculum may be from the CNU Colleges of Dental Medicine, Medicine, Health Sciences, Pharmacy, Masters of Pharmaceutical Science and Psychology or from business professionals with expertise in matters such as practice management and legal.

The CNU Colleges collectively have represented that they will have the faculty available to assist with the personnel needs for CDM and will work together to meet all of the hiring and teaching needs.

All Parties agree that this understanding may be amended by mutual agreement of all Parties and that subsequent agreements will need to be drafted for the individuals who have significant FTE overlaps with multiple Parties.

IN WITNESS THEREOF, this MOU has been executed by the parties hereto as of the date of the last signing party:

Exhibit C

Week	Date	Topic	Integrated Biomedical Sciences	Date	Integrated Biomedical Sciences	Date	Integrated Oral Health Sciences	Date	Time	Integrated Behavioral and Social Sciences	Integrated Clinical Sciences	
			Monday 8:00am-5:00pm Orientation Week		Tuesday 8:00am-5:00pm Orientation Week		Wednesday 8:00am-5:00pm Orientation Week			Thursday 8:00am-5:00pm Orientation Week	Friday 8:00am-5:00pm Orientation Week	
1	9/28/2020	Integrated Sciences: Biomolecules	Major classes of biomolecules , bonds and bond strength, nucleic acids (DNA, RNA), water. Glycosylation, phosphorylation. Enzymes. Antibiotic mechanism of Penicillin.	9/29/2020	Amino acids and proteins . Urea cycle. Amino acids. Peptide bonds. mRNA. Proteins: primary and secondary structure, misfolding and examples of diseases. Prions and their impact on proteins, and dental significance.		OMFS 511; Odont 511 Communication Skills . Introduction to cultural humility and cultural proficiency. Listening skills and developing a rapport. The patient interview. Practice, feedback and reflection.	10/1/2020	8:00-5:00	BSS 501 Managing Student Life Resiliency and sustainability. Importance of sleep, diet, and exercise. Posture. Mindfulness and meditation. Substance misuse and consequences.	Introduction to Dental Equipment and Kit Distribution . Review inventory of the kit and organize instruments. Assign faculty to student group.	
2		Integrated Sciences: Biomolecules	Metabolism . Effect of temperature, pH, substrate. Allostery and control of metabolism. Covalent modifications.		Carbohydrates, glucose and glycosylation , glycolysis and ATP, NADH, TCA cycle. Lactic acidemia. Oxidative phosphorylation. Mitochondria and the production of ATP, conversion to energy.		OMFS 511 Odont 511 Medical History . Physical Evaluation and Risk Assessment. ASA Classification, Review of symptoms. Facial, oral and dental signs of medical conditions. Radiographic signs suggesting medical condition. The dental examination : extraoral and intraoral examination for screening purposes.		8:00-5:00	BSS 501 Managing Student Life Learning and health resources on campus. Recognizing students in distress, management. Who to contact. Ethics and professionalism. Respect for others. Personal mission statements and values.	Administrative day . Set up electronic identification. Assign and passwords for students. Provide magnification vendors.	
3		Integrated Sciences: Biomolecules	Lipids, fatty acids, triacylglycerols , phospholipids, cholesterol, lipases. Acetyl CoA.		HS 631 Metabolism : Insulin, glucagon, betaoxidation, gluconeogenesis. Fasting state. Diabetes.		HS 631 Endocrine and metabolic disorders . Diabetes, pancreatic cancer, adrenal insufficiency, cushings syndrome, thyroid diseases.		8:00-5:00	OMFS 511 Common examples of dental management modifications. Coordination of care between physician and dentist. HS 641 Drug Actions and Interactions in Dentistry , commonly prescribed medications, common oral consequences of systemic drugs.	SIM Lab Orientation . Introduction of instruments and burs. Dental terminology and glossary of terms. Introduce nomenclature and teeth surfaces	
4		Integrated Sciences: Cell Biology	Basics of the cell . Plasma membrane, lipids, phospholipids and cholesterol, lipid rafts		Membrane proteins (extrinsic, intrinsic), transport across membranes		HS 611 Kidney Disease : acute and chronic, lab testing, dialysis, medications and dental management. Transplant patients. Hepatic Disease : Viral hepatitis, alcoholic liver disease, hepatocellular carcinoma.		8-5:00	Odont 511 Foundations of Odontology . Infection control, use of PPE and other barriers; use of antibacterials and antiseptics. Sterilization procedures. Outline of infectious diseases to which there is potential exposure. Practice: PPE and cubicle set up. (Remainder of Odont 511 when clinics available)	Hand piece familiarization and initiation of handpiece practice . View tutorial of "Learn-A-Prep II" as enamel, dentin and pulp. Review the drawings of the occlusal surfaces of the teeth on the block to represent initial caries lesions (in dentin). Faculty will guide the shape of which the preparations to be cut, such as the "x" "u" etc. .	
5		Integrated Sciences: Cell Biology	Subcellular organelles (cytoplasm, nucleus, DNA, DNA structure and replication)		Endoplasmic reticulum and golgi apparatus , lysosomes, mitochondria and ATP, Cytoskeleton.		HS 621 Gastrointestinal Disease : Gastric reflux and the effect on teeth; peptic ulcers, inflammatory bowel disease, cancer.		8:00-12:00 1:00-5:00pm	BSS 522 BS 533 Ethics in Dental Medicine and Health Care I . Licensure, continuing education, Diversion programs. California Dental Association Code of Ethics. Beneficence and non-maleficence. Standard of Care, Unprofessional conduct, sedation licensure. Research and the Helsinki Statement. Care of animals in research, and ethical use of human tissue. Record keeping, business and professional codes. Anti Kickback laws. Financial disclosures.	Dental anatomy: Morphology of Centrals and Incisors and Continuation of "Learn-A-Prep II" to differentiate the hardness between the enamel and dentin layers . Begin conservative preparations involving occlusal surfaces. Practice small class 1 and small, slot-type Class 2 outlines. Faculty will guide the depth of the preparations. Review for Mid-Term Exam	
6		Integrated Sciences: Cell Biology	The cell cycle and phases , mitosis, apoptosis, intrinsic and extrinsic pathways. p53 and p27. Viruses, apoptosis and cancer . Microtubule interacting drugs.		Introduction to Genetics. DNA, RNA, Replication. Ribosomes. Genotypes. Stem cells and regrowing the dental pulp. Stem cells and regrowing dentin and potentially the entire tooth. Use of DNA in forensic analysis.		HS 621; HS 641 Xerostomia . Causes (pharmacy, conditions of the salivary glands), sequelae, quality of life. Carous lesion development. Tooth loss and the quality of life implications. Management of xerostomia and is sequelae (Clinical application of fluoride and silver diamine fluoride).		8:00am-5:00pm	BSS 522 BS 533 Ethics in Dental Medicine and Health Care II . The California Dental Practice Act and duties for auxiliary staff. Student presentations. BSS502 Introduction to Health Systems I Overview of the U.S. health care system I and II , Comparison of the U.S. health care system; Organization and components of the U.S. oral health care system. Oral health disparities and barriers to oral health and oral health care . Changing concepts of dental care – prevention and behavior support science.	Dental anatomy: Canines and Intra-arch relationships and supporting tooth structure . Continuation of "Learn-A-Prep II" . Create larger "cavity preparations" with teeth with old amalgam restorations that need to be removed.	
7		Integrated Sciences: Tissues of the Body	Epithelia, classification , histological preparation. Oral epithelium and histology. Pemphigus vulgaris, histological appearance, role of dentist in diagnosis. Glands.		Connective tissue connective tissue cells, extracellular matrix. Collagen, elastin, fibronectin and laminins, proteoglycans. Categories of connective tissue. Cartilage: structure and function. Fibrocartilage, elastic cartilage, hypertrophic cartilage.		HS 641 Controlled substances . Use of controlled substances in dentistry, prescribing guidelines and regulations. CARES. Substance use disorders, dependence (including opioids, tobacco, methamphetamines). Etiology and epidemiology. Coordination of dental care with other health professionals. Screening, intervention and referral.		8:00am-5:00pm	BSS502 Introduction to Health Systems II Value in health care . Quadruple Aim. Evolution from quality movement. Progress and impact on oral health care. Workforce: Expanding role of allied oral health personnel; integration . Telehealth-connected-teams and Virtual Dental Homes Social Determinants of Health	Dental anatomy: Premolars and Molars and Pulp Morphology . Continuation of "Learn-A-Prep II" . Class 5 Preparation Outlines. Four facial surfaces are represented to represent shapes of Class 5 cavity preparations, two as initial lesions and two as removal of old restorations.	
8		Integrated Sciences: Tissues of the Body	Bone : structure and function, types (cortical, trabecular, woven, histological appearance. Cells in bone and their function.		Muscle : types, structure, contraction and its control		OMFS 621 Geriatric Health and Functional Issues . Age related vision (cataract, macular degeneration, glaucoma and diabetic retinopathy), hearing, mobility. Cognitive impairment, dementias and Alzheimers (see also Neurological Disorders). Diabetes (see also endocrine and metabolic disorders). HS 641 Medications for memory loss. (For access to care, see "defects of limb and skeleton").		8:00am-5:00pm	BSS501 Introduction to Health Systems III The Safety-Net Role, organization, and financing. Policy: Impact of federal, state, and local policy. The Public Health Lens Understanding population Health. Session Review	Continuation of "Learn-A-Prep II" . Students practice box shapes with angles on the edge of the "Learn-A-Prep II" block to allow students to prepare and view convergent boxes, as would be cut in Class 2 amalgam preparations. There are also semicircles for students to practice possible shapes for Class 2 preparations for bonded resin composite restorations.	
9		Integrated Sciences: Basic Embryology	OMFS 621 Introduction to Human Development (Book: Developing Human, Moore, Chapter 1) The first 1-10 weeks, descriptive terms used. Summary of the first week through birth. (Chapter 21) Epigenetics, stem cells, and common signalling pathways		HS 522 Systemic vs pulmonary circulation, blood pressure , contraction, nodes, action potentials. Structural defects of the heart, arrhythmias, ECG, how to read it. How to take blood pressure and the significance of high and low blood pressure. "Normal" values. Extrinsic control of the heart, exercise, sympathetic drive and parasympathetic drive. B receptors and B blockers. Intrinsic control of the heart				8:00-5:00	BSS502 Introduction to Health Systems IV Student presentations	Virtual patient. Introduction of Dentofrom/ Typodont . Mount typodonts and introduce clock positions. Faculty will demonstrate proper ergonomic postures. HIPAA, OSHA Operatory Disinfection and Setup. Moisture Control	
10		Integrated Sciences: Cardiovascular and Circulatory Systems HS 522	HS 522 Dental significance of CVS : importance of medical history including medications. Purpose of CVS and pulmonary systems and homeostasis. Pump mechanism of the heart, stroke volume, cardiac output and heart rate. Anatomy of the heart and blood flow, valves.		HS 522 Coronary artery disease , clinical complications (B blockers, local anesthetics). Blood pressure regulation, baroreceptors, vasodilation and constriction. Antihypertensive drugs: B blockers, calcium channel blockers, ACE inhibitors.		HS 522 Cardiovascular Disease : Ischemic heart disease, coronary artery disease, myocardial infarction, acute coronary syndrome, hypertension, heart failure, congenital heart disease, valvular heart disease, infective endocarditis, dysrhythmia. Medical emergencies in the dental office related to cardiovascular disease. HS 641 Common medications for cardiovascular disease and oral adverse drug reaction and dental implications. Oral lesions in patients with substance use disorder and modifications of dental care.		8:00-5:00	Odont 522 Cariology Introduction and overview History of caries, current concepts of etiology Microflora and diet Sugar, sugar substitutes and dental deposits	Principles of conservative tooth preparations . Sealants, silver diamine fluoride, preventive resin restoration	
11		Integrated Sciences: Cardiovascular and Circulatory Systems HS 522	HS 522 Circulatory system : anatomy, vessels and their basic structure, valves. Blood flow and regulation. Effect of stress on blood pressure, B and A receptors		HS 522 Pulmonary system : anatomy and function. Breathing, gas exchange, control of breathing, Pneumothorax and asthma.		HS 522 Blood pressure and its clinical significance. How to take blood pressure. Identification of underlying medical conditions. Pacemakers and dental significance.		8:00-5:00	Odont 522 Cariology I Histology of dental caries, caries activity test Dentrifices Sealants I	Introduction to Dental Materials: Composite resins . Continuation of minimal preparation and sealant restorations. Adhesion to enamel and dentin.	
12		Integrated Sciences: Pulmonary Systems HS 522	HS 522 Blood pressure , effect of posture on blood distribution, skeletal muscle pump		Synapses and neurotransmitters , glia (Schwann cells and oligodendrocytes), myelin sheath. Astrocytes and microglia.		HS 522 Pulmonary Disease and dental significance: Asthma, cystic fibrosis, tuberculosis, lung cancer, lung transplantation. Medical emergencies in the dental office related to pulmonary disease.		8:00-10:00	Odont 522 Cariology II Sealants II Fluorides I Fluorides II Prevention of caries	Dental materials: bonding agents, photocuring and polymerization . Practice isolation techniques and light curing. Introduce pulpal considerations	

Exhibit C

13		Integrated Sciences: The Nervous System	Anatomy: CNS, PNS. Structural components of the nervous system, neurones and their function (membrane potential, action potential).		HS 512 The Autonomic nervous system , function, autonomic ganglion, neurotransmitters. Nervous patients and the response of the sympathetic nervous system. Drugs that inhibit the autonomic nervous system and their side effects.		Neurological Disorders: Parkinson's, Multiple Sclerosis, Stroke, ALS, Traumatic Brain Injury, Epilepsy, Seizures, Alzheimers and dementias (see also Dental Care for Geriatric Patients), Epidemiology. HS 641 medications, and dental management.		Odont 522 Cariology III Summary and Overview	Continue Dental Materials: Physical and Mechanical Properties and Dental Materials Fact Sheet. Review for final exam.	
14		Integrated Sciences: The Nervous System HS 512	HS 512 Anatomy of the Peripheral and Somatic Nerves and Spinal Cord. Structure of the peripheral nerves. Spinal and cranial nerves, anatomy and connection to the spinal cord. Dorsal root, ventral root. White and grey matter, dorsal and ventral horns.		HS 512 The brain: anatomy and function. Sensory and motor pathways. Injuries to the motor pathway.		HS 512 Neurodevelopment Disorders: Intellectual disability, Downs Syndrome, Cerebral Palsy, Autism Spectrum, ADHD. Dental evaluation and behavioral assessment (including legal guardianship). Oral side effects and interactions of drugs used. Dental treatment modification. Psychiatric Disorders: Anxiety, Obsessive-Compulsive, Posttraumatic stress, Mood disorders, Psychotic Disorders, Eating Disorders, etiology, medical management and HS 641 oral side effects of medications. Assessment for dental treatment and dental treatment modification.		OMFS 851 Introduction to Radiographic Analysis (Book: Exercises in Oral Radiology and Interpretation, Langlais, chapter 1) Normal anatomy of jaws: linking anatomic diagrams to radiographic appearance. (Book: Oral Radiology Principles and Interpretation, chapter 18 dental caries) Radiographic appearance of dental caries.	Final exam. Dental Materials: Biomaterials and Biocompatibility	
15			Final								
			Break								
		Integrated Sciences: Hematology HS 511	HS 511 Red Cells and platelets: Hemostasis. Clotting mechanisms (also, see oral pathology). Oxygen transport, hemoglobin, carbon monoxide, tissue hypoxia. CO2 and bicarbonate transport; oxygen and carbon dioxide exchange in the lungs. Normal CBC values.		HS 511 Case presentation , key questions to ask patients, and dental treatment modifications for leukemias, lymphoma and multiple myeloma (radiographic appearance). (Clotting cascade: see oral pathology)		HS 511 Bleeding disorders: Platelet, coagulation, drug-induced. Coordination of care with physician. Laboratory testing and significance of results. Dental treatment modifications. Oral lesions of patients with bleeding disorders.		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Introduction to Anterior restorations. Class V Composite. Direct anterior restorations.	
1		Integrated Sciences: Immunology	Barriers in host defense: anatomical (skin/mucosa) and physiological (saliva and constituents). Microbiological (commensals, normal oral flora). Commensal microbiota - Host immune response balance. Innate Immunity: Molecular and cellular elements.		Microbial peptides and innate immunity: cytokines, complement system		HS 521 Autoimmune and Connective Tissue Disorders. Systemic lupus erythematosus, rheumatoid arthritis, Sjogren's syndrome, scleroderma, fibromyalgia. Coordination of care, HS 641 medications and oral presentation. Potential dental emergencies		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.		
2		Integrated Sciences: Immunology	Cells of innate immunity. Functions of cells, Innate immune signalling, chemotaxis, interferon		Adaptive immunity: B and T cells and antibodies (immunoglobulin classes and subclasses). Antigens. Antigen presentation and T cell activation. Self tolerance.				OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Direct posterior esthetic/Composite restorations. Shade and color matching exercises.	
3		Integrated Sciences: Immunology	Inflammation: Acute, chronic and immune response during infection (also see inflammation in oral pathology). Genetic variation.		Malfunction of the Immune System: Primary and secondary immunodeficiencies (HIV, autoimmune-Sjogren's, Pemphigus vulgaris and SLE and other examples). Hypersensitivity/ allergies; type iv hypersensitivity and examples.		Odont 521 HIV: Human Acquired Immune Deficiency Syndrome and Related Conditions. Etiology. Defining conditions of AIDS. Coordination of care. Medical management, laboratory testing and its significance to dental care. Dental management of the HIV patient. Oral manifestations. Medications used in HIV and their interactions. The management of occupational blood exposures.		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Caries Classification, Etiology and Epidemiology. CAMBRA. Caries Process, Detection and Diagnosis. Salivary. Impact on caries Process. Root caries and fluoride releasing materials.	
4		Integrated Sciences: Immunology	Immunity and vaccinations. Health issues around decisions to vaccinate. Vaccination programs in the US and infection risks to healthcare providers.		Case Presentation: A male patient 18 years attends university and moves away from home. He comes in to see his dentist after returning 6 months into the program, and complains of bleeding gums. After providing oral hygiene instruction and a cleaning (oral prophylaxis), the bleeding stops. Discuss the possible etiology of this complaint. What visual signs will you see before the treatment, as well as after the treatment?		Odont 521 Women's health. Puberty, menses, pregnancy, menopause, osteoporosis, breast cancer. Etiology, epidemiology, coordination of care; Laboratory testing and medical management. Treatment modifications. Caries and periodontal disease during pregnancy. Contraception. HS 641 Medications during pregnancy and breastfeeding. Bisphosphonate use for osteoporosis and dental complications. Violence against women.		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Clinical photography, Smile Analysis, Ergonomic Instruction. Indirect Vision and Lingual Pit. Amalgam preparations and fillings.	
5									OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Review of Amalgam Material. Class I Amalgam, Class II Amalgam prep and restoration	
6		Integrated Sciences: Oral Microbiology Odont 512	Odont 512 Clinical relevance of normal oral flora , oral infections and their impact on health. Gram positive and gram negative bacteria, aerobic, anaerobic and facultative anaerobic bacteria, examples. Key pathogens in health and periodontal disease.		Odont 512 Fungi, viruses and lesions associated with viruses. HPV 16 and predisposition to cancer. Testing for the presence of viruses and immunization.		Introduction to Periodontal Disease I. Periodontium in health, gross and microscopic features. The correlation of clinical and histopathological features of the periodontal pocket; gingivitis; periodontitis acute and chronic. New Classification System: Stage I-IV and Rate of Progression A-C		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Principles of Esthetic Inlays/Onlays and Gold restorations. Introduce mock clinical treatment planning presentations. Assign virtual patient to each group to begin case preparation.	
7		Integrated Sciences: Oral Microbiology Odont 512	Odont 512 Oral Microenvironments , pH, microbial colonization. Dental plaque formation, acquired pellicle. Mutualistic relationships between bacteria, nutritional co-dependencies. Antagonistic colonies and bacteriocins.		Odont 512 Intermicrobial signalling. Plaque extracellular matrix and biofilm formation.		Odont 512 Introduction to Periodontal Disease II. Biofilm and periodontal microbiology; increased resistance of bacteria in biofilm. Colonization, supra- and sub- gingival plaque, calculus. Primary and secondary colonizers in plaque. The ecologic plaque hypothesis. Transmissibility of bacterial plaque between patients.		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Review: Cavity preparations, materials selection, instrument utilization, ergonomic positioning	
8		Integrated Sciences: Oral Microbiology	Microbiology of caries. Prevalence. Types of carious lesions. Process. Bacteria associated with carious lesions. Cariogenic bacteria, examples and characteristics.		Microbiology of Periodontal disease t gingivitis, periodontitis and peri-implantitis. Host factors; immune response and inflammation. Bacterial factors; proteases and tissue breakdown. Etiology.		Odont 512 Introduction to Periodontal Disease III: History (chief complaint, medical history, dental history) and examination (EO, IO mucosa, teeth); periodontal examination (tooth mobility, plaque and calculus, probing depths, recession, bleeding on probing, furcation involvement); palpation, suppuration, periodontal abscess; radiographs (vertical bitewings, periapicals, panoramic, other imaging). Diagnostic casts.		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Mock clinical treatment planning presentation. Simulated Clinical cases and competency examinations.	
9		Integrated Sciences: Oral Microbiology	Odont 512 Microbiology of other oral infections: Endodontic infections: bacteria involved, progression and pulp necrosis. Bone infections: Osteomyelitis and its association with bisphosphonate drugs, alveolar osteitis. Fungal infections: Candida, types of infection, management. Viral infections: HSV1, EBV (EBV and HIV, EBV and Burkitt's lymphoma; EBV and nasopharyngeal carcinoma), HSV8 (and Kaposi's sarcoma in HIV patients). Cocksackie virus (hand, foot and mouth with herpangina), HPV16 and oral squamous carcinoma. HPV and oral verruca vulgaris.		Odont 512 Microbiology of the oral cavity: balance and normal flora. Antibiotic stewardship: The dangers of inappropriate and overuse of antibiotics.		Odont 512 Introduction to Periodontal Disease IV: Periodontal disease and bone loss. Bone destruction patterns (vertical, horizontal, osseous craters, reverse architecture). Bony furcation involvement. Radiographic appearance of bone loss and clinical implications.		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Dental Materials: Impression materials and Alginate Impression Techniques. Introduce Gypsum Products and Demonstrate pouring Molds.	
10		Integrated Sciences: Oral Pathology HS 521	HS 521 Etiology of Disease: Environmental and Genetic; examples and mechanisms of disease. Cell injury: reversible and irreversible and sequelae. Neoplasia: Benign and malignant and metastasis		HS 521 Acute inflammation , vascular events, edema and complement. Clotting cascade (see also hematology), cellular events, pain, outcome.		HS 521 Immunological and mucocutaneous disease. Allergies, graft-versus-host disease. Oral presentation and management of: Vestibulobulbous conditions, erythema multiforme; Aphthous stomatitis. Behcets disease. Lichen Planus.		OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Introduction to Four Handed Dentistry. Hand instrumentation, Instrument sharpening and maintenance.	
11		Integrated Sciences: Oral Pathology HS 521	HS 521 Chronic inflammation: Cells involved, process. Examples, features, cells involved, tissue repair and tissue destruction. Granulomatous inflammation (TB, leprosy, Chron's, sarcoidosis, sutures and talc.		HS 521 Cancer: Oral Pathology, Case studies and slides		HS 521 Head and Neck Cancer. Risk factors, Common cancers by location. Mortality. Signs and symptoms. Screening and current ADA protocol for biopsy. Biopsies. Tumor grading and prognosis. Management and treatment of head and neck cancer. Chemotherapy and radiation treatment and dental care, and dental complications.			Principles of Fixed Prosthesis. Reduction, Path of Insertion Premolar, Half Crown Preparation. Retention, resistance and margin design.	

Exhibit C

12		Integrated Sciences: Oral Pathology HS 521	HS 521 Oral Pathology: Case studies and slides		HS 521 Oral Pathology: Case studies and slides		HS 641 Introduction to Clinical Pharmacology I: Antimicrobial drugs. Medications used to control pain and their side effects. Central effects of opioids;				Introduction to Occlusion and the Masticatory System. Discuss the importance of understanding occlusion and the design of the masticatory system. Relay the clinical significance of Static occlusion, Centric Occlusion, Centric Relation.	
13		Integrated Sciences: Oral Pathology HS 521	Case Studies: Team Learning		Case Studies: Team Learning		HS 641 Introduction to Clinical Pharmacology II: Local anesthetics, chemistry and classification, influence of pH; Mechanisms of action. Impact on CNS, CVS, myocardium and peripheral vasculature.				How to determine centric relation or adapted centric posture? Introduce methods for determining and recording centric relation. Practice recording centric relation on group members.	
14		Integrated Sciences: Oral Pathology HS 521					HS 641 Introduction to Clinical Pharmacology III: Medications used to manage bacterial infections and their side effects (see also antibacterial stewardship)				Articulator Introduction and Whip Mix Face bow transfer and understanding vertical dimension. Introducing the facebow procedure.	
15										OMFS 532 Surgical Anatomy of the Head and Neck. Anterior and posterior triangles of the neck, infratemporal fossa, salivary glands.	Articulator Introduction and Whip Mix Articulator. Face bow transfer and understanding vertical dimension. Introducing the facebow procedure.	
		Integrated Sciences: Head and Neck Anatomy OMFS 532	OMFS 532 Cranial nerves I: Description and innervation		OMFS 532 Cranial nerves II: Description and innervation. How to test function.						Physiologic vs. Pathologic Occlusion, Mandibular Movement	
1		Integrated Sciences: Head and Neck Anatomy OMFS 532	OMFS 532 The Neck: Skeletal components of the neck, muscles of the neck. The Face: Skeletal components of the face, muscles of facial expression.		OMFS 532 Nerve supply to the neck and face: muscles, skin, blood vessels of the head and neck. Lymphatic drainage of the head and neck		OMFS 621 Defects of limbs and skeleton. Amputation, spinal cord injury, scoliosis. Coordination of care, modification of dental care. Wheelchair transfer to dental chair. Adaptations to oral care devices (see also Geriatric Health). Access to care issues.					
2		Integrated Sciences: Head and Neck Anatomy HS 521	Odont 521 Temporomandibular Joint: Muscle and ligament attachments, innervation, blood supply. Muscles of mastication.		Odont 521 The oral cavity: Muscles attachments, innervation, blood supply and anatomy.		Odont 521 Obstructive Sleep Apnea Etiology, symptoms, testing and classification. Possible sequelae. Dental management and medical management.				Introduction to removable prosthesis: Anterior Denture Teeth Set Up and Denture Rims. Denture occlusion and Posterior Teeth Set Up	
3		Integrated Sciences: Head and Neck Anatomy Odont 521	Odont 521 Sensory innervation of the oral cavity		Odont 521 The pharynx and larynx, the thyroid, the orbit, the paranasal air sinuses						Denture fabrication. Practice impression taking, fabricate preliminary cast and custom impression tray. Master impression using border molded custom tray with PVS or polyether.	
4		Integrated Sciences: Tooth Development, Morphology and Supporting Structures Odont 521	Odont 521 Stages of tooth development, dentinogenesis and mineralization, root formation, amelogenesis, enamel mineralization		Odont 521 Epithelial-Mesenchymal Interactions in Tooth Development		Odont 521; OMFS 511 Developmental Defects of the Craniofacial Complex and Orthopedic Disorders. Hereditary diseases/conditions (AJ, DL, Ectodermal Dysplasia, Epidermolysis Bullosa), Orofacial Clefts.				Introduction to Digital Dentistry. CAD CAM restoration Design and tutorial in software use.	
5		Integrated Sciences: Tooth Development, Morphology and Supporting Structures Odont 521	Odont 521 Teeth and Supporting Structures: Development, alveolar bone, junctional epithelium. Tooth morphology. Development and Eruption Dates		Review of Tooth Development, Morphology and Supporting Structures. Final Summative Exam.						Indications for Intraoral Scanners. Digital impressions, surgical guide fabrication, full arch or single unit and multi unit restorations.	
6		Integrated Sciences: Embryology and Craniofacial Development Odont 521	Odont 521 Jaws and Skeleton, Development of the TMJ		Odont 521 Cranial and Facial Structures. Tongue, palate, craniofacial syndromes		OMFS 511 Dental Care for Patients with Orofacial Clefts at All Stages of Life. Prosthetic Considerations.				Group activity of scanning peer's dentition and reinforcing digital work flow.	
7		Integrated Sciences: Embryology and Craniofacial Development Odont 521	Odont 521 Temporomandibular Joint Dysfunction Syndrome, Clenching, attrition, and sequelae								Introduction to Single Implant restorations. Screw versus Cement Retained Crowns. Hands on implant restoration workshops. Abutment selection, impression taking (analog and digital).	
8		Integrated Sciences: Saliva and Salivary Glands	Structure and Function, formation of saliva, innervation of the glands, signalling		Salivary Secretion: Secretory mechanisms, protein secretion, composition and function of saliva, salivary proteins						Implant supported dentures. Overdenture (locator) hands on workshop.	
9		Integrated Sciences: Dental Materials	Challenges to Materials in the Oral Cavity. Bonds. Metals and Alloys		Intermetallic Compounds, Ceramics and Glasses, Polymers, Composites						Implant materials. Titanium and Ceramic.	
10		Integrated Sciences: Dental Materials	Physical and Mechanical Properties, Thermal Properties, Colors and Esthetics		Safety, Adverse Reactions to Materials, Legal and Regulatory Requirements. Biocompatibility Testing (in vitro, in vivo and clinical evaluation)						Software introduction for implant restoration treatment planning	
11		Integrated Sciences: Dental Materials	Dental Implants and Osseointegration		Lithium disilicates and Nanostructure Composites						Final instrument, kit and typodont clean up/check out	
12		Integrated Sciences	Integrated Case Presentations		Integrated Case Presentations						Final instrument, kit and typodont clean up/check out	
13		Integrated Sciences	Integrated Case Presentations		Integrated Case Presentations							
14		Integrated Sciences	OSCE		OSCE						Integrated Case Presentations

California Northstate University College of Dental Medicine

Course Syllabus

Course #	Course Title	Credits	Year	Term
BSS 502	Introduction to Health Systems	1	DS 1	Fall

Course Description

This course will provide students with an understanding of health systems in the United State and other countries that are influencing the evolution of the oral health industry. It will present an overview of the major trends and forces shaping the oral health industry and direction that dental care and dental practice is likely to take in the next several decades.

Course Objectives:

1. Describe the U.S. health and oral health care systems.
2. List and explain factors driving change in the U.S. health care systems.
3. Discuss disruptive innovations becoming evident in oral health care delivery.
4. Explain the concept of value-based care and the components of systems able to improve population oral health and lower costs of doing so.

Maximum Enrollment: 80

Course Topics

Week	Topic
1	Overview of the U.S. health care system Comparison of the U.S. health care system with other developed countries in terms of organization, financing, expenditures and results
2	Overview of the U.S. oral health care system Organization and components of the U.S. oral health care system. Including delivery system, financing, consolidation. Understanding of who is getting oral health care and how, and who is not. Role and potential for disruptive innovation in oral health services delivery.

3	Oral health disparities and barriers to oral health and oral health care Who gets oral health care and who does not. The role of oral health care in obtaining and maintaining oral health.
4	Changing concepts of dental care – prevention and behavior support science Declining role of surgical interventions. Increasing role of community-based care. Principles of chronic disease management.
5	Value in health care National goal: The Quadruple Aim. Evolution from quality movement. Progress and impact on oral health care.
6	Workforce: Expanding role of allied oral health personnel and integration with general health care systems Review of types of allied personnel in California and other states: Evolution and trends.
7	Telehealth-connected-teams and Virtual Dental Homes Role of telehealth-connected teams and Virtual Dental Homes in reaching populations who do not traditionally receive dental care, lowering cost of delivery and lowering cost of consequences of untreated disease.
8	Social Determinants of Health: Impact on Oral Health and Oral Health Care Delivery Review of what are social determinants of health and how they impact oral health. Implications for oral health care delivery in an increasingly value-based world. The role of oral health care systems in addressing social determinants of health.
9	The Safety-Net Role, organization, and financing of health centers and safety-net delivery systems. Beyond health centers -the role of community-based oral health care activities.
10	Policy: Impact of federal, state, and local policy on oral health and oral health care delivery What is policy? At what levels does it operate? How does policy get created? How can policy be influenced? What is advocacy? How can oral health professionals influence policy?
11	The Public Health Lens Understanding consideration of population health vs individual health. Implications for oral health and oral health care
12	Student Projects Students pick (or assigned) a topic to prepare a paper and report out to whole class – individual vs groups?
13	Student Projects Students pick (or assigned) a topic to prepare a paper and report out to whole class – individual vs groups?
14	Student Projects Students pick (or assigned) a topic to prepare a paper and report out to whole class – individual vs groups?
15	Student Projects Students pick (or assigned) a topic to prepare a paper and report out to whole class – individual vs groups?

Calendar of Important Dates:

Date	
August 10, 2020	First day of Fall term for all DMD 1 students
August 31, 2020	Group Assignment Selection due
October 19, 2020	Group Assignment Presentation, Groups A, B
October 26, 2020	Group Assignment Presentation, Groups C, D
November 2, 2020	Group Assignment Presentation, Groups E, F
December 14, 2021	Group Assignment Presentation, Groups G, H

Course Coordinator, Instructors and Contact Information

Course Director: Paul Glassman DDS, MA, MBA

Room:

E mail: Paul.Glassman@cnsu.edu

Course Co-Director: Chaula Patel BDS, MA

Room:

E mail: Chaula.Patel@cnsu.edu

Office hours

Classroom and Meeting Times

Room: Classroom xxxx

Time: xxxx 1 hours per week

Prerequisite Courses

None

Required Textbook(s) and Material(s)

Books: TBD

On-line modules to be reviewed prior to class sessions

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

	Points	%
Class attendance and participation	25	25%
Group Assignment	25	25%
Final Examination	50	50%

GRADING

A score of at least 75% of the possible points is required in each grading area listed above to pass the course.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<p>understanding and generally asks questions.</p> <ul style="list-style-type: none"> Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding and asks appropriate questions.</p> <ul style="list-style-type: none"> Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and

medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating

	healthcare	function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care.	<ul style="list-style-type: none"> Does not demonstrate 	<ul style="list-style-type: none"> Demonstrates minimal 	<ul style="list-style-type: none"> Demonstrates sufficient 	<ul style="list-style-type: none"> Demonstrates superb

Exhibit D

Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	awareness of population-based care.	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	-------------------------------------	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to

		linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	--

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> Is not able to correctly identify the problem or issue being considered. Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. Identifies a few, but not all, resources needed for decision making. Demonstrates ability to interpret some information and data but not all. Does not fully or effectively evaluate alternative solutions. Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides 	<ul style="list-style-type: none"> Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. Identifies most of the resources needed. Demonstrates ability to interpret most information and data. Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of 	<ul style="list-style-type: none"> Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. Identifies all appropriate resources. Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or

	decision	rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.	most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	course of action. <ul style="list-style-type: none"> Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	----------	--	--	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

Exhibit D

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking

Exhibit D

2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques	<ul style="list-style-type: none"> Does not acknowledge other viewpoints 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative

Exhibit D

when addressing questions	<ul style="list-style-type: none"> • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Answers are simplistic and lack intellectual depth 	into case conceptualization <ul style="list-style-type: none"> • Adequately answers patient questions 	viewpoints <ul style="list-style-type: none"> • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech

Exhibit D

demeanor	body language • Dresses in attire that is inappropriate	body language • Dresses in attire that is not offensive	body language • Dresses in attire that is professional	<ul style="list-style-type: none">• Uses professional body language• Dresses in attire that is professional, and well-suited for the environment
----------	--	--	---	---

Exhibit D

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources

Exhibit D

		ideas		
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none">• Does not use citations	<ul style="list-style-type: none">• Uses citations but they are not formatted in APA style	<ul style="list-style-type: none">• Demonstrates use of appropriate citations in context	<ul style="list-style-type: none">• Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine

Course Syllabus

Course #	Course Title	Credits	Year	Term
BSS 533	California Dental Practice Act	1	DS2	Summer

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
June 1, 2021	Start Summer session
June XX, 2021	Quiz #1
June XX, 2021	Group projects
July, XX 2021	Final exam and presentations

Course Coordinator, Instructors and Contact Information

Course Director: Joel Whiteman DDS

Room:

E mail:

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

DMD (Course co-director): Paul Glassman DDS

Room:

E-mail:

Office hours: Wednesdays 12:00pm-1:00pm, and 3:00pm-4:00pm (or by appointment)

Holly Jacobson BA (course administrator)

Room: xxx

E mail: holly.jacobson@cnsu.edu

Classroom and Meeting Times

Room: Classroom xxxx

Time: xxxx 2 hours per week

Course Description

This course will cover the California law that governs the practice of dentistry in the State of California. The topics that will be covered will be allowable duties of licensed auxiliary staff, dental licensure and continuing education requirements. The course will also include standard of care, proper record keeping, sedation and special permits as well as appropriate business and professional codes that apply to the dental office.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

1)California Dental Practice Act

2)California Business and Professional codes related to the practice of Dentistry

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
Quiz #1	20%
Final Exam	60%

Team Components	20%
Group Presentations	10%
Peer Evaluations	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)

Incomplete	I
------------	---

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group Projects cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).
Presentation of group cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing. The teams will each have 30 minutes for presentation which is ample time for participation of each member
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

Date	Topics	Readings*	Instructor	Notes
Week 1	Licensure, Continuing education, and Diversion programs	DPA		Case assignments to groups
Week 2	Allowable duties for auxiliary staff (DA, RDA, RDAEF, RDH and RDHAP)	DPA		
Week 3	Standard of Care, Unprofessional conduct, Sedation licensure, proper medications prescribing and special permits	DPA, Business and Professional codes		
Week 4:	Record keeping, Business and Professional codes, Anti-Kickback laws, financial disclosures	DPA, Business and Professional codes		
Week 5:	Final exam and presentations

No.	Course Learning Outcome	DMD PLO	DMD ILO	Learning Hierarchy ^b	Assessment Method
1	Understand the different methods of licensure, how to keep that license active and the responsibilities of a treating dentist.	4,5,6,8	1,2,3,4,5,6	1,2,3	Didactic exam and group presentations
2	Demonstrate an understanding of the allowable duties of each dental auxiliary.	1,3,4,5,6,8	1,2,3,4,5,6	1,2,3	Didactic exam and group presentations
3	Demonstrate an understanding of the ethical and business and professional codes for the State of California.	1,3,4,5,6,8	1,2,3,4,5,6	1,2,3	Didactic exam and group presentations
4	Display an overall understanding of the California Dental Practice Act.	1,3,4,5,6,8	1,2,3,4,5,6	1,2,3	Didactic exam and group presentations

^a plo's appendix A

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension; 2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

- 1) Didactic: lecture and required readings
- 2) Learning Activities: Group Projects
- 3) Peer Assessment

CLO Rubrics

CLO 1: Understand the different methods of licensure, how to keep that license active and the responsibilities of a treating dentist.

Indicators	Initial	Developing	Developed	Proficient
Demonstrate and understanding of licensure and subsequent responsibilities.	Has little to no knowledge of licensure in California.	Begins to display a basic knowledge of licensure and subsequent responsibilities.	Has a detailed knowledge of California licensure and responsibilities of a licensed Dentist.	Consistently applies critical thinking to licensure and the responsibilities associated with it.

CLO 2: Demonstrate an understanding of the allowable duties of each dental auxiliary.

Indicators	Initial	Developing	Developed	Proficient
Demonstrate an understanding of the allowable duties of each dental auxiliary.	Has little to no knowledge of the allowable duties of dental auxiliary personnel.	Has a basic knowledge of the duties allowed to be performed by dental auxiliary personnel.	Has a detailed knowledge of what is allowed in accordance with the DPA.	Consistently applies critical thinking to the dynamic overseeing of dental auxiliary.

CLO 3: Demonstrate an understanding of the ethical and business and professional codes for the State of California.

Indicators	Initial	Developing	Developed	Proficient
Demonstrate an understanding of the ethical and business and professional codes for the State of California.	Has little to no knowledge of the ethical and business and professional codes in California.	Demonstrates a basic knowledge of the ethical and business and professional codes.	Demonstrates a detailed knowledge of the business and professional codes.	Applies critical thinking to the business and professional codes.

CLO 4: Display an overall understanding of the California Dental Practice Act.

Exhibit D

Indicators	Initial	Developing	Developed	Proficient
Demonstrate an overall understanding of the California Dental Practice Act.	Has little to no knowledge of the DPA.	Displays a basic understanding of the DPA.	Has a detailed knowledge of the DPA.	Demonstrates the ability to apply critical thinking towards the DPA.

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<p>understanding and generally asks questions.</p> <ul style="list-style-type: none"> Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding and asks appropriate questions.</p> <ul style="list-style-type: none"> Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and

medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating

	healthcare	function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> • Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> • Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care.	<ul style="list-style-type: none"> • Does not demonstrate 	<ul style="list-style-type: none"> • Demonstrates minimal 	<ul style="list-style-type: none"> • Demonstrates sufficient 	<ul style="list-style-type: none"> • Demonstrates superb

Exhibit D

Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	awareness of population-based care.	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	-------------------------------------	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to

		linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	--

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> Is not able to correctly identify the problem or issue being considered. Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. Identifies a few, but not all, resources needed for decision making. Demonstrates ability to interpret some information and data but not all. Does not fully or effectively evaluate alternative solutions. Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides 	<ul style="list-style-type: none"> Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. Identifies most of the resources needed. Demonstrates ability to interpret most information and data. Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of 	<ul style="list-style-type: none"> Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. Identifies all appropriate resources. Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or

	decision	rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.	most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	course of action. <ul style="list-style-type: none"> Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	----------	--	--	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

Exhibit D

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking

Exhibit D

2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques	<ul style="list-style-type: none"> Does not acknowledge other viewpoints 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative

Exhibit D

when addressing questions	<ul style="list-style-type: none"> • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Answers are simplistic and lack intellectual depth 	into case conceptualization <ul style="list-style-type: none"> • Adequately answers patient questions 	viewpoints <ul style="list-style-type: none"> • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech

Exhibit D

demeanor	body language • Dresses in attire that is inappropriate	body language • Dresses in attire that is not offensive	body language • Dresses in attire that is professional	<ul style="list-style-type: none">• Uses professional body language• Dresses in attire that is professional, and well-suited for the environment

Exhibit D

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources

Exhibit D

		ideas		
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none">• Does not use citations	<ul style="list-style-type: none">• Uses citations but they are not formatted in APA style	<ul style="list-style-type: none">• Demonstrates use of appropriate citations in context	<ul style="list-style-type: none">• Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine

Course Syllabus

Course #	Course Title	Credits	Year	Term
ODONT522	<i>Cariology</i>	3	DS1	Spring

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
August 12, 2021	First day of Fall term for all DMD 1 students
September 2, 2021	First Quiz
September 30, 2021	Midterm exam
November 4, 2021	Second Quiz
December 16, 2021	Final Exam

Course Description

The course is designed to teach student dentist understand the caries disease etiology and the development of the disease. Also the course teaches student dentist how to diagnose the disease, evaluate and access the risk, then able to develop a plan to treat and prevent the caries disease.

Furthermore, the student will learn how to educate patient about the caries disease and how to prevent the disease.

Prerequisite Courses

ODONT 521: Dental Anatomy

Prerequisite Knowledge

A basic knowledge of Dental Anatomy

Required Textbook(s) and Material(s)

Cariology, third edition, by Ernest Newbrun

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
First Quiz	10%
Midterm	25%
Second Quiz	10%
Final Exam	35%

Team Components	20%
CCBL Participation and	10%
Peer Review	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful

	remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group Projects cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).
Presentation of group cases requires the active participation of each team member, preferably presenting the component of the case the student was responsible for developing. The teams will each have 30 minutes for presentation which is ample time for participation of each member
2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

2. Peer Group Assessments
3. Group projects

CLO Rubrics

Odont 522 Cariology Syllabus

Page | 7

CLO 1: Develop a comprehensive understanding of the etiology of caries, what is the caries develop process and the risk factors affect the cavity developing.

Indicators	Initial	Developing	Developed	Proficient
Demonstrates an understanding of the etiology of the caries disease, how the disease develop, and what are the risk factors.	Does not understand the etiology of the caries disease, how the disease develop, and what are the risk factors.	Demonstrates a rudimentary understanding of these elements	Has a detailed understanding of the etiology of the caries disease, how the disease develop and what are the risk factors.	Consistently demonstrates the ability to apply the knowledge and skill as a dental student and can assist other students in this domain

CLO 2: Develop skills in oral diagnosis and develop preventive methods to individual patient

Indicators	Initial	Developing	Developed	Proficient
Demonstrates skills in oral diagnosis and prevention of future disease.	Has no or limited skills in the oral diagnosis and prevention of future disease.	Demonstrates a rudimentary understanding or oral diagnosis and prevention of future disease.	Is capable of applying basic scientific knowledge to clinical examples	Consistently applies biomedical knowledge to clinical situations utilizing innovation and analysis

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<p>understanding and generally asks questions.</p> <ul style="list-style-type: none"> Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding and asks appropriate questions.</p> <ul style="list-style-type: none"> Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and

medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery <p>Does not demonstrate understanding of how to work with different subsystems to deliver oral</p>	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects <p>Demonstrates basic</p>	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating

	healthcare	function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care.	<ul style="list-style-type: none"> Does not demonstrate 	<ul style="list-style-type: none"> Demonstrates minimal 	<ul style="list-style-type: none"> Demonstrates sufficient 	<ul style="list-style-type: none"> Demonstrates superb

Exhibit D

Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	awareness of population-based care.	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	-------------------------------------	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to

		linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	--

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> Is not able to correctly identify the problem or issue being considered. Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. Identifies a few, but not all, resources needed for decision making. Demonstrates ability to interpret some information and data but not all. Does not fully or effectively evaluate alternative solutions. Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides 	<ul style="list-style-type: none"> Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. Identifies most of the resources needed. Demonstrates ability to interpret most information and data. Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of 	<ul style="list-style-type: none"> Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. Identifies all appropriate resources. Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or

	decision	rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.	most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	course of action. <ul style="list-style-type: none"> Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	----------	--	--	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

Exhibit D

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking

Exhibit D

2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques	<ul style="list-style-type: none"> Does not acknowledge other viewpoints 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative

Exhibit D

when addressing questions	<ul style="list-style-type: none"> • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Answers are simplistic and lack intellectual depth 	into case conceptualization <ul style="list-style-type: none"> • Adequately answers patient questions 	viewpoints <ul style="list-style-type: none"> • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech

Exhibit D

demeanor	body language • Dresses in attire that is inappropriate	body language • Dresses in attire that is not offensive	body language • Dresses in attire that is professional	<ul style="list-style-type: none">• Uses professional body language• Dresses in attire that is professional, and well-suited for the environment
----------	--	--	---	---

Exhibit D

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources

Exhibit D

		ideas		
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none">• Does not use citations	<ul style="list-style-type: none">• Uses citations but they are not formatted in APA style	<ul style="list-style-type: none">• Demonstrates use of appropriate citations in context	<ul style="list-style-type: none">• Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine

Course Syllabus

Course #	Course Title	Credits	Year	Term
ODONT 611	Operative Dentistry: LAL and LAB	6	DS 2	Summer/Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
June 1, 2021	Start Summer Session DMD2
June XX, 2021	Quiz #1
July, XX 2021	Midterm/ Summer Session Final
Aug 3, 2021	First Day of Fall Term all DMD 2 students
September XX, 2021	Group project assignment
September XX, 2021	Quiz #2; Lab projects due
October XX, 2021	Quiz #3; Lab projects due
November XX, 2021	Quiz #4; Lab projects due
November XX, 2021	Start operative Competencies
December XX, 2021	Group presentations
December XX, 2021	Lab final

Time: xxxx 2 hours per week

Classroom LAB and Meeting Times

Room: Simulation Lab

Time: xxxxx 8 hours per week (4 credit hours)

Course Description

The course will focus on surgical treatment of caries, degenerative, and congenital diseases of the enamel and dentin. To effectively restore function to teeth through direct restorations a functional knowledge of the dental anatomy, instrumentation and material science is needed. These topics will be discussed in detail in the didactic portion of the course. A focus on minimally invasive procedures for caries management will be emphasized. The laboratory will provide instruction and development of the psychomotor skills necessary to perform direct restorations. A simulated clinical setting will help prepare the students for the treatment of caries and other degenerative diseases of the enamel and dentin through direct restorations.

Prerequisite Courses

ODONT 521: Dental Anatomy

ODONT 522: Cariology

Prerequisite Knowledge

A basic knowledge of Dentinal Anatomy and the biologic process of carious lesions.

Required Textbook(s) and Material(s)

- 1) *Summitt's Fundamentals of Operative Dentistry: A contemporary Approach, 4th Ed, Quintessence Publishing Co, 2013*
- 2) *Sturdevants's Art and Science of Operative Dentistry, 7th Ed, Elsevier Co, 2018*

Technology

1. Computer-assisted instruction (Clickers) and SCANTRON Sheets
2. Web-based course management (Canvas) and Examsoft
3. Audio/Video recordings where applicable
4. PowerPoint
5. Epic electronic health record
6. PACS, DICOM compatible imaging software
7. Dental operator
8. Simulator Lab

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
Quiz #1	5%
Quiz #2	5%
Quiz #3	5%
Quiz #4	5%
Summer Session Final	20%
Final Exam	20%
Lab Exercises/Projects	20%

Team Components	20%
CCBL Participation and	10%
Peer Evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Group Projects cases are to be submitted via CANVAS by 11:59pm PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade for every 24 hours the assignment is turned in late).

Presentation of group cases requires the active participation of each team

member, preferably presenting the component of the case the student was responsible for developing. The teams will each have 30 minutes for presentation which is ample time for participation of each member

2. Grade appeal for any individual assignments (including exams) should be submitted to the course coordinator in writing within 5 business days of grade release.
3. There will be no rounding of the final grade for this course.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

Date	Topics	Readings*	Instructor	Notes
Week 1 LAL	Introduction to Operative Dentistry and Biologic Considerations	Summitt CH 1 and Sturdevant Ch 1	Simonsen	
1: Lab	Typodont equilibration			
Week 2	Patient evaluation and treatment planning	Summitt CH 2,3 and 5		
2: Lab	Hand piece familiarization			
Week 3	Fundamentals of Tooth Preparation, Sealants, SDF and PRR restorations	Sturdevant CH 4		
Week 3: Lab	Begin initial tooth preparations			
Week 4:	Nomenclature and Instrumentation	Summitt CH 7		
Week 4 Lab	Differing tooth preparations			
Week 5:	Summer Session Midterm/Final			

Exhibit D

Week 5 Lab	Minimal Preparation/ sealant Midterm			
Week 6	Adhesion to enamel and Dentin	Summitt CH 9 and Sturdevant CH 5		
Week 6 Lab	Tooth Preparation Projects			
Week 7	Dental Biomaterials and Light Curing	Sturdevant CH 6, 13		
Week 7 Lab	Tooth Preparation Projects			
Week 8	Field Isolation and Pulpal Considerations	Summitt CH 6 and 8		Group Projection Assigned
Week 8 Lab	Isolation techniques/ Tooth preparation projects			
Week 9	Direct Anterior Restorations	Summitt CH 10and Sturdevant CH 8		
Week 9 Lab	Anterior composite projects			
Week 10	Additional Esthetic Procedures	Sturdevant CH 9		
Week 10 Lab	Anterior comp projects			
Week 11	Color and Shade matching	Summitt CH 4 and Sturdevant CH 9		
Week 11 Lab	Shade matching exercises			
Week 12	Direct posterior esthetic/composite restorations	Summitt CH 11 and Sturdevant CH 8		
Week 12 Lab	Direct posterior restorations			

Exhibit D

Week 13	Root Caries and Fluoride Releasing materials	Summitt CH 13, 14		
Week 13 Lab	Class V restorations			
Week 14	Amalgams Restorations	Summitt CH 12 and Sturdevant CH 10		
Week 14 Lab	Amalgam preparations and fillings			
Week 15	Esthetic Inlays/onlays and Gold restorations	Summitt CH 19, 20 and Sturdevant CH 12		
Week 15 Lab	Inlay/onlay preparations			
Week 16	Mock Clinical Treatment Planning			
Week 16 Lab	Start Lab Competencies/ mock cases			
Week 17	Mock Clinical Treatment Planning			
Week 17 Lab	Simulated Clinical Cases/ Competencies			
Week 18	Mock Clinical Treatment Planning			
Week 18 Lab	Simulated Clinical Cases/ Competencies			
Week 19	Mock Clinical Treatment Planning			
Week 19 Lab	Simulated Clinical Cases/ Competencies			
Week 20	Final Exam/ Group project presentations			
Week 20	Lab Competencies/ Lab Final

^b Learning Hierarchy based on Bloom's Taxonomy with 1=Memorization and/or Comprehension;
2=Application and/or Analysis; 3=Synthesis and/or Evaluation.

Teaching/ Learning Methodology

1. LAL: Lecture and active learning **CLO Rubrics**
2. Lab: Sim Lab exercises, assignments.
3. Lab: Sim Lab exercises with digital technologies.
4. Peer Group Assessments
5. Group projects

CLO Rubrics

CLO 1: Develop a comprehensive understanding of the diagnosis of caries as well as the degenerative disease of the enamel and dentin and implement the proper treatment modalities.

Indicators	Initial	Developing	Developed	Proficient
Demonstrates an understanding of how to diagnose and treat the degenerative diseases of the enamel and dentin with direct restorations.	Does not understand how to diagnose and treat the degenerative diseases of the enamel and dentin with direct restorations	Demonstrates a rudimentary understanding of these elements	Has a detailed understanding of the diagnosis and treatment of the degenerative diseases of the enamel and dentin	Consistently demonstrates the ability to apply the knowledge and skill as a dental student and can assist other students in this domain

CLO 2: Develop skills in oral diagnosis and treatment planning for direct restorations.

Indicators	Initial	Developing	Developed	Proficient
Demonstrates skills in oral diagnosis and treatment planning for the restoration of the teeth with a direct restoration.	Has no or limited skills in the oral diagnosis and treatment planning	Demonstrates a rudimentary understanding or oral diagnosis and treatment planning	Is capable of applying basic scientific knowledge to clinical examples	Consistently applies biomedical knowledge to clinical situations utilizing innovation and analysis

CLO 3: Demonstrate the ability to properly remove carious lesions.

Indicators	Initial	Developing	Developed	Proficient
Apply didactic knowledge of tooth preparation to the clinical setting.	Has no or limited ability to apply the didactic knowledge of properly prepare a tooth	Demonstrates a rudimentary ability to prepare a tooth	Is capable of applying didactic knowledge to the clinical preparation of teeth	Consistently applies the didactic knowledge and biomedical sciences to clinical situations

Exhibit D

CLO 4: Demonstrate the ability to restore carious and non-carious lesions with direct restorations.

Indicators	Initial	Developing	Developed	Proficient
Demonstrate the ability to restore prepared teeth with direct restorations	Has no or limited ability to restore teeth with direct restorations	Has a rudimentary understanding and ability to restore teeth with direct restorations	Able to restore teeth with direct restorations	Consistently applies biomedical knowledge to the direct restoring of teeth in a clinical setting

CLO 5: Understand esthetic considerations and demonstrate the ability to directly restore enamel and dentin in an esthetic manner.

Indicators	Initial	Developing	Developed	Proficient
Demonstrates the ability to restore teeth with a direct restoration in an esthetic manner.	Unable to restore teeth in an esthetic manner	Has a rudimentary ability to restore a tooth with an esthetic direct restoration	Consistently applies didactic information to esthetically restore teeth with a direct restoration	Has a complete knowledge of esthetic considerations and is able to apply scientific evidence to artistically restore teeth

CLO 6: Understand Dental Biomaterials and their proper usage.

Indicators	Initial	Developing	Developed	Proficient
Demonstrates an understanding of Dental Biomaterials used in direct dental restorations.	Has little or no knowledge of Dental Biomaterials	Has a rudimentary understanding of Dental Biomaterials and their usage	Demonstrates an understanding of Dental Biomaterial and is able to apply to clinical situation	Consistently applies scientific evidence and understanding of Dental Biomaterial and is able to apply the knowledge in a clinical setting

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<p>understanding and generally asks questions.</p> <ul style="list-style-type: none"> Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding and asks appropriate questions.</p> <ul style="list-style-type: none"> Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and

medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating

	healthcare	function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care.	<ul style="list-style-type: none"> Does not demonstrate 	<ul style="list-style-type: none"> Demonstrates minimal 	<ul style="list-style-type: none"> Demonstrates sufficient 	<ul style="list-style-type: none"> Demonstrates superb

Exhibit D

Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	awareness of population-based care.	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	-------------------------------------	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to

		linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	--

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> Is not able to correctly identify the problem or issue being considered. Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. Identifies a few, but not all, resources needed for decision making. Demonstrates ability to interpret some information and data but not all. Does not fully or effectively evaluate alternative solutions. Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides 	<ul style="list-style-type: none"> Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. Identifies most of the resources needed. Demonstrates ability to interpret most information and data. Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of 	<ul style="list-style-type: none"> Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. Identifies all appropriate resources. Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or

	decision	rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.	most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	course of action. <ul style="list-style-type: none"> Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	----------	--	--	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

Exhibit D

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking

Exhibit D

2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques	<ul style="list-style-type: none"> Does not acknowledge other viewpoints 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative

Exhibit D

when addressing questions	<ul style="list-style-type: none"> • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Answers are simplistic and lack intellectual depth 	into case conceptualization <ul style="list-style-type: none"> • Adequately answers patient questions 	viewpoints <ul style="list-style-type: none"> • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech

Exhibit D

demeanor	body language • Dresses in attire that is inappropriate	body language • Dresses in attire that is not offensive	body language • Dresses in attire that is professional	<ul style="list-style-type: none">• Uses professional body language• Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources

Exhibit D

		ideas		
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none">• Does not use citations	<ul style="list-style-type: none">• Uses citations but they are not formatted in APA style	<ul style="list-style-type: none">• Demonstrates use of appropriate citations in context	<ul style="list-style-type: none">• Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine

Course Syllabus

Course #	Course Title	Credits	Year	Term
OMFS 512	<i>Oral Microbiology/Immunology</i>	3	DS 1	Spring

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
February 2, 2021	Exam 1
March 9, 2021	Exam 2
April 4, 2021	Submission of Group Case Presentation on CANVAS by 11:59pm
April 6, 2021	Group Case Presentations
April 13, 2021	Final Exam

Course Coordinator, Instructors and Contact Information

Rosemary Wu, DMD, MS (course co-director)

Room: xxx

E mail: holly.jacobson@cnsu.edu

Classroom and Meeting Times

Room: Classroom xxxx

Time: xxxx 3 hours per week

Small group/interactive learning will occur in the same classroom during class time.

Course Description

This course is designed to encompass the foundations of immunology and microbiology, with a focus on the relationship to the oral cavity.

The host response resulting in homeostasis, the lack thereof, and the initiation of infection is reviewed, beginning with content on innate and adaptive immunity, immunodeficiency, immune tolerance, autoimmunity, and hypersensitivity.

The pathogenesis and treatment of bacterial, viral, and fungal infections is discussed in depth. In regards to bacteriology, various medically-relevant genera are discussed as well as diagnostic and treatment modalities. The oral microbiome in health and disease is presented including the ecologic niches of the oral region: teeth, periodontium, mucosa, saliva, and nasopharynx. The virology of the upper airway, mouth, and pharynx is presented including HPV, HIV, and acute viral diseases. Mycology is discussed with a focus on fungal infections that present in the oral cavity. Prions and their potential role in disease are discussed.

Small group/interactive learning occurs during the designated class time to facilitate students' learning. A final group case presentation will also take place as indicated on the course schedule.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

1. Lamont, Richard J., George N. Hajishengallis, Hyun (Michael) Koo, and Howard F. Jenkinson. *Oral Microbiology and Immunology*. 3rd ed. Washington, DC: ASM Press, 2019.
2. Levinson, Warren, Peter Chin-Hong, Elizabeth A. Joyce, and Brian Schwartz. *Review of Medical Microbiology and Immunology: A Guide to Clinical Infectious Diseases*. 15th ed. McGraw-Hill Education, 2018.

Technology

- Computer-assisted instruction (Clickers) and SCANTRON Sheets
- Web-based course management (Canvas) and Examsoft
- Audio/Video recordings where applicable
- PowerPoint

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
Exam 1	25%
Exam 2	25%
Final Exam	30%

Team Components	20%
Group Case Presentation	10%
Small Group/Interactive Learning Participation	5%
Peer Review	5%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1. Small group/interactive learning occurs during the designated class time and participation is required. The content of small group/interactive learning discussions will be included on examinations. You are allowed one excused absence (contact the course coordinator to inform them of your absence). Additional absences will result in deduction of points from the "Small Group/Interactive Learning Participation" category.
2. Group Case Presentations are to be submitted via CANVAS by 11:59 PST on the deadline indicated. Only one group member should submit the assignment on behalf of the group. The course coordinator reserves the right to deduct points for late submission (20% of assignment grade deducted for late submission).
3. Grade appeal for any assignments or exams should be submitted to the course coordinator in writing within 5 business days of grade release.
4. There will be no rounding of the final grade for this course.

Key Words

innate immunity, adaptive immunity, immunodeficiency, immune tolerance, autoimmunity, hypersensitivity, oral cavity, bacteria, gram positive, gram negative, pathogenesis, treatment, teeth, periodontium, mucosa, saliva, nasopharynx, viruses, fungal infections, prions

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session is 3 hours, which includes small group/interactive learning time. Students will divide into groups of 5 students for small group/interactive learning activities. Students will be divided into groups of 8 for the Group Case Presentation assignment.

Date	Topics	Readings*	Instructor	Notes
Week 1: Lecture	Introduction to the Immune System and Innate Immunity	Levinson et al: Ch. 57, 58, 63	R. Wu	
Week 1: Small Group/Interactive Learning	Histology of the Innate Immune System			
Week 2: Lecture	Adaptive Immunity: T-Cell-Mediated Immune Response	Levinson et al: Ch. 59 (Origin and T Cells), Ch. 60, Ch.62 (MHC)	K. Keating	
Week 2: Small Group/Interactive Learning	Histology of the Adaptive Immune System			
Week 3: Lecture	Adaptive Immunity: B Cells and the Humoral Immune Response	Levinson et al: Ch. 59 (B Cells), Ch. 61	R. Wu	
Week 3: Small Group/Interactive Learning	Antibody Types and Properties			
Week 4: Lecture	Immunodeficiency, Immune Tolerance, Autoimmunity	Levinson et al: Ch. 65, 66, 68	K. Keating	
Week 4: Small Group/Interactive Learning	Hypersensitivity

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but 	<ul style="list-style-type: none"> Generally demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<p>understanding and generally asks questions.</p> <ul style="list-style-type: none"> Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding and asks appropriate questions.</p> <ul style="list-style-type: none"> Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and

medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery <p>Does not demonstrate understanding of how to work with different subsystems to deliver oral</p>	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects <p>Demonstrates basic</p>	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating

	healthcare	function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care.	<ul style="list-style-type: none"> Does not demonstrate 	<ul style="list-style-type: none"> Demonstrates minimal 	<ul style="list-style-type: none"> Demonstrates sufficient 	<ul style="list-style-type: none"> Demonstrates superb

Exhibit D

Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	awareness of population-based care.	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	-------------------------------------	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to

		linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	--

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> Is not able to correctly identify the problem or issue being considered. Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. Identifies a few, but not all, resources needed for decision making. Demonstrates ability to interpret some information and data but not all. Does not fully or effectively evaluate alternative solutions. Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides 	<ul style="list-style-type: none"> Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. Identifies most of the resources needed. Demonstrates ability to interpret most information and data. Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of 	<ul style="list-style-type: none"> Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. Identifies all appropriate resources. Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or

	decision	rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.	most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	course of action. <ul style="list-style-type: none"> Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	----------	--	--	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

Exhibit D

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking

Exhibit D

2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques	<ul style="list-style-type: none"> Does not acknowledge other viewpoints 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative

Exhibit D

when addressing questions	<ul style="list-style-type: none"> • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Answers are simplistic and lack intellectual depth 	into case conceptualization <ul style="list-style-type: none"> • Adequately answers patient questions 	viewpoints <ul style="list-style-type: none"> • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech

Exhibit D

Course Syllabus

Course #	Course Title	Credits	Year	Term
532	<i>Surgical Anatomy of the Head and Neck</i>	2	DS1	Spring

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Course Description

The course is designed to introduce students to head and neck anatomy and its clinical relevance as related to dentistry.

Students will learn basic embryology and should be able to recognize major anatomical structures of the head and neck. The structures of the viscerocranium that will be presented include osteology, myology, cranial nerves, vasculature, lymphatic drainage, salivary glands, oral cavity, fascial planes and neck anatomy.

Laboratory sessions will focus on clinical recognition and function of anatomic structures, including their abnormalities and disease. Anatomic structures as related to dentistry will be explored, including TMD, landmarks for local anesthesia and the pathway of odontogenic infections.

Prerequisite Courses

None

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

1. **Netter's Head and Neck Anatomy for Dentistry. 3rd Edition. Neil S. Norton**
2. **The Anatomical Basis of Dentistry. 3rd Edition. Bernard Liebgott**
3. **Bates' Guide to Physical Examination and History Taking. 12th Edition. Lynn S. Bickley**

Technology

- Power point
- Audio/Video recordings where applicable
- Web-based course management (Canvas) and Examsoft
- Radiology imaging software

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
First Quiz	10%
Second Quiz	10%
Final Exam	30%
Clinical evaluation practical	30%

Team Components	20%
Group PCS projects	10%
Peer evaluation	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to

Exhibit D

calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

1.

Key Words

Pharyngeal arches and pouches, cleft lip/ palate, skull, maxilla, mandible, muscles of mastication, muscles of facial expression, TMJ, cranial nerves, trigeminal nerve, facial nerve, triangles of the neck, carotid artery, lymph nodes, odontogenic infections, salivary glands, thyroid and parathyroid glands, paranasal sinuses, extraocular muscles

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

Date	Topics	Readings*	Instructor	Notes
Week 1	Introduction to Embryology of the Head and Neck	Norton Chapter 1	McLaughlin/Assael	Pharyngeal arches and pouches
Week 1: Clinic assignment	Disturbances in the Development of the Head and Neck			Syndromes and Cleft Lip/Palate
Week 2	Osteology	Norton Chapter 2		Bones of the skull (cranium and maxilla) and the mandible
Week 2: Clinic assignment	Dental Radiology			Panorex and Cephalometric Films
Week 3	Myology	Norton Chapter 5, 8		
Week 3: clinic assignment	Identification of Muscles of Mastication and Facial Expression			
Week 4:	Anatomy of the Temporomandibular Joint	Norton Chapter 9		
Week 4: clinic assignment	Function and Disorders of the TMJ	Bickley Chapter 16		Articular Disc Perforation, Arthritis, Ankylosis
Week 5:	Cranial Nerves	Norton Chapter 3		

Exhibit D

Week 5: clinic assignment	Cranial Nerve Testing and Disorders	Bickley Chapter 17		Bell's Palsy, Trigeminal Neuralgia
Week 6	Cranial Nerves	Norton Chapter 3		
Week 6: clinic assignment	Local Anesthesia	Norton Chapter 21		Oral Nerve Blocks
Week 7	Arterial Blood Supply and Venous Drainage	Liebgott Chapter 8		
Week 7: clinic assignment	Measuring Blood Pressure and Palpation of the Pulses	Bickley Chapter 4, 12		
Week 8	Lymphatics	Liebgott Chapter 8 Norton Appendix A		
Week 8: clinic assignment	Palpation of Lymph Nodes	Bickley Chapter 7		
Week 9	Oral Cavity and Tongue	Norton Chapter 13, 14		
Week 9: clinic assignment	Clinical Oral Examination and Oral Cancer Screening	Bickley Chapter 7		
Week 10	Salivary Glands	Norton Chapter 6, 13		
Week 10: clinic assignment	Expression and Dysfunction of Salivary Glands			Xerostomia, Mucocoeles, Sialolithiasis, Pathology of the Parotid Gland
Week 11	Anatomy of the Neck	Norton Chapter 4		Triangles of the Neck, Major Vessels
Week 11: clinic assignment	Discussion of Thyroid and Parathyroid Glands	Bickley Chapter 7		Hypothyroidism, Hyperthyroidism
Week 12	Fascial Planes	Norton Chapter 17		

OMFS 5332 Surgical Anatomy of the Head and Neck Syllabus

Exhibit D

Week 12: clinical assignment	Pathways of Odontogenic Infections			Abscess, Ludwig's Angina, Cervical Emphysema
Week 13	Nasal Cavity and Paranasal Sinuses	Norton Chapter 11, 12		
Week 13 : clinic assignment	HEENT Examination and Identification of Sinuses in Imaging	Bickley Chapter 7		
Week 14	Anatomy of the Orbit	Norton Chapter 19		
Week 14: clinic assignment	Testing the Extraocular Muscles and Diseases of the Orbit	Bickley Chapter 7		Diabetic Retinopathy, Glaucoma
Week 15	Final Exam

CLO Rubrics

CLO 1:

Indicators	Initial	Developing	Developed	Proficient

CLO 2:

Indicators	Initial	Developing	Developed	Proficient

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing	<ul style="list-style-type: none"> ● Does not appropriately counsel patients ● Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> ● Counsels patients but leaves out pertinent information needed by patient ● Communicates with basic level of clarity but 	<ul style="list-style-type: none"> ● Generally demonstrates empathy, communicates accurate information clearly, checks for understanding ● Seeks to ensure 	<ul style="list-style-type: none"> ● Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding ● Ensures

OMFS 5332 Surgical Anatomy of the Head and Neck Syllabus

Page | 10

learning	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<p>understanding and generally asks questions.</p> <ul style="list-style-type: none"> Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding and asks appropriate questions.</p> <ul style="list-style-type: none"> Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
<p>patient advocacy. Represents the patient's best interests</p>	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
<p>patient-centered care. Demonstrates ability to provide</p>	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered

Exhibit D

patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
stems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery <p>Does not demonstrate understanding of how to work</p>	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete 	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects

	with different subsystems to deliver oral healthcare	how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the

				practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> • Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> • Demonstrates minimal understanding of population-based care and how it influences patient-centered care • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> • Demonstrates sufficient understanding of population-based care and how it influences patient-centered care • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<ul style="list-style-type: none"> • Demonstrates superb understanding of population-based care and how it influences patient-centered care • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness

Exhibit D

		cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	---	---	---

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> ● Is not able to correctly identify the problem or issue being considered. ● Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. ● Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. ● Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. ● Does not propose a solution or does not articulate decision. Does not adequately provide 	<ul style="list-style-type: none"> ● Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. ● Identifies a few, but not all, resources needed for decision making. ● Demonstrates ability to interpret some information and data but not all. ● Does not fully or effectively evaluate alternative solutions. ● Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, 	<ul style="list-style-type: none"> ● Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. ● Identifies most of the resources needed. ● Demonstrates ability to interpret most information and data. ● Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. ● Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen 	<ul style="list-style-type: none"> ● Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. ● Identifies all appropriate resources. ● Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. ● Considers and evaluates possible solutions effectively and thoroughly. Evaluation

	rationale for selected alternative or decision	etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.	demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	leads to sound, logical, and “best” decision or course of action. ● Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	--	--	---	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
Orofacial pain/temporomandibular / disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
Legal aspects s legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
Business management s business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

Exhibit D

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused

Exhibit D

		under discussion		thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients

Exhibit D

3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> Does not acknowledge other viewpoints Has great difficulty answering questions 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them into case conceptualization Adequately answers patient questions 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative viewpoints Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> Vocal delivery is too soft or too fast Long, unintended silences and/or speech disruptions frequently distract audience Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> Vocal delivery is audible Speech rate or volume disruptions occasionally distract from comprehension Attempts to engage audience 	<ul style="list-style-type: none"> Vocal delivery is varied and dynamic Speech rate, volume, and tone enhance listener interest and facilitate understanding Generally engages audience 	<ul style="list-style-type: none"> Vocal delivery is varied and dynamic Speech rate, volume, and tone enhance listener interest and facilitate understanding Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> Consistently demonstrates personal accountability and responsibility for work completed

Exhibit D

4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

Exhibit D

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel

Exhibit D

6.2. Demonstrates appropriate incorporation of references	● Does not incorporate references	● Incorporates references from psychological sources that do not clearly support ideas	● Incorporates relevant references that generally supports ideas	● Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	● Does not use citations	● Uses citations but they are not formatted in APA style	● Demonstrates use of appropriate citations in context	● Uses properly cited references and includes all necessary information in reference list

Course Syllabus

Course #	Course Title	Credits	Year	Term
OMFS 631	<i>Dental Anesthesiology I: Local Anesthesia</i>	3	DS 2	Fall

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Prerequisite Knowledge

None

Required Textbook(s) and Material(s)

Handbook of Local Anesthesia Stanley F. Malamed <6th edition available, new edition coming before class will be given>

AAOMS Parameters of Care- Journal of Oral and Maxillofacial Surgery, Vol. 75, Number 8, Suppl 1 August 2017

Technology

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	%
Exam I	20%
Exam II	20%
Exam III	20%
Final Exam-Comprehensive	40%

Team Components	%
	%

	%
--	---

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

Date	Topics	Readings*	Instructor	Notes

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
Education. Demonstrates ability to educate all audiences through effectively communicating information and	<ul style="list-style-type: none"> ● Does not appropriately counsel patients ● Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> ● Counsels patients but leaves out pertinent information needed by patient ● Communicates with basic level of clarity but 	<ul style="list-style-type: none"> ● Generally demonstrates empathy, communicates accurate information clearly, checks for understanding 	<ul style="list-style-type: none"> ● Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding

assessing learning	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Seeks to ensure understanding and generally asks questions. Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<ul style="list-style-type: none"> Ensures understanding and asks appropriate questions. Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
patient-centered care. Demonstrates ability to provide	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered

patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	the medication expert level; e.g., demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	expert in some, but not all, areas as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	expert (generally demonstrates ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	care as the expert (collects and interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
stems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery <p>Does not demonstrate understanding of how to work with different</p>	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete 	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects

	subsystems to deliver oral healthcare	how to work with different subsystems and how they function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	comprehension of the effects Demonstrates basic understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	of healthcare delivery by demonstrating abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the

				practice and delivery of oral healthcare
2.4. Population-based care. Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	<ul style="list-style-type: none"> • Does not demonstrate awareness of population-based care. 	<ul style="list-style-type: none"> • Demonstrates minimal understanding of population-based care and how it influences patient-centered care • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<ul style="list-style-type: none"> • Demonstrates sufficient understanding of population-based care and how it influences patient-centered care • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<ul style="list-style-type: none"> • Demonstrates superb understanding of population-based care and how it influences patient-centered care • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness

		cultural and linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	to cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	---	---	---

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally demonstrates logical reasoning in oral communications in patient care. Generally demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> ● Is not able to correctly identify the problem or issue being considered. ● Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. ● Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. ● Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. ● Does not propose a solution or does not articulate decision. Does not adequately provide 	<ul style="list-style-type: none"> ● Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. ● Identifies a few, but not all, resources needed for decision making. ● Demonstrates ability to interpret some information and data but not all. ● Does not fully or effectively evaluate alternative solutions. ● Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to 	<ul style="list-style-type: none"> ● Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. ● Identifies most of the resources needed. ● Demonstrates ability to interpret most information and data. ● Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. ● Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen 	<ul style="list-style-type: none"> ● Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. ● Identifies all appropriate resources. ● Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. ● Considers and evaluates possible solutions effectively and thoroughly. Evaluation

	<p>rationale for selected alternative or decision</p>	<p>issue at hand, etc.). Provides rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.</p>	<p>demonstrate consideration of most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.</p>	<p>leads to sound, logical, and “best” decision or course of action.</p> <ul style="list-style-type: none"> ● Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	---	--	--	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	● Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health.	● Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health.	● Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health.	● Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
Orofacial pain/temporomandibular / disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	● Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.	● Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.	● Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.	● Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	● Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases.	● Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases.	● Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases.	● Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
Legal aspects s legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
Business management s business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

Exhibit D

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear

Exhibit D

		analyze subject under discussion		and focused thinking
2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients

Exhibit D

3.4. Demonstrates appropriate active listening techniques when addressing questions	<ul style="list-style-type: none"> Does not acknowledge other viewpoints Has great difficulty answering questions 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints Answers are simplistic and lack intellectual depth 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them into case conceptualization Adequately answers patient questions 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative viewpoints Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> Vocal delivery is too soft or too fast Long, unintended silences and/or speech disruptions frequently distract audience Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> Vocal delivery is audible Speech rate or volume disruptions occasionally distract from comprehension Attempts to engage audience 	<ul style="list-style-type: none"> Vocal delivery is varied and dynamic Speech rate, volume, and tone enhance listener interest and facilitate understanding Generally engages audience 	<ul style="list-style-type: none"> Vocal delivery is varied and dynamic Speech rate, volume, and tone enhance listener interest and facilitate understanding Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> Generally demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> Consistently demonstrates personal accountability and responsibility for work completed

Exhibit D

4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional demeanor	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate body language • Dresses in attire that is inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable body language • Dresses in attire that is not offensive 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate body language • Dresses in attire that is professional 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech • Uses professional body language • Dresses in attire that is professional, and well-suited for the environment

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel

Exhibit D

6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none">• Does not incorporate references	<ul style="list-style-type: none">• Incorporates references from psychological sources that do not clearly support ideas	<ul style="list-style-type: none">• Incorporates relevant references that generally supports ideas	<ul style="list-style-type: none">• Incorporates relevant references from respected psychological sources
6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none">• Does not use citations	<ul style="list-style-type: none">• Uses citations but they are not formatted in APA style	<ul style="list-style-type: none">• Demonstrates use of appropriate citations in context	<ul style="list-style-type: none">• Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine

Course Syllabus

Course #	Course Title	Credits	Year	Term
OMFS 632	Dental Anesthesiology 2: Pain and Anxiety Control, Analgesia, Medical Management of Local Anesthesia Patients	3	DS2	Spring

Credit Hour Policy

For each 15-week semester, one (1) hour of credit is assigned per hour each week of classroom or direct faculty didactic instruction (that is, per hour of lecture or student in-class time) and a minimum of two (2) hours of out-of-class student work (homework). For practicum and internship time, one (1) hour of credit is assigned per three (3) hours each week of student time spent in this activity.

Maximum Enrollment: 80

Calendar of Important Dates:

Date	
August 2021	First day of fall term for DMD 2 Students
September 2021	First Quiz
November 2021	Second Quiz
December 2021	Final Exam

Course Description

Prerequisite Courses

Dental Anesthesiology 1: Local Anesthesia

Prerequisite Knowledge

Understanding of the pharmacokinetics and use of local anesthetics in dentistry

Required Textbook(s) and Material(s)

Handbook of Nitrous Oxide and Oxygen Sedation

4th ed.

Morris S. Clark, BS, BDS, DDS, DSc, FACD

Professor, Oral and Maxillofacial Surgery

Director of Anesthesia, Department of Surgical Dentistry, School of Dental Medicine

Professor of Surgery, School of Medicine, University of Colorado Health Sciences Center, Denver, Colorado

Ann L. Brunick, RDH, MS

Chairperson and Professor, Department of Dental Hygiene, University of South Dakota, Vermillion,

Oral Maxillofacial Studies 632

Technology

Evaluation Components

In keeping with the Team Based Learning (TBL) approach, grades will be determined as follows:

Individual Components	80%
First Quiz	10 %
Second Quiz	10 %
Final Exam	30%
Clinical evaluation practical	30 %

Team Components	20 %
Peer Evaluations	10 %
Group PCS Project	10%

GRADING

All students must demonstrate minimal individual competency. Therefore, students earning less than 75% on the total Individual component score will not have team component scores added to calculate their final course grade. During the course, students who score less than 75% on individual components may be subject to periodic course content review and may receive an Academic Alert.

In order to progress from one semester to the next, students must pass all courses with a letter a grade of C or higher and maintain a minimum cumulative grade point average (GPA) of 2.0. The breakdown for assignment of letter grades and grade points for each letter grade are as follows:

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)

Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

Incomplete

During a semester, a student may not complete all required assignments and/or examinations due to extenuating circumstances, such as, but not limited to, an illness or a family emergency. In such a case, the course director may give a grade of Incomplete for the course. The course with the incomplete grade has to be completed successfully within the time frame as being defined by the student's academic plan, normally in the same academic year, otherwise a leave of absence would be required.

Core-Course Policies

All students are required to adhere to the Academic Policies that impact on student progression and conduct while attending the DMD program, including the following: Academic Progression Policy, Excused Absence Policy, Exam Policy, Course Grade Appeal Policy, Course Add/Drop Policy and Attendance Policy. Refer to the current Student Handbook for the detailed policies.

Course Specific Policies

Key Words: pain, stress, medical and dental history, vital signs, stress management, anxiety, nitrous oxide, oral sedation, inhalation agents, intravenous sedation, general anesthesia, ASA Classification, blood pressure, pregnancy, hemodialysis, drug-drug interactions, heart weight, BMI, temperature, heart rate, endocarditis, antibiotic prophylaxis, anti-coagulants, respiratory rate, emergency management

Topics and Schedule

(Subject to change. Updates will be posted to CANVAS and announced by email)

All readings are in Vital Source, or as assigned and posted to CANVAS

Each didactic session including LAL is 2 hours. Each clinical session is 4 hours. Students are divided into groups of 4 students (groups 1-20) for each of their 3 sessions. Each group of 4 will attend either Monday, Tuesday, Wednesday or Thursday clinic.

Exhibit D

Date	Topics	Readings*	Instructor	Notes
Week 1 Understanding Pain	Pain, Anxiety and Management.	Section 1; Chapter1 Malamed Part 1, Section 3 Clark		
1: Clinic assignment	Case assessment of a dental phobia patient			
Week 2 Pain Management	Spectrum of Pain and Anxiety Control in Dentistry	Section 2 Chpts 2-3 Malamed		
2: Clinic assignment	Conduct pain assessment of patient with new onset of dental pain			
Week 3 Patient Assessment	Patient medical history and Psychologic Evaluation in the Dental Office	Section 2, Chpt 4 Malamed pages 23-46		
Week 3: clinic assignment	Conduct history intake using standardized questionnaire			
Week 4: Patient Assessment	Complicated Medical History	Section 2 Chpt 4 Malamed		
Week 4 Clinic assignment	Conduct medical history assessment of a patient with complicated medical and dental history			
Week 5: Patient Assessment	Patient Physical Examination, vital signs,	Section 2 Chpt 4 Pages 47-55 Malamed		Case assignments X4 to groups
Week 5 clinic assignment	Complete BP, temperature, respiratory rate, heart rate on patient			
Week 6 Patient Co-morbidities/Special Considerations	ASA Classification, post-operative pain management, managing patient risks/comorbidities;	Section 2 Chpt 4 Special Considerations Malamed Part 1, Section 4 Clark		Case assignments to groups
Week 6 clinic	Complete final medical assessment of patient with complicated medical history and physical co-morbidities. <u>Determine consultations.</u>			
Week 7 Treatment Planning for stress and pain	Pain and stress management plan; post operative pain management: non-drug techniques	Section 2 Chpt 4,5 Section VIII Special Considerations Malamed		

Exhibit D

Week 7 clinic	Conduct non-drug techniques to manage patient level of stress and anxiety			
Week 8 Nitrous Oxide Background	History of Nitrous Oxide; history of dentistry and anesthesia; inhalation sedation	Part 1 Sect 1 Clark		
Week 8 clinic	Part I will begin by learning the physical requirements and equipment needed to administer nitrous oxide			
Week 9 Nitrous Oxide Anatomy, equipment	Pharmacokinetics, manufacturing and delivery, equipment, risks, addition, patient assessment,	Part I Sect 4-10 Clark Chapts 11-13 Malamed		
Week 9	Complete patient assessment for administration of nitrous oxide, attach monitoring equipment and assure competency			
Week 10 Nitrous Oxide	Administration of nitrous oxide; monitoring, equipment, anatomy of respiration and airway	Part II Section 8-14- Clark Chpt 14-15 Malamed		
Week 10	Administration of nitrous oxide to fellow classmates			
Week 11 Sedation,	Oral, Rectal, IM and intravenous sedation	Malamed Chapt 7-10		
Week 11	Administration of nitrous oxide to fellow classmates			
Week 12 Intravenous sedation/GA	IV sedation/GA	Malamed Chpts 20-31		
Week 12	IV and IM equipment-understanding venous access, IV, fluids, and intramuscular injections			
Week 13 Emergencies	Preparation for Emergencies	Malamed Chpts 32-34		
Week 13	Mock emergency scenario with nitrous oxide patient			
Week 14 Special Considerations	Pediatric Patient, Geriatric Patient, Compromised patients, medico-legal considerations	Malamed Sect VII Chpt 35-40		
Week 14	Case Report of Group Assignments			
Week 15	Test

Appendix A

Program Learning Outcomes (PLOs) CNU College of Dental Medicine

1. Patient-Centered Care: Demonstrate understanding of healthcare disparities and cultural awareness in patient counseling and patient advocacy
2. Evidence-Based Care: Apply current, evidence-based oral healthcare within the scope of general dentistry
3. Culturally competent, empathic communication: Demonstrate patient centered, empathic, and culturally competent communication and interpersonal skills
4. Oral and Written Communication: Demonstrate sound oral and written communications in patient care
5. Critical Thinking: Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care
6. Ethics and Professionalism: Demonstrate professionalism and ethical decision making
7. Biomedical Sciences Knowledge: Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare
8. Practice Management: Apply legal, regulatory and business management concepts related to provision of oral healthcare services

DMD Program Learning Outcomes (PLOs) Proficiency Rubric

PLO 1: Patient-Centered Care

Demonstrate understanding of healthcare disparities and cultural awareness and capability in patient counseling and providing appropriate patient advocacy

Indicators	Initial	Developing	Developed	Proficient
1.1. Education. Demonstrates ability to educate all audiences through effectively communicating information and assessing learning	<ul style="list-style-type: none"> Does not appropriately counsel patients Does not check for understanding, ask questions, and/or asks inappropriate questions. 	<ul style="list-style-type: none"> Counsels patients but leaves out pertinent information needed by patient Communicates with basic level of clarity but 	<ul style="list-style-type: none"> Generally, demonstrates empathy, communicates accurate information clearly, checks for understanding Seeks to ensure 	<ul style="list-style-type: none"> Consistently demonstrates empathy, communicates accurate information clearly, checks for understanding Ensures

	<ul style="list-style-type: none"> Does not demonstrate the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>does not always check for understanding or rephrase when confusion occurs.</p> <ul style="list-style-type: none"> Demonstrates the ability to find a one or two resources, yet the resources are not the best or most appropriate for providing accurate counseling, consultation and education 	<p>understanding and generally asks questions.</p> <ul style="list-style-type: none"> Frequently demonstrates the ability to find and utilize appropriate resources and references necessary for providing accurate counseling, consultation and education 	<p>understanding and asks appropriate questions.</p> <ul style="list-style-type: none"> Consistently demonstrates the ability to find and utilize appropriate resources and references for providing accurate patient counseling, consultation and education
1.2. Patient advocacy. Represents the patient's best interests	<ul style="list-style-type: none"> Does not demonstrate the ability represent a patient's best interest 	<ul style="list-style-type: none"> Demonstrates awareness of issues that impact a patient Demonstrates minimal ability to articulate these issues but does not demonstrate ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates sufficient awareness of issues that impact a patient Demonstrates ability to articulate these issues Demonstrates ability to sufficiently advocate on a patient's behalf 	<ul style="list-style-type: none"> Demonstrates full awareness of the most important issues that impact a patient Demonstrates ability to clearly and effectively articulate these issues Demonstrates ability to effectively advocate on a patient's behalf

PLO 2: Evidence-Based Care.

Apply sound, current, and evidence-based oral healthcare within the scope of general dentistry

Indicators	Initial	Developing	Developed	Proficient
2.1. Patient-centered care. Demonstrates ability to provide patient-centered care as the	<ul style="list-style-type: none"> Does not demonstrate ability to provide patient-centered care at the medication expert level; e.g., 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert in some, but not all, areas 	<ul style="list-style-type: none"> Demonstrates ability to provide patient-centered care as the medication expert (generally demonstrates 	<ul style="list-style-type: none"> Demonstrates ability to provide sufficient patient-centered care as the expert (collects and

medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	demonstrates ability to collect but not sufficiently interpret evidence, does not prioritize, formulates basic assessments and recommendations, does not sufficiently monitor and adjust plans nor document activities.	as follows: collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities	ability to collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities)	interprets evidence, prioritizes, formulates assessments and recommendations, implements, monitors and adjusts plans, and documents activities)
2.2. Systems management. Demonstrates ability to manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems	<ul style="list-style-type: none"> • Does not demonstrate understanding of oral healthcare delivery systems parts • Does not demonstrate understanding of the forces that influence components of the oral healthcare delivery system, including their connection to patient care • Does not demonstrate understanding of any challenges to systems that affect oral healthcare delivery Does not demonstrate understanding of how to work with different subsystems to deliver oral	<ul style="list-style-type: none"> • Demonstrates understanding of some parts of oral healthcare delivery systems but does not identify how they are related to each other • Demonstrates understanding of some forces that influence the parts of healthcare delivery systems, but demonstrate minimal understanding of their connection to patient care • Demonstrates understanding of some challenges that can affect delivery of oral healthcare • Demonstrates some understanding of how to work with different subsystems and how they 	<ul style="list-style-type: none"> • Demonstrates understanding of most major components of oral healthcare systems and their respective relationships • Demonstrates understanding of the forces that influence the components of healthcare delivery systems, and demonstrate some understanding of their influence on the quality of patient care • Demonstrates understanding of most challenges that can affect delivery of oral healthcare, but does not demonstrate complete comprehension of the effects Demonstrates basic	<ul style="list-style-type: none"> • Demonstrates understanding of the major components of oral healthcare systems, their respective relationships, and their functions related to patient care • Demonstrates thorough understanding of the forces that influence components of healthcare delivery systems and demonstrate full understanding of their influence and implications on the quality of patient care • Demonstrates understanding of pertinent challenges to specific aspects of healthcare delivery by demonstrating

	healthcare	function to deliver oral healthcare, but demonstrate minimal awareness or understanding of one's own role within the oral healthcare delivery system	understanding of how to work with different subsystems and how they function to deliver oral healthcare and demonstrate some understanding of one's role within the oral healthcare delivery system, but does not necessarily demonstrate application of knowledge in a manner that maximizes the quality of oral healthcare	abilities to thoroughly discuss the implications for the appropriate parts of oral health care delivery systems Demonstrates excellent understanding of how to work with different subsystems involved while also demonstrating understanding of one's role within the subsystems, and demonstrate appropriate application of knowledge in a manner that maximizes the quality of oral healthcare
2.3. Health and wellness. Designs prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve oral health and wellness	<ul style="list-style-type: none"> Does not demonstrate understanding of how the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates knowledge of some of the ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates sufficient knowledge of multiple ways that the arts can be utilized to optimize patients' well-being 	<ul style="list-style-type: none"> Demonstrates thorough knowledge of the ways that the arts can be utilized to optimize patients' well-being and creatively applies this knowledge to improve well-being and the practice and delivery of oral healthcare
2.4. Population-based care.	<ul style="list-style-type: none"> Does not demonstrate 	<ul style="list-style-type: none"> Demonstrates minimal 	<ul style="list-style-type: none"> Demonstrates sufficient 	<ul style="list-style-type: none"> Demonstrates superb

Exhibit D

Demonstrates understanding of how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices	awareness of population-based care.	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Does not demonstrate awareness of how these notions influence the development of practice guidelines 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates sufficient understanding of how population-based care influences the development of practice guidelines and best practices for patient care 	<p>understanding of population-based care and how it influences patient-centered care</p> <ul style="list-style-type: none"> • Demonstrates superb understanding of how population-based care influences the development of practice guidelines and demonstrates knowledge of best practices for patient care
---	-------------------------------------	--	--	--

PLO 3: Culturally Competent, Empathic Communication.

Demonstrate patient centered, empathic and culturally competent communication and interpersonal skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Empathy. Demonstrates the ability to communicate with the patient empathically.	<ul style="list-style-type: none"> Does not demonstrate the ability to communicate with the patient empathically. 	<ul style="list-style-type: none"> Demonstrates some ability, but experiences lapses in the ability to communicate empathically 	<ul style="list-style-type: none"> Demonstrates the ability to communicate empathically, with few lapses. 	<ul style="list-style-type: none"> Demonstrates an advanced ability, and never experiences lapses in communicating empathically.
3.2. Cultural competence. Demonstrates the ability to engage in communication with the patient that is culturally aware and accepting.	<ul style="list-style-type: none"> Does not demonstrate communication and interactions that convey respect or concern for patients and the community. Does not demonstrate an awareness of customs, beliefs, or perspectives in diverse patients Does not demonstrate awareness of cultural and linguistic needs of patients in order to communicate health information 	<ul style="list-style-type: none"> Demonstrates communication and interactions characteristic of a minimal level of respect, and little concern for patients and the community is apparent through use of some appropriate communication, but student does not employ follow-up questions for clarification, when necessary, and student provides inappropriate detail in responses Demonstrates a minimal level of awareness of customs, beliefs, or perspectives in diverse patients Demonstrates minimal awareness of cultural and 	<ul style="list-style-type: none"> Demonstrates appropriate communication and interactions that are characteristic of a basic level of respect, and concern for patients and the community is apparent through use of appropriate communication, where student uses some clear, but not necessarily relevant or detailed, follow-up questions and responses Demonstrates awareness of customs and beliefs, but may not clarify with patients about personal perspectives Demonstrates awareness of the cultural and 	<ul style="list-style-type: none"> Demonstrates professional communication and interactions by showing empathy, respect, and concern for patients and the community through use of appropriate communication where follow-up questions (as needed) and responses are clear, relevant, and detailed Demonstrates awareness of customs, beliefs, or perspectives in diverse patients; ask appropriate questions to clarify perspectives and perceptions in diverse patients Demonstrates full awareness of and responsiveness to

		linguistic needs of patients; either does not or only attempt to adapt behaviors, but does so ineffectively, to communicate health information	linguistic needs of diverse patients, and adapt behaviors to communicate health information, but communication may not be effective	cultural and linguistic needs of diverse patients by adapting behaviors appropriately in order to effectively communicate health information
--	--	--	---	--

PLO 4: Oral and Written Communication.

Demonstrate sound oral and written communications in patient care

Indicators	Initial	Developing	Developed	Proficient
4.1. Oral communication. Demonstrate sound oral communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in oral communications in patient care. Does not demonstrate the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in oral communications in patient care but demonstrates some lapses. Demonstrates some ability to cite sound evidence that support ideas within presentations or discussions, but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally, demonstrates logical reasoning in oral communications in patient care. Generally, demonstrates the ability to cite sound evidence that support ideas within presentations or discussions. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in oral communications in patient care. Consistently demonstrates the ability to cite sound evidence that support ideas within presentations or discussions.
4.2. Written communication. Demonstrate sound written communication in patient care.	<ul style="list-style-type: none"> Does not demonstrate logical reasoning in written communications in patient care. Does not demonstrate the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Demonstrates some logical reasoning in written communications in patient care but demonstrates some lapses. Demonstrates some written ability to cite sound evidence that support ideas but demonstrates some lapses. 	<ul style="list-style-type: none"> Generally logical reasoning in written communications in patient care. Generally, demonstrates the written ability to cite sound evidence that support ideas. 	<ul style="list-style-type: none"> Consistently demonstrates logical reasoning in written communications in patient care. Consistently demonstrates the written ability to cite sound evidence that support ideas.

PLO 5: Critical Thinking.

Utilize critical thinking, problem solving skills and systemic thinking in assessing and making reasoned, evidence-based decisions in patient care

Indicators	Initial	Developing	Developed	Proficient
5.1. Problem solving. Identifies problems; explore and prioritize potential strategies; and designs, implements, and evaluates viable solutions	<ul style="list-style-type: none"> Is not able to correctly identify the problem or issue being considered. Does not identify appropriate resources. Includes extraneous information or inappropriate or insufficient resources. Does not demonstrate understanding of the content of materials reviewed. Makes inappropriate inferences. Does not evaluate possible alternatives or generates ideas that are illogical or extraneous to issue at hand. Does not propose a solution or does not articulate decision. Does not adequately provide rationale for selected alternative or 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors associated with the problem or issues that impact decision making. Identifies a few, but not all, resources needed for decision making. Demonstrates ability to interpret some information and data but not all. Does not fully or effectively evaluate alternative solutions. Proposes a decision with many apparent weaknesses (i.e., not feasible, lack of regard for consequences, lack of supporting evidence, illogical, irrelevant to issue at hand, etc.). Provides 	<ul style="list-style-type: none"> Correctly identifies problem or issue being considered and demonstrates adequate awareness of the factors associated with this problem or issue that impact decision making. Identifies most of the resources needed. Demonstrates ability to interpret most information and data. Considers and evaluates possible solutions in a way that generally leads to a logical decision or course of action. Proposes a solution that does not contain apparent weaknesses that may or may not be the obvious clear choice. Solutions chosen demonstrate consideration of 	<ul style="list-style-type: none"> Consistently correctly identifies the problem or issue being considered and all of the primary factors associated with this problem or issue that impact decision making. Articulates the importance of these factors. Identifies all appropriate resources. Demonstrates ability to correctly interpret information and data needed for appropriate decision making. Demonstrates awareness of importance of these data in decision-making process. Considers and evaluates possible solutions effectively and thoroughly. Evaluation leads to sound, logical, and “best” decision or

	decision	rationale for selected alternative or decision but does not build a solid position with supporting evidence. Is unable to defend decision or course of action.	most of the strengths, weaknesses, feasibility, effects, consequences, relevance, etc.). Provides rationale for selected alternative or decision which includes some solid supporting evidence. Is able to defend decision or course of action at a basic level.	course of action. <ul style="list-style-type: none"> Proposes a solution that is entirely appropriate to the situation at hand. Solutions chosen demonstrate consideration of all of the important and relevant strengths, weaknesses, feasibility, effects, consequences, etc.). Provides rationale for selected alternative or decision and builds a solid position with appropriate and relevant supporting evidence. Effectively defends decision or course of action.
--	----------	--	--	--

PLO 6: Ethics and Professionalism.

Demonstrating professionalism and ethical decision making

Indicators	Initial	Developing	Developed	Proficient
6.1. Professionalism. Demonstrates behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society	<ul style="list-style-type: none"> Does not consistently demonstrate professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) Demonstrates frequent lapses in accountability or quality of work 	<ul style="list-style-type: none"> Demonstrates some professional attitudes and behaviors yet there is inconsistency that may impede on the quality of work or treatment of patients and other healthcare team members (altruism, excellence, duty, accountability, honesty, and integrity) 	<ul style="list-style-type: none"> Generally, demonstrates most of the professional attitudes and behaviors (altruism, excellence, duty, accountability, honesty, and integrity) that are required in the profession Demonstrates ability to use these behaviors and values to improve healthcare 	<ul style="list-style-type: none"> Consistently demonstrates the professional attitudes and behaviors that uphold the integrity and competence of the work and the treatment of patients and other healthcare team professionals (altruism, excellence, duty, accountability, honesty, and integrity) Consistently uses these behaviors and values to improve healthcare
6.2. Ethics. Demonstrates the ability to make decisions consistent with the values of practitioners and scholars of oral healthcare.	<ul style="list-style-type: none"> Does not make ethical decisions consistent with the values of practitioners and scholars of oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise ethical decision making, and a rudimentary knowledge of ethics within oral healthcare. 	<ul style="list-style-type: none"> Demonstrates the ability to exercise clear and ethical decision making, and a sufficient knowledge of ethics within oral healthcare. 	Demonstrates the ability to exercise clear and ethical decision making, and an advanced knowledge of ethics within oral healthcare.

PLO 7: Biomedical Sciences Knowledge.

Demonstrate an understanding of the fundamentals of biomedical sciences and apply them appropriately in oral healthcare

Indicators	Initial	Developing	Developed	Proficient
7.1. Diagnostic and pharmacologic. Demonstrates the ability to describe how to deliver patient assessments, knowledge of medicines, and delivering diagnoses.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe diagnostic and pharmacologic knowledge related to oral health. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe diagnostic and pharmacologic knowledge related to oral health.
7.2. Orofacial pain/temporomandibular/ Sleep disorder. Demonstrates the ability to describe the anatomical, physiological, and neurological basis; classification, epidemiology, and etiology; and assessments and treatments of orofacial pain, temporomandibular joint disease, and sleep disorders.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe scientific or assessment knowledge related to OFP/TMJ disease and sleep disorders.
7.3. Maxillofacial pathology Demonstrates the ability to describe the scientific aspects of head and neck diseases, as well as knowledge of assessment and diagnosis.	<ul style="list-style-type: none"> Does not demonstrate the ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a rudimentary ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates a sufficient ability to describe the scientific or assessment knowledge related to head and neck diseases. 	<ul style="list-style-type: none"> Demonstrates an advanced ability to describe the scientific or assessment knowledge related to head and neck diseases.

PLO 8: Practice Management.

Apply legal, regulatory, and business management concepts related to the provision of oral healthcare services

Indicators	Initial	Developing	Developed	Proficient
8.1. Legal aspects Applies legal and regulatory concepts related to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply legal and regulatory concepts related to the provision of oral healthcare sciences.
8.2. Business management Applies business management concepts to the provision of oral healthcare services.	<ul style="list-style-type: none"> Does not demonstrate an understanding or the ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a rudimentary understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates a sound understanding and ability to apply business management concepts related to the provision of oral healthcare services. 	<ul style="list-style-type: none"> Demonstrates an advanced understanding and ability to apply business management concepts related to the provision of oral healthcare sciences.

Appendix B

California Northstate University Institutional Learning Objectives

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

ILO 3: Oral communication: Demonstrates oral communication skills

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

DMD Institutional Learning Outcomes (ILOs) Proficiency Rubric

ILO 1: Critical thinking: Exercise reasoned judgment to assess technical information and make well-informed decisions using evidence-based approaches

Indicator	Initial	Developing	Developed	Proficient
1.1. Demonstrates identification of problem or issues	<ul style="list-style-type: none"> Does not correctly identify the problem or issue being considered Does not demonstrate understanding of the psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Identifies the problem or issue but does not demonstrate awareness of all the factors impacting decision making Demonstrates understanding of some possible psychological factors that contribute to current patient state 	<ul style="list-style-type: none"> Correctly identifies the problem or issue but does not demonstrate awareness of all factors impacting decision making Demonstrates understanding of most psychological factors that contribute to the current patient state 	<ul style="list-style-type: none"> Correctly identifies all of the primary factors associated with problem or issue impacting decision making Demonstrates thorough understanding of all possible psychological factors that contribute to the current patient state

Exhibit D

1.2. Demonstrates identification of resources	<ul style="list-style-type: none"> Does not identify appropriate resources 	<ul style="list-style-type: none"> Identifies a few resources needed 	<ul style="list-style-type: none"> Identifies most of the resources needed 	<ul style="list-style-type: none"> Correctly identifies all appropriate resources
1.3. Finds and interprets data needed for critical thinking and decision making	<ul style="list-style-type: none"> Does not demonstrate understanding of the data needed for critical thinking and decision making 	<ul style="list-style-type: none"> Demonstrates ability to interpret some data but not all 	<ul style="list-style-type: none"> Demonstrates ability to interpret most data 	<ul style="list-style-type: none"> Demonstrates ability to correctly interpret data needed for decision making
1.4. Demonstrates knowledge of alternatives when evaluating for possible solutions	<ul style="list-style-type: none"> Does not evaluate possible alternatives for treatment or diagnosis 	<ul style="list-style-type: none"> Does not effectively evaluate alternative treatment or diagnostic solutions 	<ul style="list-style-type: none"> Evaluates possible treatment and diagnostic solutions leading to a logical decision 	<ul style="list-style-type: none"> Effectively and thoroughly considers and evaluates possible diagnostic and treatment solutions
1.5. Proposes and selects appropriate solutions	<ul style="list-style-type: none"> Does not propose solutions to the client's needs 	<ul style="list-style-type: none"> Proposes solutions without consideration of alternatives 	<ul style="list-style-type: none"> Solutions chosen demonstrate consideration of most of the strengths, weaknesses, and consequences of the decision 	<ul style="list-style-type: none"> Proposes solutions that are appropriate to the situation and demonstrate consideration of all relevant strengths, weaknesses, and consequences
1.6. Presents rationale for course of action	<ul style="list-style-type: none"> Does not adequately provide rationale for treatment decision 	<ul style="list-style-type: none"> Provides rationale for decision but does not integrate into mental health treatment plan 	<ul style="list-style-type: none"> Provides rationale for decision with solid supporting evidence from available psychological literature and/or case factors 	<ul style="list-style-type: none"> Provides rationale for decision and with appropriate and relevant supporting case evidence and integrates findings into treatment plan

ILO 2: Written communication. Demonstrate the ability to write coherent, supported, and logically structured prose

Indicators	Initial	Developing	Developed	Proficient
2.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the document is intended 	<ul style="list-style-type: none"> Demonstrates some ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Demonstrates ability to craft a document appropriate for its audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to craft documents appropriate for the audience
2.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their documentation 	<ul style="list-style-type: none"> Writing does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their documentation 	<ul style="list-style-type: none"> Research and clinical documentation demonstrates clear and focused thinking

Exhibit D

2.3. Demonstrates support for and development of ideas	<ul style="list-style-type: none"> Does not explain or develop ideas 	<ul style="list-style-type: none"> Demonstrates minimal support for ideas 	<ul style="list-style-type: none"> Writing contains examples that generally support ideas 	<ul style="list-style-type: none"> Supports ideas with relevant, clear, impactful examples
2.4. Demonstrates appropriate use of evidence to support arguments	<ul style="list-style-type: none"> Demonstrates an attempt to use proper citations to support ideas 	<ul style="list-style-type: none"> Uses credible and relevant sources to support ideas appropriate in the study of psychology 	<ul style="list-style-type: none"> Consistently uses credible and relevant sources to support ideas 	<ul style="list-style-type: none"> Demonstrates skillful use of credible and relevant sources to develop and support ideas
2.5. Demonstrates appropriate use of language, syntax, and mechanics	<ul style="list-style-type: none"> Has excessive or severe errors in language usage 	<ul style="list-style-type: none"> Generally, conveys meaning to readers with clarity, though writing may include some errors 	<ul style="list-style-type: none"> Language conveys meaning to readers and writing contains very few errors 	<ul style="list-style-type: none"> Uses language effectively and skillfully to communicate meaning to readers

ILO 3: Oral communication: Demonstrates oral communication skills

Indicators	Initial	Developing	Developed	Proficient
3.1. Demonstrates knowledge and awareness of intended audience	<ul style="list-style-type: none"> Does not demonstrate knowledge or awareness of audience for which the communication is intended 	<ul style="list-style-type: none"> Demonstrates some ability to communicate in a manner appropriate to the audience 	<ul style="list-style-type: none"> Demonstrates ability to communicate appropriate to the audience 	<ul style="list-style-type: none"> Consistently demonstrates ability to communicate in a manner appropriate to the audience
3.2. Demonstrates clear and logical thought	<ul style="list-style-type: none"> Does not demonstrate clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication does not sufficiently conceptualize case variables or analyze subject under discussion 	<ul style="list-style-type: none"> Demonstrates general clear or logical thought in their communication 	<ul style="list-style-type: none"> Communication demonstrates clear and focused thinking
3.3. Demonstrates effective use of language in their communication	<ul style="list-style-type: none"> Does not know professional psychological language or uses jargon Does not know the proper technical language regarding mental health treatment 	<ul style="list-style-type: none"> Demonstrates inaccurate use of psychological language or uses jargon in professional communications Utilizes scientific language that is incomprehensible to patients 	<ul style="list-style-type: none"> Demonstrates appropriate use of professional language and minimal jargon Utilizes generalized language to interact with patients 	<ul style="list-style-type: none"> Demonstrates use of appropriate, professional language Utilizes generalized language to interact with patients
3.4. Demonstrates appropriate active listening techniques	<ul style="list-style-type: none"> Does not acknowledge other viewpoints 	<ul style="list-style-type: none"> Demonstrates little attempt to recognize other viewpoints 	<ul style="list-style-type: none"> Recognizes other viewpoints but has difficulty incorporating them 	<ul style="list-style-type: none"> Listens to questions with a consideration of alternative

Exhibit D

when addressing questions	<ul style="list-style-type: none"> • Has great difficulty answering questions 	<ul style="list-style-type: none"> • Answers are simplistic and lack intellectual depth 	into case conceptualization <ul style="list-style-type: none"> • Adequately answers patient questions 	viewpoints <ul style="list-style-type: none"> • Answers questions thoughtfully referencing evidence
3.5. Orally communicates meaning to audience	<ul style="list-style-type: none"> • Vocal delivery is too soft or too fast • Long, unintended silences and/or speech disruptions frequently distract audience • Speaker makes no attempt to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is audible • Speech rate or volume disruptions occasionally distract from comprehension • Attempts to engage audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Generally, engages audience 	<ul style="list-style-type: none"> • Vocal delivery is varied and dynamic • Speech rate, volume, and tone enhance listener interest and facilitate understanding • Thoroughly engages audience
3.6. Utilizes non-verbal means to enhance message	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions are inappropriate 	<ul style="list-style-type: none"> • Eye contact, body language, and facial expressions neither enhance nor hinder oral effectiveness 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions are mostly consistent with the verbal message 	<ul style="list-style-type: none"> • Use of eye contact, body language, and facial expressions that are consistent with the verbal message

ILO 4: Professionalism. Interact with respect, empathy, diplomacy, and cultural competence

Indicators	Initial	Developing	Developed	Proficient
4.1. Demonstrates professional attitudes and behaviors	<ul style="list-style-type: none"> • Does not generally demonstrate professional attitudes or behaviors expected from a dentist 	<ul style="list-style-type: none"> • Demonstrates some attitudes and behaviors that may be characteristic of a dentist 	<ul style="list-style-type: none"> • Generally, demonstrates attitudes and behaviors expected from a dentist 	<ul style="list-style-type: none"> • Consistently demonstrates attitudes and behaviors expected from a dentist
4.2. Demonstrates personal responsibility and accountability	<ul style="list-style-type: none"> • Does not demonstrate personal accountability or responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates minimal personal accountability and responsibility for work completed 	<ul style="list-style-type: none"> • Demonstrates personal accountability and responsibility for the work completed 	<ul style="list-style-type: none"> • Consistently demonstrates personal accountability and responsibility for work completed
4.3. Demonstrates respectful and sensitive behaviors to the cultural and linguistic needs of diverse patients	<ul style="list-style-type: none"> • Does not demonstrate an awareness of patients' customs, beliefs, or perspectives • Does not demonstrate awareness of linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates a minimal level of awareness of customs, beliefs, or perspectives of patients • Demonstrates minimal awareness of cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs and beliefs • Demonstrates awareness of the cultural and linguistic needs of patients 	<ul style="list-style-type: none"> • Demonstrates awareness of customs, beliefs, or perspectives in patients • Demonstrates full awareness and responds to the cultural and linguistic needs of patients
4.4. Demonstrates professional	<ul style="list-style-type: none"> • Appears inattentive and impatient • Uses inappropriate 	<ul style="list-style-type: none"> • Appears unfocused and distracted • Uses acceptable 	<ul style="list-style-type: none"> • Appears composed and focused • Uses appropriate 	<ul style="list-style-type: none"> • Uses articulate, tactful, and diplomatic speech

Exhibit D

demeanor	body language • Dresses in attire that is inappropriate	body language • Dresses in attire that is not offensive	body language • Dresses in attire that is professional	• Uses professional body language • Dresses in attire that is professional, and well-suited for the environment
----------	--	--	---	--

Exhibit D

ILO 5: Quantitative reasoning: Demonstrate ability to use mathematics and statistics in problem solving

Indicators	Initial	Developing	Developed	Proficient
5.1. Demonstrates ability to perform calculations and apply mathematical principles to solve problems	<ul style="list-style-type: none"> Does not demonstrate ability to apply statistical or psychometric principles 	<ul style="list-style-type: none"> Demonstrates ability to perform basic statistical calculations but does not know how to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Demonstrates ability to perform most statistical calculations accurately and to apply psychometric principles to solve problems 	<ul style="list-style-type: none"> Consistently demonstrates ability to perform statistical calculations accurately and to appropriately apply psychometric principles to solve problems
5.2. Demonstrates understanding of experimental designs and methodology	<ul style="list-style-type: none"> Displays difficulty proposing a basic experiment or research project 	<ul style="list-style-type: none"> Comprehends basic experiments designed by others 	<ul style="list-style-type: none"> Evaluates research, method, and protocol to review valid and reliable research 	<ul style="list-style-type: none"> Proposes appropriate and innovative designs to address a new hypothesis and research question
5.3. Demonstrates logical and appropriate interpretation of data	<ul style="list-style-type: none"> Demonstrates a limited ability to interpret scientific data 	<ul style="list-style-type: none"> Attempts to interpret scientific data 	<ul style="list-style-type: none"> Demonstrates the ability to interpret scientific data 	<ul style="list-style-type: none"> Interprets data in the context of current scientific knowledge
5.4. Demonstrates logical thought patterns in generating conclusions	<ul style="list-style-type: none"> Does not generate conclusions based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions that may be based on current scientific data and statistics 	<ul style="list-style-type: none"> Generates conclusions using scientific and statistical data 	<ul style="list-style-type: none"> Accurately generates conclusions using appropriate scientific and mathematical data

ILO 6: Information literacy: Identify and search relevant libraries of information and databases; synthesize information obtained from primary literature using properly referenced citations

Indicators	Initial	Developing	Developed	Proficient
6.1. Demonstrates appropriate ability search and acquire resources	<ul style="list-style-type: none"> Does not identify or solicit help in obtaining external resources to support topic 	<ul style="list-style-type: none"> Identified resources may not be sufficient in quality and infrequently solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies resources appropriate for scientific inquiry and solicits guidance from library personnel 	<ul style="list-style-type: none"> Identifies a variety of relevant sources and regularly seeks guidance from library personnel
6.2. Demonstrates appropriate incorporation of references	<ul style="list-style-type: none"> Does not incorporate references 	<ul style="list-style-type: none"> Incorporates references from psychological sources that do not clearly support 	<ul style="list-style-type: none"> Incorporates relevant references that generally supports ideas 	<ul style="list-style-type: none"> Incorporates relevant references from respected psychological sources

6.3. Demonstrates appropriate citation of references	<ul style="list-style-type: none">• Does not use citations	<ul style="list-style-type: none">• Uses citations but they are not formatted in APA style	<ul style="list-style-type: none">• Demonstrates use of appropriate citations in context	<ul style="list-style-type: none">• Uses properly cited references and includes all necessary information in reference list

California Northstate University College of Dental Medicine

**OMFS 851
Oral Radiology Seminar**

This case-based seminar will present findings using all methods in OMFS 641 and OMFS 751 to demonstrate through active learning the radiographic findings in key diseases of the oral and maxillofacial region.

During this seminar the student will discuss the role of radiology and imaging on numerous relevant conditions of the head and neck. Emphasis will be placed on the selection of appropriate diagnostic imaging and management. Topics will include:

Temporomandibular joint
Salivary gland diseases
Radio-osteonecrosis of the jaws
Medicine related osteonecrosis of the jaws
Craniofacial abnormalities such as cleft palate
Dento-alveolar trauma
Implant planning and 3D work flow
Orthodontics
Cysts, tumors and malignancies
Fibro-osseous conditions
Infections and osteomyelitis

Calendar of Important Dates:

Date	
	First day of instruction
	Midterm exam
	Final examination

Students will have two exams and a final paper based on one of the seminars citing current literature review.

Exhibit D

Exams	
Midterm Exam	30%
Final Exam	50%
Seminar paper	20%

Percent	Letter Grade/Action
90.0 – 100%	A
80.0 – 89.9%	B
75.0 – 79.9%	C - Pass
60.0 – 74.9%	D – Requiring remediation (successful remediation recorded as C, unsuccessful remediation recorded as F)
Below 60.0%	F – Fail (course must be repeated)
Incomplete	I

EXPLANATION OF TERMS

Please note: A signed copy of the Sales Terms and Conditions (see below), must accompany your order.

Credit Card Payment: Net 30 days. Credit card transactions which are greater than \$5,000 will only be accepted if the customer agrees to pay an additional 3% transaction fee per credit card transaction.

Warranty: Parts only, covering defects in material and workmanship.*
5 Years for Dental Chairs, Stools, Lights, Delivery Systems, Monitor Mounts, and Dental Furniture.
2 Years for A-dec EA-53 Electric Motor, Tubing and Control Modules and A-dec/W&H Synea, Proxeo, Endea, Air Motors, and Assistina Products.
1 Year for Clinical Products.

**See official warranty statement for terms and conditions*

Delivery date: Based on factory lead times upon receipt of P.O. Extended delivery dates and split shipments are available. Note that split shipments will need to be requested during the quote process.

Lead times vary: For preliminary planning please allow for the following estimated lead times:
Equipment: 6-8 weeks
Standard Cabinets: 12-16 weeks
Custom Cabinets/Equipment: 20-24 weeks

Boxed Deliveries: Client is responsible for receiving boxed equipment deliveries, inclusive of offloading, handling and storage requirements and movement of goods to site if installation is provided. Undeliverable freight shipments may result in additional storage and handling costs at the client's expense. Client is responsible for disposal of all crating or packing materials with boxed deliveries unless specified in the quote.

Blanket-Wrapped Service: An additional service offered by A-dec (not included in VA Contract V797D-70087). With this service the equipment will be pre-assembled at the factory, blanket-wrapped, and delivered to the clinic. Upon delivery, movers will remove the wrapping and physically place the equipment into each operator.

Project Delays: In the event that project delays beyond A-dec's control impact the agreed upon delivery or installation date, the client must notify A-dec prior to 21 days of the scheduled delivery date to modify logistics and scheduling. In an effort to meet customer needs, A-dec will collaborate with the client to identify alternate delivery arrangements or offsite storage at client's expense. Deliveries and installations cancelled in less than 21 days are subject to additional charges associated with temporary storage/handling and mobilization expenses for the installation team. Site conditions that impede the scheduled installation (i.e., unfinished construction, incomplete utilities or safety issues) may necessitate installation delays or cancellation, resulting in additional charges to compensate for mobilization expenses.

Technical Training: Technical Service Training is held at A-dec in Newberg, Oregon and is offered as a service at no additional cost to those agencies that procure A-dec equipment. Please contact your A-dec Territory Manager for details.

Installation (requires use of A-dec Authorized Installer):

Includes:

- Placement of all items into specified location.
- Padded Van deliveries will be delivered and coordinated at the same time as the installation. Equipment will be placed by a private moving company
- Boxed deliveries will be delivered prior to installation and will need to be offloaded and stored at customer expense.
- Customer is responsible for delivering the equipment within close proximity to the dental treatment room prior to installation team's arrival.
- Assembly of all items per factory specifications and agency requirements.
- Anchoring of all items per factory specifications and agency requirements.
- Final air and vacuum connections.
- Calibration and function testing of equipment.
- Trash Removal
 - For Padded Van deliveries a majority of trash and all bulk items will be taken by the moving company, small amounts of trash will need to be disposed of at an on-site dumpster provided by customer.
 - For Boxed deliveries the installation team will dispose of all trash at an on-site dumpster provided by the customer.
- Walk-through with the owner and/or contractor will be completed noting any punch-list items.
- A "Customer Acceptance" sign-off letter will be requested upon completion.

Does not include:

- Final plumbing connection
- Final electrical connection
- Removing old equipment unless specified in the P.O.
- Transporting stored equipment to the clinic unless specified in the P.O.
- Caulking (filling and/or sealing of joints) between contractor provided structure and A-dec Manufactured freestanding Dental Cabinets

Installation labor charge is for a single scheduled trip unless otherwise specified. Installation performed by A-dec Authorized Installer.

The written material is not intended to be, and should not be, used as a substitute for the compliance with local, state, federal code and Americans with Disabilities Act. It is the responsibility of the user to integrate the A-dec equipment specifications presented herein with the regulations and codes overseen by local planning and inspection authorities. A-dec Inc. shall not be held liable for any errors contained herein or any consequential or other damages concerning the furnishing, performance or use of this material. SALES TERMS AND CONDITIONS

- 1. Scope/Binding Effect. THESE TERMS AND CONDITIONS OF SALE APPLY TO ALL QUOTATIONS AND OFFERS MADE BY AND PURCHASE ORDERS ACCEPTED BY A-DEC ("A-dec"). TO THE EXTENT THAT THESE TERMS AND CONDITIONS CONFLICT WITH OR ARE DIFFERENT FROM THOSE CONTAINED IN ANY BUYER PURCHASE ORDER OR OTHER PROCUREMENT DOCUMENTS, THESE TERMS AND CONDITIONS WILL CONTROL AND ANY ADDITIONAL OR INCONSISTENT TERMS ARE REJECTED BY A-DEC. BUYER'S ACCEPTANCE OF OR PAYMENT FOR THE GOODS SHALL CONCLUSIVELY CONFIRM ASSENT TO THESE TERMS.
- 2. Prices/Payment. Prices are those in effect at the time of acceptance of an order. All prices are in U.S. dollars and, unless otherwise agreed, payment terms are net 30 days from the date of invoice. Amounts not paid when due will bear a late payment charge of 1 1/2 percent per month or the maximum legal rate, whichever is less.
- 3. Taxes. All prices are exclusive of any sales, revenue, or excise tax, duties, or other similar charges, all of which will be paid by Buyer.
- 4. Delivery. Unless otherwise agreed to by the parties, delivery in the United States is FOB Buyer's place of business. For international sales, delivery is Ex Works, A-dec's plant, unless otherwise agreed. A-dec will follow Buyer's shipping instructions; absent such instructions from Buyer, A-dec will ship by the method it deems most advantageous. Delivery dates are estimates only. A-dec will make commercially reasonable efforts to meet specified delivery dates, but will otherwise not be responsible for delayed deliveries.
- 5. Acceptance. Buyer will accept or reject products within ten (10) days of delivery. Failure to notify A-dec in writing of nonconforming products within such period shall be deemed an unqualified acceptance. Any use of the products by Buyer that is not related to acceptance testing shall constitute acceptance.
- 6. Credit Sales. Prior credit approval and nondelinquent status are necessary before A-dec will ship on an open account basis. A-dec may at any time, at its sole discretion, require cash in advance, COD, letter of credit, or wire transfer prior to shipment. Shipment is subject to being withheld, or at the option of A-dec, canceled, if any amounts are not paid when due or if the financial condition of Buyer is such as to give A-dec, in its judgment, reasonable grounds for insecurity concerning the Buyer's ability to perform its obligations.
- 7. Security Interest. With respect to any credit sale, Buyer grants to A-dec a purchase money security interest in the products sold, and any proceeds thereof, as security for Buyer's obligation to pay the purchase price and Buyer agrees to execute any financing statement or other instrument required to perfect such a security interest.
- 8. Warranty. Products are warranted to conform to A-dec's standard warranty for the subject products, as may be in effect from time to time. A-dec will repair or replace, at its option, any product found to be defective or nonconforming, provided that: (i) Buyer gives prompt written notice of the defect or nonconformity; (ii) A-dec has provided written return authorization to Buyer and Buyer has returned the nonconforming product to A-dec, freight prepaid; (iii) A-dec has determined in its sole discretion that Buyer has not improperly handled a product, or subjected the product to misuse, misapplication, accident, alteration, neglect, improper or inadequate maintenance, installation, or repair. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES OR OBLIGATIONS EXPRESS OR IMPLIED. A-DEC EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
- 9. Export Restrictions. A-dec products are of U.S. origin unless otherwise specified and, as such, are subject to export licensing and other restrictions under U.S. law. Buyer acknowledges this and will comply with all applicable restrictions on export or reexports, including obtaining any required U.S. government license, authorization, or approval.
- 10. Limitation of Liability. IN NO EVENT WILL A-DEC BE LIABLE FOR INDIRECT, SPECIAL, INCIDENTAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES OF ANY KIND SUSTAINED FROM ANY CAUSE OR ARISING OUT OF ANY LEGAL THEORY, WHETHER CONTRACT, NEGLIGENCE, STRICT TORT LIABILITY, OR OTHERWISE. IN NO EVENT SHALL A-DEC BE LIABLE TO BUYER IN AN AMOUNT EXCEEDING THE PURCHASE PRICE OF THE SUBJECT PRODUCT. THESE LIMITATIONS INCLUDE ANY LIABILITY THAT MAY ARISE OUT OF THIRD-PARTY CLAIMS, AND BUYER AGREES TO PROCURE SUCH INSURANCE, IF ANY, AS IT DEEMS APPROPRIATE TO COVER SUCH CLAIMS. ANY LAWSUIT BY BUYER AGAINST A-DEC SHALL BE FILED WITHIN ONE YEAR FROM DELIVERY OF THE SUBJECT PRODUCT BY A-DEC. THESE LIMITATIONS SHALL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OR OF ANY LIMITED REMEDY PROVIDED HEREIN.
- 11. Infringement Indemnity. A-dec will defend or settle any claim or action brought against Buyer to the extent that it is based upon a claim that products provided by A-dec to Buyer infringe any United States patent of any third party, and A-dec will pay all costs, damages and attorneys' fees finally awarded against Buyer in any such action; but such defense, settlements, and payments are expressly conditioned on the following: that A-dec is promptly notified in writing by Buyer of any such claim; that A-dec is granted in writing sole control of the defense of any such claim and of all negotiations for settlement or compromise; that Buyer cooperates with A-dec in a reasonable way to facilitate the settlement or defense of the claim; that the claim does not arise from modifications not authorized in writing by A-Dec, from use or combination of products provided by A-dec with items provided by Buyer or others, or from, in the case of custom-made products, compliance with Buyer's specifications. Should products become, or in A-dec's opinion be likely to become, the subject of such a claim of infringement, then Buyer will permit A-dec, at A-dec's option and expense: to procure for Buyer the right to continue using the products, or to replace or modify the product so that it becomes non-infringing and substantially equivalent in function, or to refund to the Buyer the purchase price of the product, less a charge for use by Buyer based on straight-line depreciation, assuming a useful life of five years. THE FOREGOING IS A-DEC'S EXCLUSIVE OBLIGATION WITH RESPECT TO INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS.
- 12. Force Majeure. A-dec will not be responsible for delays caused by acts of God, fires, floods, strikes, accidents, delays by suppliers of material or shortages of material, inability to obtain necessary labor or manufacturing facilities, or other causes beyond its reasonable control.
- 13. Confidentiality. Proposals, drawings, specifications and technical data furnished to Buyer by A-dec will:
 - 1. be retained in confidence; (ii) remain the exclusive property of A-dec;
 - 2. not be disclosed by Buyer to third parties or used in any manner not authorized by A-dec;
 - 3. be returned to A-dec upon request.
- 14. Disputes. The rights and liabilities of the parties arising out of or relating to this agreement will be governed by the laws of the state of Oregon; venue in any lawsuit between the parties will lie exclusively in state or federal courts in Portland, Oregon, USA, excluding choice of law rules and excluding the U.N. Convention on International Sales of Goods; and the prevailing party in such litigation will be entitled to recover all reasonable attorneys' fees and other expenses (in addition to statutory "costs" of litigation), including attorneys' fees and expenses in connection with any trial, appeal, or petition for review.
- 15. ENTIRE AGREEMENT. THIS IS THE ENTIRE AGREEMENT BETWEEN THE PARTIES. IT SUPERSEDES ALL PRIOR OR CONTEMPORANEOUS AGREEMENTS, UNDERSTANDINGS, OR REPRESENTATIONS WITH RESPECT TO THE SUBJECT MATTER HEREOF. THIS AGREEMENT MAY NOT BE MODIFIED OR AMENDED EXCEPT IN WRITING SIGNED BY BOTH PARTIES.

EXPLANATION OF TERMS

Please note: A signed copy of the Sales Terms and Conditions (see below), must accompany your order.

Credit Card Payment: Net 30 days. Credit card transactions which are greater than \$5,000 will only be accepted if the customer agrees to pay an additional 3% transaction fee per credit card transaction.

Warranty: Parts only, covering defects in material and workmanship.*

- 5 Years for Dental Chairs, Stools, Lights, Delivery Systems, Monitor Mounts, and Dental Furniture.
- 2 Years for A-dec EA-53 Electric Motor, Tubing and Control Modules and A-dec/W&H Synea, Proxeo, Endea, Air Motors, and Assisting Products.
- 1 Year for Clinical Products.

*See official warranty statement for terms and conditions

Delivery date: Based on factory lead times upon receipt of P.O. Extended delivery dates and split shipments are available. Note that split shipments will need to be requested during the quote process.

Lead times vary: For preliminary planning please allow for the following estimated lead times:

- Equipment: 6-8 weeks
- Standard Cabinets: 12-16 weeks
- Custom Cabinets/Equipment: 20-24 weeks

Boxed Deliveries: Client is responsible for receiving boxed equipment deliveries, inclusive of offloading, handling and storage requirements and movement of goods to site if installation is provided. Undeliverable freight shipments may result in additional storage and handling costs at the client's expense. Client is responsible for disposal of all crating or packing materials with boxed deliveries unless specified in the quote.

Blanket-Wrapped Service: An additional service offered by A-dec (not included in VA Contract V797D-70087). With this service the equipment will be pre-assembled at the factory, blanket-wrapped, and delivered to the clinic. Upon delivery, movers will remove the wrapping and physically place the equipment into each operatory.

Project Delays: In the event that project delays beyond A-dec's control impact the agreed upon delivery or installation date, the client must notify A-dec prior to 21 days of the scheduled delivery date to modify logistics and scheduling. In an effort to meet customer needs, A-dec will collaborate with the client to identify alternate delivery arrangements or offsite storage at client's expense. Deliveries and installations cancelled in less than 21 days are subject to additional charges associated with temporary storage/handling and mobilization expenses for the installation team. Site conditions that impede the scheduled installation (i.e., unfinished construction, incomplete utilities or safety issues) may necessitate installation delays or cancellation, resulting in additional charges to compensate for mobilization expenses.

Technical Training: Technical Service Training is held at A-dec in Newberg, Oregon and is offered as a service at no additional cost to those agencies that procure A-dec equipment. Please contact your A-dec Territory Manager for details.

Installation (requires use of A-dec Authorized Installer):

Includes:

- Placement of all items into specified location.
- Padded Van deliveries will be delivered and coordinated at the same time as the installation. Equipment will be placed by a private moving company
- Boxed deliveries will be delivered prior to installation and will need to be offloaded and stored at customer expense. Customer is responsible for delivering the equipment within close proximity to the dental treatment room prior to installation team's arrival.
- Assembly of all items per factory specifications and agency requirements.
- Anchoring of all items per factory specifications and agency requirements.
- Final air and vacuum connections.
- Calibration and function testing of equipment.
- Trash Removal
 - For Padded Van deliveries a majority of trash and all bulk items will be taken by the moving company, small amounts of trash will need to be disposed of at an on-site dumpster provided by customer.
 - For Boxed deliveries the installation team will dispose of all trash at an on-site dumpster provided by the customer.
- Walk-through with the owner and/or contractor will be completed noting any punch-list items.
- A "Customer Acceptance" sign-off letter will be requested upon completion.

Does not include:

- Final plumbing connection
- Final electrical connection
- Removing old equipment unless specified in the P.O.
- Transporting stored equipment to the clinic unless specified in the P.O.
- Caulking (filling and/or sealing of joints) between contractor provided structure and A-dec Manufactured freestanding Dental Cabinets

Installation labor charge is for a single scheduled trip unless otherwise specified. Installation performed by A-dec Authorized Installer.

SALES TERMS AND CONDITIONS

1. Scope/Binding Effect. THESE TERMS AND CONDITIONS OF SALE APPLY TO ALL QUOTATIONS AND OFFERS MADE BY AND PURCHASE ORDERS ACCEPTED BY A-DEC ("A-dec"). TO THE EXTENT THAT THESE TERMS AND CONDITIONS CONFLICT WITH OR ARE DIFFERENT FROM THOSE CONTAINED IN ANY BUYER PURCHASE ORDER OR OTHER PROCUREMENT DOCUMENTS, THESE TERMS AND CONDITIONS WILL CONTROL AND ANY ADDITIONAL OR INCONSISTENT TERMS ARE REJECTED BY A-DEC. BUYER'S ACCEPTANCE OF OR PAYMENT FOR THE GOODS SHALL CONCLUSIVELY CONFIRM ASSENT TO THESE TERMS.
2. Prices/Payment. Prices are those in effect at the time of acceptance of an order. All prices are in U.S. dollars and, unless otherwise agreed, payment terms are net 30 days from the date of invoice. Amounts not paid when due will bear a late payment charge of 1 1/2 percent per month or the maximum legal rate, whichever is less.
3. Taxes. All prices are exclusive of any sales, revenue, or excise tax, duties, or other similar charges, all of which will be paid by Buyer.
4. Delivery. Unless otherwise agreed to by the parties, delivery in the United States is FOB Buyer's place of business. For international sales, delivery is Ex Works, A-dec's plant, unless otherwise agreed. A-dec will follow Buyer's shipping instructions; absent such instructions from Buyer, A-dec will ship by the method it deems most advantageous. Delivery dates are estimates only. A-dec will make commercially reasonable efforts to meet specified delivery dates, but will otherwise not be responsible for delayed deliveries.
5. Acceptance. Buyer will accept or reject products within ten (10) days of delivery. Failure to notify A-dec in writing of nonconforming products within such period shall be deemed an unqualified acceptance. Any use of the products by Buyer that is not related to acceptance testing shall constitute acceptance.
6. Credit Sales. Prior credit approval and nondelinquent status are necessary before A-dec will ship on an open account basis. A-dec may at any time, at its sole discretion, require cash in advance, COD, letter of credit, or wire transfer prior to shipment. Shipment is subject to being withheld, or at the option of A-dec, canceled, if any amounts are not paid when due or if the financial condition of Buyer is such as to give A-dec, in its judgment, reasonable grounds for insecurity concerning the Buyer's ability to perform its obligations.
7. Security Interest. With respect to any credit sale, Buyer grants to A-dec a purchase money security interest in the products sold, and any proceeds thereof, as security for Buyer's obligation to pay the purchase price and Buyer agrees to execute any financing statement or other instrument required to perfect such a security interest.
8. Warranty. Products are warranted to conform to A-dec's standard warranty for the subject products, as may be in effect from time to time. A-dec will repair or replace, at its option, any product found to be defective or nonconforming, provided that: (i) Buyer gives prompt written notice of the defect or nonconformity; (ii) A-dec has provided written return authorization to Buyer and Buyer has returned the nonconforming product to A-dec, freight prepaid; (iii) A-dec has determined in its sole discretion that Buyer has not improperly handled a product, or subjected the product to misuse, misapplication, accident, alteration, neglect, improper or inadequate maintenance, installation, or repair. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES OR OBLIGATIONS EXPRESS OR IMPLIED. A-DEC EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
9. Export Restrictions. A-dec products are of U.S. origin unless otherwise specified and, as such, are subject to export licensing and other restrictions under U.S. law. Buyer acknowledges this and will comply with all applicable restrictions on export or reexports, including obtaining any required U.S. government license, authorization, or approval.
10. Limitation of Liability. IN NO EVENT WILL A-DEC BE LIABLE FOR INDIRECT, SPECIAL, INCIDENTAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES OF ANY KIND SUSTAINED FROM ANY CAUSE OR ARISING OUT OF ANY LEGAL THEORY, WHETHER CONTRACT, NEGLIGENCE, STRICT TORT LIABILITY, OR OTHERWISE. IN NO EVENT SHALL A-DEC BE LIABLE TO BUYER IN AN AMOUNT EXCEEDING THE PURCHASE PRICE OF THE SUBJECT PRODUCT. THESE LIMITATIONS INCLUDE ANY LIABILITY THAT MAY ARISE OUT OF THIRD-PARTY CLAIMS, AND BUYER AGREES TO PROCURE SUCH INSURANCE, IF ANY, AS IT DEEMS APPROPRIATE TO COVER SUCH CLAIMS. ANY LAWSUIT BY BUYER AGAINST A-DEC SHALL BE FILED WITHIN ONE YEAR FROM DELIVERY OF THE SUBJECT PRODUCT BY A-DEC. THESE LIMITATIONS SHALL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OR OF ANY LIMITED REMEDY PROVIDED HEREIN.
11. Infringement Indemnity. A-dec will defend or settle any claim or action brought against Buyer to the extent that it is based upon a claim that products provided by A-dec to Buyer infringe any United States patent of any third party, and A-dec will pay all costs, damages and attorneys' fees finally awarded against Buyer in any such action; but such defense, settlements, and payments are expressly conditioned on the following: that A-dec is promptly notified in writing by Buyer of any such claim; that A-dec is granted in writing sole control of the defense of any such claim and of all negotiations for settlement or compromise; that Buyer cooperates with A-dec in a reasonable way to facilitate the settlement or defense of the claim; that the claim does not arise from modifications not authorized in writing by A-dec, from use or combination of products provided by A-dec with items provided by Buyer or others, or from, in the case of custom-made products, compliance with Buyer's specifications. Should products become, or in A-dec's opinion be likely to become, the subject of such a claim of infringement, then Buyer will permit A-dec, at A-dec's option and expense: to procure for Buyer the right to continue using the products, or to replace or modify the product so that it becomes non-infringing and substantially equivalent in function, or to refund to the Buyer the purchase price of the product, less a charge for use by Buyer based on straight-line depreciation, assuming a useful life of five years. THE FOREGOING IS A-DEC'S EXCLUSIVE OBLIGATION WITH RESPECT TO INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS.
12. Force Majeure. A-dec will not be responsible for delays caused by acts of God, fires, floods, strikes, accidents, delays by suppliers of material or shortages of material, inability to obtain necessary labor or manufacturing facilities, or other causes beyond its reasonable control.
13. Confidentiality. Proposals, drawings, specifications and technical data furnished to Buyer by A-dec will:
 1. be retained in confidence; (ii) remain the exclusive property of A-dec;
 2. not be disclosed by Buyer to third parties or used in any manner not authorized by A-dec;
 3. be returned to A-dec upon request.
14. Disputes. The rights and liabilities of the parties arising out of or relating to this agreement will be governed by the laws of the state of Oregon; venue in any lawsuit between the parties will lie exclusively in state or federal courts in Portland, Oregon, USA, excluding choice of law rules and excluding the U.N. Convention on International Sales of Goods; and the prevailing party in such litigation will be entitled to recover all reasonable attorneys' fees and other expenses (in addition to statutory "costs" of litigation), including attorneys' fees and expenses in connection with any trial, appeal, or petition for review.
15. ENTIRE AGREEMENT. THIS IS THE ENTIRE AGREEMENT BETWEEN THE PARTIES. IT SUPERSEDES ALL PRIOR OR CONTEMPORANEOUS AGREEMENTS, UNDERSTANDINGS, OR REPRESENTATIONS WITH RESPECT TO THE SUBJECT MATTER HEREOF. THIS AGREEMENT MAY NOT BE MODIFIED OR AMENDED EXCEPT IN WRITING SIGNED BY BOTH PARTIES.

II. Management of Regulated Medical Waste

This dental practice does not have recognizable human anatomical remains other than teeth. This dental practice does not mix hazardous or radiological material with medical waste. This dental practice does not generate chemotherapeutic wastes. Medical waste is not stored for longer than indicated below unless written approval has been obtained from the enforcement agency.

Check appropriate boxes and fill in the blanks.

A. Biohazardous and pathology waste

This dental practice ☒ does ☐ does not generate biohazardous waste.

This dental practice ☒ does ☐ does not generate pathology waste.

The estimated average quantity of this waste generated monthly is 25 lbs _____.

Biohazardous and pathology waste are placed in "biohazardous bags" that are impervious to moisture and impact resistant. Biohazardous waste is placed in **red** biohazardous bags and pathology waste is placed in **white** biohazardous bags. These bags are placed in containers located:

The containers that hold the biohazardous bags are:

- Leak-resistant
- Rigid
- Disposable, reusable, or recyclable (with approval of enforcement agency)
- Are any color
- Kept clean and in good repair
- Labeled "Biohazardous Waste" or "Biohazard" on lid and sides; no specific color required for the container itself. The container that holds pathology waste shall be labeled "Pathology Waste," "PATH," or other label approved by the department on the lids and sides.
- Closeable with tight-fitting lid
- Picked up by a CDPH registered waste hauler or shipped out of the office using a U.S. Postal Service-approved mail back system every (*check the appropriate box*):
 - ☒ 7 days (>20 lbs. biohazardous waste generated/month)
 - ☐ 30 days (<20 lbs. biohazardous waste generated/month, stored above 0°)
 - ☐ 90 days (<20 lbs. biohazardous waste generated/month, stored below 0°)

Before disposal, stored biohazardous bags are tied to prevent leakage or expulsion of contents during storage, handling, or transport

B. Pharmaceutical waste (does not include controlled substances)

This dental practice ☐ does ☒ does not generate pharmaceutical waste.

The estimated average quantity of this waste generated monthly is _____.

Pharmaceutical waste is placed in containers located: _____

The containers are:

- Leak-resistant.
- Closeable with tight-fitting lids,
- Labeled with the words "HIGH HEAT OR INCINERATION ONLY," or with another label approved by the enforcement agency, on the lid and sides, so as to be visible from any lateral direction
- Picked up by a CDPH registered waste hauler or shipped out of the office using a U.S. Postal Service-approved mail back system (check appropriate box):
 - ☐ no later than 7 days when the container of combined pharmaceutical and sharps waste is ready for disposal
 - ☐ within 30 days if pharmaceutical waste is placed with biohazardous waste in a common container
 - ☐ no later than 90 days when the container of only pharmaceutical waste is ready for disposal (the container is emptied at least once per year unless prior written approval is given by the local enforcement agency)

Disposal of expired controlled substances is through the use of a DEA-registered reverse distributor. *(Local DEA offices can provide the names of reverse distributors.)*

C. Sharps waste

This dental practice ☒ does ☐ does not generate sharps waste.

The estimated average quantity of this waste generated monthly is 100 lbs _____ .

Sharps waste is placed in containers easily accessible and located in the immediate areas where sharps are used: Patient treatment areas and preclinical laboratories.

Sharp containers used in this dental practice are:

- Cleared by FDA as sharps containers.
- Not overfilled and maintained upright.
- When ready for disposal, taped closed or lid tightly closed.
- Labeled with the words "Biohazard" and the international biohazard symbol, or "Sharps Waste."
- Picked up by a CDPH registered waste hauler or shipped out of the office using a U.S. Postal Service-approved mail back system *(check appropriate box)* :

☒ within 30 days of filling (3/4 full or at fill line of container).

☐ every 30 days if sharps container is placed with biohazardous waste in a common container

Handling of Sharps Waste: Handle all sharps in a manner to prevent accidental punctures and personal contamination. Needles should never be bent or cut during disposal. Never put hands into a container for contaminated sharps.

D. Consolidating Waste in a Common Container

This dental practice ☐ does ☒ does not consolidate sharps waste and pharmaceutical waste into a common container.

If a common container is used, it is labeled with the biohazardous waste symbol and the words "HIGH HEAT OR INCINERATION ONLY," or with another label approved by the enforcement agency, on the lid and sides, so as to be visible from any lateral direction.

E. Decontamination of Reusable Containers

This dental practice ☒ does ☐ does not use reusable rigid containers for medical waste.

These containers are thoroughly washed and decontaminated as required by the MWMA using a method approved by the enforcement agency each time they are emptied, unless the surfaces of the containers have been completely protected from contamination by disposable liners, bags, or other devices removed with the waste. These containers are maintained in a clean and sanitary manner. Methods of decontamination include, but are not limited to, agitation to remove visible soil combined with one of the following procedures:

- (a) Exposure to hot water of at least 82 degrees Centigrade (180 degrees Fahrenheit) for a minimum of 15 seconds.
- (b) Exposure to chemical sanitizer by rinsing with, or immersion in, one of the following for a minimum of three minutes:
 - (1) Hypochlorite solution (500 ppm available chlorine).
 - (2) Phenolic solution (500 ppm active agent).
 - (3) Iodoform solution (100 ppm available iodine).
 - (4) Quaternary ammonium solution (400 ppm active agent).

This dental practice does not use reusable pails, drums, dumpsters, or bins used for medical waste for the containment of solid waste, or for other purposes, except after being decontaminated as described above and removing all medical waste labels.

III. Disposal of Regulated Medical Waste

In this dental practice the disposal of regulated medical waste is by: *(check appropriate boxes and complete information)*

☐ CDPH-registered medical waste transporter

Company name _____

Company address _____

Company telephone number _____

Type of waste disposed: ☐ biohazardous/pathology ☐ pharmaceutical ☐ sharps

☐ U.S. Postal Service-approved mail back system

Company name _____

Company address _____

Company telephone number _____

Type of waste disposed: ☐ biohazardous/pathology ☐ pharmaceutical ☐ sharps

☐ **On-site treatment and disposal**

Regulated medical waste may be rendered non-infectious using CDPH-approved treatment methods or using sterilization. The practice must register with the local enforcement agency **unless** the treatment methodology is designated as "permit-exempt."

Type of waste treated and disposed: ☐ biohazardous/pathology ☐ sharps

Please check applicable box(es):

- ☐ Isolysers Sharps Management System for sharps disposal is used (state permit exempt).
After treatment by this method, sharps are (*check appropriate box*):

☐ destroyed ☐ stored in a manner that prevents public access until disposal

- ☐ Other CDPH-approved method is used (*permit required; describe method; see MWMA §118215 et seq for requirements*):

Disinfection with a disinfectant, followed by encasement in dental stone is NOT a legal method of medical waste treatment in California.

Back-up Plan: If the treatment system is not operating, the dental practice will utilize the medical waste transporter indicated above.

Closure Plan: The dental practice, upon closure or sale of the practice, will ensure containers used for medical waste treatment are properly disposed or sanitized.

Emergency Action Plan: This dental practice will develop this plan upon development of regulations by the state Department of Public Health.

☐ **Self-hauling/Materials of Trade**

Under the U.S. Department of Transportation materials of trade exemption regulation, the dental practice owner or designated staff may transport medical waste in their own vehicle to a permitted medical waste treatment facility, a transfer station, or other health care facility for the purpose of consolidation before treatment and disposal, without a permit or registration under the following conditions:

- Combination packaging must consist of one or more inner packagings, each of which may not contain more than 4 kg (8.8 lbs) or 4 L (1 gallon), and an outer packaging containing

not more than 16 kg (35.2 lbs) or 16 L (4.2 gallons). The entire package must be secured in the vehicle as to prevent shifting during the motor vehicle's operation.

- Hazard communication. The individual transporting the medical waste must be informed of its presence and of the requirements of this section.
- The individual transporting the medical waste shall provide a form to the receiving facility. The form shall contain:
 - The name of the person transporting the medical waste
 - The number of containers of medical waste transported
 - The date the medical waste was transported.

Type of waste disposed: ☐ biohazardous/pathology ☐ pharmaceutical ☐ sharps

IV. Special Storage Consideration for Regulated Medical Waste

A. Common Storage Facility *(check applicable box)*

- ☒ This office does not use a common storage facility for its medical waste.
- ☐ A common storage facility is used by this office and other dental and medical offices in this building.
 - ☐ The permit for this common storage facility is held by *(name, address and telephone number of dental or medical office, registered hazardous waste transporter, property owner, or property management firm)*:
 - ☐ This office holds the permit for a common medical waste storage facility. A separate Medical Waste Management Plan has been prepared for the facility. The permit, plan and a list of the small quantity waste generators who use the storage facility are filed at this dental practice. *(The list of small quantity generators includes their suite number, telephone number, and name of the contact person.)*

B. Accumulation/Interim Storage Area *(check applicable box)*

- ☐ This office does not use an accumulation/interim storage area for its medical waste.
- ☒ This office uses an area to accumulate and store medical waste containers prior to pick-up or transportation for disposal. The area is *(choose one)* ☐ locked ☐ under supervision or surveillance or otherwise secured to deny access to unauthorized individuals. The area has warning signs in English, "CAUTION—BIOHAZARDOUS WASTE STORAGE AREA—UNAUTHORIZED PERSONS KEEP OUT," and in Spanish, "CUIDADO—ZONA DE RESIDUOS—BIOLOGICOS." An outdoor enclosure or designated accumulation area is protected from animals and natural elements and will not provide a breeding place or a food source for insects or rodents.

V. Spills of Medical Waste

If biohazardous waste is dropped or spilled onto the floor or counter in the practice, trained personnel wearing personnel protective equipment will place waste in biohazardous container and will disinfect the area of the spill.

VII. Temporary Event Registration

When the dental practice/practice owner is to participate in a temporary event that results in the generation of medical waste (e.g., health fairs, veteran stand downs), the dental practice/practice owner will either (1) obtain documentation from the event sponsor that the sponsor has notified the local enforcement agency of the event, or (2) notify the local enforcement agency of intended participation in the event at least 72 hours before the event.

VIII. Prohibited Actions

Use of compactors is prohibited except as allowed in the Medical Waste Management Act.

Transportation of other generators' medical waste is prohibited except if this dental practice is registered as a waste transporter.

Use of trash chutes for medical waste is prohibited.

Removing waste from containers or biohazardous bags while in the facility is prohibited.

IX. Documentation

Shipping and tracking documentation and, if waste is treated on-site, a log of treatment and disposal are retained for a minimum of three years. Documents may be electronically archived. These documents are located:

Checklist for Medical Waste Disposal

Equipment

- x Appropriate bags for biohazardous waste and containers to hold the bags.
- x Appropriate container for pharmaceutical wastes.
- x FDA-approved sharps container.
- x If used, a CDPH-approved sharps treatment system.
- ☐ If used, a CDPH-approved mail-back system.

Employee Training Checklist

- x Informed of the person responsible for medical waste management in the office.
- x Instructed on labeling and use of containers for regulated medical waste.
- x Instructed that the term “sharps waste” includes needles, syringes, blades, and anesthetic carpules contaminated with blood or other bodily fluids.
- x Instructed that “pharmaceutical waste” does not include controlled substances.
- x Instructed that “biohazardous waste” includes disposable absorbent material that drips blood or saliva.
- x Instructed on how to clean up spills of biohazardous waste.
- x Instructed not to place recognizable human tissues into solid waste containers.
- x Instructed not to place extracted teeth with amalgam fillings, hazardous wastes, universal wastes, or recyclable metals into medical waste containers.
- x Informed on how the practice disposes and/or treats medical waste. Provide additional training as needed.
