For one hour of live instruction

Abstract:

The emergence of student online learning resources has changed the relationship between student and educator. The lecture methods that we now employ reflect more of what we desire for our students than what they may want or need.

Dr. Culler will share methods and ideas to impart more relevant content and better engage today's students in learning.

Considerations for change in our curriculum will be discussed.

Learning Objectives

- Examine ways to avoid lecture pitfalls.
- Identify tools to improve engagement, reception and learning impact of medical school lectures.
- Restate faculty and student opinions regarding improvement in lecture relevance and value.
- Discuss possible changes to our school's lecture-based curriculum.

Our Speaker

Floyd Culler, MD

Professor of Pediatrics,
Endocrinology and Clinical Skills
and CME Medical Director,
CNU COM

BIO: Dr. Culler is a Professor of Pediatrics, Endocrinology and Medical Skills. He further serves CNU College of Medicine students as an academic and career advisor and serves the school as CME Medical Director. Dr. Culler graduated from the University of Tennessee Center for the Health Sciences in 1977. He is a physician with clinical expertise in endocrinology, diabetes and metabolism and has been affiliated with Sutter Memorial Hospital, and the University of California at both Irvine and San Diego. Contact: floyd.culler@cnsu.edu

California Northstate University, College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. In accordance with the Accreditation Council for Continuing Medical Education's Standards for Commercial support, all planners, teachers, and authors involved in the development of CME content are required to disclose to the accredited provider their relevant financial relationships. Relevant financial relationships will be disclosed to the activity audience. No commercial support was received for this activity.
